According to a report falsely ascribed to Athanasius, the Jews of Beirut are said to have insulted the image of Jesus (Leo Diaconus, "Hist." x. 5, ed. Migne, cxvii. 896). In Imnestar or Immum, a little town between Antioch and Chalcis, a similar occurrence is said to have caused the death of a Christian boy; and the perpetrators of the joke were of course severely punished (Socrates, *l.c.* vii. 16; Theophanes, *l.c.* p. 227). In consequence of this event the Christians of Antioch took away from the Jews their synagogues (423). The emperor himself did not respect the property of the Jews, for in 429, after the extinction of the patriarchate, he seized its tax, which formerly went to the patriarch, for the imperial treasury ("Cod. Theod." xvi. 8, 29).

In Constantinople.

It was Theodosius, also, who expelled the Jews from Constantinople proper, assigning them to a district on the other side of the Golden Horn above Galata, called Stenum (*Στενόν*), Stanor, or Stanayre (but now changed to Juderia or Judeca), in which was also their cemetery. Hitherto they had occupied in the city itself a special quarter, the copper market (*χαλκοπράτεια*), containing their synagogue, which was turned later into a Christian church. They were now under the jurisdiction of a special strategus; but Manuel Comnenus again put them under the municipal authorities (Du Fresne, "Histoire Byzantine," ii. 167, Paris, 1680). Benjamin of Tudela, also, did not find the Jews in the city itself, but across the inlet. A staircase, which probably led to the Jewish cemetery, was called *Ἑβραική σκάλα* (Ducange, "Notæ in Alexiadem," ad 161 D.). Jews and Samaritans here held such large manufacturing interests that merchants in general were called "Samaritans" (Schwarz, "Samarit. Pentat." p. 42).

The feeling of Emperor Zeno (474–491) against the Jews is illustrated by a remark at the races of Antioch. The "Party of the Green" murdered many Jews, threw their corpses into the fire, and burned their synagogue. "They should have burned the living ones also," said the emperor (Malalas, "Chronographia," ed. Bonn, p. 389). The charioteer Kalliopas, who had come to Antioch from Constantinople, also caused a massacre of the Jews, July 9, 507 (Malalas, *ib.* p. 396). Small wonder that there was a baptized Jew, Bassus, even in the Palestinian city Paneas (*idem*, p. 239). Palestine suffered much in those days: Acre and Ptolemais were destroyed by earthquakes; and in Beirut the synagogue fell (Joshua Stylites, ch. xlvii.). In 523 Justin renewed

Samaritans.

the decree of Theodosius the Younger, forbidding the Jews and the Samaritans to hold positions of honor ("Codex Justinianus," i. 5, 12). Although nominally no difference was made between Jews and Samaritans, the latter were even more oppressed, since they could not act as witnesses, nor will away their property. During the reign of Zeno, in 490, at Pentecost, the Samaritans of Nablus fell upon the Christians, maltreated their bishop, and desecrated their church; as a punishment the emperor took away their holy mountain, Gerizim, presented it to the Christians, and built a church there.

Under Justinian (527–567) the Samaritans rose again, chose Julian b. Sahar for their king (June, 530), fell upon the Christians, and burned their churches. The emperor's troops suppressed the riots, killed 20,000 Samaritans, and executed the leaders. Many Samaritans thereupon were converted; the others remained at Nablus and in the vicinity of Mt. Gerizim (Theophanes, *l.c.* p. 411; Procopius, "Historia Arcana," ch. ii.; "Chron. Paschale," ed. Bonn, p. 619). The Jews did not take part in this riot (Malalas, *l.c.* p. 445), the immediate cause of which was a quarrel at an athletic game. It is known that Jews and Samaritans were employed as charioteers (*ib.* p. 446). During a race at Cæsarea in Palestine both the Jews and the Samaritans engaged in a riot (Theophanes, *l.c.* ad annum 555) against the Christians, pulled down their churches, and killed Stephen, the prefect of the city. The emperor had the rioters severely punished by Amantius, or Adamantius (Procopius, *l.c.* ed. Bonn, pp. 150–152). It was perhaps in mockery of the Jews that there was in the circus of Constantinople the inscription *Παλαιστινάρχης* ("Ruler of Palestine") as the name of a horse (Kumanudes, *Συναγωγὴ 'Λέξεων Ἀθησαυρίστων*, p. 248, Athens, 1883). On the other hand, the Jewish era ("æra mundi") is found on an inscription from the year 858, at Nicæa in Bithynia ("Byzantinische Zeitschrift," i. 77). The Jews had always defended the Persians. When Tella in Mesopotamia was besieged by Kobad in 505, the Jews, through treachery, fell into the hands of the Greeks, and were all massacred by the Greek general Leontius (Joshua Stylites, ed. Wright, ch. lviii.).

Justinian was the first emperor who not only curtailed the civic rights of the Jews, but interfered also in their religious customs and traditions. He forbade the celebration of the Passover if it fell before the Christian Easter (Procopius, *l.c.* ch. xxviii.), because a Christian sect, the Quartodecimani, still celebrated this festival together with the Jews. An anonymous writer violently attacks both the Jews and the Quartodecimani for this (Photius, "Myriobiblon," ed. Migne, ciii. 390). The ancient community of Barion in northern Africa was even forced into baptism by Justinian (Procopius, "De Ædificiis," vi. 2), perhaps because it had resisted Belisarius in his expedition against the Vandals. After Belisarius had conquered the empire of the Vandals he carried to Constantinople the venerated treasures of the Temple, which they had taken from Rome; but, on the advice of a Jew, Justinian sent them to Jerusalem (Procopius, "Bellum Vand." ii. 9). The Jews, having good reason to stand by the Goths, heroically defended Naples in southern Italy against Belisarius in 536 (Procopius, "Bellum Goth." i. 8). It was an evil day for the Jews of Italy when they too came under Byzantine rule. Under Mauritius, in 584, a church in Jerusalem fell; the emperor sent Jews from Constantinople to restore it.

War Between Rome and Persia.

Under Phocas occurred the bloody uprising of the Jews of Antioch. Phocas himself was murdered, but his successor, Heraclius (610–642), also waded in the blood of the Jews. During his reign important events took place in Palestine, which are differently reported in the various chronicles. In the fourth year of Heraclius' reign, according to a Syrian source ("Rheinisches Museum für Classische Philologie," xlviii. 164), Sahrparz, general of Chosroes II. of Persia, conquered Damascus, in the following year Galilee, and in the year after Jerusalem, killing 90,000 persons there. "The Jews bought the captive Christians for a small sum, and in their wickedness put them to death"; but the source of this remarkable statement, Bar Hebræus Abulfaraj, is careful to qualify it by adding that "most of the Christians were killed by the Persians and only a small number by the Jews." Eutychius (Ibn Baṭriḳ), however, asserts that the Jews helped the Persians in this massacre of countless Christians, and George the Monk speaks of myriads of Christians murdered by the Jews at the bidding of the Persians, which statement is corroborated by Theophanes ("Byzantinische Zeitschrift," iii. 343). At all events the Jews dealt cruelly with the Christians, thereby hoping to induce the Persians to cede Jerusalem to them. According to the Syriac source the hope was not realized; on the contrary, all Jews from that city and the vicinity were exiled to Persia. When, after fourteen years, Heraclius came as victor into Palestine, the Jews of Tiberias and of Nazareth, under the leadership of Benjamin of Tiberias, joined him as allies; the emperor would have kept peace with them had not fanatic monks instigated him to a massacre. Only a few Jews escaped into Egypt or sought refuge in caves and in forests (Eutychius, ii. 241).

Heraclius.

In atonement for the violation of an oath to the Jews, the monks pledged themselves to a fast, which the Copts still observe; while the Syrians and the Melchite Greeks ceased to keep it after the death of Heraclius; Elijah of Nisibis ("Beweis der Wahrheit des Glaubens," translation by Horst, p. 108, Colmar, 1886) mocks at the observance. Heraclius is said to have dreamed that destruction threatened the Byzantine empire through a circumcised people. He therefore proposed to destroy all Jews who would not become Christians; and he is reported to have counseled Dagobert, king of the Franks, to do the same (Pertz, "Monumenta Germaniæ Historica," i. 286, vi. 25; compare Joseph ha-Kohen, "'Emeḳ ha-Baka," tr. Wiener, p. 5). The saying of the Tiburtine sibyl (Sackur, "Sibyllinische Texte," p. 146, Halle, 1898), that the Jews of the Byzantine empire would be converted in one hundred and twenty years, seems to refer to these occurrences, since about one hundred and twenty years elapsed from the time of the Persian war under Anastasius, in 505, to the victory of Heraclius in 628. It has been thought that a Jewish apocalypse also refers to this expedition of Heraclius against the Persians (Buttenwieser, "Elias-Apokalypse," Leipsic, 1897; see Apocalyptic Literature, Neo-Hebraic; see, however, "Jew. Quart. Rev." xiv. 359). No further persecutions of the Jews under Heraclius are reported. But the Jews again showed their warlike spirit when, as Nicephorus narrates, they stormed the Church of St. Sophia at Constantinople, which at that time was protected by the empress Martina and her son Heracleonas. Heraclius' dream was fulfilled in an unexpected way. Judea, Syria, and Egypt fell into the hands of the circumcised Arabs and ceased to exist for the Byzantine empire; and the Jews were no longer excluded from Jerusalem.

The Iconoclasts.

The Byzantine empire was now considerably smaller, but all the more bitter were the persecutions originating there. It is said that Leo the Isaurian (718–741) as an itinerant pedler met some Jewish fortune-tellers, who predicted that he would win the Roman empire if he abolished idolatry (Glycas, "Annal." i. 280; Gibbon, "Decline and Fall," v. 185). The iconoclasts, of whom Leo was the first, were nicknamed "Jews," as the pure Jewish religion forbade image-worship. The sentence of a wise man was frequently quoted: "You have often heard that the Hebrews and Samaritans condemn images, hence all those who condemn them are Jews" (Mansi, "Sacrorum Conciliorum," etc., xiii. 167). The reading of Isa. xl. 18, at Christmas, 814, so affected Emperor Leo V., the Armenian, that he turned iconoclast. The same may be supposed of the Isaurian, who was acquainted with Jews and Arabs. Nevertheless he forced the Jews of his empire to be baptized (723), many submitting, but at the first opportunity returning to their ancient faith. Others fled to freer countries, a number of Greek Jews going to the Crimea, to the Caucasian districts, or to the kingdom of the Chazars, where they effectively planted the seeds of Judaism.

Basil I.

The former comrade in arms of Leo the Armenian, Emperor Michael II., stood in peculiar relations to Judaism. Many Jews were living in Amorion, a city in upper Phrygia. The Greek inhabitants belonged to a sect which, while believing in baptism, lived according to the Mosaic law in all things except circumcision. In spiritual as well as in temporal affairs it had as its leader a man or a woman who must have been born a Hebrew. Michael the Phrygian in his youth had belonged to this sect. Thus he had been ruled by Jews before he in turn ruled them (Additions to Theophanes, ed. Migne, cix. 56). The so-called "Attinganes" also may be regarded as Jews (Basnage, "Histoire des Juifs," v. 1482). Basil I., the Macedonian (867–886), third ruler after Michael, affected the lot of the Jews as no other Greek emperor had done. Knowing well that the religious disputations which he convoked between Jews and Christians led to no results, he promised relief from the burdensome taxation, and honors and offices to all Jews who should elect to be baptized. Perhaps by threats rather than by promises, he induced many Jews to be converted, although, as the source expressly adds, they returned to Judaism immediately after the emperor's death (*ib.* p. 341; Simeon Magister, *ib.* p. 690; Georgius Monachos, *ib.* p. 842; Cedrenus, in the "Compendium," p. 241). The Chronicle of Aḥimaaẓ (Neubauer, "Medieval Jewish Chronicles," vol. ii.) shows the far-reaching consequences of the emperor's edict. From Otranto the terrible news spread even to the Byzantine provinces of southern Italy, and it was only through a miracle, when Shephatiah b. Amittai cured the insane daughter of the emperor, that five Jewish communities there were saved; while more than one thousand communities were forced to submit to baptism. Shephatiah expressed his sorrow in touching penitential songs; and this characteristically Byzantine act became the subject of Maḥzor commentaries. The Chronicle of Aḥimaaẓ says that Basil's son, Leo VI., the Philosopher, restored religious freedom to the Jews; this agrees with the statements found in the continuation of Theophanes. However, the "Basilica," that "corpus juris" which was begun by Basil and continued and completed by Leo VI. and Constantine VII. Porphyrogenitus, contains some stringent measures in regard to the Jews. But more rigidly than these imperial edicts were the edicts of the Church enforced.

The heretical patriarch of Constantinople, Photius, who had for his teacher a Jewish necromancer, and who was himself the tutor of the imperial philosopher, collected the ecclesiastical laws into the nomocanon. The sixth ecumenical council (680–681), which was the third convened at Constantinople, prescribed in Tit. iv., canon 78, that the Samaritans, with whom there had been trouble, should not be admitted too hastily to baptism. The seventh ecumenical council, the second held at Nicæa, in 787, dealt in the eighth canon with the same subject; this time, however, in regard to the Jews, who, it said, ought to remain Jews rather than mock at Christianity under the mask of Christians. Emperor Constantine VIII., in 1026, added to these laws a regulation for a special Jew's oath.

Messianic Hopes.

Soon afterward the Byzantine Jews were stirred by events of world-historic importance. At the time of the first crusade (1096), Messianic hopes filled both the Germanic and the Greek Jews, who expected no less than that Palestine would be restored to the Jews. A letter found in the genizah of Cairo ("Jew. Quart. Rev." ix. 27–29), which was sent from Tripolis to Constantinople, seems to indicate that Emperor Alexius Comnenus and the Patriarch (this is the interpretation of the "great Hegemon") exempted the Jews, perhaps only those of Salonica, from taxation, either because they were unable to pay taxes on account of the stress of the time, or because the emperor, fearing lest they should sympathize with the Latin crusaders, tried to secure their loyalty. Signs were reported from Salonica which were taken to announce the advent of the Messiah. These hopes, however, were deceptive; the Jews suffered untold misery at the hands of the crusaders, and Palestine, wrested from the

Mohammedans, was not even allowed to be the sanctuary of Jewish piety (*ib.* x. 139-151).

In Eleventh and Twelfth Centuries.

About the year 1000 Elijah of Nisibis ("Beweis der Wahrheit," p. 42) gave the following description of the Byzantine Jews: "The Romans tolerate many Jewish inhabitants within their borders, protect them, permit them to worship in public, and to build synagogues. The Jew in his country openly declares: 'I am a Jew.' He cherishes his religion, prays in public, is not called to account for it, nor is he prevented from observing it, and no difficulties are put in his way." The Nestorian metropolitan here shows how much better was the condition of the Jews than that of the Christian heretics. Moreover, it appears that the Greek Jews were more favorably circumstanced than their brethren in most of the other countries of Europe; the Greeks found the conduct of the Latins toward the Jews unjust and abhorrent (Basnage, "Histoire des Juifs," v. 1749). Therefore it is an error on the part of the traveler Pethahiah to speak of the bondage of the Jews in Greece. He himself testifies at the end of his work that there were a great many Jewish communities in Greece; consequently they could not have been so badly treated. The traveler Benjamin of Tudela (about 1170) also testifies to the peace and prosperity enjoyed by the Greek Jews. In Otranto, the last town in southern Italy that remained under Byzantine rule, there were 500 Jews, but in Corfu only one Sicilian Jew; in Arta (or Larta), 100 families, whose leader was significantly called "Rabbi Heracles"; in Achelaos were 2 Jews; in Patras, 50; in Lepanto, 100; in Krisso near Mt. Parnassus, 200 Jews, engaged in agriculture; in Corinth, 300; in Thebes, 2,000. A Jew from Thebes is mentioned in the Messianic letter from Tripolis, and Judah al-Ḥarizi also mentions this city. Its Jewish scholars stood second only to those of Constantinople, and the best silks and purple stuffs of the whole Byzantine empire were manufactured by its Jews. Silk-culture had been quickly learned by the Byzantine Jews, who became masters of the art, some of them being transported to Sicily by Roger, king of Naples. In Eubœa there were 200 Jews; in Taburtrissa, 100; in Rovinaca, 100; in Armiros, a great commercial city, 400; in Vissena, 100; in Salonica, 500; in Mitrizzi, 20; in Drama, 140; in Christopolis, 20; in Rodosto, 400; in Gallipoli, 200; in Kilia, 50. In Zeitum, on the borders of Wallachia, Benjamin found 50 Jews. The Wallachians pillaged the Greeks, but did not molest the Jews; they even gave to their children Jewish names, and called themselves brothers to the Jews. In Constantinople—that is, across the inlet—lived 2,000 Rabbinite and 500 Karaite Jews, separated by a wall. In addition to celebrated teachers, there were silk-workers, merchants, and bankers; they were often disturbed by the tanners near whom they lived. On the Greek islands also were many Jews: on Mitylene were 10 communities, on Chios 400 families, on Samos 300, on Rhodes 400, and on Cyprus several communities, among whom were some heretics.

Internal Constitution.

Benjamin of Tudela, and Justinian in his one hundred and forty-sixth novella, describe quite accurately the communal affairs of the Jews of the Eastern empire. Since the extinction of the patriarchate they had no central authority. In the several communities the heads of the academies ("reshe pirḳe," *ἀρχιφερεκίται*) managed the affairs, assisted by the elders (*πρεσβύτεροι*) or masters ("magistri"). In Palestine the rabbis were designated by the Greek expression "wise men" (*σοφοί*), a title that survived in the Sicilian communities during the whole Middle Ages ("Jew. Quart. Rev," vi. 235). The delegates to the communities were called *ἀπόστολοι*. The "Cod. Theod." xvi. 8, 10 also mentions the primates of the Jews. When Benjamin of Tudela visited the Jews at Salonica, they had their own mayor (*ἔφορος*). This was during the reign of Manuel Comnenus (1143-80), who, as has been said, put the Jews of Constantinople under the jurisdiction of the common courts. He permitted his physician, Solomon the Egyptian, to ride a horse. At Corfu, where the Jews were increasing, the Jewish syndics dressed like the Christian syndics, but were not permitted to carry a sword. Here the Jews retained their old constitution even under Venetian rule (Romanos, in "Hestia," Athens, 1891; "Rev. Et. Juives," xxiii. 69-74; concerning the Jewish community of Corfu see Romanos, *l.c.*).

The once powerful Byzantine empire grew ever weaker, Arabs, Bulgarians, Venetians, and Turks despoiling it of its most beautiful provinces. There came a time when Jewish funds helped to sustain the weakened realm. In 1237 the pope, Gregory IX., permitted the king of France to send money obtained from the Jews to the Byzantine empire (Stern, "Stellung der Päpste zu den Juden," Nos. 198-200, Kiel, 1895). Under the Bulgarian czar, Joannes Alexander (1331-65), who married a Jewess called after baptism "Theodora," the Jews are said to have made themselves obnoxious and to have created disturbances (Jirecek, "Gesch. der Bulgaren," p. 312, Prague, 1876). In Bulgaria the Jews were employed as executioners (*ib.* p. 380). This was a Byzantine custom, as may be learned from a letter of R. Jacob de Venice to Fra Pablo Christiani (Kobak, in "Ginze Nistaroth," 1868, pp. 1-31; compare "Monatsschrift," 1870, p. 117). The spirit of intolerance still permeated the polemical work of Emperor Joannes Cantacuzenus (1347-55), which was, however, directed against the Mohammedans rather than the Jews (ed. Migne, cliii., cliv.); a century later this spirit entirely disappeared. One often meets polemical writings against the Jews (Jahn, "Anecdota Græca Theologica," p. xvi., Leipsic, 1893), and the Greek opponent declares that he uses the Jewish language (*ib.* p. 1).

Jewish Relics at Constantinople.

The beautiful city of Constantinople fell into the hands of the Turks in 1453, and, curiously enough, the Greeks mourned with songs patterned after the Hebrew Threni. Countless monuments of art, many pertaining to Judaism, were destroyed. Nearly all the personages of the Old Testament had statues here, which were reverenced by the Jews, even though they served Christian purposes. The staff of Moses, and the cross, both brought by Constantine the Great from Jerusalem, were considered the most precious treasures of the empire. Until 1204 the statue of a rider with winged feet stood in the cattle market ("forum tauri"), representing Bellerophon, though the people regarded it as Joshua when he bade the sun stand still. Abraham Zacuto held the characteristic if erroneous opinion that Job was buried in Constantinople ("Yuḥasin," ed. London, p. 6). The Midrash books, most of which received their final form in the Byzantine empire, often speak of the new Rome, or Babel, as it is also called, especially in regard to the size of this city (Midr. Teh. xlviii. 4; B. B. 75b; see also Berliner's "Magazin," xix. 239). In a late Midrash the throne and circus of Constantinople are discussed, and Benjamin of Tudela describes the throne. Under the name "Kostantine" the city is often mentioned in the later Midrash and Targum, and even more frequently in the Jewish literature of the later Middle Ages. Aside from its figurative names, such as "'Uz," "Buz," "Magdiel," etc., the Byzantine empire is usually called "Romania," for the Byzantines always considered themselves Romans. The name is especially applied to the ritual, and mention is frequently made of a Roman or Grecian ritual (Zunz, "Ritus," p. 79) and of a Roman Maḥzor (ed. princeps, Constantinople, 1510). **Liturgy.** Affinity to the Greek ritual is shown not only by those of Corfu and of Kaffa (a city of the Crimea, which like many others was influenced by Constantinople), but also by those of Germany, France, and Italy, into each of which, the Byzantine empire being the medium, the Palestinian ritual was introduced; while Spain and the farther Orient were guided by the Babylonian ritual. Technical terms for the liturgical poetry in Hebrew (as "ḳeroba") and especially in Greek (as "piyyuṭ," from *ποιητής, ποίησις*, לטרג from *λειτουργία*, סנדק from *σύνδικος* or *σύντεκνος*, פזמון from *ψαλμός*) spread from here to the European countries. The influence of the Byzantine Jews on Judaism in general is in fact much greater than has heretofore been acknowledged.

As long as the academies of Babylonia flourished they were much frequented by Greek Jews, especially by Jews from Constantinople, whose knowledge of the Greek language was often of advantage to the Geonim (Harkavy, "Teshubot ha-Geonim," pp. 24, 105). Hai Gaon learned Greek from them for his lexicographic work. Even Naḥmanides in Spain studied under a Greek scholar (on B. B. 8a). Matthew of Edessa (1136) mentions in his chronicle a great Hebrew scholar of Cyprus, named Moses, who even in matters of religion judged between Greeks and Armenians (Wiener, in "Hebr. Bibl." vi. 116). Ibn Ezra mentions "the wise men of Israel in the land of Javan" (on Jonah i. 2). In his introduction to the commentary on the Pentateuch he speaks of the Greeks as forming a special school of Bible exegesis. Their method is the so-called "Derush," though they held it superfluous to compile older Midrash works. Two eminent representatives of this method, both from Castoria in Bulgaria, are Tobiah b. Eliezer, author of "Leḳaḥ Ṭob" (edited by S. Buber), and his pupil Meïr, author of "Or 'Enayim." Tobiah also took part in the Messianic movement of 1096, mentioned above, and both are cited by their countryman Judah (Leon) Mosconi of Ochrida in Bulgaria (about 1360; Berliner's "Magazin," iii. 95), who in recent times became known as the owner of a valuable library ("Rev. Et. Juives," xl. 63). **Jewish Authors.** The work "Kebod Elohim" of R. Abraham Cohen of Patras is preserved in manuscript. Joseph "the Greek" is known as a translator. In the sphere of this Greek learning were also the Jews of southern Italy and of Sicily, prominent among whom was Shabbethai Donnolo (about 970) of Oria, physician to the Byzantine viceroy Eupraxius. The well-known Isaiah di Trani also lived in Greece, and from his responsa may be gleaned the fact that some rabbinical observances were neglected by the Greek Jews ("Jew. Quart. Rev." iv. 99). Whether Hillel b. Eliakim, the Midrash commentator, lived in Greece or in southern Italy is not known. The Mishnah commentator Isaac Siponto also deserves mention; and a certain R. Baruch from the land of Javan is named as a Talmudic authority. Shemariah b. Elijah Cretensis, in Spain called simply "the Greek," a philosopher and grammarian, was prominent in the fourteenth century. The "Greek" Zerahiah (fourteenth century) is the author of "Sefer ha-Yashar." Besides these there were in Greece several liturgic poets; but they were unfavorably criticized by the competent judge Judah al-Ḥarizi, who singles out for commendation only the poet Michael b. Kaleb of Thebes. Since Abraham ibn Ezra and Maimonides ("Niṭ'e Na'amanim," 17b) also pass adverse judgment on the scholars of Greece, the intellectual endowments of the latter must have been mediocre.

But the Byzantine empire was and remained the classic land of the Samaritans and the Karaites. The frequent uprisings of the former have already been mentioned. The literary activity of the Karaites is most noteworthy. They seem to have had a systematic organization, for Aaron b. Judah Kusdini (about 1120) is named as the leader of the Karaite communities of the Byzantine empire (Fürst, "Gesch. des Karäerthums," i. 211). **Karaites.** Distinction was attained by the "Jew" Assaf, probably a Karaite (time uncertain), and by the polyhistor Caleb Afendopolo (fifteenth century), a distinguished botanist, this being a rare attainment among the Jews of the Middle Ages. In Constantinople lived also Judah Hadassi (twelfth century), the greatest Karaite scholar. Most of the Karaite books were destroyed in the frequent conflagrations at Constantinople (Wulfer, in "Theriaca Judaica," p. 289).

In the writings of the Rabbinite as well as in those of the Karaite Jews, Greek, the mother tongue, often has the ascendency, to the extent of entire Greek glosses (Perles, in "Byzantinische Zeitschrift," ii. 570–584). But such words as רומנט for "Roman," and קושטנטיני for "Byzantine coin," are also found in Western authors; the Jews also used Greek money in Turkish times (year-book "Jerusalem," v. 167). Jerahmeel, who, probably in the eleventh century, made an epitome of the Yosippon, also gives evidence of the thoroughly Greek culture of the Byzantine Jews. "It is certain that in Magna Græca, as in Constantinople, Greek was the vernacular language, and would therefore be used by the Jews" (Neubauer, in "Jew. Quart. Rev." xi. 367). Two facts, both relating to the religious service, especially illustrate how deeply the Jews were steeped in Greek culture. Emperor Justinian was requested by a party of the Jews to have the weekly portions from the Torah translated into Greek. He willingly consented, hoping that thereby the Jews might be converted; he issued, in 553, a decree ordering the Jews to use either the Septuagint translation or that of Aquila. But the Jews reconsidered the matter betimes and retained their old custom. Even more remarkable is the fact that in Candia the Hafṭarah for the afternoon of the Day of Atonement—the Prophet Jonah—was recited in Greek (Elijah Kapsali, ed. Lattes, p. 22). This text, dating from the twelfth or the thirteenth century, is considered by many to be the oldest extant specimen of the Greek vernacular. A complete translation of the Bible into Greek, for the use of Jews, exists in several manuscripts. Such a translation, together with an Aramaic and Spanish translation, was first printed at Constantinople in 1547.

As Greek culture had well-nigh disappeared before the invention of printing, the intellectual products of the Byzantine Jews are to a great extent unknown; here, as well as in the political history of the time, new investigations may lead to fresh discoveries.

G. S. Kr.

C

CABALA.—Name and Origin (Hebrew form **Ḳabbalah** [קבלה, from קבל = "to receive"; literally, "the received or traditional lore"]): The specific term for the esoteric or mystic doctrine concerning God and the universe, asserted to have come down as a revelation to elect saints from a remote past, and preserved only by a privileged few. At first consisting only of empirical lore, it assumed, under the influence of Neoplatonic and Neopythagorean philosophy, a speculative character. In the geonic period it is connected with a Mishnah-like text-book, the "Sefer Yeẓirah," and forms the object of the systematic study of the elect, called "meḳubbalim" or "ba'ale ha-ḳabbalah" (possessors of, or adepts in, the Cabala). These receive afterward the name of "maskilim" (the wise), after Dan. xii. 10; and because the Cabala is called חכמה נסתרה ("ḥokmah nistarah" = the hidden wisdom), the initials of which are ח״ן, they receive also the name of יודעי ח״ן ("adepts in grace") (Eccl. ix. 11, Hebr.). From the thirteenth century onward the Cabala branched out into an extensive literature, alongside of and in opposition to the Talmud. It was written in a peculiar Aramaic dialect, and was grouped as commentaries on the Torah, around the Zohar as its holy book, which suddenly made its appearance.

The Cabala is divided into a theosophical or theoretical system, Ḳabbalah 'Iyyunit (קבלה עיונית) and a theurgic or practical Cabala, קבלה מעשית. In view of the fact that the name "Cabala" does not occur in literature before the eleventh century (see Landauer, "Orient. Lit." vi. 206; compare Zunz, "G. V." p. 415), and because of the pseudepigraphic character of the Zohar and of almost all the cabalistic writings, most modern scholars, among whom are Zunz, Grätz, Luzzatto, Jost, Steinschneider, and Munk (see bibliography below), have treated the Cabala with a certain bias and from a rationalistic rather than from a psychologico-historical point of view; applying the name of "Cabala" only to the speculative systems which appeared since the thirteenth century, under pretentious titles and with fictitious claims, but not to the mystic lore of the geonic and Talmudic times. Such distinction and partiality, however, prevent a deeper understanding of the nature and progress of the Cabala, which, on closer observation, shows a continuous line of development from the same roots and elements.

Meaning of the Word "Cabala."

Cabala comprised originally the entire traditional lore, in contradistinction to the written law (Torah), and therefore included the prophetic and hagiographic books of the Bible, which were supposed to have been "received" by the power of the Holy Spirit rather than as writings from God's hand (see Ta'an. ii. 1; R. H. 7a, 19a, and elsewhere in the Talmud; compare Zunz, "G. V." 2d ed., pp. 46, 366, 415, and Taylor, "Early Sayings of the Jewish Fathers," 1899, pp. 106 *et seq.*, 175 *et seq.*). Each "received" doctrine was claimed as tradition from the Fathers—"masoret me-Abotenu" (Josephus, "Ant." xiii. 10, § 6; 16, § 2; Meg. 10b; Sheḳ. vi. 1)—to be traced back to the Prophets or to Moses on Sinai (compare "meḳubbalani" in Peah ii. 6; 'Eduy. viii. 7). So the Masorah, "the fence to the Torah" (Ab. iii. 13) is, as Taylor (*l.c.* p. 55) correctly states, "a correlation to Cabala." The chief characteristic of the Cabala is that, unlike the Scriptures, it was entrusted only to the few elect ones; wherefore, according to IV Esdras xiv. 5, 6, Moses, on Mount Sinai, when receiving both the Law and the knowledge of wondrous things, was told by the Lord: "These words shalt thou declare, and these shalt thou hide." Accordingly the rule laid down for the transmission of the cabalistic lore in the ancient Mishnah (Ḥag. ii. 1) was "not to expound the Chapter of Creation ("Ma'aseh Bereshit," Gen. i.) before more than one hearer; nor that of the Heavenly Chariot ("Merkabah," Ezek. i.; compare I Chron. xxviii. 18 and Ecclus. [Sirach] xlix. 8) to any but a man of wisdom and profound understanding"; that is to say, cosmogony and theosophy were regarded as esoteric studies (Ḥag. 13a). Such was the "Masoret ha-Ḥokmah" (the tradition of wisdom, handed over by Moses to Joshua (Tan., Wa'ethanan, ed. Buber, 13); and likewise the twofold philosophy of the Essenes, "the contemplation of God's being and the origin of the universe," specified by Philo ("Quod Omnis Probus Liber," xii.). Besides these there was the eschatology—that is, the secrets of the place and time of the retribution and the future redemption (Sifre, Wezot ha-Berakah, 357); "the secret chambers of the behemoth and leviathan" (Cant. R. i. 4); the secret of the calendar ("Sod ha-'Ibbur")—that is, the mode of calculating the years with a view to the Messianic kingdom (Ket. 111a–112a; Yer. R. H. ii. 58b); and, finally, the knowledge and use of the Ineffable Name, also "to be transmitted only to the saintly and discreet ones" (Ẓenu'im or Essenes; Ḳid. 71a; Yer. Yoma iii. 40d; Eccl. R. iii. 11), and of the angels (Josephus, "B. J." ii. 8, § 7). All these formed the sum and substance of the Mysteries of the Torah, "Sitre or Raze Torah" (Pes. 119a; Meg. 3a; Ab. vi. 1), "the things spoken only in a whisper" (Ḥag. 14a).

Antiquity of the Cabala.

How old the Cabala is, may be inferred from the fact that as early a writer as Ben Sira warns against it in his saying: אין לך עסק בנסתרות = "Thou shalt have no business with secret things" (Ecclus. [Sirach] iii. 22; compare Ḥag. 13a; Gen. R. viii.). In fact, the apocalyptic literature belonging to the second and first pre-Christian centuries contained the chief elements of the Cabala; and as, according to Josephus (*l.c.*), such writings were in the possession of the Essenes, and were jealously guarded by them against disclosure, for which they claimed a hoary antiquity (see Philo, "De Vita Contemplativa," iii., and Hippolytus, "Refutation of all Heresies," ix. 27), the Essenes have with sufficient reason been assumed by Jellinek ("B. H." ii., iii., Introductions and elsewhere), by Plessner ("Dat Mosheh wi-Yehudit," pp. iv. 47 *et seq.*), by Hilgenfeld ("Die Jüdische Apokalyptik," 1857, p. 257), by Eichhorn ("Einleitung in die Apoc. Schriften des Alten Testaments," 1795, pp. 434 *et seq.*), by Gaster ("The Sword of Moses," 1896, Introduction), by Kohler ("Test. Job," in Kohut Memorial Volume, pp. 266, 288 *et seq.*), and by others to be the originators of the Cabala.

That many such books containing secret lore were kept hidden away by the "wise" is clearly stated in IV Esdras xiv. 45–46, where Pseudo-Ezra is told to publish the twenty-four books of the canon openly that the worthy and the unworthy may alike read, but to keep the seventy other books hidden in order to "deliver them only to such as be wise" (compare Dan. xii. 10); for in them are the spring of understanding, the fountain of wisdom, and the stream of knowledge (compare Soṭah xv. 3). A study of the few still existing apocryphal books discloses the fact, ignored by most modern writers on the Cabala and Essenism, that "the mystic lore" occasionally alluded to in the Talmudic or Midrashic literature (compare Zunz, "G. V." 2d ed., pp. 172 *et seq.*; Joël, "Religionsphilosophie des Sohar," pp. 45-54) is not only much more systematically presented in these older writings, but gives ample evidence of a continuous cabalistic tradition; inasmuch as the mystic literature of the geonic period is only a fragmentary reproduction of the ancient apocalyptic writings, and the saints and sages of the tannaic period take in the former the place occupied by the Biblical protoplasts, patriarchs, and scribes in the latter.

Cabalistic Elements in the Apocrypha.

So, also, does the older Enoch book, parts of which have been preserved in the geonic mystic literature (see Jellinek, *l.c.*, and "Z. D. M. G." 1853, p. 249), by its angelology, demonology, and cosmology, give a fuller insight into the "Merkabah" and "Bereshit" lore of the ancients than the "Hekalot," which present but fragments, while the central figure of the Cabala, Meṭaṭron-Enoch, is seen in ch. lxx.–lxxi. in a process of transformation. The cosmogony of the Slavonic Enoch, a product of the first pre-Christian century (Charles, "The Book of the Secrets of Enoch," 1896, p. xxv.), showing an advanced stage compared with the older Enoch book, casts a flood of light upon the rabbinical cosmogony by its realistic description of the process of creation (compare ch. xxv.–xxx. and Ḥag. 12a *et seq.*; Yer. Ḥag. ii. 77a *et seq.*; Gen. R. i.–x.). Here are found the primal elements, "the stones of fire" out of which "the Throne of Glory" is made, and from which the angels emanate; "the glassy sea" (מייא מייא), beneath which the seven heavens, formed of fire and water (שמים = מאש ומים), are stretched out, and the founding of the world upon the abyss (אבן שתיה); the preexistence of human souls (Plato, "Timæus," 36; Yeb. 63b; Nid. 30b), and the formation of man by the Creative Wisdom out of seven substances (see Charles, note to ch. xxvi. 5 and xxx. 8, who refers to Philo and the Stoics for analogies); the ten classes of angels (ch. xx.); and, in ch. xxii., version A, ten heavens instead of seven, and an advanced chiliastic calendar system (ch. xv.–xvi., xxxii.; see Millennium). Its cabalistic character is shown by references to the writings of Adam, Seth, Cainan, Mahalalel, and Jared (ch. xxxiii. 10, and elsewhere).

A Continuous Tradition.

More instructive still for the study of the development of cabalistic lore is the Book of Jubilees written under King John Hyrcanus (see Charles, "The Book of Jubilees," 1902, Introduction, pp. lviii. *et seq.*)—which also refers to the writings of Jared, Cainan, and Noah, and presents Abraham as the renewer, and Levi as the permanent guardian, of these ancient writings (ch. iv. 18, viii. 3, x. 13; compare Jellinek, "B. H." iii. 155, xii. 27, xxi. 10, xlv. 16)—because it offers, as early as a thousand years prior to the supposed date of the "Sefer Yeẓirah," a cosmogony based upon the twenty-two letters of the Hebrew alphabet, and connected with Jewish chronology and Messianology, while at the same time insisting upon the heptad as the holy number rather than upon the decadic system adopted by the later haggadists and the "Sefer Yeẓirah" (ch. ii. 23; compare Midr. Tadshe vi. and Charles's note, vi. 29 *et seq.*; Epstein, in "Rev. Et. Juives," xxii. 11; and regarding the number seven compare Ethiopic Enoch, lxxvii. 4 *et seq.* [see Charles's note]; Lev. R. xxix.; Philo, "De Opificios Mundi," 30–43, and Ab. v. 1–3; Ḥag. 12a). The Pythagorean idea of the creative powers of numbers and letters, upon which the "Sefer Yeẓirah" is founded, and which was known in tannaitic times—compare Rab's saying:

"Bezalel knew how to combine [צירוף] the letters by which heaven and earth were created" (Ber. 55a), and the saying of R. Judah b. 'Ilai (Men. 29b), quoted, with similar sayings of Rab, in Bacher, "Ag. Bab. Amor." pp. 18, 19—is here proved to be an old cabalistic conception. In fact, the belief in the magic power of the letters of the Tetragrammaton and other names of the Deity (compare Enoch, lxi. 3 *et seq.*; Prayer of Manasses; Ḳid. 71a; Eccl. R. iii. 11; Yer. Ḥag. ii. 77c) seems to have originated in Chaldea (see Lenormant, "Chaldean Magic," pp. 29, 43). Whatever, then, the theurgic Cabala was, which, under the name of "Sefer (or "Hilkot" Yeẓirah," induced Babylonian rabbis of the fourth century to "create a calf by magic" (Sanh. 65b, 67b; Zunz, "G. V." 2d ed., p. 174, by a false rationalism ignores or fails to account for a simple though strange fact!), an ancient tradition seems to have coupled the name of this theurgic "Sefer Yeẓirah" with the name of Abraham as one accredited with the possession of esoteric wisdom and theurgic powers (see ABRAHAM, APOCALYPSE OF, and ABRAHAM, TESTAMENT OF; Beer, "Das Leben Abrahams," pp. 207 *et seq.*; and especially Testament of Abraham, Recension B, vi., xviii.; compare Kohler, in "Jew. Quart. Rev." vii. 584, note). As stated by Jellinek ("Beiträge zur Kabbalah," i. 3), the very fact that Abraham, and not a Talmudical hero like Akiba, is introduced in the "Sefer Yeẓirah," at the close, as possessor of the Wisdom of the Alphabet, indicates an old tradition, if not the antiquity of the book itself.

The "wonders of the Creative Wisdom" can also be traced from the "Sefer Yeẓirah," back to Ben Sira, *l.c.*; Enoch, xlii. 1, xlviii. 1, lxxxii. 2, xcii. 1; Slavonic Enoch, xxx. 8, xxxiii. 3 (see Charles's note for further parallels); IV Esdras xiv. 46; Soṭah xv. 3; and the Merkabah-travels to Test. Abraham, x.; Test. Job, xi. (see Kohler, in Kohut Memorial Volume, pp. 282–288); and the Baruch Apocalypse throughout, and even II Macc. vii. 22, 28, betray cabalistic traditions and terminologies.

Gnosticism and Cabala.

But especially does GNOSTICISM testify to the antiquity of the Cabala. Of Chaldean origin, as suggested by Kessler (see "Mandæans," in Herzog-Hauck, "Real-Encyc.") and definitively shown by Anz ("Die Frage nach dem Ursprung des Gnostizismus," 1879), Gnosticism was Jewish in character long before it became Christian (see Joël, "Blicke in die Religionsgeschichte," etc., 1880, i. 203; Hönig, "Die Ophiten," 1889; Friedländer, "Der Vorchristliche Jüdische Gnostizismus," 1898; *idem*, "Der Antichrist, "1901). Gnosticism—that is, the cabalistic "Ḥokmah" (wisdom), translated into "Madda'" (Aramaic, "Manda'" = knowledge of things divine)—seems to have been the first attempt on the part of the Jewish sages to give the empirical mystic lore, with the help of Platonic and Pythagorean or Stoic ideas, a speculative turn; hence the danger of heresy from which Akiba and Ben Zoma strove to extricate themselves, and of which the systems of PHILO, an adept in Cabala (see "De Cherubim," 14; "De Sacrificiis Abelis et Caini," 15; "De Eo Quod Deterius Potiori Insidiatur," 48; "Quis Rerum Divinarum Heres Sit," 22), and of PAUL (see Matter, "History of Gnosticism," ii.), show many pitfalls (see GNOSTICISM, MINIM). It was the ancient Cabala which, while allegorizing the Song of Songs, spoke of ADAM ḲADMON, or the God-man, of the "BRIDE of God," and hence of "the mystery of the union of powers" in God (see Conybeare, "Philo's Contemplative Life," p. 304), before Philo, Paul, the Christian Gnostics, and the medieval Cabala did. Speculative Cabala of old (IV Esd. iii. 21; Wisdom ii. 24) spoke of "the germ of poison from the serpent transmitted from Adam to all generations" (זוהמה של נחש) before Paul and R. Johanan ('Ab. Zarah 22b) referred to it. And while the Gnostic classification of souls into pneumatic, psychic, and hylic ones can be traced back to Plato (see Joël, *l.c.* p. 132), Paul was not the first (or only one) to adopt it in his system (see Ḥag. 14b; Cant. R. i. 3, quoted by Joël; compare Gen. R. xiv., where the five names for the soul are dwelt upon).

Cabalistic Dualism.

The whole dualistic system of good and of evil powers, which goes back to Zoroastrianism and ultimately to old Chaldea, can be traced through Gnosticism; having influenced the cosmology of the ancient Cabala before it reached the medieval one. So is the conception underlying the cabalistic tree, of the right side being the source of light and purity, and the left the source of darkness and impurity ("siṭra yemina we siṭra aḥara), found among the Gnostics (see Irenæus, "Adversus Hæreses," i. 5, § 1; 11, § 2; ii. 24, § 6; Epiphanius, "Hæres," xxxii. 1, 2; "Clementine Homilies," vii. 3; compare Cant. R. i. 9; Matt. xxv. 33; Plutarch, "De Isiḳe," 48; Anz, *l.c.* 111). The fact also that the "Ḳelippot" (the scalings of impurity), which are so prominent in the medieval Cabala, are found in the old Babylonian incantations (see Sayce, "Hibbert Lectures," 1887, p. 472; Delitzsch, "Assyrisches Wörterbuch," *s.v.* קלף), is evidence in favor of the antiquity of most of the cabalistic material.

It stands to reason that the secrets of the theurgic Cabala are not lightly divulged; and yet the Testament of Solomon recently brought to light the whole system of conjuration of angels and demons, by which the evil spirits were exorcised; even the magic sign or seal of King Solomon, known to the medieval Jew as the SHIELD OF DAVID, has been resurrected (see Conybeare, in "Jew. Quart. Rev." xi. 1–45; also EXORCISM).

To the same class belongs the "Sefer Refu'ot" (The Book of Healing), containing the prescriptions against all the diseases inflicted by demons, which Noah wrote according to the instructions given by the angel Raphael and handed over to his son Shem (Book of Jubilees, x. 1–14; Jellinek, "B. H." iii. 155–160; Introduction, p. xxx.). It was identified with the "Sefer Refu'ot" in possession of King Solomon and hidden afterward by King Hezekiah (see Pes. iv. 9, 56a; "B. H." *l.c.* p. 160; Josephus, "Ant." viii. 2, § 5; compare *idem*, "B. J." ii. 8, § 6, and the extensive literature in Schürer, "Gesch. des Volkes Israel," 3d ed., iii. 2, 99 *et seq.*), whereas the secret of the black art, or of healing by demonic powers, was transmitted to heathen tribes, to "the sons of Ḳeṭurah" (Sanh. 91a) or the AMORITES (compare Enoch, x. 7).

So striking is the resemblance between the Shi‘ur Ḳomah and the anthropomorphic description of the Deity by the Gnostics (see Irenæus, *l.c.* i. 14, § 3) and the letters of the alphabet laid across the body in Atbash (אתבש), or Alpha and Omega order, forming the limbs of the Macrocosmos, that the one casts light upon the other, as Gaster (in "Monatsschrift," 1893, p. 221) has shown. But so have "the garments of light," "the male and the female nature," "the double face," the eye, hair, arm, head, and crown of "the King of Glory," taken from the Song of Solomon, I Chron. xxix. 11; Ps. lxviii. 18, and other familiar texts, even "the endless" (*En-Sof* = Ἀπέραντος), their parallels in ancient Gnostic writings (see Schmidt, "Gnostische Schriften in Koptischer Sprache," 1892, pp. 278, 293, 310, and elsewhere). On the other hand, both the mystic Cross ("Staurus" = X = the letter *tav* of old; see Jewish Encyclopedia, i. 612b; Irenæus, *l.c.* i. 2, § 3; Justin, "Apology," i. 40; and Joël, *l.c.* p. 147) and the enigmatic primal "Ḳav laḳav," or "Ḳavḳav," taken from Isa. xxviii. 10, receive strange light from the ancient cabalistic cosmogony, which, based upon Job xxxviii. 4 *et seq.*, spoke of "the measuring-line"—Ḳav, the קו תהו (Isa. xxxiv. 11; compare קנה המדה, Gen. R. i. after Ezek. xl. 3)—drawn "crosswise"—שתי וערב (see Midr. ha-Gadol, ed. Schechter, 11; compare כמין פקעיות של שתי, Ḥag. xii. 1, and Joël, *l.c.*), and consequently applied also the term קו לקו (Ḳav le-ḳav), taken from Isa. xxviii. 10, to the prime motive power of creation (see Irenæus, *l.c.* i. 24, §§ 5, 6; Schmidt, *l.c.* p. 215; compare Matter, "Gnosticism," ii. 58; Joël, *l.c.* p. 141). This was to express the divine power that measured matter while setting it in motion; whereas the idea of God setting to the created world its boundary was found expressed in the name שדי ("the Almighty"), who says to the world די "(This sufficeth").

With the scanty materials at the disposal of the student of Gnosticism, it seems premature and hazardous at present to assert with certainty the close relationship existing between it and the ancient Cabala, as Matter, in his "History of Gnosticism," 1828 (German translation, 1833 and 1844), and Gfroerer, in his voluminous and painstaking work, "Gesch. des Urchristenthums," 1838, i. and ii., have done. Nevertheless it may be stated without hesitation that the investigations of Grätz ("Gnosticism und Judenthum," 1846), of Joël ("Religionsphilosophie des Sohar," 1849), and of other writers on the subject must be resumed on a new basis. It is also certain that the similarities, pointed out by Siegfried ("Philo von Alexandria," pp. 289-299), between the doctrines of Philo and those of the Zohar and the Cabala in general, are due to intrinsic relation rather than to mere copying.

As a rule, all that is empiric rather than speculative, and that strikes one as grossly anthropomorphic and mythological in the Cabala or Haggadah, such as the descriptions of the Deity as contained in the "Sifra de Zeni‘uta" and "Iddra Zuṭṭa" of the Zohar, and similar passages in "Sefer Aẓilut" and "Raziel," belongs to a prerationalistic period, when no Simon ben Yoḥai lived to curse the teacher who represented the sons of God as having sexual organs and committing fornication (see Gen. R. xxvi.; compare Vita Adæ et Evæ, iii. 4, with Enoch, vii. 1 *et seq.*; also compare Test. Patr., Reuben, 5; Book of Jubilees, v. 1, and particularly xv. 27). Such matter may with a high degree of probability be claimed as ancient lore or Cabala (= "old tradition").

And as to speculative Cabala, it was not Persia with her tenth-century Sufism, but Alexandria of the first century or earlier, with her strange commingling of Egyptian, Chaldean, Judean, and Greek culture, that furnished the soil and the seeds for that mystic philosophy which knew how to blend the wisdom and the folly of the ages and to lend to every superstitious belief or practise a profound meaning. There sprang up that magic literature which showed the name of the Jewish God (אזכרות) and of the Patriarchs placed alongside of pagan deities and demons, and the Hermes books (ספרי המירום, as copyists wrote for ספרי הירמס—not "Homeros"—see Kohler, "Jew. Quart. Rev." v. 415, note), which, claiming an equal rank with the Biblical writings, enticed also Jewish thinkers. But above all it was Neoplatonism which produced that state of enthusiasm and entrancement that made people "fly in the air" by "the wagon of the soul" (מרכבה) and achieve all kinds of miracles by way of hallucinations and visions. It gave rise to those Gnostic songs (זמר יוני; Ḥag. 15b; Grätz, *l.c.* p. 16) which flooded also Syria and Palestine (see Gruppe, "Die Griechischen Culte und Mysterien," i. 1886, pp. 329, 443, 494, 497, 659; Von Harless, "Das Buch von den Ægyptischen Mysterien," 1858, pp. 13–20, 53–66, 75, and Dieterich, "Abraxas," 1891). The whole principle of emanation, with its idea of evil inherent in matter as the dross (קליפות) is found there (see Von Harless, *l.c.* p. 20), and the entire theurgic Cabala (קבלה מעשית) is in all its detail developed there; even the spirit-rapping and table-turning done in the seventeenth century by German cabalists by means of "shemot" (magic incantations; for the literature see Von Harless, *l.c.* pp. 130-132) have there their prototypes (Von Harless, *l.c.* p. 107).

K.

——**History and System:** This remarkable product of Jewish intellectual activity can not be satisfactorily estimated as a whole unless the religio-ethical side of the Cabala is more strongly emphasized than has been the case heretofore. It constantly falls back upon Scripture for its origin and authenticity, and for its speculative-pantheistic and anthropomorphic-prophetic tendencies. While mysticism in general is the expression of the intensest religious feeling, where reason lies dormant, Jewish mysticism is essentially an attempt to harmonize universal reason with the Scriptures; and the allegorical interpretation of the Biblical writings by the Alexandrians as well as by the Palestinians (see Allegorical Interpretation) may justly be regarded as its starting-point. These interpretations had their origin in the conviction that the truths of Greek philosophy were already contained in Scripture, although it was given only to the select few to lift the veil and to discern them beneath the letter of the Bible.

In Talmudic times the terms "Ma‘aseh Bereshit" (History of Creation) and "Ma‘aseh Merkabah"

Mystic Doctrines in Talmudic Times.

(History of the Divine Throne = Chariot; Ḥag. ii. 1; Tosef., *ib.*) clearly indicate the Midrashic nature of these speculations; they are really based upon Gen. i. and Ezek. i. 4-28; while the names "Sitre Torah" (Ḥag. 13a) and "Raze Torah" (Ab. vi. 1) indicate their character as secret lore. In contrast to the explicit statement of Scripture that God created not only the world, but also the matter out of which it was made, the opinion is expressed in very early times that God created the world from matter He found ready at hand—an opinion probably due to the influence of the Platonic-Stoic cosmogony (compare Philo, "De Opificiis Mundi," ii., who states this as a doctrine of Moses; see Siegfried, "Philo von Alexandria," p. 230). Eminent Palestinian teachers hold the doctrine of the preexistence of matter (Gen. R. i. 5, iv. 6), in spite of the protest of Gamaliel II. (*ib.* i. 9).

The Six Elements.

A Palestinian Midrash of the fourth century (see Epstein, in "Rev. Etudes Juives," xxix. 77) asserts that three of the elements—namely, water, air, and fire—existed before the creation of the world; that water then produced the darkness, fire produced light, and air produced wisdom (רוח = "air" = "wisdom"), and the whole world thereupon was made by the combination of these six elements (Ex. R. xv. 22). The gradual condensation of a primal substance into visible matter, a fundamental doctrine of the Cabala, is already to be found in Yer. Ḥag. ii. 77a, where it is said that the first water which existed was condensed into snow; and out of this the earth was made. This is the ancient Semitic conception of the "primal ocean," known to the Babylonians as "Apsu" (compare Jastrow, "Religion of Babylonia"), and called by the Gnostics *βύθος* = בהו (Anz, "Die Frage nach dem Ursprung des Gnostizismus," p. 98). Rab's enumeration of the ten objects created on the first day—namely, heaven, earth, tohu, bohu, light, darkness, wind, water, day, and night (Ḥag. 12a) [the Book of Jubilees (ii. 2) has seven.—K.]—shows the conception of "primal substances" held by the rabbis of the third century. It was an attempt to Judaize the un-Jewish conception of primal substances by representing them also as having been created. Compare the teaching: "God created worlds after worlds, and destroyed them, until He finally made one of which He could say, 'This one pleases Me, but the others did not please Me'" (Gen. R. ix. 2). See also "Agadat Shir ha-Shirim," ed. Schechter, p. 6, line 58.

So, also, was the doctrine of the origin of light made a matter of mystical speculation, as instanced by a haggadist of the third century, who communicated to his friend "in a whisper" the doctrine that "God wrapped Himself in a garment of light, with which He illuminates the earth from one end to the other" (Gen. R. iii. 4; see Abraham, Apocalypse of; compare Ex. R. xv. 22: "After He had clothed Himself in light, He created the world"). Closely related to this view is the statement made by R. Meïr, "that the infinite God limited or contracted Himself [צמצם] in order to reveal Himself" (Gen. R. iv. 4; Ex. R. xxxiv. 1). This is the germ of the Cabala doctrine of the "Ẓimẓum," in idea as well as in terminology.

God in the Theosophy of the Talmud.

In dwelling upon the nature of God and the universe, the mystics of the Talmudic period asserted, in contrast to Biblical transcendentalism, that "God is the dwelling-place of the universe; but the universe is not the dwelling-place of God" (Gen. R. lxviii. 9; Midr. Teh. xc.; Ex. xxiv. 11, LXX.) Possibly the designation מקום ("place") for God, so frequently found in Talmudic-Midrashic literature, is due to this conception, just as Philo, in commenting on Gen. xxviii. 11 (compare Gen. R. *l.c.*) says, "God is called 'ha maḳom' [place] because He encloses the universe, but is Himself not enclosed by anything" ("De Somniis," i. 11). Spinoza may have had this passage in mind when he said that the ancient Jews did not separate God from the world. This conception of God is not only pantheistic, but also highly mystical, since it postulates the union of man with God (compare Crescas, "Or Adonai," i.); and both these ideas were further developed in the later Cabala. Even in very early times Palestinian as well as Alexandrian theology recognized the two attributes of God, "middat ha-din," the attribute of justice, and "middat ha-raḥamim," the attribute of mercy (Sifre, Deut. 27; Philo, "De Opificiis Mundi," 60); and so is the contrast between justice and mercy a fundamental doctrine of the Cabala. Even the hypostasization of these attributes is ancient, as may be seen in the remark of a tanna of the beginning of the second century C.E. (Ḥag. 14a). Other hypostasizations are represented by the ten agencies through which God created the world; namely, wisdom, insight, cognition, strength, power, inexorableness, justice, right, love, and mercy (Ḥag. 12a; Ab. R. N. xxxvii. counts only seven, while Ab. R. N., version B, ed. Schechter, xliii., counts ten, not entirely identical with those of the Talmud). While the Sefirot are based on these ten creative potentialities, it is especially the personification of wisdom (חכמה) which, in Philo, represents the totality of these primal ideas; and the Targ. Yer. i., agreeing with him, translates the first verse of the Bible as follows: "By wisdom God created the heaven and the earth." So, also, the figure of Meṭaṭron passed into the Cabala from the Talmud, where it played the rôle of the demiurgos (see Demiurge), being expressly mentioned as God (Sanh. 38b; compare Antinomianism, note 1). Mention may also be made of the seven preexisting things enumerated in an old Baraita; namely, the Torah (="Ḥokmah"), repentance (= mercy), paradise and hell (= justice), the throne of God, the (heavenly) Temple, and the name of the Messiah (Pes. 54a). Although the origin of this doctrine must be sought probably in certain mythological ideas, the Platonic doctrine of preexistence has modified the older, simpler conception, and the preexistence of the seven must therefore be understood as an "ideal" preexistence (see Ginzberg, "Die Haggada bei den Kirchenvätern," etc., pp. 2-10), a conception that was later more fully developed in the Cabala.

The attempts of the mystics to bridge the gulf between God and the world are especially evident in the doctrine of the preexistence of the soul [compare Slavonic Enoch, xxiii. 5, and Charles's note.—K.] and of its close relation to God before it enters the human body—a doctrine taught by the Hellenistic sages (Wisdom viii. 19) as well as by the Palestinian rabbis (Ḥag. 12b; 'Ab. Zarah 5a, etc.).

The Pious.

Closely connected herewith is the doctrine that the pious are enabled to ascend toward God even in this life, if they know how to free themselves from the trammels that bind the soul to the body (see Ascension). Thus were the first mystics enabled to disclose the mysteries of the world beyond. According to Anz, *l.c.*, and Bousset, "Die Himmelreise der Seele," in "Archiv für Religionswissenschaft," iv. 136 *et seq.*, the central doctrine of Gnosticism—a movement closely connected with Jewish mysticism—was nothing else than the attempt to liberate the soul and unite it with God. This conception explains the great prominence of angels and spirits in both the earlier and the later Jewish mysticism. Through the employment of mysteries, incantations, names of angels, etc., the mystic assures for himself the passage to God, and learns the holy words and formulas with which he overpowers the evil spirits that try to thwart and destroy him. Gaining thereby the mastery over them, he naturally wishes to exercise it even while still on earth, and tries to make the spirits serviceable to him. So, too, were the Essenes familiar with the idea of the journey to heaven (see Bousset, *l.c.* p. 143, explaining Josephus, "Ant." xviii. 1, § 5); and they were also masters of angelology. The practise of magic and incantation, the angelology and demonology, were borrowed from Babylonia, Persia, and Egypt; but these foreign elements were Judaized in the process, and took the form of the mystical adoration of the name of God and of speculations regarding the mysterious power of the Hebrew alphabet (see Ber. 55a; compare Pesiḳ. R. 21 [ed. Friedmann, p. 109a], "the name of God creates and destroys worlds"), to become, finally, foundations of the philosophy of the "Sefer Yeẓirah."

The Syzygies.

Another pagan conception which, in refined form, passed into the Cabala through the Talmud, was the so-called סוד הזווג ("the mystery of sex"). [Compare Eph. v. 33, and Bride, and Joël, *l.c.*, pp. 158 *et seq.*—K.] Possibly this old conception underlies the Talmudical passages referring to the mystery of marriage, such as "the Shekinah dwells between man and woman" (Soṭah 17a). An old Semitic view (see Ba'al) regards the upper waters (compare Slavonic Book of Enoch, iii.; Test. Patr., Levi, 2; Abraham, Testament of) as masculine, and the lower waters as feminine, their union fructifying the earth (Gen. R. xiii.; Wertheimer, "Batte Midrashot," i. 6. Compare the passage, "Everything that exists has a mate [בן זוג]: Israel is the mate of the Sabbath; while the other days pair among themselves," Gen. R. xi. 8). Thus the Gnostic theory of syzygies (pairs) was adopted by the Talmud, and later was developed into a system by the Cabala.

The doctrine of emanation, also, common to both Gnosticism and the Cabala, is represented by a tanna of the middle of the second century C.E. (Gen. R. iv. 4; R. Meïr, "Parable of the Spring"). The idea that "the pious actions of the just increase the heavenly power" (Pesiḳ., ed. Buber, xxvi. 166b); that "the impious rely on their gods," but that "the just are the support of God" (Gen. R. lxix. 3), gave rise to the later cabalistic doctrine of man's influence on the course of nature, inasmuch as the good and the evil actions of man reenforce respectively the good or the evil powers of life.

The heterogeneous elements of this Talmudic mysticism are as yet unfused; the Platonic-Alexandrian, Oriental-theosophic, and Judæo-allegorical ingredients being still easily recognizable and not yet elaborated into the system of the Cabala. Jewish monotheism was still transcendentalism. But as mysticism attempted to solve the problems of creation and world-government by introducing sundry intermediary personages, creative potentialities such as Meṭaṭron, Shekinah, and so on, the more necessary it became to exalt God in order to prevent His reduction to a mere shadow; this exaltation being rendered possible by the introduction of the pantheistic doctrine of emanation, which taught that in reality *nothing* existed outside of God. Yet, if God is "the place of the world" and everything exists in Him, it must be the chief task of life to feel in union with God—a condition which the Merkabah-travelers, or, as the Talmud calls them, "the frequenters of paradise," strove to attain. Here is the point where speculation gives place to imagination. The visions which these mystics beheld in their ecstasies were considered as real, giving rise within the pale of Judaism to an anthropomorphic mysticism, which took its place beside that of the pantheists. Although Talmudic-Midrashic literature has left few traces of this movement (compare, *e.g.*, Ber. 7a, Sanh. 95b), the Rabbis opposing such extravagances, yet the writings of the church fathers bear evidence of many Judaizing Gnostics who were disciples of anthropomorphism (Origen, "De Principiis," i.; compare Clementina, Elcesaites, Minim).

Different Groups of Mystic Literature.

The mystical literature of the geonic period forms the link between the mystic speculations of the Talmud and the system of the Cabala; originating in the one and reaching completion in the other. It is extremely difficult to summarize the contents and object of this literature, which has been handed down in more or less fragmentary form. It may perhaps be most conveniently divided into three groups: (1) theosophic; (2) cosmogenetic; (3) theurgic. In regard to its literary form, the Midrashic-haggadic style may be distinguished from the liturgic-poetic style, both occurring contemporaneously. The theosophical speculations deal chiefly with the person of Meṭaṭron-Enoch, the son of Jared turned into a fiery angel, a minor Yhwh—a conception with which, as mentioned before, many mystics of the Talmudic age were occupied. Probably a large number of these Enoch books, claiming to contain the visions of Enoch, existed, of which, however, only fragments remain (see "Monatsschrift," viii. 68 *et seq.*, and Enoch, Book of).

"Meṭaṭron-Enoch."

"Shi'ur Ḳomah."

Curiously enough, the anthropomorphic description of God (see Shi'ur Ḳomah) was brought into connection with Meṭaṭron-Enoch in the geonic mysticism. This vexatious piece of Jewish theosophy, which afforded to Christians as well as to Karaites (compare Agobard; Solomon b. Yeruham) a welcome opportunity for an attack upon rabbinical Judaism, existed as a separate work at the time of the Geonim. Judging from the fragments of "Shi'ur Ḳomah" (in Jellinek, "B. H." iii. 91; ii. 41; in Wertheimer, "Hekalot," ch. xi.), it represented God as a being of gigantic dimensions, with limbs, arms, hands, feet, etc. The "Shi'ur Ḳomah" must have been held in high regard by the Jews, since Saadia tried to explain it allegorically—though he doubted that the tanna Ishmael could have been the author of the work (as quoted by Judah b. Barzilai in his commentary on "Sefer Yeẓirah," pp. 20–21)—and Hai Gaon, in spite of his emphatic repudiation of all anthropomorphism, defended it ("Teshubot ha-Geonim," Lick, p. 12a). The book probably originated at a time when the anthropomorphic conception of God was current—that is, in the age of Gnosticism, receiving its literary form only in the time of the Geonim. The Clementine writings, also, expressly teach that God is a body, with members of gigantic proportions; and so did Marcion. Adam Ḳadmon, the "primal man" of the Elcesaites, was also, according to the conception of these Jewish Gnostics, of huge dimensions; viz., ninety-six miles in height and ninety-four miles in breadth; being originally androgynous, and then cleft in two, the masculine part becoming the Messiah, and the feminine part the Holy Ghost (Epiphanius, "Hæres." xxx. 4, 16, 17; liii. 1). According to Marcion, God Himself is beyond bodily measurements and limitations, and as a spirit can not even be conceived; but in order to hold intercourse with man, He created a being with form and dimensions, who ranks above the highest angels. It was, presumably, this being whose shape and stature were represented in the "Shi'ur Ḳomah," which even the strict followers of Rabbinism might accept, as may be learned from the "Kerub ha-Meyuḥad" in the German Cabala, which will be discussed later in this article.

The Heavenly Halls.

The descriptions of the heavenly halls ("Hekalot") in treatises held in high esteem at the time of the Geonim, and which have come down in rather incomplete and obscure fragments, originated, according to Hai Gaon, with those mystagogues of the Merkabah (יורדי מרכבה), "who brought themselves into a state of entranced vision by fasting, asceticism, and prayer, and who imagined that they saw the seven halls and all that is therein with their own eyes, while passing from one hall into another (compare Ascension, and for a similar description of the Montanist ecstasy, Tertullian, "De Exhortatione Castitatis," x.). Although these Hekalot visions were to some extent productive of a kind of religious ecstasy, and were certainly of great service in the development of the liturgical poetry as shown in the Ḳedushah piyyuṭim, they contributed little to the development of speculative mysticism. This element became effective only in combination with the figure of Meṭaṭron or Meṭaṭron-Enoch, the leader of the Merkabah-travelers on their celestial journeys, who were initiated by him into the secrets of heaven, of the stars, of the winds, of the water, and of the earth, [see Meṭaṭron, and compare Mithras as driver of the Heavenly Chariot in "Dio Chrysostomus," ii. 60, ed. Dindorf; Windischmann, "Zoroastrische Studien," 1863, pp. 309–312; and Kohler, "Test. of Job," p. 292.—k.]. Hence, many cosmological doctrines originally contained in the books of Enoch were appropriated, and the transition from theosophy to pure cosmology was made possible. Thus, in the Midr. Konen (Jellinek, "B. H." ii. 23, 27), which is closely related to the "Seder Rabba di-Bereshit" (in Wertheimer, "Botte Midrashot," i. 18), the Torah, identical with the "Wisdom" of the Alexandrians, is represented as primeval and as the creative principle of the world, which produced the three primal elements, water, fire, and light, and these, in their turn, when commingled, produced the universe.

Cosmological Theories.

In the description of the "six days of creation," in the Midrash in question, the important statement is made that the water disobeyed God's command—an old mythological doctrine of God's contest with matter (here represented by water), which in the later Cabala serves to account for the presence of evil in the world. In "Seder Rabba di-Bereshit," however, the contest is between the masculine and feminine waters which strove to unite themselves, but which God separated in order to prevent the destruction of the world by water; placing the masculine waters in the heavens, and the feminine waters on the earth (*l.c.* p. 6). Independently of the creation, the "Baraita de-Middot ha-'Olam" and the "Ma'aseh Bereshit" describe the regions of the world with paradise in the east and the nether world in the west. All these descriptions—some of them found as early as the second pre-Christian century, in the Test. of Abraham and in Enoch; and, later on, in the Christian apocalyptic literature—are obviously remnants of ancient Essene cosmology.

Theurgic Cabala.

The mysticism of this time had a practical as well as a theoretical side. Any one knowing the names and functions of the angels could control all nature and all its powers (compare, for example, Lam. R. ii. 8; and Hananeel in Rabbinical Literature). Probably entrusted formerly only to oral tradition, the ancient names were written down by the mystics of the geonic period; and so Hai Gaon (in Eliezer Ashkenazi's collection, "Ta'am Ẓeḳenim," p. 56b) mentions a large number of such works as existing in his time: the "Sefer ha-Yashar," "Ḥarba de-Mosheh," "Raza Rabbah," "Sod Torah," "Hekalot Rabbati," "Hekalot Zuṭrati." Of all these works, aside from the Hekalot, only the "Ḥarba de-Mosheh" has recently been published by Gaster ("The Sword of Moses," in "Jour. Royal Asiatic Soc." 1896; also printed separately). This book consists almost entirely of mystical names by means of which man may guard himself against sickness, enemies, and other ills, and may subjugate nature. These and other works later on formed the basis of the theurgic Cabala. The amplifications upon paradise and hell, with their divisions, occupy a totally independent and somewhat peculiar position in the geonic mysticism. They are ascribed for the greater part to the amora Joshua b. Levi; but, in addition to this hero of the Haggadah, Moses himself is alleged to have been the author of the work "Ma'ayan Ḥokmah" (compare Soṭah ix. 15, which gives an account of heaven and the angels).

Mystical Literature in Geonic Times.

Aside from the "Sefer Yeẓirah," which occupies a position of its own, the following is nearly a complete list of the mystic literature of the time of the Geonim, as far as it is preserved and known to-day: (1) "Alfa Beta de Rabbi Akiba," in two versions (Jellinek, "B. H." iii.); (2) "Gan 'Eden," in different versions (Jellinek, *l.c.* ii., iii., v.); (3) "[Masseket] Gehinnom" (Jellinek, *l.c.* i.); (4) "Ḥarba de-Mosheh," ed. Gaster, 1896, reprinted from "Jour. Royal Asiatic Soc," 1896; (5) "Ḥibbuṭ ha-Ḳeber" (Jellinek, *l.c.* i.); (6) "Hekalot," in several recensions (Jellinek, *l.c.* ii., iii.; Wertheimer, "Jerusalem," 1889, the text varying considerably from that of Jellinek: the Book of Enoch is likewise a version of "Hekalot"); (7) "Haggadot Shema' Yisrael" (Jellinek, *l.c.* v.; also belonging probably to the time of the Geonim); (8) "[Midrash] Konen" (printed several times; also in Jellinek, *l.c.* i.); (9) "Ma'aseh Merkabah" (in Wertheimer, "Botte Midrashot," ii.; a very ancient "Hekalot" version); (10) "Ma'aseh de Rabbi Joshua b. Levi," in different recensions (compare APOCALYPTIC LITERATURE, NEO-HEBRAIC, No. 5); (11) "Ma'ayan Ḥokmah" (Jellinek, *l.c.* i.); (12) "Seder Rabba di-Bereshit," in Wertheimer, *l.c.* i.); (13) "Shimmusha Rabba we-Shimmusha Zuṭṭa" (Jellinek, *l.c.* vi.).

Mystical fragments have been preserved in Pirḳe R. El., Num. R., and Midr. Tadshe; also in the "Book of Raziel," which, though composed by a German cabalist of the thirteenth century, contains important elements of the geonic mysticism.

Origin of the Speculative Cabala.

Eleazar of Worms' statement that a Babylonian scholar, AARON B. SAMUEL by name, brought the mystic doctrine from Babylonia to Italy about the middle of the ninth century, has been found to be actually true. Indeed, the doctrines of the "Kerub ha-Meyuḥad," of the mysterious power of the letters of the Hebrew alphabet, and of the great importance of the angels, are all found in the geonic mystic lore. Even those elements that seem later developments may have been transmitted orally, or may have formed parts of the lost works of the old mystics. If, now, the German Cabala of the thirteenth century is to be regarded as merely a continuation of geonic mysticism, it follows that the speculative Cabala arising simultaneously in France and Spain must have had a similar genesis. It is the SEFER YEẒIRAH which thus forms the link between the Cabala and the geonic mystics. The date as well as the origin of this singular book are still moot points, many scholars even assigning it to the Talmudic period. It is certain, however, that at the beginning of the ninth century the work enjoyed so great a reputation that no less a man than Saadia wrote a commentary on it. The question of the relation between God and the world is discussed in this book, the oldest philosophical work in the Hebrew language.

The "Sefer Yeẓirah."

The basic doctrines of the "Sefer Yeẓirah" are as follows: The fundamentals of all existence are the ten Sefirot. These are the ten principles that mediate between God and the universe. They include the three primal emanations proceeding from the Spirit of God: (1) רוח (literally, "air" or "spirit," probably to be rendered "spiritual air"), which produced (2) "primal water," which, in turn, was condensed into (3) "fire." Six others are the three dimensions in both directions (left and right); these nine, together with the Spirit of God, form the ten Sefirot. They are eternal, since in them is revealed the dominion of God. The first three preexisted ideally as the prototypes of creation proper, which became possible when infinite space, represented by the six other Sefirot, was produced. The Spirit of God, however, is not only the beginning but is also the end of the universe; for the Sefirot are closely connected with one another, "and their end is in their origin, as the flame is in the coal."

While the three primal elements constitute the substance of things, the twenty-two letters of the Hebrew alphabet constitute the form. The letters hover, as it were, on the boundary-line between the spiritual and the physical world; for the real existence of things is cognizable only by means of language, *i.e.*, the human capacity for conceiving thought. As the letters resolve the contrast between the substance and the form of things, they represent the solvent activity of God; for everything that is exists by means of contrasts, which find their solution in God, as, for instance, among the three primal elements, the contrasts of fire and water are resolved into רוח ("air" or "spirit").

The importance of this book for the later Cabala, overestimated formerly, has been underestimated in modern times. The emanations here are not the same as those posited by the cabalists; for no graduated scale of distance from the primal emanations is assumed, nor are the Sefirot here identical with those enumerated in the later Cabala. But the agreement in essential points between the later Cabala and the "Sefer Yeẓirah" must not be overlooked. Both posit mediate beings in place of immediate creation out of nothing; and these mediate beings were not created, like those posited in the various cosmogonies, but are emanations. The three primal elements in the "Sefer Yeẓirah," which at first existed only ideally and then became manifest in form, are essentially identical with the worlds of AẒILUT and BERIAH of the later Cabala. In connection with the "Sefer Yeẓirah" the mystical speculations of certain Jewish sects must be men-

Mysticism of Jewish Heretics.

tioned, which, toward the year 800, began to spread doctrines that for centuries had been known only to a few initiated ones. Thus the Maghariyites taught that God, who is too exalted to have any attributes ascribed to Him in Scripture, created an angel to be the real ruler of the world [compare the שר העולם

and Meṭatron in the Talmud.—K.]; and to this angel everything must be referred that Scripture recounts of God (Ḳirḳisani, extracts from his manuscript quoted by Harkavy in Rabbinowicz's Hebrew translation of Grätz's "Gesch. der Juden," iii. 496; separately under the title "Le-Ḳorot ha-Kittot be-Yisrael"). This Jewish form of the Gnostic Demiurge, which was also known to the Samaritans (Baneth, "Marquah, on the twenty-two Letters of the Alphabet," pp. 52-54), was accepted with slight modifications by the Karaites (Judah Hadassi, "Eshkol ha-Kofer," 25c, 26b) as well as by the German cabalists, as will be shown further on. Benjamin Nahawendi seems to have known of other emanations in addition to this Demiurge (see Harkavy, *l.c.* v. 16). These, of course, were not new theories originating at this time, but an awakening of Jewish Gnosticism, that had been suppressed for centuries by the increasing preponderance of Rabbinism, and now reappeared not by chance, at a time when Sadduceeism, the old enemy of Rabbinism, also reappeared, under the name of Karaism. But while the latter, as appealing to the masses, was energetically and even bitterly attacked by the representatives of Rabbinism, they made allowance for a revival of Gnosticism. For, although the cabalistic treatises ascribed to certain geonim were probably fabricated in later times, it is certain that numbers of the geonim, even many who were closely connected with the academies, were ardent disciples of mystic lore. The father of the German Cabala was, as is now known, a Babylonian (see Aaron b. Samuel ha-Nasi), who emigrated to Italy in the first half of the ninth century, whence the Kalonymides later carried their teachings to Germany, where in the thirteenth century an esoteric doctrine, essentially identical with that which prevailed in Babylon about 800, is accordingly found.

Influence of Greco-Arabic Philosophy.

While the branch of the Cabala transplanted to Italy remained untouched by foreign influences, the reaction of Greco-Arabic philosoph yon Jewish mysticism became apparent in the Arabic-speaking countries. The following doctrines of Arab philosophy especially influenced and modified Jewish mysticism, on account of the close relationship between the two. The "Faithful Brothers of Basra," as well as the Neoplatonic Aristotelians of the ninth century, have left their marks on the Cabala. The brotherhood taught, similarly to early Gnosticism, that God, the highest Being, exalted above all differences and contrasts, also surpassed everything corporeal and spiritual; hence, the world could only be explained by means of emanations. The graduated scale of emanations was as follows: (1) the creating spirit (νοῦς); (2) the directing spirit, or the world-soul; (3) primal matter; (4) active nature, a power proceeding from the world-soul; (5) the abstract body, also called secondary matter; (6) the world of the spheres; (7) the elements of the sublunary world; and (8) the world of minerals, plants, and animals composed of these elements. These eight form, together with God, the absolute One, who is in and with everything, the scale of the nine primal substances, corresponding to the nine primary numbers and the nine spheres. These nine numbers of the "Faithful Brothers" (compare De Boer, "Gesch. der Philosophie im Islam," p. 84; Dieterici, "Die Sogenannte Theologie des Aristoteles," p. 38; *idem*, "Weltseele," p. 15) have been changed by a Jewish philosopher of the middle of the eleventh century into ten, by counting the four elements not as a unit, but as two ("Torat ha-Nefesh," ed. Isaac Broydé, pp. 70, 75; compare, also, Guttmann, in "Monatsschrift," xlii. 450).

Gabirol's, Influence upon the Cabala.

Solomon ibn Gabirol's doctrines influenced the development of the Cabala more than any other philosophical system; and his views on the will of God and on the intermediate beings between God and the creation were especially weighty. Gabirol considers God as an absolute unity, in whom form and substance are identical; hence, no attributes can be ascribed to God, and man can comprehend God only by means of the beings emanating from Him. Since God is the beginning of all things, and composite substance the last of all created things, there must be intermediate links between God and the universe; for there is necessarily a distance between the beginning and the end, which otherwise would be identical.

The first intermediate link is the will of God, the hypostasis of all things created; Gabirol meaning by will the creative power of God manifested at a certain point of time, and then proceeding in conformity with the laws of the emanations. As this will unites two contrasts—namely, God, the actor, and substance, the thing acted upon—it must necessarily partake of the nature of both, being *factor* and *factum* at the same time. The will of God is immanent in everything; and from it have proceeded the two forms of being, "materia universalis" (ὕλη) and "forma universalis." But only God is "creator ex nihilo": all intermediary beings create by means of the graduated emanation of what is contained in them potentially. Hence, Gabirol assumes five intermediary beings (אמצעיות) between God and matter; namely: (1) will; (2) matter in general and form; (3) the universal spirit (שכל הכללי); (4) the three souls, namely, vegetative, animal, and thinking soul; and (5) the nature, the motive power, of bodies. Gabirol (quoted by Ibn Ezra, commentary on Isa. xliii. 7) also mentions the three cabalistic worlds, Beriah, Yeẓirah, and 'Asiyah; while he considers Aẓilut to be identical with the will. The theory of the concentration of God, by which the Cabala tries to explain the creation of the finite out of the infinite, is found in mystical form in Gabirol also (see Munk, "Mélanges," pp. 284, 285).

Still, however great the influence which Gabirol exercised on the development of the Cabala, it would be incorrect to say that the latter is derived chiefly from him. The fact is that when Jewish mystic lore came in contact with Arabic-Jewish philosophy, it appropriated those elements that appealed to it; this being especially the case with Gabirol's philosophy on account of its mystical character. But other philosophical systems, from Saadia to Maimonides, were also laid under contribution. Thus the important German cabalist Eleazar of Worms was strongly influenced by Saadia; while Ibn Ezra's views found acceptance among the German as well as the Spanish cabalists. Possibly even Maimonides, the greatest representative of rationalism among the Jews of the Middle Ages, contributed to the cabalistic doctrine of the "En-Sof" by his teaching that no attributes could be ascribed to God [unless it be of Pythagorean origin (see Bloch, in Winter and Wünsche, "Jüdische Literatur," iii. 241, note 3).—K.].

The German Cabala.

The esoteric doctrines of the Talmud, the mysticism of the period of the Geonim, and Arabic Neoplatonic philosophy are thus the three chief constituents of the Cabala proper as it is found in the thirteenth century. These heterogeneous elements also explain the strange fact that the Cabala appeared at the same time in two different centers of culture, under different social and political conditions, each form being entirely different in character from the other. The German Cabala is a direct continuation of geonic mysticism. Its first representative is Judah the Pious (died 1217), whose pupil, Eleazar of Worms, is its most important literary exponent. Abraham Abulafia was its last representative, half a century later. The correctness of Eleazar's statement (in Del Medigo's "Maẓref la-Ḥokmah," ed. 1890, pp. 64, 65), to the effect that the Kalonymides carried the esoteric doctrines with them from Italy to Germany about 917, has been satisfactorily established. Till the time of Eleazar these doctrines were in a certain sense the private property of the Kalonymides, and were kept secret until Judah the Pious, himself a member of this family, commissioned his pupil Eleazar to introduce the oral and written esoteric doctrine into a larger circle.

The essential doctrines of this school are as follows: God is too exalted for mortal mind to comprehend, since not even the angels can form an idea of Him. In order to be visible to angels as well as to men, God created out of divine fire His כבוד ("majesty"), also called כרוב המיוחד, which has size and shape and sits on a throne in the east, as the actual representative of God. His throne is separated by a curtain (פרגוד) on the east, south, and north from the world of angels; the side on the west being uncovered [compare, however, God's Shekinah dwelling in the east ("Apostolic Constitutions," ii. 57).—K.], so that the light of God, who is in the west, may illuminate it. All the anthropomorphic statements of Scripture refer to this "majesty" (כבוד), not to God Himself, but to His representative. Corresponding to the different worlds of the Spanish cabalists, the German cabalists also assume four (sometimes five) worlds; namely: (1) the world of the "glory" (כבוד) just mentioned; (2) the world of angels; (3) the world of the animal soul; and (4) the world of the intellectual soul. It is easy to discern that this curious theosophy is not a product of the age in which the German cabalists lived, but is made up of ancient doctrines, which, as stated above, originated in the Talmudic period. The Germans, lacking in philosophical training, exerted all the greater influence on the practical Cabala as well as on ecstatic mysticism. Just as in Spain about this time the deeply religious mind of the Jews rose in revolt against the cold Aristotelian rationalism that had begun to dominate the Jewish world through the influence of Maimonides, so the German Jews, partly influenced by a similar movement within Christianity, began to rise against the traditional ritualism. Judah the Pious (Introduction to "Sefer Ḥasidim") reproaches the Talmudists with "poring too much over the Talmud without reaching any results." Hence, the German mystics attempted to satisfy their religious needs in their own way; namely, by contemplation and meditation. Like the Christian mystics (Preger, "Gesch. der Deutschen Mystik," p. 91), who symbolized the close connection between the soul and God by the figure of marriage, the Jewish mystics described the highest degree of love of man for God in sensuous forms in terms taken from marital life.

Christian and Jewish Mysticism.

While study of the Law was to the Talmudists the very acme of piety, the mystics accorded the first place to prayer, which was considered as a mystical progress toward God, demanding a state of ecstasy. It was the chief task of the practical Cabala to produce this ecstatic mysticism, already met with among the Merkabah-travelers of the time of the Talmud and the Geonim; hence, this mental state was especially favored and fostered by the Germans. Alphabetical and numeral mysticism constitutes the greater part of Eleazar's works, and is to be regarded simply as means to an end; namely, to reach a state of ecstasy by the proper employment of the names of God and of angels, "a state in which every wall is removed from the spiritual eye" (Moses of Tachau, in "Oẓar Neḥmad," iii. 84; compare Güdemann, "Gesch. des Erziehungswesens," i. 159 *et seq.*).

The point of view represented by the anonymous book "Keter Shem-Ṭob" (ed. Jellinek, 1853), ascribed to Abraham of Cologne and certainly a product of the school of Eleazar of Worms, represents the fusion of this German Cabala with the Provençal-Spanish mysticism. According to this work, the act of creation was brought about by a primal power emanating from the simple will of God. This eternal, unchangeable power transformed the potentially existing universe into the actual world by means of graduated emanations. These conceptions, originating in the school of Azriel, are herein combined with Eleazar's theories on the meaning of the Hebrew letters according to their forms and numerical values. The central doctrine of this work refers to the Tetragrammaton; the author assuming that the four letters *yod, he, waw*, and *he* (יהו"ה) were chosen by God for His name because they were peculiarly distinguished from all other letters. Thus *yod*, considered graphically, appears as the mathematical point from which objects were developed, and therefore symbolizes the spirituality of God to which nothing can be equal. As its numerical value equals ten, the highest number, so there are ten classes of angels, and correspondingly the seven spheres with the two elements—fire cohering with air, and water with earth, respectively—and the One who directs them all, making together ten powers; and finally the ten Sefirot. In this way the four letters of the Tetragrammaton are explained in detail.

A generation later a movement in opposition to the tendencies of this book arose in Spain; aiming to supplant speculative Cabala by a prophetic visionary one. Abraham Abulafia denied the doctrines of emanations and the Sefirot, and, going back to the German mystics, asserted that the true Cabala consisted in letter and number mysticism, which system, rightly understood, brings man into direct and close relations with the "ratio activa" (שכל הפועל), the active intelligence of the universe, thus endowing him with the power of prophecy. In a certain sense Joseph b. Abraham Gikatilla, a cabalist eight years younger than Abulafia, may also be included in the German school, since he developed the letter and vowel mysticism, thereby introducing the practical Cabala into many circles. Yet Gikatilla, like his contemporary Tobias Abulafia, still hesitates between the abstract speculative Cabala of the Provençal-Spanish Jews and the concrete letter symbolism of the Germans. These two main movements are finally combined in the Zoharistic books, wherein, as Jellinek rightly says, "the syncretism of the philosophical and cabalistic ideas of the century appears complete and finished."

The Cabala in Provence.

While the German mystics could refer to authentic traditions, the cabalists of Spain and southern France were obliged to admit that they could trace their doctrines, which they designated as "the tradition" ("Ḳabbalah"; thus an Oriental scholar as early as 1223; compare Harkavy, Hebrew transl. of Grätz's "Gesch. der Juden," v. 47), to authorities no older than the twelfth century. The modern historian has greater difficulties in determining the origin of the Cabala in Provence than the cabalists themselves had; for they agreed that the esoteric doctrines had been revealed by the prophet Elijah, in the beginning of the twelfth century, to Jacob ha-Nazir, who initiated Abraham b. David of Posquières, whose son, Isaac the Blind, transmitted them further. But Isaac the Blind can not possibly be credited with being the originator of the speculative Cabala, for it is far too complicated to be the work of one man, as is evident by the writings of Azriel (born about 1160), the alleged pupil of Isaac. Azriel, moreover, speaks of the Sefirot, of the En-Sof, and of the cabalists of Spain (in Sachs's "Ha-Paliṭ," p. 45); and it is absolutely impossible that Isaac the Blind, who was not much older than Azriel (his father Abraham b. David died in 1198), could have founded a school so quickly that Spanish scholars would be able to speak of the contrast between cabalists and philosophers as Azriel does. If there be any truth in this tradition of the cabalists, it can only mean that the relation of Isaac the Blind to the speculative Cabala was the same as that of his contemporary Eleazar of Worms to German mysticism; namely, that just as the latter made the esoteric doctrines—which were for centuries in the possession of one family, or at any rate of a very small circle—common property, so Isaac introduced the doctrines of the speculative Cabala for the first time into larger circles.

It may furthermore be assumed that the speculative philosophy of Provence, like German mysticism, originated in Babylon: Neoplatonism, reaching there its highest development in the eighth and ninth centuries, could not but influence Jewish thought. Gabirol, as well as the author of "Torat ha-Nefesh," bears evidence of this influence on Jewish philosophy; while the Cabala took up the mystic elements of Neoplatonism. The Cabala, however, is not a genuine product of the Provençal Jews; for just those circles in which it is found were averse to the study of philosophy. The essential portions of the Cabala must, on the contrary, have been carried to Provence from Babylon; being known only to a small circle until Aristotelianism began to prevail, when the adherents of the speculative Cabala were forced to make their doctrine public.

The Treatise on Emanation.

The earliest literary product of the speculative Cabala is the work "Masseket Aẓilut," which contains the doctrine of the four graduated worlds as well as that of the concentration of the Divine Being. The form in which the rudiments of the Cabala are presented here, as well as the emphasis laid on keeping the doctrine secret and on the compulsory piety of the learners, is evidence of the early date of the work. At the time when "Masseket Aẓilut" was written the Cabala had not yet become a subject of general study, but was still confined to a few of the elect. The treatment is on the whole the same as that found in the mystical writings of the time of the Geonim, with which the work has much in common; hence, there is no reason for not regarding it as a product of that time. The doctrines of Meṭaṭron, and of angelology especially, are identical with those of the Geonim, and the idea of the Sefirot is presented so simply and unphilosophically that one is hardly justified in assuming that it was influenced directly by any philosophical system.

"Bahir."

Just as in the "Masseket Aẓilut" the doctrine of the ten Sefirot is based on the "Sefer Yeẓirah" (ed. Jellinek, p. 6, below), so the book Bahir, which, according to some scholars, was composed by Isaac the Blind, and which in any case originated in his school, starts from the doctrines of the "Sefer Yeẓirah," which it explains and enlarges. This book was of fundamental importance in more than one way for the development of the speculative Cabala. The Sefirot are here divided into the three chief ones—primal light, wisdom, and reason—and the seven secondary ones that have different names. This division of the Sefirot, which goes through the entire Cabala, is found as early as Pirḳe R. Eliezer III., from which the "Bahir" largely borrowed; but here for the first time the doctrine of the emanation of the Sefirot is clearly enunciated. They are conceived as the intelligible primal principles of the universe, the primary emanations of the Divine Being, that together constitute the כל (τὸ πᾶν = "the universe"). The emanation is regarded, not as having taken place once, but as continuous and permanent; and the author has such an imperfect conception of the import of this idea that he regards the emanation as taking place all at once, and not in graduated series. But this assumption annihilates the whole theory of emanation, which attempts to explain the gradual transition from the infinite to the finite, comprehensible only in the form of a graduated series.

Opposition to Aristotelianism.

Azriel.

On the whole, the contents of the book—which seems to be a compilation of loosely connected thoughts—justify the assumption that it is not the work of one man or the product of one school, but the first serious attempt to collect the esoteric doctrines that for centuries had circulated orally in certain circles of Provence, and to present them to a larger audience. The work is important because it gave to those scholars who would have nothing to do with the philosophy then current—namely, Aristotelianism—the first incentive to a thorough study of metaphysics. The first attempt to place the cabalistic doctrine of the Sefirot on a dialectic basis could have been made only by a Spanish Jew, as the Provençal Jews were not sufficiently familiar with philosophy, and the few among them that devoted themselves to this science were pronounced Aristotelians who looked with contempt upon the speculations of the cabalists. It was Azriel (1160-1238), a Spaniard with philosophical training, who undertook to explain the doctrines of the Cabala to philosophers and to make it acceptable to them. It should be noted particularly that Azriel (in Sachs, "Ha-Paliṭ," p. 45) expressly says that philosophical dialectics is for him only the means for explaining the doctrines of Jewish mysticism, in order that "those also who *do not believe*, but ask to have everything proved, may convince themselves of the truth of the Cabala." True disciples of the Cabala were satisfied with its doctrines as they were, and without philosophical additions. Hence the actual form of the Cabala as presented by Azriel must not be regarded as absolutely identical with its original one. Starting from the doctrine of the merely negative attributes of God, as taught by the Jewish philosophy of the time (see Attributes), Azriel calls God the "En-Sof" (אין סוף), the absolutely Infinite, that can be comprehended only as the negation of all negation. From this definition of the En-Sof, Azriel deduces the potential eternity of the world—the world with all its manifold manifestations was potentially contained within the En-Sof; and this potentially existing universe became a reality in the act of creation. The transition from the potential to the actual is a free act of God: but it can not be called creation; since a "creatio ex nihilo" is logically unthinkable, and nothing out of which the world could be formed exists outside of God, the En-Sof. Hence, it is not correct to say that God creates, but that He irradiates; for as the sun irradiates warmth and light without diminishing its bulk, so the En-Sof irradiates the elements of the universe without diminishing His power. These elements of the universe are the Sefirot, which Azriel tries to define in their relation to the En-Sof as well as to one another. Although there are contradictions and gaps in Azriel's system, he was the first to gather the scattered elements of the cabalistic doctrines and combine them into an organic whole. Casting aside the haggadic-mystic form of the cabalistic works preceding him, Azriel adopted a style that was equal and at times superior to that of the philosophic writers of the time.

Asher ben David, a nephew and pupil of Isaac the Blind, a cabalistic contemporary of Azriel, and probably influenced by him, added little to the development of the Cabala, judging from the few fragments by him that have been preserved. On the other hand, Isaac ben Sheshet of Gerona, in his "Sha'ar ha-Shamayim," made noteworthy additions to the theoretical part of Azriel's system. The author of "Ha-Emunah we-ha-Biṭṭaḥon," erroneously ascribed to Naḥmanides, must also be included in the school of Azriel; but, desirous only to give a popular presentation of Azriel's doctrines, with a strong admixture of German mysticism, he contributed little to their development. More important is "Sefer ha-'Iyyun" (the Book of Intuition), ascribed to the gaon R. Ḥamai, but really originating in the school of Azriel.

Naḥmanides.

The cabalists themselves consider Naḥmanides as the most important pupil of Azriel—a statement not supported by Naḥmanides' works; for his commentary on the Pentateuch, although permeated by mysticism, has little that pertains to the speculative Cabala as developed by Azriel. Naḥmanides, on the contrary, emphasizes the doctrine of the "creatio ex nihilo," and also insists that attributes can be ascribed to God; while Azriel's En-Sof is the result of the assumption that God is without attributes. Yet Naḥmanides' importance for the development of the Cabala must be recognized. The greatest Talmudic authority of his time, and possessing a large following of disciples, his leaning toward the Cabala was transmitted to his pupils, among whom David ha-Kohen, R. Sheshet, and Abner are especially mentioned. The brothers Isaac b. Jacob and Jacob b. Jacob ha-Kohen also seem to have belonged to the circle of Naḥmanides. His most important pupil, however, and his successor, was Solomon ben Abraham ibn Adret, the great teacher of the Talmud, who also had a strong leaning toward the Cabala, but apparently gave little time to its study. Among his pupils were the cabalists Shem-Ṭob b. Abraham Gaon, Isaac of Acco, and Baḥya b. Asher, the last named of whom, by his commentary on the Pentateuch, contributed much to the spread of the Cabala.

Ibn Latif.

Isaac ibn Latif, who flourished about the middle of the thirteenth century, occupies a peculiar and independent position in the history of the Cabala, owing to his attempt to introduce Aristotelianism. Although he founded no school, and although the genuine cabalists did not even consider him as belonging to their group, many of his opinions found entrance into the Cabala. With Maimonides he upheld the principle of the beginning of the world; his statement, God has no will because He *is* will, is borrowed from Gabirol; and in addition he teaches the principle of the emanation of the Sefirot. He conceives of the first immediate divine emanation as the "first created" (נברא הראשון), a godlike, absolutely simple Being, the all-containing substance and condition of everything that is. The other Sefirot proceeded from this in gradual serial emanation, growing more coarse and material as their distance increased from their purely spiritual, divine origin. The relation between the “first created” and all that has since come into existence is like that between the simple geometrical point and the complicated geometrical figure. The point grows to a line, the line to a plane or superficies, and this into a solid; and just as the point is still present as a fundamental element in all geometrical figures, so the “first created” continues to act as the primal, fundamental element in all emanations. This conception of the first Sefirah as a point, or numeral unit, within the universe reappears with special frequency in the presentations of the later cabalists.

“Sefer ha-Temunah.”

The real continuation of Azriel's doctrines, however, is to be found in a number of pseudepigraphic works of the second half of the thirteenth century. Although this literature has been preserved only fragmentarily, and has not yet been critically edited to any extent, its trend nevertheless may be clearly discerned. Such works represent the attempt to put the doctrines of “Bahir” and of Azriel into dogmatic form, to shape and determine the old cabalistic teachings, and not to bring forward new ones. Among the important products of this dogmatic Cabala is, in the first place, the little work “Sefer ha-Temunah” (Book of Form), which endeavors to illustrate the principle of emanation by means of the forms of the Hebrew letters. Here for the first time the conception of the Sefirot is laid down in definite formulæ in place of the uncertain statement that they were to be considered as powers (כחות) or as tools (כלים) of God. The Sefirot, according to this book, are powers inhering in God, and are related to the En-Sof as, for instance, the limbs are to the human body. They are, so to speak, organically connected with God, forming one indivisible whole. The question that long occupied the cabalists—namely, how the expression or transmission of the will may be explained in the act of emanation—is here solved in a simple way; for all the Sefirot, being organically connected with the En-Sof, have but one common will. Just as man does not communicate his will to his arm when he wants to move it, so an expression of the will of the En-Sof is not necessary in the act of emanation. Another important principle, which is much in evidence from the Zohar down to the latest cabalistic works, is likewise clearly expressed for the first time in the “Sefer ha-Temunah”; namely, the doctrine of the double emanation, the positive and negative one. This explains the origin of evil; for as the one, the positive emanation, produced all that is good and beautiful, so the other, the negative, produced all that is bad, ugly, and unclean.

The final form was given to Azriel's Cabala by the work Ma‘areket ha-Elohut, in which Azriel's system is presented more clearly and definitely than in any other cabalistic work. The fundamental principle of the Cabala herein is the potential eternity of the world; hence the dynamic character of the emanations is especially emphasized. The treatment of the Sefirot is also more thorough and extended than in Azriel. They are identified with God; the first Sefirah, כתר (“crown”), containing *in potentia* all of the subsequent nine emanations. The doctrine of double emanations, positive and negative, is taught in “Ma‘areket,” as well as in “Sefer ha-Temunah,” but in such a way that the contrast, which corresponds exactly with the syzygy theory of the Gnostics, appears only in the third Sefirah, Binah (=“intelligence”). The author of the “Ma‘areket” proceeds as the “Baḥir” in the separation of the three superior from the seven inferior Sefirot, but in a much clearer way: he regards only the former as being of divine nature, since they emanate immediately from God; while the seven lower ones, which were all produced by the third Sefirah, are less divine, since they produce immediately the lower world-matter. A contrast which rules the world can therefore begin only with the third Sefirah; for such contrast can not obtain in the purely spiritual realm.

This point is an instructive illustration of the activity of the cabalists from the time of the “Bahir” (end of the twelfth century) to the beginning of the fourteenth century. Within this period the disjointed mystico-gnostic conceptions of the “Bahir” were gradually and untiringly woven into a connected, comprehensive system.

Side by side with this speculative and theoretical school, taking for its problem metaphysics in the strict sense of the word—namely, the nature of God and His relation to the world—another mystical movement was developed, more religio-ethical in nature, which, as Grätz rightly says, considered “the ritual, or the practical side, to call it so, as the more important, and as the one to which the theosophical side served merely as an introduction.” Both these movements had their common starting-point in the geonic mysticism, which introduced important speculative elements into practical mysticism proper. But they also had this in common, that both endeavored to come into closer relationship with God than the transcendentalism of Jewish philosophy permitted, colored as it was by Aristotelianism. Practical mysticism endeavored to make this union possible for every-day life; while speculative thinkers occupied themselves in reaching out toward a monistic construction of the universe, in which the transcendence of the primal Being might be preserved without placing Him outside of the universe.

Both of these movements, with a common end in view, were ultimately bound to converge, and this actually occurred with the appearance of the book called Zohar (זהר = “Splendor”), after Dan. xii. 3, והמשכילים יזהירו כזהר הרקיע (= “The wise shall be resplendent as the splendor of the firmament”), showing that it had the “Bahir” (= Bright) for its model. It is in the main a commentary on the Pentateuch, and R. Simon ben Yoḥai is introduced as the inspired teacher who expounds the theosophic doctrines to the circle of his saintly hearers. It first appeared therefore under the title of Midrash R. Simon ben Yoḥai.

The correspondence to the order of the Scripture is very loose, even more so than is often the case in the writings of the Midrashic literature. The Zohar is in many instances a mere aggregate of heterogeneous parts. Apart from the Zohar proper, it conains a dozen mystic pieces of various derivations and different dates that crop up suddenly, thus entirely undoing the otherwise loose texture of the Zohar.

Distinct mention is made in the Zohar of excerpts from the following writings: (1) "Idra Rabba"; (2) "Idra Zuṭṭa"; (3) "Matnitin"; (4) "Midrash ha-Ne'elam"; (5) "Ra'aya Mehemna"; (6) "Saba" (the Old); (7) "Raze de-Razin"; (8) "Sefer Hekalot"; (9) "Sifra de-Ẓeni'uta"; (10) "Sitre Torah"; (11) "Tosefta"; (12) and lastly, "Yanuḳa."

Besides the Zohar proper, there are also a "Zohar Ḥadash" (New Zohar), Zohar to Cant., and "Tiḳḳunim," both new and old, which bear a close relation to the Zohar proper.

The Zohar Literature.

For centuries, and in general even to-day, the doctrines contained in the Zohar are taken to be *the* Cabala, although this book represents only the union of the two movements mentioned above. The Zohar is both the complete guide of the different cabalistic theories and the canonical book of the cabalists. After the Zohar, which must be dated about the beginning of the fourteenth century, and which received its present shape largely from the hand of Moses de Leon, a period of pause ensued in the development of the Cabala, which lasted for more than two centuries and a half. Among the contemporaries of Moses de Leon must be mentioned the Italian Menahem Recanati, whose cabalistic commentary on the Pentateuch is really a commentary on the Zohar. Joseph b. Abraham ibn Waḳar was an opponent of the Zohar; his Introduction to the Cabala, which exists in manuscript only, is considered by Steinschneider as the best. It was some time before the Zohar was recognized in Spain. Abraham b. Isaac of Granada speaks in his work "Berit Menuḥah" (The Covenant of Rest) of "the words of R. Simon b. Yoḥai," meaning the Zohar. In the fifteenth century the authority of the Cabala, comprising also that of the Zohar, was so well recognized in Spain that Shem-Ṭob ben Joseph ibn Shem-Ṭob (died 1430) made a bitter attack on Maimonides from the standpoint of the Zohar. Moses Botarel tried to serve the Cabala by his alleged discoveries of fictitious authors and works; while the pseudonymous author of the Ḳanah attacked Talmudism under cover of the Cabala about 1415. Isaac Arama and Isaac Abravanel were followers of the Cabala in the second half of the fifteenth century, but without contributing anything to its development. Nor does the cabalistic commentary on the Pentateuch of Menahem Zioni b. Meïr contribute any new matter to the system, although it is the most important cabalistic work of the fifteenth century. Judah Ḥayyaṭ and Abraham Saba are the only noteworthy cabalists of the end of that century.

The happy remark of Baur, that a great national crisis furnishes a favorable soil for mysticism among the people in question, is exemplified in the history of the Cabala. The great misfortune that befell the Jews of the Pyrenean peninsula at the end of the fifteenth century revivified the Cabala. Among the fugitives that settled in Palestine Meïr b. Ezekiel ibn Gabbai wrote cabalistic works evincing an acute insight into the speculative Cabala. A Sicilian cabalist, Joseph Saragoza, is regarded as the teacher of David ibn Zimra, who was especially active in developing the Cabala in Egypt. Solomon Molcho and Joseph della Reina (the history of his life is distorted by many legends) represent the reviving mysticism. Deliverance from national suffering was the object of their search, which they thought to effect by means of the Cabala. Solomon Alkabiẓ and Joseph Caro, who gradually gathered a large circle of cabalistic dreamers about them, endeavored to attain a state of ecstasy by fasting, weeping, and all manner of stringent asceticism, by which means they thought to behold angels and obtain heavenly revelations. Of their number, too, was Moses Cordovero, rightly designated as the last representative of the early cabalists, and, next to Azriel, the most important speculative thinker among them.

Luria's Cabala.

The modern cabalistic school begins theoretically as well as practically with Isaac Luria (1533–72). In the first place, its doctrine of appearance, according to which all that exists is composed of substance and appearance, is most important, rendering Luria's Cabala extremely subjective by teaching that there is no such thing as objective cognition. The theoretical doctrines of Luria's Cabala were later on taken up by the Ḥasidim and organized into a system. Luria's influence was first evident in certain mystical and fanciful religious exercises, by means of which, he held, one could become master of the terrestrial world. The writing of amulets, conjuration of devils, mystic jugglery with numbers and letters, increased as the influence of this school spread. Among Luria's pupils Ḥayyim Vital and Israel Saruḳ deserve especial mention, both of them being very active as teachers and propagandists of the new school. Saruḳ succeeded in winning over the rich Menahem Azariah of Fano. Thus, a large cabalistic school was founded in the sixteenth century in Italy, where even to-day scattered disciples of the Cabala may be met. Herrera, another pupil of Saruḳ, tried to spread the Cabala among Christians by his "Introduction," written in Spanish. Moses Zacuto, Spinoza's fellow-pupil, wrote several cabalistic works strongly tinged with asceticism, which were not without influence on the Italian Jews. In Italy, however, there appeared also the first antagonists of the Cabala, at a time when it seemed to be carrying everything before it. Nothing is known of Mordecai Corcos' work against the Cabala, a work that was never printed, owing to the opposition of the Italian rabbis. Joseph del Medigo's wavering attitude toward the Cabala injured rather than helped it. Judah de Modena attacked it ruthlessly in his work "Sha'agat Aryeh" (The Lion's Roar); while an enthusiastic and clever advocate appeared, a century later, in the person of Moses Ḥayyim Luzzatto. A century later still, Samuel David Luzzatto attacked the Cabala with the weapons of modern criticism. But in the East, Luria's Cabala remained undisturbed.

After Vital's death and that of the immigrant Shlumiel of Moravia, who by his somewhat vocifer-

In the Orient.

ous methods contributed much to the spreading of Luria's doctrines, it was especially Samuel Vital, Ḥayyim Vital's son, together with Jacob Ẓemah, and Abraham Azulai, who endeavored to spread the mode of life (הנהגות) and the mystical meditations for prayer (כונות) advocated by Luria. Frequent bathing (טבילות), vigils on certain nights, as well as at midnight (see Ḥaẓot), penance for sins, and similar disciplines, were introduced by this aftergrowth of the school of Luria. It must be noted in their favor that they laid great emphasis on a pure life, philanthropy, brotherly love toward all, and friendship. The belief that such actions would hasten the Messianic time grew until it took concrete form in the appearance of Shabbethai Ẓebi, about 1665. Shabbethaism induced many scholars to study the speculative Cabala more thoroughly; and, indeed, the Shabbethaian Nehemia Ḥayyun showed in his heretical cabalistic works a more thorough acquaintance with the Cabala than his opponents, the great Talmudists, who were zealous followers of the Cabala without comprehending its speculative side. Shabbethaism, however, did not in the least compromise the Cabala in the eyes of the Oriental Jews, the majority of whom even to-day esteem it holy and believe in it.

In Germany and Poland.

While the Cabala in its different forms spread east and west within a few centuries, Germany, which seemed a promising field for mysticism in the beginning of the thirteenth century, was soon left behind. There is no cabalistic literature proper among the German Jews, aside from the school of Eleazar of Worms. Lippman Mühlhausen, about 1400, was acquainted with some features of the Cabala; but there were no real cabalists in Germany until the eighteenth century, when Polish scholars invaded the country. In Poland the Cabala was first studied about the beginning of the sixteenth century, but not without opposition from the Talmudic authorities, as, for instance, Solomon b. Jehiel Luria, who, himself a devout disciple of the Cabala, wished to have its study confined to a small circle of the elect. His friend Isserles gives proof of wide reading in cabalistic literature and of insight into its speculative part; and the same may be said of Isserles' pupil Mordecai Jaffe. But it is perhaps not a mere chance that the first cabalistic work written in Poland was composed by Mattathias Delacrut (1570), of south European descent, as his name indicates. Asher or Anschel of Cracow at the beginning of the sixteenth century is named as a great cabalist, but the nature of his doctrine can not be ascertained. In the seventeenth century, however, the Cabala spread all over Poland, so that it was considered a matter of course that all rabbis must have a cabalistic training. Nathan Spiro, Isaiah Horwitz, and Naphtali b. Jacob Elhanan were the chief contributors to the spread of Luria's Cabala in Poland, and thence into Germany. Yet, with the exception of Horwitz's work "Shene Luḥot ha-Berit" (The Two Tablets of the Covenant), there is hardly one among the many cabalistic works originating in Poland that rises in any way above mediocrity. In the following century, however, certain important works appeared on the Cabala by Eybeschütz and Emden, but from different standpoints. The former contributed a monumental work to the speculative Cabala in his "Shem 'Olam" (Everlasting Name); the latter became the father of modern Cabala criticism by his penetrating literary scrutiny of the Zohar.

Ḥasidism.

The real continuation of the Cabala is to be found in Ḥasidism, which in its different forms includes both the mystical and speculative sides. While the doctrines of the Ḥabad have shown that the Lurianic Cabala is something more than a senseless playing with letters, other forms of Ḥasidism, also derived from the Cabala, represent the acme of systematized cant and irrational talk. Elijah of Wilna's attacks on Ḥasidism chiefly brought it about that those circles in Russia and Poland which oppose Ḥasidism also avoid the Cabala, as the real domain of the Ḥasidim. Although Elijah of Wilna himself was a follower of the Cabala, his notes to the Zohar and other cabalistic products show that he denied the authority of many of the works of the Lurianic writers: his school produced only Talmudists, not cabalists. Although "Nefesh ha-Ḥayyim" (The Soul of Life), the work of his pupil Ḥayyim of Volozhin, has a cabalistic coloring, it is chiefly ethical in spirit. Ḥayyim's pupil, Isaac Ḥaber, however, evinces in his works much insight into the older Cabala. The latter also wrote a defense of the Cabala against the attacks of Modena. The non-Ḥasidic circles of Russia in modern times, though they hold the Cabala in reverence, do not study it.

Critical Treatment of the Cabala.

The critical treatment of the Zohar, begun by Emden, was continued toward the middle of the nineteenth century by a large group of modern scholars, and much was contributed in the course of the following period toward a better understanding of the Cabala, although more still remains obscure. The names of Adolf Franck, M. H. Landauer, H. Joël, Jellinek, Steinschneider, Ignatz Stern, and Solomon Munk, who paved the way for the scientific treatment of the Cabala, may be noted. Many obscurities will probably become clear as soon as more is known about Gnosticism in its different forms, and Oriental theosophy.

The Cabala in the Christian World.

This historical survey of the development of the Cabala would not be complete if no mention were made of its relation to the Christian world. The first Christian scholar who gave proof of his acquaintance with the Cabala was Raymond Lulli (born about 1225; died June 30, 1315), called "doctor illuminatus" on account of his great learning. The Cabala furnished him with material for his "Ars Magna," by which he thought to bring about an entire revolution in the methods of scientific investigation, his means being none other than letter and number mysticism in its different varieties. The identity between God and nature found in Lulli's works shows that he was also influenced by the speculative Cabala. But it was Pico di Mirandola (1463–94) who introduced the Cabala into the Christian world. The Cabala is, for him, the sum of those revealed religious doctrines of the Jews which were not originally written down, but were transmitted by oral tradition. At the instance of Ezra they were written down during his time so that they might not be lost (compare II Esdras xiv. 45). Pico, of course, holds that the Cabala contains all the doctrines of Christianity, so that "the Jews can be refuted by their own books" ("De Hom. Dignit." pp. 329 *et seq.*). He therefore made free use of cabalistic ideas in his philosophy, or, rather, his philosophy consists of Neoplatonic-cabalistic doctrines in Christian garb. Through Reuchlin (1455–1522) the Cabala became an important factor in leavening the religious movements of the time of the Reformation.

Reuchlin.

The aversion to scholasticism that increased especially in the German countries, found a positive support in the Cabala; for those that were hostile to scholasticism could confront it with another system. Mysticism also hoped to confirm its position by means of the Cabala, and to leave the limits to which it had been confined by ecclesiastical dogma. Reuchlin, the first important representative of this movement in Germany, distinguished between cabalistic doctrines, cabalistic art, and cabalistic perception. Its central doctrine, for him, was the Messianology, around which all its other doctrines grouped themselves. And as the cabalistic doctrine originated in divine revelation, so was the art cabalistic derived immediately from divine illumination. By means of this illumination man is enabled to get insight into the contents of the cabalistic doctrine through the symbolic interpretation of the letters, words, and contents of Scripture; hence the Cabala is symbolical theology. Whoever would become an adept in the cabalistic art, and thereby penetrate the cabalistic secrets, must have divine illumination and inspiration. The cabalist must therefore first of all purify his soul from sin, and order his life in accord with the precepts of virtue and morality.

Reuchlin's whole philosophical system, the doctrine of God, cognition, etc., is entirely cabalistic, as he freely admits. Reuchlin's contemporary, Heinrich Cornelius Agrippa of Nottesheim (1487–1535), holds the same views, with this difference, that he pays especial attention to the practical side of the Cabala—namely, magic—which he endeavors to develop and explain thoroughly. In his chief work, "De Occulta Philosophia," Paris, 1528, he deals principally with the doctrines of God, the Sefirot (entirely after the fashion of the cabalists), and the three worlds. The last-named point, the division of the universe into three distinct worlds—(1) that of the elements; (2) the heavenly world; and (3) the intelligible world—is Agrippa's own conception but shaped upon cabalistic patterns, by which he also tries to explain the meaning of magic. These worlds are always intimately connected with one another; the higher ever influencing the lower, and the latter attracting the influence of the former.

Mention must also be made of Francesco Zorzi (1460–1540), whose theosophy is cabalistic, and who refers to the "Hebræi" ("De Harmonia Mundi," cantus iii. 1, ch. iii.). His doctrine of the threefold soul is especially characteristic, as he uses even the Hebrew terms "Nefesh," "Ruaḥ," and "Neshamah." Natural philosophy in combination with the Christian Cabala is found in the works of the German Theophrastus Paracelsus (1493–1541), of the Italian Hieronymus Cardanus (1501–76), of the Hollander Johann Baptist von Helmont (1577–1644), and of the Englishman Robert Fludd (1574–1637). Natural science was just about to cast off its swaddling-clothes—a crisis that could not be passed through at one bound, but necessitated a number of intermediate steps. Not yet having attained to independence and being bound up more or less with purely speculative principles, it sought support in the Cabala, which enjoyed a great reputation. Among the above-mentioned representatives of this peculiar syncretism, the Englishman Fludd is especially noteworthy on account of his knowledge of the Cabala. Almost all of his metaphysical ideas are found in the Lurianic Cabala, which may be explained by the fact that he formed connections with Jewish cabalists during his many travels in Germany, France, and Italy.

Natural Philosophy.

Cabalistic ideas continued to exert their influence even after a large section of Christianity broke with the traditions of the Church. Many conceptions derived from the Cabala may be found in the dogmatics of Protestantism as taught by its first representatives, LUTHER and Melanchthon. This is still more the case with the German mystics Valentin Weigel (1533–88) and Jacob Böhme (1575–1624). Although owing nothing directly to the literature of the cabalists, yet cabalistic ideas pervaded the whole period to such an extent that even men of limited literary attainments, like Böhme, for instance, could not remain uninfluenced. In addition to these Christian thinkers, who took up the doctrines of the Cabala and essayed to work them over in their own way, Joseph de Voisin (1610–85), Athanasius Kircher (1602–84), and Knorr Baron von ROSENROTH endeavored to spread the Cabala among the Christians by translating cabalistic works, which they regarded as most ancient wisdom. Most of them also held the absurd idea that the Cabala contained proofs of the truth of Christianity. In modern times Christian scholars have contributed little to the scientific investigation of cabalistic literature. Molitor, Kleuker, and Tholuk may be mentioned, although their critical treatment leaves much to be desired.

——**Teachings:** The name "Cabala" characterizes the theosophic teachings of its followers as an ancient sacred "tradition" instead of being a product of human wisdom. This claim, however, did not prevent them from differing with one another even on its most important doctrines, each one interpreting the "tradition" in his own way. A systematic review of the Cabala would therefore have to take into account these numerous different interpretations. Only one system can, however, be considered here; namely, that which has most consistently carried out the basic doctrines of the Cabala. Leaving ḤASIDISM aside, therefore, the Zoharistic system as interpreted by Moses Cordovero and Isaac Luria, has most consistently developed these doctrines, and it will be treated here as the cabalistic system par excellence. The literary and historical value of its main works will be discussed in special articles.

The Cabala, by which speculative Cabala (קבלה עיונית) is essentially meant, was in its origin merely a system of metaphysics; but in the course of its development it included many tenets of dogmatics, divine worship, and ethics. God, the world, creation, man, revelation, the Messiah, law, sin, atonement, etc.—such are the varied subjects it discusses and describes.

God.

The doctrine of the En-Sof is the starting-point of all cabalistic speculation. God is the infinite, unlimited being, to whom one neither can nor may ascribe any attributes whatever; who can, therefore, be designated merely as En-Sof (אין סוף = "without end," "the Infinite"). Hence, the idea of God can be postulated merely negatively: it is known what God is not, but not what He is. All positive ascriptions are finite, or as Spinoza later phrased it, in harmony with the Cabala, "omnis determinatio est negatio." One can not predicate of God either will or intention or word or thought or deed (Azriel, in Meïr ibn Gabbai's "Derek Emunah," ed. Berlin, p. 4a). Nor can one ascribe to Him any change or alteration; for He is nothing that is finite: He is the negation of all negation, the absolutely infinite, the En-Sof.

Creation.

In connection with this idea of God there arises the difficult question of the creation, the principal problem of the Cabala and a much-discussed point in Jewish religious philosophy. If God be the En-Sof—that is, if nothing exists outside of God—then the question arises, How may the universe be explained? This can not have preexisted as a reality or as primal substance; for nothing exists outside of God: the creation of the world at a definite time presupposes a change of mind on the part of God, leading Him from non-creating to creating. But a change of any kind in the En-Sof is, as stated, unthinkable; and all the more unthinkable is a change of mind on His part, which could have taken place only because of newly developed or recognized reasons influencing His will, a situation impossible in the case of God. This, however, is not the only question to be answered in order to comprehend the relation between God and the world. God, as an infinite, eternal, necessary being, must, of course, be purely spiritual, simple, elemental. How was it possible then that He created the corporeal, compounded world without being affected by coming in contact with it? In other words, how could the corporeal world come into existence, if a part of God was not therein incorporated?

In addition to these two questions on creation and a corporeal world, the idea of divine rulership of the world, Providence, is incomprehensible. The order and law observable in the world presuppose a conscious divine government. The idea of Providence presupposes a knower; and a knower presupposes a connection between the known and the knower. But what connection can there be between absolute spirituality and simplicity on the one side, and the material, composite objects of the world on the other?

World.

No less puzzling than Providence is the existence of evil in the world, which, like everything else, exists through God. How can God, who is absolutely perfect, be the cause of evil? The Cabala endeavors to answer all these questions by the following assumption:

The Primal Will.

Aristotle, who is followed by the Arabian and Jewish philosophers, taught (see Munk's note to his translation of the "Moreh Nebukim," i. 68) that in God, thinker, thinking, and the object thought of are absolutely united. The cabalists adopted this philosophic tenet in all its significance, and even went a step further by positing an essential difference between God's mode of thinking and man's. With man the object thought of remains abstract, a mere form of the object, which has only a subjective existence in the mind of man, and not an objective existence outside of him. God's thought, on the other hand, assumes at once a concrete spiritual existence. The mere form even is at once a substance, purely spiritual, simple, and unconfined, of course, but still concrete; since the difference between subject and object does not apply to the First Cause, and no abstraction can be assumed. This substance is the first product of the First Cause, emanating immediately from Wisdom, which is identical with God, being His thought; hence, like Wisdom, it is eternal, inferior to it only in degree, but not in time; and through it, the primal will (רצון הקדום), everything was produced and everything is continuously arranged (Azriel, *l.c.* 3a; this point is discussed in detail in Eybeschütz, "Shem 'Olam," pp. 50 *et seq.*). The Zohar expresses this thought in its own way in the words: "Come and see! Thought is the beginning of everything that is; but as such it is contained within itself and unknown. . . . The real [divine] thought is connected with the אין [the "Not"; in the Zohar אין = "En-Sof"], and never separates from it. This is the meaning of the words (Zech. xiv. 9) 'God is one, and His name is one'" (Zohar, Wayeḥi, i. 246b).

Its Wisdom.

The Zohar, as may be seen here, uses the expression "thought" where other cabalists use "primal will"; but the difference of terminology does not imply a difference of conception. The designation "will" is meant to express here merely a negation; namely, that the universe was not produced unintentionally by the First Cause, as some philosophers hold, but through the intention—*i.e.*, the wisdom—of the First Cause. The first necessary and eternal, existing cause is, as its definition "En-Sof" indicates, the most complete, infinite, all-inclusive, and ever actually thinking Wisdom. But it can not be even approached in discussion. The object of its thought, which is also eternal and identified with it, is, as it were, the plan of the universe, in its entire existence and its duration in space and in time. That is to say, this plan contains not only the outline of the construction of the intellectual and material world, but also the determination of the time of its coming into being; of the powers operating to that end in it; of the order and regulation according to fixed norms of the successive events, vicissitudes, deviations, originations, and extinctions to take place in it. The Cabala sought to answer the above-mentioned questions regarding the creation and Providence by thus positing a primal will. The creation of the world occasioned no change in the First Cause; for the transition from potentiality to reality was contained in the primal will already.

Providence.

The primal will contains thus within itself the plan of the universe in its entire infinity of space and time, being for that reason *eo ipso* Providence, and is omniscient concerning all its innumerable details. Although the First Cause is the sole source of all knowledge, this knowledge is only of the most general and simple nature. The omniscience of the First Cause does not limit the freedom of man because it does not occupy itself with details; the omniscience of the primal will, again, is only of a hypothetical and conditional character and leaves free rein to the human will.

The act of creation was thus brought about by means of the Primal Will, also called the Infinite Light (אור אין סוף). But the question still remains unanswered: How is it possible that out of that which is absolute, simple, and indeterminate—it being identical with the "First Cause"—namely, the "Primal Will"—there should emerge determinate, composite beings, such as exist in the universe? The cabalists endeavor to explain the transition from the infinite to the finite by the theory of the Ẓimẓum; *i.e.*, contraction. The phenomenon, that which appears, is a limitation of what is originally infinite and, therefore, in itself invisible and imperceptible, because the undefined is insensible to touch and sight. "The En-Sof," says the Cabala, "contracted Himself in order to leave an empty space in the world." In other words, the infinite totality had to become manifold in order to appear and become visible in definite things. The power of God is unlimited: it is not limited to the infinite, but includes also the finite (Azriel, *l.c.* p. 2a). Or, as the later cabalists phrase it, the plan of the world lies within the First Cause; but the idea of the world includes the phenomenon, which must, therefore, be made possible. This power contained in the First Cause the cabalists called "the line" (קו) [compare the Gnostic "Ḳaw la-Ḳaw" mentioned above.—K.]; it runs through the whole universe and gives it form and being.

Identity of Substance and Form.

But another danger arises here. If God is immanent in the universe, the individual objects—or, as Spinoza terms them, the "modi"—may easily come to be considered as a part of the substance. In order to solve this difficulty, the cabalists point out, in the first place, that one perceives in the accidental things of the universe not only their existence, but also an organic life, which is the unity in the plurality, the general aim and end of the individual things that exist only for their individual aims and ends. This appropriate interconnection of things, harmonizing as it does with supreme wisdom, is not inherent in the things themselves, but can only originate in the perfect wisdom of God. From this follows the close connection between the infinite and the finite, the spiritual and the corporeal, the latter being contained in the former. According to this assumption it would be justifiable to deduce the spiritual and infinite from the corporeal and finite, which are related to each other as the prototype to its copy. It is known that everything that is finite consists of substance and form; hence, it is concluded that the Infinite Being also has a form in absolute unity with it, which is infinite, surely spiritual, and general. While one can not form any conception of the En-Sof, the pure substance, one can yet draw conclusions from the "Or En-Sof" (The Infinite Light), which in part may be cognized by rational thought; that is, from the appearance of the substance one may infer its nature. The appearance of God is, of course, differentiated from that of all other things; for, while all else may be cognized only as a phenomenon, God may be conceived as real without phenomenon, but the phenomenon may not be conceived without Him (Cordovero, "Pardes," xxv., "Sha'ar ha-Temurot"). Although it must be admitted that the First Cause is entirely uncognizable, the definition of it includes the admission that it contains within it all reality, since without that it would not be the general First Cause. The infinite transcends the finite, but does not exclude it, because the concept of infinite and unlimited can not be combined with the concept of exclusion. The finite, moreover, can not exist if excluded, because it has no existence of its own. The fact that the finite is rooted in the infinite constitutes the beginnings of the phenomenon which the cabalists designate as אור בבחינת בריאה ("the light in the test of creation"), indicating thereby that it does not constitute or complete the nature of God, but is merely a reflection of it. The First Cause, in order to correspond to its concept as containing all realities, even those that are finite, has, as it were, retired into its own nature, has limited and concealed itself, in order that the phenomenon might become possible, or, according to cabalistic terminology, that the first concentration (צמצום הראשון) might take place. This concentration, however, does not represent the transition from potentiality to actuality, from the infinite to the finite; for it took place within the infinite itself in order to produce the infinite light. Hence this concentration is also designated as בקיעה ("cleavage"), which means that no change really took place within the infinite, just as we may look into an object through a fissure in its surface while no change has taken place within the object itself. It is only after the infinite light has been produced by this concentration, *i.e.*—after the First Cause has become a phenomenon—that a beginning is made for the transition to the finite and determinate, which is then brought about by a second concentration.

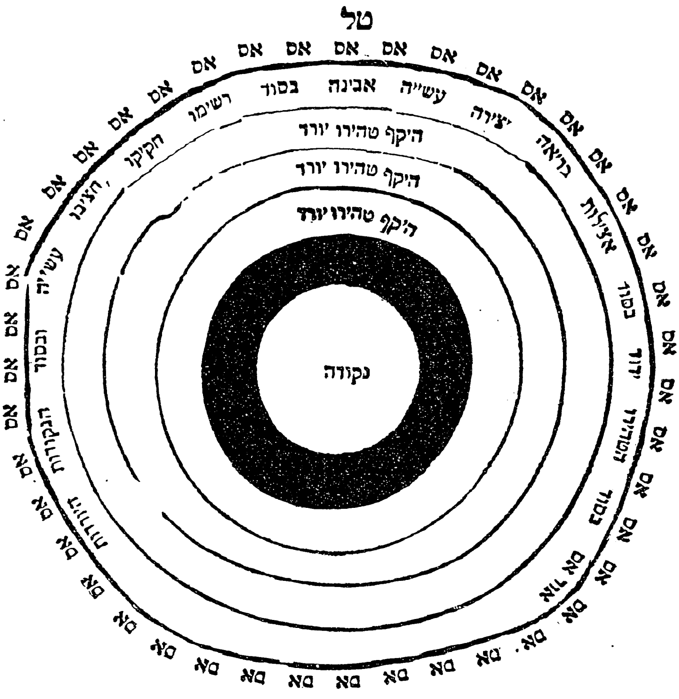
Concentration.

The finite in itself has no existence, and the infinite as such can not be perceived: only through the light of the infinite does the finite appear as existent; just as by virtue of the finite the infinite becomes perceptible. Hence, the Cabala teaches that the infinite light contracted and retired its infin-

The Sefirot.

ity in order that the finite might become existent; or, in other words, the infinite appears as the sum of finite things. The first as well as the second concentration takes place only within the confines of mere being; and in order that the infinite realities, which form an absolute unity, may appear in their diversity, dynamic tools or forms must be conceived, which produce the gradations and differences and the essential distinguishing qualities of finite things. This leads to the doctrine of the Sefirot, which is perhaps the most important doctrine of the Cabala. Notwithstanding its importance, it is presented very differently in different works. While some cabalists take the Sefirot to be identical, in their totality, with the Divine Being—*i.e.*, each Sefirah representing only a different view of the infinite, which is comprehended in this way (compare "Ma'areket," p. 8b, below)—others look upon the Sefirot merely as tools of the Divine power, superior creatures, that are, however, totally different from the Primal Being (Recanati, "Ṭa'ame Miẓwot," *passim*). The following definition of the Sefirot, in agreement with Cordovero and Luria, may, however, be regarded as a logically correct one:

God is immanent in the Sefirot, but He is Himself more than may be perceived in these forms of idea and being. Just as, according to Spinoza, the primal substance has infinite attributes, but manifests itself only in two of these—namely, extent and thought—so also is, according to the conception of the Cabala, the relation of the Sefirot to the En-Sof. The Sefirot themselves, in and through which all changes take place in the universe, are composite in so far as two natures may be distinguished in them; namely, (1) that in and through which all change takes place, and (2) that which is unchangeable, the light or the Divine power. The cabalists call these two different natures of the Sefirot "Light" and "Vessels" (אור, כלים). For, as vessels of different color reflect the light of the sun differently without producing any change in it, so the divine light manifested in the Sefirot is not changed by their seeming differences (Cordovero, *l.c.* "Sha'ar 'Aẓamot we-Kelim," iv.).

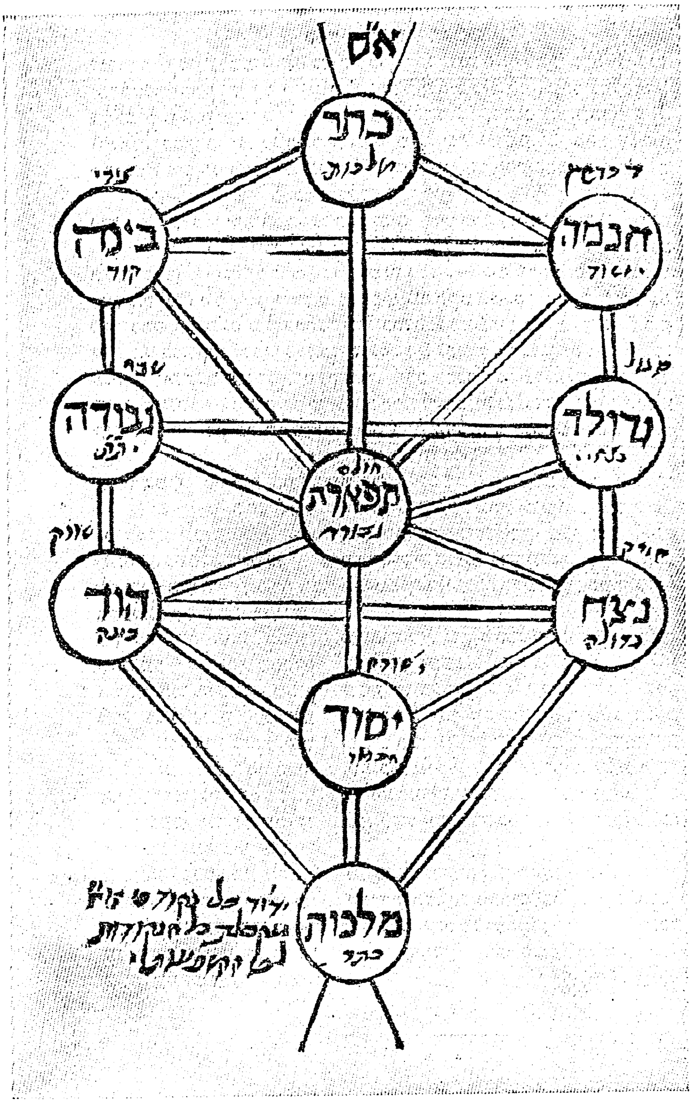


Relation of the Cabalistic Spheres.
(From Horwitz, "Shefa' Tal," 1612.)

The first Sefirah, Keter (כתר = "crown," or רום מעלה = "exalted height"), is identical with the primal will (רצון הקדום) of God, and is differentiated from the En-Sof, as explained above, only as being the first effect, while the En-Sof is the first cause. This first Sefirah contained within itself the plan of the universe in its entire infinity of time and space. Many cabalists, therefore, do not include the Keter among the Sefirot, as it is not an actual emanation of the En-Sof; but most of them place it at the head of the Sefirot. From this Keter, which is an absolute unity, differentiated from everything manifold and from every relative unity, proceed two parallel principles that are apparently opposed, but in reality are inseparable: the one masculine, active, called Ḥokmah (חכמה = "wisdom"); the other feminine, passive, called Binah (בינה = "intellect"). The union of Ḥokmah and Binah produces Da'at (דעת = "reason"); that is, the contrast between subjectivity and objectivity finds its solution in reason, by which cognition or knowledge becomes possible. Those cabalists who do not include Keter among the Sefirot, take Da'at as the third Sefirah; but the majority consider it merely as a combination of Ḥokmah and Binah and not as an independent Sefirah.

The First Three Sefirot.

The first three Sefirot, Keter, Ḥokmah, and Binah, form a unity among themselves; that is, knowledge, the knower, and the known are in God identical, and thus the world is only the expression of the ideas or the absolute forms of intelligence. Thus the identity of thinking and being, or of the real and ideal, is taught in the Cabala in the same way as in Hegel. Thought in its threefold manifestation again produces contrasting principles; namely, Ḥesed (חסד = "mercy"), the masculine, active principle, and Din (דין = "justice"), the feminine, passive principle, also called Paḥad (פחד = "awe") and Geburah (גבורה = "might"), which combine in a common principle, Tif'eret (תפארת = "beauty"). The concepts justice and mercy, however, must not be taken in their literal sense, but as symbolical designations for expansion and contraction of the will; the sum of both, the moral order, appears as beauty. The last-named trinity of the Sefirot represents dynamic nature, namely, the masculine Neẓaḥ (נצח = "triumph"); and the feminine Hod (הוד = "glory"); the former standing for increase, and the latter for the force from which proceed all the forces produced in the universe. Neẓaḥ and Hod unite to produce Yesod (יסוד = "foundation"), the reproductive element, the root of all existence.



The Sefirot in Relation to One Another.
(From "Asis Rimmonim," 1601.)

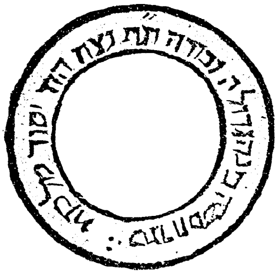
These three trinities of the Sefirot are also designated as follows: The first three Sefirot form the intelligible world (עולם מושכל, or עולם השכל, as Azriel [*l.c.* p. 3b] calls it, corresponding to the *κόσμος νοητός* of the Neoplatonists), representing, as we have seen, the absolute identity of being and thinking. The second triad of the Sefirot is moral in character; hence Azriel (*l.c.*) calls it the "soul-world," and later cabalists עולם מורגש ("the sensible world"); while the third triad constitutes the natural world (עולם המוטבע, or, as in Azriel [*l.c.*], עולם הגוף, and in the terminology of Spinoza "natura naturata"). The tenth Sefirah is Malkut (מלכות = "dominion"), that in which the will, the plan, and the active forces become manifest, the sum of the permanent and immanent activity of all Sefirot. The Sefirot on their first appearance are not yet the dynamic tools proper, as it were, constructing and regulating the world of phenomena, but merely the prototypes of them.

The Four Worlds.

In their own realm, called עולם האצילות ("realm of emanation"; see Aẓilut), or sometimes Adam Ḳadmon, because the figure of man is employed in symbolic representation of the Sefirot, the Sefirot are conceived merely as conditions of the finite that is to be; for their activity only begins in the other so-called three worlds; namely, (1) the world of creative ideas (עולם הבריאה), (2) the world of creative formations (ע' היצירה), and (3) the world of creative matter (ע' העשיה). The earliest description of these four worlds is found in the "Masseket Aẓilut." The first Aẓilutic world contains the Sefirot (כבוד in this passage = ספירות, as Azriel, *l.c.* 5a, says), and in the Beriatic (בריאה) world are the souls of the pious, the divine throne, and the divine halls. The Yeẓiratic (יצירה) world is the seat of the ten classes of angels with their chiefs, presided over by Meṭaṭron, who was changed into fire; and there are also the spirits of men. In the 'Asiyyatic (עשיה) world are the ofanim, the angels that receive the prayers and control the actions of men, and wage war against evil or Samael ("Masseket Aẓilut," in Jellinek, "Ginze Ḥokmat ha-Ḳabbalah," pp. 3-4). Although there is no doubt that these four worlds were originally conceived as real, thus occasioning the many fantastic descriptions of them in the early Cabala, they were subsequently interpreted as being purely idealistic.

The later Cabala assumes three powers in nature, the mechanical, the organic, and the teleological, which are connected together as the result of a general, independent, purely spiritual, principal idea.

They are symbolized by the four worlds. The corporeal world (ע' העשיה) is perceived as a world subjected to mechanism. As this can not be derived from a body or corporeality, the Cabala attempts to find the basis for it in the noncorporeal; for even the 'Asiyyatic world has its Sefirot; *i.e.*, non-corporeal powers that are closely related to the monads of Leibnitz. This assumption, however, explains only inorganic nature; while organic, formative, developing bodies must proceed from a power that operates from within and not from without. These inner powers that form the organism from within, represent the Yeziratic world, the realm of creation. As there is found in nature not activity merely, but also wise activity, the cabalists call this intelligence manifested in nature the realm of creative ideas. Since, however, the intelligent ideas which are manifested in nature proceed from eternal truths that are independent of existing nature, there must necessarily exist the realm of these eternal truths, the Azilutic world. Hence the different worlds are essentially one, related to one another as prototype and copy. All that is contained in the lower world is found in higher archetypal form in the next higher world. Thus, the universe forms a large unified whole, a living, undivided being, that consists of three parts enveloping one another successively; and over them soars, as the highest archetypal seal, the world of Azilut.



Correct Order of Sefirot Arranged in a Circle.

The Aleph as a Symbol of the Four Cabalistic Worlds.
(From "Asis Rimmonim," 1601.)

Man. The psychology of the Cabala is closely connected with its metaphysical doctrines. As in the Talmud, so in the Cabala man is represented as the sum and the highest product of creation. The very organs of his body are constructed according to the mysteries of the highest wisdom: but man proper is the soul; for the body is only the garment, the covering in which the true inner man appears. The soul is threefold, being composed of Nefesh, Ruah, and Neshamah; Nefesh (נפש) corresponds to the 'Asiyyatic world, Ruah (רוח) to the Yeziratic, and Neshamah (נשמה) to the Beriatic. Nefesh is the animal, sensitive principle in man, and as such is in immediate touch with the body. Ruah represents the moral nature; being the seat of good and evil, of good and evil desires, according as it turns toward Neshamah or Nefesh. Neshamah is pure intelligence, pure spirit, incapable of good or evil: it is pure divine light, the climax of soul-life. The genesis of these three powers of the soul is of course different. Neshamah proceeds directly from divine Wisdom, Ruah from the Sefirah Tif'eret ("Beauty"), and Nefesh from the Sefirah Malkut ("Dominion"). Aside from this trinity of the soul there is also the individual principle; that is, the idea of the body with the traits belonging to each person individually, and the spirit of life that has its seat in the heart. But as these last two elements no longer form part of the spiritual nature of man, they are not included in the divisions of the soul. The cabalists explain the connection between soul and body as follows: All souls exist before the formation of the body in the suprasensible world (compare Preexistence), being united in the course of time with their respective bodies. The descent of the soul into the body is necessitated by the finite nature of the former: it is bound to unite with the body in order to take its part in the universe, to contemplate the spectacle of creation, to become conscious of itself and its origin, and, finally, to return, after having completed its tasks in life, to the inexhaustible fountain of light and life—God.

Immortality. While Neshamah ascends to God, Ruah enters Eden to enjoy the pleasures of paradise, and Nefesh remains in peace on earth. This statement, however, applies only to the just. At the death of the godless, Neshamah, being stained with sins, encounters obstacles that make it difficult for it to return to its source; and until it has returned, Ruah may not enter Eden, and Nefesh finds no peace on earth.

Closely connected with this view is the doctrine of the transmigration of the soul (see Metempsychosis), on which the Cabala lays great stress. In order that the soul may return to its source, it must previously have reached full development of all its perfections in terrestrial life. If it has not fulfilled this condition in the course of *one* life, it must begin all over again in another body, continuing until it has completed its task. The Lurianic Cabala added to metempsychosis proper the theory of the impregnation (עבור) of souls; that is, if two souls do not feel equal to their tasks God unites both in one body, so that they may support and complete each other, as, for instance, a lame man and a blind one may conjointly do (compare the parable in Sanh. 91a, b). If one of the two souls needs aid, the other becomes, as it were, its mother, bearing it in its lap and nourishing it with its own substance.

In regard to the proper relation of the soul to God, as the final object of its being, the cabalists distinguish, both in cognition and in will, a twofold gradation therein. As regards the will, we may fear God and also love Him. Fear is justified as it leads to love. "In love is found the secret of divine unity: it is love that unites the higher and lower stages,

Love, the Highest Relation to God.

and that lifts everything to that stage where all must be one" (Zohar, wa-Yaḳhel, ii. 216a). In the same way human knowledge may be either reflected or intuitive, the latter again being evidently the higher. The soul must rise to these higher planes of knowledge and will, to the contemplation and love of God; and in this way it returns to its source. The life beyond is a life of complete contemplation and complete love. The relation between the soul and God is represented in the figurative language of the Zoharistic Cabala as follows: "The soul, Neshamah [which proceeds from the Sefirah Binah, as mentioned above], comes into the world through the union of the king with the matrona—'king' meaning the Sefirah Tiferet and 'matrona' the Sefirah Malkut—and the return of the soul to God is symbolized by the union of the matrona with the king." Similarly, the merciful blessing that God accords to the world is symbolized by the first figure; and by the second, the spiritualizing and ennobling of what is material and common through man's fulfilment of his duty.

Ethics of the Cabala.

The Doctrine of Influence.

It is seen hereby that ethics is the highest aim of the Cabala; it can be shown, indeed, that metaphysics is made subservient to it. The cabalists of course regard the ethical question as a part of the religious one, their theory of influence characterizing their attitude toward ethics as well as law. "The terrestrial world is connected with the heavenly world, as the heavenly world is connected with the terrestrial one," is a doctrine frequently recurring in the Zohar (Noaḥ, i. 70b). The later cabalists formulate this thought thus: The Sefirot impart as much as they receive. Although the terrestrial world is the copy of the heavenly ideal world, the latter manifests its activity according to the impulse that the former has received. The connection between the real and the ideal world is brought about by man, whose soul belongs to heaven, while his body is earthly. Man connects the two worlds by means of his love for God, which, as explained above, unites him with God. The knowledge of the law in its ethical as well as religious aspects is also a means toward influencing the higher regions; for the study of the law means the union of man with divine wisdom. Of course, the revealed doctrine must be taken in its true sense; *i.e.*, the hidden meaning of Scripture must be sought out (see Jew. Encyc. i. 409, *s.v.* Allegorical Interpretation). The ritual also has a deeper mystical meaning, as it serves to preserve the universe and to secure blessings for it. Formerly this was the object of the ritual sacrifices in the Temple; but now their place is taken by prayer. Devout worship, during which the soul is so exalted that it seems desirous of leaving the body in order to be united with its source, agitates the heavenly soul; that is, the Sefirah Binah. This stimulus occasions a secret movement among the Sefirot of all the worlds, so that all approach more or less to their source until the full bliss of the En-Sof reaches the last Sefirah, Malkut, when all the worlds become conscious of a beneficent influence. Similarly, just as the good deeds of man exert a beneficent influence on all the worlds, so his evil actions injure them.

The question as to what constitutes evil and what good, the cabalists answer as follows:

The Problem of Evil.

In discussing the problem of evil, a distinction must be made between evil itself, and evil in human nature. Evil is the reverse of the divine סטרא אחרא [the *left* side, while the good is the right side—a Gnostic idea (see above).—K.]. As the divine has true being, evil is that which has no being, the unreal or the seeming thing, the thing as it appears. And here again distinction must be made, between the thing which appears to be but is not—*i.e.*, the appearance of a thing which is unreal—and the appearance of a thing which is what it appears to be—*i.e.*, as a being of its own, having an original type of existence of its own. This "appearance of an appearance" or semblance of the phenomenon is manifested in the very beginnings of the finite and the multiform, because these beginnings include the boundaries of the divine nature; and the boundaries of the divine constitute the godless, the evil. In other words, evil is the finite. As the finite includes not only the world of matter, but, as has been shown above, also its idea, the cabalists speak of the Beriatic, Yeẓiratic, and 'Asiyyatic worlds of evil, as these worlds contain the beginnings of the finite. Only the world of the immediate emanations (עולם האצילות), where the finite is conceived as without existence and seeking existence, is free from evil. Evil in relation to man is manifested in that he takes semblance for substance, and tries to get away from the divine primal source instead of striving after union with it.

The Fall of Man.

Most of the post-Zoharic cabalistic works combine with this theory of evil a doctrine on the fall of man resembling the Christian tenet. Connecting with the ancient view of Adam's corporeal and spiritual excellence before the Fall (see Adam in Rabbinical Literature), the later cabalists assert that originally all souls were combined into one, forming the soul of Adam. Man in his original state, therefore, was still a general being, not endowed with the empirical individuality with which he now appears in the world; and together with man the whole lower creation was in a spiritual, glorified state. But the venom of the serpent entered into man, poisoning him and all nature, which then became susceptible to the influence of evil. Then human nature was darkened and made coarse, and man received a corporeal body; at the same time the whole 'Asiyyatic world, of which man had been the lord and master, was condensed and coarsened. The Beriatic and Yeẓiratic worlds were also affected; influenced by man, they sank like the 'Asiyatic world, and were also condensed in a proportionately superior degree. By this theory the cabalists explain the origin of physical and moral evil in the world. Yet the Cabala by no means considers man as lost after the Fall. The greatest sinner, they hold, may attract the higher heavenly power by penitence, thus counteracting the poison of the serpent working in him. The warfare between man and the satanic power will only cease when man is again elevated into the center of divine light, and once more is in actual contact with it. This original glory and spirituality of man and of the world will be restored in the Messianic age, when heaven and earth will be renewed, and even Satan will renounce his wickedness. This last point has a somewhat Christian tinge, as indeed other Christian ideas are also found in the Cabala, as, *e.g.*, the trinity of the Sefirot, and especially of the first triad. [But on three powers in the one God compare Philo, "De Sacrificio Abelis et Caini," xv.; *idem*, "Quæstio in Genes." iv. 2; and F. Conybeare, "Philo's Contemplative Life," 1895, p. 304.—K.] But although the Cabala accepted various foreign elements, actual Christian elements can not be definitely pointed out. Much that appears Christian is in fact nothing but the logical development of certain ancient esoteric doctrines, which were incorporated into Christianity and contributed much to its development, and which are also found in Talmudic works and in Talmudic Judaism.

Opinions on the Value of the Cabala.

In forming an opinion upon the Cabala one must not be prejudiced by the general impression made on the modern mind by the cabalistic writings, especially the often repulsive Zoharistic Cabala. In former centuries the Cabala was looked upon as a divine revelation; modern critics are inclined to condemn it entirely owing to the fantastic dress in which most cabalists clothe their doctrines, which gives the latter an entirely un-Jewish appearance. If the Cabala were really as un-Jewish as it is alleged to be, its hold upon thousands of Jewish minds would be a psychological enigma defying all process of reasoning. For while the attempt, inaugurated by Saadia, to harmonize Talmudic Judaism with Aristotelianism failed in spite of the brilliant achievements of Maimonides and his school, the Cabala succeeded in being merged so entirely in Talmudic Judaism that for half a century the two were almost identical. Although some cabalists, such as Abulafia and the pseudonymous author of "Kanah," were not favorably disposed toward Talmudism, yet this exception only proves the rule that the cabalists were not conscious of any opposition to Talmudic Judaism, as is sufficiently clear from the fact that men like Naḥmanides, Solomon ibn Adret, Joseph Caro, Moses Isserles, and Elijah b. Solomon of Wilna were not only supporters of the Cabala, but even contributed largely to its development. As these men were the actual representatives of true Talmudic Judaism, there must have been something in the Cabala that attracted them. It can not have been its metaphysics; for Talmudic Judaism was not greatly interested in such speculations. It must be, then, that the psychology of the Cabala, in which a very high position is assigned to man, appealed to the Jewish mind. While Maimonides and his followers regarded philosophical speculation as the highest duty of man, and even made the immortality of the soul dependent on it; or, speaking more correctly, while immortality meant for them only the highest development of "active intellect" (שכל הפועל) in man, to which only a few attained, the Cabalists taught not only that every man may expect a great deal in the future world, according to his good and pious actions, but even that he is the most important factor in nature in this world. Not man's intelligence, but his moral nature, determines what he is. Nor is he merely a spoke in the wheel, a small, unimportant fragment of the universe, but the center around which everything moves. Here the Jewish Cabala, in contrast to alien philosophy, tried to present the true Jewish view of life, and one that appealed to Talmudic Judaism.

The Cabala and the Talmud.

The Cabala and Philosophy.

The Jew as well as the man was recognized in the Cabala. Notwithstanding the strongly pantheistic coloring of its metaphysics, the Cabala never attempted to belittle the importance of historic Judaism, but, on the contrary, emphasized it. Like the school of Maimonides, the cabalists also interpreted Scripture allegorically; yet there is an essential difference between the two. Abraham and most of the Patriarchs are, for both, the symbols of certain virtues, but with this difference; namely, that the Cabala regarded the lives of the Patriarchs, filled with good and pious actions, as incarnations of certain virtues—*e.g.*, the life of Abraham as the incarnation of love—while allegorical philosophy sought for exclusively abstract ideas in the narratives of Scripture. If the Talmudists looked with horror upon the allegories of the philosophical school, which, if carried out logically—and there have always been logical thinkers among the Jews—would deprive Judaism of every historical basis, they did not object to the cabalistic interpretation of Scripture, which here also identified ideality with reality.

The same holds good in regard to the Law. The cabalists have been reproved for carrying to the extreme the allegorization of the ritual part of the Law. But the great importance of the Cabala for rabbinical Judaism lies in the fact that it prevented the latter from becoming fossilized. It was the Cabala that raised prayer to the position it occupied for centuries among the Jews, as a means of transcending earthly affairs for a time and of feeling oneself in union with God. And the Cabala achieved this at a period when prayer was gradually becoming a merely external religious exercise, a service of the lips and not of the heart. And just as prayer was ennobled by the influence of the Cabala, so did most ritual actions cast aside their formalism, to become spiritualized and purified. The Cabala thus rendered two great services to the development of Judaism: it repressed both Aristotelianism and Talmudic formalism.

Noxious Influences.

These beneficial influences of the Cabala are, however, counterbalanced by several most pernicious ones. From the metaphysical axiom, that there is nothing in the world without spiritual life, the cabalists developed a Jewish Magic. They taught that the elements are the abode of beings which are the dregs or remnants of the lowest spiritual life, and which are divided into four classes; namely, elemental beings of fire, air, water, and earth; the first two being invisible, while the last two may easily be perceived by the senses. While the latter are generally malicious imps who vex and mock man, the former are well disposed and helpful. Demonology, therefore, occupies an important position in the works of many cabalists; for the imps are related to those beings that are generally designated as demons (שדים), being endowed with various supernatural powers and with insight into the hidden realms of lower nature, and even occasionally into the future and the higher spiritual world. Magic (מעשה שדים) may be practised with the help of these beings, the cabalists meaning white magic in contrast to מעשה כישוף ("the black art").

Natural magic depends largely on man himself; for, according to the Cabala, all men are endowed with insight and magical powers which they may develop. The means especially mentioned are: "Kawwanah" (כונה) = intense meditation, in order to attract the higher spiritual influence; a strong will exclusively directed toward its object; and a vivid imagination, in order that the impressions from the spiritual world may enter profoundly into the soul and be retained there. From these principles many cabalists developed their theories on Casting of Lots, Necromancy, Exorcism, and many other superstitions. Bibliomancy and the mysticism of numbers and letters were developed into complete systems.

Cabalistic Superstition.

The metaphysical conception of the identity of the real with the ideal gave rise to the mystical conception that everything beheld by our senses has a mystical meaning; that the phenomena may instruct man as to what takes place in the divine idea or in the human intellect. Hence the cabalistic doctrine of the heavenly alphabet, whose signs are the constellations and stars. Thus Astrology was legitimized, and bibliomancy found its justification in the assumption that the sacred Hebrew letters are not merely signs for things, but implements of divine powers by means of which nature may be subjugated. It is easy to see that all these views were most pernicious in their influence on the intellect and soul of the Jew. But it is equally true that these things did not originate in the Cabala, but gravitated toward it. In a word, its works represent that movement in Judaism which attempted to Judaize all the foreign elements in it, a process through which healthy and abnormal views were introduced together. Compare Adam Ḳadmon, Allegorical Interpretation, Amulets, Ascension, Aẓilut, Creation, Emanation, Metempsychosis, Sefirot, Syzygies, Zohar; and, on the relation of the Cabala to non-Jewish religions, Gnosticism and Parseeism.

Bibliography: Only those cabalistic works are mentioned here that systematically discuss the Cabala or that are recognized as standard authorities in reference to it. The catalogue of Oppenheimer's library, *Ḳohelet David*, Hamburg, 1826, contains the names of most of the cabalistic works that had appeared up to the first third of the eighteenth century. Neubauer's catalogue of the Hebrew books in the Bodleian Library, Oxford, and Steinschneider's of the Munich Library, give information on the most important manuscripts of the Cabala. The following are the most important cabalistic works that have appeared: Azriel, *Perush 'Eser Sefirot*, Berlin, 1850, in Meïr ibn Gabbai, *Derek Emunah*; Eleazar of Worms, commentary on the *Sefer Yeẓirah*, Przemysl, 1889; *Keter Shem-Ṭob* (anonymous), in Jellinek, *Auswahl Kabbalistischer Mystik*, Leipsic, 1853; Abraham Abulafia, *Sheba' Netibot ha-Torah*, in Jellinek, *Philosophie und Kabbala*, *ib.* 1854; Isaac ibn Latif, *Ginze ha-Melek*, in *Kokbe Yiẓḥak*, xxviii.; *Ẓurat ha-'Olam*, Vienna, 1862; *Rab Pe'alim*, Lemberg, 1885; *Ma'areket ha-Elahut* (alleged author, Pharez), Ferrara, 1557; Joseph b. Abraham Gikatilla, *Sha'are Orah*, Mantua, 1561; Moses b. Shem-Ṭob de Leon, *Sefer Nefesh ha-Ḥakamah*, Basel, 1608; *Zohar*, alleged author, Simon b. Yoḥai, Mantua, 1558–60; Cremona, 1558; Shem-Ṭob ben Shem-Ṭob, *Sefer ha-Emunot*, Ferrara, 1556; Meïr ben Ezekiel ibn Gabbai, *Derek Emunah*, Padua, 1562; Moses b. Jacob Cordovero, *Pardes Rimmonim*, Cracow and Novydvor, 1591, the best and most profound treatise upon the Cabala by a cabalist. Isaac b. Solomon Luria's doctrines are discussed in the works of his pupils, especially in Ḥayyim Vital, *Eẓ Ḥayyim*, Korez, 1784; Abraham Herrera, *Sha'ar ha-Shamayim*, Amsterdam, 1665; also in Latin, *Porta Cœlorum*, Sulzbach, 1678; Isaiah b. Abraham Horwitz, *Shene Luḥot ha-Berit*, Amsterdam, 1649; Joseph Ergas, *Shomer Emunim*, Amsterdam, 1736, a readable discussion of important cabalistic doctrines; Moses Ḥayyim Luzzatto, *Ḥoḳer u-Meḳabbel*, Shklov, 1785; German transl. by Freystadt, Königsberg, 1840; Sefer קל"ח, *Pitḥe Ḥokmah*, Korez, 1785, the last and best introduction to the Cabala by a cabalist; Jonathan Eybeschütz, *Shem 'Olam*, Vienna, 1891, on the geonic mystical literature (see page 463 of the Jew. Encycl., vol. ii.).

K. L. G.

CABALLERIA, DE LA: Marano family of Aragon, Spain, widely ramified, and influential through its wealth and scholarship, especially in Saragossa. The family descended from D. Solomon ibn Labi de la Caballeria, who had nine sons. The eldest, Bonafos de la Caballeria, was baptized, and all the others followed his example except Benveniste. Bonafos and Samuel took the name "Pedro" (Micer Pedro). Samuel Pedro attained to high clerical offices, while his brother Ahab-Felipe became a leader in the Cortes, and Isaac Fernando was assistant curator in the University of Saragossa. The youngest brother, Luis, who was baptized as a little child, was appointed *tesorero mayor*, or chief treasurer, by Don Juan of Navarre. The sons of Isaac Fernando were engaged in farming the public taxes, and through their wealth secured high positions in the state. Pedro de la Caballeria negotiated the marriage of Queen Isabella of Castile to Don Ferdinand of Aragon, and had the honor of presenting to the royal bride a costly necklace, valued at 40,000 ducats, defraying part of the cost himself. Benveniste's son, Vidal de la Caballeria, and his wife Beatrice also embraced Christianity, taking the name "Gonzalo." One of Benveniste's daughters became the wife of the rich landowner Don Apres de Paternoy, a Marano of Verdun, and their descendants were important in Spanish history.

Notwithstanding the high offices which this family filled, several of its members suffered from the persecutions of the Inquisition. Alfonso de la Caballeria of Saragossa, who still maintained his connection with the large synagogue there, took part in the conspiracy against the inquisitor Arbues. The remains of Juan de la Caballeria were burned in Saragossa, at which place, in 1488, Luis de la Caballeria, as well as his son Jaime and several other members of the family, was made to do public penance.

Bibliography: *Libro Verde*, in *Revista de España*, vol. xviii.

G. M. K.

CABALLERIA, BONAFOS (בונפוס) DE LA: Anti-Jewish writer of the fifteenth century; son of Solomon ibn Labi de la Caballeria of Saragossa; assumed the name of "Micer Pedro" on becoming a convert to Christianity. From early youth he devoted himself to the study of the Hebrew, Arabic, and Latin languages, and gradually acquired a profound knowledge of civil and canonical law. He won the favor of Queen Maria, who appointed him commissioner of the Cortes which convened at Monzon and Alcañiz (1436–37); and all the liberties and privileges which the Caballeria family had enjoyed for a long time were confirmed to him and his descendants. Caballeria was twice married: first (before his conversion) to the former wife of Luis de Santangel, who obstinately resisted baptism, and then to Violante, a daughter of the wealthy Alfonso Ruiz of Daroca, who, like Caballeria, was a convert to Christianity.

In the year 1450 Micer Pedro began his "Zelus Christi Contra Judæos et Sarracenos," a book full of malevolence against his former coreligionists. This work, upon which he was engaged for fourteen years, was published at Bologna in 1592 by Martin Alfonso Vivaldo, who added numerous annotations showing his hostility to the Jewish race. Soon after the completion of this work, in which he falsely accused the Jews of every imaginable vice, branding them as a cursed seed and a hypocritical, pestilential, and abandoned race, Pedro was murdered (1464), the deed having been committed, it is believed, at the instigation of Maranos. All the sons of Pedro occupied high positions in Aragon; **Alfonso** being vice-chancellor, **Luis** confidential adviser of King Juan, and **Jaime** counselor and confidential adviser of Don Ferdinand, accompanying the latter on his first visit to Naples, and traveling by his side in princely splendor. Nevertheless, Jaime in 1504 became a victim of the Inquisition, and was sentenced at Saragossa. Another member of the family, **Martin de la Caballeria,** was invested with the command of the fleet at Majorca.

G. M. K.

CABRET or CABRIT, JACOB BEN JUDAH: Spanish translator; lived in Spain toward the end of the fourteenth century. The surname "Cabret" or "Cabrit," borne by several persons, is derived, according to Gross ("Gallia Judaica," p. 474), from a Spanish locality, Cabreta or Cabrita. Cabret translated from the Latin into Hebrew and abridged the work of Arnaldus of Villanova, "De Judiciis Astronomiæ," or "Capitula Astrologiæ," on the application of astrology to medicine. The translation made at Barcelona in 1381 is still extant in manuscript (Neubauer, "Cat. Bodl. Hebr. MSS." No. 2042).

Bibliography: Loeb, in *Rev. Et. Juives*, iv. 71; Steinschneider, *Hebr. Uebers.* p. 783.

G. I. Br.

CABUL: A city on the boundary-line of Asher (Josh. xix. 27), identical with the modern Kabul (Buhl, "Geographie," p. 221). Josephus ("Vita," § 43) refers to it as "the village of Chabolo situated in the confines of Ptolemais." The name was applied also to an entire district which included twenty cities given by Solomon to Hiram, king of Tyre (I Kings ix. 13). Josephus ("Ant." viii. 5, § 3) interprets "Cabul" as meaning, in Phenician, "what does not please"; but doubt has been cast on this interpretation of the term.

J. Jr. G. B. L.

CACERES (קאסיריין; also spelled **Caceras, Carceres, Carcerts, Casares, Casseras, Cazares**): A family, members of which have lived in Portugal, Holland, England, Mexico, Surinam, the West Indies, and the United States. They came, probably, from the city of Caceres in Spain.

The first reference to any person bearing the name is in a list of heretics, posted according to custom in the cathedral in the city of Mexico, where the names of **Antonio Dias** (or **Diaz) de Caceres** and Catalina de Leon, his wife, occur as "Judaizers"; the latter doing penance at an auto da fé, celebrated on Feb. 24, 1590, in that city. Their daughter Doña **Leonor de Caceres** was denounced as a "Judaizer" by her aunt, Doña Mariana Nuñez de Carabajal (see Carabajal), before the tribunal of Mexico. Her testimony (see Cyrus Adler, in "Publications Am. Jew. Hist. Soc." iv. 45, 47, 63) gives these data: Antonio Dias de Caceres and Jorge de Almeida (Adler, *ib.* pp. 29–79) married on the same day, in the city of Parmco, Mexico, Catalina and Leonor de Carabajal, sisters of the deponent, and, after a visit to Spain, moved to the district of San Paolo in the city of Mexico.

Antonio appears to have lived in another district, in a house which served as a gathering-place for fasting and prayer; and although they all attended mass, and otherwise observed the rites and ceremonies of the Roman Church, they practised their Jewish rites in private. This was soon discovered; the deponent, her mother, and brothers were arrested by order of the Inquisition; and Antonio Dias de Caceres, fearing a similar fate, went to China.

There he lived three years, came back to Mexico, feigned at first estrangement from his wife, because she was a "Judaizing" penitent, and finally, seeming to yield to the entreaties of friends who sought to bring them together, became nominally reconciled to her and set about in earnest to obey the behests of the Mosaic law. Antonio observed caution, dreading the arm of the Holy Office, but persisted, together with his family, in keeping the Sabbath at home. Prayers were recited at home out of a Hebrew book, said to have been written in verse, and the Psalms, without the required *Gloria Patri*, were chanted by all. His daughter, the above-mentioned Leonor de Caceres, figured as a penitent at an auto da fé held in the city of Mexico, March 25, 1601. A facsimile of a document, dated Sept. 6, 1608, containing an account of her trial, is given in vol. iv. of "Publications Am. Jew. Hist. Soc."

Isabel Caceres: A victim of the Inquisition in Toledo in 1625; wife of Luis Baez.

Jacob (Yahacob) Rodriguez Caceres: Martyr, who died at the stake in 1665, at Cordova. Daniel Levi de Barrios celebrates him in verse in the prologue to his allegorical comedy "Contra la Verdad no ay Fuerça. Panegirico a los tres biena venturados mártires Abraham Athias, Yahacob Rodriguez Caseres, y Raquel Nuñez Fernandez, que fueron quemados vivos en Cordova por santificar la unidad divina, en 16. de Tammuz, año de 5425 (1665)," Amsterdam (no date).

Moseh de Caceres: One of the founders of the Portuguese community in Amsterdam, who flourished about 1600.

J. G. A. K.

Francisco de Caceres: 1. Writer of the seventeenth century; son of Daniel de Caceres of Amsterdam. He translated from Italian into Spanish the "Vision Deleytable y Summarico de Todas las Sciencias," a work written by Alfonso de la Torre and translated into Italian by Domenico Dolphino. The translation of Caceres, published at Amsterdam in 1663, and dedicated to D. Emanuel, prince of Portugal, consists of two parts, the first dealing with the various sciences, the second with moral philosophy. Of the first part, ch. i. treats of the "evil of things, and the confusion in the world"; the following six chapters treat of logic, rhetoric, arithmetic, geometry, music, and astrology, and the remaining chapters treat of metaphysics, pneumatics, and physics. Part ii. discusses ethics and politics.

Wolf ("Bibl. Hebr." iii. Nos. 903, 1854h) makes this Francisco de Caceres the author also of "Dialogos Satiricos," published at Amsterdam in 1616. Kayserling ("Bibl. Esp.-Port.-Jud." p. 32), however, ascribes that work to **(2)** Francisco or Jacob de Caceres who was probably a son of Moseh de Caceres, one of the founders of the Jewish-Portuguese community of Amsterdam. The latter Francisco or Jacob also translated into Spanish "Los Siete Dias de la Semana Sobre la Creacion del Mundo," a work by Bastasi, dedicated to Jacob Tirado. As the "Dialogos Satiricos" was published as early as 1616, it is not probable that the author was the former Francisco de Caceres.

Francisco (or Jacob) had, so far as it can be determined, five sons:

(1) **Daniel de Caceres:** Writer of the seventeenth century; son of Jacob de Caceres. He held the degree of master of arts.

Caceres was a friend of Manasseh ben Israel, upon whose works, "The Conciliator" and "On Human Frailty" (written about 1642), he wrote approbations. He also wrote a eulogy on Saul Levi Morteira's גבעת שאול (Amsterdam, 1645).

D. A. R.

(2) **David de Caceres,** who, according to Kayserling, died Oct. 18, 1624, at Amsterdam (Kayserling, *l.c.* p. 32).

(3) **Henrique** (or **Henry**) **de Caceres,** who lived in England c. 1650, probably the same who, with Benjamin de Caceres, petitioned the king (April 8, 1661) to permit them to live and trade in Barbados and Surinam ("Publications Am. Jew. Hist. Soc." v. 47, 62; Jewish Encyclopedia, ii. 523b).

J. G. A. K.

(4) **Samuel de Caceres:** Dutch poet and preacher; and brother-in-law of Benedict Spinoza; died Nov., 1660, at Amsterdam. He was a pupil of Rabbi Saul Levi Morteira of Amsterdam. The title "Poeta, Predicador, y Jaxam, de la Ley Sancta Escritor" (Poet, Preacher, and Cantor, Writer of the Holy Law), given to Caceres by his contemporaries, shows the eminent position which he occupied in the Jewish community of Amsterdam. "De la Ley Sancta Escritor" refers to the Spanish translation of the Bible, which he edited, revised, and corrected, and which was published in 1661, soon after his death.

D. A. R.

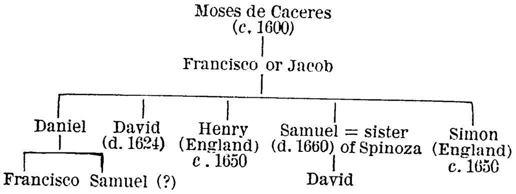
(5) **Simon de Caceres:** Military strategist, merchant, and communal leader; flourished in the middle of the seventeenth century. He was prominent in mercantile affairs in Hamburg, London, South America, and the West Indies; and his transactions extended to many parts of the world.

Caceres is described as a chauvinist Jew, boastful of his Jewish descent (see Lucien Wolf, "Transactions Jew. Hist. Soc. Eng." i. 56, 73). He joined Antonio Fernandez Carvajal in the acquisition of the Bet Ḥolim cemetery in London, and was one of the petitioners who signed the document presented to Cromwell by Manasseh ben Israel in March, 1656. Queen Christina of Sweden is known to have interceded with Cromwell on his behalf for certain commercial privileges in Barbados (Rawlinson MS., A. 26, fol. 388); and at a later date the king of Denmark gave Caceres' brother a letter of recommendation to Charles II., which was instrumental in procuring for the Jews in the West Indies an extension of commercial facilities ("Calendar of State Papers," Colonial series, 1661–68, p. 49). Simon was one of Cromwell's intelligencers; and there are at least two documents among the Thurloe papers which show that his experience was utilized by the lord protector. The one is called "A Note of What Things Are Wanting in Jamaica" ("Thurloe Papers," ed. Th. Birch, pp. 61, 62, London, 1742). It is a memorandum containing minute advice with regard to fortifications and implements. From a passage in "Cromwell's Letter and Speeches," ed. Carlyle (iii. 131), it would seem that his recommendations were followed, for the needed supplies were forwarded.

Together with this memorandum Caceres submitted to the protector a remarkable scheme for the conquest of Chile (printed in Birch's ed. of the "Thurloe Papers," *l.c.* pp. 62, 63; see also bibliography below), wherein he proposed to enlist "men of his own nation" (meaning Jews), and offered to lead the expedition in person. In his letter of instructions Cromwell refers to the desirability of hindering the Spanish trade with Peru and Cartagena, and of striving with the Spaniard for the mastery of all those seas (see CHILE). At a later date Caceres presented another plan to Cromwell, which provided for the protection of the Barbados trade and for improving the administration of the navigation act (Rawlinson MS., A. 60, fol. 131). This document seems to have been unauthorized, and turns out to be a personal application for an office he desired to have created for himself.

BIBLIOGRAPHY: Lucien Wolf, in several papers published in the London *Jewish Chronicle*, especially his *Cromwell's Jewish Intelligencers* and *American Elements in the Resettlement* (each published separately); *idem*, in the *Transactions of the Jew. Hist. Soc. Eng.*, i., ii., iii.; G. A. Kohut, *Simon de Caceres and His Plan for the Conquest of Chili*, New York, 1899 (reprinted from the *American Hebrew*, June 16, 1899); besides the sources cited in the text.

Daniel (see above) had two (?) sons; (1) **Francisco de Caçeres.** (2) **Samuel ben Daniel de Caceres,** whose name, if he is not Daniel's son, remains a "crux interpretum." It is more than probable that the two Samuels have been confounded by bibliographers. Samuel, the poet and preacher, had a son named **David de Caceres,** who was printer in Amsterdam in 1661. Another person bearing that name was rabbi at Salonica, and afterward (*c.* 1650) at Hebron, Palestine. The following is a tentative genealogical sketch of the Amsterdam branch of the Caceres family:



A **Bernard de Caceres** is mentioned in the "Calendars of State Papers" (see Jacobs, in the bibliography below,) 1661–68, as residing in the West Indies. One of the chief members of the Jewish congregation in Surinam, whose name is affixed to a special charter of privileges, dated Oct. 1, 1669, was **Henrique de Caceres** ("Publications Am. Jew. Hist. Soc." iv. 3), and a **Samuel de Caceres** is spoken of in Curaçao, W. I., in the year 1692 (Corcos, "Jews of Curaçao," p. 15). In 1891, a Mr. Benjamin de Caceres officiated at Curaçao in the absence of a rabbi (*ib.* p. 47).

Persons bearing the name are living to-day (1902) in New York and Philadelphia. Miss Ida Caseres of Philadelphia claims descent from the Caceres who settled in Jamaica in the seventeenth century.

CADENET: Small village in the department of Vaucluse, France. Like all places situated along the river Durance, Cadenet had a Jewish community in the Middle Ages. A document of the year 1283 states that this community, together with those of Aix, St. Maximin, Lambesc, Pertuis, Istres, Tretz, and Lanson, was permitted to have a synagogue and a cemetery on paying an annual tax of two pounds of pepper to the archbishop of Aix (Charter of 1283; compare Depping, "Les Juifs dans le Moyen Age," p. 197).

In 1385 a remarkable lawsuit arose in Arles, relating to an alleged marriage (described in all its details by Gross, in "Monatsschrift," 1880, pp. 404 *et seq.*). The plaintiff was Maestro Duran of Cadenet. In order to be revenged on Meirona, daughter of En Salves Cassin of Arles, who had refused him, Duran declared that he had married her in the presence of two witnesses, Vidal Abraham of Bourrin and Bonfilh or Bonfils Crégud. These witnesses were later convicted of perjury.

The case was taken in turn before the rabbinical colleges of Arles, Nîmes, Montpellier, and Perpignan, and in the last instance, upon the demand of Don Salemias Nasi of Valence, was submitted to R. Isaac ben Sheshet, who pronounced severe judgment against Duran and his fellow-conspirators, and bitterly reproached the community of Arles that it had not done its utmost to prevent such a scandal from becoming public. A Jew, Mosson of Cadenet by name, lived at Carpentras in 1404 ("Revue Etudes Juives," xii. 196); and two others, Salvet of Cadenet and Vidalon of Cadenet, were sheriffs of that community in 1460 (*ib.* p. 176).

CÆCILIUS OF CALACTE: Rhetorician, critic, and historian; flourished in the first century B.C. at Calacte, a town on the northern coast of Sicily. He was the first Jew noted for literary activity at Rome. Little is known of his life. He was born a slave, and was named "Archagathus." His parents were either of Sicilian or Syrian origin. As a freedman he bore the name "Cæcilius," perhaps after one of the Metelli, the ancient patrons of Sicily. He went to Rome and devoted himself to the study of rhetoric, Apollodorus probably being his first master, and Dionysius of Halicarnassus, who lived at Rome from 30 to 7 B.C., his close friend. Suidas states that Cæcilius was a Jew, an assertion which is now generally accepted, though some writers think that he may have been only a convert to Judaism.

The Attic School.

The fragments of Cæcilius' writings which are still extant attest above all his versatility. Together with his friend Dionysius, he was the representative in his time of the Attic style of oratory in contradistinction to the verbose Asiatic style. While the earlier devotees of the Attic school contented themselves with the study and the classification of literary forms, Cæcilius and Dionysius extended their labors to the fields of philology and esthetic criticism; and the hatred felt by the former for the Asiatic school resulted in his two works directed against it: *Τίνι Διαφέρει ὁ 'Αττικὸς Ζῆλος τοῦ 'Ασιανοῦ* ("On the Differences between the Attic and the Asiatic Styles"), and *Κατὰ Φρυγῶν* ("Against the Phrygians"; that is, the Asiatic Barbarians). In his earliest works on rhetoric (*Τέχνη 'Ρητορική* and *Περὶ Σχημάτων*), Cæcilius showed himself a disciple of the older Attic teachers, who confined their attention to matters of form; but soon afterward he seems to have come under the influence of Dionysius, to whom may be attributed his interest in philologic and esthetic criticism.

Other Works.

In the latter field, the most significant work of Cæcilius is *Περὶ Χαρακτῆρος τῶν Δέκα 'Ρητόρων* ("The Characteristics of the Ten Orators"). Though Dionysius also wrote on several of the chief orators of Greece, it is either in Cæcilius or his contemporary Didymus that the first account of the canon of the ten Attic orators is found. In the above-mentioned work Cæcilius endeavors, by means of information gathered from traditional documents and all other available sources, to present truthful portraits of the orators, in order to determine the time and to illumine the circumstances in which each oration was delivered. These researches possessed unusual critical value in that they not only offered classic examples of the adaptation of style to substance, but helped to unmask a large number of orations circulating under false names. They remained the permanent source of information on the diverse qualities of the classic orators, even the erroneous hypotheses of the author being accepted by later writers as authentic facts. To promote the study of the classics, Cæcilius compiled a lexicon that was much used by later scholars. The fine rhetorical feeling and critical acumen which enabled him to expose literary pretenders were again exhibited in a work devoted to an examination of the genuine and the spurious orations of Demosthenes. However, he used his discriminative gifts also in comparative studies, this being a unique literary phenomenon in that time. He produced three essays of this character: a comparison of Demosthenes and Æschines, of Demosthenes and Cicero, and of Lysias and Plato. As an evidence of his intellectual curiosity, the study of Cicero is particularly noteworthy, in view of the fact that Cæcilius and Dionysius were the only students of Latin literature at a time when it was the literary fashion to dismiss it with contempt. In all his writings on esthetic subjects Cæcilius appears as an uncompromising antagonist of the artificial style, always insisting that thought and the proper choice of words, with the least possible use of rhetorical ornamentation, indicate excellent oratory. These ideas are reiterated in his work on "The Sublime" (*Περὶ Ὕψους*), known from a polemical work against it composed in the first century under the same title and falsely ascribed to Longinus. Cæcilius did not attempt to formulate a theory of the sublime, but simply gave illustrations of what was and what was not sublime. It is interesting to note that among the examples of the sublime there is a quotation, somewhat inaccurate, from the first chapter of Genesis.

As the literary method of Cæcilius was critical and historical, he was naturally interested in history; and several historical works are ascribed to him: one dealing with the historical incidents mentioned in the "Orators," and with the extent to which the orators had clung to strictly authenticated facts; another on the Servile wars; and a third on "History" (Περὶ Ἱστορίας). The briefest summary of his works may well lead one to concur with those scholars who regard Cæcilius as the most scholarly and versatile representative of the Attic school, and one who, by his labors in hitherto unexplored regions, rendered considerable service to the cause of science.

G. H. G. E.

CÆSAR, CAIUS JULIUS: Roman dictator, consul, and conqueror; born July 12, 100 B.C. (according to Mommsen, 102 B.C.); assassinated March 15, 44 B.C. Cæsar's attitude toward the Jews is manifest from the many enactments issued in their favor by him and by the senate.

The first decree, dated probably July, 47 B.C., registered in both Greek and Latin on a table of brass and preserved in the public records, concerns Hyrcanus, the son of Alexander, high priest and ethnarch of the Jews. Julius Cæsar, with the approbation of the senate, recognizes the services rendered by Hyrcanus to the empire, both in peace and in war. He mentions the aid given by Hyrcanus with his 1,500 soldiers in the Alexandrian war, and speaks of the personal valor of Hyrcanus. In recognition of these services he grants Hyrcanus and the Jews certain privileges (Josephus, "Ant." xiv. 10, § 2).

In another decree of probably the same date, Cæsar determines "That the Jews shall possess Jerusalem, and may encompass that city with walls; and that Hyrcanus, the son of Alexander, the high priest and ethnarch of the Jews, retain it in the manner he himself pleases; and that the Jews be allowed to deduct out of their tribute, every second year the land is let [in the Sabbatical period], a corus of that tribute; and that the tribute they pay be not let to farm, nor that they pay always the same tribute" (*ib.* xiv. 10, § 5).

His Decrees.

The next decree, dated before Dec., 47 B.C., ordains that all the country of the Jews pay a tribute to the city of Jerusalem except during the Sabbatical year, with permanent exemption for Joppa, which, as formerly, is to belong to them. It also prohibits the raising of auxiliaries and the exacting of money for winter quarters within the bounds of Judea. This decree provides for an annual tribute to Hyrcanus and his sons, the Sabbatical year excepted. It ordains that the original ordinances in regard to the high priests of the Jews shall remain in force, and that Hyrcanus and the Jews retain those places and countries which belonged to the kings of Syria and Phenicia. The following two decrees confirm the privileges granted to Hyrcanus and his children. As the ally of Rome he is to send and receive ambassadors (*ib.* § 6).

The following two decrees are of the same date: "That Hyrcanus and his children bear over the nation of the Jews, and have the profits of the places to them bequeathed; and that he, as the high priest and ethnarch of the Jews, defend those that are injured; and that ambassadors be sent to Hyrcanus, the son of Alexander, the high priest of the Jews, that may discourse with him about a league of friendship and mutual assistance; and that a table of brass containing the promises be openly proposed in the capitol, and at Sidon, and Tyre, and Ascalon, and in the temple, engraven in Roman and Greek letters: that this decree may also be communicated to the questors and pretors of the several cities, and to the friends of the Jews; and that the ambassadors may have presents made them, and that these decrees be sent everywhere" (*ib.* § 3).

"Caius Cæsar, imperator, dictator, consul, hath granted, That out of regard to the honor, and virtue, and kindness of the man, and for the advantage of the senate, and of the people of Rome, Hyrcanus, the son of Alexander, both he and his children, be high priests and priests of Jerusalem, and of the Jewish nation, by the same right, and according to the same laws, by which their progenitors have held the priesthood" (*ib.* § 4).

The last decree of Cæsar, dated Feb., 44 B.C., again mentions the services rendered by Hyrcanus and the Jews, and calls for suitable recognition on the part of the Senate and the people of Rome (*ib.* § 7).

Following is a summary of the decrees of the consuls during the rule of Julius Cæsar, as recorded in Josephus:

Sept. 19, 49 B.C.: Report on the public proceedings at Ephesus concerning the exemption of the Jews of Asia Minor from military service on account of their religion, and the decree in this sense of the consul Lucius Lentulus ("Ant." xiv. 10, § 19).

Sept. 19, 49 B.C.: Short report on the preliminary proceedings on the same question on the part of the military authorities (*ib.* § 18).

Sept. 19, 49 B.C.: Short declaration of the consul Lucius Lentulus concerning the exemption of the Jews from military service (*ib.* § 16).

Sept. 20, 49 B.C.: Communication of Titus Appius Balbus to the magistrate of Ephesus, to the effect that on his intercession for them, the consul Lucius Lentulus agreed to the exemption, and that the high Roman officials Lucius Antonius and Phanius sanctioned the decree (*ib.* § 13).

Probably 49 B.C.: Message of Lucius Antonius to the magistrates of Sardes, to the effect that the Jews of that city having an assembly of their own, according to the laws of their forefathers, he gives order that their privileges be preserved (*ib.* § 17).

May, 48 B.C.: Proclamation of the magistrates of the island of Delos, that, according to the decree of the consul Lentulus, the Jews shall be exempted from entering the army (*ib.* § 14).

Probably at the beginning of 46 B.C.: Reprimand of a proconsul to the people of Parium on account of their hostile attitude toward their Jewish fellow-citizens concerning their public assemblies and their contributions to the Temple (*ib.* § 8).

46-45 B.C.: Admonitory letter of the proconsul Publius Servilius to the magistrate of Miletus that the Jews should not be disturbed in the execution of their religious customs (*ib.* § 21).

46–45 B.C.: Reply of the Laodiceans to the proconsul of Asia, that, in obedience to injunctions received from him, they will not disturb the religious customs and assemblies of the Jews (*ib.* § 20).

46–45 B.C.: Decree of the Sardians, upon the representation of the pretors, granting the Jews religious liberty, setting apart for them a place for public worship, and even directing those that have charge of the provisions of the city to "take care that such sorts of food as they esteem fit for their eating may be imported into the city" (*ib.* § 24).

46–45 B.C.: Decree of the people of Halicarnassus to the effect that, in accordance with privileges granted by the Romans, they shall not disturb the religious customs and assemblies of Jews (*ib.* § 23).

Feb., 44 B.C.: Testimony of the twelve questors, that the Senate had passed a decree in favor of the Jews, but that this decree had not hitherto been brought into the treasury, and that now the Senate and the consuls Dolabella and Marcus order that these decrees shall be "put into the public tables" and be "put upon the double tables" (*ib.* § 10).

(For a critical survey of these edicts see Grätz, "Gesch. der Juden," 3d ed., iii., note 9, pp. 660–668; Schürer, "Gesch." 3d ed., iii. 56 *et seq.*, 67, note 30).

These decrees show clearly that Julius Cæsar in his broad and statesmanlike manner fully recognized the rights and claims of the Jews as an important element of the Roman empire.

Usefulness in Roman Empire.

"This Judaism," says Mommsen ("Römische Gesch." iii. 549-555), "although not the most pleasing feature in the nowhere pleasing picture of the mixture of nations which then prevailed, was nevertheless a historical element developing itself in the natural course of things, which the statesman could neither ignore nor combat, and which Cæsar on the contrary, just like his predecessor, Alexander, with correct discernment of the circumstances, fostered as far as possible. While Alexander, by laying the foundation of Alexandrian Judaism, did not much less to found the Jewish nation than its own King David by planning the Temple of Jerusalem, Cæsar also advanced the interests of the Jews in Alexandria and in Rome by special favors and privileges, and protected in particular their peculiar worship against the Roman as well as against the Greek local priests." "Cæsar's extraordinary keenness as a statesman," says F. Rosenthal (in "Monatsschrift," 1879, p. 321), "recognized in the Jews most useful collaborators in his extensive plans for the creation of a great Roman body politic. Distributed as they were over the greatest part of the Roman empire, yet acting in harmony with one another, they were as much on this account as by reason of their commercial instincts the intermediators between Orient and Occident."

"The Jews were destined to play no insignificant part in the new state of Cæsar," says Mommsen (*ib.*). Even later, when by a decree of Cæsar all religious or political associations (*collegia*) were forbidden, except those which had existed from very remote times, the same decree permitted the Jews, "our friends and confederates . . . to gather themselves together according to the customs and laws of their forefathers, to bring in their contributions, and to make their common suppers" (Josephus, "Ant." xiv. 10, § 8; Suetonius, "Cæsar," 42). By these and other edicts of Cæsar the Jewish religion was recognized in the Roman empire as "religio licita" (Tertullian, "Apologia," xxi.; Schürer, "Gesch." 3d ed., iii. 69).

"When Cæsar attained the power," says Huidekoper ("Judaism in Rome," p. 6), "we find a procession annually of Roman dignitaries, on the first day of the Passover, for the purpose of throwing away idol-images; and at his funeral Jews were conspicuous." Mommsen quotes a contemporary orator (Cicero) as saying that Roman officials in the provinces had to be extremely careful not to offend a Jew, otherwise they were liable to be hissed on their return to Rome by the plebeians.

Judaism Respected in Rome.

During the Pompeian wars Cæsar, without associates (Mommsen, *l.c.* iii. 8, 374), surrounded only by military aids and political agents, made use of the brilliant abilities of Aristobulus II., and, out of hatred to Pompey, gave the former his freedom and sent him with two legions into Syria to create a diversion in Cæsar's favor (Josephus, "Ant." xiv. 7, § 4). Macrobius hints ("Saturnaliorum Conviviorum," i.) that during the Pompeian wars the Jewish contingent in Cæsar's army was by no means an unimportant one; that at his court and in his councils the Jews were influential in political and financial matters. The great historical significance of Cæsar's relations with the Jews is brought out strikingly by their military services under him during the Egyptian campaign.

For all his daring and energy, and notwithstanding the importance of his entering Egypt, Cæsar would not have landed had he not been certain of support from the Jews of the country. His resources were scanty—scarcely two legions of infantry and a small detachment of cavalry—in all about 5,000 men. With such a handful of soldiers even Cæsar could not expect a successful conflict with the powerful Egyptian army. There is historical evidence that organized local bands of Jews came to his assistance. The Jews of Egypt, numbering at that time, according to Manfrin, about a million, were evidently on his side before he came to Egypt; and, in order to render him efficient service, they suspended their party quarrels. With Mithridates there entered Egypt under the leadership of Antipater a detachment of troops numbering 1,500, or, according to Josephus (*l.c.* xiv. 8, § 1), 3,000, composed exclusively of Jews.

Valor of Antipater.

According to the testimony of Josephus, the taking of Pelusium, which, from the Syrian side, was the key to Egypt, was largely due to the personal bravery and skill of Antipater, who destroyed a portion of the city wall. With his Jewish followers he was the first to enter the city, thus clearing the way for Mithridates' army. As a reward for his services Cæsar gave to Antipater the privilege of a citizen of Rome, and made him procurator of Judea (Josephus, *ib.* 8, § 3).

After the Alexandrian campaign Cæsar granted many favors and privileges to Judea and to the Jews in general. He gave the former the right of "status clientis"—the broadest autonomy that countries subject to Rome could enjoy. Besides this right Cæsar allowed Judea to utilize the city of Joppa and its harbor, since the latter was indispensable to Jerusalem for intercourse with its colonies.

Cicero's defense of Flaccus, who confiscated the gold collected for the Temple in Jerusalem, shows that the Oligarchic party stood in fear of Cæsar's connection with the Jewish colonies. They suspected that the money collected for the Temple was, in part at least, used for the carrying out of Cæsar's political plans. In fact, the whole defense ("Pro Flacco") was an indirect accusation of Cæsar. By the prohibition of all but Jewish associations, he apparently expressed his belief in the favorable influence of the political principle of Judaism and in its superiority over the other Eastern religions that had been brought to Rome.

Antipathy to Jews Roused.

But while the mass of the Roman population favored Cæsar, that was not sufficient for his election. Large sums of money were required for this purpose, and Cæsar had hardly any means of his own. When he was leaving for Spain his debts amounted to $3,400,000 (according to some historical documents, $4,800,000); and it appears that a few of his creditors importuned him. Possibly the Jewish colonies supplied funds. These colonies extended all over Egypt, in Asia from the shores of the Pontus Euxinus to the Euphrates, and in Europe as far as Prague and into Gallia.

On the other hand, the Cæsarean period produced an ill-will toward the Jews that gradually grew to hatred and has survived to the present day.

Reference can be here made to the work of Manfrin concerning the important rôle Cæsar assigned to monotheistic Judaism in his new empire, but his views are open to question.

Renan ascribes to Cæsar very broad and liberal views. "He truly conceived," he says, "liberty of conscience in a sense of absolute neutrality in the state, as enlightened nations now do. He desired the freedom of all provincial worship, and, if he had lived, he doubtless would have prevented the reaction toward strictness which, from the days of Tiberius, led the central government to insist on too much preponderance for the Roman worship. The Jews in Alexandria had their privileges confirmed. The free exercise of Jewish worship was stipulated in the principal towns of Asia Minor. The Jews throughout the world regretted the death of the dictator. Among the numerous provincials who mourned the Ides of March, it was remarked that Jews for several months came to make final lamentation over his burial-place" ("Histoire du Peuple d'Israel," v. 196, 197).

CÆSAREA.—1. Cæsarea by the Sea: Ancient city of Palestine; called in early times "Strato's Tower" (Στράτωνος πύργος, Josephus, "Ant." xiii. 11, § 2; xiv. 4, § 4; xv. 8, § 5; xix. 8, § 2; *idem*, "B. J." i. 3, § 4; i. 21, § 5; Strabo, xvi. 758; Pliny, "Historia Naturalis," v. 14). In rabbinic sources (Meg. Ta'an. iii.; Meg. 6a; Sifre, Deut. 51; Yer. Sheb. 36c) the name is frequently corrupted (it is only once written correctly, Tosef., Sheb. iv. 11) as שרשן; in a later source (piyyuṭ for the second Sabbath of Ḥanukkah) the name has even been corrupted into מגדל נשיא (B. Beer, in "Monatsschrift," 1860, ix. 113). Herod the Great transformed the insignificant place into an important city, naming it Cæsarea (*Καισάρεια*) in honor of Emperor Augustus. Still the old name survived; Strabo and Pliny continue to call the city "Strato's Tower," while Ptolemy and Epiphanius use the singular expression "Cæsarea of Strato." To distinguish it from other cities of the same name, it was also called "Cæsarea by the Sea" (*παράλιος Καισάρεια*, "Ant." xiii. 11, § 2; *idem*, "B. J." iii. 9, § 1; *ἐπὶ θαλάττῃ* = "ad mare," *ib.* vii. 1, § 3; vii. 2, § 1); on coins it is called ΚΑΙΣΑΡΙΑ Ἡ ΠΡΟΣ ΣΕΒΑΣΤΩ ΛΙΜΕΝΙ. Later writers call the city "Cæsarea of Palestine" (Cæsarea Palæstinæ = *Καισάρεια ἐπὶ Παλαιστίνῃ*, Eusebius, "Hist. Eccl." v. 22, or *Καισάρεια τῆς Παλαιστίνης*, *ib.* vii. 12). In the Talmud, the Midrash, and the Targum it is very frequently called "Ḳesri" (קיסרי); the expression "Ḳesri, the daughter of Edom" (Meg. 6a), meaning that Cæsarea is the outpost of the Roman empire. In the same Talmudic passage is a sentence of R. Abbahu, who lived in the third century at Cæsarea, according to which "Ekron," that "shall be rooted up" (Zeph. ii. 4), means "Cæsarea"; but this probably expresses merely the wish of the Jews that Cæsarea, a city that they hated, should be uprooted (עקרון), with no intent of identifying it with Ekron (Schwarz, "Tebu'ot ha-Areẓ," p. 66b). It is possible, however, that there is here also an allusion to the old name Sharshon (שרשון); while the assumption that there were two Ekrons, one of which was identical with Cæsarea (Friedmann, in Luncz, "Jerusalem," v. 109), is wholly unfounded. The Rabbis speak of it disguisedly as "Magdiel" (Gen. R. lxxxiii.).

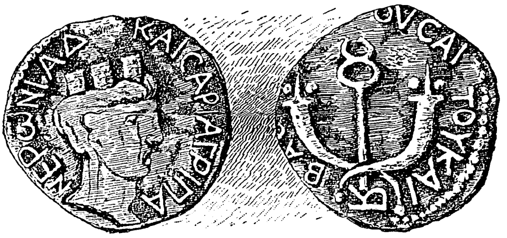
RUINS OF CÆSAREA.

(From a photograph by Bonfils.)

Location.

Mannert determines the location of Cæsarea as 66° 15′ E. long. and 32° 30′ N. lat. Josephus speaks of it as lying in Phenicia, between Joppa and Dora ("Ant." xv. 9, § 6). It was 600 stadia (75 miles) distant from Jerusalem ("Ant." xiii. 11, § 2; "B. J." i. 3, § 5); 36 miles (a day's journey, Acts xxi. 8) from Ptolemais (Abulfeda); and 30 miles from Joppa (Edrisi). The soil was sandy ("it is situated in the midst of sand," says the Talmud, Meg. 6a; compare "Ant." xv. 9, § 5), but so fertile that the region was called "the land of life" (Meg. 6a). The following are mentioned as products of the soil: "etrogim"—that is, pomegranates of Cæsarea (Tosef., Maksh. iii. 10); Cæsarean grain (Tos., Dem. iv. 23); a woolly moss growing on stones (Yer. Kil. 32a; Yer. Shab. 4c). As merchandise are mentioned the beds of Cæsarea (Yer. Ber. 6a; Yer. Ned. 40c; Yer. M. Ḳ. 83a). The city lay close by the sea, and had a good harbor, which was constructed by Herod, and is often mentioned ("Ant." xv. 9, § 6, *λιμήν*; Yer. Giṭ.

43b). This harbor was as large as the Piræus, and had a deep channel and "a double station for the ships" ("Ant." *l.c.*). The rocky shore, which is frequently mentioned (Gen. R. x. 7; Lev. R. xxii. 4), was laid out as a promenade (Eccl. R. v. 8). Large subterranean passages and canals led from the city to the harbor ("Ant." *l.c.*); and perhaps these are the vaults mentioned in the Talmud (Yer. Naz. 56a). The city had imposing streets (*ib.*) and theaters ("Ant." *l.c.*), and, on its eastern side, a magnificent gateway (*τετράπυλον*, Tosef., Oh. xviii. 13), through which the road led to the vineyards (*ib.*). The Rabbis considered Cæsarea as the frontier of Palestine toward the west, and in questions dealing with Jewish law its harbor was held not to belong to the land of Israel. Tombs of heathens were supposed to lie east and west of the city, and hence these regions were declared unclean, although opinions on the question were divided (Yer. Giṭ. 43b; Yer. Dem. 21a; compare Büchler, in "Jew. Quart. Rev." xiii. 654 *et seq.* and Krauss, *ib.* xiv. 745).



Copper Coin of Agrippa II., Struck at Cæsarea.

Obverse: NEPωNIAΔ . . . . KAICAPI AΓPIΠA with turreted female head. *Reverse:* BA[C AΓP ET]OYC AITOY KAI ꟸ, two cornua-copiæ, in the middle a caduceus.

(After Madden, "History of Jewish Coinage.")

Population.

The original population of Cæsarea was probably pagan—at first Phenician, and then Greek. From the time of the Maccabees, Jews are mentioned as residing there; and as their number steadily increased they tried to gain possession of the city, frequent quarrels resulting between pagans and Jews. Herod's temples and theaters testify to his endeavors to preserve the pagan character of the city. He built here a temple of Augustus, the statue by which it was surmounted representing Zeus Olympus, while another, Hera, represented Rome ("Ant." xv. 9, § 6; "B. J." i. 21, §§ 5, 8).

The first dramatic festivals in honor of Augustus were held 12 B.C. ("Ant." xvi. 5, § 1; "B. J." i. 21, § 8). The emperor's temple (*καισάρειον*), or "Sebastos temple" (*Σεβαστεῖον*), as it is called by Philo ("Legatio ad Cajum," xxxviii.), lay on a hill opposite the harbor, which was also dedicated to Augustus (*ὁ λιμήν Σεβαστός*, "Ant." xvii. 5, § 1; "B. J." i. 31, § 3); the full name of the city was therefore "Cæsarea Sebaste" ("Ant." xvi. 5, § 1; Ammianus Marcellinus, xiv. 8). On the coins of Cæsarea, which are mentioned also in the Talmud ('Ab. Zarah 6b), dating mostly from the second and third centuries, are found the names of many gods: Zeus, Poseidon, Apollo, Hercules, Dionysus, Athena, Nike, and especially the Phenician goddess Astarte. The worship of the Egyptian Serapis is due to the fact that from the time of Vespasian there was, in addition to the Greeks, a large colony of Romans at Cæsarea. The restoration of a temple of Hadrian (*'Αδριανεῖον*) is mentioned even in Christian times. English explorers have recently discovered the ruins of a temple at Cæsarea.

Character of Jewish Cæsarea.

The Jews of Cæsarea were completely Hellenized, and in the third century the Shema' prayer was said in Greek (Yer. Soṭah 21b). In Talmudic times there was here a large Jewish population with many synagogues. Besides the "brothers" (Yoma 53b; Ta'an. 24b; Pesiḳ. 171b), the "rabbis" of Cæsarea are very often mentioned (Yer. Dem. 22c). The teachers of the Law, Nasa (Lam. R., Introduction, No. 26), Mana, 'Ulla, Adda, Idi, Taḥlifa, Abba, Hezekiah, Jacob, Ḥanina, and Abbahu, either came from Cæsarea or lived there (see Bacher, "Die Gelehrten von Cæsarea," in "Monatsschrift," xlv. 298 *et seq.*). Abbahu appeared as the antagonist of Christianity, which at an early date had found adherents in Cæsarea. He directed a college and officiated as judge (Bacher, "Ag. Pal. Amor." ii. 92). R. Jose (Isi) of Cæsarea speaks of the Christianized Jews of that city (Eccl. R. vii. 26). The Christian library of Cæsarea is of great importance for Biblical science. But the Christians themselves at an early date speak of Cæsarea as being a Jewish city (Clement, "Recognitiones," ii. 37, iii. 65, v. 4).

Samaritans.

A number of Samaritans also lived at Cæsarea. The Samaritan prophet Simon Magus worked mischief there. The Cuthæans of Cæsarea disputed with R. Abbahu (Yer. 'Ab. Zarah 44d). When, on the death of the latter, the columns of Cæsarea trickled water, as if they were mourning for him (Eusebius, "Hist. Eccl." viii. 9), the Cuthæans declared, to spite the Jews, that it was because the columns were out of repair (Yer. 'Ab. Zarah 42c; M. Ḳ. 25b). A Samaritan chronicle (Neubauer, "Chronique Samaritaine," p. 18, Paris, 1873) erroneously identifies Cæsarea with Dora. In 484 and 548 the Samaritans instigated bitter riots against the Christians.

History.

Only the old name, "Strato's Tower," gives any clue to the earliest history of Cæsarea. Renan ("Mission de la Phénicie," p. 790) and, after him, Hildesheimer connect Strato with the Phenician name Astarte. But D. Oppenheim and Neubauer have demonstrated the probability that "Strato" was the name of a person, indeed, that of the founder of the city; and it is a fact that Strato is named as such in Justinian's "Novellæ" (103 pref.). Stark ("Gaza," p. 451) thinks that the Ptolemies founded Strato's Tower; but Schürer is of opinion that it was founded by the Sidonians in Persian times. In the fourth century B.C. there were two kings of Sidon by the name of Strato, one of whom probably founded the fort Strato's Tower. The first geographical writer who mentions the "Tower" is Artemidorus (about 100 B.C.; Stephen of Byzantium, *s.v.* *Δῶρος*). About the same time, Aristobulus I. caused his brother Antigonus to be murdered there ("Ant." xiii. 11, § 2). The "tyrant" Zoilus, who had usurped the government of Strato's Tower and of Dora, and had made common cause with the Cyprian king Ptolemy Lathyrus, drove Alexander Jannæus from the country, which he apportioned among the Jews ("Ant." xiii. 12, §§ 2–4).

Strato's Tower now belonged to the Jewish king ("Ant." xiii. 15, § 4); and it is probably this conquest which is mentioned in rabbinic sources (Meg. Ta'an. iii.). Pompey liberated the city ("Ant." xiv. 4, § 4; "B. J." i. 7, § 7), and Augustus presented it to Herod ("Ant." xv. 7, § 3; "B. J." i. 20, § 3), who transformed it into a metropolis, changed its name to "Cæsarea," and called the harbor "Sebaste." Cæsarea remained a fortress ("Ant." xv. 8, § 5); but Herod cared more for beautifying the city, and built many magnificent edifices of white stone for the citizens. Within twelve years the city was rebuilt, the work having neither wearied the king nor exhausted his resources ("Ant." xv. 9, § 5; "B. J." i. 21, § 5; i. 31, § 3). Cæsarea now became a flourishing city, and Josephus calls it the largest in Judea ("B. J." iii. 9, § 1; Ammianus Marcellinus, *l.c.*). The Jews also recognized it as a rival to Jerusalem (Meg. 6a), and the Rabbis called it the "metropolis" of the kings (*ib.*), the term "kings" here signifying the Roman governors, who, after the death of Archelaus, administered Judea from this place. The governors Felix and Festus resided in Cæsarea (Acts xxiv. 27, xxv. 1). Agrippa I., who possessed the city for a short time, also had an administrator there (*στρατηγός*, "Ant." xix. 7, § 4), and died there. He also had coins struck in Cæsarea (Madden, "Jewish Coinage," pp. 107, 109). After his death the Cæsareans and Sebasteans vilified the memory of their benefactor, whom they hated for his Judaizing, and insulted his daughters, Mariamne and Drusilla. By the order of Emperor Claudius they were severely punished by the governor, Cuspius Fadus ("Ant." xix. 9, § 1). The city was also called "Judææ Caput" (Tacitus, "Historia," ii. 78), as being the seat of the Roman governors. It had a Roman garrison ("Ant." *l.c.*), which is also mentioned in the Talmud (Yer. 'Ab. Zarah 39c, *τάξις*). The large pagan population ("B. J." iii. 9, § 1) would not permit the Jews to share in the administration of the city. This resulted in sanguinary conflicts under the administration of Felix; and in the year 61 Nero declared the pagans to be the sole rulers ("Ant." xx. 8, § 9; "B. J." ii. 13, § 7; ii. 14, § 4), and at the same time he removed Felix from office. In 66 the Jews, because of an insult to their synagogue, began a battle with the Greeks in which much blood was shed, but they finally succumbed, and had to flee to the neighboring city of Narbota ("B. J." ii. 14, §§ 4, 5). These disturbances were the preliminary episodes of the Jewish war, upon the outbreak of which the pagans of Cæsarea fell upon the Jews and massacred them all, to the number of 20,000, in one hour ("B. J." ii. 18, § 1; vii. 8, § 7). The synagogue, where the rioting began, is probably the same which is called in Talmudic sources the "riotous synagogue of Cæsarea" (Yer. Sanh. 18a; Yer. Naz. 56a; Num. R. xii. 3; Lam. R. i. 3). The city itself is also called the "riotous city" (Cant. R. i. 5; Targ. Yer. Num. xxiv. 10). A Byzantine writer (Malalas, "Chronographia," ed. Bonn, x. 261) says that Vespasian turned this synagogue into an odeon; but the transformation (if it did take place) must have been by a later emperor, since the rabbinic sources of the third century still speak of this synagogue.

After the war, Vespasian constituted Cæsarea a Roman province, but without the full "jus Italicum" (Pliny, "Historia Naturalis," v. 13, § 69; compare Justinian, "Digesta," l. 15, §§ 1, 8). It is also called "*colonia*" on coins. At the time of Alexander Severus the title "metropolis" came into use, as also in the rabbinic sources, and on coins. The subterranean prisons of Cæsarea ("Diaeta," Esther R., Introduction) were much dreaded by the Jews, being fraught with peril for them (*ib.*). The city was destroyed by an earthquake in 128 (Eusebius, "Chronicon").

In the reign of Justinian the Jews made common cause with the Samaritans of Cæsarea, and harassed their Christian fellow-citizens. They even killed the governor, Stephan, July, 556 (Malalas, "Chronographia," p. 488; Theophanes, "Chronicon," i. 356). Under Heraclius it was estimated that there were 20,000 Jews in Cæsarea; and it was said that a Jew gave the city into the hands of the victoriously advancing Arabs (Weil, "Gesch. der Chalifen," i., Appendix, p. 2), by whom, according to the "Chronique Samaritaine" (p. 23), the city was looted. Benjamin of Tudela found only twenty Jewish families in Cæsarea, as against 200 Samaritans. In 1265 Cæsarea was completely destroyed by the sultan, Baibars. The destruction of Cæsarea is pictured in "Pal. Explor. Fund, Quarterly Statement," 1884, p. 147. Nothing now remains of it but a pile of ruins, that still bears the name "Kaisariyya."

Its Names and Situation.

——**2. Cæsarea Philippi:** Ancient city of Palestine. According to the investigations of Gesenius, Raumer, and Robinson, this was the original site of the place Baal-gad,—*i.e.* where Gad was worshiped as the god of fortune (Isa. lxv. 11)—or of Baal-hermon (I Chron. vi. 23). In Israelitic times the place was called "Dan," and the image made by Micah was worshiped here. Here, too, Jeroboam I. set up the golden calf. Not far distant was the place Tarnegola, which the Rabbis mention as being on the northern boundary (Tosef., Sheb. iv. 10; Yer. Sheb. 36c; Yer. Dem. 22d; Sifre, Deut. 51; Targ. Yer. ii. on Num. xxxiv. 15). Its name is probably connected with the idol Tarnegol ("fowl"), though other places of Palestine (Sepphoris and Phrugitha, for instance) were also called after birds. The place is also said to be identical with the Biblical Leshem (Josh. xix. 47) or Laish (Judges xviii. 29; Meg. 6a; Tan., Re'eh, 16). This, however, is very improbable. But Cæsarea Philippi is certainly identical with Paneas (*Πανέας, Πανιάς, Παναίς*), frequently mentioned by Greek as well as rabbinical authors (Josephus, "Ant." xv. 10, § 3; Eusebius, "Hist. Eccl." vii. 17; Sozomen, v. 21; Pliny, "Historia Naturalis," v. 15; Cedrenus, p. 305); the rabbinical writers indeed chiefly use the name "Paneas" (פניאס, also פמיאס; see the Talmudic dictionaries). But *Πανείας* is the name of the grotto sacred to Pan, on the neighboring mountain Panion (Philostorgius, vii. 3; compare Targ. Yer. Num. xxxiv. 11); hence, the significance of the place as the seat of a cult is preserved in the name, from which it follows that Paneas was originally inhabited by Syrian or Greek pagans. Ptolemy (v. 15, § 21) includes it in Phenicia.

At the time of Herod the region of *Πανιάς* belonged to a certain Zenodorus (Zenon), after whose death (20 B.C.) Augustus presented it to Herod ("Ant." xv. 10, § 1; "B. J." i. 20, § 4). The domain of Zenon, together with some other districts, was taxed 100 talents ("B. J." ii. 6, § 3). Herod erected a magnificent temple in honor of Augustus in the vicinity of the grotto of Pan ("Ant." xv. 10, § 3; "B. J." i. 21, § 3); and Herod's son, the tetrarch Philip, transformed the place into an important city, calling it *Καισάρεια*, also in honor of the emperor ("Ant." xviii. 2, § 1; "B. J." ii. 9, § 1). But coins of the city are extant, dating from an independent and earlier era (about 3 B.C.). The Galilean Cæsarea was called *Καισάρεια ἡ Φιλίππου* (Matt. xvi. 13; Mark viii. 27), to distinguish it from the Judean Cæsarea, while the rabbinic sources call it קיסרין = Kesrion, in contradistinction to קסרי = Kesri; but as these sources are uncritical, the distinction is not always observed. The rabbinic sources state also that the designation "Paneas" continued in use.

It is indeed a question whether Paneas and Cæsarea were not two separate cities built near together. An ancient source (Mek. to Ex. xvii. 14 [ed. Friedmann, p. 55b]) mentions Kesrion as being situated below Paneas, from which it follows that they were two distinct cities. The name "Paneas" continued to be used to such an extent that through its form "Pania" the variants "Pamiya," "Apamiya," and "Aspamiya" (אספמיא) became current among the Rabbis; but these must be strictly separated from similar names.

Its History.

After the death of Philip the city was for a time under Roman jurisdiction; then in the hands of Agrippa I.; again under Roman governors; and, finally, it passed into the hands of Agrippa II. (53 C.E.), who called it *Νερωνιάς*, in honor of Nero ("Ant." xx. 9, § 4). This name, which is found on some coins, soon fell into disuse. At the time of the Jewish war the population was mostly pagan (Josephus, "Vita," xiii.). Vespasian and Titus spent their holidays there, and arranged games and festivals ("B. J." iii. 9, § 7; vii. 2, § 1).

From the second century the city is called *Καισάρεια Πανίας* (Ptolemy, v. 15, § 21; viii. 20, § 12), both by writers and on coins. But among the native population "Paneas" was probably the name chiefly used, and this form prevails in rabbinic writings as well as in those of the church fathers, and has been preserved under the form "Banias" to the present day. According to a legend the patriarch, and the most eminent among the Jews of Paneas appeared before DIOCLETIAN, who hated the Jews (Gen. R. lxiii. 8).

The city is important to Christianity as being one of the places visited by Jesus. It was the site of an old Christian monument (Eusebius, "Hist. Eccl." vii. 18), and was made a bishopric. It is also mentioned during the Crusades. At present the village of Banias contains about fifty miserable houses or huts, built within the ancient castle wall.

——**3. Cæsarea in Cappadocia:** Capital of Cappadocia; originally named "Mazaga." It is mentioned in rabbinic writings either as "Cæsarea of Cappadocia" or as "Mazaga-Cæsarea." R. Akiba here met a shipwrecked Jewish scholar (Yer. Yeb. 15d), probably R. Meïr (Yeb. 121a). R. Nathan also sojourned at Cæsarea (Yer. Yeb. 7d), where, it is further stated (*ib.* 4b), a Palestinian robber was executed. It is said that the Persian king Sapor massacred 12,000 Jews there (M. Ḳ. 26a). As Kaisari, the place is to-day a populous and flourishing city.

G. S. KR.

CAGE: A rendering for כלוב in Jer. v. 27; but it is doubtful whether this translation is accurate. The Hebrew word occurs only once more—viz., in Amos viii. 1—where it seems to be a basket, probably of wickerwork, or some other net-like receptacle for fruit. In Jer. v. 27 the word is employed to characterize the houses of the rich, filled to overflowing with ill-gotten wealth, as shown by the abundance of costly articles of luxury. It has been supposed that כלוב was a crate filled with birds, which craned their necks through the openings—a very common sight in the markets. This furnishes the key to the simile of the prophet; the costly ornaments and furniture peeping, as it were, for purposes of display, through the very walls of the houses. The Targum, however, in rendering the word by בית פיטמא ("house [place] for fattening"), assumes that the prophet had in mind not so much the display (the craning of the necks) as the artificial—*i.e.*, ill-gotten—character of the wealth. "Cage" or "crate" would thus be the meaning which the Targum gave the word, but the cage would be one of the kind employed for fattening geese, so restricted in size as to make motion impossible for the occupant.

The root of the Hebrew word being uncertain, the exact equivalent can not be definitely ascertained. In the El-Amarna tablets the word is found in the form "kulibi," meaning "bird-net," an instrument to trap birds. This seems to fit in with Jeremiah's simile, "The houses are filled with dishonesty and violently acquired goods" (A. V., "deceit"). In Ecclus. (Sirach) xi. 30 the heart of a vain man is likened to a decoy partridge in a "cage" (*κάρταλλος*). This word is the Arabic "ḳirṭal" (hamper); but the context shows that "cage" here stands for not merely a crate, but for a cage contrived to capture birds, in which the decoy partridge is "vain" in so far as it displays a mere semblance to the absent reality. Ezek. xix. 9, R. V., in accordance with this idea of a contrivance to trap, renders the Hebrew במצדות by "cage." E. G. H.

CAGLIARI (Hebr., קאליר): Capital of the island of Sardinia. It had a Jewish community in early times. When a Christianized Jew named Peter placed images of saints in the synagogue of that city on Easter Monday, the day following his baptism, to the annoyance of the Jews, Gregory I. ordered Bishop Januarius of Cagliari to have the objects at once removed (Grätz, "Gesch. der Juden," v. 52). Little is known of the history of the Jews of Cagliari. Under Aragonian rule their condition was favorable, for they were not molested and were received at court. When King Martin I. of Aragon was at Cagliari in Dec., 1408 (he died in that city in 1409), and the Jews were looking on at the דאווש or Daus games instituted in his honor, he invited one of them to take part in the game, and the Jew finally consented, although the community had issued a decree four years previously, interdicting this game to every Jew and Jewess on pain of excommunication. On this occasion Judah ben David, called also Bonjusas Bondavin, the rabbi of the community, addressed a question to Isaac b. Sheshet, whom he knew personally. A physician and fine Talmudist, he formerly lived at Marseilles, and then went to Sardinia in 1390, where he was appointed rabbi of Cagliari, the king confirming him as rabbi of the whole island of Sardinia. There was a large synagogue at Cagliari. The Jews of Cagliari were expelled in 1492, like their coreligionists in Spain.

K. M. K.

CAGLIARI, ABRAHAM DA: Rabbi at Cagliari, Sardinia, in the eighth century. He is mentioned by Antonio di Tharos, the historian of that epoch, and by Delotone, in his "Ritmo di Gialeto." The latter relates that Abraham interpreted many Phenician inscriptions collected by the Sardinian king Gialeto; and the former that, together with another Jewish scholar named Canaim, he deciphered Greek and Phenician inscriptions found in the palace of Masu.

G. I. Br.

CAHAN, ABRAHAM: Russian-American novelist and labor leader; born in Podberezhye, government of Wilna, July 7, 1860. His grandfather was a rabbi and preacher in Vidz, government of Vitebsk; and his father was a teacher of Hebrew and Talmud. The family, which was devoutedly Orthodox, removed in 1866 to Wilna; and there young Cahan received the usual Jewish preparatory education for the rabbinate. He, however, was attracted by secular knowledge and clandestinely studied the Russian language, ultimately prevailing on his parents to allow him to enter the Teachers' Institute of Wilna, from which he was graduated in 1881. He was appointed teacher in a Jewish government school in Velizh, government of Vitebsk, in the same year; but a domiciliary visit by the police, resulting from his connection with the revolutionary movement, caused him to flee the country. After many vicissitudes he, in June, 1882, arrived in New York, where he still resides. Having become an ardent socialist while in Russia, he devoted all the time he could spare from work and study to spread his favorite ideas among the Jewish workingmen of New York. He thus became the pioneer socialistic labor leader among them, and was the first in the United States to deliver socialistic speeches in Yiddish. Cahan was either originator, collaborator, or editor of almost all the earlier socialistic periodicals published in that dialect; and he is still connected with the daily organ of that section of the socialists with which he is in sympathy. He has occupied various positions in labor organizations, from walking delegate to representative at the International Socialist Congress at Brussels.

Cahan quickly mastered the English language; and four years after his arrival in New York taught immigrants in one of the evening schools. Later he began to contribute articles to the "Sun" and other newspapers printed in English, and was for several years employed in a literary capacity by the "Commercial Advertiser," to which paper he is still a regular contributor. While his Yiddish writings are mostly confined to propagandism, his literary work in English is mainly descriptive; and he has few, if any, equals in the United States in depicting the life of the so-called "ghetto," where he has lived and worked for the last twenty years. "A Providential Match" was the first of Cahan's tales to be published (in "Short Stories," 1895). His first novel, "Yekl" (New York, 1896), being the graphic story of an Americanized Russo-Jewish immigrant, attracted much attention and was favorably commented on by the press both in America and in England. W. D. Howells compared Cahan's work to that of Stephen Crane, and prophesied for him a successful literary future ("The World," New York, July 26, 1896). Cahan's next work of fiction, "The Imported Bridegroom, and Other Stories" (*ib.* 1898), was also well received and favorably noticed by the general press. Of his shorter publications the article on the Russian Jews in the United States, which appeared in the "Atlantic Monthly," July, 1898, deserves to be specially mentioned.

Bibliography: A syndicate article describing Cahan's career (with illustrations), published simultaneously in many newspapers Sept. 27, 1896, among others the *Boston Post* and *Pittsburg Dispatch*; *The Bookman*, iv. 157-158, vii. 513, x. 101-102, 428-430; Wiener, *History of Yiddish Literature in the Nineteenth Century*, pp. 221-226, New York, 1899.

CAHEN, ALBERT: French composer; born at Paris Jan. 8, 1846; a pupil of César Franck (composition) and Mme. Szarvady (pianoforte). He made himself known to the musical world by the

following compositions: (1) "Jean le Précurseur," a Biblical poem (1874); (2) "Le Bois," a comic opera (1880); (3) "Endymion," a mythological poem (1883); (4) "La Belle au Bois Dormant," a fairy operetta (1886); (5) "Le Vénitien," four-act opera (1890); (6) "Fleur des Neiges," ballet (1891); (7) "La Femme de Claude," a three-act lyric drama (1896).

s. I. Br.

CAHEN, CORALIE: French philanthropist; born at Nancy, 1832; died at Paris March 12, 1899; wife of Mayer Cahen, chief physician of the Northern Railroad Company. Losing her husband and her only daughter before 1870, she devoted herself thenceforward to the relief of the unfortunate, and was largely instrumental in establishing the Maison Israélite de Refuge pour l'Enfance, an institution opened at Romainville in 1866 for homeless Jewish girls. When the war of 1870 broke out, she left this work to go to the field. At Metz she was appointed vice-president of the Society for Aid to the Wounded (Société de Secours aux Blessés) and acted as a Red Cross head nurse in the hospitals. When the German army entered Metz, Mme. Cahen offered her services to the army of the Loire. At the request of Gambetta she went to Vendôme, and established herself at the hospital organized in the lycée of that city, and succeeded in having her authority recognized by the Marianist sisters of Sainte-Croix at Le Mans.

Filled with compassion for the French soldiers imprisoned in the forts of Silesia and Pomerania, she made three journeys into Germany, two of them during the severe winter of 1871–72. Aided by Empress Augusta, she even gained the ear of Emperor William. Visiting sixty-six forts, she succeeded in releasing 300 prisoners before the expiration of their term. She also accomplished the no less difficult task of procuring information for the families of the missing. She did what even the minister of foreign affairs had been powerless to accomplish; viz., she discovered at Berlin the office in which all the information regarding these widely scattered soldiers was kept, and she carried back to Paris 59,000 individual reports concerning their situation; indicating those that were dead, and those that were being treated in the German hospitals. This marvelous perseverance and devotion were for a long time unknown to the public, owing to the modesty of this heroic woman. When in 1889 M. de Freycinet found the official record of this brilliant service mentioned in an article in the "Temps," he conferred a military decoration upon Mme. Cahen.

After the war Mme. Cahen devoted herself to works of charity; giving also some time to sculpture, in which she showed considerable skill. Noteworthy among her works is a bust of Zadoc Kahn, chief rabbi of France. The "Refuge" founded by her became under her care a model of its kind. It was later transferred to its new quarters constructed by the architect Aldrophe at Neuilly, and was dedicated June 4, 1883. She was its president until her death. She was also a member of the Association des Dames Françaises. The academician Maxime du Camp, in his book entitled "Paris Bienfaisant" (pp. 365 *et seq.*, Hachette, 1888), in which he gives high credit to the Jewish charities of Paris, devotes an entire chapter to the "Refuge" and to its director. He pays the latter a brilliant tribute, tracing the principal episodes of her life, and closing with these remarkable words: "It has been said, and I, too, have said it myself, that Israelites never have a strongly developed love for their country; but—O Jewess, forgive me!"

Bibliography: Maxime du Camp, *Paris Bienfaisant*, in *Univers Israélite*, March 17, 1899.

s. J. W.

CAHEN, ISIDORE: French scholar and journalist; born at Paris in 1826; died there March 6, 1902. After having brilliantly completed his education at the Collége Charlemagne, he entered the Ecole Normale in the section of philosophy, having for comrades Edmond About, Hippolyte Taine, Francisque Sarcey, and others, who afterward became distinguished in their respective walks of life. Cahen soon attracted the attention of his professors; and, while still a student, was entrusted with the teaching of philosophy in the College of Versailles.

In 1849 Cahen graduated third at the Ecole Normale; and in the same year succeeded in obtaining the degree of "agrégé de philosophie." A year later he was appointed professor of philosophy at the Lycée Napoléon-Vendée, after having been nominated secretary to the French embassy at Madrid. A cabal among the clerical papers, however, soon caused him to lose his professorship. The incident gave rise to many press polemics, and brought about the resignation of the members of the Jewish consistory.

The government then offered Cahen other positions, but he declined them all, and devoted himself to journalism. He collaborated on the "Journal des Débats," and for many years was attached to the editorial staff of "Le Temps." At the death of his father, Samuel Cahen, he assumed the directorship of the "Archives Israélites," which position he held until his death. Cahen lectured from 1859 till 1878 on history and literature in the Jewish Theological Seminary of Paris.

Besides contributing many valuable articles to the press on various subjects, Cahen was the author of the following writings: (1) "Deux Libertés en Une," in which he pleaded the cause of liberty of conscience and freedom in tuition (Paris, 1848); (2) "La Philosophie du Poème de Job," inserted as an appendix to the Bible translation of his father; (3) "L'Immortalité de l'Ame chez les Juifs," translated from the German of G. Brecher (Paris, 1857).

CAHEN, SAMUEL: French Hebraist and journalist; born at Metz Aug. 4, 1796; died at Paris Jan. 8, 1862. He was brought up at Mayence; pursuing a course of rabbinical studies and devoting, at the same time, much attention to modern languages and literatures. After completing his education Cahen was engaged as a private tutor in Germany. In 1822 he went to Paris, where he assumed the directorship of the Jewish Consistorial School, a position which he held for a number of years. In 1840 Cahen founded the ARCHIVES ISRAÉLITES.

Cahen's main work was the translation of the Bible into French, with the Hebrew on opposite pages, and critical notes and dissertations by himself and others. The entire edition, consisting of eighteen volumes, appeared at Paris in 1851. Despite adverse criticism, denying Cahen critical perception in the choice of his material, it must be admitted that the undertaking exerted a great influence upon a whole generation of French Jewry. In addition to this great work of his, Cahen was the author of the following writings: (1) "Cours de Lecture Hébraïque, Suivi de Plusieurs Prières, avec Traduction Interlinéaire, et d'un Petit Vocabulaire Hébreu-Français," Metz, 1824; (2) "Précis d'Instruction Religieuse," *ib.* 1829; (3) a new French translation of the Haggadah of Passover, Paris, 1831–32; (4) "Almanach Hébreu," *ib.* 1831.

Cahen was appointed a chevalier of the Legion of Honor in 1849.

S. I. BR.

CAHN, ARNOLD: German physician; born at Worms April 11, 1858. After completing his course at the gymnasium, he studied medicine at the University of Strasburg, graduating thence in 1881. He was assistant physician at the hospital of the university from 1882 to 1885, becoming privat-docent in the latter year, and assistant professor in 1895.

Cahn has written many articles in the medical journals, his specialty being the physiology of digestion. Among his works and essays are: "Ueber Antiperistaltische Magen-Bewegungen"; "Ueber Magen-Verdauung bei Chlorhunger"; "Ueber Magensäure bei Acuter Phosphorvergiftung"; "Ueber die Verdauung des Fleisches im Normalen Magen"; "Ueber die Peptone als Nahrungsmittel."

CAHUN, DAVID LÉON: French Orientalist and writer; born June 23, 1841, at Haguenau, Alsace; died at Paris March 30, 1900. Cahun's family, which came originally from Lorraine, destined him for a military career; but owing to family affairs he was compelled to relinquish this, and he devoted himself to geographical and historical studies. In 1863 he began to publish in the "Revue Française" a series of geographical articles and accounts of his travels in Egypt and the neighboring countries. About the same time he published in the daily press letters of travel, and a geographical review which was the first of its kind. In 1864 Cahun set out to explore Egypt, Nubia, the western coast of the Red Sea, and Asia Minor.

Returning to France in 1866, he became a political writer on the staff of "La Liberté"; but when that paper supported the empire, Cahun left it, and joined the staff of "La Réforme" (1869) and "La Loi." During the Franco-Prussian war he was correspondent for several papers. On Sept. 4, 1870, he entered the army as a volunteer, and was appointed sublieutenant of the 46th foot in the following November. When peace was established he resumed his Oriental studies, devoting himself chiefly to researches concerning the Turks and the Tatars.

In 1875 he was appointed to the Bibliothèque Mazarine, where he was specially engaged in the compilation of an analytical catalogue from the year 1874. Meanwhile Cahun had begun to publish a series of historical novels dealing with ancient history, in the style of the journeys of Anacharsis in Greece. They are said by one critic to be written in temperate and pure French, combining interest with genuine archeological knowledge. It was Cahun's intention to present facts of ancient history that were not generally known, and thus make contributions to general history and geography. These novels include: "Les Aventures du Capitaine Magon," on Phenician explorations one thousand years before the common era (Paris, Hachette, 1875); "La Bannière Bleue," adventures of a Mussulman, a Christian, and a pagan at the time of the Crusades and the Mongolian conquest (*ib.* 1876); "Les Pilotes d'Ango," dealing with French history of the sixteenth century (*ib.* 1878); "Les Mercenaires," of the time of the Punic wars (*ib.* 1881); "Les Rois de Mer," on the Norman invasions (Chasavay, 1887); "Hassan le Janissaire," on Turkish military life of the sixteenth century (crowned by the French Academy); "La Tueuse," scenes from the Mongol invasion of Hungary in the thirteenth century (1893). Cahun contributed many literary articles to the "Revue Bleue," "Le Journal des Débats," etc., and several critical, geographical, and ethnographical papers to the "Bulletin de la Société d'Ethnographie," "Bulletin de la Société Académique Indo-Chinoise," "Bulletin de la Société Japonaise," "Bulletin de la Société Americaine," "Bulletin de l'Athénée Oriental," etc.

In 1878 Cahun set out on a fresh series of journeys accompanied by his wife. The two intrepid travelers visited central Syria, the mountains of Ansairi (1878), the Faroe islands and Iceland (1879), central Syria and Mesopotamia (1880). In 1879 the "Tour du Monde" published an account of his travels through Syria and the mountains of Ansairi. He also issued a volume treating the same subject, entitled "Excursions sur les Bords de l'Euphrate" (Paris, 1884). His scholarly study of local customs, "Scènes de la Vie Juive en Alsace," with preface by Zadoc Kahn, chief rabbi of Paris, appeared about the same time (*ib.* 1885). In 1884 he published "Le Congo, la Véridique Description du Royaume Africain, Traduite pour la Première Fois en Français sur l'Edition Latine Faite par les Frères de Bry en 1598, d'Après les Voyages Portugais et Notamment Celui d'Edouard Lopez en 1578" (Brussels, 1884).

In 1890 Cahun established a course of lectures at the Sorbonne, where he taught the history and the geography of Asia. A résumé of one section of this course has been incorporated in the "Histoire Générale" of Lavisse and Rambaud. Cahun's "Introduction Générale à l'Histoire de l'Asie" (1896), based on material gathered during his travels, is a complete and exact history of that continent He also undertook the restoration of some ancient casts that are of great geographical interest. Some years before his death Cahun ceased writing for the Parisian periodicals, but to the end he contributed to "Le Phare de la Loire." He left unfinished a history of the Arabs, and a historical novel dealing with the story of the Arabs. He was a member of several learned societies.

S. Z. K.

CAIAPHAS or **CAIPHAS** (Καϊάφας, a Greek word; in the Hebrew original, probably not כיפא, but קיף; compare Mishnah Parah iii. 5; Derenbourg, "Essai sur l'Histoire de la Pal." p. 215, note 2; Schürer, "Gesch." 3d ed., ii. 218); full name, **JOSEPH CAIAPHAS** (Josephus, "Ant." xviii. 2, § 2) Son-in law of the high priest Ananas or Annas (John xviii. 13); held that office himself through appointment of Valerius Gratus, about 18–36, hence for a longer period than several of his predecessors and successors. Luke iii. 2 speaks of two high priests, Annas and Caiaphas. The mention of the two at one and the same time has been a great stumbling-block to the commentators. John made a curious error (xi. 49, xviii. 13) in speaking of Caiaphas as the high priest "in that year," as if he interchanged every year with Annas. It appears that even while Caiaphas performed the duties of the office, the power of high priest lay in the hands of Annas.

Caiaphas' historic importance lies in the fact that he is expressly mentioned by Matt. xxvi. 3, 57, and John xi. 49, xviii. 13, 24, 28, in connection with the crucifixion of Jesus, though not by Mark and Luke. After his arrest, however, Jesus was taken not to Caiaphas but to Annas (John xviii. 13 *et seq.*), who questioned him only privately. The actual trial took place on the next day, the eve of the Passover, before the twenty-three members of the Sanhedrin over whom Caiaphas presided (Matt. xxvi. 57). Caiaphas is reported to have said on that occasion that it was expedient that one man should die for the people (John xviii. 14), a saying found also among the Rabbis (Gen. R. xciv. 9). The fact that Jesus was taken not to Caiaphas but to Annas is explained on the ground that the latter's palace was nearer the place of arrest than that of the former. Through the travels of Theodosius Archidiaconus, 530, it is known that there were 100 paces between the house of Caiaphas and the hall of judgment ("Nuovo Bull. di Arch. Crist." vi. 184, Rome, 1900). Peter and other disciples, however, being ignorant of the state of affairs, went to Caiaphas' house in the night.

After Pontius' recall Caiaphas was removed by the new governor, Vitellius (Josephus, "Ant." xviii. 4, § 3), and was succeeded by Jonathan, who was the son of Anan (36) and perhaps a brother-in-law of Caiaphas. It was probably at this time that the meeting with the apostles took place, at which Caiaphas is mentioned as belonging to the high-priestly family (Acts iv. 6). It was said later in the Syrian Church that he had been converted to Christianity, and was identical with the historian Josephus Flavius (Assemani, "Bibl. Orient." ii. 156, iii. 522; Solomon of Bassora, "The Book of the Bee," ed. Budge, tr. p. 94). His house outside Jerusalem is still (1902) shown.

CAIN.—1. Biblical Data: First-born of Adam and Eve, named "Cain" ("Ḳayin") because "gotten" (root, "ḳanah") "with the help of Yhwh." He became a tiller of the ground, and made an offering of its fruits which Yhwh did not accept, though He had accepted that of Abel. Cain was angered, whereupon Yhwh assured him that divine acceptance depended upon conduct. Cain slew Abel, and was cursed by Yhwh so that the soil should yield no return to his labor, and he should be driven out to wander over the earth. At Cain's appeal Yhwh "made to him a sign, lest any one finding him should smite him." Cain went forth to the land of Nod (Wandering), east of Eden; his wife bore him a son Enoch, after whom he named a city which he had built. From him were descended Lamech, who is recorded as having married two wives; Jabal, who instituted nomad life; Jubal, who invented music; and Tubal-Cain, the inventor of metal weapons—*i.e.*, the authors of material and social progress.

K. W. H. B.

——In Rabbinical Literature: Cain, the murderer of his brother Abel, presented to the views of the Rabbis two different types. One was that of a sinner who yielded to his passions, who was greedy, "offering to God only worthless portions; the remnants of his meal or flaxseed"; whom either God's favorable acceptance of Abel's sacrifice or Abel's handsomer wife and twin sister filled with jealousy; who, because he claimed the pasture-land or the wife of Abel as his birthright, quarreled with his brother. He was nevertheless sincere in his repentance when he said, "Too great is my sin [A. V., "punishment"] to bear" (Gen. iv. 13). and so the mark the Lord set upon him was a token of forgiveness. Like a man who had slain another without premeditation, he was sent into exile to atone for his sin (Sanh. 37b); and his crime was finally atoned for when he met death through the falling upon him of his house (Book of Jubilees, iv. 31), or at the hands of his great-grandson Lamech, who took him for a wild beast in the distance and shot him (Tan., Bereshit, ed. Vienna, p. 6b, and Yalḳ. i. 38).

Cain was also viewed as a type of utter perverseness, an offspring of Satan (Pirḳe R. El. xxi.), "a son of wrath" (Apoc. Mosis, 3), a lawless rebel who said, "There is neither a divine judgment nor a judge" (Midr. Leḳaḥ Ṭob and Targ. Yer. to Gen. iv. 8), whose words of repentance were insincere (Sanh. 101b; Tan.), whose fleeing from God was a denial of His omnipresence (Gen. R. xxii.), and whose punishment was of an extraordinary character: for every hundred years of the seven hundred years he was to live was to inflict another punishment upon him; and all his generations must be exterminated (Test. Patr., Benjamin, 7, according to Gen. iv. 24; Enoch, xxii. 7). For him and his race shall ever be "the desire of the spirit of sin" (Gen. R. xx., after Gen. iv. 7). He is the first of those who have no share in the world to come (Ab. R. N. xli., ed. Schechter, p. 133).

The seven generations of Cain, as the brood of Satan, are accordingly represented as types of rebels

Generations of Cain.

(Gen. R. xxiii.). While the pious men all descended from Seth, there sprang from Cain all the wicked ones who rebelled against God and whose perverseness and corruption brought on the flood: they committed all abominations and incestuous crimes in public without shame. The daughters of Cain were those "fair daughters of men" who by their lasciviousness caused the fall of the "sons of God" (Gen. vi. 1-4; Pirḳe R. El. xxii.; compare Sibyllines, i. 75). The Ethiopian Book of Adam and Eve and the Syriac Cave of Treasures—both Christianized Melchisedician works based upon a genuine Jewish original—relate the story of the fall of the descendants of Seth as "the sons of God" who had lived in purity as saints on the mountain near Eden, following the precept and example of Seth and Enoch, their leaders, but were attracted by the gay and sensuous mode of life in which the children of Cain indulged; the latter spending their days at the foot of the mountain, in wild orgies, accompanied by the music of instruments invented by Jubal, and by women, in gorgeous attire, seducing the men to commit the most abominable practises. In the days of Jared ("descent") the Sethites ("the sons of God") went down the hill to join the Cainites, heedless of the warnings of Jared; and none of those who walked in the path of sin could come back. This was repeated in the days of Enoch, Methuselah, and Noah: all the admonitions of these saintly leaders did not prevent the fall of the sons of Seth, for whom the daughters of Cain lusted (see The Book of Adam and Eve, transl. by S. C. Malan, 1882, pp. 115-147; Dillmann, "Das Christliche Adambuch," 1853, pp. 82-101; Bezold, "Die Schatzhöhle," i. 10-23). Josephus ("Ant." i. 2, § 2; i. 3, § 1) also speaks of the excessive wickedness of the posterity of Cain, which grew in vehemence with every generation; while the posterity of Seth remained virtuous during seven generations, after which the fall of the angels ensued and they were enticed by their gigantic offspring. To Philo, likewise, Cain is the type of avarice, of "folly and impiety" ("De Cherubim," xx.), and of self-love ("De Sacrificiis Abelis et Caini"; "Quod Deterius Potiori Insidiari Soleat," 10). "He built a city" (Gen. iv. 17) means that "he built a doctrinal system of lawlessness, insolence, and immoderate indulgence in pleasure" ("De Posteritate," 15); and the Epicurean philosophers are of the school of Cain, "claiming to have Cain as teacher and guide, who recommended the worship of the sensual powers in preference to the powers above, and who practised his doctrine by destroying Abel, the expounder of the opposite doctrine" (*ib.* 11).

A doctrine of the Cainites appears, then, to have been in existence as early as Philo's time; but nothing is known of the same. In the second century of the common era a Gnostic sect by the name of "Cainites" is frequently mentioned as forming a branch of the antinomistic heresies which, adopting some of the views of Paulinian Christianity, advocated and practised indulgence in carnal pleasure. While some of the Jewish Gnostics divided men into three classes—represented (1) by Cain, the physical or earthly man; (2) by Abel, the psychical man (the middle class); and (3) by Seth, the spiritual or saintly man (see Irenæus, "Adversus Hæreses," i. 7, 5; compare Philo, "De Gigantibus," 13)—the antinomistic pagan Gnostics declared Cain and other rebels or sinners to be their prototypes of evil and licentiousness. Cain, Esau, Korah, the Sodomites, and even Judas Iscariot, were made by these Gnostics expounders of the "wisdom" of the serpent in rebellion against God (Gen. iii. 5), the primeval serpent, "Naḥash ha-Ḳadmoni" (Gen R. xxii. 12). How many of these pernicious doctrines were already formed in pre-Christian times and how many were developed during the first and second Christian centuries is difficult to ascertain (see Jude 11, "the way of Cain"; Irenæus, *l.c.* i. 31, 1; 26, 31; 27, 3; Hippolytus, "Adversus Omnes Hæreses," v. 11, 15, 21; Clemens of Alexandria, "The Cainists," Stromata vii. 17; Eusebius, "Hist. Eccl." iii. 29; Epiphanius, "Hæres." xxv., xxvi., xxxviii. 2). Blau with good reason refers to such Cainite doctrines the Haggadah of blasphemy, referred to in Sanh. 99b, as taught by Manasseh ben Hezekiah, the typical perverter of the Law in the direction of licentiousness.

Sources and Original Form.

——**Critical View:** The narratives in Gen. iv. are assigned to two different strata of the Jahvistic document; *e.g.*, Ball, "S.B.O.T.," the story of the murder of Abel (1-16a, 25, 26^2 to J), the later stratum; and the story of Cain, the city-builder, and of his descendants (16b-24^1 to J), the earlier stratum. The independence of the two sections is shown, among other things, by the fact that the man who, in verse 12, is to be "a fugitive and a wanderer," in verse 17 builds a city. Verses 16b-24, to which probably 1a should be added, are from the same document as the story of the creation in Eden; and 1b-16, 25, 26, from that containing J^1's account of the flood. The apparent cross-reference, "wanderer," "nad" (12), with "wandering," "Nod" (16b), is due to a redactor; and verse 24 refers to a version of the story of Cain which is different from that given in 1b-16 (compare below).

The later section, 1b-16, is commonly explained thus (compare Holzinger's "Genesis"): Cain is the eponym of the Kenites (see 2), and the verses are a form of an independent tradition which explained the nomadic life of the Kenites as due to a curse laid upon them for some ancient murder. To the settled Israelites the nomadic life seemed mean and wretched. Verses 25, 26 connect this story with the complete J.

The earlier section, 17-24, is J^1's genealogy of the descent of the human race from Adam, and his account of the development of civilization. The Song of Lamech (23, 24) is an ancient fragment inserted by J^1, referring to a form of the story of Cain which placed his conduct in a favorable light.

Text of Gen. iv. 1: A. V., "[a man] from the Lord," so Targ. O., implies a reading מאת יי'; the actual text might possibly be rendered as R. V., "with the help of the Lord"; so Septuagint, Vulgate, or even "from Yhwh." Marti, apud Holzinger, proposes *'ot* for *'et*, "a man bearing the Yhwh-sign" (compare verse 15, and below).

Origin of Name.

The etymology of iv. 1 is a linguistic impossibility. The name was originally that of the Kenite tribe (see 2). The word קין ("kayin") is read in the Masoretic text of II Sam. xxi. 16, and translated "lance"; the corresponding words in Arabic and Syriac mean "smith." The tribe may have derived its name from the fame of its smiths. The "Cainan" of Gen. v. 14 ("Ḳenan") is another form of this name (compare "Kenan"; R. V. "Kenan"). No explanation of Yhwh's disapproval is given in the Masoretic text. The LXX. of verse 7 implies some ceremonial irregularity. Suggestions that the sin consisted in the bloodlessness of the offering, or in its worthlessness, or that it was given in a wrong spirit, are alike conjectures. The story is probably imperfect at this point.

The "Sign" of Cain.

The "sign" of Cain is sometimes understood as a sign given to Cain to reassure him, but probably some mark on his person is intended, which should indicate that he was under divine protection. It perhaps refers to a tribal mark of the Kenites connected with their worship of Yhwh (Stade, "Z. A. T. W."; Guthe, "Herzog," 1901, *s.v.*).

The Apocrypha (Wisdom x. 3, 4) refers to Cain as the cause of the Flood. In the New Testament Cain is mentioned as an evil example (Heb. xi. 4; I John iii. 12; Jude 11).

2. Tribe; mentioned in Num. xxiv. 22, and Judges iv. 11, for the tribe of the Kenites (see Kenites).

3. City ("Ha-Ḳayin"); mentioned in Josh. xv. 57, in southern Judah, often identified with Yagin, southeast of Hebron.

CALABRESE, HAYYIM BEN JOSEPH. See Vital, Ḥayyim.

CALABRIA. See Italy.

CALAH: The name of a city mentioned in Gen. x. 11 *et seq.*, and forming with Nineveh, Rehoboth 'Ir, and Resen the chief places in the Assyrian extension of Nimrod's domain. The verse in question embodies a correct tradition that the Assyrian empire was originally an offshoot of Babylonia. Assyrian culture similarly represents a natural extension toward the work of the civilization that arose in the South. The mound of Nimrod, lying in the fork of land between the rivers Tigris and the Upper Zab, marks the site of the city. Excavations were begun here by Layard in 1845, and subsequently continued by Rassam and George Smith. Their work has resulted in the discovery of a great platform built of sun-dried bricks and faced with stone, extending 600 yards north and south by 400 yards east and west, on which have been found remains of new palaces and of restoration works carried on by Shalmaneser I., Assurnazirpal, Shalmaneser II., Tiglathpileser III., Sargon, and Esarhaddon. Very little is known of the history of the city, but Assurnazirpal ascribes its origin to Shalmaneser I. (about 1300 B.C.); it is, however, scarcely probable that the city came into existence at so late a period. It is safe to assume that he means that Shalmaneser rebuilt it and made it a city of importance. Though the city was at times the residence of the king, it never became so populous as either Asshur or Nineveh.

J. JR. R. W. R.

CALAHOR(R)A: A family of Spanish descent, resident in Cracow from the sixteenth century up to the present time, of which the following members attained prominence:

1. Israel Samuel Calahorra (in the place of קאלפורה read קאלהורה): Writer; lived at Cracow; son of Solomon Calahorra (No. 3). He was not a physician, as Fürst and others have it, nor did he come from "Califoora."

In 1624 he completed "Yismaḥ Yisrael" (Israel Shall Rejoice), a lexicon to the four ritual codes in alphabetic order. It was published at Cracow in 1626 and again at Amsterdam in 1693, together with the commentary "Ḥuḳḳe Da'at" by Moses Jekuthiel Kaufman. Single parts of it appeared at Berlin in 1700 and at Dyhernfurth in 1701. The code Yoreh De'ah was published at Vienna in 1865, together with the commentary "Ḥuḳḳe Da'at" and a commentary, "'Olelot Ẓebi," by M. H. Friedländer.

According to Calahorra's own statement in the preface to his lexicon, he wrote, besides the commentary on the ritual codes: "Or Yisrael" (Light of Israel), a commentary on the Pentateuch; "Kerem Shelomoh" (Vineyard of Solomon), a commentary on Pirḳe Abot; and "Sullam ha-Shamayim" (Heavenly Ladder). Besides the last work there is at the end of the first code in "Yismaḥ Yisrael" a "teḥinnah" (supplication), mystical in character, together with several prayers. None of these other works has been printed.

2. Mattithiah Calahorra: Apothecary in Cracow; grandson of Solomon Calahorra (No. 3). He held a religious dispute with a Dominican, and suffered martyrdom at the stake in 1664 at Pieterkov. An account of his trial and the story of his martyrdom are in manuscript in the archives of the Dominican monastery at Cracow. A copy of the same is in the possession of S. J. Halberstamm.

3. Solomon Calahorra: Physician; lived in Cracow between 1559 and 1586. His son designates him as "sepharad" (= Spaniard); and he probably came from Calahorra. Moses Isserles (ReMA) and Solomon Luria, whose contemporary he was, held him in high regard for his medical skill; and privileges were conferred on him in 1570 and 1578 by King Sigismund Augustus, to whom he was physician-in-ordinary, and by Stephen Bathori.

Calahorra, it appears, occupied himself also with business; and he has been confounded by Graetz and others with the physician Solomon Ashkenazi.

CALAMANI, JOSHUA ABRAHAM BEN SIMḤAH: Italian Talmudist; born at Venice in 1704. The surname "Calamani" is, according to Steinschneider, derived from the German "Kalman" or "Kalonymus," borne by an ancestor of Joshua. Calamani was a precocious child, the only work extant by him having been written when he was thirteen years of age. It is entitled "Mille de-Bediḥuta" (Words of Delectation), and contains parodies on the language and style of the Talmud, with Rashi and Tosafot. It was written for the festival of Ḥanukkah (Venice, 1717).

L. G. I. Br.

CALAMUS: One of the ingredients (Ex. xxx. 23) of the oil made specially for anointing the tabernacle (Ex. xxx. 26), its vessels (*ib.* 27–29), and the priests (*ib.* 30). The calamus reed was fragrant, and is therefore mentioned in the long list of spices and fragrant woods in Cant. iv. 14. It was one of the articles in which Tyre traded (Ezek. xxvii. 19). See Reed.

J. Jr. G. B. L.

CALATAYUD, CALATAL-YEHUD, or **CASTILLO DOS JUDÍOS** (Arabic, **Ḳal'at Ayub, Castillo de Ayub**; Hebrew, קלעת איוב or קלעה): City of Aragon, which had a large Jewish community as early as the reign of 'Abd al-Raḥman III. In 1882, while workmen were digging the foundation of a house, they discovered a marble tombstone bearing a Hebrew inscription in memory of a certain Samuel b. Solomon, who died Marḥeshwan 11, 4680=Oct. 9, 919 ("Boletin de la Real Academia de la Historia," xii. 17 *et seq.*; "Rev. Et. Juives," xvi. 273). By the kings of Aragon the Jews of Calatayud were granted certain privileges, among which was one with regard to the oath; and these privileges were from time to time renewed.

The Jewish quarter of Calatayud was situated in the vicinity of the river Las Pozas, and extended from S. Maria de la Peña to the Torre Mocha. On the opposite side of the river lay the Jewish cemetery. The community, which, during its prosperous times, annually paid 6,000 maravedis in taxes, possessed two large synagogues, one of which, situated at the end of the Jewish street, was very beautiful. This synagogue was built by Aaron b. Yaḥya, and renovated by his relative, Joseph b. Yaḥya. There were also several large schools, two of which were founded respectively by Joseph Parhi and Jacob b. Calna.

In addition to these there was a school for the association of weavers, and another attached to the Ḥebrah Ḳaddishah. As the members of the congregation occasionally absented themselves from the synagogues and held prayers in private houses, the "aljama" (community) ordained that services were to be held only in the regularly constituted synagogues and schools; and that an infringement of this mandate was to be punished by a fine, one-half of which was to be donated to the crown. There were, however, two persons exempt from this law: one, the physician Don Baḥiel al-Constantini, who lived some distance from the synagogue; the other, Moses b. Shaprut, whose gout prevented his attendance at the service.

In 1326 the Jews of Calatayud had indiscreetly admitted two Christians to Judaism; in consequence the former were condemned to severe punishment by the inquisitor, but later pardoned by King Jaime. In the war between Castile and Aragon in 1367, the Jews of Calatayud and Daroca, of whom the former had bravely defended their city, were subjected to great suffering at the hands of the Castilian soldiery, having their shops plundered and their children ruthlessly massacred. As a result of this war the walls of the city of Calatayud, which had been heavily damaged and partly destroyed, had to be restored; and since the Jews were willing to repair only the walls of their immediate quarter, a joint conference was held on Jan. 11, 1390, between the city council and the representatives of the aljama (among whom were the physicians Samuel Sadoch, Jacob Azarias, and Don Samuel b. Shaprut), at which it was agreed that the Jews were to rebuild all the walls of the city, but that they were to receive reimbursement from the Christian inhabitants for all the additional money expended.

In consequence of the persecutions and the sermons of the proselytizing Vicente Ferrer, a large number of the wealthiest Jews of Calatayud in 1391, and more particularly in 1413, accepted baptism. Among the converts were the following distinguished families: the Clementes, whose progenitor was Moses Ḥamorro; the Santangels, descended from Azariah Genillo; the Villanuevas, from Moses Patagon; and the children of the wealthy Samuel Vibon. Several of these persons rose to high eminence in Church and state, but many fell victims to the Inquisition.

The community, once wealthy and powerful, gradually declined, until (about fifty years before the expulsion of the Jews from Spain) it was able to pay only a modicum in taxes. Calatayud was always celebrated as a great seat of Jewish learning, and among its eminent scholars were: the grammarian Solomon ibn Parḥon, who was born at Calatayud and was a friend of Judah ha-Levi; the rabbi Solomon Reuben, who was related to Ḥasdai Crescas, and had many enemies (he was finally compelled to give place to the preacher En Bima); R. David ibn Shoeib, who enjoyed the esteem of both Jewish and Christian circles, and who, like Moses Alḳabiẓ and Don Solomon b. David, carried on a correspondence with Isaac b. Sheshet. The Nasi D. Samuel ha-Levi and R. Moses b. Susa (the latter probably identical with the correspondent of Isaac b. Sheshet at Ucles) were the representatives of the Calatayud community at the disputation at Tortosa. The last preacher of the congregation of Calatayud was the celebrated Isaac Arama. According to Steinschneider ("Jew. Quart. Rev." xi. 605), the Jewish family name "Ḳalai" is derived from this city.

CALATRAVA: Fortified city in the former province of La Mancha, in Castile. In 1146, when it was captured from the Moors by Alfonso VII., the latter made his favorite, Judah b. Joseph ibn Ezra ha-Nasi, governor of the city, just as Celorigo, when captured twenty-eight years later, was entrusted to the Jews (Joseph ha-Kohen, "'Emeḳ ha-Baka" [after Ibn Daud], p. 28; German transl. by M. Wiener, p. 161; "Boletin Acad. Hist." xiv. 267; J. Amador de los Rios, "Historia de los Judios de España," i. 331)

The Knights of the Order of Calatrava, called after this city—who received large estates and gifts from the kings of Castile and Aragon—and their grand masters had various relations with the Jewish communities and individual Jews. The city Maqueda was a fief of the order, and was the home of the scholarly Moses Arragel, with whom the grand master Luis de Guzman corresponded. In 1316 the grand master Garcia Lopez interceded for the Jewish community, by asking the king, Alfonso XI., to reduce the royal taxes. In 1304 the Order of Jaime II. of Aragon was granted the privilege of admitting thirty Jewish families into the city of Alcañiz, which belonged to the order. In recognition of the services rendered by the grand master and his knights to King Henry II. in his war against Don Pedro, the king presented the grand master and the order 500 and 1,000 maravedis, respectively, from the annual taxes of the Jews residing between Guadalferra (Guadalfeisa) and Puerto de Muladar and from those of the Jewish community of Villa Real. In 1310 the order sold a water-mill, called Batanejo, which became the property of Don Zulema (Salomon ibn Albagal) and his wife, Jamila, more correctly Joanila. The grand master Garcia Lopez also had negotiations with Abraham aben Xuxen (ben Susan) of Villa Real in regard to a water-mill.

CALAZ, JUDAH. See Kalaẓ, Judah.

CALCOL: A man famous for his wisdom, since the Biblical writer attests the wisdom of Solomon by saying that he surpassed Calcol. In the account of I Kings iv. 31, R. V., Calcol (Chalcol, I Kings iv. 31, A. V.) is given as the son of Mahol, while in I Chron. ii. 6 he is called the son of Zerah of the tribe of Judah, and a brother of Heman and Ethan. Rashi, following the Midrash (Pesiḳ., ed. Buber, iv. 34b) says that Calcol [which probably means "the nourisher," or "nourishment"] is a name given to Joseph because of the verse "and Joseph nourished" (ויכלכל יוסף) (Gen. xlvii. 12).

E. G. H. G. B. L.

CALCUTTA: Capital of Bengal, and seat of government of British India. The Jews of Calcutta now number about 2,150, of whom 150 are European and the remainder natives of Asiatic Turkey, Persia, and southern Arabia. Just when the first Jew settled in Calcutta is uncertain; but Jewish traders did business there many years ago. Shalome David Cohen is the first permanent settler of whom there is authentic record toward the end of the eighteenth century. He became a favorite of the raja of Lucknow, and even had the honor of riding with him on his elephant. Cohen built the first synagogue in Calcutta, known as the Old Synagogue. The second synagogue, Naveh Shalome, situated in Canning street, was built nearly a century ago by Ezekiel Judah Jacob, another Jewish pioneer. It had until lately the income (229 rupees monthly) from a large compound, which was formerly distributed among the poor. This compound is now occupied by the Magen David synagogue, whose founder, Elias David Joseph Ezra, compensated the Naveh Shalome by a permanent income from a trust fund. Religious questions are sent for solution to Bagdad.

Synagogues.

The third synagogue was the Beth-El, on Pollock street, erected in 1855-56 by Joseph Ezra and Ezekiel Judah. It was rebuilt and enlarged in 1885-86 by Elias Shalome Gubbay. The finest synagogue in Calcutta is the Magen David. It is lighted by gas and cooled by punkas (fans).

The Ezra Hospital, the only Jewish institution of its kind in Calcutta, was erected by Mrs. Mozelle E. D. J. Ezra in memory of her husband. It cost 125,000 rupees; and all expenses, save those of doctors, are defrayed by the founder.

Education.

The school Kehillath Yeshooroon, though meant for girls, also receives boys up to ten years of age. It is in charge of three European and two Hebrew teachers, and the pupils are taught up to the seventh standard. The school is maintained partly by tuition fees and partly by a government subsidy. There is also a Talmud-Torah school, where the poor are taught and fed free every afternoon. It is supported by the wealthy Jews.

In trade the Jews are in the front rank. The great houses David Sassoon & Co. and E. A. D. Sassoon & Co. have branch offices in Calcutta. Other representative men in commercial life are M. A. Sassoon, Maurice Gubbay, H. S. Howard, and J. E. D. J. Ezra. The middle-class Jews speculate in opium and stocks, and act as brokers. The poor keep shops and earn a livelihood as hawkers.

Social Position.

The rich Jews live in the best part of the town, the Chowrunghee, their habits and costumes being European in every respect, though their vernacular is Arabic. There are several cricket, polo, and social organizations. Though many still adhere to their Arabian style of costume, the younger generation has adopted English dress.

CALEB.—Biblical Data: According to the Biblical text, Caleb was of the tribe of Judah. He represented that tribe among the twelve spies whom Moses sent from the wilderness to spy out Canaan. He and Joshua alone brought back an encouraging report, and in consequence were the only ones of all that came out of Egypt who were permitted to survive and enter Canaan (Num. xiii. 6, 30; xiv. *passim*; xxvi. 65; xxxii. 12; xxxiv. 19; Deut. i. 36). After the conquest he was given Hebron and the region around it. In the conquest of this territory he offered the hand of Achsah, his daughter, to the man who would capture Hebron for him; the feat was accomplished and the maiden won by Caleb's younger brother, Othniel. To him was assigned the south land, to which later, at Achsah's request, "the upper springs" were added (Josh. xiv., xv.; and Judges i. *passim*). His name is connected with several towns in southern Judah (I Chron. ii. *passim*).

J. JR. G. A. B.

——**In Rabbinical Literature:** In the rabbinical sources, Caleb, the son of Hezron (I Chron. ii. 18–20), is identified with Caleb, the son of Jephunneh (Num. xiii. 6), the epithet "Jephunneh" having been given to him because he "turned away" (יפונה = פנה) from the sinful intention of the other spies who advised the people against going into the Holy Land. Caleb is also called (I Chron. iv. 5) "Ashḥur," because his face became black (שחור) from much fasting, and "father of Tekoa" (אבי תקוע), because he fastened (תקע) his heart on God, and in this faith he married the prophetess Miriam, whom, although she was neither fair nor healthy, he treated with fatherly love (אבי), appreciating her own piety and her relationship to such brothers as Moses and Aaron.

Although the son of Jephunneh, Caleb is also called "the Kenizzite" (A. V., "Kenezite," Josh. xiv. 6, 14; compare Judges i. 13), because Kenaz, the father of Othniel, was his stepfather; Othniel thus being in fact his half-brother (Soṭah 11a, 12a, where the names of Azubah's children [I Chron. ii. 18] are applied to Caleb in haggadic fashion; see also Ex. R. i. 17).

When Caleb came to Palestine as one of the spies, he visited the graves of the Patriarchs in Hebron (compare Num. xiii. 22) and prayed for their help against the sinful intention of his colleagues (Soṭah 34b). It was also he alone who insisted that the spies should take some of the fruits of the country with them in order to convince the people of the extraordinary fertility of Palestine. As they did not wish to do this Caleb drew his sword and said: "If you will not take any fruit with you, then either my life or yours!" (Tan., Shelaḥ 15, ed. Buber; Num. R. xvi. 14). Thoroughly realizing the evil intentions of the spies, and knowing that it was useless to attempt to dissuade them, he did not betray his plans to them, but acted as if he agreed with them (Tan., *l.c.* 19; Num. R. *l.c.* 19). But when the spies began to incite the people against Moses, and hissed Joshua, who attempted to act as peacemaker, Caleb, whom they had thought to be on their side, rose and said, "This is not the only thing the son of Amram has done for us."—here all the ringleaders were silent—"He has taken us out of Egypt; he has divided the sea for us; and he has fed us with manna. Now, therefore, if he were to command us to make ladders and scale the heavens, we should obey him. Let us go up at once and take possession" (Soṭah 35a; Num. R. *l.c.*; Tan., *l.c.*). When the country was divided, Caleb and Joshua received the portions that had been intended for the other spies (B. B. 117b, 118b).

Caleb was the father of Hur from his second wife Ephrath (I Chron. ii. 19), and, therefore, the progenitor of the Davidic house, the "Ephrathite" (I Sam. xvii. 12; Soṭah 11b; Sanh. 69b).

J. SR. L. G.

——**Critical View:** The eponymous ancestor of the clan of Calebites. Since "Caleb" signifies dog, it has been thought that the dog was the totem of the clan. Modern criticism finds several different strata to this material, representing different points of view. The oldest writer (J) calls him simply Caleb in Josh. xv. 14–19; and Judges i. connects him with the expulsion of the sons of Anak from Hebron, and with the gift of Achsah and of certain lands to Othniel. D and P call him Caleb, the son of Jephunneh, and make him one of the twelve spies. In the original form of the story he alone brought back the favorable report, and so of all that came out of Egypt he alone entered Canaan.

CALEBITES: A branch of the Edomite clan of Kenaz (compare Judges i. 12 with Gen. xxxvi. 11, 15, 42) that, before the Israelitish conquest, had migrated to southern Judah and settled in the vicinity of Hebron. They appear to have entered the country from the south and to have been friendly to the Hebrews, from which fact, perhaps, arose the story of Caleb's favorable report as one of the twelve spies. They were afterward absorbed in the tribe of Judah. This union had not fully taken place at the time of David's career as an outlaw (I Sam. xxv. 3, xxx. 14). The narratives in Josh. xv. 14 *et seq.* and Judges i. 12 *et seq.* were composed to establish the claim of certain Calebite clans to particular localities (see Achsa and Othniel). It appears from I Chron. ii. 18 *et seq.* that the pre-exilian territory of the Calebites included Ziph and Mareshah and other towns in the extreme south of Judah; while another list in the same chapter (verses 46 *et seq.*), by representing certain personified towns as sons of Caleb's concubines, among which is Bethlehem, indicates that after the Exile the clan was pushed farther north. This was doubtless due to the occupation of the south by Edomites.

CALENDAR, HISTORY OF: The history of the Jewish calendar may be divided into three periods—the Biblical, the Talmudic, and the post-Talmudic. The first rested purely on the observation of the sun and the moon, the second on observation and reckoning, the third entirely on reckoning.

The study of astronomy was largely due to the need of fixing the dates of the festivals. The command (Deut. xvi. 1), "Keep the month of Abib," made it necessary to be acquainted with the position of the sun; and the command, "Also observe the moon and sanctify it," made it necessary to study the phases of the moon.

The oldest term in Hebrew for the science of the calendar is קביעותא דירחא ("fixing of the month"); later קדוש החדש ("sanctification of the new moon"); קדוש החדש על פי ראיה ("sanctification of the new moon by means of observation"); קדוש החדש על פי חשבון ("sanctification of the new moon by means of reckoning"); ידיעה בקביעותא דירחא ("science of fixing the month"); הלכות קדוש החדש ("rules for the sanctification of the new moon"). Among other names besides these we find סוד העבור ("the secret of intercalation"). The medieval and modern name is לוח.

Babylonian Calendar.

The Babylonian year, which influenced the French time reckoning, seems to have consisted of 12 months of 30 days each, intercalary months being added by the priests when necessary. Two Babylonian calendars are preserved in the inscriptions, and in both each month has 30 days as far as can be learnt. In later times, however, months of 29 days alternated with those of 30. The method of intercalation is uncertain, and the practise seems to have varied.

The Babylonian years were soli-lunar; that is to say, the year of 12 months containing 354 days was bound to the solar year of 365 days by intercalating, as occasion required, a thirteenth month. Out of every 11 years there were 7 with 12 months and 4 with 13 months.

Strassmeier and Epping, in "Astronomisches aus Babylon," have shown that the ancient Babylonians were sufficiently advanced in astronomy to enable them to draw up almanacs in which the eclipses of the sun and moon and the times of new and full moon were predicted ("Proc. Soc. Bib. Arch., 1891–1892," p. 112).

The Talmud (Yerushalmi, Rosh ha-Shanah i. 1) correctly states that the Jews got the names of the months at the time of the Babylonian exile.

There is no mention of an intercalary month in the Bible, and it is not known whether the correction was applied in ancient times by the addition of 1 month in 3 years or by the adding of 10 or 11 days at the end of each year.

Bound Lunar Year.

Astronomers know this kind of year as a bound lunar year. The Greeks had a similar year. Even the Christian year, although a purely solar year, is forced to take account of the moon for the fixing of the date of Easter. The Mohammedans, on the other hand, have a free lunar year.

It thus seems plain that the Jewish year was not a simple lunar year; for while the Jewish festivals no doubt were fixed on given days of lunar months, they also had a dependence on the position of the sun. Thus the Passover Feast was to be celebrated in the month of the wheat harvest (אביב), and the Feast of Tabernacles, also called חג האסיף, took place in the fall. Sometimes the feasts are mentioned as taking place in certain lunar months (Lev. xxiii.; Num. xxviii., xxix.), and at other times they are fixed in accordance with certain crops; that is, with the solar year.

In post-Talmudic times Nisan, Siwan, Ab, Tishri, Kislew, and Shebaṭ had 30 days, and Iyyar, Tammuz, Elul, Ḥeshwan, Ṭebet, and Adar, 29. In leap-year, Adar had 30 days and We-Adar 29. According to Pirḳe Rabbi Eliezer, there was a lunar solar cycle of 48 years. This cycle was followed by the Hellenists, Essenes, and early Christians.

In the times of the Second Temple it appears from the Mishnah (R. H. i. 7) that the priests had a court to which witnesses came and reported. This function was afterward taken over by the civil court (see B. Zuckermann, "Materialien zur Entwicklung der Altjüdischen Zeitrechnung im Talmud," Breslau, 1882).

The fixing of the lengths of the months and the intercalation of months was the prerogative of the Sanhedrin, at whose head there was a patriarch or נשיא. The entire Sanhedrin was not called upon to act in this matter, the decision being left to a special court of three. The Sanhedrin met on the 29th of each month to await the report of the witnesses.

From before the destruction of the Temple certain rules were in existence. The new moon can not occur before a lapse of 29½ days and ⅔ of an hour. If the moon could not be exactly determined, one month was to have 30 days and the next 29. The full months were not to be less than 4 nor more than 8, so that the year could not be less than 352 days nor more than 356. After the destruction of the Temple (70 C.E.) Joḥanan ben Zakkai removed the Sanhedrin to Jabneh. To this body he transferred decisions concerning the calendar, which had previously belonged to the patriarch. After this the witnesses of the new moon came direct to the Sanhedrin.

Empirical Determination of Leap-Year.

Every two or three years, as the case might be, an extra month was intercalated. The intercalation seems to have depended on actual calculation of the relative lengths of the solar and lunar years, which were handed down by tradition in the patriarchal family. Moreover, it was possible to judge by the grain harvest. If the month of Nisan arrived and the sun was at such a distance from the vernal equinox that it could not reach it by the 16th of the month, then this month was not called Nisan, but Adar Sheni (second).

On the evening before the announcement of the intercalation the patriarch assembled certain scholars who assisted in the decision. It was then announced to the various Jewish communities by letters. To this epistle was added the reason for the intercalation. A copy of such a letter of Rabban Gamaliel is preserved in the Talmud (Sanh. xi. 2).

The country people and the inhabitants of Babylonia were informed of the beginning of the month by fire-signals, which were readily carried from station to station in the mountain country. These signals could not be carried to the exiles in Egypt, Asia Minor, and Greece, who, being accordingly left in doubt, celebrated two days as the new moon.

Owing to the weather it was frequently impossible to observe the new moon. In order to remove any uncertainty with regard to the length of the year on this account, it was ordained that the year should not have less than 4 nor more than 8 full months. After the fixing of the calendar it was settled that the year should not have less than 5 nor more than 7 full months.

R. Gamaliel II. (80–116 C.E.) used to receive the reports of the witnesses in person, and showed them representations of the moon to test their accuracy. On one occasion he fixed the first of Tishri after the testimony of two suspected witnesses. The accuracy of the decision was disputed by Rabbi Joshua, who was thereupon commanded by the patriarch to appear before him prepared for travel on the day which was, according to his (Joshua's) calculation, the Day of Atonement, an order with which he most reluctantly complied.

During the persecutions under Hadrian and in the time of his successor, Antoninus Pius, the martyr Rabbi Akiba and his pupils attempted to lay down rules for the intercalation of a month.

Under the patriarchate of Simon III. (140–163) a great quarrel arose concerning the feast-days and the leap-year, which threatened to cause a permanent schism between the Babylonian and the Palestinian communities—a result which was only averted by the exercise of much diplomacy.

Talmudic Period.

Under the patriarchate of Rabbi Judah I., surnamed "the Holy" (163–193), the Samaritans, in order to confuse the Jews, set up fire-signals at improper times, and thus caused the Jews to fall into error with regard to the day of the new moon. Rabbi Judah accordingly abolished the fire-signals and employed messengers. The inhabitants of countries who could not be reached by messengers before the feast were accordingly in doubt, and used to celebrate two days of the holidays. By this time the fixing of the new moon according to the testimony of witnesses seems to have lost its importance, and astronomical calculations were in the main relied upon.

One of the important figures in the history of the calendar was Samuel (born about 165, died about 250), surnamed "Yarhinai" because of his familiarity with the moon. He was an astronomer, and it was said that he knew the courses of the heavens as well as the streets of his city (Ber. 58b). He was director of a school in Nehardea (Babylonia), and while there arranged a calendar of the feasts in order that his fellow-countrymen might be independent of Judea. He also calculated the calendar for sixty years. His calculations greatly influenced the subsequent calendar of Hillel. According to Bartolocci his tables are preserved in the Vatican. A contemporary of his, R. Adda (born 183), also left a work on the calendar.

Mar Samuel reckoned the solar year at 365 days and 6 hours, and Rab Adda at 365 days, 5 hours, 55 minutes, and 25$\frac{25}{57}$ seconds.

In 325 the Council of Nice was held, and by that time the equinox had retrograded to March 21. This council made no practical change in the existing civil calendar, but addressed itself to the reform of the Church calendar, which was soli-lunar on the Jewish system. Great disputes had arisen as to the time of celebrating Easter. Moreover, the Church was not fully established, many Christians being still simply Jewish sectarians. A new rule was therefore made, which, while still keeping Easter dependent on the moon, prevented it from coinciding with Passover.

Under the patriarchate of Rabbi Judah III. (300–330) the testimony of the witnesses with regard to the appearance of the new moon was received as a mere formality, the settlement of the day depending entirely on calculation. This innovation seems to have been viewed with disfavor by some members of the Sanhedrin, particularly Rabbi Jose, who wrote to both the Babylonian and the Alexandrian communities, advising them to follow the customs of their fathers and continue to celebrate two days, an advice which was followed, and is still followed, by the majority of Jews living outside of Palestine.

Under the reign of Constantius (337–361) the persecutions of the Jews reached such a height that all religious exercises, including the computation of the calendar, were forbidden under pain of severe punishment. The Sanhedrin was apparently prevented from inserting the intercalary month in the spring; it accordingly placed it after the month of Ab (July–August).

Post-Talmudic Period.

The persecutions under Constantius finally decided the patriarch, Hillel II. (330–365), to publish rules for the computation of the calendar, which had hitherto been regarded as a secret science. The political difficulties attendant upon the meetings of the Sanhedrin became so numerous in this period, and the consequent uncertainty of the feast-days was so great, that R. Huna b. Abin made known the following secret of the calendar to Raba in Babylonia: Whenever it becomes apparent that the winter will last till the 16th of Nisan, make the year a leap-year without hesitation.

This unselfish promulgation of the calendar, though it destroyed the hold of the patriarchs on the scattered Judeans, fixed the celebration of the Jewish feasts upon the same day everywhere. Later Jewish writers agree that the calendar was fixed by Hillel II. in the year 670 of the Seleucidan era; that is, 4119 A.M. or 359 C.E. Some, however, as Isaac Israeli, have fixed the date as late as 500. SAADIAH afterward formulated calendar rules, after having disputed the correctness of the calendar established by the Karaites. That there is a slight error in the Jewish calendar—due to inaccuracies in the length of both the lunar and the solar years upon which it is based—has been asserted by a number of writers.

Error in the Calendar.

According to Isidore Loeb the Jewish cycle in 19 years exceeds the Gregorian by 2 hours, 8 minutes, and 15.3 seconds. This makes a difference in a hundred cycles (1900 years) of 8 days, 21 hours, 45 minutes, and 5 seconds ("Tables du Calendrier Juif," p. 6, Paris, 1886).

The assumed duration of the solar year is 6 minutes, 39$\frac{25}{57}$ seconds in excess of the true astronomical value, which will cause the dates of the commencement of future Jewish years, which are so calculated, to advance from the equinox a day in error in 216 years ("Encyc. Brit." *s.v.* "Calendar," 9th ed., iv. 678).

The following calculation of the differences between the Jewish and Gregorian lengths of the year and month was privately made for the writer by

Prof. William Harkness, formerly astronomical director of the United States Naval Observatory at Washington:

1 year = 365 d. 05 h. $997\frac{12}{19}$ ḥalaḳim
or 365 d. 05 h. 55 m. 25.439 s.
48 m. 46.069 s. true value
(29 d. 12 h. 793 ḥalaḳim) 235 = 6939 d. 16 h. 595 ḥalaḳim = 19 years
29 d. 12 h. 44 m. $3\frac{1}{3}$ s. True value = 29 d. 12 h. 44 m. 02.841 s.

According to these calculations the Jewish year exceeds the Gregorian by 6 m. 39.37 s. and the Jewish month by .492 s. Insignificant as these differences may appear, they will cause a considerable divergence in the relations between Nisan and spring as time goes on, and may require a Pan-Judaic Synod to adjust.

J. A.

CALENDAR (Hebrew, "Luaḥ" = table): A systematic arrangement of the days of the year. The Jewish calendar reckons the days from evening to evening, in accordance with the order observed in the Biblical account of the Creation, "And there was evening and there was morning, one day" (Gen. i. 5). This principle is repeated in the Pentateuch several times (Ex. xii. 18; Lev. xxiii. 32). With nightfall the day, the period of twenty-four hours, ends, and a new one commences. The day, in this sense of the word, consists of two periods, that of light and that of darkness: the former is called "day"; the latter, "night." So that the term "day" is used in a double sense: (1) as the period of twenty-four hours, and (2) as daytime. Which of the two meanings the word carries in any particular passage of the Bible can easily be gathered from the context or from parallel passages (compare Bab. Suk. 43a).

Day and Night. The transition from day to night, from light to darkness, and vice versa, is gradual: in the one case it begins before sunset, and continues till after sunset; in the other, it begins before sunrise and continues till after sunrise. The two periods of transition are of undefined length, and are called, in Hebrew, "'ereb" and "boḳer" ("evening" and "morning": compare Ruth iii. 14; Deut. xxiii. 11; Num. ix. 15). The period of transition is also called "neshef" ("dawn" and "twilight"; Prov. vii. 9; I Sam. xxx. 17; compare Berakot 3b) and "dimdume ḥammah" (redness of the sun, Yer. Berakot iv. 1; Bab. *ib.* 9; and Rashi, *ad loc.*).

Nightfall, as the border-line between two consecutive days, is the moment when three stars of the second magnitude become visible ("ẓet ha-kokabim"); and the length of a day as opposed to night is, according to Neh. iv. 21, "from the rising of the morning" ("'alot ha-shaḥar" or "'alot 'ammud ha-shaḥar") "till the stars appear" ("ẓet ha-kokabim"; Berakot 2b). The short time before the actual appearance of the stars is regarded as a doubtful period, neither day nor night, and is called in rabbinic literature "ben ha-shemashot" (between the two suns), a euphemism for "bene ramshaya" (between the evenings; compare Mishnah Pesaḥim i. 1). The duration of the "ben ha-shemashot" is fixed by the Rabbis (Ṭur Oraḥ Ḥayyim, 261) to be thirteen minutes, thirty seconds before night.

An important element in the modern Jewish calendar is the announcement of ẓet ha-kokabim on Sabbaths, festivals, and fasts. The time that elapses between sunset and the appearance of stars varies from day to day and from place to place. It is determined by frequent observation, or by calculation. In the latter case, as well as in the former, the results found must be considered as the average time of ẓet ha-kokabim, which does not in each individual case agree with the result of direct observation.

Beginning of Night. It may be assumed that, under average conditions of the atmosphere, three stars of the second magnitude become visible in the evening when the sun is seven degrees below the horizon. The calculation is based on the following three equations: (1) $\cos \phi = \frac{\sin \alpha}{\cos L \cos D}$. (2) $\cos H = \tan D \tan L$. (3) $\cos (H - x) = 2 \cos \frac{\phi + H}{2} \cos \frac{\phi - H}{2}$. [H = time in degrees from noon to sunset; D = declination of the sun; φ = an auxiliary angle; x = time between sunset and the moment when the sun reaches 7 degrees below the horizon.] In higher latitudes, where during the summer the sun does not sink below the horizon, and during the winter does not rise above it, the days are counted in summer from midday, *i.e.*, from one upper crossing of the meridian by the sun to the next crossing; in the winter, from midnight to midnight, *i.e.*, from one lower crossing of the meridian by the sun to the next.

In places of the same latitude the time of ẓet ha-kokabim varies according to their longitude. Like any other point of time, it travels at the rate of one degree in four minutes from meridian to meridian, along any of the parallel circles, and arrives again at the starting-point in twenty-four hours. The question now arises, which is to be considered the first meridian. At which point of the circle do the twenty-four hours begin? The problem has been discussed by R. Judah ha-Levi in his "Cuzari" (ii. 11), and although he seems inclined to take the meridian of Sinai or of Jerusalem as the first, the meridian 90 degrees east of Jerusalem was accepted as the starting-point.

The day is divided into twenty-four equal hours, beginning at 6 P.M. (In Pirḳe R. El. the "large hour," equal to two ordinary hours, is mentioned.)

Duration of Day.

This division affects only the calculation of the "molad" and "teḳufah" (beginning of a month and of the four seasons of the year). In other respects daytime is divided into twelve hours, which vary according to the length of daytime. Whether the night in Talmudic times was likewise divided into twelve hours, is not certain. While in daytime the parts could easily be determined by the sun-dial, it became difficult after nightfall. Both in Biblical and Talmudical literature mention is made of a division of the night into three or four (Berakot 3a) watches ("ashmorah" or "mishmarah"; compare "the morning watch" [Ex. xiv. 24], "the middle watch" [Judges vii. 19], "the beginning of the watches" [Lam. ii. 19]).

The hour is divided into 1,080 parts ("ḥalaḳim"). In the Yer. (Berakot i. 1) the following division is given: A day has twenty-four hours; one hour has twenty-four "‘onot"; the "‘onah" has twenty-four "‘ittot"; one "‘et" has twenty-four "rega‘im." In the calculation of the molad only ḥalaḳim are employed. Both the hour and the parts (ḥalaḳim) are treated as constant; a day on the equator, which is equally divided between day and night—the night lasting from 6 P.M. to 6 A.M., and the day from 6 A.M. to 6 P.M.—being taken as the basis of the calculation.

The Week.

The week consists of seven days, distinguished from one another by their place in the week. They are called the first day, the second day, the third day, and so on to the seventh day, which is besides called "Shabbat" (Rest) or "Yom ha-Shabbat" (Day of Rest). As the Sabbath is the most important day of the week, the term "Shabbat" denotes also "week"—that is, the period from one Sabbath to the next; and a year of rest is also called "Shabbat" (or "shabu‘a"). Friday, as the forerunner of Shabbat, is called "‘Ereb Shabbat" (The Eve of Sabbath). The term "‘ereb" admits of two meanings: "evening" and "admixture" (Ex. xii. 38); and "‘Ereb Shabbat" accordingly denotes the day on the evening of which Sabbath begins, or the day on which food is prepared for both the current and the following days, which latter is Sabbath.

The idea of preparation is expressed by the Greek name παρασκευή, given by Josephus ("Ant." xvi. 6, § 2) to that day (compare Mark xv. 42; Luke xxiii. 54; Matt. xxvii. 62; John xix. 42). In Yer. Pesaḥim iv. 1 the day is called "Yoma da-‘Arubta" (Day of Preparation). Another term frequently employed in describing the day is the Aramaic "me‘ale" (bringing in, that is, the Sabbath). Saturday evening—*i.e.*, the evening after the termination of Sabbath—is correspondingly called "Moẓa'e Shabbat" in Hebrew and "Appuḳe Yoma" in Aramaic ("leading the day out"). The name, originally given to Saturday evening, is also applied to denote the whole of "Sunday." Similarly, the sixth year, or the year preceding the Sabbatical year, and the eighth year, or the year following the Sabbatical year, are respectively called "‘Ereb Shebi‘it" and "Moẓa'e Shebi‘it."

Name of Sabbaths.

The same terms are also applied to the days preceding and following any of the festivals; as "‘Ereb Pesaḥ," "‘Ereb Sukkot," etc. The weekly Sabbaths are distinguished from one another by the lesson from the Pentateuch or by that from the Prophets, read on Sabbath. "Shabbat Bereshit," for instance, is the name of the first Sabbath after the autumn holy days, or the first Sabbath after Simḥat Torah, because on that Sabbath the section, or parashah, that begins "Bereshit" (Gen. i. 1) is read; and, similarly, the second Sabbath is called "Shabbat Noaḥ," because the parashah beginning "Eleh Toledot Noaḥ" is read on that day. Again, "Shabbat Naḥamu" is the Sabbath after the fast of Ab, when Isa. xl., beginning "Naḥamu" (Comfort ye), is read; and "Shabbat Shubah" is the Sabbath between New-Year's Day and the Day of Atonement, when Hos. xiv., beginning "Shubah" (Return), is read. The names are based on the custom followed at present in all Orthodox congregations, prescribing the reading of the whole of the Pentateuch in the synagogue once every year. In the synagogues where the cycle of three years is adopted, these names do not apply. See SIDRA.

A difficulty with regard to the Sabbath is experienced by those who are traveling round the world. Journeying westward, they find the day longer than 24 hours; traveling eastward, they find the day shorter than 24 hours. When the starting-point is again reached, the former find that the a days of their counting are $a-1$ ordinary days of 24 hours; while those who travel in an eastward direction find their a days equal to $a+1$ ordinary days of 24 hours. Suppose the traveler in a westerly direction completes his journey on Friday evening according to his reckoning, he finds that at his starting-place it is not Friday but Saturday evening; and the traveler in the opposite direction, if he completes his journey on Saturday evening, according to his account finds that the day was counted in that place as Friday and not as Saturday. In the first case, therefore, the traveler has kept one Sabbath less than his brethren at home; in the second case, one Sabbath more.

The Month.

The moon passes through her different phases in 29 days, 12 hours, 793 parts (ḥalaḳim) of an hour. These phases serve as a measure of time (compare Ps. civ. 19); and the period covered by them is known as one lunar month. For practical purposes, however, the months are reckoned by full days and set in with the beginning of night. They contain either 29 or 30 days; in the first case the month is "ḥaser" (deficient) by half a day; in the second, "male,") over-full) by half a day. The first appearance of the new moon determines the beginning of the month. At first a small and faint arc, like a sickle, can be seen by those endowed with good sight, from spots favorable for such an observation. It may, therefore, happen that in different places the reappearance of the moon is noticed on different days. In order to prevent possible confusion to the central religious authority, the chief of the Sanhedrin, in conjunction with at least two colleagues, was entrusted with the determination of New-Moon Day for the whole nation. See CALENDAR, HISTORY OF.

Although the Jewish calendar was thus regulated by direct observation, the members of the court seem to have been in possession of a recognized system, called "Sod ha-'Ibbur"—("'Ibbur" is the intercalation of a day in a month, making it thirty days, and of a month in a year. The principal object of the calendar was to regulate these two points)—which enabled them to test the accuracy of the evidence of the eye-witnesses, and which was probably resorted to on exceptional occasions (R. H. 20). There were times of persecution when the president and the Sanhedrin could not exercise their authority; times of trouble and war when neither witnesses nor messengers could travel in safety. On such occasions calculation had to be relied upon. The substitution of calculation for observation became gradually permanent, helping to maintain the religious unity of the nation, and insuring the uniform celebration of "the seasons of the Lord," independently of the vicissitudes of the times, as well as of the distance of Jewish settlements from Palestine. A permanent calendar, still in force, was introduced by Hillel II., nasi of the Sanhedrin about 360. It is uncertain what the calendar of Hillel originally contained, and when it was generally adopted. In the Talmud there is no trace of it.

Originally, the Hebrews employed numerals to distinguish one month from the other. The month in which the spring season ("Abib") commenced was the first month (Ex. xii. 2; Deut. xvi. 1), the other months being accordingly called the second, third, etc. A few traces of names of months are met with in the earlier books of the Bible: Abib, the first month (Ex. *l.c.*); Ziw, the second month (I Kings vi. 1); Etanim, the seventh month (*ib.* viii. 2); and Bul, the eighth month (I Kings vi. 38). In post-exilic books Babylonian names are employed; viz., Nisan, Iyyar, Siwan, Tammuz, Ab, Elul, Tishri, Ḥeshwan, Kislew, Ṭebet, Shebaṭ, Adar, and We-Adar.

The Year.

Although the Hebrews reckoned by lunar months, it was provided that the first month should be in the spring (Ex. xii. 2, xiii. 4; Deut. xvi. 1). As the lunar year consists of twelve months, or 354 days, 8 hours, 876 parts, it is shorter, by 10 days, 21 hours, 204 parts, than the solar year, and every two or three years the difference is equalized by the addition of a month, following the twelfth month. The year is then called a leap-year, and consists of 383 days, 21 hours, 589 parts. Various methods were suggested for the equalization of the solar and lunar years (see 'Ar. 8b *et seq.*; Pirḳe R. El. vii.; and Baraita of Samuel), but the cycle of Meton, or the Maḥzor of the calendar of Hillel, prevailed. At first it was in the hands of the Sanhedrin to decide annually whether the year was to be a common year or a leap-year; and the decision was based on direct observation as to the signs of spring. In course of time, calculation was in this case also substituted for observation; and the sequence of common years and leap-years was permanently fixed.

The fact that the civil year included only complete days, as well as some other consideration, set forth below in the principles of the Jewish calendar, caused variations in the number of days, both in the common year and in the leap-year.

The following are the principles regulating the Jewish calendar: (1) The length of the astronomical lunar month is 29 days, 12 hours, 793 parts. (2) A synodical month has 29 or 30 days, and is accordingly "ḥaser" (defective), or "male" (full). (3) The first of Tishri is the day on which the "molad" (conjunction) of Tishri has taken place, except: (*a*) When the molad is at noon or later ("Molad Zaḳen"). (*b*) When the molad is on a Sunday, Wednesday, or Friday ("Adu" = אדו). (*c*) When the molad in a common year is on Tuesday, 204 parts after 3 A.M ("Gaṭrad" = גטרד). (*d*) When the molad is on Monday, 589 parts after 9 A.M., in a year succeeding a leap-year ("Beṭutaḳpaṭ" = בטותקפט). The exceptions ("deḥiyyot" = postponements) were introduced to provide that the Day of Atonement should not be on Sunday or Friday ('Ar. *l.c.* p. 20), and that the seventh day of Tabernacles should not be on Saturday. Maimonides ("Yad," Ḳiddush ha-Ḥodesh, v. 7) attempts to explain these exceptions astronomically. The exception of Molad Zaḳen provided that the first of Tishri should at least include six hours of the new astronomical month, in accordance with R. H. 20: "if the molad takes place before noon, the moon can be seen the same day near sunset"; and that same day was declared to be the first of Tishri. There was at least the possibility of experts discovering the small sickle of the moon six hours after the conjunction; and this possibility justified the authors of the calendar in fixing the day of the molad as the first of the new month, if the molad took place before noon.

An unsuccessful attempt was made by a certain Ben Meïr (923) to substitute 12 hours, 642 parts for "noon" (compare A. Harkavy, "Zikron La'aḥaronim," and M. Friedlander, in "Jew. Quart. Rev." v. 196 *et seq.*).

Principles of the Calendar.

(4) The molad of Tishri of the first year was on Sunday, 204 parts after 11 P.M. (5) A common year, consisting of twelve months, has 353, 354, or 355 days; a leap-year, consisting of thirteen months, has 383, 384, or 385 days. The effect of these variations is the variation in the length of the months of Ḥeshwan and Kislew, which have 29 and 30 days, 30 and 30 days, or 29 and 29 days; the years are accordingly called "kesidrah" (regular), "shelemah" (perfect), or "ḥaserah" (defective), and marked by the Hebrew letters כ, ש, and ח. These variations for the common year and for the leap-year, together with the changes as regards the day of the week on which the first of Tishri falls, are; בש, בח גכ הכ, הש זש and זח for the common year, and בש בח גכ הח הש זש and זח for the leap-year; the letters ב, ג, ה, ז, denoting Monday, Tuesday, Thursday, and Saturday.

(6) In the cycle ("maḥzor") of nineteen years the third, sixth, eighth, eleventh, fourteenth, seventeenth, and nineteenth are leap-years; the rest are common years. Nineteen lunar years with seven extra months equal nineteen solar years minus one hour, four hundred and eighty-five parts. Some count the seven leap-years of the cycle differently, because they begin the first year of the first cycle differently. The solar year in the Jewish calendar, according to Samuel of Nehardea, is the same as the

Julian year. According to R. Ada, the son of Ahabah (date unknown), it is $12\frac{7}{19}$ lunar months = 365 days, 5 hours, $997\frac{12}{19}$ parts (see Maimonides, "Hil. Ḳiddush ha-Ḥodesh," ix., x.). The year is divided into four equal seasons; and the beginning of a season is called in Hebrew "teḳufah." One teḳufah is distant from the next 91 days, 7½ hours, according to Samuel, whose theory has been adopted for ritual purposes.

As the Christian calendar is based on the solar year, and the Jewish calendar has only years of twelve or thirteen lunar months, the problem arises how to find for a given Jewish date the corresponding Christian date. The solution is as follows:

Given: Sept. 24, 3 A.M., the first teḳufah of Tishri, being 12 days, 20 hours, 204 parts before the first molad of Tishri. What is the Christian date of the molad of Tishri 5661 (1901)?

Solution: 5660 = 297 cycles (of 19 years) and 17 years. The excess of 1 solar year over 1 lunar year = 10 days, 21 hours, 204 parts; of 19 solar years over 1 cycle = 1 hour, 485 parts.

In 297 cycles the excess = 17 days, 22 hours, 405 parts; in 17 years the excess = 17 days, 19 hours, 870 parts.

Deduct 12 days, 20 hours, 204 parts from the sum, and 12 days, 21 hours, 1071 parts remain as the excess of 5660 solar years over 5660 lunar years; *i.e.*, the molad Tishri of 5661 is 12 days, 21 hours, 1071 parts before Sept. 24, 3 A.M. = Sept. 11, ½ min. after 5 A.M. (old style), or Sept. 24, 5 hours, ½ min. (new style).

The date of the first of Tishri is not necessarily that of the molad Tishri. According to rule 3, it depends on the day of the week on which the molad takes place, whether the first of Tishri is the day of the molad, or one or two days later. In order to find the day of the week for the molad Tishri, proceed in the above example as follows:

The first molad Tishri was 2 days, 5 hours, 204 parts. The excess over complete weeks is in a common year 4 days, 8 hours, 876 parts; in a leap-year, 5 days, 21 hours, 589 parts: in a cycle of 19 years, 2 days, 16 hours, 595 parts; in 297 cycles, 11 common years, and 6 leap-years, it amounts to 0 days, 5 hours, 885 parts; added to the initial 2 days, 5 hours, 204 parts, the total is 2 days, 11 hours, 9 parts; *i.e.* the molad Tishri 5561 is on Monday, ½ min. after 5 A.M., and the first of Tishri is on the same day, Monday, Sept. 24.

Gauss ("Monatliche Correspondenz von Freih. v. Zach," v. 435) gives the following formula for finding the Christian date for the fifteenth of Nisan of the year A A.M.:

$12\,A + 17 = 19\,D + a$; $A = 4\,E + b$; M is an integral and m is a fraction; $M + m = 32.0440932 + 1.5542418\,a + 0.25\,b - 0.003177794\,A$. Explanation of the equation: Let M, m, a, b, c, have the same signification as above, T = initial date of Nisan 1 (the day of the molad) of the year 1 A.M. with the hours and ḥalakim of the molad Tishri of the year 2 (*i.e.* March 33, 583); $K - \frac{\text{lunar month}}{19}$ $L = \frac{1\text{ h. }485\text{ h}}{19}$. Then $M + m = T - (A - 1)$ $7K - (A - 1)\,L + (6 - 1)\,0.25 = T - (A - 1)\ (19 - 12)\,K -$ etc. $= T + K\,(12\,A - 12) -$ etc. $= T + K\,(12\,A - 2) - 10\,K -$ etc. $= T + K\,(12\,A + 17) - 10\,K -$ etc. $= T - 10\,K + K\,(12\,A + 17) - AL + L + 0.25\,b - 0.25$. $T - 10\,K + L + 14 = 32.0440932$; and $- 0.25$ is disregarded in order to increase the value of M by 6 hours and thus to exclude Molad Zaḳen; and addition or subtraction of a multiple of 19 does not alter the result.

Further, $M + 3\,A + 5\,b + 5 = 7\,F + c$. If $c = 2, 4$, or 6, the fifteenth of Nisan is on the $(M + 1)$th day of March; if $c = 1$, $a > 6$, $m \overset{=}{>} 0.63287037$, – on the $(M + 2)$th of March, and if $c = o$, $a > 11$, and $m \underset{=}{>} 0.89772376$ Nisan 15 is on the $(M + 1)$th of March; in all other cases, on the Mth of March.

This formula is intended to determine on which day of the week the Mth of March falls: the excess of days over complete weeks is 1 day in ordinary years, 2 days in leap-years, or 5 days in every 4 years. The first of March of the year 1 was on Saturday; the excess of days over complete weeks from the first of March of the year 1 to the Mth of March of the year A is $= 6 + M + \frac{5}{4}(A - b) + (b - 1)$ $= M + \frac{12}{4}(A - b) + 5 + b$ (because addition or subtraction of a multiple of 7 does not alter the result) $= M + 3\,A - 2b + 5 = M + 3\,A + 5\,b + 5$.

Relation of Jewish and Christian Dates.

In order to facilitate the comparison of the two systems of dates, tables are appended which show the date for each day in 1,000 years from the year 1001 to 2000. In Table I. the first column gives the years of the common era; the second column, those of the era of the creation (according to Jewish tradition, the asterisks indicating the leap-years); in the third columns the letters "r," "p," and "d" indicate whether the Hebrew year is regular, perfect, or defective; the next column has the figures 2, 3, 5, 7 to indicate whether the first of Tishri is on Monday, Tuesday, Thursday, or Saturday. The last column gives the difference between the standard dates of Table II. and the actual dates of the year in question: *e.g.*, 1110 C.E. or 4870* A.M. p. 7—7 (*i.e.*, the year 1110 C.E.) corresponds to 4870 A.M., which is a leap-year having 13 months, and perfect, having 385 days, the first of Tishri, Saturday, and 7 days before Sept. 4.

This difference has to be added to the Christian date if that is sought from the given Jewish date, and deducted from the Jewish date if the latter is sought from the given Christian date. As regards the Jewish date between Nisan and Elul of the year x, or the Christian date between March and December, use the difference given for x + 1; otherwise that for the year x.

Table II. contains the Jewish and Christian dates of one year, beginning first of Nisan, and March 11; and having Tishri 1 on Sept. 4. As the Christian year is longer than the Jewish common year, the table has been extended to the end of Nisan of the succeeding year. From Kislew onward there are three lines for each month, marked "r," "p," and "d," and according as the year is regular, perfect, or defective, the one or the other line is to be used. In We-Adar "r," "p," and "d" have each two lines, marked respectively "c" and "l," the one for the common Christian year, the second for the Christian leap-year. The first column of dates contains the dates for the first days of Rosh-ḥodesh of those months which have two days Rosh-ḥodesh. The difference between the dates of any particular year and this standard table (Table I, 5th column) applies to the months from Tishri onward in that year, and also to the months from Nisan to Elul of the previous year (and from January to March of that year, and from March to December of the previous year). The dates which fall on the same day of the week as the first of Tishri are printed in heavier figures. The following two examples illustrate the use of the tables:

Maimonides was born Nisan 14, 4895; find the corresponding Christian date. In Table I. is found 4895 A.M. corresponds to 1135 C.E.; and that the number of difference for 4896 (which also applies to the last six months of 4895) is 6. In Table II. the fourteenth of Nisan corresponds to March 24; add 6, and the result is: March 30. 1135. The first of Tishri, according to Table I., was on Tuesday, and the fourteenth of Nisan, occupying the fifth place from the date in heavy figures, was on Saturday.

What Hebrew date corresponds to Aug. 15, 1520? Table I.: 1521 = 5281 הכ 9. Table II.: Aug. 15 = Elul 10; Deduct 9. Hence: Aug. 15, 1520 = Elul 1, 5280.

According to Table I., the first of Tishri is on Thursday, and in Table II. Elul 1 closely precedes the date printed in heavier figures. Elul 1, 5280, was on a Wednesday.

Cycle or Maḥzor.

There are two cycles: the large cycle ("maḥzor gadol") of twenty-eight solar years, and the small cycle of nineteen lunar years. In twenty-eight solar years the teḳufot (according to Samuel) complete their course of variations as regards the hour of the day, and the day of the week; and New-Year's Day (Jan. 1) follows exactly the same order every twenty-eight years as regards the day of the week. The cycle of nineteen lunar years (the cycle of Meton) determines the sequence of common years and leap-years in the Jewish calendar, because nineteen lunar years with seven extra months of seven leap-years approximately equal nineteen solar years.

Thirteen small cycles, = 247 years, form the cycle ("'iggul") of Rabbi Naḥshon. This cycle has almost an exact number of weeks, only 905 parts being wanted to complete the last week. The first of Tishri after 247 years falls on the same day of the week for a long period, but by no means forever, on account of the deficiency of 905 parts; nor does the same order of the years as regards their characteristics repeat itself after 247 years.

The cycles of "shemiṭṭah" (seven years), of year of release, and of "yobel" (fifty years = jubilee), do not affect the Jewish calendar.

The following is a list of the dates of Jewish festivals and fasts:

Nisan	14.	Eve of Passover.	
	15.	Passover, first day.	
	16.	" second day.	
	17-20.	Ḥol ha-mo'ed, or middle days.	
	21.	Passover, seventh day.	
	22.	" eighth day.	
Iyyar	18.	Lag ba-'omer, or thirty-third of the 'Omer.	
Siwan	6.	Shabu'ot or Pentecost, first day.	
	7.	" " " second day.	
Tammuz	17.	Fast of Tammuz.	
Ab	9.	" " Ab.	
Tishri	1.	New Year, first day.	
	2.	" " second day.	
	3.	Fast of Gedaliah.	
	10.	Day of Atonement.	
	15.	Tabernacles, first day.	
	16.	" second day.	
	17-21.	Ḥol ha-mo'ed, or middle days.	
	21.	Hoshana rabba.	
	22.	Eighth-day Festival.	
	23.	Rejoicing of the Law.	
Kislew	25.	Ḥanukkah, first day.	
Ṭebet	10.	Fast of Ṭebet.	
Shebaṭ	15.	New Year for trees.	
Adar	13.	Fast of Esther	in common years.
	14.	Purim	
	15.	Shushan Purim	
Adar	14-15.	Purim Ḳaṭan	in leap-years.
We-Adar	13.	Fast of Esther	
	14.	Purim	
	15.	Shushan Purim

TABLE I.

Showing Dates for Each Day in a Thousand Years from the Year 4761 (1001 C.E.) to 5760 (2000 C.E.).

Note.—The letters "r," "p," "d," in the third column indicate whether the Jewish year is regular, perfect, or defective. The figures 2, 3, 5, 7, in column 4, indicate the day of the week (Monday, Tuesday, Thursday, or Saturday) on which Tishri 1 falls.

CALF, GOLDEN.—Biblical Data: A portable image overlaid with gold, made by Aaron at Mount Sinai (Ex. xxxii.). As the text stands, it narrates how Moses had gone up into the mountain to receive the Ten Words, and remained forty days. When the people found his return delayed they asked Aaron to make for them gods which shouldgo before them. At Aaron's request they took off the gold rings worn by the women and children in the camp. These he took and "fashioned it with a graving tool and made it a molten calf." An altar was built before it and a feast to Yhwh celebrated.

Meantime Moses in the mountain had been warned by Yhwh of the defection of the people, and he now came down. Much surprised and angered when he found what was actually going on, he cast the tables of the Ten Words to the ground and broke them. He took the calf—which seems to have really been of wood overlaid with gold—and burned it till the wood was charred, and then pulverized the gold and strewed it on the water of the brook they drank from. Moses then demanded of Aaron an explanation of his conduct, and received one truly Oriental in character (see Ex. xxxii. 22 to 24). Then, seeing that the people were "broken loose," Moses called for all on the side of Yhwh to come and stand by him, whereupon all the sons of Levi gathered themselves together, and at the command of Moses went throughout the camp and slew 3,000 men—apparently all those that had been leaders in the image-worship. At Moses' command these avengers then gathered to receive the blessing of Yhwh.

On the morrow Moses assembled the people, and told them that they had grievously sinned, but that possibly he could atone for them. He then prayed that he might himself be punished and the sin of the people forgiven, and was told by Yhwh to go on and lead the people forward; that those who had sinned should bear their own sin, and that one day He would punish them.

J. JR. G. A. B.

——**In Rabbinical Literature:** Next to the fall of man, the worship of the golden calf is, in rabbinical theology, regarded as the sin fraught with the direst consequences to the people of Israel. "There is not a misfortune that Israel has suffered which is not partly a retribution for the sin of the calf" (Sanh. 102a). The very seriousness of the offense leads the Rabbis to find circumstances extenuating the guilt of the people, and to apologize for Aaron's part in the disgraceful affair. The initiative was taken not by the Israelites, but by the Egyptians who had joined them at the time of the Exodus (Ex. xii. 38), and who were the source of a great deal of trouble to Moses and the Israelites (Num. xi. 4); for the Egyptians, when the time fixed for Moses' descent from the mountain had expired, came in a body—forty thousand of them, accompanied by two Egyptian magicians, Yanos and Yambros, the same who imitated Moses in producing the signs and the plagues in Egypt—to Aaron, and told him that it was the sixth hour of the fortieth day since Moses left, the hour he named for his return (a play upon the word בֹּשֵׁשׁ, Ex. xxxii. 1= בָּאוּ שֵׁשׁ, "the six [hours] have come"), and that Moses had not yet returned: he would never come. Satan took advantage of the opportunity, and brought gloom and confusion into the world to alarm the people. Then he told them Moses was dead, as the sixth hour had come and he had not arrived. Seeing he was not believed, he showed them a bed in the mountain with Moses in it. This convinced them that Moses was really dead; and they demanded that Aaron make them a god (Shab. 89a; Tan., Ki Tissa, 19). Hereupon Hur stepped in and rebuked them for their ingratitude to the God who had performed so many miracles for them. He was at once put to death, and Aaron was threatened with the same fate. The latter saw that he must accede to their request, but he sought a device whereby the execution of their demand would either be made impossible or at least be delayed until Moses came; for he was not ensnared by the wiles of Satan. So he ordered them to bring the golden ornaments of their wives; knowing that the women would be more grateful to God, and would refuse to part with their jewels for idolatrous purposes. His expectation was realized. Their jewels could not be obtained; and the men had to give their own. Aaron had no choice but to put the gold into the fire. A calf came out alive and skipping!

One explanation is that this was due to the magical manipulation of the Egyptian sorcerers. Another is more ingenious: On the night of the Exodus, Moses searched all Egypt for Joseph's remains, but could not find them. At last Serah, the daughter of Asher, pointed out to him the place in the Nile where the Egyptians had sunk an iron chest containing Joseph's bones (Tan., *l.c.*; Ex. R. xli. 7). Moses took a splinter, wrote on it the words עלה שור ("Come up, ox"; Joseph being compared to an ox; see Deut. xxxiii. 17), and threw it into the water, whereupon the chest rose to the surface (Tan., Beshallaḥ, ii.; Tosef., Soṭah, iv. 7; Soṭah 13a). This splinter was secured by Micah, and when Aaron cast the gold into the fire, he sent the splinter after the gold, and as a result a calf came out (see MICAH, THE IMAGE OF).

Another reason given for this aberration of the people is that when God came down on Mount Sinai to give the Law, he appeared in the chariot with the four beasts of Ezekiel. These the people saw; and it was one of them, the ox (Ezek. i. 10), that they made an image of and worshiped. This was one of the pleas Moses made to palliate the offense of the people (Ex. R. xliii. 8).

The tribe of Levi did not join in the worship of the calf (Yoma 66b). If all the people had abstained from worshiping it, the tables of stone would not have been broken, and as a result the Law would never have been forgotten in Israel, and no nation could have had any power over the Hebrews ('Er. 54a).

The mysterious way in which Aaron described the origin of the golden calf gave rise to superstitious beliefs; and it was ordained by the Rabbis that this part of the account of the golden calf (Ex. xxxii. 21-25, 35) should be read at public worship in the original, but should not be translated by the "meturgeman" (Meg. iv. 10; Tosef. Meg. iv. [iii.] 36; Yer. *ib.* iv. 75c; Bab. *ib.* 25b).

J. SR. I. HU.

——**In Mohammedan Literature:** The story of the golden calf is mentioned in the Koran (suras xx. 88 *et seq.*, vii. 149 *et seq.*) as follows: "Thereupon [after he had received the Law on the mountain] Moses returned to his people, angry and afflicted, and said: ' . . . Did the time [of my absence] seem too long to you, or did you desire that wrath from your Lord should fall upon you because you have broken the promise given to me?' They answered: 'We have not broken our promise given to you of our own authority, but we were made to bring loads of the ornaments of the people, and we cast them [into the fire], and Al-Samiri did likewise.' And he brought forth unto them a living, bellowing calf. And they said: 'This is your God and the God of Moses, but he hath forgotten him.' . . . Moses said: 'O Aaron, what hindered you, when you saw them do wrong, from following me [to the mountain]; have you been disobedient to my order?' Aaron answered: 'Oh, son of my mother, do not lay hold of my beard or my head—behold the people made me weak and almost murdered me.' And Moses said: 'How about you, O Samiri?' He answered: 'I saw what they did not see, and I took a handful [of dust] from the footsteps of the messenger and cast it. Thus did my mind guide me.' Moses said: 'Go away, and this shall be your punishment in life that you say [to every one you meet]: "Touch me not"; and a threat is awaiting you which you shall not escape. And see, your idol which you have worshiped, we shall burn and throw the ashes into the sea'" (compare also suras ii. 48-51, 86, 87; iv. 152).

In the Koran.

When Moses departed for Sinai he made Aaron his deputy. During the absence of Moses, Aaron reminded the people that the ornaments which they had were stolen booty, and told them that they must bury them in a common hole until Moses should decide what was to be done with them. This they did. Samiri threw a clod of the earth, which the horse of the messenger Gabriel had thrown up, on the spot where they had hidden their ornaments; and thereupon God brought forth the calf (Tabari).

This Arabic legend, in describing the fate of Samiri as that of a man compelled to wander, barred from all intercourse with his fellow-men, whom he himself is bound to warn by his pitiful cry, "Touch me not," to come not near him, seems to be one of the earliest forms into which was cast the later story of the Wandering Jew current among Christians. Yet on the whole this assumption is inadmissible. Samiri according to Geiger, is identical with Samael. According to the Arabic commentators, however, and, lately, according to Fränkel ("Z. D. M. G." lvi. 73, with especial reference to Hosea viii. 5), Samiri is indebted for his name to the fact that he belonged to the Samaritan sect. Mohammed knew, perhaps, how much this sect was hated, and (according to the report of an old but evidently lost Midrash) made the seducer a Samaritan in spite of all chronology. So Baidawi (also Palmer's translation of this sura) holds him to have been "the Samaritan." This accounts at once both for the rôle here ascribed to him and the fate meted out to him. Mohammed carried in his mind many rabbinical conceits, but in a much confused form. He had an indistinct impression of the rabbinical prejudices against the Samaritans, among which the fact that they worshiped an animal idol and poured out libations to it on their holy mountain was not the least (Yer. 'Ab. Zarah v. 44d, at foot; Ḥul. 6a). But the fact that the idol imputed to the Samaritans was a dove and not a calf became confused in his recollection of hearsay rabbinical stories. It was enough for him to know that the Samaritans were looked upon by the Jews as idolaters or even worse (Yer. Ta'anit iv. 66b; Yer. M. Ḳ. iii. 83b, middle), to make the Samaritan the arch-seducer, and artificer, by "magic," of the idol. That the Jews would hold no intercourse with the Samaritans may also have been among the disjointed fragments of Mohammed's Biblical and rabbinical lore. Hence under the decree his "Samaritan" was condemned to wander and never to permit another to defile himself by close contact.

Samiri's Identity with Samael.

That not Aaron, but another, was the real culprit in the making of the calf is also reported in a rabbinical account (Sanh. 102, 2), according to which Micah (Judges xvii. *et seq.*) was its maker. The threatening of Aaron and the bleating of the calf are likewise founded on rabbinical sources (Sanh. 5; Pirḳe R. El. 45).

Before the expulsion of Samiri, Moses (in accordance with Ex. xxxii. 20 *et seq.*) ordered the calf to be reduced to dust and the powder mixed with their drinking-water (sura ii. 87). When they drank the water it caused them great pain, and they called upon Moses for help. Then Moses told them to slay one another (sura ii. 51). Thus 70,000 were killed. The Lord sent an intense darkness to prevent their seeing one another, so that recognition of the corpses should not induce them to forbear ("jalal al-din"). Finally, the crying of the women and children moved the heart of Moses, who prayed to God to stop the murdering, and his prayer was answered immediately.

E. G. H. M. Sc.—E. G. H.

——**Critical View:** As the Exodus narrative stands, it is clearly composite. For example, in verse 7 Moses is warned that the people have sinned; and in verses 9 to 12 he seems to understand clearly what their sin is, and yet in verses 16 to 19 he is greatly surprised at what has occurred. Again, verses 7 to 12 represent Moses as praying for the sinners before he came down from the mount, while verses 30 to 34 represent him as praying practically the same prayer the day after the destruction of the image was over. Palpably the two are of different authorship. Again, verses 25 to 29 describe the vengeance that was executed on the sinners, while verse 34 regards it as still future. Critics therefore regard the narrative as made up of strata from two documents (Jahvist and Elohist), though they do not altogether agree as to the points of division. The main stratum of the story is, however, thought to come from the Ephraimitish writer (Elohist), though there are a sufficient number of points in the story taken from the Jahvist to show that his work also contained the narrative.

The purpose of the original story seems to have been, as Budde thinks, to account for the selection of the tribe of Levi for the priesthood. A great crisis in the worship had arisen in which the Levites had stood for Yhwh, and punished all that opposed themselves, so that they were consecrated to the service of the priesthood (see Levi and the literature cited below). Many critics see in it a polemic against the calf-worship of Beth-el and Dan, and no doubt an Ephraimitish writer of the prophetic circles of the time of Hosea would shape the tale with a view to the religious reforms in which he was interested. It is probable that at this time there was introduced into the story the view that the offense punished by the Levites was the making of a calf; but it also seems likely that there underlies the present narrative a much earlier form of the tale, a form that pictured some other crisis in which the Levites distinguished themselves and thus were elected as the priestly tribe.

J. JR. G. A. B.

CALF-WORSHIP—Critical View: Among the Hebrews, as among the other agricultural Semites, the bull was associated with deity in a sacred character (see Ox). The form in which this thought found expression in Israel was in their representation of Yhwh by an image of an ox or bull made of gold (compare I Kings xii. 28). In consequence of the costliness of the metal, the images were small, and from their size, rather than from the age of the animal regarded sacred, were called "calves." In the earlier time the images were carved out of wood (compare Moore, "Judges," pp. 375 *et seq.*); but with the increase of wealth it became the custom to make them of gold. These golden images were cast in molds, and consequently were called "molten images." They seem to have been in use in the old nomadic times, since they are mentioned in the two

Covenant Documents (Ex. xxxiv. 17; xx. 23), whereas the older practise of making images of wood persisted more as a private custom. In the Decalogue (Deut. v. 8.; Ex. xx. 4) the prohibition does not specify molten gods and those of silver and gold, but extends to all images representing Yhwh.

It has been often held (for example, by Renan and Maspero) that this calf-worship was derived from Egypt; but that view is now generally abandoned. The Egyptians worshiped the living animal, and not an image; and the prevalence of bull-worship among agricultural Semites sufficiently accounts for the origin. Among the Hebrews, the bull was a symbol of strength (compare Num. xxiii. 22, xxiv. 7).

Ex. xxxii. attributes the making of a golden calf to Aaron at Mount Sinai (see Calf, Golden). The critics assert that this is hardly possible; since the bull is the symbol of divinity only among settled agriculturists, and not among nomads such as the Israelites then were. The narrative in question is declared by them to be in reality a prophetic polemic against the calves of Jeroboam.

Jeroboam, in making the sanctuaries of Beth-el and Dan the recipients of his royal patronage, placed in them images of Yhwh made of gold in this calf form, the fame of which went far and wide (compare I Kings xii. 23; II Kings x. 29; II Chron. xi. 14, 15). The Deuteronomic author of Kings attributes the origination of these representations of Yhwh to Jeroboam, but this some critics question. Jeroboam, it has been assumed, simply revived an old custom; and it is probable that the silver image of Yhwh in the Temple of Micah (Judges xvii., xviii.) was in this form. Similar images were perhaps in the Temple at Gilgal (Amos v. 4 *et seq.*; Hos. iv. 15, ix. 15, xii. 11 [12]; compare G. A. Smith, "Book of Twelve Prophets," i. 37), and at Samaria (Hos. viii. 5), though Wellhausen and Nowack are of the opinion that "Samaria" is in this latter passage used for the whole kingdom and not for the city.

The prophets of the northern kingdom inveighed continually against the rites connected with these calf-shrines; and with the overthrow of that kingdom they disappear. There are no traces of this form of calf-worship in the southern kingdom; though the twelve oxen on which rested the great laver in the Temple of Solomon (I Kings vii. 25; II Kings xvi. 17; Jer. lii. 20) are regarded as evidence that there was some sacred character attached to the bull.

J. Jr. G. A. B.

CALIFORNIA: One of the United States of America on the Pacific coast. There exists no authenticated record of the activities of Jews in California prior to 1849. During that year, attracted by the discoveries of gold, large numbers of them ventured into the new El Dorado, scattering over the entire area of the gold-fields. (A partial list of the Jewish pioneers of California is given in Markens, "The Hebrews in America," pp. 336, 337; but the list needs revision.) The constituent elements of the nascent Jewish communities came from every part of the world, including Australia, and some of them from the east and south of the United States. Divine services were held for the first time in San Francisco on Kippur Day, 1849, in a tent owned by Louis Franklin, and were attended by about ten persons (Leeser's "Occident," vii. 480; "Chronicles of Emanu-El," p. 16). The organization of the Jewish community was completed between July and October of the following year (see San Francisco). While the San Francisco community is the oldest as regards the date or dates of its organization, it received, after the collapse of many of the mining ventures, large accessions from the Jewish settlers in the gold regions. Many Jews had found their way to the mines, notably along the American river; and in Placer, Amador, and Yuba counties — then the centers of the gold excitement—and at every prominent point of settlement a Jewish "mining" congregation or benevolent society began to flourish. As most of these institutions have now passed out of existence, it may be well to preserve a partial record of them in this permanent form. For a complete list see "Emanu-El," Dec. 21, 1900, xi., No. 6.

Early Communities.

Sonora: Hebrew Benevolent Society organized in 1852. A burial-ground is still cared for by the few families resident in the village.

Stockton: Congregation Re'im Ahubim organized 1853 from a previously existing society (1851) for the care of the Jewish insane. In 1852 there were three Jewish inmates in the State Asylum for the Care of the Insane at this place.

Los Angeles: In 1854 an Israelite named Carvalho, of Sephardic extraction, a member of General Fremont's expedition, settled in Los Angeles and suggested the founding of a benevolent society. Religious services were held as early as 1852 (see Los Angeles).

Nevada City: The Nevada Hebrew Society was organized in 1855. Objects: "To hold religious services, maintain a burying-ground for members and others, and assist the needy with pecuniary aid." In 1857 the society numbered twenty members.

Jackson: Congregation organized for the autumn holidays of 1856. At a meeting held April 18, 1857, it was decided to build a synagogue, the first erected in the mining districts. This synagogue still exists, but, owing to the migration of the members of the congregation, is subverted to secular purposes.

Fiddletown: Organization in 1857 of a Jewish society "for the furtherance of religious and humanitarian interests."

Jesu Maria: A mining camp in Amador county, where services were held by Jewish miners in 1853. In 1857 a society for "the maintenance of religious services and the care of the sick and poor" was organized; but the records were not kept, and details are not obtainable.

Marysville: Congregation B'nai B'rith (defunct) organized Nov. 8, 1857, a Hebrew benevolent society having existed since 1852. In Aug., 1860, the Jewish population numbered 23 families, exclusive of 105 bachelors. At the present date the town contains four Jewish families.

Sacramento: Congregation organized 1857 out of previously existing societies, which had flourished since 1851 (see SACRAMENTO).

Grass Valley: A Jewish society organized Sept. 8, 1856, and a congregation for the autumn holidays of 1857.

Shasta: The Hebrew Indigent Sick and Burial Society organized March 1, 1857.

Folsom: Organization of the Hebrew Benevolent Society in 1859.

There existed Jewish burial-places which were owned by these extinct societies in Sonora, Oroville, Nevada City, Folsom, and Grass Valley; and these are piously cared for by the descendants of the settlers or families subsequently arrived. After 1870 most of the organizations mentioned became defunct, the population having either shifted to the new metropolitan centers or returned to the East. Out of a few of them small B'nai B'rith lodges were organized and incorporated with District No. 4 of that order. Congregations remain at the following points, besides the smaller ones given below: San Francisco (6), Los Angeles (2), Sacramento (1), Stockton (2), Oakland (2), San José (1), San Diego (1); total, 15.

State Activity.

The Jews were prominent in the organization of the new state of California. So far as the record has been completed mention can be made of Solomon HEYDENFELDT, chief justice of the supreme court of California (1852–57); Henry A. Lyons, one of the first three justices of the same court; Washington Bartlett, alcalde of San Francisco in 1849, and governor of California in 1887; Elkan Heydenfeldt, brother of Solomon, and Isaac Cardoza, both members of the California legislature of 1852; Samuel Marx, United States appraiser of the port of San Francisco; Joseph Shannon, county treasurer of San Francisco in 1851; A. C. Labatt, an alderman of San Francisco in the same year; besides a large number of business men. Of the latter there may be mentioned the brothers Seligman, William, Henry, Jesse, and James, of San Francisco, afterward eminent in finance; Louis Sloss and Lewis Gerstle, of Sacramento, afterward founders of the Alaska Commercial Company; and of Los Angeles the Hellman and Newmark families, the former now leading financiers, and the latter still one of the representative Jewish pioneer families of southern California.

During the mining period the commercial skill of the Hebrew traders developed relations with the East and with Europe (Soulé, "Annals of San Francisco"). The financial transactions of the early gold period are represented in part by the names of Hebrews like Benjamin Davidson, agent of the Rothschilds, Albert Priest of Rhode Island, Albert Dyer of Baltimore, and the three brothers Lazard, now composing the international banking house of Lazard Frères (Paris, London, and San Francisco); besides the Seligmans (see above), the Glaziers, and the Wormsers, all now in New York, but industrial and financial pioneers of California.

Pioneer Work in Alaska.

Out of the slenderest beginnings—for most of these youths were not overburdened with means—came forth a number of the proudest business enterprises of the coast and of the United States. Moritz FRIEDLANDER, about 1870, was one of the grain kings of the country; Michael REESE, one of the extensive realty brokers; and Adolph SUTRO, an engineer, whose famous exploitation of the Comstock lodes by means of the Sutro tunnel has become an interesting chapter in the mining history of the United States. While many of the early commercial firms have passed away, others remain as monuments of pioneer industry and foresight, strong financial concerns worthily maintained by the second and third generations. The London, Paris, and American Bank (Sigmund Greenebaum, Richard Altschul) is still the agency of its founders, Lazard Frères; the Anglo-Californian Bank (Philip N. Lilienthal, Ignatz Steinhart) is the successor of the Seligman interests; and the Nevada Bank, the Union Trust Company, and the Farmers and Merchants' Bank of Los Angeles (Isaiah W. Hellman, Herman W. Hellman, I. W. Hellman, Jr.) are three institutions representing a number of financial interests of national magnitude and importance. The great coal-fields of the Northwest and of Canada owe much to the exploitation of John Rosenfeld; and the seal-fisheries of Alaska, as well as the mineral and other resources of that territory, were developed by Jewish successors of the Hudson Bay Company, the Alaska Commercial Company, and its more modern competitors, the North American Commercial Company (Herman Liebes, Isaac Liebes) and Blum & Roth (Leon Blum and Daniel Roth).

The Jews of California are similarly prominent in the professions. In medicine and surgery the leading names are: Hirschfelder (internal medicine), one of the physicians to the late President McKinley; Rosenstirn (surgery and gynecology); Regensburger (skin diseases); Newmark (nervous diseases); Abrams (lung diseases); Barkan and Arnold (eye and ear). Among the younger physicians of California of Jewish extraction Joseph Erlanger, now a professor of physiological chemistry at Johns Hopkins University, Baltimore, may be prominently mentioned.

In law the names of Charles L. Ackerman, Jacob B. Reinstein, Jesse W. Lilienthal, and Marcus Rosenthal represent a class of attorneys remarkable for legal acumen and capacity. In the arts Ernest Peixotto, scion of an illustrious family, has become an eminent representative of his people, and in economics his sister, Dr. Jessica Blanche Peixotto, holds an established position.

The universities and colleges have their quota of Jewish scholars. Among them are the following:

In the University of California, College of Agriculture, Jaffa; Department of Mathematics, Wilzcynski; German faculty, Putzker, Senger; Semitic Department, Voorsanger, Margolis; medical faculty, D'Ancona, Levison; board of regents, Hellman, Reinstein. In the faculty of Cooper Medical College are Hirschfelder, Barkan, and Harris. In music, Jacob H. Roswald, Cantor Edward J. Stark, Henry Heyman, Landsberger, Sigmund Beel, and Louis Lisser (professor of music at Mills's Seminary) represent abilities recognized throughout the West. Louis Sloss until his recent demise was treasurer of the University of California, being succeeded by Lewis Gerstle; Julius Jacobs is the subtreasurer of the United States at San Francisco, and Herman Silver was director of the United States Mint at Denver, Col.

The bench of California now has Max C. Sloss, one of the youngest, but acknowledged to be one of the most learned, of the judges of the superior court of San Francisco. Julius Kahn is now member of Congress from the Fourth California District (San Francisco).

In journalism, M. H. De Young, proprietor of the San Francisco "Chronicle," is well known; and in literature the native authoress, Emma WOLF, needs but to be mentioned. In San Francisco alone more than one hundred Jewish women are enrolled as public-school teachers ("Directory of the Department of Public Schools of the City and County of San Francisco," June 1, 1902), and there are several in the high school faculties. The name of Leon Sloss may be added as one of the regents of Stanford University.

This rapid review of the present commercial and professional status of the Jews of California is also fairly indicative of their social standing and of the excellent character of their communal institutions. In 1901 the Jewish population of California did not exceed 28,000, of which San Francisco alone numbered 17,500. This comparatively small body of people is competently organized; every aspect of communal work, including the religious, having strong representation. The following table, though by no means complete, furnishes an indication of the organized strength of the Jews of California:

JEWISH ORGANIZATIONS OF CALIFORNIA, INCLUDING CONGREGATIONS.

Californian Jews in War.

The outbreak of the Spanish-American war (April 22, 1898) revealed the patriotic spirit of the Jews of California to a marked degree. The first volunteer regiment ordered to the Philippines was the First California (James F. Smith, colonel). This regiment, of nearly 1,200 officers and men, contained at the time of its departure fully *eight per cent* of Jewish volunteers, or nearly one hundred men, mostly natives of San Francisco. At the battle of Cavite, fought shortly after the arrival of the regiment, the first to fall was Sergeant Morris Justh (First California). The incomplete state of preparation of the First California, and the general desire to equip the regiment in a manner befitting the dignity of the state, resulted in the organization of the California Red Cross Society, of which Jacob Voorsanger was one of the founders and the first vice-president, and Sarah Sloss and Betty Lowenberg members of the board. Subsequently, for the comfort and accommodation of the army in the Philippines, the Manila Library Association was organized, of which Jacob Voorsanger was the first president and Betty Lowenberg the distributing manager. The latter still retains her position. The First California returned from the war with distinction, bringing back one of its Jewish members (Percy L. Badt) as a commissioned officer. In the California Artillery and the Sixth California, Jewish commissioned officers likewise rendered valuable service in the mobilization of their respective commands, among them Emanuel M. Heller, Eugene Baer, and Morris Greenwald. In the state militia of California, Brig.-Gen. Hyman P. Bush is a field-officer with more than twenty years of continuous service.

A. J. V.

CALIFS: 1. The attitude of the first Mohammedan rulers toward their Jewish subjects was as much regulated by circumstances as had been that of Mohammed himself. The latter, having subdued the Jewish tribes of Arabia and located them in the northern borders of the peninsula, permitted them to remain on condition that they gave half their harvest to the Moslem authorities. This was a policy of utility pure and simple, as the Jewish farmers were needed to help feed the Moslem armies. The same policy was upheld during the reign of Abu Bekr, and his successor Omar was guided by two principles, viz., to preserve the mobility of his army by not allowing them to turn agriculturists, and to banish all non-conformists from Arabia proper. This course of action resulted in the tolerance of non-Moslem settlers in the adjoining provinces, while imposts and land-taxes laid upon them secured the revenues of these conquered territories for the benefit of the commonwealth.

Omar wrought another and more important change in the fortunes of his Jewish subjects. He transplanted them to Kufa, a town he had founded in the year 15 of the Hegira, in 'Iraḳ, the ancient Babylon. Apart from the imposts laid upon them, they were obliged to wear a special garb to distinguish them from the Faithful, and were further bound to grant three days' hospitality to every traveling Moslem, to permit the latter to enter their places of worship, and to abstain from riding on horseback and from using expressions derogatory to Islam. A Moslem legend relates (Tabari, p. 2403) that at the conquest of Jerusalem Omar was greeted by a Jew as the friend of Elijah. This legend conveys the idea that the Jews of Palestine considered the Moslem victory a relief from the persecutions to which they had been exposed under the Byzantine régime. The Jews of Ḥoms also looked forward to the conquest of their city by the Moslems (Beladhori, ed. De Goeje, p. 137). During the siege of Cæsarea a Jew named Josef is said to have led the Arab warriors through a subterranean passage into the town which contained 100,000 of his coreligionists. According to another legend, the convert Ka'ab al-Aḥbar predicted Omar's death three days before the latter was assassinated (Ibn al-Athir, iii. 38; concerning Abdallah ibn Saba see i. 43).

Ommiads and Fatimites.

2. Ommiads: The government of the califs of the house of Omayya was guided by principles unlike those of their predecessors. Religious interests gave way to dynastic considerations. Civil war and party strife increased. The unity of the Moslem religion was broken by deep schisms. The Jews profited by these conditions in that the heads of the various political and religious factions had no leisure in which to disturb them. They not only became reconciled to the new order of things, but took part in the spiritual life of the Moslems and in the rise of literary activity among them. The physician Maserjaweih of Bassora translated (683) a medical work from Syriac into Arabic (Steinschneider, "Z. D. M. G." lii. 428 *et seq.*). In Irak the Jew Somair struck coins for the calif 'Abd al-Malik, but was put into prison and threatened with death by the tyrannical governor Hajjaj.

3. Abbassids: See JEWISH ENCYCLOPEDIA, i. 39.

4. Fatimite Califs in Egypt: With the conquest of Egypt many Jewish communities came under the Mohammedan rule. Amr b. al-Asi, the conqueror of the country, is said to have reported to Omar that he found in Alexandria alone 40,000 Jewish taxpayers (Calcashandi, tr. by Wüstenfeld, p. 44). Otherwise the Jews of Egypt, and of Africa in general, were not much in evidence for about two centuries. They seem to have enjoyed comparative peace under the various dynasties which strove to detach the North-African provinces from the commander of the Faithful. Ziadat Allah, the last Aghlabide prince, appointed the well-known Isaac Israeli (the Elder) his physician-in-ordinary. When the Aghlabide rule was overthrown, Isaac passed over into the service of the conqueror, Obaid Allah, founder of the Fatimite dynasty. This was about the time that Saadia was born in Fayum. Obaid Allah himself was said to have been the son of a Jewish widow in Salamiyya. His name was Said, and when his mother married the Shiitic chief Al-Ḥusain, his stepfather converted him to Islam. He was then declared to be the long-expected Imam, and, on coming to power, he assumed the name "Obaid Allah." This story is, however, supposed to have been concocted in order to discredit the descent of Obaid Allah from Fatima, the daughter of Mohammed.

Persecution by Al-Ḥakim.

Obaid Allah and his successors extended the Fatimite power at the expense of the califs of Bagdad. Al-'Aziz, who had made himself master of Syria, appointed the Jew Manasse and the Christian Isa his lieutenants (996). Through the treachery of several Moslem citizens they were, however, subsequently deposed and thrown into prison. This change of policy toward the Jews assumed a much graver character under the next calif, the famous Al-Ḥakim. This monarch, suddenly seized by a fanatic zeal for his cause, developed what is called the "religion of the Druses" (see De Sacy, "La Religion des Druses," p. 303). One of the consequences of his doctrine was excessive severity in the treatment of non-Moslems. In 1004 he ordered Jews and Christians to wear black turbans, and black marks on their yellow costumes, and when bathing they were obliged to wear around the neck a bell, or a block of wood weighing five pounds and resembling a calf's head. Jewish bathers were distinguished by wooden blocks. Jews were forbidden to ride on horseback, or to hire mules and asses from Moslem owners. They could use only wooden saddles, and were compelled to wear the bags on the right side. Moslems were forbidden to serve them or to allow them the use of their ships. Spies were employed to discover all transgressors of these restrictions. Many Jews adopted Islam, or pretended to do so, and many emigrated to foreign countries. Shortly before his death Al-Ḥakim relented, and permitted the Jews to return to their old faith.

About this time the brothers Abu Sa'd Ibrahim and Abu Naṣr Harun, sons of Abu Sahl of Tustar, were prominent merchants in Cairo. The calif Al-Ẓahir (1021–36) bought from Abu Sa'd a female slave, who became the mother of the next calif, Al-Mustanṣir. In consequence of this, Abu Sa'd's influence became very great. At his recommendation Al-Mustanṣir appointed Abu ul-Fatḥ Ṣadaḳah, a converted Jew, as vizier. Some time afterward the latter caused Abu Sa'd to be assassinated. Under the rule of Al-Amir (1101–30) a Jew named Abu al-Manja was appointed governor of the district of Damietta. At the request of the citizens he built a canal, which was long known under the name of "the canal of Abu al-Manja" (Makrizi, i. 487; Calcashandi, p. 27). The next calif, Al-Ḥafiẓ, appointed the Jew Abu Manṣur his physician-in-ordinary; the latter, when commanded to poison the calif's son, refused to do so. In 1171 the Fatimite califate was declared extinct by Saladin. At about the same time Benjamin of Tudela visited Cairo and gave much interesting information about the religious and communal life of the Jews of the place, information which is corroborated and supplemented by later authors (see English translation by Asher).

G. H. HIR.

CALIGULA (CAIUS CÆSAR AUGUSTUS GERMANICUS): Third emperor of Rome; born Aug. 31, 12 C.E.; assassinated at Rome Jan. 24, 41. He soon displayed the characteristics which made his reign a blot on Roman history. He formed a strong friendship for the Jewish king Agrippa, who, as the Romans thought, influenced Caligula for the worse.

Later on, Caligula professed belief in his own divinity, and ordered altars to be erected to himself and worship to be paid to him. In Alexandria the Roman governor, A. Avillius Flaccus, tried to force this worship on the Jews, and made their disobedience a pretext for persecuting them. He even suppressed an address of homage which they purposed sending to Caligula. The governor was suddenly removed in the autumn of 38, and the condition of the Jews under his successor, C. Vitrasius Pollio, until the death of Caligula, is unknown.

Jewish Delegates to Caligula.

The discord between the Jews and the heathens of Alexandria continued. In the year 40 both sent delegations to Caligula, in order to present the matter to him and to win his good-will. Philo headed the Jewish embassy, and Apion that of the heathen. A report of the mission by Philo has been preserved, though not in the original; and an alleged report of the heathen delegation is found in the collection of papyri at Berlin, which Wilcken intends to edit ("Hermes," xxvii. 474). The mission ended unfavorably for the Jews. Helicon, a base favorite of Caligula, assisted the Alexandrians to thwart the Jews. Caligula ultimately consented to receive the embassy, but treated them with the utmost contumely and insult. They were obliged to follow at his heels while he interspersed orders to his gardeners with ribald remarks on the Jewish religion. Naturally no redress ensued from such an interview.

Trouble in Palestine.

Meanwhile, Caligula's madness almost caused calamity to the Jews of Palestine also. The heathens of Jamnia, a seaport largely peopled with Jews, provoked the latter and exhibited their own loyalty by erecting an altar in honor of Caligula. Forthwith the Jews demolished it. Herennius Capito, the procurator, reported this to Caligula, who, infuriated, sent an order that his image be placed in the Temple at Jerusalem. Petronius, the governor of Syria, was ordered to mobilize half of his army in Palestine in order to enforce this command (39–40). Petronius, anticipating a serious conflict, endeavored either to gain the assent of the Jews to the imperial command or to secure the revocation of the latter. When the news of Caligula's intention spread through Palestine, it occasioned general mourning. A large delegation appeared before Petronius at Ptolemais, his headquarters, and their mournful petition produced a deep impression on him. Later, a similar deputation came before Petronius at Tiberias and was joined by Aristobulus, Agrippa's eloquent brother. In the mean time, however, Agrippa had arrived at Rome, and at a banquet given by him to the emperor, he succeeded in inveigling the latter into a virtual revocation of his order. Afterward the letter of Petronius, asking the emperor for an annulment of his order, arrived: Caligula was incensed at the audacity of the governor, and regretting his former action, laid plans for introducing his statue into the Temple surreptitiously, and sent an order of immediate suicide to Petronius. This message did not reach its destination until after the receipt of the news of Caligula's assassination at the hand of Cassius Chæreas. It is possible that the day of his death (22 Shebaṭ) was instituted as a memorial day at Jerusalem.

CALIMANI, BARUCH: Italian publisher; lived in the second half of the sixteenth and at the beginning of the seventeenth century at Venice. He issued the work of his teacher, Eliezer Ashkenazi, "Ma'ase Adonai" (Venice, 1583), and Moses Alshech's "Torat Mosheh" (*ib.* 1601), adding rhetorical prefaces to both works.

L. G. I. BER.

CALIMANI, SIMḤAH (SIMON) BEN ABRAHAM: Venetian rabbi and author; died at Venice Aug. 2, 1784. He was a versatile writer, and equally prominent as linguist, poet, orator, and Talmudist. During his rabbinate Calimani was engaged as corrector at the Hebrew printing-office in Venice. Among the great number of books revised by him was the responsum of David ben Zimra (RaDBaZ), to which he added an index, and the "Yad Ḥaruẓim" (on Hebrew versification) of Gerson Ḥefeẓ, enriched with interesting notes of his own.

Calimani was the author of the following works: (1) "Il Rabbino Morale-Toscano," an Italian translation of the Mishnah treatise Abot (in collaboration with Jacob Saraval, Venice, 1729, often reprinted); (2) "Kelale Diḳduḳe Leshon 'Eber," a Hebrew grammar inserted at the end of the Bible, edited at Venice, 1739; (3) "Grammatica Ebrea," an Italian translation of the preceding work, Venice, 1751; Pisa, 1815; (4) "Ḳol Simḥah" (Voice of Joy), an allegorical drama, with Jealousy, Folly, and Wisdom as the heroes, Venice, 1758; (5) a Hebrew Italian dictionary, left unfinished.

Calimani was liberal in his religious views, and took part in the campaign directed by Wessely against the delivery of casuistic lectures (pilpul) in the synagogues (see Zunz, "G. V." p. 459, note c).

G. I. BR.

CALITAS: A Levite who had married a foreign wife, but, at the solicitation of Ezra, repudiated her (I Esd. ix. 23). Ezra x. 23 gives "Kelaiah," a glossator, however, giving the collateral form "Kelita." He is perhaps identical with the "Calitas" who helped Ezra to explain the Law (I Esd. ix. 48; in Neh. viii. 7 given as "Kelita").

E. G. H. G. B. L.

CALIXTUS II. (GUIDO OF BURGUNDY): One hundred and sixty-seventh pope (1119–24); born at Quigney, near Besançon, France; died at Rome Dec. 12, 1124. His attitude toward the Jews was a very favorable one. On entering Rome, after having defeated the antipope Gregory VIII., Calixtus issued a bull which prohibited the forced conversions of Jews. Calixtus said, "From constrained adoption of Christianity, a faithful adherence to that religion can not be expected." He also forbade, under pain of excommunication, the infliction of bodily or pecuniary injuries on Jews who had not been legally condemned by a tribunal; they were not to be hindered in the exercise of their religion, nor were their cemeteries to be defiled. This bull served as a model to the subsequent popes who were favorably inclined toward the Jews. It was mentioned in the bull "Sicut Judæis" of Innocent IV., and in that of Eugen IV.

G. I. Br.

CALLENBERG, JOHANN HEINRICH: Professor of theology and philology, and promoter of conversionist enterprise among the Jews; born of peasant parents at Molschleben Jan. 12, 1694; died July 11, 1760. In 1735 he was appointed professor of philology in the University of Halle, and in 1739 professor of theology. From his youth he cherished the idea of working for the conversion of the Mohammedans; but later he devoted himself to missionary work among the Jews, and established, in 1728, the Institutum Judaicum, to which he attached a printing-office. In this office he printed the Gospel and other Christian books in the Judæo-German dialect, and distributed them among the Jews. He also sent missionaries to other European countries, and was a patron of converted Jews. His plans for the conversion of Mohammedans were resumed some what later, but in these he utterly failed. The Institutum Judaicum existed until 1791.

"CALLING UP." See 'Aliyah.

CALLIRRHOE: Hot springs on the western side of the Dead Sea, near the Zerka Maim (Buhl, "Geographie des Alten Palästina," p. 123; Smith, "Historical Geography of Palestine," p. 571). Josephus describes the springs ("Ant." xvii. 6, § 2) as running into the lake of Asphaltites and as being fit to drink. They were, however, strongly sulfurous, and for this reason were used for medicinal purposes to cure skin diseases. It was to Callirrhoe that Herod went for relief from his ailment, without, however, securing it. Modern travelers have noticed at Callirrhoe four large and many small springs. Sulfurous vapors are given off by the waters, the temperature of which is the same as that of the waters of Tiberias, 49° C. The ground around the sources is covered with reeds, thorns, and wild palm-trees (Robinson, "Physical Geography," pp. 163-164). Neubauer supposes that by the appellation בירם ("Biram"), mentioned in the Talmud (Sanhedrin 108a) among the thermal places, is meant Callirrhoe, which is situated in the vicinity of Baris; and that בירם is a corrupt reading of בירם. In fact, Josephus speaks of a locality called Baaras situated in a valley in the vicinity of Machaerus, where flames rising from the earth can be noticed in the night. This locality is called by Eusebius and Jerome Baris or Baru. "Callirrhoe" is the post-Biblical name of Lasha.

Bibliography: Neubauer, *La Géographie du Talmud*, pp. 37, 254.

J. Jr. G. B. L.

CALLISTHENES: A Syrian who was believed to have been concerned in the burning of the gates of the Temple during the persecution to which the Jews were subjected in the reign of Antiochus Epiphanes (I Macc. iv. 38). When the Jews were celebrating their subsequent victory over Nicanor (135 b.c.), they captured Callisthenes, who had taken refuge in a little house, and burned him to death. "And so he received a reward meet for his wickedness" (II Macc. viii. 33). E. G. H.

CALM, MARIE (pseudonym, **M. Ruhland**): German authoress and advocate of women's suffrage; born at Arolsen, Germany, April 3, 1832; died at Cassel, Germany, Feb. 22, 1887. She managed a seminary for indigent girls at Cassel, and was one of the original members of the Allgemeine Deutsche Frauenverein. Aside from her books on household economics and etiquette, she was the author of: "Bilder und Klänge," poems, Cassel, 1871; "Weibliches Wirken in Küche, Wohnzimmer, und Salon," Berlin, 1874; third edition, 1882; "Leo," novel, 1876; "Ein Blick ins Leben," Stuttgart, 1877; "Wilde Blumen," novel, Bremen, 1880; "Echter Adel," Stuttgart, 1883; and "Bella's Blaubuch," Leipsic, 1883.

Bibliography: *Lexikon Deutscher Frauen der Feder*, i. 120, ii. 214; Brockhaus, *Konversations-Lexikon*, Supplement, p. 215.

S. E. Ms.

CALMANSON, JACOB (JACQUES). See Poland.

CALMER, LIEFMANN: Baron of Picquigny, an important personage in French Jewry of the eighteenth century; born in Aurich, Hanover, in 1711; died in Paris Dec. 17, 1784. His full synagogal name was Moses Eliezer Lipmann ben Kalonymus—in German, "Kallmann," whence the family name "Calmer" is said to have been derived. From "Lipmann" undoubtedly came "Liefmann." Calmer first settled in The Hague, and later left Holland for France, in which country he obtained letters of naturalization.

On April 27, 1774, Pierre Briet, lord of Benapré, as straw-man for Calmer, bought from the creditors of the duke of Chaulnes the barony of Picquigny and viscountcy of Amiens for 1,500,000 francs. A little later it was declared that the purchase was made in the name of Liefmann Calmer, full citizen of The Hague and naturalized Frenchman. He thus became baron of Picquigny and viscount of Amiens. Calmer had three sons, two of whom were guillotined during the Reign of Terror; the third dying without issue in 1824.

J. H. Gut.

CALMET, AUGUSTIN: French Catholic theologian, historian, and Biblical scholar; born 1672 at Mesnil-la-Horgne in Lorraine; died 1757 in Paris. In 1688 he entered the Order of St. Benedict, and began his studies. Coming across the smaller Hebrew grammar by Buxtorf and some other Hebrew books in the abbey of Münster, he undertook the study of the language, assisted by the Protestant pastor Faber. From 1696 to 1704 he was instructor in the abbey of Moyen-Moutier, and there wrote his commentary on the Bible. After various ecclesiastical appointments, he became abbot of Senones (in Lorraine), in which position he remained until his death.

Of Calmet's numerous works (a full list of which is given by Fangé, and in the "Nouvelle Biographie Générale") only four need be mentioned here: (1) His first exegetical work, on which rests his reputation as a Biblical scholar, is the commentary "La Ste. Bible en Latin et en Français avec un Commentaire Littéral et Critique" (1707; 4th ed., 1729). He was the first prominent Catholic theologian who abandoned the allegorical and mystical method of interpretation, and undertook to give the literal sense of the Bible words. The value of this book lies, however, not so much in its exegesis as in the dissertations attached to it, which treat such topics as Hebrew poetry, music, weights and measures, medicine, marriage customs, burial customs, military organization, circumcision, the Sanhedrin, and Hebrew schools and sects, and are, for his time, remarkably full and judicious, though now superseded. They were published separately under the title "Dissertations qui Peuvent Servir de Prolégomènes à l'Ecriture Sainte" (1720). An extract of his Bible editions is known under the title "Bible de l'Abbé Vence." The "Trésor d'Antiquités Sacrées et Profanes" (Paris, 1722, three volumes) is substantially the same work. An English translation of a selection from the dissertations appeared in 1727, and they were also translated into other European languages.

(2) Closely connected with the commentary is his "Dictionnaire Historique et Critique Chronologique, Géographique et Littéral de la Bible" (1722; Supplement, 1728), which is chiefly a collection of the explanatory remarks in the commentary. Many editions and many translations of it have appeared, among them a good translation into English by D'Oyly (1732), and one by Taylor (1795, 1800) with a worthless appendix (American reprint of Taylor, 1812). The best-known American edition is that of Edward Robinson (1832), in which Calmet's material is condensed and revised. This dictionary was the first work of the kind, and was the point of departure for all others. (3) "Histoire Sainte de l'Ancien et Nouveau Testament et des Juifs," etc. (1718; English translation, 1740), extending to the destruction of Jerusalem. (4) "Histoire Sacrée et Profane Depuis le Commencement du Monde Jusqu'a Nos Jours" (1735), coming down to 1720. In these works, which are mere compilations, Jewish history is treated sympathetically; but Calmet's ignorance of Talmudic and rabbinical literature makes his account of the times after the destruction of Jerusalem meager and misleading, and he has no sympathy whatever with the post-Biblical thought of the Jews.

T.

CALNEH: **1.** City, mentioned together with Babylon, Erech, and Accad as forming part of the Babylonian kingdom of Nimrod (Gen. x. 10). The exact site of Calneh is unknown. It has been identified with Nippur (modern Niffer) by Rawlinson on the ground of the Talmudic statement, "Calneh means Nippar" (Yoma 10a); but the basis is insufficient. Nor is the concurrent testimony of Targum, Eusebius, and Jerome sufficient for the equation Calneh = Ctesiphon. In recent times it has been proposed to identify Calneh with Kulunu (Zarilab, Zirlaba); but this, too, is doubtful. **2.** A city mentioned in Amos vi. 2, which may with some probability be identified with Kullani, conquered by Tiglath-pileser III., and represented by the modern Kullanhu, about six miles from Arpad.

J. JR. R. W. R.

CALÑI, SAMUEL BEN MOSES: Turkish rabbi of the fifteenth century; born at Arta in the Morea. Calñi is the author of responsa entitled "Mishpeṭe Shemuel," and printed by his nephew at Venice, 1599–1600. He was the son-in-law of Benjamin b. Mattathias, author of "Benjamin Ze'eb," as the latter says in a responsum.

BIBLIOGRAPHY: *Ḳore ha-Dorot*, 34b, 39a; Michael, *Or ha-Ḥayyim*, p. 283.

L. G. V. C.

CALNO: A city mentioned with Hamath and Samaria, and compared to Carchemish (Isa. x. 9). Its identity is doubtful. It is named "Calneh" in Amos vi. 2; but must not be confused with the Calneh of Gen. x. 10. The latter was a Babylonian city, held by some to be the modern Niffer, by others to be Ctesiphon. The Septuagint seems to have disregarded this distinction; for, according to it, the tower was built in our Calno. The towns mentioned in Isaiah being Syrian, and not Babylonian, precludes the identification of Calno (Calneh) with Kullani, captured by Tiglath-pileser III. in 738. Neither can it be regarded as the Kullani mentioned among the cities and territories north of Assyria, given in the geographical list in "Western Asiatic Inscriptions," ii. 53, No. 1, line 6b. More acceptable is the equation Calno = Kulnia, which occurs in Assyrian tribute-lists (*ib.* ii. 53, No. 3). Delitzsch suggests that the Biblical city stands for Kullanhu, situated about six miles from Arpad. Pinches accepts this identification as "the best," and this opinion is indorsed by Cheyne, Winckler, Field, Hommel, and others.

E. G. H.

CALUMNY: Evil-speaking; a sin regarded with intense aversion both in the Bible and in rabbinical literature. The technical term for it in the latter is לשון הרע (leshon hara', "the evil tongue"). In the Bible the equivalent words are: דבה, meaning "talk" in a sinister sense; רכיל, the "merchandise" of gossip with which the talebearer goes about; and רגל, a verb, denoting the "peddling" of slander. As these words indicate, that which is condemned as "leshon hara'" denotes all the deliberate, malicious, untruthful accusations which have the purpose of injuring one's neighbor, that is, calumny proper, and also the idle but mischievous chatter which is equally forbidden, though it is not slander.

In the Pentateuch evil-speaking of both kinds is expressly forbidden (Lev. xix. 16): "Thou shalt not go about as a talebearer among thy people," and (Ex. xxiii. 1), "Thou shalt not raise a false report; put not thine hand with the wicked to be an unrighteous witness." Upon this the Rabbis comment (Mek. Ex. 20), "It is a warning not to receive or listen to evil reports." Of course, the most comprehensive commandment in connection with this is the ninth of the Decalogue: "Thou shalt not bear false witness against thy neighbor." In descriptions of corrupt society, calumny is always emphasized as a prominent feature. Jer. ix. 2, 3 speaks of those "that bend their tongues like bows for lies, every neighbor walketh with slanders"; and Ezek. xxii. 9, "In thee are men that carry tales to shed blood."

Biblical Prohibition.

The Psalms and books of the Wisdom literature abound in descriptions of the terrible workings of this sin. Ps. l. 20: "Thou sittest and speakest against thy brother, thou slanderest thine own mother's son." Prov. x. 18: "He that hideth hatred with lying lips, and he that uttereth a slander, is a fool"; and Ps. ci. 5: "Him that slandereth his neighbor in secret I will cut off." Prov. xxx. 10: "Calumniate not a servant unto his master lest he curse thee and thou be found guilty." Eccl. x. 11: "Surely the serpent will bite without enchantment, and the man of the [evil] tongue is no better." And Ecclus. xxviii. 12–26 contains an eloquent denunciation of the evil tongue, the gist of which (v. 18) is: "Many have fallen by the edge of the sword, but not so many as have fallen by the tongue." Specially characteristic is the repeated complaint of the pious because of slanderous persecutors. Ps. xxxi. 13: "For I have heard the slander of many, fear was on every side; while they took counsel together against me, they devised to take away my life" (compare Ps. xxxv. 11; Jer. xx. 10).

The Opposite Virtue.

The man that abstains from evil speech is given the highest praise. Among the qualities which befit a man who dwells in Jehovah's tent is "that he uttereth no calumny with his tongue" (Ps. xv. 3). It is recommended as an indispensable condition for life rich in years and happiness. "Keep thy tongue from evil and thy lips from speaking guile" (Ps. xxxiv. 12, 13).

The Talmud and Midrash teem with references to the evils of calumny. In Gen. R. xxvi. 2 slander is compared to the venom of the serpent. "As this affects every part of the body, so does the slanderer wound the soul of mankind. As the serpent's venom injures from a distance, so calumny may be hissed forth by one living in Rome to slay one living in Syria. The slanderous tongue is called 'telitai' [threefold], as being a threefold murderer. It ruins the slanderer, the listener, and the maligned."

Effects.

Its disastrous effects on a whole generation are suggested in the following (Gen. R. xxvi. 2): "The contemporaries of David despite their virtues go to battle and are defeated, because among them are Doeg and Ahitophel, 'who were eager for calumnies.' The men of Ahab's time, though idolatrous, go to battle and are victorious because there is no slanderer among them." And again (Shab. 56b), "If David had not listened to the evil tongue (in reference to Mephibosheth, II Sam. xvi. 3, 4), the kingdom would not have been divided; Israel would not have served idols, and we should not have been driven from our land." The decree of condemnation of the generations of the desert that had tried God ten times (Num. xiv. 22) was finally sealed, and they were not to enter the Promised Land because the spies had brought slanderous reports (Num. xiv. 37) concerning the country ('Ar. 15a).

The heinousness of this sin is strikingly taught in sententious sayings. Midr. Yalḳ., Ps. ci. 5: "Of the slanderer, the Holy One says, he and I can not dwell together in the world." 'Ar. 15 b: "The slanderer denies God." Soṭah 42a: "Four classes will be excluded from the Divine Presence: scoffers, liars, hypocrites, and slanderers." And strongest of all ('Ar. 15b and Gen. R. lxx. 4), slander is equal in a moral sense to idolatry, adultery, and murder; and rather than commit any of them, an Israelite in time of persecution must forfeit his life.

The "Fine Dust of Calumny."

So sensitive were the Rabbis to the possibilities of this sin in all men that they spoke of the "abaḳ leshon hara'" (the fine dust of calumny); that is, of words which, while innocent, may lead to calumny, and against which one must be on his guard (B. B. 165a; 'Ar. 16a). They therefore warned against extravagant praise of our fellow-man lest "by too much praise you provoke abuse." As a safeguard against the gossip habit they said ('Ar. 15b): "If a scholar, let him occupy himself with the study of the Torah; if a man of the people, let him cultivate self-depreciation."

Punishment.

Calumny appeared to the Rabbis to deserve special and severe punishment. They saw in leprosy its merited retribution ('Ar. 15b, and Ab. R. N. ix. 2). This conception was based on the account of the punishment of Miriam for speaking evil of Moses (Num. xii. 1, 19). Ingenious is their comment ('Ar. 16b) that, as the slanderer does the work of moral leprosy, separating husbands from wives, he is naturally punished by a disease that casts him out from society. They also (Shab. 36a and 36b) attribute quinsy to the sin of evil speech. According to one rabbi (Yalḳ., Ps. ci. 5), the slanderer deserves stoning; another (Pes. 118a) vents his anger thus: "He who speaks evil of his neighbor, and he who listens, and he who bears false witness against his neighbor, deserve to be cast to the dogs."

It is characteristic of Judaism that it knows of no hero without a blemish; and as sins of speech are all-prevalent, because of human fallibility (B. B. 165a), there is a tendency in the Midrash to discover the best man's failure in the form of a sin of the tongue. So Joseph is punished for slandering his brethren (Gen. xxxvii. 2; Gen. R. lxxxiv. 7, and Yer. Peah, i. 1). In Yalḳ. on Isa. vi. 5 we are told that those who are leaders of the people are in danger of sinning through too severe censure. Thus Moses for saying "Hear ye, rebels"(Num. xx. 10–13);

Elijah for asserting (I Kings xix. 10), "The children of Israel have forsaken thy covenant"; and Isaiah for exclaiming, "And in the midst of a people of unclean lips I dwell," were all in some manner punished by God.

Legal Remedies.

The frequent and passionate reiteration of the ethical and religious sanctions in Bible and Talmud against calumny are explained because its work in robbing men of their reputation is usually too subtle to be reached by the arm of the law. There are, however, two cases which could be reached by the civil authorities: The man who, because of some dislike, "brings up an evil name" (Deut. xxii. 13-19) upon the woman whom he has married. If his accusation is found untrue, he must pay a fine of one "hundred (shekels) of silver," and "he may not put her away all his days." Comparing this fine with the amount that he who forces an unbetrothed virgin into sexual sin had to pay (Deut. xxii. 28), the sages in 'Ar. iii. 5 say, "From this we gather that sometimes evil speech is more severely punished than evil deed."

People whose malice leads them to plot the injury or death of another by deliberately bearing false witness against him (Deut. xix. 16-21), when their testimony was proved to be false by the process according to the traditional interpretation of showing that they were not present at the time and in the place with respect to which they bear witness, were condemned to receive the punishment which their testimony, if acted upon by the court, would have brought upon the falsely accused (see Alibi).

The religious horror, the moral indignation, and penal severity with which "leshon hara'" (the calumniating tongue) was attacked during every stage in the development of Jewish thought, may be said to be the expression of the ethical principle (Ab. ii. 10), "Let the honor of thy fellow-man be as dear to thee as thine own."

CALVERT, THOMAS: English Hebrew scholar; born 1606; died at York March, 1679. He wrote "The Blessed Jew of Morocco" (York, 1648), an adaptation of the well-known letter of Samuel Maroccanus, itself probably derived from the polemical treatise of Samuel Abu Nasr ibn Abbas.

Bibliography: *Dict. National Biography*, viii. 274, 275; Palmer, *Nonconformist Memorial*, iii. 458, 459.

T. E. Ms.

CALVO, EMANUEL: Italian physician and Neo-Hebraic poet; born at Salonica toward the end of the seventeenth century; died before 1772. In early youth he went to Leghorn with his learned father, Raphael Calvo, and on Oct. 23, 1724, was graduated as doctor in Padua. Calvo practised medicine with considerable success at Leghorn, but inclined to the Cabala toward the end of his life. Several of Calvo's poems are included in A. B. Piperno's collection "Ḳol 'Ugab," Leghorn, 1846. He was an intimate friend of the poet Abraham Isaac Castello and of Moses Ḥayyim Luzzatto, who wrote a eulogy of him in a Hebrew poem after his graduation, and subsequently corresponded with him. When Calvo died Joseph ben David wrote an elegy, which is published in his "Yeḳara de-Shakbe," Salonica, 1774.

J. M. K.

CALVÖR, CASPER: Lutheran theologian; born Nov. 8, 1650, at Hildesheim, Prussia; died at Clausthal May 11, 1725. He became master of arts in 1674, deacon at Zellerfeld in 1677, superintendent in 1684, councilor of the consistory in 1708, and general superintendent of Clausthal in 1710. Calvör carried on missionary work among the Jews, and distributed among them Christian books, which he printed in Hebrew and German.

CALW, MEÏR. See Meïr Calw.

CAMBRIDGE: University town of England, and one of the earliest English towns inhabited by Jews. Fuller ("History of Cambridge," p. 8) fixes the date of the first Jewish settlement as 1073. The old synagogue was near the prison, but was given to the Franciscans (Brewer, "Monumenta Franciscana," pp. 17, 18). There is a tradition that the Round Church near St. John's College was a synagogue; and the parishes of All Saints and St. Sepulcher are still known as "in the Jewry." One of the earliest episodes mentioned with regard to the Cambridge Jewry is a fine inflicted upon Comitissa, a Jewess of Cambridge, for allowing her son to marry a Lincoln Jewess without the king's permission. It is probable that this Comitissa was the mother of Moses ben Isaac Hanassiah, the author of the "Sefer ha-Shoham." There is a grammarian known as Benjamin of Canterbury; but he is more likely to have been of Cambridge, since the Latin records make mention of a "Magister Binjamin" at Cambridge. No other prominent Jewish personage is known to have lived at Cambridge in early days; but it remained one of the more important of the Jewries up to the Expulsion, being the seat of an Archa.

In 1224 Henry III. granted the house of Benjamin the Jew to the town as a jail. This was on the site of the present Guildhall. The Jews of Cambridge do not seem to have suffered during the riots of 1189-90; but they were victims during the revolt of the barons in 1266.

Since the return of the Jews to England, the chief connection of Jews with Cambridge has been a few teachers at the university, like Israel Lyons (1739-75), S. Schiller-Szinnessy, and Solomon Schechter. The last-named raised the University Library collection of Hebrew manuscripts to the first rank by presenting to it the collection of fragments from the Genizah of Cairo, which he had collected during a scientific mission to that city. Professor J. J. Sylvester took high honors in mathematics in 1839, but was debarred from taking his degree by the university statutes. In 1869 Numa Hartog gained the position of senior wrangler, the highest mathematical triumph a student can obtain, and by this means helped to pass the University Tests Act which allowed Jews to take their degrees. Many Jewish students have obtained considerable distinction in the colleges and universities. Israel Abrahams is now (1902) reader in Rabbinic in the university. There is a small congregation in the town, which has a meeting-hall.

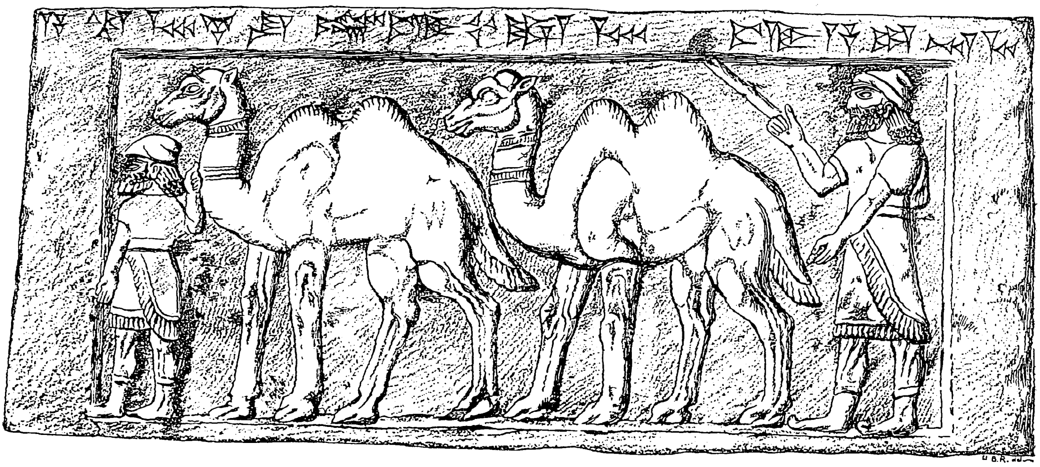
J.

CAMEL: The well-known ruminant, native in Asia and Africa. The word "camel" (Hebrew, גמל, gamal) is the same in the Assyrian, Samaritan, Aramaic, Syriac, Arabic, Egyptian, and Ethiopic languages. Together with the knowledge of the animal, its name was introduced into Greek (κάμηλος) and Latin (*camelus*), whence many modern languages derived it (Hommel, "Die Namen der Säugetiere bei den Südsemitischen Völkern," pp. 144-146, Leipsic, 1879). Many passages of the Bible show that the camel was found especially among the peoples of the deserts bordering on the land of the Israelites (Judges vi. 5, vii. 12; I Sam. xv. 3, xxvii. 9, xxx. 17; Jer. xlix. 29, 32; Isa. lx. 6). The camels of the Midianites were decorated with little golden crescents (Judges viii. 21, 26). Camels constituted also part of the wealth of the Patriarchs (Gen. xii. 16, xxiv. 10; specially Job i. 3, xlii. 12), who used them as beasts of burden; in riding, a sort of cushion was used (Gen. xxxi. 34). For swift riding dromedaries were employed (Isa. lxvi. 20, כרכרות); in traveling across wide stretches of desert the treasures were packed upon the humps of camels (Isa. xxx. 6). King David had a special officer over his camels, named Obil (I Chron. xxvii. 30; compare Arabic *abîl*).



Camels Led as Tribute to Shalmaneser.

(From the Black Obelisk in the British Museum.)

Otherwise the camel is mentioned as a possession only in post-exilic times among the Israelites (Ezra ii. 67). In olden times the camel was also used in war; in Isa. xxi. 7, camel-riders were part of the force of the Elamites. The Israelites were forbidden to eat the camel (Lev. xi. 4; Deut. xiv. 7; see Bochart, "Hierozoicon," i. 11); it was the opinion of the Arabs that Jacob forbade it as food because it produced sciatica. As in Arabic, so also in Hebrew, the expressions "beker" (בכר, Isa. lx. 6) and "bikrah" (בכרה, Jer. ii. 23) denote the young, vigorous animals. In the first passage Targ. Yer. has "hognin" (הוגנין), a word that also in the Talmud and in Arabic means a young camel; in the second passage ינקא must, according to Bochart, be changed to נאקה, which in the Talmud and in Arabic means the female camel (see "'Aruk," ed. Kohut, v. 378). The swift camel, or the dromedary, is called in the Talmud (Macc. 5a; Yeb. 116a) the "flying" camel.

The camel is also subject to rabies (see the Talmud Ber. 56a). Ḥul. 59a speaks of the distinctive teeth of the full-grown and of the young camel. The fat hump of a camel that has never carried burdens tastes like the meat itself (Mishnah and Gem. Ḥul. 122a). Camel's hair was made into clothing (Shab. 27a); but it must not be mixed with sheep's wool (Mishnah Kil. ix. 1). John the Baptist was clothed in a coarse garment of camel's hair (Matt. iii. 4; Mark i. 6).

On the Sabbath it was forbidden to tie camels together, because of the workaday appearance (Mishnah and Gem. Shab. 54a). Camel-drivers, who often formed entire caravans (Mishnah Sanh. x. 5; B. B. 8a), are frequently mentioned together with mule-drivers; Abba Judan gave much of his time to his camels (Yer. Hor. iii. 48a). The Talmud shows great familiarity with the characteristics of the camel: it has a short tail because it eats thorns (Shab. 77b); it mates in a modest manner (Midr. on Gen. xxxii. 16); in rutting-time it becomes dangerous (Sanh. 37b; compare Jer. ii. 24, where the same is said of the wild ass). The name "gamal" is also supposed to signify etymologically that the animal becomes easily enraged and is then vindictive.

A number of Aramaic proverbs about the camel are found in the Talmud. For instance, "In Media the camel can dance on a bushel-basket" (Yeb. 45a), meaning that in Media everything is possible; "as the camel, so the burden" (Soṭah 13b); "the camel asked to have horns, so his ears were cut short" (Sanh. 106a); "there are many old camels who must bear the burdens of the young ones" (*ib.* 52a). It has been suggested that the word "camel" (κάμηλος) in Matt. xix. 24; Mark x. 25; Luke xviii. 25 does not mean a camel, but a *rope*; but in view of the Talmudic expression "elephant through a needle's eye" (Ber. 55b; B. M. 38b), this is not admissible.

CAMONDO: Well-known family of Jewish financiers and philanthropists of Spanish-Portuguese origin. Several centuries ago it established itself at Venice, where some of its members became famous by their scholarship and by the services which they rendered to their adopted country. After having lived for a long time at Venice, the Camondo family in the nineteenth century established itself in Constantinople.

Count Abraham Camondo: Italian and Turkish financier and philanthropist; born at Constantinople 1785; died at Paris, his place of residence, March 30, 1873. In 1832 he inherited from his brother Isaac (who died without children) a fortune, and managed it so wisely that at his death he was estimated to be worth 125,000,000 francs. While Venice was under Austrian rule, he received as an Austrian subject the title of Chevalier of the Order of Francis Joseph. When Venice again became an Italian possession, Camondo, as a Venetian citizen, presented large gifts to several Italian philanthropic institutions, in recognition of which King Victor Emmanuel conferred upon him the title of count, with the privilege of transmitting it in perpetuity to the eldest son of the family.

Count Camondo's career in Turkey was an extraordinary one. He exercised so great an influence over the sultans 'Abd al-Majid and 'Abd al-'Aziz, and over the Ottoman grand viziers and ministers, that his name became proverbial. He was banker to the Ottoman government before the founding of the Ottoman Bank. It was he who obtained from the Porte a firman by virtue of which the privilege of possessing real estate in Turkey, which until then had been restricted to subjects of the Ottoman empire, was extended to those of foreign nations.

Profiting by this decree, Camondo erected such a large number of houses at Pera (Constantinople) that even to-day (1902) the family is one of the richest landholders in the Ottoman capital.

Camondo was especially active in behalf of his Eastern coreligionists. He established at Constantinople a central consistory for the Jews of Turkey, of which he was almost continuously the president; he introduced reforms into the communal administration; and he founded in 1858 an educational institution, the Institution Camondo, at Peri Pasha, the poorest and most densely populated suburb of the capital. Shops for tailoring and shoemaking were soon added. On account of this school its benevolent founder was excommunicated by certain fanatical rabbis, and he endured otherwise much vexation; yet it has flourished for thirty-two years, and trained the majority of the Jewish officials now in the service of the Ottoman government.

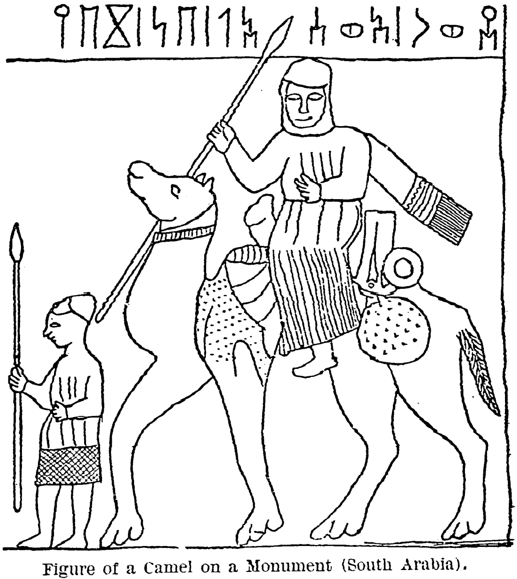

Figure of a Camel on a Monument (South Arabia).
(From Hommel, "Aufsätze und Abhandlungen.")

Dying at Paris at the age of eighty-eight, Camondo, according to his last wishes, was buried in his family vault in the Jewish cemetery at Haskeui (Constantinople). The Ottoman government held memorial services in his honor.

Raphael Solomon de Camondo: Born 1810; died 1866 at Constantinople. He left two sons, **Count Béhor Abraham de Camondo** and **Nissim de Camondo,** who died at Paris within a year of each other, in 1886 and 1887, respectively. Each of these two brothers left an only son: the first, **Count Isaac de Camondo;** the second, **Count Moses de Camondo,** both of whom are (1902) living in Paris.

Solomon Camondo: Turkish rabbi and man of letters; lived at Salonica in the second half of the eighteenth century; related to the Camondo family of Constantinople. He is the author of responsa, published under the title "Neharot Dammesheḳ," Salonica, 1772.

s. M. Fr.

CAMP (מחנה)**:** A collection of tents (Judges vii. 13), or booths and huts (Neh. viii. 14), pitched or erected to give shelter to shepherds, travelers, or soldiers, sometimes overnight merely, or for many days or even months. Safety and a sufficient supply of water were the prime considerations determining the choice of location ("Pitched at the waters of Merom," Josh. xi. 5; compare also Judges vii. 1; I Macc. ix. 33). Security against sudden attacks by roving robbers (Bedouins) or other enemies was effected by establishing the camp on the side of a ravine or valley. Watches, moreover, were placed in three shifts for the night (Judges vii. 19; I Macc. xii. 27); and a garrison was left on guard when the main body of the campers went out to the combat (I Sam. xxx. 24). That the camp was usually laid out in a circle, a form of construction much affected by the modern Bedouin, may be inferred from the word "ma'gal" (I Sam. xvii. 20, xxvi. 5); though by many commentators and ancient versions this rare designation is explained as etymologically connected with the Hebrew word for "wagon," and on this basis the theory has been advanced that wagons surrounded the camp to increase the security and to insure ease of defense. It is impossible definitely to decide which of these interpretations deserves greater credence.

From Num. ii.—a chapter which the critical school would not accept as containing historical data—it would appear that in the construction of the camp a certain plan was followed in the grouping of the different tribes, which was indicated by flags with a fixed relation to the tabernacle at the halting-places. The descriptions by Doughty and others of the hadj to Mecca agree in reporting the observance of a similar arrangement marked by flags and lamps, or torches, for the pilgrims when on the march. Artificial defenses to add to the natural advantages of the chosen location, or to supply their absence, are also mentioned (I Sam. xvi. 1 *et seq.*).

In their anxiety to protect their flocks the early nomads were driven to erect permanent enclosures (stockades) in which to keep their herds overnight (Num. xxxii. 36), generally in the neighborhood of caves, near which a massive platform of loose large stones was built, whereon the huts of the shepherds were placed ("Migdal," "Migdal 'Eder"). The erection of these permanent shepherd camps must be considered as the first step toward the abandonment by the Hebrews of the migratory life with its movable camps. Hence the proverb "from the watch-tower to the fortified city" (II Kings xvii. 9, xviii. 8).

CAMPANATOR. See Schulklopper.

CAMPANTON, ISAAC B. JACOB: Spanish rabbi; born 1360; died at Penafeel in 1463. He lived in the period darkened by the outrages of Ferran Martinez and Vicente Ferrer, when intellectual life and Talmudic erudition were on the decline among the Jews of Spain. The historiographers Immanuel Aboab ("Nomologia," ii. 2), Zacuto ("Yuhasin," ed. Filipowski, p. 226b; compare "Seder ha-Dorot," pp. 27b, 28a), and Joseph b. Ẓaddiḳ (Neubauer, "Anecdota Oxoniensia," i. 99) unite in designating Campanton as a gaon, Aboab stating that he was styled "the gaon of Castile." Among his pupils may be mentioned Samuel (ibn Sadillo) al-Valensi and Isaac Aboab. He left but one work, "Darke ha-Gemara," or "Darke ha-Talmud" (A Methodology of the Talmud), which is an important contribution to the subject, as it attempts to be a practical guide for those who are called upon to teach the Talmud. It was published at Constantinople, sixteenth century; Venice, 1565; Mantua, 1593; and Amsterdam, 1706, 1711, 1754; and newly edited by Isaac H. Weiss, Vienna, 1891.

CAMPEN, JOHN VAN: Christian professor of Hebrew at Louvain and Cracow; died at Freiburg in Breisgau Sept. 6, 1538. He compiled a Hebrew grammar from Elias Levita's work, which ran through three editions (Cracow, 1534; Paris, 1539, 1543). He also commented on Psalms in a manner to earn the praises of Hupfeld ("Psalmen," iv. 474), and attached the commentary to a paraphrase which appeared at Paris, 1533; Leyden, 1534; Basle, 1548, etc. Campen was summoned to Cracow by the prince bishop, Peter Tomiki, on very favorable conditions.

T. J.

CAMPHIRE (Hebrew, "kopher"; Arabic "ḥinna," whence English "henna"): A shrub growing to a height of between eight and ten feet, and bearing cream-colored and very fragrant flowers. The botanical name of the plant is *Lawsonia alba*. In ancient times it grew very plentifully near En-gedi (Song of Solomon i. 14). Tristram ("Natural History of the Bible," p. 339) reports having found it growing there. Various uses were made of camphire. Along with other fragrant woods (Song of Solomon iv. 13, 14) it was valued for its perfume. But it was utilized chiefly as a dye for the hair and the skin. In dyeing the skin, cloths were placed on the parts adjacent to and encircling those to be dyed. To these parts the powdered leaves, made into a paste by the addition of a little water, were applied, and allowed to remain overnight. The stain lasted for three or four weeks. Mohammed (Hughes, "Dict. of Islam," p. 175) dyed his beard and recommended the practise to his followers: it has therefore become an established religious custom with Mohammedans.

E. G. H. G. B. L.

CANAAN—Biblical Data: Name of the son of Ham, and a brother of Cush (Ethiopia), Mizriam (Egypt), and Put (Phut), occurring in the geographical-ethnographical table, Gen. ix. and x. Originally the name "Canaan" was not an ethnic term. It belongs primarily to the vocabulary of geography; the curse pronounced upon its bearer for the misconduct of Ham demonstrating only the knowledge of the author that the dominant Semitic population of the land so designated was the deposit of a wave of immigration and conquest coming from the south. Originally an appellative (compare Moore, on the use of the article in Egyptian inscriptions, in "Proceedings of Am. Oriental Soc." 1890, lxvii. *et seq.*), it described some peculiar aspect of the country, and was only later transferred from the territory to the inhabitants.

Like most geographical terms in the Bible, "Canaan" is employed in a very loose and confusing manner; and it is almost impossible to establish definitely the limits of its application. In earlier times its range was probably very narrow; designating the strip of coast-line along the Mediterranean, more particularly the northern—*i.e.*, the Phenician—part thereof. With this restriction "Kan'na" appears in the Egyptian inscriptions (Müller, "Asien und Europa," pp. 206 *et seq.*). But it was also applied to the whole coast district down to the Egyptian frontier (Philistæa). Like the Greek "Palestine," which originally designated only the southern coast-line, "Canaan" was then extended to the adjacent highlands. In Josh. xi. 3 it covers the land from the foot of Mt. Hermon to the southern end of the Dead Sea, and also the territory west of the Jordan to the Mediterranean. It is doubtful whether the name was ever given to districts east of the Jordan. These, as "the land of Gilead," are generally put in antithesis to "the land of Canaan" (Num. xxxii. 29 *et seq.*; Josh. xxii. 9, 32). "Canaan" is the favorite appellation of the Jahvist, sometimes with the prefix "land" and sometimes without (Ex. xv. 15; Gen. xii. 5, xvi. 3; and elsewhere).

The etymology of the name is in doubt. After Augustine ("Ennarationes in Psalmos," civ. 7), it has been explained as designating lowland either in contrast to Aram, or to the mountainous highland looming beyond the coast-line and removed from the sea only by a narrow strip of "lower land" (Num. xiii. 29; Josh. xi. 3). The former implication is now generally abandoned; but the latter, though open to objections (see Moore, *l.c.*), may be provisionally retained. Canaan is geographically identical with the land of the Amorites. As such it is mentioned in the El-Amarna tablets, though it also occurs in them as "Kinahhu" or "Kinahna." See CANAANITES.

E. G. H.

——**In Rabbinical Literature:** The first of the seven sinners who made idols for the heathens, the other six being Phut, Shelah, Nimrod, Elah, Diul, and Shuah. Canaan, with his six companions, brought precious stones from Havilah (Gen. ii. 11-12), and made of them idols, which at night shone as brightly as the sun, and which were endowed with a power so magical that, when the blind Ammorites kissed them, they regained their eyesight ("Chronicles of Jerahmeel," p. 167; compare KENAZ).

Canaan, in a certain sense, was predestined to this and similar offenses; for he was begotten by his father while in Noah's Ark, whereas God had commanded that the sexes should live separately therein (Gen. R. xxxvi.). Canaan was of so low and base a character that Ham, in the record of his wickedness, is designated "the father of Canaan," whereby father and son were ironically characterized as a "par nobile" (noble pair) (Gen. R. *l.c.*; Origen on Gen. ix. 18).

Curse of Noah.

Concerning the curse of Noah upon Canaan, the Midrashim endeavored in different ways to give a solution to the question why Canaan had to suffer for the sins of his father. The old explanation was that Canaan, not Ham, though he had in no sense transgressed against his grandfather, had to be cursed by him because God had blessed Noah and his sons; and wherever the blessing of God rests there can be no curse (R. Judah, Gen. R. *l.c.*; Justin Martyr, "Dial. cum Tryph." cxxxix.). This explanation, however, was found to be defective; for it was contrary to Jewish sentiment to curse an innocent man; hence the new assertion that Canaan, like his father, transgressed against Noah.

There are different views as to the nature of Canaan's transgression. According to one, Canaan circulated the report that he saw Noah naked; another view is that he emasculated him that he should have no more sons (Gen. R. *l.c.*; Origen and Ephraem Syrus on Gen. x. 24, 25; more elaborated, in Pirke R. El. xxiii.).

Canaan the Father of Slaves.

Through the curse which Canaan brought upon himself, the low condition of slaves (Canaan's descendants) is to be explained; for parents exercise a strong influence, for good or for evil, upon the fate of their offspring. "Wo unto the sinners," comments a Midrash, "who bring evil upon themselves, their children, their children's children: in fact, upon all the generations that follow." Many of the sons of Canaan were worthy of being ordained as rabbis; but the guilt of their father barred them from such a career (Yoma 87a). God, however, is different from man. Man seeks to deprive his enemies of the means of subsistence; but God, though He cursed Canaan, made him a slave, that he might eat and drink of that which his master possessed (*ib.* 75a).

Canaan upon his death-bed left to his children the following rules of life: (1) "Let there be mutual love between yourselves." (2) "Love robbery and unchastity." (3) "Hate your masters, and do not speak the truth" (Pes. 113b). Not only by words, but also by deeds, Canaan exemplified to his sons the life worthy of slaves. When Noah divided the earth among his three sons, Palestine fell to the lot of Shem. Canaan, however, took possession of it, notwithstanding the fact that his father and his children called his attention to the wrong he had committed. They therefore said to him: "Thou art cursed, and cursed wilt thou remain before all the sons of Noah, in accordance with the oath which we took before the Holy Judge [God] and our father Noah" (Book of Jubilees, x., end). Later, when the Jews, the descendants of Shem, drove out the Canaanites from Palestine, the land fell into the hands of its lawful owners.

The Canaanites.

Among the various tribes of the Canaanites were the Girgashites, who, on Joshua's demand, subsequently left Palestine and emigrated to Africa (Yer. Sheb. vi. 36c; Lev. R. xvii.). Many of the Canaanites concealed their treasure in the walls of their houses, that they might not fall into the hands of the Jews. But God commanded that, under certain circumstances, the houses should fall into ruins; thus the hidden treasure came to light (Lev. R. xvii.). The Canaanites furthermore, on hearing that the Jews had left Egypt, destroyed all crops, cut down the trees, demolished the houses, and filled up the wells, in order that the Israelites should come into possession of a wasted country. But God promised the children of Israel a rich and fertile land (see Deut. vi. 10–12). He therefore led the Jews for forty years in the wilderness; and the Canaanites, in the mean time, rebuilt what they had destroyed (Mek., Beshallaḥ, i. [ed. Weiss, p. 28b]).

In the time of Alexander the Great the descendants of those Canaanites who had left Palestine at the request of Joshua, and had settled in Africa, sought to regain the Promised Land. Gebiha ben Pesisa, however, who appeared before the king in the interest of the Jews, showed that according to Scripture, by which the Africans traced their ancestry to Canaan, that ancestor had been declared the slave of Shem and Japheth. The Jews, therefore, not only had the right to hold the land of their slaves, but the Africans had to indemnify the Jews for the long time during which they had performed no service for them. In consternation, the Africans then fled to their homes (San. 91a).

Medieval Views.

In the literature of the German-French Jews of the Middle Ages the Canaanites and the Slavs were considered identical, owing to the similarity of the latter name with the German word for "slave" (A. Harkavy, "Die Juden und die Slavischen Sprachen," pp. 19–29; Kohut, "Aruch Completum," *s.v.* כנען). In Sifre, Deut. 306 (ed. Friedmann, p. 131b) the word כנען is used peculiarly; לשון כנעני (literally, "Canaanitish language") means probably "a mercantile expression."

L. G.

CANAANITES, THE: The expressions "Canaan" and "Canaanite" (כנען, כנעני) are applied in the Old Testament sometimes to the collective non-Israelitish population west of the Jordan, or to the land itself (Gen. xii. 5; Josh. xxii. 9; Ps. cvi. 38), and sometimes to a part of the population. Thus, the Canaanites are mentioned among other Palestinian tribes (Gen. xiii. 7, xv. 21; Ex. iii. 8); and the term is applied specifically to the inhabitants of the Mediterranean coast (Josh. v. 1) or to the tribes dwelling between that coast and the Jordan (Josh. xi. 3; Num. xiii. 29). As a designation for the coast inhabitants it is identical with "Phenicians," and is thus used in a political sense in Isa. xxiii. 2. In Zeph. ii. 5 the name is applied to the Philistine population of the southern coast; but the accuracy of the text is not quite certain. Since the term "Canaanites" was also applied to the Phenicians, it gradually obtained the meaning of "traders," as used in Isa. xxiii. 8; Ezek. xvi. 29, xvii. 4; Zeph. i. 11; Job xl. 30 (A. V. xli. 6); Prov. xxxi. 24; (possibly also in Zech. xiv. 21). The consistent use of the word is one of the distinguishing features of the Jahvist sources, while the Elohist uses "Amorite" in the same sense (compare Amorite and Hittite). In Isa. xix. 18, where the language of the Canaanites is referred to, the word "Canaan" is applied to the Jewish population of Palestine, but in Hosea xii. 8 it is an opprobrious epithet for idolatrous Israel, if indeed the text here be reliable.

Various Applications of the Term.

The same double use of the word is found elsewhere. Thus, on Phenician coins the word כנען is used to designate the Phenician people. Similarly, Greek writers employ the word *χνα* (a short form = כנע) in reference to Phenicia or to the ancestors of the Phenicians (compare Schröder, "Die Phoenizische Sprache," p. 6). In the El-Amarna tablets "Kinahhu" (כנע) and "Kinahna" refer to the northern portion of the Mediterranean coast. In the old Egyptian inscriptions the word "Kan'na" is applied especially to the Phenician coast; sometimes, also, to the whole shore of the Mediterranean. The word designating Canaanites in these inscriptions is, however, applied in a wider sense to the people of western Syria in general. This is similar to the Old Testament usage, but is more comprehensive.

In all probability the limited application of the word to the Mediterranean coast is the original, narrower use of the word found in so many inscriptions pointing in that direction. The designation was afterward applied to the inhabitants of the interior, either because the coast population was originally best known, or because they actually occupied a great portion of the mountainous district also.

CANADA: A federation of provinces in British North America. The earliest authentic records of the Jews in Canada go back to the period when England and France were engaged in their final contest for the mastery of the northern part of the New World. While the batteries of Wolfe were thundering at the gates of Quebec, Amherst was closing in on Montreal with an army from the south. Among the members of his staff was Commissary Aaron Hart, an English Jew, born in London in 1724; and among other Jewish officers of the invading hosts were Emanuel de Cordova, Hananiel Garcia, and Isaac Miranda. Hart was afterward attached to General Haldimand's command at Three Rivers, and at the close of the war settled in that city, and became seignior of Bécancour. About this time a number of Jewish settlers took up their residence in Montreal, including Lazarus David, Uriel Moresco, Samuel Jacobs, Simon Levy, Fernandez da Fonseca, Abraham Franks, Andrew Hays, Jacob de Maurera, Joseph Bindona, Levy Solomons, and Uriah Judah. Lazarus David was a large landowner, and was noted as a public-spirited citizen. Several of the others held offices in the army. There were also opulent and extensive traders among them; and altogether these early colonists were men of substance and strenuous character.

Synagogue Founded at Montreal.

Soon joined by other bands of settlers, the Jewish community of Montreal found itself strong enough to organize a congregation in 1768, called "Shearith Israel." As a large majority of the early members were descended from exiles from Spain, they adhered to the rites of the Spanish and Portuguese Jews; and the congregation has continued to flourish under its original name, tenaciously adhering to its historic ritual. Around this synagogue the main incidents of the history of the Jews of Canada centered for the major part of a century; for during many decades Shearith Israel remained the sole Jewish congregation in Canada. The first two scrolls of the Law were presented to it in 1768 by the Spanish and Portuguese Jews of London, and were at that date already accounted very old. These scrolls are still in use in the synagogue. At first the congregation met for worship in a hall in St. James street; but in 1777 the members built their first synagogue on a lot belonging to David David, at the junction of Notre Dame and St. James streets, close to the present court-house. See the David family.

In 1775 the congregation acquired land for a cemetery on St. Janvier street; and the first person interred was Lazarus David (referred to above), born in 1734, and died a year after the purchase of the ground. His remains were subsequently removed to the present cemetery on Mount Royal, when the old one was closed, together with the original tombstone, dated 1776, which still stands and marks the oldest Jewish grave in Canada.

The Rev. Jacob Raphael Cohen was the first regular minister of the Montreal Spanish and Portuguese Jews of whom there remains any record. He was their spiritual guide from 1778 to 1782.

The Franks Family.

The president (parnas) of the Montreal synagogue in 1775 was Jacob Salesby (or Salisbury) Franks, a relative of the Abraham Franks mentioned among the earliest settlers, who belonged to a family that played a most important part in those days in Jewish communal matters in Philadelphia, as well as in Montreal (see the Franks family). Other members of the Franks family remained in Canada, and supported the British in repelling Montgomery's invasion, notably Abraham Franks, Jacob Franks, Sr., and Jacob Franks, Jr., who were members of the junta of the Spanish and Portuguese congregation of Montreal, and who were prominent in public affairs. Abraham Franks, who was born in 1721 and died in 1797, had a daughter Rebekah, who in 1775 married Levy Solomons. The latter, whose name figures among the earliest Jewish settlers in Canada, was parnas of the Montreal synagogue in 1788; and it was during his presidency that a regular set of by-laws was drawn up. The executive was styled the "junta," and consisted of a "parnas" (president), "gabay" (treasurer), and three others. Executive privileges were also accorded to past officers who were "Gentlemen of the Mahamad."

When Montgomery invaded Canada in 1775 he commanded Levy Solomons to act as purveyor to the hospitals for the American troops. At that time Solomons was engaged in very extensive trade operations between Michilimackinac, Montreal, Albany, New York, and London. He carried out his contract with General Montgomery faithfully; but when the defeat and death of the latter at Quebec led to the retreat of the American forces from Montreal, General Arnold, as he retired, took possession of quantities of supplies stored at Lachine, belonging to Solomons, for the maintenance of his troops. The services which Solomons rendered the Revolutionary forces were never indemnified by them. At the same time he was exposed to the resentment of the British, as one suspected of sympathy for the revolted colonists. After having been expelled with his family from his home in Montreal by General Burgoyne, and after enduring much hardship, he eventually gained the indulgence of the Canadian governor, and was permitted to return in peace to Montreal.

Solomons had numerous offspring. His eldest daughter, Mary (Polly), who was born in 1776 and died in 1826, married Jacob Franks, Jr., a renowned Hudson's Bay trader, who was one of the first to penetrate to the remotest parts of the Canadian Northwest. Another daughter, Rachel, married Henry Joseph of Berthier, the progenitor of a family distinguished in Canadian Jewish annals. Joseph's partner in Montreal was his brother-in-law, Benjamin Solomons, closely related to the Seixas and Nathan families of New York. His four sons, Jacob Henry, Abraham, Jesse, and Gershom, were prominent men of affairs and communal leaders. See the Joseph family.

The Struggle for Civil Rights.

In 1807 Ezekiel Hart, one of the sons of Commissary Aaron Hart, was elected to represent Three Rivers in the legislature. This at once raised the question of the civil status of the Jews in Canada, which till then had not been clearly defined. When the legislative chamber reassembled Jan. 29, 1808, Ezekiel Hart declined to be sworn in according to the usual form "on the true faith of a Christian," but took the oath according to Jewish custom on the Pentateuch, and with the head covered. At once a storm of opposition arose, due, it is said, not to religious prejudice or intolerance, but to the fact that his political opponents saw in this an opportunity of making a party gain by depriving an antagonist of his seat. After a heated debate it was decided to receive Hart's petition, in which he urged his right to take his seat, and claimed that his oath was in accord with the statute of 31st of George III. The chamber discussed the question in committee on Feb. 16 and 17, 1808; and on the nineteenth of the same month Hart was heard at the bar of the House. The next day the majority decided that he was not entitled to take his seat, and declared for his expulsion. The English minority vehemently protested against this; notably Richardson, who cited the statute of 13th George II., chap. vii., to show that Hart's expulsion was illegal. The British attorney-general was also quoted in support of this view of the question. Notwithstanding the adverse vote of the majority, Hart vigorously protested, and attempted to vote during several of the divisions; but he was again expelled. Having been again sustained by his constituents, the House proposed passing a bill to put his disqualification as a Jew beyond doubt. This roused the indignation of the governor, Sir James Craig, who was already in conflict with the Assembly; and, to put an end to their distasteful course, he dissolved the chamber before the bill could pass.

Years of agitation followed, and on Dec. 4, 1823, several Jews petitioned Parliament to authorize them to keep a register of births, marriages, and deaths. A bill in conformity with this petition was passed in 1829, and sanctioned by royal proclamation Jan. 13, 1831. Encouraged by this success, the Jews of Canada determined once more to try to secure recognition of their civil rights; and on Jan. 31 and Feb. 7, 1831, they sent an address, signed by Samuel Becancour Hart, to the legislature, petitioning to this effect. On March 16, 1831, a bill was introduced in the Legislative Assembly extending the same political rights to Jews as to Christians. Party passions no longer entered into the question; and the acrimony that had distinguished the debates of 1808 and 1809 had died out. The bill rapidly passed both the Assembly and the Council, and received the royal assent June 5, 1832. Since then Jews have sat in the Canadian Parliament, fulfilling their duties with credit and ability, the first to attain that distinction having been Mr. Nathan of British Columbia.

The land on which the first synagogue had been erected in Montreal having reverted to the heirs of David David on his death in 1824, it became necessary to demolish the old building; and the congregation then met for worship in a hall adjoining the residence of Benjamin Hart, at the corner of Recollect and St. Helen streets, Montreal. For a while the affairs of the congregation remained in this unsettled condition; but in 1826 an appeal was issued urging the members to build a new synagogue to replace the former one, and also pointing to the necessity for reorganization. This appeal was signed by the president of the congregation, Benjamin Hart, one of the sons of Commissary Aaron Hart. His appeal had the desired effect: in 1835 a piece of land on Chenneville street was purchased; and there the Spanish and Portuguese Jews built their second synagogue, which they dedicated in 1838. The building was planned by Moses J. Hays, a nephew of David David, one of the trustees of the congregation, and in his day one of the most prominent citizens of the Canadian metropolis.

The Chenneville Street Synagogue.

Early Rabbis.

After the retirement of the Rev. Jacob Raphael Cohen, the position of minister of the Shearith Israel congregation was occupied temporarily by Myer Levy, and afterward by Isaac Valentine. Dr. de La Motta also occasionally officiated. In 1840 the Rev. David Piza was appointed minister; and he held the office for six years.

In 1837-38 Canada was convulsed by the rebellion led by Papineau, Nelson, Brown, and Mackenzie; and among those who fought on the Loyalist side were several of the members of the Spanish and Portuguese synagogue. Two members of the David family held important cavalry commands under Wetherell at the action at St. Charles, and took a distinguished part in the battle of St. Eustache. Aaron Phillip Hart, grandson of Commissary Hart, temporarily abandoned his large law practise to raise a company of militia, which rendered valuable service. Jacob Henry Joseph and his brother Jesse were with the troops on the Richelieu and at Chambly; the former being entrusted by Sir John Colborne, the Royalist commander, with the bearing of despatches to Colonel Wetherell. When the struggle had terminated and peace had been restored, it was recognized that the members of Shearith Israel had done well toward upholding the unity and the prestige of the empire of which they were citizens.

Dr. Abraham de Sola.

In 1846 the Rev. Abraham de Sola, LL.D., was elected rabbi of the Montreal Spanish and Portuguese synagogue. He held high rank among the Jewish leaders of his day. In addition to his ministerial duties he occupied the chair of Semitic languages and literature at McGill University, and was the author of many valuable works on theology, philology, and Jewish history.

Some Communal Workers.

During Dr. De Sola's pastorate a number of Montreal Israelites won distinction in public life, notably Dr. A. H. David, grandson of Lazarus David, who was dean of the faculty of medicine of Bishop's College; Samuel Benjamin, the first Jew elected to the Montreal city council; and Jesse Joseph, son of Henry Joseph of Berthier, one of Canada's merchant princes, who gained prominence as the organizer and director of many of the most important Canadian public companies and institutions. His brother Jacob was connected with the promotion of early Canadian railways and telegraph lines, and another brother, Gershom, was the first Hebrew lawyer appointed a queen's counsel in Canada. All these men were officers of the Spanish and Portuguese synagogue, which also numbered among its active workers Goodman and William Benjamin, G. I. Ascher, and Jacob L. Samuel.

Up to the middle of the nineteenth century the Spanish and Portuguese Jews of Montreal maintained the only synagogue in Canada; but about the year 1845 a sufficient number of Jews had settled in Toronto to lead to the organization of a synagogue in that city. Little, however, was accomplished until 1852, when a "bet ḥayyim" (cemetery) was purchased; and the Holy Blossom congregation was established. Mark Samuel, Lewis Samuel, and Alexander Miller did much to sustain the first Toronto congregation in its early struggles. Under the energetic presidency of Alfred D. Benjamin, during the closing years of the nineteenth century, it grew so greatly in strength and numbers that it became necessary to remove from its first building in Richmond street to its present (1902) commodious edifice in Bond street. The arrival of many Hebrew settlers has lately increased the number of Toronto's Jewish communal organizations; and, in addition to founding new congregations, the community has established excellent benevolent and literary societies.

Polish-Jewish Settlers.

In 1846 several Polish-Jewish families arrived in Montreal, and in the same year organized a synagogue, following the German and Polish, or Ashkenazic, customs. This led the Spanish and Portuguese Jews to seek and obtain (1846) a new act of incorporation from the legislature, the German and Polish congregation being incorporated by the same bill. The new congregation, however, was short-lived; for although the Sephardim aided their brethren with subscriptions and the loan of a scroll of the Law, the Montreal community was as yet too small to support two synagogues, and the first Ashkenazic congregation was in consequence dissolved soon after its formation. In 1858 a second effort was made to organize a German and Polish synagogue in Montreal, this time with success. Abraham Hoffnung, M. A. Ollendorf, and Solomon Silverman were among the most active of its charter members; and the Rev. Samuel Hoffnung was its earliest minister. He was soon succeeded by the Rev. Mr. Fass, who in turn was followed by other prominent ministers. The first building of this congregation was in St. Constant street, and was dedicated in 1860. Its corner-stone was laid by David Moss, who belonged to a family that was active in advancing the welfare of this congregation during three decades. The act of 1846 was first availed of; but in 1902 the congregation secured a separate act of incorporation. In 1886 they removed to their new edifice in McGill College avenue.

Meanwhile the Spanish and Portuguese congregation had been deprived by death of the services of Dr. Abraham de Sola (1882). He was succeeded by his eldest son, Rev. Meldola de Sola. As the Spanish and Portuguese congregation continued to grow during the latter's incumbency, a new synagogue was erected in Stanley street, where the congregation moved thence from Chenneville street in 1890. The new edifice was of Judæo-Egyptian architecture, and owed its design to Clarence I. de Sola, one of the sons of Dr. Abraham de Sola, who was honorary secretary of the building committee. In 1890 Shearith Israel secured a new act of incorporation from the legislature.

Jewish congregations were meanwhile springing up in other parts of Canada. The discovery of gold in British Columbia in 1857 led to the settlement there of a Hebrew colony, which built a synagogue in Victoria in 1862. In 1882 a synagogue was erected in Hamilton; and a couple of years later the Jews of Winnipeg organized two congregations. Halifax, St. John (New Brunswick), Ottawa, and London (Ontario) followed in the next decade. In Quebec, Israelites had settled soon after the British conquest, and a bet ḥayyim and a temporary synagogue were opened there as far back as 1853. But the Hebrew population of the ancient fortress city remained small for a long while, although attempts were made from time to time to organize. Abraham Joseph (born 1815; died 1886), a son of Henry Joseph of Berthier, was the most prominent of Quebec's Jewish citizens. He was identified with many of its most important commercial enterprises, and was at one time selected as candidate for the mayoralty.

The Russian Outbreaks of 1881.

The serious outrages against the Jews in Russia which began in 1881, and the persecutions and anti-Semitic outbreaks which followed in eastern Europe, caused the influx of a large number of Russian, Rumanian, Galician, and other Jewish immigrants into Canada during the two closing decades of the nineteenth century and the opening years of the twentieth. These, besides greatly swelling the population of the already established Jewish communities, formed new settlements in numerous towns and villages throughout the Dominion. Many of those who came in 1882 were assisted by the Mansion House committee of London and by a committee of Montreal Jews that had been formed through the initiative of the Montreal branch of the Anglo-Jewish Association. A citizens' committee, organized by Christian sympathizers in Montreal, of which the Anglican bishop was chairman, raised a substantial fund in aid of these victims of persecution. Some of the settlers founded agricultural colonies in the Canadian Northwest. The earliest of these was established near Moosomin in 1884 by the Mansion House committee. The experiment of making agriculturists of men who had received little and in many cases no previous training in husbandry was beset with difficulties; and the results were at first discouraging. But obstacles were gradually overcome, and the present (1902) agricultural colonies in Assiniboia, at Hirsch, Oxbow, and Wapella, seem assured of success. The establishment of these colonies was mainly due to the munificence of Baron de Hirsch, who in 1892 and succeeding years largely subsidized them; and after his death the Jewish Colonization Association continued to grant them financial aid. Baron de Hirsch's benefactions were also extended to Jewish immigrants in Canada in many other ways. He gave large sums to the Young Men's Hebrew Benevolent Society of Montreal, for the purpose of aiding and educating Jewish immigrants; and for a while that society was delegated by him and his executors to supervise the Northwest agricultural colonies. This duty is, however, now performed by a resident agent acting under the direction of the Paris committee of the Jewish Colonization Association.

Agricultural Colonies.

The Young Men's Hebrew Benevolent Society of Montreal, which thus became so closely connected with Baron de Hirsch's work in Canada, was founded in 1863 through the efforts of Lawrence L. Levey (its first president), Isidore G. Ascher, Tucker David, Charles Levey, M. Gutman, Lawrence Cohen, Samuel Moss, Moise Schwob, and others; and among its presidents have been Jacob L. Samuel, Jacob G. Ascher, Lyon Silverman, Lewis A. Hart, Harris Vineberg, and D. A. Ansell. The large sums received by the society from Baron and Baroness de Hirsch induced its members to secure an amended act of incorporation in 1900; and its name was at the same time changed to "The Baron de Hirsch Institute and Hebrew Benevolent Society of Montreal." In addition to succoring the poor and aiding immigrants, it maintains a day-school.

The Jews of Montreal have greatly increased in population in recent years; and in 1902 they possessed nine synagogues (eight Orthodox and one Reform) and numerous communal societies and institutions, as well as a journal, "The Jewish Times." New congregations in other towns of Canada are also being founded from time to time.

Zionism.

The rise of Zionism in 1897 created much enthusiasm among the Jews of Canada; and in a remarkably short time societies in support of the movement were established in many centers. The first of these associations was organized at Montreal in Jan., 1898; and in rapid succession similar societies were established at Toronto, Winnipeg, Hamilton, London, Ottawa, Kingston, St. John, Glace Bay, Brandon, and Vancouver. Clarence I. de Sola, Joseph S. Leo, Leon Goldman, Rev. A. Ashinsky, Dr. D. A. Hart, J. Cohen, I. Rubenstein, H. Bernstein, Rev. M. de Sola, L. Cohen, and M. Shapira were among the earliest Canadian promoters of the movement. In 1899 all the Zionist societies in British North America were united under the control of the Federation of Zionist Societies of Canada. Clarence I. de Sola was elected first president of the Federation; and he represented Canada at the International Zionist Congress held in London in 1900, where he was elected member of the Actions committee, the central governing body. The Jewish Colonial Trust and the National Fund count numerous shareholders in Canada; and Zionist organizations now exist in nearly every important town in the Dominion.

During the South African war, 1899-1902, several Canadian Jews enlisted in the British army and took part in many of the battles against the Boers.

Population.

The census of 1901 gave the total Jewish population of Canada as 16,060, divided among the provinces as follows: British Columbia, 543; Manitoba, 1,514; New Brunswick, 376; Nova Scotia, 437; Ontario, 5,329; Prince Edward Island, 17; Quebec, 7,575; Northwest Territories, 215; Yukon, 54. The three largest cities, according to the same census, show the following Jewish population: Montreal, 6,790; Toronto, 3,090; Winnipeg, 1,156; adding the large number of immigrants who arrived from Rumania, Galicia, and Russia in 1901 and 1902, after the taking of the census, and adding also the many who were unenumerated in the religious census, it would seem that the Jewish population of Canada may now (1902) be estimated at from 20,000 to 25,000, of whom at least 10,000 reside in Montreal and its environs.

CANCELATION OF DOCUMENTS: An instrument in writing may be canceled by cross-lines or by other marks obliterating it, or by burning or tearing the material on which the writing occurs.

A Torn Document Invalid.

In the Jewish law there are certain peculiar methods of cancelation by the court as well as by the parties, when the purpose for which the instruments have been drawn has been accomplished. When an obligation has ceased, the instrument creating it is canceled by the court by being torn or cut crosswise through the date, through the names of the witnesses, or through other important parts of the document. Hence any document which bears such cuts or scissions is invalid, the presumption being that its validity has ceased by a judicial act (Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 52, 1; B. B. 168b). If the instrument produced before the judge has rents unlike those made by the court, and appears to have been still further torn after the judicial cancelation, in order to destroy the peculiar rents made by the court, it is invalid (*ib.* gloss).

An instrument may be canceled by the parties without the intervention of the court, by being cut with a knife, or torn in half (*ib.*). If the instrument produced does not bear these obvious marks of a deliberate intent to cancel it, but is partly obliterated or torn or spotted, it remains in full force as long as the writing can be recognized (*ib.* 52, 2); and the law provides a method for substituting a new instrument for the one thus nearly destroyed (see Authentication of Documents).

A special instance of cancelation of an instrument by the court is the case of the "ketubah" (marriage settlement). When a woman was divorced she was entitled to payment of the sum provided by her ketubah. This was usually paid to her in court upon her production of her Get and her Ketubah. After the payment had been made to her, the court took her geṭ from her, tore it crosswise, and wrote on it these words: "We have torn this geṭ not for the purpose of canceling it, but in order that the wife may not again use it to claim the amount of her ketubah" (Ket. 89b). This act was a cancelation of the ketubah, although it was the geṭ which was torn and indorsed by the court. Unless the geṭ was produced the woman could not claim her ketubah. After the Hadrianic revolt the law was changed. Among the edicts of the Roman authorities intended to suppress the last remnants of Jewish national life remaining after the unsuccessful rebellion was one making it a crime for Jews to write a geṭ. This resulted in the practise of destroying the latter immediately after it had been delivered to the wife, so that its production might not incriminate the parties. Thereupon R. Simon ben Gamaliel decreed that the non-production of the geṭ could not deprive the woman of her right to claim the ketubah, if the divorce were otherwise proved to have taken place (Giṭ. 64a; Mishnah Ket. ix. 9).

Cancelation of the Ketubah.

A peculiar case of cancelation of a contract by the act of one of the parties without the knowledge or consent of the other was the preparation of a "sheṭar moda'a" (declaration of protest). This could be done in cases where one had been forced against his will to enter into an obligation. In such cases the person under duress, before actually entering into the obligation into which he was being forced, made a declaration before witnesses to the effect that he was about to be forced into an agreement against his will, and that he intended to contest its validity thereafter on that ground. This declaration was reduced to writing and signed by the witnesses, and could be used afterward for the purpose of canceling the contract made under duress.

The following form of such a sheṭar is given in "Naḥalat Shib'ah," form 43:

> "Before us, the subscribing witnesses, came A, son of B, and said to us, 'Be ye witnesses that I protest before you that C, son of D, owes me the sum of ————, and now he seeks every means to evade payment, and if I sue him in court, he threatens to claim poverty or to run away, and I am therefore obliged to compromise with him on his own terms, for fear lest he may seek means to injure me. I therefore declare before you that I am compelled under pressure of necessity to compromise with him; but hereafter I wish, by producing this instrument, containing my protest, before you, to cancel the compromise made, and to demand payment of the entire debt. For the compromise I am about to make with him is the result of duress and against my will. Even though I may declare in the instrument containing the said compromise that this protest and all its proofs are invalid, I shall be doing it not of my free will, but under duress, as is known to you, and thereafter I intend to cancel it all through this instrument.' This protest A, son of B, declared before us, and we the subscribers having observed his condition, and knowing it to be true and recognizing the great duress under which he is going to do this act, have received this protest from him and have written it and signed it before the compromise is made. This day and year," etc. (Signed by two witnesses.)

According to ancient law, when a husband had sent the geṭ to his wife by a messenger, he had the right to cancel it in this manner even before she received it, although neither the messenger nor the wife was present at the cancelation. The consequences of this were disastrous. The woman receiving the geṭ believed herself divorced, and might remarry, only to discover afterward that her husband had canceled the geṭ, this making her an adulteress and bastardizing her children by her second husband. Rabban Gamaliel abolished the right of the husband in such a case unless the wife or messenger were present (Mishnah Giṭ. iv. 2), and his decision was supported by the later authorities (*ib.* 33a). In cases of bills of manumission of slaves, the master had a similar right under the ancient law; but the sages decided that after he had directed his slave to become free, he could never revoke the order, since an advantage may be conferred on a person in his absence, but nothing could be done to cause him loss, except in his presence (*ib.* i. 6).

There may be an implied cancelation of an instrument, as when two instruments concerning the same matter are prepared, one subsequent to the other. The second impliedly cancels or revokes the first (Ket. 44a). For cancelation of contracts see CONTRACTS; for cancelation of sales, see SALES.

BIBLIOGRAPHY: For other forms of the sheṭar moda'a see J. G. C. Adler, סדר הקוני שטרות, §§ 27, 28, Hamburg and Bützow, 1773; Judah ben Barzillai, ספר השטרות, No. 39, Berlin, 1898.

J. SR. D. W. A.

CANCER: A malignant growth of new tissue; usually in the form of a tumor. Whether removed or not, it tends to give rise to secondary growths in near or distant parts of the body, and to prove fatal. The term "cancer" is usually applied to malignant tumors formed of epithelial tissue, as carcinoma and epithelioma; but in this article sarcoma is also included.

Cancer is considered a disease of civilization, or of civilized races, and the relative mortality of large cities from this cause is greater than that of small ones.

Occurrence in Italy and England.

Lombroso, investigating the demography of the Jews in Italy, found that the mortality from cancer among the general population was 2 per cent; while the Jews showed a mortality from this disease of 3.30 per cent. He also shows that, as is the case with the general population, the disease of cancer more frequently attacks women than men.

In England Dr. James Braithwaite noticed that cancer of the uterus was seldom or never met with among the numerous Jewesses attending the gynecological out-patient department of the Leeds General Infirmary—only one case in ten years. The experience of the London Hospital, where there is a special Hebrew department, is the same—only one case in five years, against 178 among Gentile women. Dr. Braithwaite considers that the only explanations possible are difference of race or difference in diet, especially the absence of pork from the Jewish diet. On the other hand, a writer in the "British Medical Journal" (March 15, 1902, p. 681) states that, in his experience, cancer of the breast has often been met with among the Jewesses in London; and while examples of nearly every form of cancer have been seen, there has seemed to be a special tendency to development of intestinal malignant growths. Of the patients dying between 40 and 65 years of age, a large percentage have been sufferers from cancer. The writer then brings figures from the records of the United Synagogue Burial Society for three years—1898, 1899, 1900—showing that 525 deaths due to cancer occur annually among 1,000,000 Jews; while the cancer rate for England and Wales for 1896 was 764 per 1,000,000 of population. From the registrar-general's returns for London the rate for 1900 showed more than 800.

CANCER AMONG THE JEWS IN LONDON.

	Registrar-General's Returns.			United Synagogue Burial Society Returns.		
	1900	1899	1898	1900	1899	1898
Deaths from all causes.	86,007	89,689	83,936	1,612	1,725	1,649

Deaths of persons over 20 years of age from all causes...........	50,565	51,922	45,490	609	642	677
Percentage of deaths from cancer to deaths from all causes of persons over 20 years of age...............	8.4	8.8	8.9	6.1	6.5	5.02

Dr. John S. Billings has shown that in the United States cancer occurs among Jews just as often as in the general population, as can be seen from the appended table:

CANCER DEATH-RATES PER 1,000 OF TOTAL DEATHS FROM ALL CAUSES.

	Males.	Females.
Jews......................................	13.58	21.65
General population of the United States (1880)......................................	13.09	23.59

In New York City.

Statistics collected by Dr. Maurice Fishberg for the Russian and Polish Jews living in the seventh, tenth, and thirteenth wards of New York city show, on the other hand, that they are less liable to succumb to cancer than the other inhabitants of the same districts, as can readily be seen from the appended table:

The cancer death-rate among those whose mothers were not born in Russia or Poland was 325.12 per 100,000; while that of the Russian and Polish Jews was only 120.07—less than one-half.

Inquiries among surgeons and gynecologists who have a large experience among Jews in New York city have elicited the result that Jews are comparatively less liable to be attacked by cancer than are other races. Dr. Abram Brothers states that of nearly 35,000 women examined by him (mostly Jewish) he has met with less than a half-dozen cases of cancer of the uterus in Jewish women; while he has had several dozen cases in the same time in non-Jewesses. Dr. H. J. Boldt, basing upon an experience gained by the examination of more than 1,000 Jewish women annually, states that although he has operated upon a large number of Jewish women for cancer of the uterus, the proportion of the disease in this race, compared with others, is very small. A rough estimate is about one-tenth or even less. The same holds good with cancer of the breast, so far as his experience goes.

As to the comparative morbidity of the Jews in the United States from cancer, the following statistics have been collected from the "Annual Reports" for 1898, 1899, 1900, of one Jewish hospital in New York city (Mount Sinai), and compared with the cancer cases from a hospital which admits few Jews (St. Luke's). These are given in the following table:

Parts Affected by Cancer.	Mount Sinai (Jewish), 9,497 Patients.		St. Luke's, 7,933 Patients.	
	Number of Cancer Cases.	Per cent of Cancer.	Number of Cancer Cases.	Per cent of Cancer.
Uterus.......	18	6.98	59	15.98
Breast.......	32	12.40	91	24.59

Results of Inquiry.

it is less frequently met with than in other races. (2) Carcinoma and epithelioma, or true cancer, are more frequent among the general population—4.07 per cent of the total number of patients sick from all causes were affected by these forms of cancer; while among Jews the percentage was only 2.10 or about one-half. (3) Sarcoma is somewhat more frequent in Jews than in others; 0.061 per cent of sick Jews were affected with this form of malignant disease as against 0.059 per cent of the general population; 22.47 per cent of all cases of malignant disease among Jews suffered from sarcoma; while of the patients from the general population suffering with malignant disease, only 12.70 per cent were afflicted with sarcoma. (4) Cancer of the uterus and breast is less frequent in Jewish women than in other races. (5) Jews are more liable than non-Jews to be affected with cancer of the gastro-intestinal organs. Nearly 45 per cent of all cases of malignant disease in Jews occurred in the stomach, intestines, liver, pancreas, rectum, etc.; while in non-Jewish patients only 23 per cent of patients suffering from malignant disease were affected with cancer of these organs. (6) The only part of the gastro-intestinal tract which is less often attacked by cancer in Jews than in non-Jews is the rectum, and this notwithstanding the fact that Jews are markedly sufferers from other rectal diseases, such as Hemorrhoids, fistula, etc.

According to all available statistics, cancer is more than twice as frequent in women as in men, owing to the occurrence of the disease in the breast and womb. Among Jewesses, on the other hand, cancer of the breast and womb is less common than among the general population. As has been shown, these organs appear to be affected less than one-half as often as in the patients in the non-Jewish hospital. This explains why the total percentage of cancer is lower among Jews than in other races.

CANDIA. See Crete.

CANDIA, ISAAC B. SAUL CHMELNIKER: Hebrew poet; lived at Warsaw, Poland, in the first half of the nineteenth century. He is the author of an elegy on the death of Alexander I., emperor of Russia (Warsaw, 1826), the poem being accompanied by a German version of Elkan M. Engel. Candia also wrote "Toledot Mosheh" (The Generation of Moses), a dramatic poem in two acts based on the life of Moses, and supplemented by other poems, original, or translated from Schiller's "Die Bürgschaft," and from Gellert (Warsaw, 1829). His dedication ode was written on the occasion of the dedication of a house of prayer and a house of the study of the Law (Sept. 25, 1840).

CANDLE TAX. See Taxes, Jewish, in Russia.

CANDLESTICK (Hebrew, "menorah"; Aramaic, "nebrashta," Dan. v. 5): Mentioned as a secular object only in II Kings iv. 10. The candlestick in the Temple, however, is often referred to, although there is no reliable information from earlier times concerning its use and shape.

Candlestick in Pre-Exilic Time.

(1) In the temple of Shiloh a "ner" (lamp) is mentioned, but not a "menorah" (candlestick); according to I. Sam. iii. 3, the lamp seems to have burned only at night. In I Kings vii. 49 ten golden candlesticks are referred to, five of which stood to the right and five to the left of the "debir" (oracle); and in Jer. lii. 19 menorot are also found, though not in the parallel passage, II Kings xxv. 14. By modern critics, however, both I Kings vii. 48–50 and Jer. lii. 19 have been held to be interpolations. It may be merely accidental that we have no stronger references to the use of candlesticks in Solomon's Temple, for the number ten is undoubtedly based on ancient tradition; and if Solomon had no golden candlesticks, he probably had them of bronze, cast for him by Huram (compare Stade's "Zeitschrift," iii. 173 *et seq.*).

Two Candlesticks of the Second Temple, and of the Tabernacle.

(2) The seven-branched candlestick in the tabernacle, described in Ex. xxv. 31 *et seq.* and xxxvii. 17 *et seq.*, is attributed by the critics to post-exilic times, for the description is that of the candlestick of the Second Temple. It was chased of pure gold, and called, therefore, "menorah ṭehorah" (Ex. xxxi. 8, xxxix. 37; Lev. xxiv. 4). From a pedestal ("yarek"), which is not described, rose the trunk, and from this spread the branches ("ḳaneh"), curving upward from the stem at three points in a vertical line; on the trunk there are said to have been four, and on each of the branches three, calices shaped like almond blossoms; that is, bulbs with opening buds. On the branches were seven lamps ("nerot"), which were removed every day for trimming and refilling, and hence were called "nerot hamaʻarakah" (Ex. xxxix. 37). As the lamps evidently had spouts from which the wicks protruded, thus throwing the light principally to one side, the lamps had to be turned in such a way as to make the spouts point northward, for the candlestick was set over against the southern wall, in order to be to the left of any one entering the sanctuary.

Symbolism of the Candlestick.

This candlestick corresponds on the whole to the one described in Zech. iv. 1 *et seq.*, except that the latter has seven branches, while the one referred to in Ex. xxv. 31 *et seq.* has only six branches, the seventh light being fastened in the center. Both, however, represent a tree with six or seven branches respectively, as is evident from the fact that the candlestick in Ex. xxv. 31 *et seq.* is ornamented with almond blossoms. The assumption that this seven-branched candlestick has a symbolic meaning is confirmed by Zech. iv. 1 *et seq.* The seven lights may be said to represent the seven

planets, which, regarded as the eyes of God, behold everything. The light in the center, which is especially distinguished, would signify the sun, as the chief of the planets. It is possible that with this was also combined the mystic conception of a celestial tree, with leaves reaching to the sky, and fruit typifying the planets. How the connection with an almond-tree arose is not known, but it may have been through the idea of stars as representing almonds. This symbolism was probably due to foreign influence, for in the Babylonian religion the seven planets are the seven chief gods (compare Gunkel, "Schöpfung und Chaos," pp. 124 *et seq.*). Zerubbabel's temple contained only one candlestick, as Ecclus. (Sirach) xxvi. 22 expressly states; Antiochus Epiphanes had it removed and broken (I Macc. i. 22), while Judas Maccabæus restored it (iv. 49 *et seq.*). Pompey saw the candlestick in the sanctuary (Josephus, "Ant." xiv. 4, § 4), and it was also in the sanctuary of Herod's temple ("B. J." v. 5, § 5). Illustrations of the seven-branched candlestick are found on the triumphal arch of Titus and on Jewish coins (see Madden, "Jewish Coinage," p. 231). For later history see TITUS, ARCH OF.

It was forbidden to make copies of the golden candlestick for ritual purposes; and for other uses, only five-, six-, or eight-branched, instead of seven-branched, candlesticks could be made. It is doubtful whether this restriction had anything to do with the fact that Onias hung up a golden chandelier in the temple of Leontopolis (compare Josephus, "B. J." vii. 10, § 3).

[The symbolism of the almond-tree is probably explained by Jer. i. 11. The traditions of the Rabbis may be found in Men. 28b and Maimonides, "Yad," Bet ha-Beḥirah, iii. 1–5. According to this authority the pedestal rested on three feet; other metal could be used than gold, and only when gold was used was the required weight ("kikkar") insisted on. Otherwise the candlestick could even be hollow, but under no circumstance was it permissible to use for its manufacture broken scraps of metal. Josephus says that three of the lamps were kept burning during the day, while at night the entire seven were lighted; but his statement conflicts with the explanation of the later rabbinical commentators, who hold that the lamp was lighted only during the night (Ibn Ezra and Rashi to Ex. *l.c.*). The prohibition of imitations applies to all Temple or tabernacle utensils (Men. 28b). Of interest as bearing on the distinction between "ner" and "menorah" may be the Midrashic story of the woman married to a man of lower social standing, likened to a "golden candlestick with an earthen lamp on top" (Gen. R. xx.). Compare MENORAH, ḤANUKKAH.—E. G. H.]

CANKERWORM. See LOCUST.

CANNEH: A city mentioned in the long list of the contributors to Tyrian greatness and commercial power (Ezek. xxvii. 23). The name occurs in no other passage. Cornill takes it to be the "Calneh" of Amos vi. 2; and one manuscript has that reading, which would, however, rather give the "Calneh" of Gen. x. 10. According to Kiepert, it was Καιναί, a city on the Tigris. Mez ("Gesch. der Stadt Harran," 1892, p. 33), indorsed by Cheyne ("Encyc. Bibl." i. 648), proposes to emend the name to "B'nai Eden"; but, as Bertholet ("Kurzer Hand-Commentar," on Ezekiel) remarks, it would be extraordinary indeed for such a familiar word as "B'nai" to be corrupted into a form like "Canneh."

E. G. H. G. B. L.

CANON: A rule for the inclusion of certain books within a certain degree of sanctity; hence also the word "canonical." See BIBLE CANON. J.

CANOPY, BRIDAL. See ḤUPPAH.

CANSINO: Spanish-Jewish family, famous in history for its wealth and influence, its scholars and poets.

Jacob Cansino I. served as an interpreter at Oran, a Spanish colony in northwestern Africa, under Charles V., until 1556, when he was sent as an ambassador to the king of Morocco. The office was then held in regular succession by his son Isaac Cansino from 1568 to 1599, by his grandson Ḥayyim (Ḥayen) from 1601 to 1621, and by his great-grandson Aaron from 1621 to 1633. After an interval of three years Aaron's brother, Jacob CANSINO II., received the appointment (1636), and served until his death in 1666. He is known by his translation into Castilian of "Extremas y Grandenzas de Constantinopla," from the Hebrew of Moses Almosnino.

Other prominent members of the family were Solomon Cansino, poet; Moses Cansino, scholar; Samuel Cansino, cantor in the synagogue, and wealthy philanthropist, who ultimately lost the whole of his fortune to gamblers; and Rabbi Abraham Cansino II., secretary of the Jewish community of Oran.

BIBLIOGRAPHY: Grätz, *Gesch. der Juden*, x. 413, note 2; Luzzatto, in *Kerem Ḥemed*, iv. 34-35; Wolf, *Bibl. Hebr.* iii. 524-526, No. 1101; Jost, *Gesch. der Israeliten*, viii. 42.

D. A. R.

CANSINO, ABRAHAM BEN JACOB: 1. Poet; lived in the seventeenth century. He is the author of "Aguddat Ezob" (A Bunch of Hyssop), a collection of poems and rhetorical compositions, in three parts, praised very highly by Isaac Cansino and David Abu al-Khair (אבו אלכיר). Abraham Cansino was once arrested by the Spanish authorities for having in his possession copies of the Babylonian and Palestinian Talmuds. His son was also taken, and both were sent to Murcia, Spain, where they were treated like prisoners for a time, and fined $400; the copies of the Talmud were confiscated. His friends and relatives wrote poems of consolation to him; to these he replied from Murcia.

2. An authority mentioned in the Maḥzor Oran as writing, in the name of the Jewish community of

Oran, to the communities of Algiers in 1661, of Jerusalem in 1663, and of Hebron in 1668. In 1679 he lived in Leghorn, Italy, where he received a letter from Tunis. This Abraham Cansino may be identified with Abraham Cansino, rabbi and preacher, brother of Isaac Cansino of whom Wolf speaks ("Bibl. Hebr." iii., Nos. 143b, 1101, and 1265c). Kayserling mentions an Abraham Cansino who was rabbi at Leghorn in 1685, and evidently refers to the same person. Luzzatto thinks that this Abraham Cansino is not to be identified with the poet of the same name.

3. An authority mentioned in the Maḥzor Oran as living at Leghorn in 1709. As he is not addressed by the titles usually given to rabbis, Luzzatto thinks that he was not a rabbi, and therefore not to be identified with either of the above. The epitaph of an Abraham Cansino written by Jacob Sasportas is given in the Maḥzor Oran, but furnishes no indication of the place or date of its writing.

Mention is also made of an Abraham Cansino, author of the epitaph on David Francis, who died about 1696.

Bibliography: Kayserling, *Bibl. Esp.-Port.-Jud.* p. 33; S. D. Luzzatto, *Kerem Ḥemed*, iv. 34-35. See Isaac Cansino and Cansino family.

D. A. R.

CANSINO, ISAAC (BEN ḤAYYIM): Poet and prominent member of the Jewish community of Oran; died in 1672; probably a brother of Jacob Cansino II. He was a liturgical poet of high attainments, and cantor in the synagogue on the Day of Atonement, an office regarded as a post of honor. Cansino's greatest work is the first part of the so-called Maḥzor Oran, which contains many poems written by him. Among his occasional poems are one in praise of the collection of poems, "Aguddat Ezob," by Abraham Cansino (1); a dirge on the death of Aaron Cansino in 1633; and one of sympathy to Samuel Cansino on the occasion of the loss of his fortune by the cheating of gamblers.

Wolf ("Bibl. Hebr." iii., Nos. 1265c and 1101) speaks of Isaac Cansino, a brother of Abraham Cansino, who embraced Christianity after the expulsion of the Jews from Oran in 1668. This Isaac Cansino, however, can hardly be identical with the one above mentioned. Kayserling also mentions an Isaac Cansino, publisher at Amsterdam in 1685, whose relationship with the Cansinos of Oran is unknown.

Bibliography: Kayserling, *Bibl. Esp.-Port.-Jud.* p. 33; Luzzatto, *Kerem Ḥemed*, iv. 34-35; Jost, *Gesch. der Israeliten*, viii. 42. See Abraham Cansino and Cansino family.

D. A. R.

CANSINO, JACOB: "Vassal of his Catholic majesty and interpreter of languages in the places of Oran" (so styled by himself); died Sept. 19, 1666. He was the fifth in succession of the Cansino family to hold the office of royal interpreter. Upon the death of his brother Aaron in 1633, the office was given by King Philip IV. of Spain to Yahob Caportas (whom Graetz identifies with Jacob Sasportas), a member of an influential Jewish family which rivaled the Cansinos. Thereupon Jacob Cansino came to Madrid, petitioned the king for the office in consideration of the services rendered by his family to the government, and obtained the appointment in 1636, with a salary of 25 scudi (dollars) per month.

As a man of letters Jacob Cansino is known for his translation into Castilian of a Hebrew book by Moses Almosnino, under the title "Extremas y Grandenzas de Constantinopla," published at Madrid by Francisco Martinez, 1638. The preface includes an extract from the book of the royal secretary, Augustus Maldonatus, enumerating the various offices held by members of the Cansino family, and a letter from King Philip IV. in appreciation of their services. Jacob Cansino excited the enmity of Marquis de Los Veles, governor of Oran, who wished to give the office held by the former to the husband of one of his favorites. Jacob was too firmly established in his position, however, and remained in office until his death. In 1668 the Jews were expelled from Onra at the instigation of the governor.

Bibliography: Grätz, *Gesch. der Juden*, x. 235, 413, note 2; Kayserling, *Bibl. Esp.-Port.-Jud.* p. 33; Luzzatto, *Kerem Ḥemed*, iv. 34-35; Wolf, *Bibl. Hebr.* iii. 524-526, No. 1101; Jost, *Gesch. der Israeliten*, viii. 42.

D. A. R.

CANSTATT, KARL FRIEDRICH: German physician and medical author; born at Regensburg July 11, 1807; died at Erlangen March 10, 1850. He was one of the pioneers of the modern school of medicine in Germany, and numbered Professor Virchow among his pupils. Canstatt studied at the University of Vienna and, later, under Schönlein at Würzburg, where in 1831 he obtained his doctor's degree. A year later he went to Paris to study Asiatic cholera, then epidemic in the French capital. His monograph on this disease, published the same year, attracted the attention of the Belgian government, which commissioned him to plan a cholera hospital.

He remained in Brussels until 1838, when he returned to Regensburg to practise ophthalmology, in which he had won signal success in Belgium. The same year he was appointed official physician to the provincial law court at Ansbach, where he remained until 1843. On the death of Hencke (1843) he was called to the University of Erlangen to fill the chair of pathology. Three years later he was attacked by tuberculosis, and thinking that a change of air would benefit him, he went to Pisa, Italy; but he remained there for a short time only, and on his return to Erlangen he died.

Canstatt's greatest service to medicine was the conception and publication of the "Jahresbericht über die Fortschritte der Gesammten Medicin Aller Länder," begun in 1841 and continued after Canstatt's death by Professor Virchow. The work next in importance was his "Handbuch der Medicinischen Klinik" (1841). Other publications were: a monograph on diseases of the eyes (1841); "Die Cholera in Paris" (1832); "Ueber die Krankheiten der Choreida" (1837); "Die Krankheiten des Höheren Alters und Ihre Heilung" (1839); "Die Specielle Pathologie und Therapie," etc. (1841-42); a monograph on Bright's disease (1844); and "Klinische Rückblicke und Abhandlungen" (1848).

CANTARINI: A distinguished family of Italian Jews tracing their descent from **Gherescion (Grassin) Cantarini,** who, when one year old, was driven from his native place, Asolo, and was taken to Padua (1547), where his descendants were leaders of the community for the next 300 years. A sketch pedigree, including the best-known members of the family, may be made up as follows:

CANTARINI, ḤAYYIM MOSES (ANGELO) BEN ISAIAH AZRIEL: Italian physician, rabbi, poet, and writer; lived in the second half of the seventeenth and the first half of the eighteenth century at Padua, where he was also instructor in the yeshibah. He published in Italian: "Chirurgia Pratica," Padua, 1677. At his death he left the following manuscript works in Hebrew (Ghirondi MSS.): "Haggahot," glosses on some halakic works of post-Talmudic authors; "Mar'eh ha-Seneh" (Vision of the Thorn-Bush), a description of a persecution of the Jews at Padua, probably of the same one of which the work of his uncle Isaac Ḥayyim Cantarini, "Paḥad Yiẓḥaḳ," treats. Responsa of his are also extant in manuscript.

Wolf ("Bibl. Hebr." iii. 565) mentions Cantarini's correspondence with the Christian scholar Unger of Silesia on the history of the Jews in Italy.

Bibliography: Nepi-Ghirondi, *Toledot Gedole Yisrael*, pp. 102, 230; Steinschneider, *Hebr. Bibl.* 1876, p. 37; *ib.* 1877, p. 89.

CANTARINI, ISAAC ḤAYYIM (VITA), (also called **Raphael ben Jacob Isaac ha-Kohen**): Italian poet, writer, physician, and rabbi; born Feb. 2, 1644, at Padua; died there June 8, 1723. He studied Hebrew and the Talmud with Solomon Marini, author of the "Tiḳḳun 'Olam," and with the poet Moses Catalano. His instructor in the secular branches was Bernardo de Laurentius.

Cantarini received his diploma as physician at Padua Feb. 11, 1664; and in addition to following the profession of medicine, he very often preached in the Ashkenazic synagogue. His sermons were frequently attended by Christians, the number of these on one occasion being so great that the Jews had to find seats in the women's gallery. He also taught in the yeshibah, and officiated as cantor, especially on the Day of Atonement. As he had a thorough knowledge of the Talmud, his decisions were often sought in halakic cases.

Cantarini had an extensive practise, especially among the patricians outside of Padua, but at the end of his life, having lost his property through others, he was in straitened circumstances. Many elegies were written at the time of his death, among others by his pupil Moses Ḥayyim Luzzatto, Venice, 1728.

His Style.

In his poetical writings Cantarini based his language almost exclusively on that of the Bible; his sentences containing, in addition to innumerable conceits, allusions to Biblical expressions. The contents of his works must be judged apart from their unpleasing form, being remarkable for pithy sense and elegant definition.

The most important of his Hebrew works is "Paḥad Yiẓḥaḳ" (The Fear of Isaac), a description of the attack on the ghetto at Padua by the Christian populace Aug. 20, 1684, published at Amsterdam, 1685. The work contains a detailed account of all the incidents, in most of which he had taken part ("Oẓar Neḥmad," iii. 131); and many documents of the governments of Padua and Venice are therein translated and quoted in Hebrew. An account of the internal condition of the community, together with statistics, serves as an introduction (p. 10). The author develops entirely modern theories on the causes of these occurrences in the political as well as the physical world (5a *et seq.*). Noteworthy also is his decided tolerance toward Christians (see, for instance, pp. 9a, 23g).

His Poems.

The following poems were published by Cantarini; they are nearly all occasional: "Pi Sefarim" (Mouth of Books), festal songs written when the teachers of the yeshibah decided to include the study of the treatise of Ḥullin (Venice, 1669). A poem in the form of a psalm, on the delivery of the community from the hands of the populace Aug. 20, 1684, is printed in the "Paḥad Yiẓḥaḳ" (p. 51b), which was formerly read every year on the anniversary of the attack (10 Elul) in the synagogue. Other poems are printed in his works "'Eḳeb Rab" and "'Et Ḳeẓ" (see below), and in the prefaces to the "Kebunnat Abraham" of Abraham Cohen, and the "Ma'aseh Ṭobiah" of Tobias Cohen. Cantarini also wrote a paraphrase of the majority of the Psalms, which has not yet been printed. Many of his poems in manuscript were in Ghirondi's possession. Some of his poems have also been inscribed on the walls of the large Ashkenazic synagogue of Padua, which was built during his life. His "'Et Ḳeẓ" (Time of the End) deals with the time of the advent of the Messiah (Amsterdam, 1710), while the "'Eḳeb Rab" (Great Consequence), is a collection of responsa in Hebrew and Italian, concerning the oath which the tax-collectors of the community of Padua took before the wardens (Venice, 1711). The manuscript of his "Leb Ḥakam" (Heart of the Wise) was in Ghirondi's possession. His "Ḥayye Besarim" (Physical Life), "Leb Marpeh" (Healing Heart), and "Shibat Tishbi"

(Reply to the Tishbite), a polemic against Elijah Levita's "Tishbi," have not yet been printed. Cantarini's Hebrew letters, addressed to the Christian scholar Unger of Silesia, are interesting as containing notices on the Jewish writers of Italy (Hamburg MS. No. 335, reprinted in "Ozar Neḥmad," iii. 128 *et seq.*). Halakic responsa of his are printed in Isaac Lampronti's "Paḥad Yiẓḥaḳ" and in Simson Morpurgo's "Shemesh Ẓedaḳah" (Oraḥ Ḥayyim, No. 4, and Ḥoshen Mishpaṭ, No. 33).

Latin Works.

In Latin Cantarini wrote the "Vindex Sanguinis," a reply to the work on blood accusation of Jacob Geuze (Amsterdam, 1681). Three Latin letters by him have also been published; one of them dealing with natural history, is addressed to his teacher Bernardo de Laurentius (Padua, 1856, ed. Osimo).

An Italian responsum of his is mentioned (translated into Hebrew in Isaac Lampronti's "Paḥad Yiẓḥaḳ," under עוקר). Many of his Italian sermons in manuscript were in Ghirondi's possession. There have also been preserved several "consulti" (partly in Latin) on medical subjects ("Oẓar Neḥmad," iii. 148).

CANTARINI, JUDAH (LEON) BEN SAMUEL (SIMON) HA-KOHEN: Italian physician and rabbi; born about 1650 at Padua; died there April 28, 1694. He had a large practise among the Christian as well as the Jewish population of that city, visiting the poorer of his patients four times a day without charge. Cantarini founded a yeshibah in the synagogue of the Ashkenazim, where he taught the Talmud, in which he was very learned. He also officiated as preacher. A letter of his is extant, addressed to Jacob Lebet-Levi, and dealing with a legal quarrel in which Cantarini was involved. This letter, which testifies to his thorough knowledge of the Talmud, is written in a very pure and classical Hebrew. At Cantarini's death his nephew, Isaac Ḥayyim Cantarini, wrote his obituary.

Bibliography: I. H. Cantarini, *Paḥad Yiẓḥaḳ*, pp. 10a, 42a; *idem*, in *Oẓar Neḥmad*, iii. 145; Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 198; Steinschneider, in *Monatsschrift*, 1899, p. 472.

Map of Canterbury, Showing Position of Jewry.
(From Speed, "The Theatre of the Empire of Great Britaine," 1676.)

CANTERBURY: Large town in Kent, England, containing the metropolitan cathedral. Jews were settled here in the twelfth century. They seem to have been on very good terms with the monks, taking their side in a controversy with the archbishop. Gervase of Canterbury ("Chronicles," i. 405) was struck by the contrast between the archbishop excommunicating the monks and the Jews praying for them. Reference is made to the inn of a Jew at Canterbury (Robertson, "Materials for Life of Becket," ii. 7). In Speed's map of Canterbury there is a "Jewry Lane" opposite All Saints'; while, according to Somner ("Antiquities of Canterbury," pp. 124, 125), the site of the ancient synagogue was that of the Saracen's Inn.

Only two rabbis of any importance are said to have been connected with the town of Canterbury. These are Aaron of Canterbury and Benjamin of Canterbury, the latter of whom Joseph Jacobs has attempted to identify with a Benjamin of Cambridge (see Cambridge). The community preserved its importance up to the Expulsion, as it was the seat of an archa or chest for the preservation of deeds. Soon after the return of the Jews to England a synagogue was founded in King street, Canterbury (about 1730), and a small congregation has remained in the town up to the present day. A synagogue was built in St. Dunstan's, but was replaced (1847) by a new building, which was erected on the site of the old Templars' Church. There are now only thirteen resident Jewish families in the city, though a large number of casual poor pass through it annually.

J.

CANTHERAS: Surname of Simon, the son of Boethus, the high priest, according to Josephus "Ant." xix. 6, §§ 2, 4; compare *ib.* 8, § 1, where Elioneus, son of Cantheras, is mentioned as having also been appointed high priest by King Agrippa (41–44). Abba Saul ben Baṭnit and Abba Jose ben Johanan of Jerusalem, contemporary leaders of the Ḥasidic party, however, regarded the house of Cantheras as a different one from the house of Boethus, when they both exclaimed: "Wo unto me from the house of Boethus; wo unto me from their club! Wo unto me from the house of Kadros [Cathros = Cantheras]; wo unto me from their pen!" (see Tosef., Men. xiii. 21; Pes. 57a), while Elioneus is mentioned in Parah iii. 5 as son of Joseph Caiaphas. Grätz ("Gesch. der Juden," 4th ed., iii. 739–746, and "Monatsschrift," 1881, pp. 97–112) blames Josephus for having confused the names; Schürer ("Gesch." 3d ed., ii. 218, notes 11, 14) accepts Josephus' information as correct (compare Derenbourg, "Histoire de la Palestine," pp. 215, 233).

CANTICLES, BOOK OF. See Song of Songs.

CANTILLATION: Mode of intonation used in public recital of prayers and Holy Scripture. The infinite gradations of tone in ordinary speech serve to bring home to the listener the interrelation and coordination of the words used by the speaker. Even when the listeners do not exceed the small circle that can be reached by the ordinary speaking voice, the delicate shade of meaning to be conveyed by the structure adopted for the sentence will not be appreciated by them unless certain conventionalities of pitch are introduced in utterance. These conventionalities of pitch result in an elementary form of song, and thus became early known as "singing to speech" (*προσῳδία*, *accentus*). But when a larger audience is addressed the assistance of a sing-song utterance in marking this accent or prosody, and rendering the precise interdependence of the successive words unmistakable, has been recognized by all who have ever had to speak in the open air or in a large building, and has been from the earliest ages adopted for the public recitation of sacred texts. Among Jews the desire to read the Scriptures in the manner described in Neh. viii. 8 has from time immemorial resulted in the use of some sort of musical declamation. This mode of recitation, depending not upon the rhythm and sequence of the sounds chanted, but upon the rhythm and sequence of the syllables to which they are chanted, is known as *cantillation*.

In describing synagogal chanting, it is necessary to distinguish the intonation traditionally employed for the text of the prayers—the component sounds of which are dependent upon the momentary impulse of the reader, checked only by the fixed melody of the coda with which the benediction concludes—from the intonation traditionally employed for the text of the Scriptural lessons (the elements of which are rigidly fixed). The first is discussed in the general article on Music, Synagogal, under the heading "Prayer-Motives." The cantillation which is here described forms the musical interpretation of the Accents which accompany the text of the Hebrew Scriptures.

The Chant Preceded Its Notation.

These signs, נגינות ("strings," "musical notes"), or, in the older expression, טעמים ("adornments," "tropes"), have been discussed, from the grammatical point of view, in Accents. The musical system to which they now serve as a notation, apart from their syntactical force, must have existed long before the need was felt for such a notation, even as Vocalization was in use long before the vowel-signs were invented. The notation which fixed the traditional *pronunciation* of each word may well, as Wickes points out, have been introduced at the same period and for the same reasons as the notation which fixed the traditional *modulation*. And, similarly, the causes which have led to a geographical variation of the original sounds in the one case have brought it about in the other.

The earliest reference to the definite modulation of the Scripture occurs in the Babylonian Talmud (Meg. 32a), where R. Johanan deprecates the indifference of such as "read [the text] without tunefulness and repeat [the Mishnah] without song." The use of the term נעימה ("tunefulness") shows that a melody definite enough to cause a pleasant impression was already attached to the Scriptural reading, and that it had long passed the stage of a syllabic plain-song which could only bring out the rhythm of the cursus as one group of syllables succeeded another. The cantillation must already have become "melismatic," with groups of notes, that is, attached to the more important syllables, so that the meaning of the text as well as its rhythm received emphasis and illustration from the chant.

If the cantillation was already tuneful to contemporary ears, the way had been cleared for its hermeneutic application to the text. The vocal phrases which constituted its melodious element would, by their distinctness from the monotone recitation which joined them into tuneful succession, serve to bring out the logical and syntactical importance of the syllables sung to them from among the other syllables comparatively slurred over on one note. "In this way the music was made to mark not only the broad lines, but the finest shades of distinction in the sense; and when its signs were introduced into the text, they were also the signs of *interpunction*; no others were needed" (Wickes). For a long time no such signs, however, were necessary: the cantillation was transmitted orally, and teachers were recognized whose profession it was to give instruction in "the pausal system of the accentuation" (Ned. 37a). But precisely as in the case of the plain-song of the churches, *memoriæ technicæ* were gradually introduced in the private scrolls of individual masters, probably at a very early date—later crystallizing into the Babylonian and Palestinian systems of Accents. Before this necessity for a notation was generally felt, a system of manual signs had been developed (Ber. 62a), just as in the Greek Church, where it was called the *χειρονομία* ("Manuum variis motibus altitudinem, depressionem, flexus vocis significabant"); and the system survived into the Middle Ages, being referred to by Ben Asher (דקדוקי הטעמים, ed. Baer and Strack, 18), and later by Rashi (on Ber. 62a), while Pethahiah of Regensburg found them still practised in the Bagdad synagogues in the twelfth century. In modern times it has been noticed by Joseph Saphir in Yemen (Eben "Safir," i. 56b) and by Burkhardt in Tiberias. This chironomy, like that of the churches, must have been based upon the rise and fall of the finger as the notes employed seemed to rise and to fall in succession. However much the point and straight line, as in the fifth-century Syriac system, may have been utilized for the bases of notation, yet the manual movements and the written signs must often have mutually counteracted (compare "Manuel du Lecteur," ed. J. Derenbourg, p. 16). In its present state, however, calligraphy rarely depicts the rise and fall of the voice, for the accents are intended only to remind readers of certain intonations they have already learned by ear. So the signs do not designate any tonal value or any sort of succession of notes, but only that a conventional series of sounds are to be grouped on a syllable in a certain manner.

Early References.

The Chironomy and Notation.

Attempts have been made to reconstitute the oldest form of the cantillation by J. C. Speidel ("Spuren von der Alten Davidischen Sing-Kunst," Waiblingen, 1740), C. G. Anton (in Paulus' "Neues Repertorium für Biblische Litteratur," Jena, 1790), L. Haupt ("Sechs Alttestamentliche Psalmen," Görlitz, 1854), and L. Arends ("Ueber den Sprachgesang der Vorzeit," Berlin, 1867). But as these investigators did not combine that acquaintance at once with Hebrew grammar and history and with synagogal music on which Delitzsch rightly insists for the study of the subject ("Physiologie und Musik in Ihrer Bedeutung für die Grammatik, Besonders die Hebräische," Leipsic, 1868), the fanciful in their conclusions outweighs the probable.

The Hebrew Bible is now pointed with two systems of accents. Of the system employed in the three poetical books, אׄמׄת. Job, Proverbs, Psalms, the vocal interpretation has been forgotten, although traces of it appear to have been still retained in the fourteenth century (compare Simon ben Ẓemaḥ Duran, מגן אבות, 52b). This loss is probably due to the early discovery that for congregational use—the chief employment of the Psalms, at least—the utilization would be at once more simple and more effective of a chant identical in each successive verse, and with enough melodic definiteness and individuality to be easily remembered, in comparison with a pointed cantillation varied from verse to verse, and demanding continuous attention from the readers. The similar measurement and dichotomy of verses in these poetical books would sometimes, indeed, suggest such a fixed melody by the similar accentuation of successive verses. But the prose Scriptures are recited by an individual, and for them the commoner species of pointing is employed. For this accentuation of the "twenty-one books" the cantillation vigorously survives in a certain number of antique forms, divergent in detail of tune and especially in tonality (or scale structure), but *parallel* in character and in outline.

One Species Lost.

Principle of Parallel Tonalities Ancient.

This parallelism of divergent forms results in several divergent musical interpretations being given to the accents in each Minhag or rite traditional among Jews since the Middle Ages (remarked before 1444 in S. Duran's מגן אבות, 52b). This feature is probably of great antiquity, and may have already existed in the Talmudical age. A similar parallelism is noticeable among the various prayer-motives (or outlines of melody for intoning the devotional portions of the various services; see Music, Synagogal) in each rite, and exhibits the same uniformity of employment of different tonalities. The principle seems to be general in Jewish worship-music, and may be formulated as the specific allotment in tradition of a particular mode or scale-form to each sacred occasion, on account of some esthetic appropriateness felt to lie in the association. While the only two modes utilized in modern European music, the major and the minor, are to be met with, they are of insignificance in face of the rich variety of modes of an antique or Oriental character more frequently favored in all the musical rituals which have not recently broken with tradition. The cantillation adheres only to modes similar to those of the Catholic plain-song, probably from a contemporary development at the close of the Dark Ages. The resemblance of some tropes to intonations employed in reading the Koran is at once striking; and the tonalities preserved among the Jews closely resemble those of the Byzantine and Armenian traditions, of the folk-song of eastern Europe, and of Perso-Arab melody. This modal feeling of Jewish worship-music is still reminiscent of the musical theory and practise of eastern Asia, which radiated from Babylon to the Mediterranean and to the Indian ocean. All this suggests that a similar principle may have underlain the cantillation of the Psalms in the Temple at Jerusalem, and attracts attention to the suggestions thrown out on literary grounds by Haremberg ("Lips. Misc. Nova," 1753, ix. 2, p. 218 *et seq.*) and by Grätz ("Psalmen," 1882, p. 71) that other head-

Temple Cantillation of Psalms.

ings of the Psalms besides Gittith (viii., lxxxi.) refer to music known by the name of a particular district, according to the old Greek custom and that of Eastern races. It may be surmised that the Masoretes were no longer acquainted with that practise of the older musical school which superscribed a Psalm with the geographical name of the scale in which it was to be sung, because the liturgical Psalms nearer the close of the Canon, the chant of which may have been still known, or may have been more definite in melody form, bore no such superscription. But if the practise of later Jews (found equally among the various traditions which then had not yet diverged) of using a different tonality for each class of religious occasion had already prevailed in Temple times, it could be understood why Psalms would be headed with geographical expressions such as Gathite (viii., lxxxi.); Eolian of the East (xxii.); Susian (xlv., lx., lxix., lxxx.); Elamite (ix., xlvi.); Ionian (*Jawanit*) (lvi.); perhaps the headings of Ps. vi. and lvii., with others similarly superscribed, might be referred to the same class of technical musical rubric. In any case, scale-forms similar to these ancient ones were, and are, used by all Jews, according to the sacred day, for the cantillation now designated by the ACCENTS.

The modes employed in the prayer-motives will be discussed with them, but the modes for the cantillation may be summarized as follows, if the Gregorian nomenclature is used.

	Scriptural Reading.	Mode.
Ashkenazi	Pentateuchal (ordinary)	Hypoeolian
	" (penitential)	Mixolydian
	Prophetical	Dorian
	Lamentations	Hypodorian
	Esther	Hypolydian
Sephardi	Pentateuchal	Hypoeolian
	Prophetical	Dorian
Bagdadi	Pentateuchal	Ionian
	Prophetical	Hypodorian
Levantine	Lamentations, etc.	Phrygian
	Pentateuchal	Hypodorian

Interpretation of the Accents.

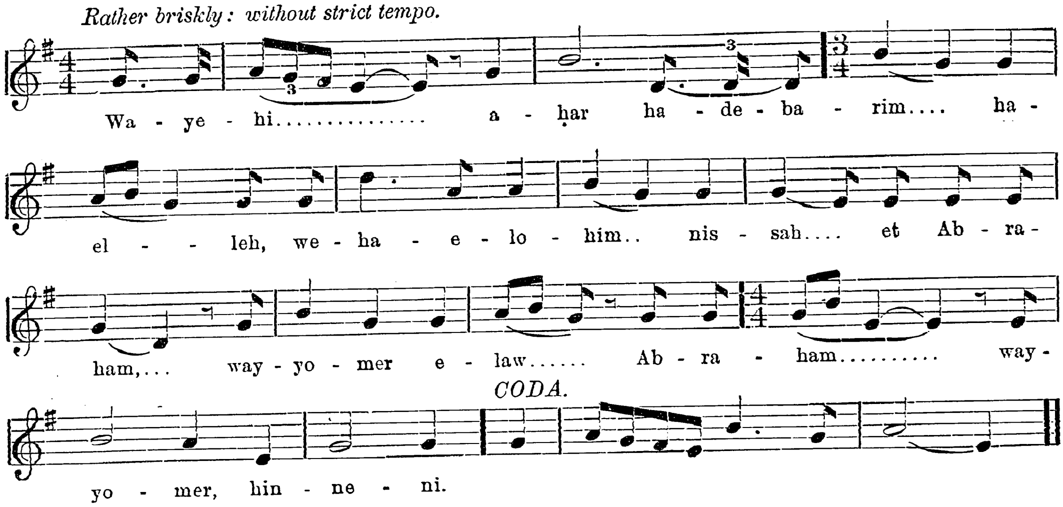
In all these varied systems of musical interpretation of the same signs each particular accent is associated with a parallel vocal figure or trope, which consists of a group of notes forming a melismatic phrase. The accents, and consequently the tropes, are either conjunctive or disjunctive. Some of the disjunctive tropes form not so much a note-group, to be sung at one effort of the voice, as a series of such groups, or what is known in plain-song as a jubilation. Sometimes a minor conjunctive will in chanting be absorbed into the more important disjunctive which may follow it; but, as a rule, one accent designates one trope, and each word (save only the few enclitics) has a trope sung upon its tone-syllable, the more immediately connected conjunctives and disjunctives running on smoothly together into a "distinction" or phrase. If the word has a penultimate accent, the last note is, where necessary, repeated; and any syllables preceding the accented syllable are recited on a note of the trope introduced for the purpose in front of the note bearing the stress, and serving to "carry on" from trope to trope, blending the several נגינות or jubilations together into a homogeneous distinction for each successive rhetorical phrase. The whole strikes the hearer with its singular effectiveness in bringing out the meaning of the text, and affords a fair idea of that bardic declamation interpreting the text chanted, which for the ancients constituted melody, as tune does for us.

Now, if the following text be taken for cantillation according to its accents—

וַיְהִ֗י אַחַר֙ הַדְּבָרִ֣ים הָאֵ֔לֶּה וְהָ֣אֱלֹהִ֔ים נִסָּ֖ה אֶת־אַבְרָהָ֑ם

וַיֹּ֣אמֶר אֵלָ֔יו אַבְרָהָ֖ם וַיֹּ֥אמֶר הִנֵּֽנִי׃

when read (according to the Northern use) as part of an ordinary Pentateuchal lesson, it will be chanted thus:



Rather briskly: without strict tempo.
Wa - ye - hi............... a - har ha - de - ba - rim.... ha -
el - - leh, we - ha - e - lo - him.. nis - sah.... et Ab - ra -
ham,... way - yo - mer e - law...... Ab - ra - ham.......... way -

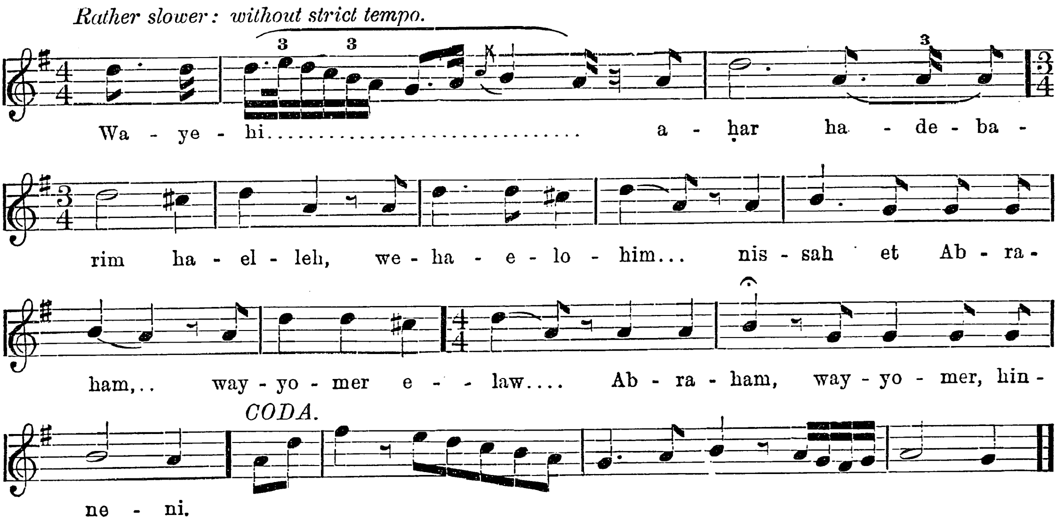
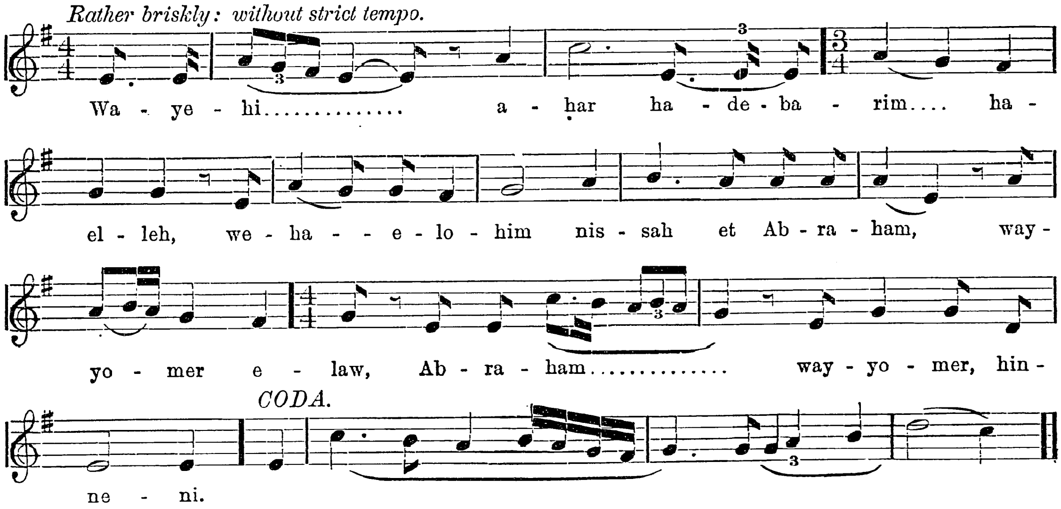
Concluded on page 548.

On the Penitential Days, however, it would be chanted with jubilations of similar outline to each accent, but the intervals of the scale drawn from quite another mode, as follows:



Rather slower: without strict tempo.
Wa - ye - hi.................................. a - har ha - de - ba -
rim ha - el - leh, we - ha - e - lo - him... nis - sah et Ab - ra -
ham,.. way - yo - mer e - - law.... Ab - ra - ham, way - yo - mer, hin -
CODA.
ne - ni.

But, again, had this passage from Gen. xxix. formed a portion of a lesson from the Prophets (Hafṭarah), its accents would have been musically interpreted in similar style, but in yet another tonality; thus:



Rather briskly: without strict tempo.
Wa - ye - hi............. a - har ha - de - ba - rim.... ha -
el - leh, we - ha - - e - lo - him nis - sah et Ab - ra - ham, way -
yo - mer e - law, Ab - ra - ham.............. way - yo - mer, hin -
CODA.
ne - ni.

The coda added to each of the above transcriptions shows the form of the "jubilation" which ends each section of the reading, a sort of musical "Here endeth the lesson," varying in figuration as well as in tonality according to the importance of the service.

It is not always certain whether the names of the accents were given to them from their shape, position, and function, or from the outline and tone of the musical sounds for which they are the notation. Words in any case rarely succeed in describing the effect of musical sounds with any approach to accuracy; and only inadequate impressions of the contemporary jubilations in use can be derived from the few statements preserved in the writings of Ben Asher, Shem-Ṭob, and Moses Provençale. Delitzsch (Psalms i., p. 44, English ed.) sums these up as follows: "Pazer and Shalshelet have a like intonation, which rises quaveringly; though Shalshelet is drawn out longer—about a third longer than that of the prose books. Legarmeh (in form Mahpaḳ or Azla, followed by Pesiḳ) has a clear high tone; before Ẓinnor, however, it is deeper and more broken; Rebia magnum has a soft tone, tending to repose [*query*: sinking to a rest-note]. In Ṣilluḳ the tone is raised at first, and then sinks to repose. The tone of Merka is, according to its name, *andante* [*query*, protracted] and sinking into the depths; the tone of Ṭarḥa corresponds with *adagio*." All that can be gathered from this is that the accents of the three poetical books were meant to be interpreted

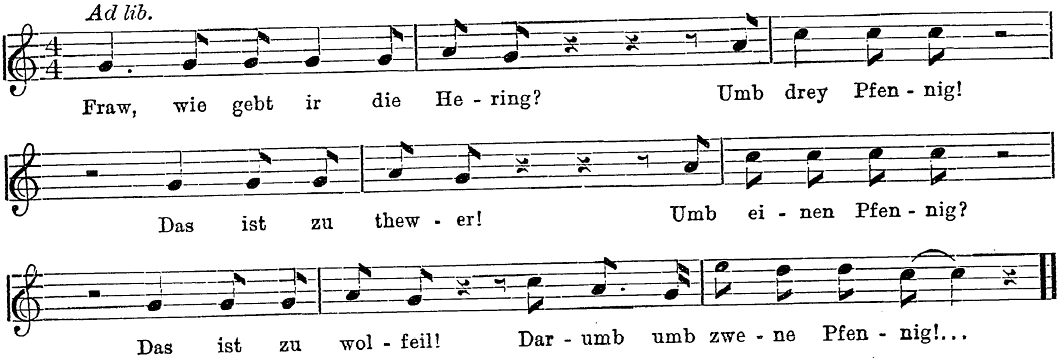
by much the same figuration of notes as those of the twenty-one prose books. Of these last similar descriptions are to be found in old writers (compare Kalonymus ben David in A. de Balmes' מקנה אברם, Venice, 1523). During the recent centuries the continued elaboration of the cantillation by the professional readers, especially among the Polish and German congregations, has overlaid the earlier elements of the chant with ornament and developed many variants, so as to render these descriptions difficult to elucidate. But they are scarcely needed, since so many musical transcriptions have been made; such transcriptions being known, from the jubilation with which they commence, as "Zarḳa Tables." The most valuable of them all, for the Ashkenazic traditions, is to be found in Cantor Abraham Baer's "Ba'al Tefillah," 1877, pp. 30–42. The value of the earlier tables (*e.g.*, those of Bartolocci, A. Kircher, P. Guarin, etc.) is detracted from by unnecessary elaboration, and especially by experiments in transcribing the notes backward, so as to go with the Hebrew from right to left, which have misled later students. Such, too, is the case with the transcription made by the monk Böschenstein for REUCHLIN, and printed in his "De Accentibus" (Hagenau, 1518), at end of Book III., where the cantillation, reversed and given in the tenor as a canto fermo, is ludicrously accompanied by three other harmony parts. But Reuchlin's tenor cantillation, when retranscribed, is particularly valuable as showing that the tradition has not appreciably varied in four centuries, save possibly in the rarer jubilations, such as "Ḳarne Farah," where license is always taken. Similarly valuable as illustrating the persistent accuracy of tradition is the transcription of the Sephardic cantillation made by David de Pinna, a Jewish surgeon in Amsterdam, for Jablonski's "Biblia Hebraica" (Berlin, 1699). The Oriental traditions have only received treatment since Villoteau followed in the train of Napoleon to Egypt, while the Bagdad forms are now first presented (from notes by Mr. Morris Cohen). The cantillation being still handed on in oral tradition, many minor variants will be found to exist, which it was not deemed necessary to include in the preceding "Zarḳa Table," where ad libitum grace notes have also been omitted from the transcription.

The Students' Cantillation.

The "repetition with song" (see above), or study of religious literature in a vocal intonation, similarly survives from the Talmudical age to the present day. But it was never so developed for the small audience in the house of study as was the Scriptural cantillation for the larger congregation in the house of prayer. Private notes in the copy of the individual here likewise originated a system of accentuation. Examples are referred to by the Tosafists and by Profiat Duran; and an accentuated copy of the Mishnah was possessed by Joseph Solomon Medigo in the seventeenth century. Indeed, one treatise of the Mishnah was printed with accents as late as 1553. The oldest extant manuscript of the Talmud, a fragment of Keritot, is marked with accents for the students' cantillation, and can be examined in the facsimile published in Singer and Schechter's "Rabbinical Fragments." Nothing, however, is known of any musical interpretation of these accents. The students' cantillation in present use varies according to the country of origin, but is more or less a mere drone, although the monotone is always abandoned at the end of the clause, according as it expresses a question or a reply, a doubt or a conclusion. Generally the question ends on the dominant, the reply on the tonic.

The earliest transcription of a students' cantillation is to be found in the Ḥeleḳ of the apostate Gerson of Halberstadt (Helmstadt, 1610), where he says that "almost the whole of the Talmud is set out in question and answer as follows." Put into modern notation, his transcription is as given on page 549.



The students' cantillation has been carried into domestic worship in the HAGGADAH, the child's question on the Passover Eve being often set out in it. The transcription on the following page is due to Baer ("Ba'al Tefillah," p. 170).

BIBLIOGRAPHY: The grammatical force of the accents is treated under ACCENTS. Almost every compilation of synagogue music covering the whole year includes some transcription of the cantillation, if only of the Pentateuch. Fuller and more careful summaries are due to Naumbourg, *Recueil de Chants Religieux*, Paris, 1874, and Baer, *Der Praktische Vorbeter*, Gothenburg, 1877, and Frankfort, 1882. For the general consideration of the melody of the accents see Wickes, *Poetical Accentuation*, Oxford, 1881, and *Prose Accentuation*, ib. 1887. Useful references are collected in Ackermann, *Der Synagogale Gesang* (I. Das Talmudische Zeitalter), in Winter and Wünsche, *Jüdische Litteratur*, vol. iii., Treves, 1894. For the musical accentuation of later texts see Steinschneider, *Jewish Lit.* p. 154; Dukes, in *Literaturblatt des Orients*, 1843–1844; and Abrahams, in *Jew. Quart. Rev.* xi. 291, London, 1899. The various traditions are coordinated in F. L. Cohen, *Ancient Musical Traditions of the Synagogue*, in *Proceedings of the Musical Assoc.* xix., London, 1893; and *Le Plain Chant de la Synagogue*, in *Revue du Chant Grégorien*, Nos. 33-36, Marseilles, 1899.

A. F. L. C.

CANTON, ISAAC BERECHIAH: Italian Talmudist; flourished about the middle of the eighteenth century in Turin, in which city he established a yeshibah. He is the author of a responsum in Simson Morpurgo's "Shemesh Ẓedaḳah" (Yoreh De'ah, 12). Ghirondi possessed in manuscript some other halakic decisions by Canton, and saw also a manuscript work of his entitled "Yetad ha-Ohel" (The Pin of the Tent), an index to Solomon Urbino's dictionary of Hebrew synonyms entitled "Ohel Mo'ed."

BIBLIOGRAPHY: Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 159; Mortara, *Indice*, p. 10.

L. G. I. BER.

CANTONI, LELIO (הלל ברוך שלום): Italian rabbi; born in 1802 at Gazzuolo (dukedom of Mantua); died in 1857 at Turin. In 1829 he went to the Istituto Rabbinico at Padua, then recently established, graduating as rabbi in 1832. From 1833 until his death he was chief rabbi of Turin. Endowed with executive ability and magnetic personality, and being a man of deep piety, he ably bridged the gulf that separated the old and the modern views of Judaism.

Recognizing his administrative ability, the government repeatedly entrusted Cantoni with the drafting of statutes affecting the Jewish communities. After the emancipation of the Sardinian Jews in 1848, Cantoni was mainly occupied with the organization of the internal administration of Jewish religious matters. To effect this he published his "Nuovo Ordinamento del Culto Israelitico nes Regi Stati," in which he advocated the establishment by the government of consistories, pointing out the means by which these could be supported. Cantoni was the chief promoter of the establishment of asylums for children, which are still maintained with success in every Italian Jewish community of importance.

He was also instrumental in founding the best schools and societies of the community of Turin. Most noteworthy among his achievements was his work on behalf of the emancipation of the Jews in the kingdom of Sardinia through the Constitution of 1848, which was subsequently transferred to united Italy. Cantoni's untimely death prevented the realization of his hopes of founding an organization to include all the communities and rabbis of Italy. In addition to writing books for the edification of the young, he was a contributor to the "Educatore Israelita" and the "Archives Israélites."

S. I. E.

CANTONISTS: Sons of Russian private soldiers who from 1805 to 1827 were educated in special "canton schools" for future military service; after 1827 the term was applied also to Jewish boys, who, according to a statute issued Sept. 7, 1827, were drafted to military service at the age of twelve and placed for their military education in cantonist schools of distant provinces.

The sons of Jewish soldiers were at this period regarded as government property and were educated for military service by the authorities, who, during the reign of Nicholas I. of Russia, had a special regard for the Jewish cantonists, as it was easier to convert them to the Greek Orthodox Church than it was to convert their elders, whose religious principles had been firmly established. The best method to obtain this result was to take them far away from their birthplace so that they could forget their religion and be unprotected against the missionary propaganda of the officers of the army (I. Orshanski, "Russkoe Zakonodatelstvo o Yevreyakh," p. 25, St. Petersburg, 1877). According to Nikitin, "Otechestvennyya Zapiski," 1871, viii. 352, those mobilized at Kiev were sent to Perm; those at Brest to Nijni-Novgorod. Eye-witnesses have many times described the inhuman tortures

H. R.

CANTOR. See Ḥazan.

CANTOR, GEORG: German mathematician; born at St. Petersburg, Russia, March 3, 1845. He is distantly related to Moritz Cantor. He was only eleven years old when he went to Germany, where he received his high-school and university education. In 1862 he entered the University of Zurich, Switzerland, but at the close of the academic year moved to Berlin, where he remained until 1867, deeply interested in his studies and enthusiastically following mathematical and philosophical lectures at the university. In 1869, two years after receiving the degree of Ph.D. at the University of Berlin, he was admitted as privat-docent at the University of Halle, where he became assistant professor in 1872, and professor seven years later.

Without being a prolific writer, Cantor has rendered invaluable services to the progress of mathematical analysis, more especially to that of the modern theory of functions, by his epoch-making contributions to the theory of multiplicities ("Mannigfaltigkeitslehre" in German, "théorie des ensembles" in French)—a doctrine which he wholly and independently created and developed. The startling but fruitful ideas embodied in his "Grundlagen einer Allgemeinen Mannigfaltigkeitslehre," Leipsic, 1883, have become the property of the best modern text-books on mathematical analysis, despite the difficult and abstruse character of the new conceptions involved.

No mathematician could to-day dispense with the perusal of the little volume that, at a single stroke, brought universal fame to the author, and opened a new and rich field for mathematical investigation. Georg Cantor's definition of the mathematical continuum, as a particular form of a more general class of multiplicities, has been of immense benefit to the progress of mathematics, and in itself constitutes an undying monument to the name of this profound philosopher and mathematician. Much of the clearness and precision of modern mathematical methods is due to his example and instigation. He endeavored to unravel the mysteries of the infinite, and succeeded in establishing, if an indirect, nevertheless a perfectly determinate conception of the mathematical infinity—theory of transfinite numbers. His rigorous mathematical theory of irrational numbers, together with the independent investigations of Weierstrass and Dedekind, filled an important lacuna in the development of modern mathematical thought. On this subject see more especially his paper "Ueber die Ausdehnung eines Satzes aus der Theorie der Trigonometrischen Reihen," in vol. v. of the "Mathematische Annalen," 1872; and the memoir "Die Elemente der Functionenlehre," by E. Heine in Crelle's "Journal für die Reine und Angewandte Mathematik," 1871, vol. lxxii.

The articles by Georg Cantor which appeared under different titles in Crelle's "Journal," in the "Acta Mathematica," and in the "Zeitschrift für Philosophie und Phil. Kritik," are, for the greater part, either reproductions or translations of papers published in the "Mathematische Annalen," and later collected, under the title "Grundlagen einer Allgemeinen Mannigfaltigkeits lehre." His "Gesammelte Abhandlungen" were published in 1890.

S. A. S. C.

CANTOR, JACOB A.: American lawyer and politician; born in New York city Dec. 6, 1854; grandson of Agil Hanau, cantor of Dukes Place Synagogue, London. Cantor is an LL.B. of the University of New York. He served as a member of the assembly of the state of New York in 1887 and as state senator from 1888 to 1898, during which time he was chairman of the finance committee of the senate and leader of the Democratic party in that body. For two years (1893-94) Cantor was president of the senate. In 1901 he was elected, on a non-partizan ticket, president of the borough of Manhattan, an office second in importance only to that of mayor of New York. Cantor has been actively interested in good government for municipalities. In the legislature he championed legislation in behalf of the public schools and colleges of New York, having charge at the same time of general measures affecting the canals.

Cantor has been prominently identified with Jewish communal work, belonging to many societies, and serving as director of the Society for the Aid of Jewish Prisoners and of the Jewish Protectory. During his fourteen years' service in the legislature he introduced and aided the passage of many measures affecting the Jewish institutions of New York. He advocated the Freedom of Worship Bill, according equal religious rights to all inmates of prisons and reformatories, and was instrumental in securing an appropriation for the compensation of Jewish rabbis ministering in those establishments.

A.

CANTOR, MORITZ: German historian of mathematics; born at Mannheim, Germany, on Aug. 23, 1829. He comes of a family that emigrated to Holland from Portugal, another branch of the same house having established itself in Russia, the land of Georg CANTOR's birth. In his early youth Cantor was not strong enough to go to school, and his parents decided to educate him at home. Later, however, he was admitted to an advanced class of the gymnasium in Mannheim. Thence he went to the University of Heidelberg in 1848, and soon after to the University of Göttingen, where he studied under Gauss and Weber, and where Stern awakened in him a strong interest in historical research. After taking his degree of Ph.D. at the University of Heidelberg in 1851, he went to Berlin, where he eagerly followed the lectures of Lejeune-Dirichlet; and upon his return to Heidelberg in 1853, he was appointed privat-docent at the university. In 1863 he was promoted to the position of assistant professor, and in 1877 he became honorary professor.

Moritz Cantor.

Cantor was one of the founders of the "Kritische Zeitschrift für Chemie, Physik, und Mathematik." In 1859 he became associated with Schlömilch as editor of the "Zeitschrift für Mathematik und Physik," taking charge of the historical and literary section of this excellent publication. Since 1877, through his efforts, a supplement to the "Zeitschrift" has been published under the separate title of "Abhandlungen zur Geschichte der Mathematik."

Cantor's inaugural dissertation—"Ueber ein Weniger Gebräuchliches Coordinaten-System," Frankfort-on-the-Main, 1851—gave no indication that the history of exact sciences would soon be enriched by a masterwork from the same author. Even his first work, entitled "Grundzüge einer Elementararithmetik als Leitfaden zu Akademischen Vorträgen," Heidelberg, 1855, only faintly disclosed the direction of his real taste and talents. These became apparent for the first time in his paper "Ueber die Einführung Unserer Gegenwärtigen Ziffern in Europa," which he wrote for the "Zeitschrift für Mathematik und Physik," 1856, vol. i. The masterwork of Cantor was only recently concluded. His "Vorlesungen über Geschichte der Mathematik," in three volumes, of which the first appeared in 1880 and the last in 1898, at Leipsic, covers the development of this science from the remotest times until the year 1758—that is, until the era of Lagrange—and is the most exhaustive and authoritative work on the subject to-day.

As a pioneer in the revived study of the history of exact sciences, Cantor stands at the head of his contemporaries. To him belongs the chief credit for founding a new discipline in a field that had hitherto lacked the sound, conscientious, and critical methods of this master. His work, both as a successful lecturer at the University of Heidelberg and as the author of numerous papers and reviews, has been an incentive to his pupils and followers and a stimulus for further investigation.

Among his other works may be mentioned: "Mathematische Beiträge zum Culturleben der Völker," Halle, 1863; "Die Römischen Agrimensoren und Ihre Stellung in der Geschichte der Feldmesskunst," Leipsic, 1867; "Das Gesetz im Zufall," Berlin, 1877.

BIBLIOGRAPHY: Supplement to vol. xliv. of the *Zeitschrift für Mathematik und Physik* entitled *Abhandlungen zur Geschichte der Mathematik*; edited by M. Curtze and S. Günther, and dedicated to Moritz Cantor on the seventieth anniversary of his birthday, Aug. 23, 1899. The carefully compiled catalogue contains, besides references to original works by Cantor, a complete list of his historical and critical reviews to date.

S. A. S. C.

CANTORI, JOSHUA DEI: Assailant of the Talmud at Cremona in 1559. According to Steinschneider, he belonged to the family Cantarini (מהחזנים). In consequence of a dispute with Joseph Ottolenghi, who was head of the Talmudical school of Cremona, Cantori, in order to avenge himself on his adversary, appeared with the converted Jew Baptista Vittorio Eliano, and denounced the Talmud as containing blasphemies against the Christian faith. The result of this accusation was the public burning of Hebrew books in 1559 at Cremona. Joseph ha-Kohen records this incident, and adds that later Cantori was found assassinated in a street of Cremona, and was buried "behind the board" in the Jewish cemetery of that city as a mark of contumely. According to another source quoted by J. Wolf ("Bibl. Hebr." i. 131), Cantori was a convert to Christianity.

L. G. I. BR.

CAPADOCE, ABRAHAM: Convert to Christianity; born at Amsterdam 1795; died there Dec. 16, 1874. His parents, who were Portuguese Jews, gave him an entirely secular education, wishing him to study medicine. After having completed his medical studies at the University of Leyden, he was adopted by his uncle, the well-known physician Immanuel Capadoce. In his uncle's house Abraham came in contact with Christians, and being animated with strong religious feelings without having been practically instructed in any religion, he yielded to the influence of his surroundings, especially to that of Isaac da Costa, who persuaded him to become a Christian.

Among Capadoce's writings the most noteworthy are: (1) "Aan Mijne Geloofsgenooten in de Ned. Hebr. Gem." The Hague, 1843; (2) "Overdenkingen over Israel's Roeping en Toekomst," Amsterdam, 1843; (3) "Rome en Jerusalem," Utrecht, 1851.

As a physician Capadoce made himself known by his opposition to vaccination. A work of his on this subject, published at Amsterdam in 1823, provoked many polemics in the medical world.

S. I. BR.

ÇAPATEIRO, JOSEPH (designated also, even by the more modern Portuguese historians, such as Mendes dos Remedios, as **José Çapateiro de Lamego**, or "Joseph, Shoemaker of Lamego"): Portuguese traveler of the fifteenth century. After a sojourn in Bagdad, he returned to Lisbon to present a report to King João II. on Ormuz, the emporium of the East-Indian spice trade. He thereupon, by the king's orders, set out in company with the experienced linguist, ABRAHAM OF BEJA, in search of the roving explorer, Pedro de Covilhão, in order to interview the latter in the king's behalf as to the results of his travels. After obtaining valuable information regarding the discovery of the sea route to India from Covilhão, who had previously gathered it from Arabian and Indian pilots, Joseph was sent home by caravan to Aleppo. Both Joseph and Abraham, his fellow-traveler, thus rendered eminent pioneer service in the cause of Portuguese discovery.

CAPE TOWN. See SOUTH AFRICA.

CAPEFIGUE, JEAN-BAPTISTE HONORÉ-RAYMOND: French Christian publicist and historian; born at Marseilles 1802; died at Paris Dec. 23, 1872. Among many historical works, Capefigue wrote a history of the Jews, entitled "Histoire Philosophique des Juifs Depuis la Décadence des Macchabées Jusqu'à Nos Jours," Paris, 1833. The author divided Jewish history into three periods, of which only the first, extending from the decadence of the Maccabees to the sixth century, is dealt with in the volume that has been published.

S. I. BR.

CAPER-BERRY (translation of אביונה, abiyyonah, Eccl. xii. 5; incorrectly, A. V. "desire," from אבה): The feminine "abiyyonah" does not express "desire," but "the desiring thing," *sc.* "soul" [so Ḳimḥi]. The Septuagint, Vulgate, Peshiṭta, and Aquila translate by *κάππαρις*, "caper-berry," which traditional translation is confirmed in the Mishnah Ma'as. iv. 6 and in other places in the Talmud, where it is carefully distinguished from the shoots, "temarot," and the floral envelopes, "ḳapperisin," and declared to be the fruit of the "ẓalef" or caper-plant): This is a woody, trailing shrub known in botany as *caparris spinosa.* It is quite common in the Mediterranean countries, where it grows on old walls and in the fissures of the rocks. Its large white flowers, with many long lilac anthers, are highly decorative. The caper of commerce, which is now eaten pickled, is the flower-bud, not mentioned in the Talmud. The "abiyyonoth," or berries proper, however, were eaten, as appears from their liability to tithes and to the restrictions of the 'Orlah. They were supposed to have aphrodisiac properties (see Delitzsch's "Ḳohelet," *ad loc.*).

For the allegorical meaning of the word "abiyyonah" in Ecclesiastes, see commentators.

CAPERNAUM (Καφαρναούμ, or, in Jewish writings, כפר נחום): Small town by the Lake of Gennesaret, mentioned in the Gospels as the home of Jesus, where he resided after his rejection by his Nazareth townsmen (Matt. iv. 13, viii. 5–17, ix. 1, xi. 23, xvii. 24; Mark i. 21; Luke vii. 1 *et seq.*; John vi. 17; Eccl. R. to i. 6 and to vii. 26, as the dwelling-place of the Minim or Christian exorcists of the second century. See also Derenbourg, "Essai sur l'Histoire et la Géographie de la Palestine," p. 362). According to these passages it lay close by the lake, and contained a synagogue built by a centurion living there. The "receipt of custom" nearby (Matt. ix. 9) probably had made it necessary to station Roman soldiers in the town. The exact site of the town can not be definitely fixed. Josephus speaks of a spring "Kafarnaum," which watered the fertile plain of Gennesaret (now plain of Ghuwair) on the northwestern side of the lake. Hence the spring must be looked for in 'Ain al-Tabighah, on the northern slopes of the plain, since water was in olden times carried down to the plain through a conduit now in ruins. Accordingly the ruins of El-Minyah, in the extreme northern part of the Gennesaret plain, have been taken by some as the site of Capernaum. This assumption is further supported by the statement of the pilgrim Arculfus (middle of the seventh century; Tobler and Molinier, "Itinerarium Hierosolymitanum," p. 183) that Capernaum lay at the base of the southern slope of a mountain. This is not decisive, however, since Arculfus did not visit the town itself, but saw it from a distance, and his further remarks can not be applied to the site of the ruins of Minyah.

But Capernaum might also be identified with the ruins close by the Tabighah spring, discovered by Schumacher. However, Theodosius of the sixth century says that Capernaum was two Roman miles from the Heptapegon (or Tabighah) spring. Jerome also says that Capernaum was two miles distant from Chorazin (probably the Kerazah of to-day). These figures apply to the well-known ruins of Tell Hum, found near the lake and rapidly disappearing. Among the blocks of black basalt are found the remains of a marble synagogue, which show that a city once stood on this spot; and as the second part ("hum") of this name is also found in "Kefar Naḥum," many scholars identify these ruins with Capernaum. If the name "Tell Hum" was originally "Tenḥum," this identification is made more probable on linguistic grounds, especially since "Kefar Tanḥum" and "Kefar Teḥumin" are frequently given as variants for "Kefar Naḥum." [See Kohut, "Aruch Completum," *s.v.* כפר; Neubauer "G. T." p. 221; Grätz, "Gesch. der Juden," iii. 307 *et seq.*—K.] This location would harmonize with the statement of Josephus ("Vita," § 72) that, after his accident on the Jordan, he was carried to a village, Cepharnome (Kephar Nome). But the reading here is not certain (compare Niese), and, moreover, Capernaum was a town, not a village.

CAPESTANG: Village in the department of Hérault, near Béziers, France. Several official documents testify to the presence of many Jews there in the thirteenth century. Simon ben Meïr, in his work, "Milḥemet Miẓwah," relates that about 1245 he took part in a religious controversy before the archbishop of Narbonne, in the presence of the leaders of the Jewish community of Capestang. Numerous scholars of the thirteenth and fourteenth centuries have borne the surname of "Capestang," which, in passing into Hebrew, underwent many alterations, as קבאשטייאן, קבשטייאן, קבאשטאיין.

The Jewish community of Capestang took part in the campaign led by Abba Mari of Lunel against Maimonides. A letter of adhesion condemning the study of philosophy was sent to Abba Mari by Isaac ben Moses ha-Kohen in the name of fifteen scholars of Capestang.

CAPHAR-SALAMA. See Kefar-Salama.

CAPHTOR: Original country of the Philistines before their emigration into Palestine, whence their name, "Caphtorim" (Deut. ii. 23; Amos ix. 7; Jer. xlvii. 4, where they are called "the remnant of the country [Hebrew, "island"] of Caphtor"). The ancient versions render "Caphtor" by "Cappadocia" (Persian, "Katpadhuka"), changing the final consonant to *k*, which is evidently only a very bold conjecture. According to Gen. x. 14 and I Chron. i. 12 (where the gloss-like remark, "out of whom came the Philistines," has, as is now generally believed, been misplaced by copyists, being properly after "Caphtorim," not after "Casluhim"), Caphtor was supposed to have been a region of Egypt. The city Koptos (Egyptian, "Kebtō[yu]") has, however, nothing to do with it, and the hypothesis of Ebers, "*Keft-ur*, Great(er) Phenicia," is entirely un-Egyptian. The country "Kft" of the hieroglyphics (earlier "Kftyw," to be vocalized probably as "Keftō"), which is not Phenicia but probably the southern coast of Asia Minor, may have had some indirect connection with Caphtor. An Egyptian inscription of the most recent period has been found, however, which, copying an earlier geographical list, enumerates "K(a)ptar" among Asiatic nations, insuring thus the correctness of the Hebrew tradition as against the versions. The popular identification with Crete (Dillmann, etc., following Calmet) rests on Jer. xlvii. 4 (see LXX.; the word "Caphtor" is a later addition, so that the passage is at least doubtful) and on the identification of the CHERETHITES with the Cretans (LXX., etc.), which would, if correct, probably determine the original home of only a part of the Philistines, without necessarily identifying Caphtor itself.

CAPISTRANO, JOHN OF: Franciscan monk; born at Capistrano, Italy, 1386; died 1456. Owing to his remarkable power as a popular preacher, he was sent by Pope Nicholas V. (1447-55) as a legate to Germany, Bohemia, Moravia, and Silesia, with the special mission to preach against the Hussites and other heretical teachings and to subdue "the disbelieving Jews," in accordance with the resolutions adopted at the council of Basel (1431-43).

His stirring sermons, in which he urged the people to repent of their sins and to fight against the Freethinkers, made a thrilling impression. Knowing how easy it is to excite the masses by appealing to their prejudices, Capistrano, in his discourses, accused the Jews of killing Christian children and of desecrating the host. The Jews trembled at his approach, for his sermons seemed like invitations to riot. His admirers called him "the scourge of the Judeans." The Bavarian dukes, Louis and Albert, influenced by Capistrano's agitations, drove out the Jews from their duchies; in some places in Bavaria Jews were forced to wear the degrading BADGE on their coats (1452). Bishop Godfrey of Würzburg, reigning duke of Franconia, who had granted the fullest privileges to the Jews of his duchy, under the influence of Capistrano issued an ordinance (1453) decreeing their banishment. The towns and landowners were enjoined to expel the Jews, and Jewish creditors were deprived of a portion of the debts owing to them.

In Silesia the Franciscan was most zealous in his work. When Capistrano arrived at Breslau, a report was circulated that one Meyer, a wealthy Jew, had bought a host from a peasant and desecrated it. Thereupon the local authorities arrested the representatives of the Breslau Jewish community and confiscated their houses and property for the benefit of the city. The investigation of the so-called blasphemy was conducted by Capistrano himself. By means of tortures he managed to wring from a few of the victims false confessions of the crimes ascribed to them. As a result, more than forty Jews were burned at the stake in Breslau June 2, 1453. Others, fearing torture, committed suicide, a rabbi, Pinheas, hanged himself. The remainder of the Jews were driven out of the city, while their children of tender age were taken from them and baptized by force.

In Poland Capistrano found an ally in the archbishop Zbigniev Olesniczki, who urged Casimir IV. Jagellon to abolish the privileges which had been granted to the Jews in 1447. Capistrano, in supporting Olesniczki's demand, threatened the king, in case of resistance, with horrible sufferings in hell, and predicted great misfortune to the country. The king at first refused to comply; but when the Polish army was defeated Sept., 1454, in the war with the Teutonic Order (which was secretly assisted by the pope and the Polish Church), and the clergy announced that God had punished the country on account of the king's negligence of the Church and for his protection of the Jews, Casimir yielded (1454) and revoked the privileges which the latter had enjoyed. This led to persecutions of the Jews in many Polish towns. Capistrano was canonized in 1690.

CAPITAL PUNISHMENT.—In the Pentateuch: Warrants for the infliction of capital punishment, as opposed to private retribution or vengeance, are found in the Pentateuchal codes for the commission of any one of the following crimes: adultery (Lev. xx. 10; Deut. xxii. 22); bestiality (Ex. xxii. 18 [A. V. 19]; Lev. xx. 15); blasphemy (Lev. xxiv. 16); false evidence in capital cases (Deut. xix. 16-19); false prophecy (Deut. xiii. 6, xviii. 20); idolatry, actual or virtual (Lev. xx. 2; Deut. xiii. 7-19, xvii. 2-7); incestuous or unnatural connections (Lev. xviii. 22, xx. 11-14); insubordination to supreme authority (Deut. xvii. 12); kidnaping (Ex. xxi. 16; Deut. xxiv. 7); licentiousness of a priest's daughter (Lev. xxi. 9); murder (Ex. xxi. 12; Lev. xxiv. 17; Num. xxxv. 16 *et seq.*); rape committed on a betrothed woman (Deut. xxii. 25); striking or cursing a parent, or otherwise rebelling against parental authority (Ex. xxi. 15, 17; Lev. xx. 9; Deut. xxi. 18-21); Sabbath-breaking (Ex. xxxi. 14, xxxv. 2; Num. xv. 32-36); witchcraft and augury (Ex. xxii. 17; Lev. xx. 27).

Modes of Punishment.

Only in comparatively few instances is the particular mode of death incurred by the commission of a crime prescribed. Blasphemy, idolatry, Sabbath-breaking, witchcraft, prostitution by a betrothed virgin, or deceiving her husband at marriage as to her chastity (Deut. xxii. 21), and the rebellious son are, according to the Pentateuchal laws, to be punished with death by **stoning**; bigamous marriage with a wife's mother and the prostitution of a priest's daughter are punished by

burning; communal apostasy is punished by the **sword.** With reference to all other capital offenses, the law ordains that the perpetrator shall die a violent death, occasionally adding the expression, "His (their) blood shall be upon him (them)." This expression, as we shall see presently, post-Biblical legislation applies to death by stoning. The Bible speaks also of **hanging** (Deut. xxi. 22), but, according to the rabbinical interpretation, not as a mode of execution, but rather of exposure after death (Sanh. vi. 4, 75b).

Rabbinic Developments.

——**In Rabbinic Law:** An old-established rule of rabbinic jurisprudence forbids the infliction of punishment where there is no Biblical authority for such punishment (Sanh. 82b; compare Sifre, Deut. 154). That authority, however, may be established by GEZERAH SHAWAH (גזרה שוה); *i.e.*, by comparing similar or analogous expressions in two or more passages, in one of which the meaning and import of the expression are unmistakable (Ker. 5a). Similarly in cases where the Pentateuch imposes the death penalty, without specifying the mode of death, Talmudic jurisprudence discovers the particular mode intended by means of the principle of Gezerah shawah. Thus: In reference to the man or the woman who makes use of "a familiar spirit"—*i.e.*, "a wizard"—the law says (Lev. xx. 27), "They shall stone them with stones; their blood shall be upon them" (דמיהם בם). Here the expression "Demehem bam" is plainly used in connection with death by stoning; hence it is argued that, wherever the same expression occurs in the Pentateuch in connection with the death penalty, it means death by stoning, and consequently the punishment of the crimes mentioned in Lev. xx. 9, 11, 12, 13, 16, is the same: death by stoning (Mek., Mishpaṭim, 17; Sifra, Ḳedoshim, ix.; Sanh. 53b, 66a). Again, with reference to the perpetrator of bestiality the law reads (Lev. xx. 15), "He shall surely be put to death; and ye shall slay the beast." Here the particular mode of death is not stated, but rabbinic law again infers it by means of a Gezerah shawah. Since, with reference to the enticer to idolatry, the Bible (Deut. xiii 10 [A. V. 9]) employs the term Harag = "to slay" ("Thou shalt surely slay him"), and this is immediately explained by the addition (*ib.* 11 [A. V. 10]), "Thou shalt stone him with stones, that he die," it follows that the term "harag" used in reference to the beast likewise means to slay by stoning. And as for the criminal himself, his sentence is the same as that of the beast in connection with which he is mentioned (Sifra, *l.c.* x.; Sanh. 54b). In the case of the instigator to communal apostasy ("maddiaḥ") the law reads (Deut. xiii. 6 [A. V. 5]), "He hath spoken . . . to thrust thee out of the way of the Lord," and in that of the enticer of individuals ("mesit") the identical expression is used: "He hath sought to thrust thee away from the Lord" (*ib.* 11 [A. V. 10]); hence as in the latter case stoning is the penalty, so it is in the former (Sifre, Deut. 86; Sanh. 89b). Finally, concerning the witch, it is said (Ex. xii. 17 [A. V. 18]), "Thou shalt not suffer her to live," and elsewhere (*ib.* xix. 13) the expression, "Shall not live," is used in connection with "He shall surely be stoned"; therefore in the first case the particular penalty is to be the same as in the second (Mek., *l.c.*; Sanh. 67a).

According to these conclusions, rabbinic law based on Pentateuchal authority, expressed or inferred, affixes death by **stoning** to each of the following eighteen crimes: 1. Bestiality committed by man (Lev. xx. 15; Sanh. vii. 4, 54b; Sifra, Ḳedoshim, x. 1; Mek., Mishpaṭim, 17). 2. Bestiality committed by woman (Lev. xx. 16: Sanh. vii. 4, 54b; Sifra, Ḳedoshim, x. 3; Mek., Mishpaṭim, 17). 3. Blasphemy (Lev. xxiv. 16; Sanh. vii. 4, 43a; Sifra, Emor, xix.). 4. Criminal conversation with a betrothed virgin (Deut. xxii. 23, 24; Sanh. vii. 4, 66b; Sifre, Deut. 242). 5. Criminal conversation with one's own daughter-in-law (Lev. xx. 12; Sanh. vii. 4, 53a; Sifra, Ḳedoshim, ix. 13). 6. Criminal conversation with one's own mother (Lev. xviii. 7, xx. 11: Sanh. vii. 4, 53a; Sifra, Ḳedoshim, ix. 12). 7. Criminal conversation with one's own stepmother (Lev. xviii. 8, xx. 11; Sanh. vii. 4, 53a; Sifra, Ḳedoshim, ix. 12). 8. Cursing a parent (Lev. xx. 9; Sanh. vii. 4, 66a; Mek., Mishpaṭim, 17; Sifra, Ḳedoshim, ix. 7). 9. Enticing individuals to idolatry: "Mesit" (Deut. xiii. 7-12 [A. V. 6-11]; Sanh. vii. 4, 67a; Sifre, Deut. 90). 10. Idolatry (Deut. xvii. 2-7; Sanh. vii. 4, 60b; Sifre, Deut. 149). 11. Instigating communities to idolatry: "Maddiaḥ" (Deut. xiii. 2-6 [A. V. 1-5]; Sanh. vii. 4, 67a; Sifre, Deut. 86). 12. Necromancy (Lev. xx. 27; Sanh. vii. 4, 65a; Sifra, Ḳedoshim, xi., end). 13. Offering one's own children to Molech (Lev. xx. 2; Sanh. vii. 4, 64a; Sifra, Ḳedoshim, viii., parashah 10, beginning). 14. Pederasty (Lev. xx. 13; Sanh. vii. 4, 54a; Sifra, Ḳedoshim, ix. 14). 15. Pythonism (Lev. xx. 27; Sanh. vii. 4, 65a; Sifra, Ḳedoshim, xi., end). 16. Rebelling against parents (Deut. xxi. 18-21; Sanh. vii. 4, 68b; Sifre, Deut. 220). 17. Sabbath-breaking (Num. xv. 32-36; Sanh. vii. 4; Sifre, Num. 114). 18. Witchcraft (Ex. xxii. 17 [A. V. 18]; Sanh. vii. 4, 67a; Mek., Mishpaṭim, 17).

As in the several classes included in the above category (1, 2, 5, 7, 8, 14) rabbinic jurisprudence establishes the particular punishment of the criminal on the basis of Gezerah shawah, so in most cases of the following category the particular punishment is deduced from Gezerah shawah. Thus, with reference to bigamy with mother and daughter the law reads (Lev. xx. 14): "It is wickedness" ("Zimmah hi"), and because elsewhere (*ib.* xviii. 17) the identical expression is used with reference to criminal conversation of man with female relatives of other degrees, rabbinic law affixes the penalty which the Pentateuch attaches to the former also to the latter (Sanh. ix. 1, 75a; Sifra, Ḳedoshim, ix. 17). On the same principle the Rabbis establish the penalty for such conversation with relatives within certain ascending degrees, comparing them with the descending degrees of like removes, explicitly mentioned in the Bible (Yeb. 21a *et seq.*; Yer. Sanh. ix. 26d; Yer. Yeb. ii. 3d).

The crimes punished in rabbinic law with death by **burning** are accordingly the following ten: 1. Criminal conversation by a priest's daughter (Lev. xxi. 9; Sanh. ix. 1, 76a; Sifra, Emor, i. 14 *et seq.*). 2. Criminal conversation with one's own daughter (Yeb. 3a; Sanh. ix. 1, 75a). 3. Criminal conversation with one's own daughter's daughter (Lev. xviii. 10; Sanh. ix. 1, 75a). 4. Criminal conversation with one's own son's daughter (Lev. xviii. 10; Sanh. ix. 1, 75a). 5. Criminal conversation with one's own stepdaughter (Lev. xviii. 17; Sanh. ix. 1, 75a; Sifra, Ḳedoshim, ix. 16). 6. Criminal conversation with one's own stepdaughter's daughter (Lev. xviii. 17; Sanh. ix. 1, 75a; Sifra, Ḳedoshim, ix. 16). 7. Criminal conversation with one's own stepson's daughter (Lev. xviii. 17; Sanh. ix. 1, 75a; Sifra, Ḳedoshim, ix. 16). 8. Criminal conversation with one's own mother-in-law (Lev. xx. 14; Sanh. ix. 1, 75a; Sifra, Ḳedoshim, ix. 15). 9. Criminal conversation with one's own mother-in-law's mother (Sanh. ix. 1, 75a; Sifra, Ḳedoshim, ix. 17; Yeb. 21a *et seq.*). 10. Criminal conversation with one's own father-in-law's mother (Sanh. ix. 1, 75a; Sifra, Ḳedoshim, ix. 17; Yeb. 21a).

The nine cases of incest here enumerated (2–10) subject the perpetrator to the penalty of burning only when the crime is committed during the life of his legal wife (Yeb. 95a; Sanh. 76b; see Maimonides, "Yad," Issure Bi'ah, i. 5).

Two crimes only are punished by **slaying**: 1. Communal apostasy (Deut. xiii. 13-16 [A. V. 12-15]; Sanh. ix. 1, 52b; Sifre, Deut. 94.). 2. Murder (Ex. xxi. 12; Lev. xxiv. 17; Sanh. ix. 1, 52b; Mek., Mishpaṭim, 4; Sifre, Num. 160; see Homicide).

The penalty for the first is explicitly declared (Deut. xiii. 16 [A. V. 15]): "Thou shalt surely smite the inhabitants of that city with the edge of the sword"; but that of the latter is again based on the principle of the Gezerah shawah. As with reference to a murderer the law is (Ex. xxi. 20), "He shall surely be punished" ("naḳom yinnaḳem"; literally, "It shall surely be avenged"), and elsewhere (Lev. xxvi. 25) an "avenging sword" ("ḥereb noḳemet") is spoken of, the Rabbis argue that the term "naḳom" applied to homicide has the significance given to it by its connection with sword (Sanh. vii. 3, 52b; Mek., Mishpaṭim, 4).

To the three modes of capital punishment explicitly mentioned in the Pentateuchal laws, rabbinic law adds a fourth; viz., **strangulation.** In post-Biblical jurisprudence this is the penalty incurred by the perpetrator of any one of the crimes to which the Pentateuch affixes death, without specifying the mode of death and where no conclusions from Gezerah shawah can be deduced. The Rabbis argue thus: No death-sentence pronounced in the Bible indefinitely may be construed with severity; on the contrary, it must be interpreted leniently. And since the Rabbis viewed strangulation as the easiest of deaths, they decided that the undefined death-sentence of the Pentateuchal code means strangulation. Moreover, the Bible frequently speaks of death sent "by Heaven" for certain sins (for example: Gen. xxxviii. 7, 10; Lev. x. 7, 9); and as the death visited by Heaven leaves no outward mark, so must the death inflicted by a human tribunal leave no outward marks, and that is possible only in an execution by strangulation (Mek., Mishpaṭim, 5; Sifra, Ḳedoshim, ix. 11; Sanh. 52b).

By **strangulation** the following six crimes are punished: 1. Adultery (Lev. xx. 10; Deut. xxii. 22; Sanh. xi. 1, 52b; Sifra, Ḳedoshim, ix. 11; Sifre, Deut. 241; see Adultery). 2. Bruising a parent (Ex. xxi. 15; Sanh. xi. 1, 84b; Mek., Mishpaṭim, 5). 3. False prophecy (Deut. xviii. 20; Sanh. xi. 1, 5, 89a; Sifre, Deut. 178). 4. Insubordination to supreme authority; "Zaḳen mamre," (Deut. xvii. 12; Sanh. xi. 1, 87a; Sifre, Deut. 155). 5. Kidnaping (Ex. xxi. 16; Deut. xxiv. 7; Sanh. xi. 1, 85b; Mek., Mishpaṭim, 5; Sifre, Deut. 273; see Abduction). 6. Prophesying in the name of heathen deities (Deut. xviii. 20; Sanh. xi. 1, 5, 89a; Sifre, Deut. 178).

Of the four modes of capital punishment—stoning, burning, slaying, and strangulation—the first is considered by the majority of Rabbis the severest; the last, the mildest (Sanh. vii. 1, 49b *et seq.*). Hence when convicts condemned to different modes of capital punishment become intermixed beyond the possibility of identification and classification, all of them suffer the sentence carrying with it the death named lowest in the order cited above (Sanh. ix. 3, 80b). On the other hand, when one is found guilty of several crimes of different grades of punishment, he will suffer the severest death to which he is liable (Sanh. ix. 4, 81a; compare Tos. Yom-Ṭob to Mishnah).

Mode of Judgment.

Capital punishment in rabbinic law, or indeed any other punishment, must not be inflicted, except by the verdict of a regularly constituted court (Lesser Sanh.) of three-and-twenty qualified members (Sanh. i. 1; Sifre, Num. 160), and except on the most trustworthy and convincing testimony of at least two qualified eye-witnesses to the crime (Deut. xvii. 6, xix. 15; Soṭah vi. 3; Sifre, Num. 161; *ib.* Deut. 150, 188; Sanh. 30a) who must also depose that the culprit had been forewarned as to the criminality and the consequences of his project (Sanh. v. 1, 40b *et seq.*; see Hatraah). The culprit must be a person of legal age and of sound mind, and the crime must be proved to have been committed of the culprit's free will and without the aid of others (see Abetment); and if any one wilfully kills him before conviction, a charge of murder will lie against such perpetrator (Tosef., B. Ḳ. ix. 15; Sifre, Num. 161; compare 'Ar. i. 3, 6b). Nor may an execution be deferred, except in the case of the "Zaḳen mamre" (Sanh. xi. 4), or of a woman about to be delivered of a child ('Ar. i. 4), nor may it be carried out on a day sacred to religion (Mek., Mishpaṭim, 4; *ib.* Wayyaḳhel; Yeb. 6b; Sanh. 35b). On the day that the verdict is pronounced, the convict is led forth to execution (Sanh. 34a). Looking upon the sinner as upon the victim of folly (Soṭah 3a), and considering death an expiation for misdeeds (Ber. 60a; Sanh. vi. 2; see Atonement), the Rabbis would not permit the protraction of the interval between sentence and execution, which they considered as the most terrible period in the convict's existence. These considerations prompted them to afford the convict every possible alleviation of the pains and sufferings concomitant with the execution, and to direct the execution itself so as to prevent the mutilation of the body, or to reduce such mutilation, where it is unavoidable—as in stoning or slaying—to a minimum. The Pentateuchal law (Lev. xix. 18) prescribes, "Thou shalt love thy neighbor as thyself"; and the Rabbis maintain that this love must be extended beyond the limits of social intercourse in life, and applied even to the convicted criminal who, "though a sinner, is still thy brother" (Mak. iii. 15; Sanh. 44a): "The spirit of love must be manifested by according him a decent death" (Sanh. 45a, 52a).

Execution of Sentence.

As the convict is led forth to the place of execution, which is located outside of the city limits and at some distance from the court-house (Sanh. vi. 1, 42b), a flag-bearer is stationed at the entrance to the court, and farther on a rider is placed, while a herald marches in front of the procession, proclaiming the name of the convict, his crime, when and where committed, and the names of the witnesses on whose evidence he was convicted, at the same time inviting any and every one in possession of evidence favorable to the convict to come forward and declare it—the judges remaining in session throughout the process of the execution and fasting all that day (M. Ḳ. 14b; Sanh. 63a). If favorable evidence comes to light, the flag-bearer gives the signal, and the rider turns the procession back to the court where the new evidence is duly considered. Indeed, the convict's own declaration that he can prove his innocence, or mitigating circumstances, cause a stay until he is heard. And even where he fails to effect a reversal of sentence by his first attempt, there is still hope left for him. He may repeat the attempt several times, two scholars accompanying him for the purpose of hearing him and judging whether further delay should be permitted. On arriving in the neighborhood of the scaffold, he is exhorted to make confession of his sins, though not specifically of the crime for which he is to suffer death (see Confession of Sin). Thereupon he is given to drink a mixture of wine and olibanum, that he may become stupefied and not realize the painful close of his earthly career (Sem. ii. 9; Sanh. 43a; compare Mark xv. 23; contrast Matt. xxvii. 34). When he is brought still nearer to the fatal place, he is divested of his clothes and covered in front, and, if a woman, in front and behind (according to the adopted opinion, a woman was not divested at all). In this state the convict was led on to the spot (Sanh. vi. 1-3, 42b-45b; Tosef., Sanh. ix. 6; Sifra, Emor, xix. 3; Sifre, Deut. 221). Then the prosecuting witnesses, who are the only legal executioners known to Biblical and rabbinic laws (Deut. xvii. 7; Sifra, Emor, xix. 3; Sifre, Deut. 89, 151; Sanh. 45b), proceed to carry out the sentence which their evidence has brought about. That is done in the following manner:

The "Four Deaths."

Stoning (סקילה): With reference to two offenders subject to this penalty, the Pentateuch says, "Thine hand shall be first upon him to put him to death, and afterward the hand of all the people" (Deut. xiii. 10 [A. V. 9]), and again (*ib.* xvii. 7), "The hands of the witnesses shall be first upon him to put him to death, and afterward the hands of all the people." Rabbinic law follows this injunction literally, but confines its consummation within narrow limits. The convict having been placed on a platform twice his height, one of the witnesses throws him to the ground. If the concussion does not produce instant death, the second witness hurls a heavy stone at his chest; and only when this also proves insufficient to end his misery, the bystanders throw stones at the prostrate body until death ensues (Sanh. vi. 4; 45a *et seq.*; Sifra, Emor, xix.; Sifre, Num. 114; *ib.* Deut. 89, 90, 149, 151).

Burning (שריפה): The Pentateuch simply ordains that the criminal "shall be burnt with fire" (Lev. xx. 14, xxi. 9), and a case is reported from the last days of the Second Temple, where a guilty daughter of a priest was actually burned on a pyre. However, the reporter of the case stated that he had witnessed it during his minority; and as the testimony of a minor is not valid, no rule of procedure could be based thereon. Indeed, the Rabbis declared that a court ordering such an execution was ignorant of traditional law, and a later teacher was of opinion that the court referred to consisted of dissenting Sadducees. According to rabbinic law, an execution by burning means this: The witnesses secure the convict, then force his mouth open by means of a stout cord (wrapped in soft cloth, to prevent the discoloration of the convict's neck) being tightly drawn around his neck, when molten lead or, according to another opinion, a mixture of lead and tin, is poured down his throat and burns his vitals. (Sanh. vii. 2, 52b; Tosef., Sanh. ix. 11; Yer. Sanh. vii. 24b).

Slaying (הרג): The convict having been fastened to a post, his head is severed from the body by a blow with a sword. Splitting the body or piercing it is not permitted; neither is it allowed to perform decapitation on a block (Sanh. vii. 3, 52b; Mek., Mishpaṭim, 4; Sifre, Deut. 94). See Beheading.

Strangulation (חנק) is effected by slinging around the convict's neck a stout cord, wrapped in soft cloth, which the executioners draw in opposite directions, until all breath leaves his body and he dies (Sanh. vii. 3, 52b; Mek., Mishpaṭim, 5; Sifra, Ḳedoshim, ix. 11).

No execution is attended with posthumous indignities, except that the usual mourning ceremonies are not observed (Sifra, Shemini, Introduction, 28; Sem. ii. 7; Sanh. vi. 6), and in the case of the idolater and of the blasphemer **hanging** is superadded, provided the criminal is not a woman. The exposure of the body, however, must not be protracted. The dead convict's hands are joined above his head, and by them he is suspended; but while one of the executioners is still engaged in fastening the cords, the other must begin to untie them. As to the gibbet, it must not be a natural or permanent one, like a tree, but an artificial arrangement, easily removable; and when once used, must be buried out of sight (Sanh. vi. 4, 46b; Sifre, Deut. 221).

For the burial of convicts two special cemeteries are provided: one in which those are buried who have been executed either by stoning or by burning, and another for those slain or strangled. The dry bones are eventually disinterred, and placed in the general burial-grounds (Sanh. vi. 5, 6, 47b; Tosef., Sanh. ix. 8, 9; Yer. Sanh. vi. 23d).

No sentence carries with it any change in the civil status of the convict's family. The Pentateuchal law provides (Deut. xxiv. 16), "The parents shall not be put to death for the children, neither shall the children be put to death for the parents; every man shall be put to death for his own sins," and rabbinic jurisprudence follows this principle both to the letter and in spirit. Nor is a sentence attended by confiscation of the convict's goods. All his possessions descend to his legal heirs (Tosef., Sanh. iv. 6; Sanh. 27b, 48b; see Confiscation).

Critical Note.

Rabbinic jurisprudence is developed on the basis of the letter and the spirit of the Bible, particularly of the Pentateuchal codes (Josh. i. 8, viii. 31; Josephus, "Contra Ap." i. 8; Ḥag. 10b, 14a; Ned. 22b; Mak. 23b; compare Darmesteter, "The Talmud," translation by H. Szold, pp. 62 *et seq.*); but that development naturally partook of the spirit of the ages during which it took place—from Ezra's times to the final redaction of the Gemara (559 B.C. to 550 C.E.). This was especially the case with the development of the civil and ritualistic laws, which governed Jewish life long after the Roman conquest of Palestine. But also in criminal law, involving capital punishment, the right to administer which had been taken from the Sanhedrin decades before the fall of Jerusalem (Sanh. 41a; Yer. Sanh. i. 18a,

vii. 24b), the Rabbis delved deeply, elaborating the details thereof with a view to their application in the hoped-for Messianic days (הילכתא למשיחא, Sanh. 51b; Yeb. 45a) or for the satisfaction accruing from study (דרוש וקבל שכר, *ib.*). In this department there are therefore some laws which are mere legal opinions or theoretic ratiocinations which were never applied in practise. Such, for example, are the laws relating to the "rebellious son" and to "communal apostasy" (Tosef., Sanh. xi. 6, xiv. 1; Sanh. 71a). However, the bulk of rabbinic rules, even those concerning capital punishment, bear the stamp of great antiquity, inasmuch as they are based on actual precedent or on old traditional interpretation. Josephus, whose main authority for the first half of his "Antiquities" doubtless was the Bible itself, supplements his outlines of "the polity settled by Moses" ("Ant." iv. 8, §§ 1-45) with traditions current in his day. Some of these traditions agree with the corresponding Halakot embodied in the Talmudim and halakic Midrashim at a much later date. A few examples must suffice. In the true spirit of traditional law, Josephus ("Ant." xii. 9, § 1) says, "The purposing of a thing, but not actually doing it, is not deserving of punishment" (compare Tosef., Mak. v. [iv.] 10; Sanh. 63b; Mak. 16a); nevertheless he construes the Pentateuchal law regarding the confuted witness (Deut. xix. 16-19) as decreeing punishment where the sentence brought about by the confuted testimony has not been executed. He says ("Ant." iv. 8, § 15), "If any one be believed to have borne false witness, let him, when he is convicted, suffer all the very same punishments which he against whom he bore witness *was to have suffered.*" This coincides with the rabbinic Halakah (Mak. i. 6; Sifre, Deut. 190; see Alibi), as opposed to the Sadducean ruling that the confuted witness is punishable only after the execution of the sentence which his falsehood has brought about (*ib.*; compare S. Mendelsohn, "Criminal Jurisprudence of the Ancient Hebrews," p. 136). Also the Pentateuchal law (Ex. xxi. 21, 22) regarding an assault on a woman with child, Josephus (*l.c.* § 23) interprets in the spirit of the Halakah (Mek., Mishpaṭim, 8; B. Ḳ. 42a; Sanh. 74a; compare Geiger, "Urschrift," pp. 436 *et seq.*; Pineles, "Darkah shel Torah," § 160). Likewise his esteeming guiltless the slayer of the thief, "although he were only breaking in at the wall" (*l.c.* § 27), is in consonance with the traditional interpretation of the Halakah (Mek., Mishpaṭim, 13; Sanh. 72a; Yer. Sanh. viii. 26c); and so is his reduction of the number of stripes (Deut. xxv. 1-3) from forty to "forty save one" (*l.c.* §§ 21, 23) in accord with the Halakah (Mak. iii. 10, 22b; Sifre, Deut. 186; compare II Cor. xi. 24).

As to the spirit of later rabbinic legislation, it clearly appears that there was a tendency to reduce capital punishment to a minimum, if not to abolish it altogether. That capital punishment was a rare occurrence in the latter days of the Jewish commonwealth is patent from the statement in the Mishnah that a court was stigmatized as "murderous" if it condemned to death more than one human being in the course of seven years. Indeed, Eleazar b. Azariah applied the same epithet to a court that executed more than one man in every seventy years; and his famous colleagues, Tryphon and Akiba, openly avowed their opposition to capital punishment, saying, "Had we belonged to the Sanhedrin [during Judea's independence], no man would ever have been executed," as they would always have found some legal informalities by which to make a sentence of death impossible (Mak. i. 7a).

CAPPADOCIA (Greek, *Καππαδοκία*, derived from the Persian, "Hoaspadakhym" = "country of the good horses"; in the Assyrian cuneiform inscriptions, "Katpadhuka"): Ancient province of Asia Minor. It was known to the Jews in its Greek form also, and is often mentioned in the Talmud and the Midrash. The Roman province Cappadocia extended from the Taurus to the Euxine, and from the Halys to the Euphrates. According to Josephus ("Ant." i. 6, § 1) the Cappadocians were formerly called "Mosocheni," the Biblical tribe Meshech, mentioned together with Tubal; and Philo (in treating of Gen. xxvi. 28) is said to have called them "Canaanites." Herodotus speaks of them as "Syrians" (i. 72, v. 49, vii. 72), and even at the time of Strabo (xii. 544) they were known among the Greeks as "white Syrians" (*λευκόσυροι*). They must not, however, be classed with the Semites, since the little that remains of their language shows no relationship with Semitic (Gesenius, "Monumenta Phœniciæ," p. 11).

In the Bible.

The Septuagint, the Syriac Hexapla, the Targum Onkelos, and the Jerusalem Targum identify (Deut. ii. 23) the Biblical Caphtor with Cappadocia. The targums on Gen. x. 14, Amos ix. 7 (here also the LXX. and Symmachus), and Jer. xlvii. 4 (also Aquila and Theodotion), identify it also with Caphtor, and the targum on Ezek. xxvii. 11, with Gammadim, where the reading גם מדים ("Medes") serves as basis. According to this interpretation, the Bible would testify to an emigration of the Cappadocians from Assyrian and Median regions to Syria and Palestine. For later times, compare Yuḥasin, ed. London, p. 232b.

Josephus.

Josephus is the first to give genuine historical data; he often mentions Cappadocia, since the royal house of Herod was related to that of Cappadocia by the marriage of Herod's son Alexander (subsequently executed) to Glaphyra, daughter of King Archelaus of Cappadocia ("Ant." xvi. 1, § 2). Glaphyra later greatly shocked the Jews by marrying her brother-in-law Archelaus (*ib.* xvii. 13, § 4). Through these connections with Cappadocia, and perhaps even before that time, Jews came to that country, and Christianity spread among them (Acts ii. 9, xviii. 23; I Peter i. 1; on the Hypsistarian sect in Cappadocia, see M. Friedländer, in "Jew. Quart. Rev." xiv. 300). Jews of Cappadocia also went to the festivals at Jerusalem ("Ant." xvi. 6, § 7); some settled in Sepphoris (Yer. Sheb. 39a); and R. Judah, R. Yannai, and R. Samuel are mentioned as Cappadocian teachers of the Law. The Halakah mentions the Jews of Cappadocia, saying that they had no vegetal oil, using only mineral oil (naphtha) for lighting on the Sabbath (Tosef., Shab. ii. 3; Yer. 4d; Bab. 26a). The Talmud also speaks of robbers in Cappadocia (Tosef., Yeb. iv. 5; Bab. 25b), the Cappadocians being in evil repute because of their astuteness. Mazaca, or Cæsarea, the capital of Cappadocia, is also frequently mentioned; R. Akiba visited it on his travels (Tosef., Yeb. xiv. 5; Yer. 15d; Bab. 25b); and R. Meïr, a teacher of the Law, is also mentioned here (Bab. Yeb. 121a). The importance of Mazaca, and hence that of Cappadocia, is shown most clearly, however, by the fact that when the Persian king, Sapor I., during his war with the Romans, besieged the city, he had 12,000 Jews massacred (M. Ḳ. 26a); it is said that the walls of Laodicea were rent by the noise of the arrows at Mazaca (*ib.*). Further mention is made of Cappadocian coins (Ket. xiii. 11) which, according to the correct interpretation (Parḥi, in "Kaftor wa-Feraḥ," ed. Edelmann, p. 29b), were superior to those of Palestine. An ingenious use of the name is seen in the interpretation of a dream (*κάππα* = 20; *δοκοί* = beams), by means of which a hidden treasure was found (Lam. R. i. 1; Gen. R. 68, 12; Ber. 56b; Ma'as. Sh. 55b): this passage likewise indicates that journeys were often undertaken to Cappadocia. The word "Cappadocia," furthermore, was used as a veiled expression for Rome (Tan., Wayera, 13; *ib.* Bo, 4), and in this sense may be connected with the dream above mentioned. Cappadocia had no independent existence in later times, and hence no further importance for Judaism.

G. S. Kr.

CAPPEL, LOUIS (LUDOVICUS CAPPELLUS): Christian theologian and Hebrew scholar; descended from an old aristocratic French Huguenot family; born Oct. 15, 1585; died June 18, 1658. In consequence of the so-called Tractate of Nemours of July 7, 1585, Cappel's parents were obliged to leave the country, and during their flight Louis was born at Saint Elier, near Sedan. The soldiers of the League, who were pursuing the parents, very nearly spitted the new-born infant on their swords. After studying theology and Oriental languages at Sedan, and traveling for four years through England, Holland, and Germany, he was appointed, in 1613, preacher and professor of Hebrew, and in 1633 professor of theology, at the Reformed Academy of Saumur. He died there, highly honored.

Cappel gained imperishable fame by his two books, "Arcanum Punctationis Revelatum," published anonymously by Thomas Erpenius, at Leyden, in 1624, and "Critica Sacra," printed at Paris, in 1650. In the "Arcanum" he proved conclusively that the Hebrew text was first pointed after the Christian era, until which time it had been composed merely of consonants; in the "Critica" he proved that not even the consonantal text had been transmitted without errors, but needed emendation with the help of the versions and of conjecture.

It is to the lasting credit of Cappel that he was the first who dared to undertake, with exemplary clearness, penetration, and method, a purely philologic and scientific treatment of the text of the Bible.

CAPSALI: Family of scholars in European Turkey during the fifteenth and sixteenth centuries, which came originally from Greece, where a certain Elijah Capsali lived at the beginning of the fifteenth century. The name was taken from Cape Capsali, in the south of the Morea. Elijah had two sons, Moses and David, and the latter one son, Elkanah. The last Capsali mentioned in Jewish history is Elijah, son of Elkanah. The following members of the family are especially noteworthy:

Eliezer Capsali: Talmudist at Constantinople in the second half of the fifteenth century. In answer to the appeal of the Karaites, whose literary degeneracy was then notorious, he consented to instruct them in the rabbinic disciplines; imposing only the conditions that his pupils should refrain from vilifying the Talmudic authorities, and from desecrating the holy days of the rabbinical calendar. This attempt to reconcile the Karaites with Talmudic Judaism, or at least to soften their hostile attitude toward it, did not meet with the approval of the rigorists among the rabbis. Even Moses Capsali, who certainly was independent enough otherwise, stoutly opposed his relative, Eliezer (perhaps chiefly because it was not customary to treat the Karaites in a friendly manner; see Elijah Mizraḥi, Responsa, No. 57).

Bibliography: Grätz, *Gesch. der Juden*, viii. 208; Lattes, *Liḳḳuṭim Shonim*, p. 17.

Elijah b. Elkanah Capsali: Turkish Talmudist and historian; born at Candia about 1490; died (there?) about 1555. In 1509 Capsali left his native city to study at Padua under Judah Minz; but Judah dying eight days after Capsali's arrival, the latter went to Meïr Katzenellenbogen, Minz's son-in-law and successor. In 1522 Capsali was again at Candia, having been appointed leader of the community there, with three assistants. During the terrible plague which appeared in Candia soon after, entailing upon the Jews great suffering, which was aggravated by the policy of isolating the Jewish quarter, Capsali worked unselfishly to relieve the stricken. When Menahem del Medigo, rabbi of Candia, became too old to officiate, Capsali and Judah del Medigo were appointed rabbis of the community; and Capsali continued there until his death. Among his pupils, Samuel Algazi deserves especial mention (compare Nepi-Ghirondi, "Toledot Gedole Yisrael," p. 6, below). Capsali carried on a learned correspondence with the greatest Talmudists of his time; he showed a remarkable independence of spirit, not only in his relations with high authorities, but also in regard to ancient, time-honored customs. For instance, he abolished the custom, widely spread in Candia, of selling by auction the honor of bridegroom of the Torah; ordering instead that this should be conferred gratuitously upon a scholar or other prominent person of the community (Ḥayyim Benveniste, "Keneset ha-Gedolah, Oraḥ Ḥayyim," to 669; i. 88c). The independence and self-confidence manifested by Capsali in his decisions aroused the opposition of many of his colleagues. The responsa literature of that time contains numerous references by prominent rabbis to the controversies between Capsali and his associate rabbi of Candia, Judah del Medigo; the former always inclining to a less rigorous interpretation than the latter (compare Moses Alashkar, Responsa, No. 114, p. 177; Nos. 99, pp. 111–114; Meïr Katzenellenbogen, Responsa, No. 29). Abraham ibn Naḥmias was another opponent of Capsali (Benveniste, *l.c.* pp. 261, 263, 342).

Elijah Capsali's Works.

Capsali is the author of the following works: (1) "Sefer Dibre ha-Yamim le-Malkut Winiẓiah"; (2) "Seder Eliyahu Zuṭa," or "Debe Eliyahu"; (3) "No'am Ḥoblim," decisions and responsa; and (4) a collection of responsa. The first work is a history of Venice, the manuscript of which is in the British Museum. It contains, in addition, matter relating to other Italian cities, and a section on the persecutions of the Jews in Germany. The second work, a history of the Turkish empire from the earliest times down to the year 1522, is an important contribution to general history, as well as to the history of the Jews. This book (in manuscript in the Bodleian Library and in the British Museum), the publication of which would certainly throw much light on the history of the Jews in Turkey, contains a section on Spain and Portugal down to the expulsion of the Jews from those countries. Judging from the extracts made by Lattes, Capsali was not only an excellent stylist—possessing neither the baldness of the chroniclers nor the exuberance and affectation of the elegists—but was also a reliable historian. Capsali added to the work, which is divided into 4 books and 166 sections, a treatise on theodicy. His interest in history is also seen in his collection of responsa, "No'am Ḥoblim," in which he narrates numerous interesting occurrences relating to the Rabbis (compare, for example, the extract in Grätz, "Gesch der Juden," viii. 443–445, which refers to the controversy between Joseph Colon and Moses Capsali). Capsali's responsa seem to have entirely disappeared: Ḥayyim Benveniste is the only one known to have possessed and used a copy of them.

Bibliography: Grätz, *Gesch. der Juden*, viii. 443 *et seq.*; Lattes, *Likkuṭim Shonim*, pp. 18–32 (extracts from Capsali's *Seder Eliyahu* are given on pp. 33–110); Neubauer, *Cat. Bodl. Hebr. MSS.* No. 2411; Nepi-Ghirondi, *Toledot Gedole Yisrael*, pp. 6-8; Rabbinowicz, *Moẓa'e Golah*, Index.

Elkanah b. David Capsali: Turkish Talmudist and philanthropist of the second half of the fifteenth century. He was a pupil of his uncle, Moses Capsali, at Constantinople, but left that city and settled at Candia, where he became one of the most prominent members of the Jewish community. In 1493 he was "condestable" (high constable), one of its highest officers, and in that capacity was specially active in relieving the sufferings of the Spanish exiles who arrived that year in Candia. In one day (July 22, 1493) he collected for their assistance 250 Venetian gulden, a very large sum for that time. Many notes on the history of the Ottoman empire in Elijah Capsali's work were communicated to him by Elkanah, his father.

Bibliography: Lattes, *Likkuṭim Shonim*, pp. 17–18; Luzzatto, in Wiener, *'Emeḳ ha-Baka* (Hebr. part), p. 20.

Moses b. Elijah Capsali: Chief rabbi of the Ottoman empire; born in Greece 1420; died about 1495 at Constantinople. When a young man he left his native country in order to study at the German yeshibot. He is next mentioned as rabbi of Constantinople about 1450; but he became prominent only during the reign of Sultan Mohammed II., who appointed him chief rabbi of Turkey. The sultan thought so much of the rabbi that he assigned to him a seat in the divan beside the mufti, the religious head of the Mohammedans, and above the patriarch of the Christians.

Capsali held various offices, which included the supervision of the taxes of the Jews, and the appointment of rabbis, and he even acted as a civil judge. It is said that the sultan's respect for the rabbi was due to the fact that, disguised as a civilian, Mohammed was present one day while Capsali was rendering his decisions; and he assured himself that the rabbi was incorruptible and impartial in his judgments. When the sultan undertook to improve the moral conditions of some parts of Constantinople, it was said that this endeavor was prompted by the rabbi. It is certain that Capsali dealt very severely with Jewish youths who, intimate with the janizaries, imitated them in leading un-Jewish and immoral lives. Some of these youths, enraged by the corporal punishment he had inflicted on them, attempted to kill him during a street riot in 1481, and he escaped only by flight. Capsali's associations with Bayazid, the son and successor of Mohammed II., were equally pleasant; and Bayazid's friendliness toward the Jews, that became especially evident in the ready reception of the Spanish exiles, must be ascribed in no small measure to Capsali's influence.

Capsali and Colon.

Capsali directed communal affairs with considerable skill, and commanded general respect. Ascetic in his mode of life—fasting frequently, and always sleeping on a bare floor—he was an advocate of rigorous rabbinism, severely criticizing the attempt of some rabbis to instruct the Karaites in the Talmud (compare Eliezer Capsali above). Nevertheless he seems to have taken certain liberties in various ritual questions, that made him many enemies. A party was formed at Constantinople for the purpose of injuring Capsali's reputation, and of branding him as an ignorant and unscrupulous rabbi. At the head of this clique was Moses "Twenty-four," said to have been so called because he knew only the twenty-four books of the Bible and nothing of the later literature, and who had been sent to Constantinople by the community of Jerusalem in order to obtain permission from the chief rabbi to collect money for the poor of that city. But Capsali, for political reasons, could not comply with the request; for Bayazid II. was then at war with the calif of Egypt, and it was forbidden to carry money from Turkey into the Egyptian provinces, hence into Palestine also. Moses "Twenty-four" was so exasperated against the chief rabbi because of his disappointment, that he offered his services to the men who were attempting to bring Capsali into disgrace. At the head of these were Elijah Parnes, Aaron b. Abbaya, Isaac Alterno, and Asher of Cologne, who addressed to Joseph Colon, one of the greatest rabbinical authorities of the time, a letter containing the gravest accusations against Capsali, especially that of being careless in deciding cases dealing with marital troubles. Moses "Twenty-four" carried this mendacious letter to Colon in Italy, who at once began to denounce Capsali violently, declaring him to be unfit to fill the office of rabbi. In the ensuing controversy between Capsali and Colon men like Judah Minz and the three learned Del Medigo brothers (Elkanah, Moses, and Elijah), as well as many other rabbis, took Capsali's part against Colon. It is a proof of Capsali's noble character that he received Colon's son Perez in a most friendly way when the latter came to Constantinople to ask Capsali's pardon, as his father, on his death-bed, had requested him. Capsali, moreover, spoke of Colon in the highest terms, convinced that his opponent had acted against him because he was ignorant of the true state of affairs and zealous in upholding the Law.

L. G.

CAPTAIN: One at the head of, and in command over, others; a chief or officer; the head man of a clan; the commander of an army. The title occurs both in A. V. and R. V. as the equivalent for a large variety of Hebrew and Greek words frequently translated differently in other passages. Even where the rendering "captain" is adopted, the exact military or official implication of the title is often not indicated. This indefiniteness is due to the fact that Jewish military forces, especially during the earlier periods of their history, were not rigidly or systematically organized. Standing or regular armies were unknown before the days of the kingdom.

The Tribe the Military Unit.

The levies raised for purposes of offensive or defensive warfare fell naturally into units corresponding to the tribes or clans to which they belonged, the captain of each contingent being usually the chief of the tribe or clan; though occasionally the captain did not belong to the tribe, or was not its chief. Bands of men unconnected tribally, the "vain men" or fellows of Judges xi. 3, under the command of a captain distinguished by his prowess, are sometimes mentioned; and it is very likely that Saul, in "choosing" three thousand men (I Sam. xiii. 2), called into service such a company, and that the necessity for resorting to the same expedient a little later in his career (I Sam. xxiv. 2) induced him to keep together as a permanent establishment a body of armed men under his personal command. It is during his reign that mention is first found of a commander- or captain-in-chief; namely, Abner (I Sam. xiv. 50).

Under David much progress was made in the development and organization of a standing military force. While a fugitive and an exile, David had been himself the leader of a band of freebooters (see I Sam. xxii. 2 *et seq.*). His followers formed the nucleus of a standing army. Under him are found, in addition to the commander-in-chief, "captains of the host" (שרי חיל, II Sam. xxiv. 4). The captain of the royal body-guard is also mentioned as one of the high dignitaries of the court (II Sam. viii. 18, xx. 23). Captains of "runners,"—*i.e.*, foot-soldiers, a body of men probably entrusted with the custodianship of the palace gates (II Kings x. 25)—are named in I Kings xiv. 27. These "runners" seem to have consisted of companies of hundreds (II Kings xi. 4, שרי המאות).

The meaning of ראש השלישי (A. V., "chief among the captains"; R. V., "chief of the captains") is not certain. "Shalish" has been explained as the third occupant of the Chariot (LXX., *τριστάτης*); still, it is doubtful whether military chariots had come into use among the Israelites so early as David's reign. In Ex. xiv. 7 and xv. 4 the reference is to Egyptian chariots, and these are known to have been manned by two men only. "Shalish" in these two verses seems to designate "picked troops," the élite of soldiers. (See Baentsch on Ex. xiv. 7, in "Handkommentar zum Alten Testament.") In other passages the "shalish" probably was a military officer in charge of a third of a larger division (compare battalion = ⅓ regiment), or the third officer in rank. Compare Assyrian "shalshãa," Rawlinson "Asiatic Inscriptions," v. 3, 48; Assurbanipal "Inscriptions," 130, 1. Solomon, however, had "captains" of horse and chariots (I Kings ix. 22).

Military Divisions.

It is not unlikely that during the period of the kings the army was divided into tactical units of 1,000, subdivided again into bodies of 100, 50, and 10, each under its proper officer or "head" (ראש), or "captain" (שר). The fixed titles of the various ranks in the military hierarchy are not exactly known, but it is probable that each officer was designated as the "head" or "captain" ("sar") of the number under him (I Sam. viii. 12, xvii. 18, xviii. 13; II Sam. xviii. 1; Ex. xviii. 21; I Macc. iii. 55), though the title "shalish" would indicate also another nomenclature. The sources furnish too scanty a supply of facts to substantiate a more definite assertion.

Captains of the Temple.

The priests and Levites of the Second Temple were organized into groups, with proper officers or captains. Under the high priest the סגן ("segan"), more generally designated הממונה ("the memunneh"), often officiated as his lieutenant. Jost ("Gesch. des Judenthums und Seiner Sekten," i. 150) suggests that this is the officer described in Acts iv. 1, v. 24, 26 as *στρατηγὸς τοῦ ἱεροῦ* ("captain of the temple"), and in II Macc. iii. 4 as *προστατης* ("governor"). This identification, however, is not very convincing. It is more reasonable to hold *στρατηγός* to be the rendering of ראש משמר, the Mishnaic title of the "captain [of one] of the priestly groups" (ma'amad or "mishmar"). The officer named in the passages quoted above corresponds to the one given the same title (*στρατηγός*) by Josephus ("Ant." xx. 6, § 2; "B. J." ii. 5, § 3). He is the captain of the Levitical temple-guard (compare Maimonides, "Kele. Ham." iii.), a body of police, referred to also in Luke xxii. 4, 52. The officers that assisted in the arrest of Jesus (John xviii. 3) may have belonged to this company. The "captain" of Acts xxii. 28, and possibly John xviii. 12, rendering the Greek word *χιλίαρχος*, represents a Roman officer, the "præfectus" or "tribunus militum"; it is not clear which grade of the Roman military hierarchy is meant by the "captain of the guards," in Acts xxviii. 16, where it is a translation of the Greek *στρατοπεδάρχης*. The R. V. omits the sentence altogether.

Three Hebrew words are mistranslated "captain" by the A. V.: (1) כרי, in II Kings xi. 4, 19 (probably a misreading for כרתי; see Cherethites); (2) כרים, in Ezek. xxi. 22 ("battering rams," R. V.); (3) אלוף, in Jer. xiii. 21, where "friend" is the proper meaning.

Following are other Hebrew equivalents: "Ṭifsar," (the Assyrian "dupsharu" = writer of tablets), in Jer. li. 27 and Nahum iii. 17, a military officer, probably the Hebrew "Sofer" (Jer. lii. 25; reading emended II Kings xxv. 19, see Nowack, "Lehrbuch der Ḥebräischen Archäologie," i. 360). "Nagid," a title of royal personages; secondarily, "chief," and hence "captain" (I Chron. xii. 27, xiii. 1); the "steward" of the palace (II Chron. xxviii. 7). "Nasi," truer rendering, "prince" (Num. ii. 3, as in R. V. generally). "Peḥah," an Assyrian title; "paḥati," from "bel paḥati," lord of a district = governor; military "captain" in II Kings xviii. 24; Isa. xxxvi. 9; Ezek. xxiii. 6, 12, 23. "Ḳaẓin," originally "elder," "judge." "Rosh," "head," "chief" (R. V.). "Ba'al," "lord" (Jer. xxxvii. 13), "captain" of prison. "Rab" (II Kings xxxv. 8), "captain" of executioners; interchanges with "sar" (Gen. xxxix. 1). "Sar" is equivalent to "prince," and hence "commander," "captain." "Shalliṭ" is rendered "ruler" in Dan. ii. 15. For renderings of "shalish" see above, and Dillmann on Ex. xiv. 7, in "Kurzgefasster Kommentar zu den Heiligen Schriften"; also Paul Haupt, in "Beiträge für Assyriologie und Semitischen Sprachwissenschaft," iv. 4, pp. 582–587, Leipsic, 1902.

Jewish Captives in Attitude of Supplication.
(From Layard's "Monuments of Nineveh.")

CAPTIVES.—Biblical Data: The Bible makes no provision for the treatment of captives taken in war. Captives were considered as slaves, and as such were subject to all the laws that govern the relations between the master and his non-Jewish slave (עבד כנעני); (see Slaves). In the early wars of Joshua with the seven tribes that inhabited Palestine, there could be no captives of war, as the Israelites were commanded to destroy all the people, even the women and the children (Deut. xx. 16–18). In later days the descendants of such Canaanites as escaped destruction Solomon considered not only tributary to himself, but also bond-servants who had to serve the Israelites at any time in whatever capacity they might be needed (I Kings ix. 20, 21; Maimonides, "Yad," Melakim, vi. 1).

According to the Deuteronomic law (Deut. xx. 10–18), the Israelites were commanded to destroy all male adults of a conquered people. In some instances, however, Israelitish kings showed unusual mildness to their captives. Ahab released Ben Hadad of Syria on very generous terms, after the latter had suffered a humiliating defeat on the battlefield (I Kings xx. 34). At the instance of the prophet Elisha, the king of Israel dismissed a Syrian army which had been taken by stratagem (II Kings vi. 20–23).

Female captives were also subject to the same laws as the female non-Jewish slaves. A peculiar exception to that general law is the case of the "yefat to'ar" (יפת תאר, Deut. xxi. 10–14). An Israelitish warrior who had intercourse with a captive might take her for a wife, after having permitted her to mourn for her parents a full month. If he then refused to marry her, he could not sell her into slavery, but must let her go free.

——**In Rabbinical Literature:** The Rabbis saw in the law regarding female captives a reluctant concession to the passions of man, and therefore looked upon such an act unfavorably. They treated it as an exception and limited it in the following manner:

One who takes possession of a female captive during war may not cast her off; but, if she be willing to accept the Jewish religion, her captor must keep her in his house for three months, this being the accepted interpretation of "yeraḥ yamim" (Deut. xxi. 13), and then marry her. If at the end of the three months he did not wish to marry her, he must not sell her into slavery, but must send her away free. Should she be unwilling to accept the Jewish faith, he may continue to keep her for twelve months and use peaceful persuasion; but if at the end of that period she is still steadfast in her determination, he must send her away free. At no time may the captor employ compulsory measures to force her into the Jewish faith. If he belongs to the family of Aaron, he can not marry her, as the Jewish law prohibits a Kohen from marrying a proselyte (Yeb. 48b; Kid. 21b *et seq.*; Maimonides, "Yad," Melakim, viii. 2–7).

CAPTIVITY, or EXILE, BABYLONIAN:

By "exile" is meant any form of forced emigration in which the selection of his new habitation is left to the choice of the person banished. In a particular sense the word is used to designate the enforced emigration of larger communities, such as tribes and nations; in which case, however, any choice of domicile seems to be withheld. The specific term for this species of exile is "deportation." In antiquity, deportation was employed on an extensive scale for political purposes, either to annihilate the power of a conquered people, or to cultivate new and unsettled districts by populating them, or to fuse together various nationalities—more widely separated in ancient times than they are to-day—and occasionally to subserve several of these various ends at once.

The Deportation of Israel.

The earliest deportation of Israelites mentioned in the Old Testament was that of Tiglath-pileser III. This king, either in 734 B.C., upon the march against Philistia, mentioned in a fragment of the eponym list, or (in the event that the march against Hano of Gaza [734] did not concern the affairs of Israel and Judah) in 733, took the field against Pekah of Israel and Rezin of Damascus, who were warring against his vassal, King Ahaz of Judah, and punished them by annexing the northern and eastern borderlands (II Kings xvi. 7–9). While he annexed these borderlands of the tribes of Zebulun, Asher, and Naphtali, together with such of the eastern territory of the Jordan as belonged to Israel, he led the inhabitants of these provinces into Assyria, and established them there (II Kings xv. 29). The second deportation took place after the conquest of Samaria in 722 B.C., which conquest was followed by the demolition of the northern kingdom. The last king of that country, Hoshea, had renounced allegiance to Shalmaneser IV. (II Kings xvii. 4), whereupon the latter besieged the city of Samaria for three years (724–722). It was reserved for his successor, Sargon, however, to capture the hostile capital, as is evident from the cuneiform inscriptions (in contradiction to II Kings xvii. 3 *et seq.*, according to which the conquest was made by Shalmaneser himself). On that occasion 27,280 people were taken captive and deported, partly to the Assyrian province of Gozan in Mesopotamia and partly to Media, where they were established as royal charges; while, at the same time, colonists of other nationalities were settled in Samaria and the surrounding territory to take the place of those deported. In this way not only was a conquered and hostile people thoroughly disrupted, but it was at once replaced by subjects loyal to the crown, among whom the vacated territory was distributed, and who obtained special prerogatives, in order to strengthen their allegiance. The first people to be sent thither (721 B.C.) from Babylon as settlers were Arameans. Upon the close of the Babylonian insurrection, however (647 B.C.), Assurbanipal sent further contingents from Babylon, Cuthah, Sippara (Sepharvaim), Susa, and Elam (II Kings xvii. 24, xviii. 11; Ezra iv. 4–10).

Deportation of Judah.

The inhabitants of the southern kingdom, Judea, were in their turn subjected to two deportations. The first of these took place in the year 597 in connection with the first conquest of Jerusalem by Nebuchadnezzar. On that occasion Nebuchadnezzar appeared before the walls of Jerusalem with his army for the purpose of punishing Josiah's son Jehoiakim, because the latter, relying upon the assistance of Egypt, had renounced his allegiance to Babylonia. As soon as Jehoiachin or Jeconiah, who had meanwhile succeeded his father, Jehoiakim, as king, had, after a short defense, surrendered to the leaders of the Babylonian army, Nebuchadnezzar ordered him, together with the most distinguished men of the land, and the most valuable treasures of the Temple and the palace, to be sent to Babylonia (II Kings xxiv. 1–16). Thus began the Babylonian Exile (597), from which year the prophet Ezekiel, who was among the captives, dates his calculations. Another deportation took place upon the downfall of the kingdom of Judah (586 B.C.). The new king, Zedekiah, a son of Josiah, whose original name was

Mattaniah, had taken the oath of fealty to the Babylonian sovereign (Ezek. xvii. 13). But as early as 593 he had planned an insurrection against Nebuchadnezzar, to which end he had summoned the ambassadors of the disaffected Syrian states tributary to Babylon; namely, Edom, Moab, Ammon, Tyre, and Sidon. Psammetichus II. (594–588), the new king of Egypt, was probably the soul of the undertaking. Although peace still reigned in Syria, and Zedekiah himself appeared before Nebuchadnezzar to vindicate his good faith (Jer. li. 59 *et seq.*), it soon thereafter became possible for the Egyptian king Hophra to tempt Zedekiah into a breach of faith. Nebuchadnezzar was now compelled to step in, and repaired to Riblah on the Orontes, in order to conduct a campaign against Jerusalem directly from his headquarters. The siege began Jan. 10, 587, and lasted for a year and a half. As the city, partly because of its inaccessible position, and partly because of its strong fortifications, was almost impregnable to assault, Nebuchadnezzar endeavored to starve out the inhabitants by encircling Jerusalem with a wall. The approaching army of Hophra now compelled the Babylonians temporarily to abandon the siege and stand battle. The Egyptians, however, were beaten; and the siege began anew, and was continued until July 9, 586, when the beleaguerers penetrated into the city through a breach made in the protective wall built in the days of Hezekiah (II Chron. xxxii. 5; II Kings xxii. 14). An attempt at flight by Zedekiah and his retinue was frustrated; he and his armed followers being intercepted before they could cross the Jordan. The retinue were dispersed, while Zedekiah was captured and brought before Nebuchadnezzar at Riblah. Here he witnessed the death of his sons, who were murdered in his presence. His eyes were then put out, and he was taken in chains to Babylon. On Aug. 7 of the same year Nebuzaradan, captain of Nebuchadnezzar's body-guard, ordered that the Temple, the royal palace, and all dwellings in the city of Jerusalem be set on fire, and that the surviving inhabitants be taken captive to Babylon. This was also the fate of all those who, after the capitulation of the city, had sought refuge in the camp of the Babylonians. Seventy or eighty distinguished Jews, however, among them the high priest Seraiah, were sent to Riblah, where, by the order of Nebuchadnezzar, they were put to death (II Kings xxv. 1 *et seq.*; Jer. xxxix. 1 *et seq.*, lii. 1 *et seq.*). Yet a third deportation of the Jews was ordered by Nebuchadnezzar. During the futile siege of Tyre, which lasted thirteen years (585–573 B.C.) and compelled Nebuchadnezzar to keep a standing army in Syria, probably a rebellion broke out among the population, which, since the murder of Judah's Jewish governor, Gedaliah, had been heavily oppressed (Jer. lii. 30). In consequence of this, there was ordered, either in 582 or 581 B.C., another partial deportation to Babylon.

Number of Babylonian Exiles.

As regards the number of Jews deported by Nebuchadnezzar, there are two divergent reports. According to the statements in Jer. lii. 28–30, which must be accepted as the more reliable, as they certainly are the more complete, 3,023 Jews were deported in 597 B.C., 832 inhabitants of Jerusalem in 586, and 745 Jews in 582, making 4,600 persons in all. But in Biblical times, as to-day in Oriental countries, only the men were counted. Hence it follows that from 14,000 to 18,000 souls must have been deported to Babylon. The other statements, given in II Kings xxiv. 14, 16, refer only to the deportation of the year 597 B.C. Verse 14 states that 10,000 men were sent into exile; while according to verse 16 the number was 8,000. As the former verse is part of an addition to the original text, it will be necessary to adhere to the second, the figures in which, however, are more than twice as high as those given in Jeremiah. Now, if the figures as given in Jeremiah for the years 597, 586, and 582 be accepted as correct, the total number of exiles, taking into consideration II Kings xxiv. 16, will be 12,000 men, or in all 36,000 to 48,000 souls. Furthermore, if it be assumed that the total population of the kingdom of Judah was about 120,000 (the figures should probably be somewhat higher, as the country was at that time more densely populated than it is to-day), about one-fourth of the population (according to II Kings xxiv. 16) or, perhaps more correctly, one-eighth (according to Jer. lii. 28–30) was led captive into Babylonia.

Condition of the Exiles.

The Israelites who were deported in 597 at first hoped for a speedy return to their homes. As they belonged without exception to the leading families, they had given credence to the sayings of the false prophets who had flattered them (Jer. xxvii.–xxix.; Ezek. xii. 21, xiii. 23); and in contradistinction to those who had remained at home, they came to regard themselves as the true Israel, although they themselves by no means conformed to the standard which the true prophets had pictured of an ideal Israel (Jer. xxiv.; Ezek. xi. 1–21), nor did they betray any evidence of a "new heart." When, therefore, contrary to their expectations, Jerusalem was destroyed in 586, they were, after all, compelled to follow the advice of Jeremiah (xxix. 4–9) and accommodate themselves to the conditions of a protracted exile.

As exiles, under royal protection, and consequently enjoying special prerogatives in their new home, their personal lot was undoubtedly a happier one than that of their brethren who had remained behind. Their habitation was in the province of Babylon. It is not known, however, whether they lived together in considerable numbers or were scattered throughout the country. The places where they dwelt were known by various names; thus, "Tel Abib," according to the Hebrew etymology, signified "hill of corn-ears," whereas its Babylonian signification was "the deluge," or "hill of the stream"—the valley of the rivers Chebar (one of the numerous canals of the Euphrates), Casiphia, and Ahava (Ezek. i. 3; Ezra viii. 15, 17). A number of western Semitic proper names, discovered upon inscriptions found in Nippur, have led Hilprecht to believe that many of the exiles were settled in that place (see, for example, "Palestine Exploration Fund, Quarterly Statement," Jan., 1898, p. 54: April, 1898, p. 137). They not only preserved their old tribal distinction, but kept special genealogical records (Ezra viii. 17; Ezek. xiii. 9); and the heads of the tribes or elders were the leaders of the separate communities (Ezra viii. 1 *et seq.*, 16 *et seq.*; Ezek. viii. 1, xiv. 1, xx. 1).

Their outward condition was also by no means unsatisfactory. Jeremiah, in his exhortations (xxix. 5-7; compare Ezek. xiii. 2 *et seq.*, xiv. 9-11), states that the Israelites were permitted to till the soil, to cultivate the family life, and, by thrift and diligence, to accumulate wealth. Perhaps, being permitted to administer their internal affairs through their elders, they were allowed the undisturbed exercise of their religion; and nowhere are bloody persecutions heard of, designed to alienate forcibly the people from their ancestral religion, and to coerce them into accepting that of the conquerors. All the misery, want, imprisonment, and ill-treatment, frequently described as suffered in Babylonia, must be explained by the fact that the Prophets, whenever they gazed back upon the national catastrophe, felt anew all the pangs of homelessness and servitude. Consequently, the description of the people as a helpless worm (Isa. xli. 14), and of the violence and spoliation which had reduced Israel to the condition of those who suffer in chains and bondage (*ib.* xlii. 20-24), is not ascribable to actual sufferings inflicted in the land of exile. The chains and bonds are not such as have been forged for them in the land of their exile: they are figurative of the condition of homelessness and servitude into which the exiled Israelites have fallen; and they have lost their home, they have been despoiled, and the fetters of the foreign rule weigh heavily upon them. The Prophets also deplore the deep humiliation to which God has subjected His people by consigning them to ruin, and they bewail the circumstance that even the religious leaders, the priests and the Prophets themselves, have been delivered up to the profanation of a pagan people, instead of being permitted to serve the Lord in His holy Temple according to the divine mission appointed to them (Isa. xliii. 28, xlvii. 6). The source of the most poignant grief on the part of the pious devotees of Yhwh was the ridicule cast by the idolaters upon their religion, their God, and His power; for, as the pagans could not trace the downfall of the people to its true cause—the sins of the people themselves—they beheld in the fall of Jerusalem and its Temple a proof of the weakness of Israel's God (Isa. lii. 5).

Religious Conditions.

In consequence of the favorable external circumstances of the exiles, and particularly of such of them as were engaged in the diversified commerce in the Babylonian metropolis, the longing for home gradually disappeared, and they learned to content themselves with material prosperity. Most of these indifferent persons were lost to their people; for, in their anxiety to retain the wealth they had acquired, they learned to conform to the manners and customs of the country, thus sacrificing not only their national but also their religious independence and individuality. Hence the denunciation by the Prophets of the various forms of idolatry practised among the people. Even if the description of the idolatry mentioned in Isa. lvi. 9-lvii. 13a belongs to pre-exilic times, many other passages so graphically describe the idolatrous practises of the exiles that the relation between these and the Babylonian cult can not be mistaken (Isa. lxv. 3 *et seq.*; compare *ib.* lxvi. 17). Despite all this indifference and impiety on the part of the masses, there was nevertheless an element that remained true to the service of Yhwh. These "servants of Yhwh," who humbly submitted (ענוים, "the meek") to His will, gathered about the few Prophets who remained faithful to the Lord, but whose voice and influence were lost amid the general depravity, and who, in addition to the pain caused by base ingratitude and faithlessness toward the God of their fathers, were also compelled to endure all the shafts of scorn and ridicule. While some, though without obeying the prophet's exhortations (Ezek. xxxiii. 31), listened to his words—either because they appreciated his eloquence, or because they were entertained and pleased by the holy enthusiasm of the man of God—others ridiculed this faith in the Lord and the fond hope of the devotees of Yhwh of a future salvation and a redemption from pagan captivity (Isa. lxiv. 5). Indeed, in their delusion they proceeded even to open hostility and oppression; and a reference to a species of excommunication or, at least, an open declaration of ostracism, is contained in the above-mentioned passage. These sad experiences of all true Israelites tended to separate them more and more from their recreant brethren. The more the pious exiles felt themselves repelled by their pagan environment and their disloyal fellow-Israelites (Ps. cxxxvii. 3 *et seq.*,) the closer became the union among themselves, and the stronger their allegiance to their Prophets and the Law. What they had re-established almost immediately of the religion of their fathers was the sacred observances. True, a festive celebration of the high festivals was out of the question, in view of the unfavorable conditions and of the mood of the people. Such a celebration was, therefore, supplanted by solemn days of penance and prayer to commemorate the catastrophe which had befallen the people (Zech. vii. 3, viii. 19). The fasts of the fathers were also observed, although in so superficial and thoughtless a manner that the prophet was compelled to condemn the mode of observance, and to censure fasting when accompanied by the ordinary business pursuits of every-day (Isa. lviii. 3). As the faithful could not honor Yhwh by sacrifices in a foreign land, nothing remained to them of all their ceremonial but the observance of the Sabbath (Hosea ix. 3-5) and such other customs as were connected with a certain independence of action. Such, for example, were the act of circumcision, which, together with the observance of the Sabbath, constituted a distinguishing mark of Israel; regular prayer, performed with the face turned toward Jerusalem (I Kings viii. 48); and fasting, already mentioned. When the Prophets of the Exile spoke of the conditions under which the divine prophecies would be fulfilled, they always emphasized the observance of the Sabbath as the foremost obligation, as the force which should unite and preserve the Jewish community (Isa. lvi. 2, 6 *et seq.*; lviii. 13; Jer. xvii. 19 *et seq.*; Ezek. xx. 12 *et*

Religious Observances.

The Sabbath.

seq.; xxii. 8, 26). On the other hand, it is evident from the demands and exhortations of the Prophets that they were now willing to dispense with the ceremonial, as the more external form of religious observance, in order to emphasize the exemplification of the essential religious spirit in works of morality and charity.

At the same time the idea found acceptance that the submission of the personal will to that of the Lord would prove the most acceptable sacrifice in His sight (Ezek. xi. 19, xviii. 31, xxxvi. 26; Isa. lxi. 1-3). Ezekiel also establishes the new principle that the essence of religion must be sought in individual morality: "The righteousness of the righteous shall be upon him, and the wickedness of the wicked shall be upon him" (Ezek. xviii. 20-32; compare Deut. xxiv. 16; Num. xxvi. 11); wherefore he, also, in contrast with the present disposition of the exiles, predicts a new heart and a new spirit (Ezek. xxxvi. 26). The new religious conviction was confirmed by the contemplation of the pagan idols with the attendant immoral cult, which reacted to strengthen and to purify the conception of the monotheistic idea, so that in the Deutero-Isaiah the certain conviction is already expressed of the ultimate recognition of YHWH by all pagan peoples.

Cultivation of Literature.

Particular attention was now paid to the ancestral literature; and thus there arose during the Babylonian Exile the profession of the "scribes," those learned in the Law who set the standard of piety and devotion, and who transmitted their precepts both to their successors and to the people at large, while at the same time extending the body of the laws by means of revision and amplification (see PENTATEUCH). Historical writings also were now revised in accordance with the standard of the Law, establishing as a basis the historical conception of Deuteronomy. All the calamities which had befallen Israel were accepted by these exiles as a punishment for transgressions, and particularly for idol-worship. The sin of Jeroboam had ruined Israel, and the transgressions of Manasseh, despite his subsequent thorough reformation, were only atoned for by the downfall of Judah. Therefore the history of the past was to serve both as a warning and as a guide for the future. This explains the purpose of the compilation of the various older historical works into a historical entity: the new Israel, risen from the grave of exile, must avoid the sins and errors which caused the ruin of its fathers. And indeed the Psalms which were composed after the Exile reveal a keener introspection, a deeper sense of contrition, and a more frank avowal of sin than the earlier ones.

Termination of the Exile.

The first indication of a change for the better was the liberation of King Jehoiachin from his captivity, with regal honors which distinguished him above all other kings at the court of Babylon. According to II Kings xxv. 27-30, he was liberated by Evil-Merodach (562-560 B.C.); and though this passage mentions the liberation as occurring in the thirty-seventh year of the captivity of Jehoiachin, the event must be ascribed to Neriglissar (568-556). The first permanent change was brought about by the Persian king Cyrus. As the Deutero-Isaiah already desired and predicted after the first inroad of Cyrus into the Babylonian kingdom (545), a conquest of the city of Babylon took place (539 B.C.) after the decisive defeat of the army at Sippara. This conquest, however, was not accompanied by spoliation or destruction, and was followed by an order to rebuild the Temple of YHWH in Jerusalem. This duty was assigned to Sheshbazzar, himself a Jew (according to I Chron. iii. 18, Shenazar, perhaps a Davidite), who had been sent by Cyrus as governor to Jerusalem, the king himself having previously laid the corner-stone of the Temple. The work of building, however, was soon arrested (Ezra v. 13-16). Sheshbazzar probably did not go to Jerusalem alone, being in all likelihood accompanied by distinguished Jews, such as the Davidite Zerubbabel, the priest Joshua, less prominent ones, and a troop of soldiers. But a general permission for the Jews to return was probably not given by Cyrus, as no mention of it occurs in any of the older records.

The actual return of the exiles was consummated by Ezra, who assembled at the river Ahava all those desirous of returning. These consisted of about 1,800 men, or 5,500 to 6,000 souls (Ezra viii.), besides 38 Levites and 220 slaves of the Temple from Casiphia. With this body, which was invested with royal powers, Ezra and Nehemiah succeeded, after great difficulties, in establishing the post-exilic Jewish community. From the list given in Neh. vii. 6-73 (= Ezra ii.), which the chronicler erroneously supposed to be an enumeration of those who had returned under Cyrus, it appears that the whole Jewish community at this time comprised 42,360 men, or 125,000 to 130,000 souls.

G. V. RY.

——**Traditional Data:** Various causes are assigned in the Haggadah for the Babylonian Exile. Some authorities mention general unworthiness (Lam. R. proem 19); others give specific sins, as idolatry, licentiousness, and bloodshed (Tosef., Men. xiii. 22), incontinency in the drinking of wine (Gen. R. xxxvi. 4), too great indulgence to one another and failure to reprove those who sinned (Shab. 119b), and non-observance of the year of release and of the Sabbath, and neglecting the study of the Torah (Yer. Ta'an. iv. 69b).

Causes of Exile.

Israel was exiled to Babylonia because the language of the Babylonians is akin to that of the Torah. According to another opinion, God had therefore exiled Israel to Babylonia because the latter is a low-lying country, like the nether world; as it is said (Hosea xiii. 14): "From the power of the nether world I will ransom them." Another authority says that God exiled Israel to Babylonia, because it was the land from which they had come, as a husband that is angry with his wife sends her home to her mother (Pes. 87b). Babylonia was Israel's home. Israel and Judah were exiled to different places in order that each might find consolation in the other's misery (Pesiḳ. R. xxxiii.).

Incidents Connected with the Exile.

Forty years before Israel went into exile date-palms were planted in Babylonia, because Israel was eager for the sweetness of the date, by which the tongue gets accustomed to the sweetness of the Torah (Yer. Ta'an. *l.c.*). According to one opinion the Ark was carried to Babylonia. With the destruction of the First Temple ceased the Davidic dynasty, the Urim and Tummim, and the Levitical cities (Tosef., Soṭah, xiii. 1, 2). For fifty-two years after the destruction of the Temple no bird was seen to fly in Palestine. This is inferred from Jer. ix. 9, בהמה having the numerical value of 52. Seven hundred kinds of clean fishes, 800 kinds of clean locusts, and innumerable fowl followed the exiles to Babylonia (Yer. Ta'an. *l.c.*; Lam. R. proem 34). As Nebuzaradan entered the Temple court he found the blood of the prophet Zechariah boiling. To his question, "Whose blood is that?" the people answered that it was the blood of sacrificial animals. He slaughtered a multitude of animals, but the prophet's blood did not cease boiling. Threatened with execution, the people admitted that it was the blood of the murdered prophet. Nebuzaradan thereupon slaughtered 80,000 priestly youths, but the blood still would not cease boiling. Turning in anger to it, he said, "Dost thou want me to kill thy whole people?" Then God felt mercy with His children and caused the blood to cease boiling (Yer. Ta'an. *l.c.*; Giṭ. 57b). Eighty thousand priestly youths hid themselves in the cells of the Temple, where they were all burned, with the exception of Joshua b. Jehozadak, the high priest, the "brand plucked out of the fire" (Yer. Ta'an. *l.c.*). Eighty thousand priestly youths fled to the Ishmaelites. When they asked the latter for a drink, they gave them various salted foods, and leather bottles filled with air, and invited them to eat and drink. When one attempted to drink, the air from the bottle entered his lungs and choked him to death (*ib.*).

Nebuzaradan is identical with Arioch (Dan. ii. 14). This name suggests that Nebuzaradan, when leading the Jewish exiles, raged against them like a lion (אריה) until they had reached the Euphrates. On arriving there he said to his troops: "Let them rest here, for from this time forward their God will not care for them." Therefore it is said, "By the rivers of Babylon we sat" (Ps. cxxxvii. 1), only then, not *before* (Lam. R. v. 5). By the rivers of Babylon they sat and wept over the dead who had fallen by the sword of Nebuchadnezzar and by the waters of the Euphrates, which had proved fatal to those used to the rain-water and the spring-water of Palestine. But the tyrant sat in a ship, surrounded by all his nobles in the midst of all kinds of music (Isa. xliii. 14), while on the bank passed the princes of Judah naked and in iron chains. "Why do these people go without burdens on their shoulders?" he asked as he caught sight of them. Then heavy burdens were put upon them.

The longing after the soil of the Holy Land turned the heart of Israel to repentance. As long as they were in their own land Jeremiah exhorted them in vain to repentance; but when led into exile they regarded even the sacred vessels as holy, and hung up their harps on the willows (Pesiḳ. R. xxviii.).

God's Attitude to Exiles.

God regretted having exiled Israel (Suk. 52b). He hastened the Exile two years, otherwise the people would have been utterly destroyed (Sanh. 38a). God's anger subsided after they had gone into exile (Lam. R. ii. 16). The divine glory did not leave the Sanctuary even after its destruction, according to the assurance given in I Kings ix. 3; and so we read (Ps. iii. 5) "from His holy mount," holy even when a bare mount. Cyrus speaks (Ezra i. 3)—while the Temple was destroyed—of "the God who is in Jerusalem" (Tan., ed. Buber, Shemot, 10). God's attitude is illustrated by the following two parables: A king had two sons. He grew angry with the first, punished him, and sent him into exile, exclaiming, "Wo unto him; from what happy state must he be banished!" But having also grown angry with the second, and sent him likewise into exile, he exclaimed, "It is I whose method of education was wrong." Likewise, when God sent the Ten Tribes into exile, He exclaimed, "Wo unto them! for they have wandered from me" (Hosea vii. 13); but when Benjamin and Judah also went into exile, He said, "Wo unto me for my hurt" (Jer. x. 19). Again, a king had two sons. Angered by the first, he smote him so that he died; then he mourned for him. When also the second one died of his punishment, the king said, "I have no more strength to mourn; call the mourning women that they bewail him." Similarly, God, when the Ten Tribes went into exile, bewailed them (Amos v. 1); but when also Judah and Benjamin were exiled, He said (Jer. ix. 16), "Call the mourning women" (Pesiḳ. xv. 120a, b).

In three passages of Scripture God complains of Nebuchadnezzar the Wicked: in Jeremiah, Kings, and Chronicles. Just as one complains to his neighbor, saying, "Behold what that cursed N. N. has done me!" so speaks God, "Behold what that Babylonian dwarf has done: he has exiled My children, destroyed My house, and burned My Temple" (*ib.* xiii. 112a, b).

Duration of Exile.

The expression "because, even because" (Lev. xxvi. 43) has the same sense as the saying "measure for measure," and points to the fact that the duration of the Exile was commensurate with the duration of Israel's sinfulness (Lam. R. proem 21). Hananiah b. Azzur was a true prophet, but a plagiarist. Whatever he heard Jeremiah proclaim in the upper market-place he proclaimed in the lower market-place. Also his announcement that within two years the sacred vessels would be brought back (Jer. xxviii. 3) rests upon Jeremiah's prophecy of the seventy years (*ib.* xxxv. 12), which, however, Hananiah had miscalculated, assuming a wrong period for its beginning, and therefore an incorrect period for its end (Yer. Sanh. xi. 30b).

Return from Exile.

"The lion went up" (Jer. iv. 7)—this is Nebuchadnezzar in the constellation of the lion ("the fifth month," Jer. i. 3)—and destroyed the lion of God ("Jerusalem," Isa. xxix. 1). Accordingly will also come the lion ("God," Amos iii. 8) in the constellation of the lion, in the same month in which Jerusalem was destroyed (compare Jer. xxxi. 12: "I shall change her mourning into joy"), and He will rebuild the lion of God (Ps. cxlvii. 2; Pesiḳ. xiii. 116a). That Israel had found no rest (Lam. i. 3) as he went into exile assured his return home; for Noah's dove returned also because she had found no rest for her feet (Gen. viii. 9); and with the same words is also predicted Israel's restlessness in exile (Deut. xxviii. 65; Lam. R. i. 3). When in consequence of the sins of Israel the enemy had entered Jerusalem, captured his heroes and tied their hands behind them, God said: "With him am I in distress" (Ps. xci. 15); "My children are in distress, shall I be in freedom?" Then He drew His right hand back from before the enemy (Lam. ii. 3). This was revealed to Daniel by the expression לקץ הימין (Dan. xii. 13, the real meaning "at the end of days"), "till the end of the right hand," that right hand which was in subjection. "With the redemption of My sons have I also redeemed My right hand" (Pesiḳ. xvii. 131b).

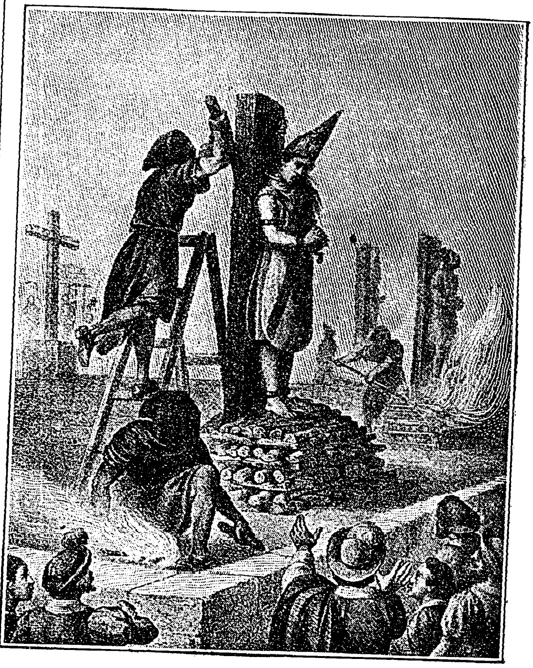
CAPTIVITY, THE PRINCES OF. See EXILARCHS, THE.

CAPUA, JOHN OF. See JOHN OF CAPUA.

CARABAJAL (variously spelled **Carabal, Caraballo, Caravajal, Carbajal,** and **Cavajal,** the name **Carvalho** being possibly identical): The name of a family of Maranos in Mexico at the end of the sixteenth century and the beginning of the seventeenth, all connected with Don Luis de Carabajal, governor of New Leon. Several members of the family suffered martyrdom at the stake for Judaizing.

Francisca Nunez de Carabajal: Sister of Don Luis de Carabajal; born in Portugal about 1540; died as a martyr in the city of Mexico Dec. 8, 1596. She was among the members of the family seized in 1590 by the Inquisition. She also was tortured till she implicated her husband and her children, one of whom was named Luis de Carabajal. The whole family were forced to confess and abjure at a public auto da fé, celebrated on Saturday, Feb. 24, 1590. Luis de Carabajal, with his mother and four sisters, was condemned to perpetual imprisonment, and his brother, Baltasar, who had fled upon the first warning of danger, was, along with his father, Francisco Rodriguez de Matos, deceased, burnt in effigy. In January, 1595, Doña Francisca and her children were accused of a relapse into Judaism, and convicted. During their imprisonment they were tempted to communicate with one another on Spanish pear seeds, on which they wrote touching messages of encouragement to remain true to their faith. At the resulting auto da fé, Doña Francisca and her children, Isabel, Catalina, Leonor, and Luis, died at the stake, together with Manuel Diaz, Beatriz Enriquez, Diego Enriquez, and Manuel de Lucena. Of her other children, Doña Mariana, who lost her reason for a time, was tried and put to death at an auto da fé held in the city of Mexico March 25, 1601; Anica, the youngest child, being "reconciled" at the same time.

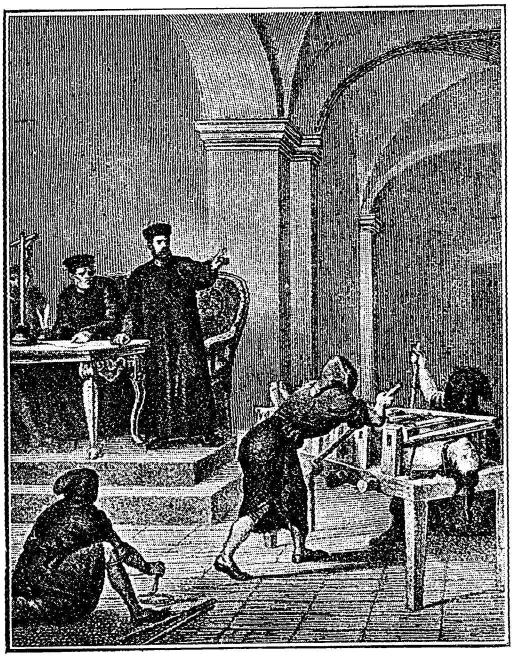


Execution of Mariana de Carabajal at Mexico, 1601.
(From Palacio, "El Libro Rojo.")

Don Luis de Carabajal y Cueva: Born at Magodorio, Portugal, in 1539; appointed governor of a district in Mexico in 1579; said to have died about 1595. In consideration of the appointment of governor, he undertook to colonize a certain territory at his own expense, being allowed the privilege of repaying himself out of the revenues. His original jurisdiction, under the name of "Nuevo Reino de Leon" (New Kingdom of Leon), was to comprise a somewhat ill-defined territory, beginning at the port of Tampico, extending along the River Panuco, and thence turning northward; but it was not to exceed 200 leagues either way. It would seem to have included Tamaulipas, as well as the states of Nuevo Leon and Coahuila, and parts of San Luis Potosi, Zacatecas, Durango, Chihuahua, and Texas. Carabajal received his royal patent as governor of Nuevo Reino de Leon on May 31, 1579. He arrived in Mexico in 1580, and began to prepare for his occupancy of the territory. He planted his colony on a site formerly called "Santa Lucia," and named the place "City of Leon."

To pacify and colonize the new territory, Carabajal was allowed 100 soldiers, and 60 married laborers, accompanied by their wives and children. It is safe to assume that a number of these early colonists were Spanish Jews, who, under the guise of Maranos, had hoped to escape persecution and find prosperity in the New World. In this expectation they were doomed to disappointment, for within a decade after their settlement a score of them were openly denounced and more or less severely punished for Judaizing. In 1590 there seems to have been an extensive colony of them in Mexico.

Don Luis de Carabajal brought with him to Mexico his brother-in-law, Don Francisco Rodriguez de Matos, and his sister, Doña Francisca Nuñez de Carabajal, with their children, Doña Isabel, the oldest, 25 years of age, widow of Gabriel de Herrera; Doña Catalina, Doña Mariana, Doña Leonor, Don Baltasar, Don Luis, Jr., Miguel, and Anica (the last two being very young). Another son, Caspar, a pious young man (monk?) in the convent of Santo Domingo, Mexico, had arrived a short time before. Doña Catalina and Doña Leonor married respectively Antonio Diaz de Caceres (see CACERES) and Jorge de Almeida—two Spanish merchants residing in the city of Mexico and interested in the Tasco mines. The entire family then removed to the capital, where, in the year 1590, while in the midst of prosperity, and seemingly leading Christian lives, they were seized by the Inquisition. Doña Isabel was tortured till she implicated the whole of the Carabajal family, who, with the exception of Don Baltasar, were imprisoned. The latter succeeded in escaping to Tasco, and was condemned to death in his absence.



Torture of Francisca de Carabajal at Mexico, 1590.
(From Palacio, "El Libro Rojo.")

Luis de Carabajal, Jr.: Son of Doña Francisca Nuñez de Carabajal, the first Jewish author in America, and nephew of Luis de Carabajal, governor of New Leon; was Castilian by birth, and a resident of the city of Mexico; died in the city of Mexico at an auto da fé Sept. 8, 1596. He had been "reconciled" at that city Feb. 24, 1590, being sentenced to perpetual imprisonment in the lunatic hospital of San Hipolito. On Feb. 9, 1595, he was again arraigned as a "relapso," subsequently testifying against his mother and sisters (if the records are to be believed). At one of the hearings (Feb. 25) he was shown a manuscript book beginning with the words: "In the name of the Lord of Hosts" (a translation of the Hebrew invocation, "be shem Adonay Zebaot"), which he acknowledged as his own book, and which contained his autobiography. On Feb. 8, 1596, he was put on the rack from 9:30 A.M. till 2 P.M., and then denounced no less than 121 persons, though he afterward repudiated his confession. He threw himself out of a window to escape further torture. He and his brother Baltasar composed hymns and dirges for the Jewish fasts: one of them, a kind of "widdui" (confession of sin) in sonnet form, is given in "El Libro Rojo."

A. G. A. K.

CARACALLA: Roman emperor (211–217); son of Septimius Severus. It is said that as a boy of seven he had a Jewish playfellow, and having heard that the latter had been cruelly whipped on account of his religion, he could not for a long time endure the sight either of his own father or of the boy's father, both of whom were responsible for the punishment (Spartianus, "Antoninus Caracalla," i.). The anecdote may be credited, since his mother, Julia Domna, was a Syrian. While still a prince, though already invested with the title "Augustus," his father permitted him to have a triumphal procession on the occasion when the Senate decreed Septimius Severus a Jewish triumph in honor of his successful wars in Syria (Spartianus, "Severus," xvi.); for the words "Cui senatus Judaicum triumphum decreverat" do not refer to Caracalla, as has been erroneously assumed (Grätz, "Gesch. der Juden," 4th ed., iv. 208), but to Septimius Severus, who as a mere amusement allowed even his youthful son to take part in the triumph.

As Augustus, Caracalla, whose real name was Bassianus, assumed the name Antoninus (beginning 198), an official designation under which he is mentioned several times together with his father. A synagogal inscription found in the otherwise little-known place Kaisun contains a prayer of the Jews for the welfare of the whole imperial family, naming Septimius Severus, the empress Julia Domna, and their two sons, Antoninus and Geta ("Journal Asiatique," Dec., 1864; "Monatsschrift," 1865, p. 154). Hence Jerome's words in his commentary on Dan. xi. 34: "Hebræorum quidam hæc de Severo et Antonino principibus intelligunt qui Judæos plurimum dilexerunt" (Many of the Jews take this to refer to the emperors Severus and Antoninus, who greatly loved the Jews), are to be interpreted literally, and do not, as Grätz assumes (*ib.* iv. 452), refer only to one name, Alexander Severus. This contemporaneous rule of father and son becomes evident also in the laws of the Digesta ("De Decurialibus," Leges 50, II. iii. § 3). Those who followed the Jewish superstition were permitted by the emperors Severus (in some editions erroneously "Verus") and Antoninus to obtain offices ("honores"). This decree must be dated between 198 and 208, since Geta, who became Augustus in 208, is not mentioned therein. In any case there are several witnesses to Caracalla's friendliness toward the Jews, while nothing is known of any inimical measures during his short reign. Hence those scholars may be right who identify with Caracalla the Antoninus who is often mentioned in both the Talmuds as a friend and patron of the patriarch Judah I.

It is known that Caracalla undertook an expedition against the Parthians, during which he passed through Antioch and Syria (217); he may at that time have met R. Judah. On this expedition he was murdered by the subsequent emperor, Macrinus, who is also mentioned in Jewish writings. After his death the nickname "Caracalla" was given to him from a long Gallic garment which he had preferred. Some scholars think that this garment is mentioned also by the Rabbis (Krauss, "Lehnwörter," ii. 592).

CARACAS. See Venezuela.

CARASSO, DAVID SAMUEL: Jewish traveler; born at Salonica, Turkey. On the occasion of a business trip to Yemen, Arabia, in 1874, he studied the situation of the Jews of that region, and published an account of his travels in a volume written in Judæo-Spanish, entitled "Zikron Teman ó el Viage en el Yémen" (Constantinople, 1875). He traversed the whole of the interior of Arabia—including Sada, Aseer, Sanaa, etc., and was especially interested in the last-named community. In order to ameliorate the condition of the Jews of Yemen, he wrote to the Anglo-Jewish Association and to the chief rabbi of Constantinople, Moses Ḥalévy, whereupon the latter sent Isaac Saul, a rabbi of Constantinople, to Sanaa as chief rabbi.

S. M. Fr.

CARAVAN: A convoy of travelers or merchandise. As the commerce of the Israelites was chiefly inland trade, products from regions that were not contiguous were exchanged by means of caravans ("orḥah"). The most important highways connecting Asia with Africa, and the far East with Europe, traversed or touched Palestine; and along these highways the great caravans passed through the country. They were not, however, roads in the modern sense of the word, but beaten paths, as they still are to-day, little better than trails and impassable for vehicles. Hence the camel was the chief medium for transportation, as it still is the invaluable beast of burden of those regions, marching day after day from twelve to fourteen hours with a burden of three or four hundred pounds, and thus far surpassing the best horse in its capacity for work. The Israelites took little part in this trading by caravan, for the commerce of the country itself lay chiefly in the hands of the Phenicians and Canaanites; while the extensive trade between the East and the Mediterranean and Egypt was carried on by the tribes of the desert, who made this their business, as they in part still do. Thus it was a Midianite caravan—according to another source, an Ishmaelite—that, coming from the land east of the Jordan, carried Joseph to Egypt (Gen. xxxvii. 25, 28). The Dedanim—the inhabitants of the land of Teman and of Sheba—are also mentioned as leaders of caravans (Isa. xxi. 13, lx. 6; Job vi. 19). It seems that the kings of Israel levied, at least at times, a toll upon these caravans passing through their country (I Kings x. 15). See Commerce.

J. Jr. I. Be.

CARBEN, VICTOR OF: Jewish convert; lived at Cologne (1442–1515). Like most converts, Victor endeavored to show his zeal for his new religion by writing against his former coreligionists. When the Jews were banished from the diocese of Cologne early in the sixteenth century, he wrote to the archbishop, congratulating him on having "plucked away the weeds from his bishopric and ridden it of Jews."

Victor was the author of the following works: (1) "Opus Aureum ac Novum in quo Omnes Judæorum Errores Manifestantur," divided into four parts, the first of which treats of the life and customs of the Jews (Cologne, 1509). Raimann holds that the real author of the latter work was Ortuin Gratius. It was translated into German. (2) "Propugnaculum Fidei Christianæ, Instar Dialogi inter Christianum et Judæum, in quo quod Jesus Verus Messias, Verus Deus et Homo, Totiusque Humani Generis Salvator Sit Demonstratur" (Cologne, 1504-8).

In his writings Victor repeatedly asserts that it is not wise for Christians to enter into religious controversy with Jews, the latter being taught from childhood how to uphold their faith. He was chiefly concerned in exonerating himself from the accusation of having apostatized for the sake of worldly advantages; and in view of this, he paid the Jews a gratuitous compliment when he asserted that they, of all the people of the earth, are the most difficult to convert, their attachment to their Law being so strong that neither riches nor fear of persecution can cause them to abandon their faith.

In his old age Victor became an ecclesiastic; and after his death the following epitaph was engraved on the door of the church of Sainte-Ursule at Cologne: "Victor, formerly a Jew, wrote in the year 1509 four works against the errors of the Jews."

CARCAS: One of the seven chamberlains serving Ahasuerus and ordered by him to bring Queen Vashti into the royal presence (Esth. i. 10). The Septuagint gives a different name—*Θαραβὰ*. The Targum allegorizes five of the names, but leaves "Zethar" and "Carcas" unexplained.

E. G. H. G. B. L.

CARCASS.—Biblical Data: The carcass of a clean animal that had not been properly slaughtered, or that of an unclean animal of the land, the water, or the air, polluted until the evening the person who touched it (Lev. xi. 24). One who carried or ate it must wash his clothes (*ib.* 25, 39, 40). A special prohibition was enacted against eating clean animals that had died (Lev. xxii. 8; Ezek. iv. 14, xliv. 31), and although this was intended primarily for priests, only the stranger in Israel could eat them (Deut. xiv. 21). Certain "creeping things" ("sheraẓim"), when dead, polluted not only persons, but also wooden utensils, clothes, leather, and sackcloth. These were to be dipped into water, after which they became clean in the evening (Lev. xi. 32). But food and beverages could not thus be made clean (Lev. xi. 34), nor could a stove, nor any earthenware upon which the carrion had dropped (Lev. xi. 35; compare vi. 21). Seeds were unclean only when damp (Lev. xi. 38). See also Burial, Corpse, Impurity.

Pollution from Carcass.

Corpses, as well as inanimate things in the stage of dissolution and decay, must be removed from before the living God and from the people who dedicate themselves to Him (compare Lev. iii. 13, which commands the salting of meat offerings). The fear of dead bodies is due not merely to a physical revulsion against decay, but also to a sense of the mysterious curse attaching to mortality, especially of human bodies (Gen. ii. 17; iii. 19); it is, therefore, of ethical import (Dillmann's commentary on Lev. xi.). The fact that not only human carcasses, but also those of animals, were supposed to defile, militates against the supposition that these laws were intended to antagonize the pagan ancestor-worship.

E. G. H. S. Kr.

——**In the Talmud:** Dead animals often lay about in the cities (Tosef., Ṭoh. vi. 1), for the carrion of animals did not pollute the habitations in which it lay. So long as the animals were not altogether dead they did not pollute; but if the head had been cut off, as, for instance, that of a lizard, though its trunk might still be moving, it was considered as a carcass (*ib.* i. 4; Oh. i. 6). Not only did the entire body of the animal pollute, but even a single member, which in quadrupeds might be smaller than an olive, or, in reptiles, smaller than a lentil (*ib.* i. 7). If the carcass were that of a clean bird, concerning which thirteen rules had to be observed (Ṭoh. i. 1), it was more defiling in certain respects than that of an unclean bird (*ib.* i. 3). According to Lev. xi. 29, the carcasses of only eight amphibious animals polluted, which were specifically called "creeping things" (sheraẓim); opposed to these as the type of a clean animal was the frog (*ib.* v. 1, 4).

In post-Talmudic times the ordinances regarding the carcasses of "creeping things" were no longer observed, since none of the ordinances of purification were in force. The Karaites, however, censured the Rabbinites for this neglect of Biblical laws (Appiryon, in Neubauer, "Aus der Petersburger Bibliothek," p. 21, Leipsic, 1866; "Lebush Malkut," *ib.* p. 44). An Israelite who was not a Cohen was, according to rabbinical teaching, not bound to guard against pollution by carrion (Sifra, Shemini, iv.). In other directions, however, the ordinances regarding animal carcasses received an extremely wide application; according to rabbinical law (Ḥul. ii. 4), for instance, an animal that had not been slaughtered in the prescribed way became carrion ("nebelah"; see Dietary Laws).

CARCASSONNE: Town in the department of Aude, France; the Carcaso or Carcassio of the Romans. It is variously transcribed in Hebrew as קרקשונא, קרקאשונה, etc.

Although the settlement of Jews at Carcassonne goes as far back as the early centuries of the common era, official documents relating to them are not met with till the twelfth century. A cartulary of the Templars of Douzens in 1162 mentions a territory called "Honor Judaicus" in the environs of Carcassonne; and two charters of the same century describe Jews as lords of the manor. In 1142 a Jew named Bonisach, son of Ganiol (Hebrew name, Isaac ben Eliezer), gives his approval, as lord of the manor, to a donation of a vineyard made by its proprietors to the Templars. A similar case occurs forty-one years later when four Jews, joint lords of the manor, sign a deed of conveyance of vineyards bought by the Templars. One of the signers was Moses Caranita, who held the office of bailiff. The bestowal of this distinction upon a Jew was not unusual in the dominions of the counts and viscounts of Carcassonne, who protected their Jewish subjects and granted them many privileges. Raymond de Trencavel interceded with the bishops of his dominions to abolish the abuses to which the Jews were subjected during Holy Week. Roger II. gave the Jews special evidences of his favor, and took the most prominent among them under his personal protection. Thus, he secured the freedom of the eminent Talmudist Abraham ben David of Posquières (RABaD), who had been thrown into prison by the lord of Posquières, and gave him shelter at Carcassonne. The example of Roger was followed by his successor, who assigned to his Jewish bailiffs the rank of barons in his court.

Under Roger II.

The crusade against the Albigenses brought a reaction in the state of the prosperous community of Carcassonne. Ascribing the Albigensian heresy to the influence of the rabbis, the counts and viscounts were compelled at the council of Saint-Gilles to swear that no public office should be entrusted to Jews. Moreover, Carcassonne in 1209 passed into the hands of the counts of Montfort, who were not so favorably inclined toward the Jews as were the Trencavels. Old edicts, destined to isolate the Jews from their Christian surroundings, were exhumed. The Lateran council of 1215 prescribed a special badge to be worn by Jews; and this order, although little observed in other places, was rigorously enforced in Carcassonne, which was the seat of the Inquisition.

In 1226, when Amaury de Montfort transferred Carcassonne to Louis VIII., the condition of the Jews grew worse. Under the administration of royal officers they became the prey of the avarice of the

Under Louis IX.

government. St. Louis (Louis IX.), who did not favor the Jews in general, was especially embittered against those of Carcassonne for their participation in the uprising of 1240 in favor of Trencavel, when the latter was besieging the city. Thus, in 1246 St. Louis ordered the seneschal of Carcassonne to keep all the Jews in prison until they had paid a certain sum; at the same time freeing Christian debtors from their debts to Jews. In 1253 he banished all Jews from Carcassonne, but soon recalled them, probably at the request of the remaining inhabitants. St. Louis, however, issued an edict (1254) prohibiting them from performing Talmudical rites, from lending money on interest, from practising sorcery, and from engaging in monetary transactions.

The reign of Philip the Bold brought no change in their status. The policy inaugurated by his father and the clergy to isolate the Jews from their Christian surroundings continued. The synodal constitutions of Bernard of Capendu, bishop of Carcassonne in 1272, forbade the Jews to leave their houses during Holy Week, obliged them to rest on Sundays and Christian festivals, prohibited them from eating with Christians, and forbade Christians to employ Jewish physicians.

Under Philip the Fair.

The beginning of the reign of Philip the Fair promised relief to the Jews of Carcassonne. In 1288 he issued an ordinance forbidding the clergy to arrest Jews on any accusation without inquiry first being made by the seneschals. He also permitted the Jews to lend money at a moderate interest, and obliged their Christian debtors to pay their debts. It was soon evident that in this Philip was acting in his own interest: he wanted to enrich the Jews in order that he might derive more profit in plundering them. A system of impositions was inaugurated by him which drove away many Jews from Carcassonne: these sought a refuge in the dominions of various counts, in order to avoid being sent as captives to Paris on account of not having paid their taxes (1290–92). During this time Philip himself apportioned the contributions to be paid by the principal Jews of Carcassonne, instead of leaving the matter to the syndics or procurators of the community, who were responsible for the payment of the taxes. This régime brought misery to the once prosperous community through the total banishment of the Jews from France and the confiscation of their property (1306).

Louis X.

During the reign of Louis X. (1315) an important community was reestablished at Carcassonne. Joseph ha-Kohen ("Emeḳ ha-Baka," ed. Letteris, p. 73) includes it among the communities which had suffered from the persecutions of the Pastoureaux about 1320. Under Charles IV. the community or district of Carcassonne had to contribute the sum of 25,000 livres to the total tax of 180,000 livres imposed upon the Jews of France. In 1394 the Jews were again banished from France, and since then no Jewish community has existed at Carcassonne.

Men of Prominence.

Among the prominent men connected with Carcassonne the following may be mentioned: in the eleventh century, Joseph ben Solomon; in the twelfth century, Abraham ben David of Posquières (RABaD) and Meïr ben Isaac of Trinquetaille; in the thirteenth, Elijah ben Isaac of Carcassonne, Samuel ben Solomon Nassi of Carcassonne, Abraham ben Isaac Ḥayyim of Carcassonne, Solomon ben Jacob, Mordecai ben Isaac Ezobi, and David ben Nathanel. Among the noted physicians of Carcassonne were Isaac, Jacob of Lunel, Dollan Bellan, and Leon Joseph, all of the fourteenth century.

CARCASSONNE, DAVID: French physician; born Dec. 20, 1789, at Remoulins, a small town in the Gard department, France; died Nov. 15, 1861, at Nîmes. He was the son of a purveyor to the army of Napoleon I., and having joined the Grande Armée as military surgeon when twenty-three years of age, he followed the emperor to Russia in 1812, and was made a prisoner there. On his return to Nîmes, where his parents had settled, Carcassonne gave up his practise and became a carpet-manufacturer. He was a member of the Municipal Council of Nîmes, under King Louis Philippe (1837–48). Carcassonne was the author of a work entitled "Essai Historique sur la Médecine des Hébreux Anciens et Modernes," Montpellier-Nîmes, 1815.

S.

CARCHEMISH: City of northern Syria, on the Euphrates. Its importance seems to have been based on its situation at the end of the most direct route from the mouth of the Orontes to the Euphrates and to Harran. This position explains why it was the scene of the battle about 605 B.C. ("by the river Euphrates in Carchemish") between the Egyptian army of Necho II. and the Babylonians under Nebuchadnezzar (Jer. xlvi. 2), in which, according to II Chron. xxxv. 20 (= I Esd. i. 25), the Egyptians were the attacking party. In Isa. x. 9 Carchemish is included among various powerful kingdoms overthrown by Assyria.

Its History.

The city is mentioned as early as (about) 1480 B.C., when it was stormed by Pharaoh Thutmosis III., and later, in the time of Rameses II., as an independent kingdom allied to the Hittites. The Egyptians write "Karakamisha," or frequently "Ḳaraḳamisha." The Assyrians speak of "Gargamish" (earlier "Kargamish") as the principal city of northern Syria, "the Ḥatte-land." It is mentioned as situated "on the right bank of the Euphrates, north of the modern river Sajur." Its territory was ravaged by Tiglath-pileser I. about 1100 B.C. King Sangara paid tribute to Asurnazirpal (877) and to Shalmaneser (854). The last king Pisiri(s) paid tribute to Tiglath-pileser II. (740), but revolted against Sargon in 717, which led to the loss of the independence of Carchemish (Isa. x. 9). The inhabitants were deported and the city was populated with Assyrian colonists, becoming the seat of an Assyrian governor.

The commercial importance of Carchemish is shown in the weight "maneh of Carchemish" in use at Nineveh. In Greek times it seems to have had the name "Europus"; the modern form of this name probably being "Jerabis" or "Jirbas" ("Jerablus," "Jerabolus," given by some English travelers, may be due to a confusion with the neighboring Hierapolis, south of Carchemish). The considerable ruins were first identified with Carchemish by G. Smith on his last journey (1876); formerly Circesium was often mistaken for that city. In I Esd. i. 23 the name is rendered "Carchamis"; in II Chron. xxxv. 20, A. V., "Charchemish."

CARD-PLAYING. See GAMES.

CARDINAL, or CARDINEAL, JUDAH BEN ISAAC: Translator; lived at the end of the twelfth century and the beginning of the thirteenth, probably in southern France. At the request of Joseph ben Baruch, who, according to Zunz, traveled from France to Jerusalem by way of Egypt in 1211, Cardinal translated from Arabic into Hebrew Judah ha-Levi's "Cuzari." This translation, which, with the exception of several small fragments, is no longer in existence, was used by Nathanael ben Nehemiah Kaspi in his commentary on the "Cuzari" entitled "'Edut le-Yisrael," and also by Judah ben Joseph Moscato in his commentary "Ḳol Yehudah."

CARDINAL VIRTUES: Virtues regarded as fundamental, and under which, as heads, all others may be arranged. The term "cardinal virtues" is first used by Ambrose to denote that group of four virtues which became familiar through the writings of Greek philosophers, and which were first formulated by Plato. In accordance with his threefold division of the soul into its rational, combative, and appetitive elements, Plato recognized four fundamental virtues: "*φρόνησις*" or "*σοφία*," wisdom; "*ἀνδρεία*," courage or fortitude, and this, as Zeller remarks, considered as a valor against the foes within the soul; "*σωφροσύνη*," temperance; and "*δικαιοσύνη*," justice or uprightness, conceived as resulting from the harmony of all the soul's powers when wisely governed. These four virtues became the classical expression of Greek ethical thought, irrespective of any particular system. They are specially prominent in the Stoics; and it is through the influence of the latter that they are found in Jewish writers of the Hellenistic period (see HELLENISM).

The Wisdom of Solomon.

Strictly speaking, there never was, as a native and independent growth in Judaism, any attempt made to deduce systematically the commandments of the Torah from one or more general principles. It is only when the Jewish mind meets the Greek that Jewish thought attempts to present in Greek form, and also partly to recast into Greek ideas, the religious and moral conceptions of Israel. Thus a writer in the second century before the present era, the author of the Wisdom of Solomon, recognizes sophia, or wisdom, as the root of all virtues, and identifies it in his mind with the Spirit of God. In describing its workings he goes so far in his personifications as almost to hypostatize it, and speaks of the fruits of wisdom later as four (Wisdom viii. 7): "temperance and prudence, justice and fortitude."

The unknown author of IV Maccabees shows the influence of Stoicism in his enumeration of the four virtues in the following order: in the beginning of his work (i. 18) *φρόνησις*, as the most important, through which the mind rules over the affections; then justice, fortitude, and temperance. He illustrates the triumph of reason over the passions, from the martyrdoms described in II Macc. vi. Quite different again is the order of the four virtues in IV Macc. v. 22: temperance, fortitude, justice, and piety (see Freudenthal, "Die Flavius Josephus Beigelegte Schrift über die Herrschaft der Vernunft," 1869, pp. 51-55). Schürer says this "influence of Stoicism upon the author is in no other point so penetrating. . . . The reason to which he ascribes dominion over desire," and which is to produce the virtues, is "not human reason as such, but reason guiding itself according to the rule of the Divine law."

Lastly, Philo, using his allegorical method, finds in the four streams of Eden an indication of the four cardinal virtues ("De Allegoriis Legum," i. § 19; compare "Quod Omnis Probus Liber," § 10); while in the order of them he follows the Stoics, he departs from them in recognizing the insufficiency of man to liberate himself from his sensual nature. For this is needed the help of God, who plants and promotes the virtues in the soul of man. True morality is, as Plato teaches, "the imitation of Deity," or, better, as the Rabbis say (Sifre, Deut. 49): "As He is called gracious, be thou gracious; as He is merciful, be thou merciful; as He is holy, be thou holy."

Jewish Fundamental Virtues.

While there seems to be no other work of a Jewish writer in which the four virtues are directly mentioned, it may not be improper in this connection to note the tendency growing up in Jewish literature to enumerate certain virtues as striking manifestations of character. Thus the statement is given in Ned. 38a and other portions of the Talmud: "R. Johanan said, 'The Holy One, blessed be He! lets his Presence dwell only with the strong, the rich, the wise, and the humble.'" In this connection may be mentioned the accepted definitions of Ben Zoma (Ab. iv. 1): "Wise is he who learns from every man; strong is he who masters his own spirit or 'yeẓer,' (his evil inclination); rich is he who is contented with or rejoices in his lot." It may be said that here is a group which is again and again found in the writings of Jewish philosophers of the Middle Ages. As the reverence for God was regarded as the beginning of wisdom (Ps. cxi. 10; Prov. i. 7), and as yeẓer, the evil inclination, was chiefly identified with the tendency to unchastity, a special cluster of Jewish virtues is here presented: study, combined with fear of God; chastity; cheerfulness or contentment; and humility or meekness. As these would express the inward disposition of the "disciple of the wise," there are also enumerations, especially in "Ethics of the Fathers," which seem to emphasize the fundamental virtues as they appear objectively in the deed or social institution. Such statements as that of Simon the Just (Ab. i. 2): "Upon three things the world rests—the study of the Law, divine service, and deeds of love," or that of another sage (Ab. i. 18): "Upon three things is the world established; viz., truth, justice, and peace," can well be taken to mirror the virtues which appeared to the Jewish mind as fundamental. [Compare Paul's triad of Christian virtues: faith, hope, and charity (I Cor. xiii. 13).—K.]

Reference may also be made to the classical passage of the Talmud (Mak. 23b, 24a): "R. Simlai said, 'Six hundred and thirteen commandments were given to Moses. King David came and reduced them to eleven (Ps. xv.). The prophet Isaiah further reduced them to six (Isa. xxxiii.). Micah (vi. 8) reduced them to three: "He hath shewed thee, O man, what is good . . . to do justly, and to love mercy, and to walk humbly with thy God." Isaiah again reduced them to two (Isa. lvi.). The prophet Amos placed them all upon one principle (Amos v. 4): "Seek me and live"; or, as the prophet Habakkuk said, "The just shall live by his faith."'"

CARDOSO, ELIJAH ABOAB: Philanthropist and founder of the Hamburg synagogue; lived in that city in the first half of the seventeenth century. He was descended from the Spanish family of that name, and was one of the first Jewish settlers in Hamburg. In 1630 Cardoso founded the first Portuguese synagogue in the city. In so doing he risked the displeasure of the senate, which did not care to grant the Jews permission to build a synagogue, lest the attention of the fanatical population of Hamburg should be attracted to them.

CARDOSO, ISAAC (FERNANDO): Physician, philosopher, and polemic writer; born of Marano parents at Celorico in the province Beira, Portugal, before 1615; died at Verona after 1680. He was a brother of Abraham Michael (Miguel) Cardoso. After studying medicine, philosophy, and natural sciences at Salamanca, he settled as physician at Valladolid in 1632, but was soon called as chief physician ("physico mor") to Madrid. While there he published (1632) a lecture on Vesuvius and on the causes of the earthquake, and (1635) a treatise on the color green, which he dedicated to Isabel Henriques, who was celebrated in the academies of Madrid for her intellect, and who lived later in Amsterdam. In the latter year he also composed a funeral discourse for Lope de Vega, which was dedicated to the Duke de Sessa, and a treatise on the uses of cold water, printed in 1637, and dedicated to King Philippe IV. Fernando (his Marano name) left Spain, probably to escape from the Inquisition, and went with his brother Miguel, who had also studied medicine, to Venice, where both openly embraced Judaism, Fernando changing his name to "Isaac." After a short stay in Venice he settled in Verona, where he remained until his death, highly honored by Jews and Christians.

Aside from the works already mentioned, Cardoso published a comprehensive treatise on cosmogony, physics, medicine, philosophy, theology, and natural sciences, printed at Venice in 1673 under the title "Philosophia Libera in Septem Libros Distributa," and dedicated to the doge and senate of that city. In this work, which critically discusses the various philosophical systems, he appears as a decided opponent of the Cabala and of the pseudo-Messiah Shabbethai Ẓebi, although his brother Miguel was an adherent. Isaac also ridiculed the cabalistic, Pythagorean doctrine of the transmigration of souls.

This "learned, God-fearing physician," as he is designated by the pious Moses Ḥagis ("Mishnat Ḥakamim," p. 120a) defended his coreligionists in his great work, "Las Excelencias y Calunias de los Hebreos," printed in 1679 at Amsterdam, and dedicated March 17, 1678, to Jacob de Pinto. In ten chapters he emphasizes the "excelencias" (distinguishing features) of the Jews, their selection by God, their separation from all other peoples by special laws, their compassion for the sufferings of others, their philanthropy, chastity, faith, etc.; and in ten other chapters he refutes the "calunias" (calumnies) brought against them; viz., that they worship false gods, smell badly, are hard and unfeeling toward other peoples, have corrupted Scripture, blaspheme holy images and the host, kill Christian children and use the blood for ritual purposes. This work, which was celebrated by the rabbi J. Brieli of Mantua in a Hebrew sonnet ("Ozar Neḥmad," iii. 167), was sent by Cardoso soon after its appearance, July 23, 1679, to the rabbi Samuel Aboab in Venice, asking for an opinion. Aboab answered July 31, thanking him for the splendid gift. In another letter to Aboab, Dec. 24, 1679, he gave his views on the derivation of some Spanish words from persons mentioned in the Bible. According to De Barrios, Cardoso also published "Varias Poesias" (1680).

G. M. K.

CARDOSO, MIGUEL (later **ABRAHAM**): Shabbethaian prophet and physician; born in Spain about 1630; died at Cairo 1706. He was a descendant of the Maranos in the Portuguese city of Celorico. He studied medicine together with his brother Fernando Isaac, and while the latter was given to his studies, Michael spent his time in singing serenades under ladies' balconies. After having completed his education, he left Spain for Venice. There, probably at the instigation of his brother, he embraced Judaism and received the name "Abraham." Later he established himself as a physician at Leghorn, but did not meet with much success until his recommendation by the duke of Tuscany to Othman, the bey of Tripoli.

Becoming thereafter fairly prosperous, Cardoso married two wives, and began to devote himself to cabalistic speculations, in which he appears to have been previously initiated at Leghorn by Moses Pinheiro. With the appearance of the Shabbethaian movement, he assumed the character of a prophet, pretending to have had dreams and visions; and sent circulars in all directions to support the Messianic claim of Shabbethai. Cardoso's pretended or actual belief in the Messiah was not renounced even when Ẓebi embraced Islam; he justified the latter on the plea that it was necessary for him to be counted among the sinners, in order that he might atone for Israel's sins, according to Isa. liii. (in every point applicable to Shabbethai Ẓebi).

Later Cardoso, no longer satisfied with being only a prophet, gave himself out as "Messiah ben Ephraim," asserting that the Messiah is he who teaches the true conception of God. This conception Cardoso expounded in nearly all his writings: that the true God is not the "En-Sof," but the "Keter 'Elyon"; the first being a passive power which has no connection with the world.

His Wandering Life.

Being endowed with great eloquence, Cardoso had many followers, but many enemies as well. An influential personage, Isaac Lumbroso, by spending much money, obtained his banishment from Tripoli. Cardoso then wandered from place to place, trying to lead people astray by his prophecies and visions, but meeting no success, as the rabbis had issued warnings against his vagaries. In 1703 he settled at Cairo and became the physician of the pasha of Egypt. Three years later he was assassinated by his nephew during a discussion on money matters.

His Works.

Cardoso was the author of many cabalistic and polemical works, of which only two are still extant: "Boḳer Abraham" (Dawn of Abraham), a cabalistic work in two volumes (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1441), an extract of which was published by Isaac Lopez in "Kur Maẓref ha-Emunot," and "Ha-Ketab" (The Writing), published in Weiss's "Bet ha-Midrash," 1865. Cardoso's other works were: (1) "Zeh Eli"; (2) "Ḥokmato Shel Abraham Abinu"; (3) "Sefer ha-Ma'or"; (4) "Or Ẓaḥ we-Meẓuḳḳaḳ"; (5) "Wikkuaḥ Kellali"; (6) "Sullam Ya'aḳob"; (7) "Ḥereb Pipiyyot"; (8) "Elohe Abi"; (9) "Shema' Ḳaddishah"; (10) "Ṭob Adonai la-Kol"; (11) "Derush Amen"; (12) "Ereẓ Yisrael"; (13) "Sod Ḥai 'Alamin"; (14) "Derush ha-Ketab"; (15) "Solet Neḳiyyah"; and (16) "Raza de-Razin."

CARDOZA, DON AARON: Consul for Tunis and Algiers at Gibraltar about 1805. He was a descendant of a Portuguese-Jewish family. Cardoza promoted the interests of the British government; and as delegate of General Fox, the governor of Gibraltar, concluded a treaty on Nov. 5, 1805, with Sidi Mahomet, bey of Oran, for provisioning the garrison of Gibraltar and the British squadron in the Mediterranean. He proceeded to Oran on board the frigate "Termagant," which was placed at his disposal by Lord Nelson. Cardoza was successful in saving the lives of three English sailors who were imprisoned at Oran and under sentence of death. A treaty was negotiated by him between the Portuguese government and the bey of Tunis. He was one of the principal landowners of Gibraltar. In 1824 Cardoza was created a knight of the Legion of Honor by Louis XVIII. of France, and was rewarded with other orders of merit for his distinguished services. For many years he was president both of the Hebrew community and of the chamber of commerce.

CARDOZO, DAVID DE JAHACOB LOPEZ: Dutch Talmudist and prominent communal worker; born in Amsterdam, Holland, May 21, 1808; died there April 11, 1890. He was sent at an early age to the celebrated bet ha-midrash 'Eẓ Ḥayyim, studied under Rabbi Berenstein at The Hague, and received his diploma of "Morenu" in 1839. The same year he was appointed ab bet din of the Portuguese synagogue of Amsterdam, and in 1852 ab bet din and preacher of that synagogue, Chumaceiro being made ḥakam, and Vaz Diaz and Montezinos dayyanim at the same time. He became dean of the intermediate classes of 'Eẓ Ḥayyim, which office he held for nearly half a century. Cardozo was founder of the Ḥebrah 'Abodat ha-Ḳodesh, instituted for the study of Jewish law and its commentaries. After having been decorated by the king of Holland with the Royal Order of the Lion for services rendered to his country, he retired from his various offices in 1888.

CARINTHIA (German, **Kärnten** or **Kärnthen**): A crownland of Austria. It has but a small number of Jews, whose ancestors, with the Jews of the neighboring crownlands, Carniola (Krain) and Styria (Steiermark), shared the vicissitudes of their brethren in the Austrian empire. The first settlement of Jews in these countries took place at the end of the eleventh and during the twelfth and thirteenth centuries, as is proved by documents in which occur such names as "Judenburg," "Judendorf," and "Judenanger." At first compelled to dwell in hamlets and villages, they were allowed, in the course of the fourteenth century, for financial and commercial reasons, to inhabit cities.

The development of the legal status of the Jews of Carinthia and Styria up to the year 1496 resembled that of the Jews of Austria generally. The privileges granted by Duke Friedrich July 1, 1244, and by King Ottocar I. March 29, 1254, forming and regulating the laws governing the Jews of Austria proper, were extended to Carinthia, when, in 1335, it came into the possession of the house of Hapsburg. In civil affairs the Jews had their own jurisdiction. Their judge ("Judenmeister") decided all cases among Jews, and was the intermediary between them and the government, especially in regard to taxes and other state matters.

An edict ("Handfeste") concerning the "right, liberty, grace, and good habits" of the Jews of Carinthia and Styria, issued by the dukes Albrecht III. and Leopold III. at Vienna, June 24, 1377, was renewed and confirmed Oct. 23, 1396, by Duke Wilhelm "after good consideration and advice of our counselors." Neither the originals nor copies of these documents being extant, their detailed contents are not known. Presumably, the Jews, having been in 1370 the victims of persecutions and spoliations, solicited the renewal of these edicts, which restored to them their former rights and freedom.

In those parts of Carinthia not belonging to the house of Hapsburg the legal status of the Jews was

Privileges.

based upon special privileges. Thus, Duke Heinrich of Carinthia granted his protection to the Jew Höschlein and his heirs, and secured to them all the rights enjoyed by the other Jews in Austria and Styria (Jan. 20, 1328). He also promised them his aid in collecting their outstanding debts and claims in Carinthia and elsewhere. In return they were required to pay him annually 30 marks in silver.

The laws regulating the condition of the Austrian Jews were also in force in those districts that were included in the territory of Carinthia and that belonged to the archbishop of Salzburg, the bishop of Bamberg, the counts of Görz and Ortenburg, and others. The Church in Inner Austria was never hostile to the Jews. Although the statutes of the Salzburg provincial councils of 1267 and 1418 directed against the Jews applied also to Carinthia and Styria, they were never enforced there; and the clergy had frequent commercial dealings with the Jews.

As creditors of the burghers and the peasants, of the nobility and the clergy, the Jews through their wealth gained great influence in times when money was scarce. Money-lending being the only business in which they were allowed to engage, and having no guaranty of repayment of their loans, they were compelled to exact a high rate of interest, and thus they incurred the hatred of the people. In those days of ignorance and superstition the Jews were also accused of maliciously desecrating the host and of ritual murder. Violent persecutions in 1310, 1338, and 1397 were the consequence.

Taxes.

Jewish taxes in Inner Austria are recorded in the "Rationalia" (Rent-Books) of the Austrian dukes in the years 1326-38. Under Friedrich III. the Jews of these countries annually paid 6,000 florins. In 1470 a personal tax of 4,000 florins and in 1478 one of 3,000 florins were imposed upon them. A special tax paid in 1446 was a contribution toward the dowry of Princess Katharina, sister of Friedrich III.

The agitations in the cities against the privileges of the Jews resulted in several edicts limiting their commercial and judicial rights. An ordinance of Duke Wilhelm (March 17, 1396) prescribed that all bills of credit given by Christians to Jews must be sealed by both the city or market judge and the Jewish judge.

Opposition of the Estates.

About the middle of the fifteenth century a hostile movement also began to manifest itself among the provincial legislatures ("Landstände"); and the Jewish question, heretofore considered but a local affair, now became the concern of the country at large. Complaints against the Jews were the constant subject of proceedings in the provincial diets, and they ended in the expulsion of the Jews. From St. Veit, Carinthia, Emperor Friedrich III. issued a decree (Jan. 5, 1444), article 17 of which is to the effect that any Jew possessing a bill of credit given by one Christian to another and transferred to him (the Jew), must sue for recovery in the court to which the Christian creditor resorts, and not in a court of his own choice. Article 16 ordains that without the consent of his feudal master a peasant may neither sell his estate nor give a bill of credit to a Jew.

On July 8, 1491, Friedrich III. ordained that, "for better control and security," all debt-claims of the Jews should be entered in a special book known as the "Judenbuch," and that bills of credit not so entered should have no validity. To restrain usury, the same ordinance greatly reduced the rate of interest, and prohibited the charging of compound interest.

In consequence of these lengthy transactions with Friedrich III. the provincial diets came to the conclusion that only expulsion could definitely solve the Jewish question, but that this emperor would never sanction such a measure. His son and successor, Maximilian I., however, yielded to their demand. After preliminary transactions at the diets held at Marburg in April and Nov., 1494, and at Gratz in Aug., 1495, the emperor accepted the offer of 38,000 florins from Styria and one of 4,000 florins from Carinthia, to indemnify him for the loss of Jewish contributions to his treasury, and ordered the expulsion of the Jews "on account of their misdeeds." In March, 1496, he issued from Schwäbisch-Werda a decree according to which the Jews, "for having repeatedly insulted and desecrated the holy sacrament, tortured and killed Christian children and used their blood for hidden, damnable purposes, and with falsified letters, seals, and otherwise having cheated people, and impoverished and ruined many noble and other families," were required within six months to leave Carinthia and to withdraw from Styria by the following Epiphany (Jan. 6). What the Christians "honestly owe" to the Jews, they are to pay, up to Aug. 24, 1496; failing to do so, their property is to be given into the hands of the messenger of the court, Virgil Haffner, who shall sell the same, pay the debt to the Jews, and return the remainder to the debtor. The real estate of the Jews became the property of the king.

Various Communities.

A considerable number of Jews lived at Villach, the center of commerce in Carinthia, situated within the territory of the bishop of Bamberg. They had there a synagogue and a cemetery near the village Judendorf. Persecutions took place in 1338 at Wolfsberg; and in the fatal year 1349 they extended to the Carinthian possessions of the archbishop of Salzburg, as is indicated in the treaty of peace made at Friesach Nov. 14, 1349, in which Archbishop Ortolf declares that "he will not meddle with the affairs of the Jews." Probably also Salzburg Jews were injured or slain in these tumults in the Bamberg territory.

But during the period following, the bishops of Bamberg vigorously protected their Jewish subjects. On Feb. 12, 1368, Bishop Ludwig made an agreement with the dukes Albrecht III. and Leopold III., according to which the ducal governor of Carinthia was to aid the subjects of the bishop, be they Christians or Jews, in obtaining satisfaction from their debtors. The same stipulation was made in the agreement of Feb. 3, 1436, between Duke Friedrich and Bishop Anton of Bamberg.

These favorable conditions continued during the fifteenth century, until the Jews, accused of having killed Simon of Trent, were also expelled from the districts of Bamberg under Bishop Philipp von Henneberg in 1478. It seems that this decree of banishment was not strictly carried out; since it was frequently republished, in 1535, 1565, 1566, 1585, 1593, 1687, 1699, 1700, 1711, 1712, 1713, and 1748.

Jews settled in the district of Salzburg in the thirteenth century. From a brevet of Archbishop Ortolf von Weisseneck dated June 25, 1346, it is known that upon payment of a considerable annual tax they enjoyed the privilege of owning houses, and the right of free movement and commerce. In Friesach they had a synagogue. In 1498 these Jews were expelled, being forced to sign a declaration that they would never return. After having paid their debts, they were allowed to take their goods with them; but they had to surrender the pledges in their hands.

Jews passing through the countries from which they had been driven were strictly watched; only a temporary sojourn in certain market-towns being allowed, and then the payment of a personal tax was required.

Re-admission.

For almost three centuries the decree of banishment remained in force. When Emperor Joseph II. proclaimed the Act of Toleration May 16, 1781, the Styrian deputies remonstrated against it, whereupon the emperor gave this decision: "Since, according to the provincial privileges, Jews neither exist nor are tolerated in this country at the present time, there is no question of the admission or toleration of the Jewry in this country." Nevertheless a patent of Sept. 9, 1783, set forth that "natives and foreigners, Christians as well as those of another religion, may visit the annual markets at Gratz, Klagenfurth, Laibach, and Linz." On the other hand, by circulars of Oct. 20, 1784, and of June 4, 1787, Jews were prohibited from "entering the country, trading from house to house, buying old silver and other things." These prohibitions were republished with the gubernatorial ordinances of 1823 and 1828.

The imperial patent of March 4, 1849, about the political rights granted by the constitution, gave to the Carinthian Jews social and legal equality; but they were not allowed to own real estate until the constitution of Dec., 1867, removed this last vestige of intolerance.

According to the census of 1890 the total number of Jews in Carinthian towns was 179, divided as follows:

Klagenfurth and environs	122	Pfarrdorf	5
Spital	6	Bleiberg	5
Villach	20	Wolfsberg	2
Tarvis	4	Völkermarkt	5
Prævali	5	St. Veit	5

They, together with the Jews of Styria and Carinola, belong officially to the Israelitish congregation of Gratz.

E. C. S. Man.

CARITES: People mentioned in II Kings xi. 4, 19. The Kari (R. V., "Carites"; margin, "executioners"; A. V., "captains") are mentioned between the captains over hundreds and the "runners" (*i.e.*, satellites) as body-guards of the king. In II Sam. xx. 23, where the well-known troop of the Cherethites (A. V., "Keri") and Pelethites is mentioned, the text reads "Kari" (R. V. margin, "Carites") for "Cherethites." The most plausible explanation is that, in all three passages, there is only an abridged orthography for the usual "Kerethi(m)"—Cherethite(s) (compare Vulgate, the Hexapla, etc.; Targ. [except II Kings xi. 4, "heroes"]). Others (*e.g.*, Driver, on II Sam. xx.) consider that the reading "Carite(s)" (II Sam. xi. 4) is intended, and they assume that, instead of the Philistine mercenaries here, a similar troop of Carians, the famous pirates and mercenaries of earlier Greek antiquity, is mentioned, as by Herodotus ii. 152, 171; Thucydides, iv. 8; Hesychius, under "Karitai" and "Archilochus." This might also point to affinity with the Philistines who came from the same quarter of the Ægean Sea. The Septuagint understands "Chorî" not as collective singular, but as the name of an officer.

CARMANIANS (R. V., **CARMONIANS**)**:** A people mentioned in II Esd. xv. 30. The Carmanians are represented as joining battle with the "nations of the dragons of Arabia." The dragons gain the upper hand, but are themselves defeated later (xv. 33). This has been taken to refer to the time of the Sassanids. Sapor I. (240–273) invaded Syria and took Antioch, but was repulsed by Odenathus and Zenobia. Zenobia was afterward defeated by Aurelian and taken captive.

The name is still preserved in "Kirman," a district in the southeastern part of Persia, on the shores of the Persian Gulf.

CARMEL. See Periodicals.

CARMEL, MOUNT: A well-known mountain ridge in Palestine; הכרמל ("the garden" or "garden land," with the definite article) is usually given in the Bible. It is known in later Hebrew as כרמל, and in modern Arabic as "Kurmul," but more usually "Jabal Mar Elyas." Extending from the plain of Esdraelon to the Mediterranean, it terminates in a steep promontory in that sea, about nine miles southwest of Acre. The formation is of limestone with an admixture of flint. The highest point is 1,742 feet above the sea, and the slope is covered with a luxuriant vegetation. Oaks, pines, olives, and laurels abound.

Carmel is renowned in Jewish history, and occurs frequently in the imagery of the Prophets (Isa. xxxiii. 9, xxxv. 2; Jer. xlvi. 18, l. 19; Amos i. 2, ix. 3; Micah vii. 14; Nahum i. 4; Song of Solomon vii. 5). It fell to the lot of the tribe of Asher (Josh. xix. 26), "the king of Jokneam of Carmel" being one of the Canaanitish chiefs who was defeated by Joshua (Josh. xii. 22). It is also famous as the place where the prophet Elijah brought Israel back to its allegiance to YHWH, and where he slew the priests of Baal (I Kings xviii. 40). Here within the numerous grottoes he lived concealed during the reign of Ahab; and here, too, at his word were consumed the two "captains" with their "fifties" (II Kings i. 9–12). Here also Elisha received the visit of the Shunammite woman, whose son he restored to life (II Kings iv. 25).

It is reasonable to suppose that from very early times Carmel was considered a sacred spot. This is evidenced by the facts that an altar to YHWH existed there before the introduction of the worship of Baal into the kingdom (I Kings xviii. 30); that Elijah chose it for the place of the assembly of the people; and that Elisha visited it from Jericho before going to Samaria (II Kings ii. 25) and even made it his abiding-place (II Kings iv. 23). In later times Pythagoras, according to his biographer Iamblicus, was attracted to it by its sacred reputation; and Vespasian went thither to consult the oracle of God, "without image or temple" (Tacitus, "Hist." ii. 7).

The exact site of the contest between YHWH and Baal, where fire, descending from heaven, proved the God of Israel to be the true God (I Kings xviii. 17-40), has not been identified. Traditions, preserved in the monastery founded on Mt. Carmel in 1156 by Berthold, count of Limoges, and among the Druses of the neighboring villages, indicate, as the scene, the eastern end of the ridge, at a spot called El-Maharrakah ("the burning").

CARMI: **1.** A son of Reuben who came to Egypt with Jacob (Gen. xlvi. 9; Ex. vi. 14; I Chron. v. 3). Also the name of a family of which Carmi was the head (Num. xxvi. 6). **2.** A Judahite (I Chron. ii. 6), son of Zabdi, according to Josh. vii. 1, and father of Achan, who is called "Achar" in I Chron. ii. 7. The latter name being, perhaps, related etymologically to עוכר (ʿoker), "the troubler." **3.** In I Chron. iv. 1 Carmi is a misreading for Chelubai (see Benzinger, "Die Bücher der Chronik Erklärt," Tübingen, 1901).

CARMI (CRÉMIEUX), MORDECAI B. ABRAHAM. See CRÉMIEUX, MORDECAI B. ABRAHAM.

CARMOLY, ELIAKIM: French scholar; born at Sulz (then in the French department of the Upper Rhine) August 5, 1802; died at Frankfort-on-the-Main Feb. 15, 1875. His real name was Goschel David Behr (or Baer); the name "Carmoly," borne by his family in the fourteeenth and fifteenth centuries, was adopted by him when quite young. He studied Hebrew and Talmud at Colmar; and, owing to the fact that both French and German were spoken in his native town, he became proficient in those languages. Carmoly went to Paris, and there assiduously studied the old Hebrew manuscripts in the Bibliothèque Nationale, where he was employed. Several articles published by him on various subjects in scientific papers made him known; and on the establishment of a Jewish consistory in Belgium, he was appointed rabbi at Brussels (May 18, 1832). In this position Carmoly rendered many services to the newly founded congregation, chiefly in providing schools for the poor. Seven years later, having provoked great opposition by his new scheme of reforms, Carmoly resigned the rabbinate and retired to Frankfort, where he devoted himself wholly to Jewish literature and to the collection of Hebrew books and manuscripts, in which he was passionately interested.

Leaves Ministry for Literature.

His Works.

Carmoly's works have been severely attacked by the critics; and it must be admitted that his statements can not always be relied upon. Still, he rendered many services to Jewish literature and history; and the mistrust of his works is often unfounded. Carmoly was the author of the following works: (1) "Toledot Gedole Yisrael," a biographical dictionary of eminent Jews, ancient and modern, Metz, 1828 (only one volume, extending to "Aaron ben Ḥayyim," was published); (2) "Wessely et Ses Écrits," Nancy, 1829; (3) "Sibbub Rab Petaḥyah," the travels of Pethahiah of Regensburg, translated into French and accompanied by the Hebrew text, Paris, 1831; (4) "Eldad ha-Dani: "Relation d'Eldad le Danite, Voyageur du IX^e Siècle, Traduit en Français, Suivie du Texte et de Notes," Brussels, 1834; (5) "Mémoire sur un Médaillon en l'Honneur de Louis-le-Débonnaire," *ib.* 1839; (6) "Maimonides und Seine Zeitgenossen," translated from the Hebrew into German, Frankfort-on-the-Main, 1840; (7) "Les Mille et Un Contes, Récits Chaldéens," Brussels, 1842; (8) "'Aḳṭan de-Mar Ya'aḳob," a kind of Midrash in six chapters on the Chazars, published for the first time from two manuscripts, *ib.* 1842; (9) "Eldad et Medad, ou le Joueur Converti," translated from Leo di Modena's work, with a biographical notice on the author, *ib.* 1844; (10) "Le Jardin Enchanté," Contes, *ib.* 1845; (11) "Sefer ha-Kuzarim: Des Khozars au X^e Siècle, Suivi d'une Lettre du Ministre d''Abd el-Raḥman III. au Roi de Khozarie et la Réponse du Prince," *ib.* 1845; (12) "Histoire des Médecins Juifs, Anciens et Modernes," *ib.* 1844; (13) "Halikot Erez Yisrael: Itinéraires de la Terre Sainte des XIII^e-XVII^e Siècles," translated from the Hebrew, *ib.* 1847; (14) "Dibre ha-Yamim le-Bene Yaḥya," genealogy and biography of the Yahya family, Frankfort-on-the-Main, 1850; (15) "Ha-'Orebim u-Bene Yonah" (The Crows and the Doves), genealogy of the Rapoport family, Rödelheim, 1861; (16) "Imre Shefer" (Words of Beauty), on Hebrew versification, by Abshalom Mizraḥi (fourteenth century), with an introduction and an appendix containing literary essays and poems by the editor, Frankfort-on-the-Main, 1868; (17) "La France Israélite; Mémoire pour Servir à l'Histoire de Notre Littérature," Paris, 1858; (18) "Mebasseret Ẓion" (O Zion, That Bringest Good Tidings), a collection of letters from Jerusalem on the Lost Ten Tribes, Brussels, 1841.

Besides these works, Carmoly contributed to many periodicals, and edited the "Revue Orientale" (Brussels, 1841-46, 3 vols.), in which most of the articles were furnished by himself. The most important of these contributions, which constitute works by themselves, were (1) "Vocabulaire de la Géographie Rabbinique de France"; (2) "Essai sur l'Histoire des Juifs en Belgique"; (3) "Mille Ans des Annales Israélites d'Italie"; (4) "De l'Etat des Israélites en Pologne"; (5) "Des Juifs du Maroc, d'Alger, de Tunis, et de Tripoli, Depuis Leur Etablissement dans Ces Contrées Jusqu'à Nos Jours."

S. I. BR.

CARMOLY, ISSACHAR BÄR BEN JUDAH: Alsatian rabbi; born at Ribeauville, Alsace, Sept. 15, 1735; died at Sulz May, 1781. At the age of ten he was advanced in his training for the rabbinate sufficiently to follow the elaborate lectures of Jonathan Eybeschütz. Later, Carmoly studied successively at Frankfort, under the direction of Jacob Joshua, author of "Pene Yehoshu'a," and at Metz, under Samuel Helman, who conferred upon him the title of rabbi. On returning home, in compliance with the wish of his father, Carmoly began the study of medicine under the direction of Jacob Assur, a physician of Nancy, but had to give it up, being engrossed with his Talmudical studies. The only benefit he derived from his tutor was a fair knowledge of mathematics, of which he made use later.

Carmoly married the daughter of a rich banker named Joseph Raineau. The latter persuaded the bishop of Sulz to create a rabbinate in his see; and Carmoly was appointed rabbi of Sulz.

Carmoly was the author of a commentary on the Tosefta to the treatise Beẓah, published, together with the text, under the title "Yam Yissakar" (Sea of Issachar; Metz, 1769). The grandson of the author, Eliakim Carmoly, claimed to have had in his possession the following manuscripts of his grandfather: (1) "Yam Yissakar," a commentary on the Tosefta on the treatise Makkot; (2) "Keter Torah" (The Crown of the Law), a poem containing the names of all the books of the Holy Scripture, the Mishnah, and the Talmud ("This poem," says Eliakim Carmoly, "is still recited in the district of Sulz on the eve of the Feast of the Law" [Simḥat Torah]); (3) "Ha-Talmudi ha-Melummad" (The Learned Talmudist), a collection of Halakah, Haggadah, and commentaries; (4) "Maṭṭeh Yissakar" (The Staff of Issachar), halakic decisions; (5) "Sefer Yad ha-'Ittim" (Book of the Hand of the Times), a treatise on the Jewish calendar; (6) "Bene Yisrael" (The Children of Israel), novellæ on many Talmudical treatises; (7) "Ohel Yissakar" (The Tent of Issachar), a treatise on mathematics; (8) "Karmi Sheli" (Mine Own Vineyard), novellæ on the Pentateuch, literary essays, poems, etc.

CARMONA: City in the archbishopric of Seville, Spain, where Jews resided in very early times. In an old "Fuero de Carmona" it was ordained that no Jew should command a Christian in Carmona or in any of the territory under its jurisdiction.

The Jews of Carmona, who were very wealthy and lived in a separate quarter, were in June, 1391, either murdered or forced to accept baptism, and their synagogue was destroyed in the following December. With the same celerity which had characterized the persecution of Jews in 1391, the persecution of the Maranos spread to Carmona from Cordova in 1474, the local Maranos being plundered and killed in a most horrible manner. "Would that you, illustrious king, had seen the sack and devastation of the city of Carmona!" cries the poet Anton de Montoro in a poem dedicated to the king; "not one thought to cry halt to these excesses."

J. M. K.

CARMONA: A family of Jewish financiers prominent in Turkey at the beginning of the nineteenth century. It is of Spanish origin, and probably came from the city of the same name in Andalusia. The earliest known member was **Behor Carmona,** or, more exactly, "Tchelebi" (Lord) Behor Carmona, who had the Turkish title "Shaptchi Bashi" (chief purveyor of alum). Carmona was at the same time banker to the court and general tax-gatherer, sharing these offices with two other Jews, Ezekiel Gabbaï and Isaiah Ajiman. In time of war Carmona and Gabbaï followed the armies, establishing themselves near headquarters. After the destruction of the corps of the janizaries, in 1826, by order of the sultan Maḥmud two negroes of the palace strangled Carmona one night in his own house. His property was confiscated.

Thirty years later (1856), during the reign of Sultan 'Abd al-Majid, a member of the Carmona family who had become an English subject went to London and attracted the attention of the Board of Deputies of the British Jews. The board obtained from the Ottoman government a firman granting an annual pension of 25,600 francs from that year to the descendants of the Tchelebi Behor.

At the beginning of the reign of Sultan 'Abd al-Ḥamid (1876), Behor Carmona's son, **David** (Turkish, **Davidtchon) Effendi,** was a member of the Ottoman Parliament convened under the new constitution. Although this parliament held only a few sessions, David's title of senator secured for his family after his death a pension from the government.

Another member of the family was **Joseph Carmona,** born at Constantinople in 1860. He was an amateur writer and translator. Under the title "El Assedio de Rhodes" he translated in 1873 from the French into Judæo-Spanish a novel entitled "Le Siège de Rhodes," treating of the customs of the Jews of Rhodes under the dominion of the knights, by Pierre Baudin, a bookseller of Constantinople.

There are several families of the name of Carmona at Salonica and Constantinople.

Bibliography: Franco, *Hist. des Israelites de l'Empire Ottoman.*

S. M. Fr.

CARNABAT, CARNOBAT, or **KARNABAT:** Town of eastern Rumelia or southern Bulgaria. According to tradition, Jews first established themselves at Carnabat about 1580; but the oldest tombstones decipherable bear date of 1686. Eliezer of Calo was chief rabbi of Carnabat about 1800; Jacob Finzi, about 1820; and Joseph Ḥayyim ben Hasson of Salonica, from 1840 to 1876. The last-named was an exceptionally learned rabbi, whose memory is still cherished. He left several Hebrew works in manuscript, which are in the possession of his son Isaac ben Hassan at Boorghas. During the Turco-Russian war, 1876–78, the Circassians ravaged the city, inflicting all manner of outrages upon the Jews.

The community has now no chief rabbi, as was customary under the Ottoman rule, but is governed by an elective synagogal council subject to the approval of the government. It has a synagogue, built in 1882, a communal school of 70 boys (in 1901); Le Progrès, a reading club; "Biḳḳur-Ḥolim," a society for sick relief; and "Ḳabarim," a burial society.

The Jews number 400 in a total population of 6,500. Most of them are engaged in the calico and grocery trades. The only large merchant is Hezekiah Presente, dealer in cereals, wool, and hides.

CARNIOLA. See Laibach.

CARNIVAL: Among the Romans, a period of gaiety during the weeks before Lent, in which the Jews were made to play a contemptuous part. While the carnival had existed from the earliest medieval period, its scope was considerably extended by Pope Paul II. at Rome, who established foot-races in addition to the usual games. The papal officials desired to amuse the populace by holding races for various classes on different days. On Tuesdays Jews raced for a prize of valuable robes ("pallia"). The races were not supposed to degrade the participants, but were merely a part of the program. The Jews ran in red cloaks, which all, save physicians, had to wear. No contestant was to be older than twenty years, and the entire community had to contribute toward the expenses.

The Jews' first race took place in the Via Lata Feb. 9, 1466. The next year the course exceeded a mile and was on another street. By statute the Jews were taxed 1,100 florins in support of the races.

At first the Jews enjoyed these contests. Later, however, they were subjected to all sorts of cruelties by the populace; and in 1547 a Jew died during the progress of a race. This was the last year in which Jews raced in the carnival. The carnival was an institution of most of the cities of Italy; and Jews, wherever settled, participated in the races. In Rome, contests were held later in the Via Navona and on the Monte Testaccio.

The races were not the only amusements in the carnival in which Jews participated. Besides paying tribute from the earliest times, the Fattori, rabbis, etc., of the congregation were compelled to march on foot before the car of the senators along the entire Corso. Finally, on Jan. 28, 1668, Pope Clement IX. ordered that the Jews be no longer made the sport of the populace, but that a yearly tax of 300 scudi be collected instead. The elders had to pay this tax on the first day of the carnival in each year to the papal authorities, with due declarations of loyalty and submission. The statement that these expressions were followed by kicking the rabbi must be accepted as fiction; the latest sources do not disclose this practise as customary. In 1742 the Jewish deputies were ordered to appear in citizens' clothes, and not in their robes of office.

This annual procession soon drew upon itself the scorn of the populace, and on several occasions the Jewish deputies were badly treated. It was continued, however, up to the accession of Pius IX. (1846).

CARO, DAVID: Prussian pedagogue; born about 1782 at Fordon, grand duchy of Posen; died Dec. 25, 1839, at Posen. He belonged to the school of the Meassefim, and devoted his great literary talents to the enlightenment of his brethren, to the reform of Judaism, and to the cultivation of the Hebrew language. Under the pseudonym "Amittai ben Abida Aḥizedek" he defended the Hamburg Reform Temple in "Berit Emit" (Covenant of Truth, Dessau ["Constantinople" on title-page], 1820), the first part of which, "Berit Elohim" (Covenant of God), was published by the author himself, and the second part, "Berit ha-Kehunnah" (Covenant of the Priesthood), or "Tekunnat ha-Rabbanim" (Character of the Rabbis), by Judah Löb Mieses of Lemberg. A new edition of the second part, with additions by Mieses, was published at Lemberg in 1879.

Many of Caro's articles, essays, and poems appeared in "Ha-Meassef" and in the "Bikkure ha-'Ittim." He was a prolific writer, and left a number of manuscripts on literary, lexicographical, bibliographical, and pedagogical subjects. Among his inedited works are a Hebrew translation of Zunz's "Gottesdienstliche Vorträge der Juden," with notes and additions; a Hebrew translation of the same author's biography of Rashi, with notes; and biographies of celebrated rabbis.

Bibliography: *Ha-Meassef*, viii. 33; ix. (4), 14, 63; x. (1), 25, 44; (2) 26, 56, 88: *Bikkure ha-'Ittim*, xi. 58, 61, 66, 168, 180, 182, 183, 184; *Allg. Zeit. des Jud.* iv. 615 *et seq.*, v. 48, 49; N. Lippmann, *Leben und Wirken des David Caro*, Glogau, 1840; Zunz, in Asher's *Benjamin of Tudela*, ii. 300; Grätz, *Gesch. der Juden*, xi. 425, 426; Steinschneider, *Cat. Bodl.*, col. 816; idem, *Hebr. Bibl.* xxi. 45.

CARO, EZEKIEL: German rabbi and historian; born Nov. 26, 1844, at Pinne, near Posen; son of the exegete and homiletic writer Joseph Ḥayyim Caro, rabbi at Wloclawek. He attended the gymnasium at Bromberg, the Jewish theological seminary and the university at Breslau; subsequently he was graduated as doctor of philosophy at the University of Heidelberg. He was at first preacher of the German-Jewish community of Lodz (Poland), going thence to Mewe (western Prussia); then was successively rabbi at Dirschau, 1870-79; Erfurt, 1879-82; Pilsen (Bohemia), 1881-91; and since 1891 chief rabbi of the community of Lemberg. Caro's works include: "Ausgewählte Gelegenheitsreden" (Danzig, 1874); "Ein Viertel Jahrhundert Städtischer Verwaltung" (Dirschau, 1880); "Geschichte der Juden in Lemberg bis zur Theilung Polens" (Cracow, 1894); also many sermons and scientific essays in Rahmer's "Litteraturblatt." S.

CARO, GEORG MARTIN: Lecturer on history at the University of Zurich, Switzerland; born Nov. 28, 1867, at Glogau, Prussia. Caro received his education at the gymnasium of his native place and at different German universities, being finally graduated as Ph.D. from the University of Strasburg, Germany, in 1891. After a prolonged stay in Italy, where he sojourned chiefly in Genoa, he became privat-docent at the University of Zurich in 1896. As a result of his Italian experiences his writings deal principally with the history of northern Italy during the Middle Ages, with special reference to the republic of Genoa. Caro is a contributor to the "Byzantinische Zeitschrift," to the "Mitteilungen des Instituts für Oesterreichische Geschichtsforschung," "Historische Vierteljahrschrift," etc. His chief works are: "Die Verfassung Genua's zur Zeit des Podestat's" (his Strasburg dissertation), 1891; "Genua und die Mächte am Mittelmeer," Halle, 1895-99; and "Studien zu den Älteren St. Gallen Urkunden," 2 parts, 1901-02.

CARO, ISAAC B. JOSEPH: Spanish Talmudist and Bible commentator; flourished in the second half of the fifteenth century and the first half of the sixteenth. The son of a scholar, and scion of a noble family, he devoted himself to study in his native city of Toledo, being one of the foremost rabbinical authorities of the country when he had to leave it on the expulsion of the Jews from Spain in 1492. Then he went to Portugal, where he remained for six years, and when the Jews were driven from that country too, fled to Constantinople. During the persecution in Portugal he lost all but one of his sons, “who were beautiful like princes.” Finally he found refuge in Turkey, where he probably died at an advanced age after 1518. In this year he published his commentary to the Pentateuch, “Toledot Yiẓḥaḳ” (Constantinople; printed six times in Italy and Poland). In this work Caro endeavors to do justice to the “peshaṭ,” the literal interpretation, as well as to the allegorical interpretation, evincing little originality but good taste. He left a collection of responsa that has never been published. His nephew, Joseph b. Ephraim Caro, quotes from it several times (compare Conforte, *s.v.*, and “Abḳat Rokel,” No. 144), and the latter's son, Judah, intended to publish it, but never carried out his intention. The Bodleian Library contains Caro's novellæ to Ketubot (No. 535, 2, 3, in Neubauer, “Cat. Bodl. Hebr. MSS.”), as well as a work entitled “Ḥasde Dawid,” containing philosophic and haggadic homilies (Neubauer, *l.c.* No. 987).

Bibliography: Conforte, *Ḳore ha-Dorot*, ed. Cassel, p. 31; Grätz, *Gesch. der Juden*, 3d ed., viii. 386; Steinschneider, *Cat. Bodl.* col. 1129.

L. G.

CARO, JACOB: German historian; born at Gnesen, province of Posen, Prussia, Feb. 2, 1836; son of Joseph Ḥayyim Caro. After several years of diligent study at the universities of Berlin and Leipsic, he attracted considerable attention by his work, “Das Interregnum Polens im Jahr 1586, oder die Häuser Zborowski und Zamojski,” Gotha, 1861; and was immediately entrusted with the continuation of Röppel's history of Poland in the series of “Geschichten der Europäischen Staaten,” edited by Heeren and Ukert, and published at Gotha. Jacob Caro contributed vols. ii.-v. (1863-88) of this monumental work.

Before publishing the results of his research he undertook several extensive journeys through Galicia and the south of Russia, and upon his return to Germany in 1863 was appointed privat-docent at the University of Jena. Shortly afterward, at the invitation of the grand duchess Helena of Russia, he accompanied her on her travels, and was for some time attached to her suite at St. Petersburg. Later he was promoted to the position of assistant professor at the University of Jena; and in 1869 was called by the University of Breslau to fill a special chair of history. Since 1882 he has occupied the position of professor at that institution.

His reputation is based chiefly on his researches in the history of Poland. Among his works, besides those already mentioned, are: “Liber Cancellariæ Stanislai Ciolek: Ein Formelbuch der Polnischen Königskanzlei aus der Zeit der Hussitischen Bewegung,” 2 vols., Vienna, 1871-74; “Aus der Kanzlei Kaiser Siegmunds,” Vienna, 1879; “Beata und Halszka: Eine Polnisch-Russische Geschichte aus dem 16. Jahrh.,” Breslau, 1880; “Lessing und Swift: Studien über Nathan den Weisen,” Jena, 1869; “Das Bündnis zu Canterbury: Eine Episode aus der Geschichte des Konstanzer Konzils,” Gotha, 1880; “Ueber eine Reformationsschrift des 15. Jahrh.,” Danzig, 1882; “Johannes Longinus: Ein Beitrag zur Litteraturgeschichte,” Jena, 1863; “Catherina II. von Russland,” Breslau, 1876.

Bibliography: *La Grande Encyclopédie*; Brockhaus, *Konversations-Lexikon*, 14th ed.; Meyers, *Konversations-Lexikon*, 5th ed.; Gubernatis, *Dictionnaire International des Ecrivains du Jour*; Vapereau, *Dictionnaire Universel des Contemporains*.

s. A. S. C.

CARO, JOSEPH B. EPHRAIM: The last great codifier of rabbinical Judaism; born in Spain or Portugal in 1488; died at Safed, Palestine, March 24, 1575. After the expulsion of the Jews from Spain, in 1492, Caro went with his parents to Nicopolis in European Turkey, where he received his first instruction from his father, who was himself an eminent Talmudist. He married, first, Isaac Saba's daughter, and, after her death, the daughter of Ḥayyim Albalag, both of these men being well-known Talmudists. After the death of his second wife he married the daughter of Zechariah Sechsel (Sachsel?), a learned and wealthy Talmudist. Between 1520 and 1522 Caro settled at Adrianople, where he probably met the enthusiast Solomon Molcho, who stimulated his mystical tendencies. When the latter died at the stake in 1532, Caro also was filled with a longing to be “consumed on the altar as a holy burnt offering,” to sanctify the name of God by a martyr's death. Like Molcho, Caro had fantastic dreams and visions, which he believed to be revelations from a higher being. His genius, מגיד, he thought, was nothing less than the Mishnah personified, which instructed him because he had devoted himself to its service. These mystical tendencies probably induced Caro to emigrate to Palestine, where he arrived about 1535, having en route spent several years at Salonica (1533) and Constantinople.

Authority Recognized.

At Safed he met Jacob Berab, who exerted a great influence upon him, Caro becoming an enthusiastic supporter of Berab's plans for the restitution of ordination. After Berab's death Caro tried to carry out these plans, ordaining his pupil Moses Alshech; but he finally gave up his endeavors, convinced that he could not overcome the opposition to ordination (compare his “Kesef Mishneh,” on Sanh. iv., where his silence regarding this point is significant). However, his aspiration to be regarded as the highest authority in Judaism was practically realized; for his reputation during the last thirty years of his life was greater than that of almost any other rabbi since Maimonides. The Italian Azariah dei Rossi, though his views differed widely from Caro's, collected money among the rich Italian Jews for the purpose of having a work of Caro's printed (“Me'or 'Enayim,” xxiii., ed. Benjacob, i. 241); and the Pole Moses Isserles compelled the recognition of one of Caro's decisions at Cracow, although he thought Caro was wrong (Isserles, Responsa, No. 48). When some members of the community of Carpentras, in France, believed themselves to have been unjustly treated by the majority in a matter relating to taxes, they appealed to Caro, whose letter was sufficient to restore to them their rights (“Rev. Etudes Juives,” xviii. 133-136). In the East, Caro's authority was, if possible, even greater. His name heads the decree of excommunication directed against Daud, Joseph Nasi's agent (Responsa of Elijah b. Ḥayyim, “Mayim 'Amuḳḳim,” No. 56);

and it was Caro who condemned Dei Rossi's "Me'or 'Enayim" to be burned (Azulai, "Maḥaziḳ Berakah," p. 133). Caro's death, therefore, caused general mourning; and several funeral orations delivered on that occasion have been preserved (Moses Albelda, "Darash Mosheh"; Samuel Katzenellenbogen, "Derashot"), as well as some elegies (anonymous, see "Rev. Etudes Juives," ix. 304, 305; x. 317; Moscato, in "Oẓar Neḥmad," iii. 167; and biography of Moscato by Apfelbaum, p. 56).

Caro published during his lifetime: "Bet Yosef" (House of Joseph), in four parts—(i., ii.) Venice, 1550–1551; (iii., iv.) Sabbionetta, 1553–59; Shulḥan 'Aruk, in four parts, Venice, 1565 (according to Steinschneider's Catalogue, col. 1480, the composition of the Shulḥan 'Aruk was completed at Biri, Palestine, 1555); "Kesef Mishneh" (Double Money), Venice, 1574–75. After his death there appeared: "Bedeḳ ha-Bayit" (Repairing of the House), supplements and corrections to "Bet Yosef," Salonica, 1605; "Kelale ha-Talmud" (Methodology of the Talmud), *ib.*, 1598; "Abḳat Rokel" (Powder of the Merchant), Responsa, *ib.* 1791; Responsa, *ib.* 1597; "Maggid Mesharim" (Who Preaches Rightly), Lublin, 1646; supplements to the same, Venice, 1654; "Derashot," Salonica, 1799, in the collection "'Oz Ẓaddiḳim" (The Power of the Righteous). Caro also left a commentary upon the Mishnah, as well as supercommentaries to Rashi's and Naḥmanides' commentaries on the Pentateuch, which have, apparently, not been preserved. The Bodleian Library contains some smaller literary fragments by Caro not yet published.

"Maggid Mesharim."

Caro's literary works and the importance of his share in the development of rabbinism are beyond dispute: his works are among the masterpieces of rabbinical literature; and his influence is potent even to this day. But Caro's character has been variously criticized, the difference of opinion being connected with the literary question whether the book "Maggid Mesharim" is really a work by Caro, or is merely ascribed to him. This book is a kind of diary in which Caro during a period of fifty years noted his discussions with his heavenly mentor, the personified Mishnah. He had these visions even at Nicopolis (p. 21b; p. 42b, ed. Polno, is dated 1570; in opposition to Grätz, "Gesch. der Juden," ix. 545, who asserts the text to be corrupt but חותנך meaning there, of course, "father-in-law" and not "son-in-law"). The discussions treat of various subjects. The maggid enjoins Caro to be modest in the extreme, to say his prayers with the utmost devotion, to be gentle and patient always. Especial stress is laid on asceticism; and Caro is often severely rebuked for taking more than one glass of wine, or for eating meat. Whenever Caro did not follow the severe instructions of his maggid, he suddenly heard its warning voice. His mentor also advised him in family affairs (p. 21b), told him what reputation he enjoyed in heaven, and praised or criticized his decisions in religious questions. Caro received new ideas from his maggid in regard to the Cabala only, for the study of which he had hardly any time; such information was in the nature of sundry cabalistic interpretations of the Pentateuch, that in content, though not in form, remind one of the theories of Caro's pupil, Moses Cordovero. The present form of the "Maggid Mesharim" shows plainly that it was never intended for publication, being merely a collection of stray notes; nor does Caro's son Judah mention the book among his father's works (Introduction to the Responsa). It is known, on the other hand, that during Caro's lifetime the cabalists believed his maggid to be actually existent (compare Vital-Calabrese, "Sefer ha-Gilgulim," pp. 119, 142, Wilna, 1885). The "Maggid Mesharim," furthermore, shows a knowledge of Caro's public and private life that no one could have possessed after his death; and the fact that the maggid promises things to its favorite that were never fulfilled—*e.g.*, a martyr's death—proves that it is not the work of a forger, composed for Caro's glorification. Rapoport's assumption (in Kobak's "Jeschurun," vi. 90; "Iggerot Shir," pp. 207, 208) that the "Maggid Mesharim" was written by Solomon Alḳabiẓ and ascribed to Caro is unfounded, as well as Cassel's positive assertion that the book was fabricated after Caro's death ("Josef Karo und das Maggid Mescharim," appended to the sixth annual report of the Lehranstalt für die Wissenschaft des Judenthums in Berlin, 1888). The authenticity of the "Maggid Mesharim" does not, however, justify the assertion that Caro was a cabalist, in the sense of regarding the Cabala as equally authoritative with Talmudism, or so important a factor in religious life.

Caro's Characteristics.

Although Maimonides and Caro, the two greatest codifiers of rabbinical Judaism, differed so widely from each other, they had this in common, that in their codes they assumed exclusively the standpoint of Talmudism—an attitude eminently characteristic of the spirit of rabbinism. Just as Maimonides' "Yad"—aside from its book "Ha-Madda'"—gives no indication that its author ranked Aristotle immediately after the Prophets, so Caro, in his works, does not betray his leaning toward mysticism. Of course, he considered the Zohar to be a work of the tanna Simon b. Yoḥai (compare Solomon Alḳabiẓ's answer to Caro about a difficult passage of the Zohar in his "Berit ha-Lewi," ed. Lemberg, 1863, p. 39, to which Brüll draws attention in "Jahrb." ix. 152), and a holy book, that, however, has little or no importance for religious practise, which must be ruled exclusively by the Talmud. Caro's mysticism was not speculative in nature; and he devoted very little time to the Cabala, although his maggid often exhorted him not to neglect the study of it ("Maggid Mesharim," p. 57b). The catastrophe that came upon the Pyrenean Jews made such an impression upon the minds of the best among them that many saw therein the signs of Messianic travail, חבלי משיח (compare Jacob Berab); and Caro, according to a contemporary (Azkari, "Sefer Ḥaredim," Introduction), took this dark view throughout his life. While men like Molcho and David Reubeni were led to commit extravagant and foolish deeds under the influence of this idea, Berab's and Caro's nobility of nature came to the fore. If Caro indulged in mystical visions, and, half dreaming, thought he heard heavenly voices in his soul, they served always as reminders to him that his life, his actions, and his accomplishments must surpass those of other people (*ib.* "Toledot," p. 9; "Azharot," p. 3b, and passim). Caro's mysticism stimulated rather than hindered his activity, urging him on to great works. While Caro's teacher, Berab, had attempted to create a spiritual center for the Jews scattered throughout the world, by reestablishing ordination, Caro tried to carry out the same idea in a different way.

"Bet Yosef."

Although Caro is known to later times chiefly as the author of the Shulḥan 'Aruk, yet his earlier "Bet Yosef" marked him as one of the greatest Talmudists of all times. He began the book in 1522 at Adrianople, finished it in 1542 at Safed, and published it in 1550–59. In form it is a commentary upon Jacob b. Asher's "Arba'ah Ṭurim"; but it is really much more comprehensive, going back to the Talmudim and halakic Midrashim, discussing the pros and cons of the authorities cited by the "Ṭur," and examining the opinions of the authorities not mentioned by the latter. Thirty-two authorities, beginning with the Talmud and ending with the works of ISSERLEIN, are briefly summed up and critically discussed in "Bet Yosef." No other rabbinical work can compare in wealth of material with it. Though Maimonides, in his "Yad," almost completely covered Talmudic literature (including its archeological portions), which was not done by Jacob b. Asher and his successor, Caro, the latter included in "Bet Yosef" the immense material of post-Talmudic literature; while Maimonides hardly drew even upon the works of the Geonim, confining himself chiefly to the Talmud. Caro evidences not only an astonishing range of reading, covering almost the whole Talmudic-rabbinical literature on its halakic side, but also very remarkable powers of critical investigation. He shows no disposition to accept blindly the opinions of the ancient authorities, notwithstanding his great respect for them. In the introduction to his monumental compilation, Caro clearly states the necessity of and his reasons for undertaking such a work. The expulsion of the Jews from the Pyrenean peninsula and the invention of printing endangered the stability of religious observances on their legal and ritual sides. In Spain and Portugal questions were generally decided by the "customs of the country"; the different districts had their standard authorities to which they appealed in doubtful cases. The most prominent of these were Maimonides, Naḥmanides, and Asher b. Jehiel. When the Spanish-Portuguese exiles came to the various communities in the East and West, where usages entirely different from those to which they had been accustomed prevailed, the question naturally arose whether the newcomers, the majority of whom were men of greater learning than the members of the invaded communities, should be ruled by the latter, or vice versa. The increase of printed books, moreover, spread broadcast the products of halakic literature; so that many half-educated persons, finding themselves in possession of legal treatises, felt justified in following any ancient authority at will. Caro undertook his "Bet Yosef" to remedy this evil, quoting and critically examining in his book the opinions of all the authorities then known.

The Standard Authorities.

Caro at first intended to follow his own judgment in cases of differences of opinion between the various authorities, especially where he could support his own view by the Talmud. But he gave up this idea because, as he says, "Who has the courage to rear his head aloft among mountains, the heights of God?" and also because he correctly thought, though he does not mention his conclusion, that he could gain no following if he set up his authority against that of the ancient scholars. Hence Caro took Alfasi, Maimonides, and Asher b. Jehiel as his standards; accepting as authoritative the opinion of two of the three, except in cases where most of the ancient authorities were against them. The standard that Caro set up in the introduction to his work was, as a younger contemporary remarks (Ḥayyim b. Bezalel, Introduction to "Wikkuaḥ Mayim Ḥayyim"), in a certain sense, merely a blind; for Caro proceeded with more independence and more self-confidence. He very often decides disputed cases without regard to the age and importance of the authority in question, expressing simply his own views. He follows Maimonides' example, as seen in "Yad," rather than that of Jacob b. Asher, who seldom decides between ancient authorities.

But, as regards the form of his work, Caro unfortunately follows Jacob b. Asher entirely, the "Bet Yosef" in consequence sharing all the methodological faults of its predecessor, the "Ṭur." Several reasons induced Caro to connect his work with the "Ṭur," instead of with Maimonides' code. In the first place, the "Ṭur," although not considered so great an authority as Maimonides' code, was much more widely known; the latter being recognized only among the Spanish Jews, while the former enjoyed a high reputation among the Ashkenazim and Sephardim, as well as the Italians. Secondly, it was not Caro's intention to write a code similar in form to Maimonides' work; he intended to give not merely the results of his investigations, but also the investigations themselves. He wished not only to aid the officiating rabbi in the performance of his duties, but also to trace for the student the development of particular laws from the Talmud through later rabbinical literature. The study of Talmudic literature was not for Caro, as for Maimonides, merely a means toward an end—namely, for religious observances—but an end in itself; he, therefore, did not favor codes that contained only decisions, without giving any reasons for them.

The Shulḥan 'Aruk.

Caro wrote the Shulḥan 'Aruk in his old age, for the benefit of those who did not possess the education necessary to understand the "Bet Yosef." The arrangement of this work is the same as that adopted by Jacob b. Asher in his "Arba'ah Ṭurim," but more concise; nor are any authorities given. This book, which for centuries was, and in part still is, "the code" of rabbinical Judaism for all ritual and legal questions that obtained after the destruction of the Temple, has a remarkable history, hardly paralleled by that of any other product of rabbinical literature. The author himself had no very high opinion of the work, remarking that he had written it chiefly for תלמידים קטנים ("young students," Shulḥan 'Aruk, Introduction). He never refers to it in his responsa, but always to the "Bet Yosef." The Shulḥan 'Aruk achieved its reputation and popularity not only against the wishes of the author, but, curiously enough, through the very scholars who attacked it. The history of the Shulḥan 'Aruk is, in a way, identical with the history of rabbinical literature in Poland for a period of two centuries. Recognition or denial of Caro's authority lay entirely with the Polish Talmudists. Germany had been forced to give way to Poland as early as the beginning of the sixteenth century; and in the last third of that century the East had become so entirely absorbed in the new cabalistic school of Luria that the study of the Talmud was greatly neglected. Caro was opposed in the East only by his contemporaries, Yom-Ṭob Zahalon, who designated the Shulḥan 'Aruk as a book for קטנים ועמי הארץ ("children and ignoramuses"; see his Responsa, No. 67, beginning), and Jacob Castro, whose work "'Erek ha-Shulḥan" consists of critical glosses to the Shulḥan 'Aruk. Isserles and Solomon Luria were Caro's first important adversaries. Although the opposition of these two men was different in kind and due to different motives, it may be regarded in a measure as the protest of the Ashkenazim against the supremacy of the Sephardim. The Ashkenazim—first the German, and then the Polish—were much more scrupulous in matters of ritual than their Spanish-Portuguese brethren; hence they considered that Caro's "Bet Yosef" contained dangerous innovations, as the authorities he followed were chiefly Sephardim, whose opinions did not prevail among the Ashkenazim.

Isserles' Opposition to Caro.

Immediately upon the appearance of Caro's "Bet Yosef," Isserles wrote his "Darke Mosheh," a moderately expressed but very severe criticism of Caro's great work. In place of Caro's three standard authorities, Isserles brings forward the אחרונים ("the later authorities"), together with the Franco-German Tosafists as criteria of opinion ("Darke Mosheh" to Yoreh De'ah, 35). The importance of the Minhag ("prevailing local custom") is also a point of dispute between Caro and Isserles: while the former held fast to original authorities and material reasons, the latter considered the minhag as an object of great importance, and not to be omitted in a codex. This point, especially, induced Isserles to write his glosses to the Shulḥan 'Aruk, that the customs (minhagim) of the Ashkenazim might be recognized, and not be set aside through Caro's reputation. If Abraham b. David's criticism of Maimonides' code be compared with Isserles' criticism of Caro's Shulḥan 'Aruk, the question suggests itself why the Shulḥan 'Aruk became an authoritative code, in spite of opposition and against the will of its author, while Maimonides' "Yad" found no acceptance among the Franco-German Jews, owing to Abraham b. David's criticism and influence. The answer lies in the fact that the keen and, in part, just criticism by RABaD destroyed confidence in Maimonides' "Yad," while Isserles was not content only to criticize, but supplemented Caro's work extensively, with the result that the Ashkenazim then accepted the Shulḥan 'Aruk, assuming that in its corrected form it was an unquestionable authority.

Mordecai Jafe.

Solomon Luria's opposition to Caro's code was due to entirely different motives. Luria shared Isserles' great respect for the French scholars, whom he placed above the Sephardic; but he held that "since the completion of the Talmud no opinion that can not be deduced from the Talmudim or the halakic Midrashim can claim to be authoritative"—a view so novel and daring that Luria found few supporters even among his own countrymen, and his "Yam Shel Shelomoh" was not enough to deprive Caro's works of their authority. The Shulḥan 'Aruk with Isserles' supplements was so popular, and enjoyed such great authority even so early as the last third of the sixteenth century, that Ḥayyim b. Bezalel's attacks on it were also without effect. Ḥayyim, a Pole by birth and education, attempted in his "Wikkuaḥ Mayim Ḥayyim," to defend Germany's honor against both Caro and Isserles—against the former's aversion to the German authorities, and the latter's endeavor to set up the Polish minhag as the "minhag Ashkenaz" par excellence. But toward the end of the sixteenth century the Shulḥan 'Aruk found a dangerous competitor in Mordecai Jafe's "Lebushim." Jafe, who was a pupil of Luria and Isserles, adopted in his code a method midway between the prolix discursiveness of the "Bet Yosef" and the terse oracular form of the Shulḥan 'Aruk, both of which the "Lebushim" far surpasses in style, arrangement, and method. This book seemed, on its appearance, likely to displace the Shulḥan 'Aruk; but the severe criticism to which it was subjected by Jafe's younger contemporary, Alexander Falk ha-Kohen, in his "Sefer Me'irat 'Enayim," a commentary on the fourth part of the Shulḥan 'Aruk, shattered the reputation of the "Lebushim," and again confirmed that of the Shulḥan 'Aruk.

Commentators of the Shulḥan 'Aruk.

Falk heads the list of the commentators of the Shulḥan 'Aruk who helped to increase its authority, and made it impossible for rabbinical literature to stagnate. These commentators examined the differences of opinion between Caro, Isserles, and Luria, as well as the validity of the reasons given by these and other authorities for their opinions. It is, in part, due to the endeavors of Meïr b. Gedaliah MaHaRaM of Lublin, Samuel Edels, and Yom-Ṭob Lipmann Heller that the Shulḥan 'Aruk did not displace the study of the Talmud and the ancient sources; they had a very poor opinion of the Shulḥan 'Aruk, considering the Talmud as by far the chief study (compare, for example, Responsa of MaHaRaM, Nos. 11, 102).

The last important attack on the Shulḥan 'Aruk was made by Joel Sirkes in his "Bayit Ḥadash" (New House), in which he endeavored to restore Jacob b. Asher's code to the reputation it had enjoyed, especially among the Ashkenazim; attempting, in numerous passages of his book, to abolish

Title-Page of the First Edition of Caro's Shulhan 'Aruk, Printed at Venice, 18th of Kislew, 5325=1564.
(In the collection of Hon. Mayer Sulzberger.)

the customs introduced in many places under the combined influence of Caro and Isserles (BaḤ to Yoreh De'ah, 279; Responsa, No. 80 [new series 42]). But Joel succeeded as little as his master, Luria, in his opposition to Caro and Isserles.

The battle raging around the Shulḥan 'Aruk lasted for nearly a hundred years, its authority not being firmly established until the middle of the seventeenth century, which date also marks the beginning of the commentaries to it, the period of the so-called Aḥaronim. Moses Lima b. Isaac, David b. Samuel ha-Levi, Shabbethai b. Meïr ha-Kohen, Abraham Abele Gombiner, and Samuel b. Uri Phoebus of Waydyslav, all of the seventeenth century, are the classical commentators of the Shulḥan 'Aruk. They differ in their relation to Caro and Isserles, though all the Aḥaronim fully and unreservedly recognized the authority of both. Moses Lima held that no one was entitled to decide any cases according to the Shulḥan 'Aruk "who was not at the same time competent to expunge entire paragraphs from it" (Emden, "She'elat Ya'abeẓ," ii., No. 20, end), while David b. Samuel, although a pupil and son-in-law of Joel Särkes, held that no decision of the Shulḥan 'Aruk was under any circumstances a criterion to be literally followed (Yoreh De'ah, 48, 5). Shabbethai b. Meïr's relation to the Shulḥan 'Aruk is a peculiar one. One of the keenest minds among the Rabbis, he was the warmest defender of Caro and Isserles against the attacks of the Aḥaronim; while he himself unsparingly attacked not only the Shulḥan 'Aruk, but also all the post-Talmudic authorities. Although all these men thus preserved a certain independence toward the work, they yet confirmed its authority by making it the basis of their own works and by undertaking to explain it. The above-mentioned Polish Talmudists especially, David b. Samuel and Shabbethai b. Meïr, placed the authority of the Shulḥan 'Aruk beyond dispute, answering in their commentaries attacks upon it, and supplementing the missing portions from the works of others. Menahem Krochmal (second half of the seventeenth century) says: "Since Caro's 'Bet Yosef' and Shulḥan 'Aruk, and Isserles' notes on the latter, have appeared and been distributed throughout Israel, we must follow them alone" (Responsa, "Ẓemaḥ Ẓedeḳ," No. 9, end). Gershon Ashkenazi, Krochmal's son-in-law, expressed himself similarly ("'Abodat ha-Gershoni," No. 48, beginning), and also his contemporary Ephraim b. Aaron ha-Kohen ("Sha'ar Efrayim," No. 113, p. 81a, bottom), who relates that the congregational archives of Buda, where he was rabbi, contained a resolution not to accept any rabbi that did not agree to render his decisions according to the Shulḥan 'Aruk (*ib.*; see also Isaiah Horwitz, "Shene Luḥot ha-Berit," ed. Amsterdam, p. 74b).

In the eighteenth century the authority of the Shulḥan 'Aruk was so firmly established that even men like Ḥayyim Jair Bacharach (Supplements to his "Ḥawot Yaïr," p. 262) and Jonathan Eybeschütz ("Kiẓẓur Teḳofo Kohen"), who possessed great independence and self-confidence, considered it indisputable. Elijah b. Solomon of Wilna, however, did not share this opinion, having no regard for preceding authorities, but decided cases on their merits. Among the Sephardim, Hezekiah de Silva, born 1650, is perhaps the only one among the Oriental Jews who dared to attack the Shulḥan 'Aruk. The Egyptian rabbis, in return, forbade the reading of his "Peri Ḥadash."

Anti-Semitic Attacks on the Shulhan 'Aruk.

Instrumental as was the Shulḥan 'Aruk in shaping rabbinical Judaism, it was necessarily singled out for attack by those who sought to assail the latter. Passages from the book, detached from their context, and often intentionally mutilated and misinterpreted, were used by the adversaries of the Jews as a means of representing the ethics and religion of the Jews as dangerous and despicable. As regards the work itself—the attacks are directed really against the entire post-Biblical literature of the Jews—two works may be mentioned here which clearly and distinctly refute the unfounded criticisms brought against the book; namely, "Der Schulchan Aruch," by D. Hoffmann (Berlin, 1885), and "Die Gesetzsammlung des Judenspiegels . . . von Aron Briman . . . Beleuchtet und Berichtigt," by K. Lippe (Jassy, 1885). Compare, also, Gentiles, Ethics, Rabbinical Judaism.

The attacks made by modern Jewish historians upon the Shulḥan 'Aruk, especially the accusation that it forces rabbinical Judaism into a strait-jacket, can hardly be supported. The code is not the creator of that rigorous, scrupulous attitude inimical to all liberty, but a product of it. The Shulḥan 'Aruk, furthermore, has caused anything but stagnation of intellectual activity among the Jews, as is most clearly shown by the rabbinical literature of the period (1550–1700), the products of which, all more or less influenced by Caro, are among the most eminent works of their kind. Compare Codification, Reform Movement.

L. G.

CARO, JOSEPH ḤAYYIM B. ISAAC SELIG: German-Russian rabbi; born 1800; died in Wloclawek, government of Warsaw, April 21, 1895. He was educated as an Orthodox Talmudist, and married the daughter of R. Ẓebi Hirsch Amsterdam of Konin, government of Kalisz in Russian Poland, whose pupil he became. He afterward established himself as a merchant in Gnesen, near Posen, whence, at about the age of forty, he was called to the rabbinate of Pinne, in the province of Posen. Later he became rabbi of Fordon, in the same province, and twenty years after his first call he became rabbi of the progressive and Germanized community of Wloclawek, where he remained until his death. He was one of the first truly Orthodox rabbis in Russia to acquire a correct knowledge of German and to deliver sermons in that language.

Caro was famous not only for his extensive rabbinical knowledge, but also as a preacher; and even at the present day his works are popular among old-style "maggidim" and "darshanim." His first work, "Minḥat Shabbat," is a German translation (in Hebrew characters) of Pirḳe Abot, with a short commentary in German and a longer one in Hebrew (Krotoschin, 1847). In the third edition of that work (Wilna, 1894) the German commentary is omitted and that of Maimonides substituted for it. His "Ṭeba we-Haken," containing rules of "sheḥitah" and "bediḳah" in the form of a dialogue, was published by his sons Isaac and Jacob (Leipsic, 1859; 2d ed., Wilna, 1894). His chief work, "Ḳol Omer Ḳera," is a collection of sermons in four volumes (Warsaw, 1860–80; 2d ed., Wilna, 1895), arranged after the order of the Pentateuch in the weekly sections, which furnished the texts. The last of his published works, "Yoreh u-Malkosh" (Wilna, 1894), is also a collection of sermons, mostly funeral orations, some of which were originally delivered in German. Here and there in his works are to be found poetical compositions and other traces of the influence of modern ideas not common among the rabbis of Russian Poland. His inclination toward the "Haskalah" and its Neo-Hebrew literature is shown by the article which he contributed, at a very advanced age, to the year-book "Ha-Asif" (iv. 132–137, Warsaw, 1887), entitled "Birkat ha-Ẓeduḳim." Caro was also a pioneer Zionist and defended the colonization of Palestine against the opponents of that plan. Two of his letters on the subject are printed in "Shibat Ẓion." He attended to his rabbinical duties until past the age of ninety, and retired from active work only a few years before his death.

One of Caro's sons is a professor at the University of Breslau, and two others are the rabbis, respectively, of Lemberg and Thorn.

Bibliography: *Aḥiasaf*, 5655.

CARPENTRAS: Chief town of the arrondissement of that name in the department of Vaucluse, France. Jews settled at Carpentras at a very early period. The collection of rabbinical decisions called "Ḳol Bo" quotes a document (No. 117) attributed to Jacob Tam, grandson of Rashi (twelfth century), in which the rabbis of Carpentras are mentioned together with "the elders and scholars of Troyes and its environs, the great men of Auxerre, the scholars of the regions of the Rhine, the doctors of Paris and their neighbors, the scholars of Lyons, of Lombardy, of the seacoast, of Anjou, of Poitou, and the great men of Lorraine." Expelled in the beginning of the thirteenth century, the Jews returned to Carpentras in 1263. On Feb. 28, 1276, Bishop Pierre III. Rostaing made an agreement with them, signed by sixty-four heads of families, representing two-thirds of the community, by which they acknowledged themselves to be, as their forefathers at Carpentras had been, vassals of the bishop, and they consented to pay to him and to his successors the following taxes: (1) an annual quit-rent of 18 Tours pounds; (2) a tallage of 25 pounds for six specified cases; (3) sheets for the bishop's guest-beds; (4) all the tongues of the cattle they might kill, or should have killed; (5) an annual tax on their rural and urban possessions, and the thirteenth part of the total seat-rent of the synagogue; (6) ten Tours sous for every foreign or strange Jew coming to live at Carpentras, and desiring to be received as a citizen on the same terms as other Jews; (7) fifteen Tours sous for every Jew wishing to live outside of the chain fixed at the entrance of the "visataria" (post of inspection). In addition, (8) Jews are thenceforward forbidden to assist or support any person, corporation, or association against the bishop, or to have any relations or connection with them; (9) Jews are obliged to render the above-mentioned homage to every new bishop, to swear fidelity to him, and to observe the same agreement with him; (10) the bishop binds himself and his successors to impose no other taxes upon the Jews, to guard their property, and to protect them against injustice and violence; (11) the Jews are permitted to leave the city and to establish themselves elsewhere, but in that case they will cease to be citizens of Carpentras ("Revue Etudes Juives," xii. 43, 44).

Thirteenth Century.

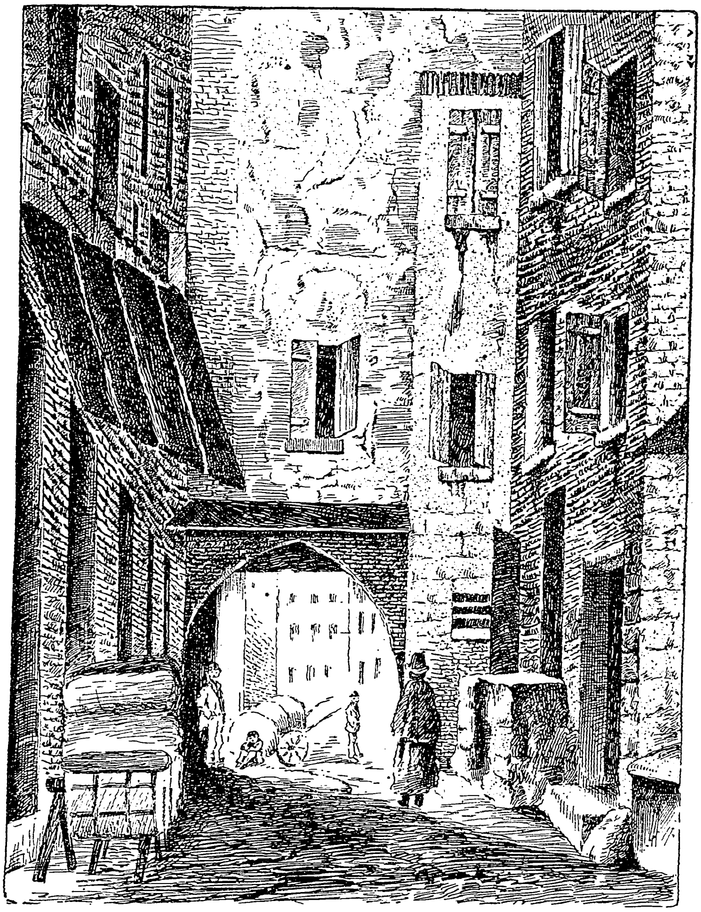
The convention of April 12, 1320, between Pope John XXII. and the bishop, consecrated by the bull of "dismemberment," changed the situation created for the Jews by the act of 1276. They ceased to be the bishop's property, his "subscribed" serfs, but they remained to a certain extent his tributary vassals (Bardinet, "Revue Historique," xii. 40). Protected against the Pastoureaux by Pope John XXII. in 1320, they were nevertheless expelled by him from Carpentras in 1322. Their synagogue was demolished, a church dedicated to the Virgin Mary being erected on its site ("Revue Etudes Juives," xii. 48; compare Bardinet, *l.c.* xii. 17).

Pope Clement VI., well disposed toward the Jews, on his accession in 1342, revoked the edict of expulsion of John XXII. Bishop Hugues permitted twelve heads of Jewish families, who in 1343 had returned to Carpentras, to build a new synagogue, and also to have a cemetery near the city, on payment of a yearly contribution of six pounds of spices, three of ginger, and three of pepper ("Revue Etudes Juives," xii. 51; compare Bardinet, *l. c.* xii. 41). This agreement of 1343 was renewed by Bishop John Flandrini in 1367; but Bishop Peter IV. de Rabath revoked it in 1385 and reestablished the annual tax of eighteen pounds that dated back to 1276. Pope Benedict XIII. claimed in 1403 all the taxes which the Jews had formerly paid to the episcopal household, especially the furnishing of the sheets for the bishop's guest-beds. By an agreement of May 2, 1405, the Jews could free themselves of this prestation by paying to the bishop annually the sum of twenty florins in gold ("Revue Etudes Juives," xii. 55; compare Bardinet, *l.c.* xii. 43). Other agreements were made, now and later on, between the Jews and the bishopric in regard to the tax on seat-rents of the synagogue, the selling of kosher wine, the presence of the rector's sergeant at circumcisions, marriages, and interments, and the policing of the ghetto, etc. ("Revue Etudes Juives," xii. 56 *et seq.*).

Sixteenth Century.

Clement VII., who had confirmed the privileges of the Jews in 1524, revoked them in 1539. In a bull of June 13, 1525, he ordered the men to wear the yellow hat, and the women some other distinctive mark. Paul IV. in 1555, Pius V. in 1566, and Clement VIII. in 1592 renewed the decrees of their predecessors ("Revue Etudes Juives," vi. 90). Notwithstanding these bulls, the Jews obtained permission to wear no other signs than those they were accustomed to (*ib.* xxxii. 70). On the accession of Paul III. the Jews of Carpentras sent two procurators to Rome, Joseph de Lattès and Vides Avigdor of Cavaillon, in order to obtain from the pope a new examination into their rights. This request was entirely successful (*ib.* 74). By his bull of Feb. 26, 1569, Pius VII. expelled the Jews from the Italian and French territory. An order of the legate, dated Avignon (Aug. 3, 1570), commanded them to leave the country by Oct. 15 following. The rector, however, permitted a small number of them to remain at Carpentras; and these, a few years later, had again grown into an important community (*ib.* xii. 165). The bull of Clement VIII. (Feb. 28, 1593), by which the Jews were driven from the pontifical states, except Rome, Ancona, and Avignon, was not enforced at Carpentras. Those provinces which in the course of the seventeenth century had repeatedly demanded the expulsion of the Jews succeeded no better.

The Jews willingly paid the episcopal taxes, etc., imposed upon them by the agreement of 1276. Twice, however, they resisted, in 1513 and in 1781; but each time they were compelled to render homage to the bishop, and to pay all that they owed him (*ib.* xii. 63). The Revolution and the annexation of the county of Venaissin by France freed them from this yoke of the Middle Ages.



North Gate of the Jewry at Carpentras.
(From the "Revue des Etudes Juives.")

The synagogue, built in 1741 upon the same spot as the one of 1367, was repaired in 1784, and again in 1899. It has several distinctive features not found outside of the county, unless in Italy (see detailed description by I. Loeb, "Revue Etudes Juives," xii. 227, 235). The cemetery, probably the same as the one granted to the Jews in 1343 by Bishop Hugues, is situated in the northeastern part of the city, in the quarter called "La Fontrouse." Neubauer has described in the "Archives des Missions Scientifiques" (3d series, vol. i.) some tombstones from the old cemetery, now in the museum of Carpentras. For the construction and support of their synagogue and cemetery, the expenses of their ritual, and the heavy taxes arbitrarily imposed upon them from time to time, the community contracted a debt which, at the beginning of this century, amounted to 286,831.22 francs. This was fully paid between June 26, 1822, and Sept. 6, 1825.

Liturgy.

Carpentras constituted formerly, together with Avignon, Lisle, and Cavaillon, the four communities, "Arba' Ḳehillot," that were the only ones tolerated in the French pontifical territory. They had a special liturgy: (1) the seder of "Yamim Nora'im" (Ritual for the New Year and Day of Atonement; Amsterdam, 1739); (2) the seder of the three "Regalim" (Festivals; Amsterdam, 1759); (3) the seder of the four fasts (Amsterdam, 1762); (4) the "Seder ha-Tamid" (Daily Ritual; Avignon, 1767); (5) the

"Seder ha-Ḳonṭeris" (Ritual Opusculum; Avignon, 1767). The Hebrew Provence poems inserted in the "Seder ha-Tamid" and in the "Seder ha-Ḳonṭeris" have been translated and published by E. Sabatier (Nîmes, 1876) under the title of "Chansons Hebraico-Provençales des Juifs Comtadins," and also by Dom Pedro d'Alcantara, emperor of Brazil (Avignon, 1891), under that of "Poésies Hébraico-Provençales du Rituel Israélite Comtadin."

The community of Carpentras, which, in 1789, had 1,000 Jews, counts to-day only thirty to thirty-five families in a total population of 10,628. It belongs to the "Circonscription Consistoriale" of Marseilles; and possesses, in addition to the synagogue, a maẓẓot factory.

Scholars and Physicians.

The following noted scholars dwelt in Carpentras: Hanan ben Nathan Ezobi (thirteenth century) and his two sons, the poets Eleazar and Joseph, the first of whom settled later on at Béziers, the second in Perpignan; ABRAHAM MALAKI; Mordecai ben Yosifya, Abraham the Elder, Abraham ben Isaac, and Ḥayyim de Carcassonne (thirteenth century); Mordecai ben Isaac, a correspondent of Abba Mari of Lunel (in 1303–06); Moses ben Judah Rouget, Ishmael ben Todros of Noves, and Asher ben Moses of Valabrègue (members of the rabbinical college in 1582); Ḥayyim Crescas, Moses ben Joseph Kolon, Ẓemaḥ ben Moses Caslari, Isaac Leon, Jacob Vidal (1580–89); Rabbi Jesse, R. Saul, and R. Solomon Lion (1629); Solomon Ezobi (1620–23), a learned Talmudist and distinguished astronomer, who was in correspondence with the celebrated Peiresc of Aix, and the Hebraist John Plantavit de la Pause, bishop of Lodève ("Revue Etudes Juives," xi. 101, 292; compare Gross, "Gallia Judaica," p. 611); David ben Joseph Carmi (1621–22); Elijah Carmi, editor of "Seder ha-Tamid," and a liturgical poet bearing the same name (1682); Mordecai Astruc, author of a thanksgiving prayer, inserted in the "Seder ha-Tamid" and recited at Carpentras on the Ninth of Nisan; Saul ben Joseph de Monteux, son of the liturgical poet Joseph ben Abraham Monteux, who composed a "piyyuṭ" upon the deliverance of the Jews at the time of the riot at Carpentras in 1682; Mordecai ben Jacob, author of an elegy upon the martyrdom of the Hasmonean priest Eleazar (Zunz, "Z. G." p. 473); Judah Aryeh Loeb ben Ẓebi Hirsch of Krotoschin (eighteenth century), author of a concordance, a dictionary of Hebrew proper names, and two works on the Pentateuch; Moses Sinai (1742), Joseph de Lattès (1746–58), Jacob Ḥayyim Vidas, Isaiah Samuel Crémieux, Judah David Crémieux, Joseph Milhaud, Israel Crémieux, Jacob Lunel, Menahem Lion, and Abraham Roguemartine (1731–62).

Also the following physicians: Bondavit Boninas of Marseilles (1343), Maître Mayé or Magister Magius Macipi, Boniac, and Thoros (1357), Isaac Tauroci or Thoros (1367), Cresques Bondavid, Ḥayyim, and Solomon (1400–01), Samuel Bonajudo (1532), Isaac Thoros, Vides Avigdor of Cavaillon, and Isaac de Lattès (1540–64), Sauves or Saulves (1570), Joseph ben Isaac ha-Levi (1571), Moses ben Judah (1583), and Moses of Cavaillon.

G. S. K.

CARPENTRASI, JUDAH B. ẒEBI. See JUDAH B. ẒEBI HIRSCH OF CARPENTRAS.

CARPI, LEONE: Italian political economist; born 1820 at Bologna, Italy. He was the first deputy elected to the Italian Parliament by the city of Ferrara. Carpi, on the expiration of his term, divided his time between Bologna and Rome, where he was a contributor to "Popolo Romano." He has thrown much light on the social and moral conditions of new united Italy by the authentic information that he has collected in all departments of the government. Among his works may be mentioned: "Dell' Emigrazione Italiano all' Estero, nei Suoi Rapporti coll'Agricoltura, coll' Industria, e col Commercio," Florence, 1871; "Delle Colonie e dell' Emigrazione degl' Italiani all' Estero nei Loro Rapporti coll'Agricoltura, Industria, e Commercio," 4 Milan, 1874; "Statistica Illustrata dell'Emigrazione," Rome, 1878; "L'Italia Vivente, Studi Sociali," Milan, 1878; "Il Risorgimento Italiano: Biografie Storico-Politiche d'Illustri Italiani Contemporanei," Milan, 1884; "L'Italia all' Estero," Rome, 1887. The only work written by him relating directly to Jewish interests was his "Alcune Parole Sugli Israeliti in Occasione di un Decreto Pontifico d'Interdizione," Florence, 1847.

BIBLIOGRAPHY: De Gubernatis, *Dizionario Biografico degli Scrittori Contemporanei*, Florence, 1879.

S. I. E.

CARPI, SOLOMON JOSEPH B. NATHAN: Italian writer; born Dec. 27, 1715; lived at Leghorn. He engaged in the controversy with regard to Ḥayyon's book on Shabbethai Ẓebi, writing an attack on it, extracts from which were published by N. Brüll under the title "Toledot Shabbethai Ẓebi," Wilna, 1879. He also wrote a Hebrew elegy on the death of Emmanuel Ricchi, and corresponded with Joseph Ergas.

BIBLIOGRAPHY: Mortara, *Indice*; Brüll's Preface to *Toledot Shabbethai Ẓebi*.

E. C. J.

CARPI, ZACHARIAH: Italian revolutionist; born at Revere in the second half of the eighteenth century. After the French Revolution he appears to have engaged in plots against the Austrian government of Lombardy; and on March 25, 1799, he and his son, Mordecai Moses Carpi, were imprisoned at Mantua. When Napoleon reached that city in 1800, Carpi was sent to Venice, thence to Sabonico in Dalmatia, and through Carinthia and Croatia to Peterwardein in Hungary, where he was at last released by Napoleon's orders (April 3, 1801). He wrote a narrative of his imprisonment under the title "Toledot Yiẓḥaḳ," which was edited by G. Jaré, and published at Cracow in 1892. Besides this, he wrote an account of his early life, under the title "Megillat Yiẓḥaḳ," and a book for children entitled "Dibre Yiẓḥaḳ." The last two works are no longer extant.

BIBLIOGRAPHY: G. Jaré, in Preface to *Toledot Yiẓḥaḳ*.

E. C. J.

CARPZOV, JOHANN BENEDICT II.: German Christian theologian and Hebraist; born 1639; died 1699. He was a member of a family which, like the Buxtorfs, produced a long line of distinguished scholars. He studied Hebrew under Johannes Buxtorf II. in Basel, was appointed professor of Oriental languages at Leipsic in 1668, and was pastor of St. Thomas' 1679–99, and professor of theology 1684–99. He edited in 1674 Schikhard's "Jus Regium Hebræorum," and, later, Tarnov's "Kleine Propheten," Lightfoot's "Horæ Heb. et Talmudicæ," Lanckisch's "Concordantiæ Bibl. German.-Hebr.-Græcæ," and in 1687 the "Pugio Fidei" of Raymundus Martini. To the last-named work he prefixed his own "Introductio in Theologiam Judaicam." Some dissertations by Carpzov were published (1699) by his brother Samuel Benedict; and in 1703 appeared his "Collegium Rabbinico-Biblicum in Libellum Ruth." Carpzov's writings, useful when first published, have now no great value.

Bibliography: Ersch and Gruber, *Encyc.* s.v.; Herzog-Hauck, *Real-Encyc.* s.v.

T.

CARPZOV, JOHANN GOTTLOB: German Christian Old Testament scholar; born Sept. 26, 1679, in Dresden; died April 27, 1767, at Lübeck; nephew of Johann Benedict II., and son of Samuel Benedict; most famous and most important Biblical scholar of the Carpzov family. He was titular professor of Oriental languages at Leipsic 1719–30, and preacher and theologian till his death; like his uncle, he was an opponent of the pietists. His critical works are: "Introductio in Libros Vet. Test." 1721, 4th ed. 1757; "Critica Sacra" (I. Original text, II. Versions, III. Reply to Whiston), 1728; "Apparatus Historico-Criticus Antiquitatum et Codicis Sacri et Gentis Hebrææ," 1748. The "Apparatus" is in the form of annotations to Goodwin's "Moses and Aaron," and appended to it are dissertations on "The Synagogue Treated with Honor" (a statement of what the Christian Church has retained of ancient Jewish customs), on "The Charity System of the Ancient Jews" (discussion of the question whether צדקה in O. T. ever means "alms"), and others.

Carpzov represents both an advance and a retrogression in Biblical science—an advance in fulness of material and clearness of arrangement (his "Introductio" is the first work that deserves the name), and a retrogression in critical analysis, for he held fast to the literal inspiration of the Hebrew text of the Old Testament and bitterly opposed the freer positions of Simon, Spinoza, and Clericus. His antiquarian writings are still interesting and useful.

Bibliography: Ersch and Gruber, *Encyklopädie.*

T.

CARRASCO or **CARASCON, JUAN:** Apologist; born at Madrid about 1670, of Marano parentage. At first an Augustin friar at Burgos and an excellent preacher, he later, on a journey to Rome, became a convert to Judaism at Leghorn. He was familiar with the writings of Moses b. Naḥman, Isaac Abravanel, and others, and while in Holland (probably at Amsterdam, where he was circumcised) he wrote in Spanish his "Apology of Judaism." This work was published at Nodriza (The Hague) in 1633, and was later incorporated in the "Coleccion de Reformadores Españoles," published by Wiffen, who believed Carrasco to have been a Protestant.

Bibliography: Kayserling, *Biblioteca Esp.-Port.-Jud.* p. 35; Danielillo, *Danielillo ó Respuestas à los Cristianos*, pp. 68 *et seq.*, Brussels, 1868; Steinschneider, in *Hebr. Bibl.* x. 84; De Rossi, *Bibl. Jud. Antichrist*, p. 23.

G. M. K.

CARREGAL, ḤAYYIM MOSES BEN ABRAHAM: Rabbi and editor; flourished in Palestine at the beginning of the eighteenth century, but lived in Holland for a time, engaged in gathering funds for Jerusalem. His autobiography is to be found in the introduction to his edition of Moses ben Joseph Ventura's ימין משה, Amsterdam, 1718. He was probably a son of Abraham Carregal of Cairo (*c.* 1650), and was perhaps the father of Raphael Ḥayyim Isaac Carregal of Hebron, Palestine (1733–77), who visited Newport, R. I., in 1773.

Bibliography: Fürst, *Bibl. Jud.* ii. 171; Zedner, *Cat. Hebr. Books Brit. Mus.* pp. 167, 338; Roest, *Cat. Rosenthal. Bibl.* pp. 255, 577; G. A. Kohut, in *Publications of Am. Jew. Hist. Soc.* No. 3, p. 123; *idem*, in *Ezra Stiles and the Jews*, p. 91, New York, 1902.

J. G. A. K.

CARREGAL (Caregal, Carigal, Carrigal, Karigal, Karigel, Karigol, Kargol, Kragol), RAPHAEL ḤAYYIM ISAAC: Itinerant rabbi and preacher; born in Hebron, Palestine, Oct. 15, 1733; died at Barbados, West Indies, May 5, 1777. He was ordained rabbi at the age of seventeen, and in 1754 set out on a series of voyages, usually remaining a brief time in the places he visited; *e.g.*, two years in Constantinople (1754–56); two years in Curaçoa, West Indies (1761–63); four years in Hebron (1764–1768); two and one-half years in London (1768–71);

Raphael Ḥayyim Isaac Carregal.
(From a portrait in the possession of Rev. J. L. Jenkins.)

one year in Jamaica, West Indies (1771–72); and one year in the British colonies of North America (1772–1773). In 1773 (July 21) he sailed for Surinam, and in 1775 he was at Barbados. In London, according to his own statement, he was teacher at the Bet ha-Midrash, earning a salary of £100 sterling ($500) per annum. At Curaçao he appears to have held the office of rabbi, though no record of his incumbency is to be found in local annals. He spent some time in New York and Philadelphia, and sojourned in Newport, R. I. (March–July, 1773), as the guest of the community. Though nowise connected with the congregation, he often officiated at divine service.

While in Newport Carregal became an intimate friend of Ezra Stiles, afterward president of Yale College, New Haven, Conn. They studied together, discussing the exegesis and interpretation of Messianic passages in the Bible, and corresponded, mostly in Hebrew. The letters still exist among the unpublished Stiles papers in the library of Yale University. Stiles, in his diary, recently published, speaks lovingly and admiringly of his Jewish friend; gives a long account of his dress, manner, and personality; and, in a series of entries occupying many pages of his day-book, draws up a complete memoir of his career in Newport.

Carregal appears to have written only two brochures (both sermons), published in Newport in 1773.

Kohut, *Ezra Stiles and the Jews*, Index, *s.v.*, pp. 145–146 (where all the passages are quoted), New York, 1902.

E. C. G. A. K.

CARRETUS, LUDOVICUS: Convert to Christianity; lived at Florence in the middle of the sixteenth century. He was a native of France and was originally called "Todros Cohen." As the physician of a Spanish duke, he was with the imperial troops who besieged Florence in 1530. Later, at the age of fifty, he embraced Christianity at Genoa. Carretus is the author of "Mar'ot Elohim; Liber Visorum Divinorum," in which he relates the history of his conversion and quotes passages from the Bible and cabalistic writings in favor of Christianity. The work, published at Paris in 1553, was translated into Latin by Angelo Canini (Florence, 1554) under the title "Epistola Ludovici Carreti ad Judæos, Quæ Inscribitur Liber Visorum Divinorum," etc. Another Latin translation of it was made by Hermann Germberg, and is inserted in Johannes Buxtorf's "Synagoga Judaica."

CARRIAGE. See Chariot.

CARRIERA. See Ghetto.

CARRION DE LOS CONDES: Ancient city of Castile inhabited by Jews at an early date. Although superior to the Christians both in numbers and in property, they submitted in 1126 to the victorious king Alphonso VI., who showed himself favorably disposed toward them. In 1160 many of them settled in the neighboring city of Palencia. The Jewish community of Carrion was so large in 1290 that it paid 92,000 maravedis in taxes, not much less than the amount paid by the community of Burgos. In Carrion, as elsewhere, the Jews were persecuted. Delegates from the city appeared before King Alphonso of Castile (probably Alphonso the Wise), informing him that the Christians of the city, because of a groundless suspicion, had risen against the Jews and killed two of them; that thereupon the Jews had sought refuge in the palace of the prince, who was absent at the time, and, when the Christians followed in pursuit, had escaped through a secret door leading into the court, and locked their pursuers in. The king ordered a strict investigation of the matter, hanged ten of the ringleaders, and imprisoned all others who had taken part in the disturbance. At the time of the great persecution in 1391, most of the Jews of Carrion were baptized.

Carrion is the birthplace of the first Spanish-Jewish poet, Don Santob, commonly called Don Santob de Carrion.

CARRION, SANTOB DE. See Santob de Carrion.

CARSONO, CORSONO, or **CARSI, JACOB** (or **Jacob ben Abraham Isaac**): Spanish astronomer of the fourteenth century. He was commissioned by King Pedro IV. of Aragon to translate from Catalonian into Hebrew the astronomical tables known as "The Tables of Don Pedro," which, at Don Pedro's command, had been begun by Maestre Piéro Gilebert, and finished by Gilebert's pupil, Dalmacio de Planis. About 1376 Carsono wrote at Seville a treatise in Arabic on the astrolabe. This he himself translated into Hebrew at Barcelona in 1378. Ḥayyim ibn Musa ascribes cabalistic miracles to Carsono.

Bibliography: Steinschneider, *Hebr. Uebers.* pp. 596, 639; idem, *Notice sur les Tables Astronomiques Attribuées à Pierre III. d'Aragon*, Rome, 1881.

G. M. K.

CART: A translation of עגלה ('agalah). The cart was generally drawn by two oxen, or sometimes by cows, harnessed with cords (Isa. v. 18). It was used to convey the sacred utensils of the tabernacle (Num. vii. 3–8). The Philistines returned the Ark of the Covenant to the Israelites on a cart drawn by two kine (I Sam. vi. 7–11). Carts were also, but not usually, used to convey persons from place to place (Gen. xlvi. 5). Owing to the bad state in which many of the roads were kept, together with the fact that no springs were used in the construction of carts, they traveled very unsteadily and at times threatened to upset; hence Amos ii. 13. Compare Chariot.

E. G. H. G. B. L.

CARTAGENA (קרטיגיני): Ancient city on the eastern coast of the Spanish province of Murcia, referred to in the Talmud. The Cartagena mentioned in Yer. Sheb. vi., beginning, identified in this passage with Spain, is certainly identical with the

Spanish Cartagena. Jews settled here at an early date. At the fourth Council of Cartagena (436) it was decreed: "Ut episcopus nullum prohibeat ingredi ecclesiam et audire verbum Dei, sive gentilem sive . . . Judæum usque ad missam catechumenorum." Many of the Jews expelled from Spain took ship at Cartagena, as well as at Cadiz; and many Maranos also settled in the former city, where they fell into the hands of the Inquisition.

J. M. K.

CARTHAGE: Ancient city and republic in northern Africa; of special interest to Jews on account of the Phenico-Semitic origin of its inhabitants, its government under the suffetes, recalling the "shofeṭim" (judges) among the Hebrews, and on account of the religion of the inhabitants. The city, called קרת חדשת ("New City") in native inscriptions (Lidzbarski, "Nordsemitische Epigraphik," i. 365), is mentioned in Jewish writings since Talmudic times only as קרתגיני ("Ḳarthigini"), a name equivalent to the Byzantine form Καρθαγένη and in agreement with the Syriac (Payne Smith, "Thes. Syr." cols. 3744, 3765), the Greek form Καρχηδών being found with the latter. Notwithstanding the peculiar form, perhaps chosen with reference to the founder Dido (קרתא + γυνή, "Woman-City"), the Hebrew word certainly designates Carthage in Africa, not Cartagena in Spain. Later Jewish chronicles, which make the founding of Carthage contemporaneous with David, use the variants "Ḳarṭagena" (Yuḥasin, ed. London, 236b), "Ḳarṭigini" (with ט instead of ת, as sometimes even in the Talmud; David Gans to the year 3882), "Ḳartini," and "Ḳartigni" ("Seder ha-Dorot," *s.v.* "David"), sometimes adding the curious remark that the Talmud refers to two cities of Carthage, which is, however, an erroneous conclusion.

Josephus.

Josephus Flavius writes Καρχηδών like the Greeks. He says it is recorded in the public documents of Tyre that King Solomon built the Temple at Jerusalem 143 years and eight months before the Tyrians founded Carthage ("Contra Ap." i. § 17). Josephus intends to prove by this statement the antiquity of the Jewish people, drawing the same conclusions from Menander's account of the reign of Hiram, according to which Hiram came to the throne 155 years and eight months before the founding of Carthage, and the Temple was built in the twelfth year of his reign (*ib.* i. § 18). Through this computation Josephus refutes the grammarian Apion, who placed the exodus from Egypt at the time that the Phenicians founded Carthage (*ib.* ii. § 2). The Maccabean Judah formed a treaty with the Romans for the reason, among others, that he had heard that the Romans had vanquished the Carthaginians ("Ant." xii. 10, § 6; compare "B. J." ii. 16, § 4; vi. 6, § 2). Josephus does not say that any Jews lived at Carthage.

In the Bible and the Talmud.

Although Carthage is not mentioned in the Bible, modern scholars are inclined to identify the Biblical Tarshish with Carthage, since it is thus translated in the Septuagint, the Targum, and the Vulgate, Ezek. xxvii. 12. A unique statement in the Talmud, based probably on the legend of the emigration of the Girgashites, identifies Kenizzi (Gen. xv. 19) with Carthage (Yer. Sheb. 36b; Yer. Ḳid. 61d; Gen. R. xliv. 23). But a wide-spread rabbinical legend identifies the land of the Amazons with Carthage (Lev. R. xxvii. 1), or with Africa (Tamid 32b), in both instances agreeing with classical tradition. Carthage was considered one of the four largest cities of the Roman empire (Sifre, Num. 131; p. 47b, ed. Friedmann). An amora of the third century has the following curious sentence: "From Tyrus to Carthage Israel and his 'Father in heaven' are known; from Tyrus to the west and from Carthage to the east Israel and his God are not known" (Men. 110a); which is probably meant to indicate the extent of the Semitic race.

Jews in Carthage.

The fact that the Talmud mentions the Carthaginian teachers of the Law, R. Abba, R. Isaac, and R. Ḥana, proves that Jews were living in that city, although Frankel, without reason, takes it to mean an Armenian city ("Mebo," pp. 6b, 66a), and Kohut a Spanish city ("Aruch Completum," vii. 220). It is evident from the introduction to the work "Adversum Judæos," ascribed to Tertullian, that Jews were living in Carthage; and they are found still further west (Schürer, "Gesch." 3d ed., iii. 26, note 64). Münter ("Primordia Eccl. Afric." p. 165, Copenhagen, 1829) mentions a certain R. Jisschak (the one in the Talmud?). The Jews of Africa (see Africa) are often referred to in the correspondence between Jerome and Augustine; and in recent times there has been found in Gamart, near the city of Carthage, a great Jewish necropolis with many inscriptions in Latin (see Catacombs). From the conquest of Carthage by the Vandals (439) to the subjection of the latter by the Byzantines (533), the holy vessels from the Temple of Jerusalem, that had been taken from Rome, were kept in Carthage (Evagrius, "Scholasticus," Fragment iv. p., 17; Procopius, "Bellum Vand." ii. § 9). The Jews then passed under the rule of Justinian, who instructed Solomon, the governor of Africa, to transform the synagogues as well as the churches of the Arians and the Donatists into orthodox churches (Novellæ, No. 37). Solomon, however, was soon compelled to flee from the rebellious Africans.

Under the Arabs.

In 692 the city was wrested from the Christians by Ḥasan, a general of the calif 'Abd al-Malik, and in 698 the Greeks were permanently driven from Carthage and Africa by Musa (Weil, "Gesch. der Chalifen," i. 478). Previous to this the Arabs had founded the city Ḳairwan, which became as important to the Jews as Carthage had been. Following Arabic writers, Parḥi defined the situation of Carthage as 36° latitude by 35° longitude ("Kaftor wa-Feraḥ," ed. Edelmann, 26b).

CARTHAGENA. See South America.

CARTHAGENA, DON ALFONSO DE: Convert to Christianity; son of Paul of Burgos; died at Burgos in 1456. He was baptized when quite young by his father, and became archdeacon of Compostella. Being equally distinguished as statesman and as priest, he succeeded his father in the bishopric of Burgos. In 1431 he was the representative of Castile at the Council of Basel. Pope Pius II., in his memoirs, called him "an ornament to the prelacy." Pope Eugenius IV., learning that the bishop of Burgos was about to visit Rome, declared in full conclave that "in the presence of such a man he felt ashamed to be seated in St. Peter's chair."

Grätz ascribes to the influence exercised by Carthagena over Eugenius IV. the latter's sudden change of attitude toward the Jews. Carthagena alone, says Grätz, could have been the author of the complaints against the pride and arrogance of the Castilian Jews, which induced the pope to issue the bull of 1442, withdrawing the privileges granted to them by former popes. Among Carthagena's writings on history, morals, and other subjects, there is a commentary on the twenty-sixth Psalm.

CARTOGRAPHY. See CHARTOGRAPHY.

CARVAJAL, ANTONIO FERNANDEZ: Portuguese merchant, and first endenizened English Jew; born about 1590, probably at Fundão, Portugal; died in London Nov. 10, 1659. He appears to have left Fundão on account of the persecution of the Inquisition, and, proceeding to the Canary Islands, acquired much property there, and made many commercial connections which led him (about 1635) to London, where he settled in Leadenhall street. In 1649 the council of state appointed him one among the five persons who received the army contract for corn. In 1653 Carvajal was reported as owning a number of ships trading to the East and West Indies, to Brazil, and to the Levant. He dealt in all kinds of merchandise, including gunpowder, wine, hides, pictures, cochineal, and especially corn and silver, and is reported to have brought to England, on the average, £100,000 worth of silver per annum.

In the early days of his residence in England, Carvajal used to attend mass at the Spanish ambassador's chapel, and in 1645 was informed against for not attending church; but the House of Lords, on the petition of several leading London merchants, quashed the proceedings. In 1650, when war broke out with Portugal, Carvajal's ships were especially exempted from seizure, though he was nominally a Portuguese subject. In 1655 he and his two sons were granted denizenship as English subjects (the patent being dated Aug. 17 of that year); and when the war with Spain broke out in the following year, his property in the Canaries was liable to seizure, as he was a British subject. Cromwell made arrangements by which Carvajal's goods were transported from the Canaries in an English ship which passed under Dutch colors.

When Manasseh ben Israel came to England in 1655 to petition Parliament for the return of the Jews to England, Carvajal, though his own position was secured, associated himself with the petition; and he was one of the three persons in whose names the first Jewish burial-ground was acquired after the ROBLES case had forced the Jews in England to acknowledge their creed. Carvajal, besides advancing money to Parliament on cochineal, had been of service to Cromwell in obtaining information as to the Royalists' doings in Holland (1656). One of his servants, Somers, alias Butler, and also a relative, Alonzo di Fonseca Meza, acted as intelligencers for Cromwell in Holland, and reported about Royalist levies, finances, and spies, and the relations between Charles II. and Spain. It was to Carvajal that Cromwell gave the assurance of the right of Jews to remain in England. Under date of Feb. 4, 1657, Burton, in his diary, states: "The Jews, those able and general intelligencers whose intercourse with the Continent Cromwell had before turned to profitable account, he now conciliated by a seasonable benefaction to their principal agent [Carvajal] resident in England." In 1648 a cargo of logwood belonging to Carvajal was seized by the customs officers. He assembled his servants and friends, broke open the government warehouses, and carried off his merchandise. The litigation to which this gave rise was only interrupted by Carvajal's death.

J.

CARVALHO (CARVALLO), MORDECAI BARUCH: A wealthy Tunisian merchant; died Jan., 1785, at an advanced age. He devoted part of his time to rabbinical studies, and in 1752 succeeded his teacher, Isaac Lumbroso, whose best pupil he was, as rabbi of the Leghorn congregation of Tunis. Throughout the country he enjoyed a high reputation as a rabbinical authority. His publications are: "To'afot Re'em" (The Strength of a Unicorn), commentary on the work of Elijah Mizraḥi (Leghorn, 1761); and "Mira Dakya" (Pure Myrrh), commentary and miscellanies on various tracts of the Babylonian Talmud, and on Maimonides' Yad ha-Ḥazaḳah (Leghorn, 1792). He also published the uncompleted work of his son, **Isaac Carvalho,** who died January, 1759, at the age of twenty-eight. This work, entitled "Sefer ha-Zikronot we-Ḥayye Yiẓḥaḳ" (Book of Records, and the Life of Isaac), and published together with the elder Carvalho's "To'afot Re'em," contains a commentary on the works of Mizraḥi, miscellanies on various tracts of the Talmud, and four funeral orations.

CARVALLO, JULES: French engineer; born at Talence, Gironde, France, in 1820. After having graduated with the highest honors at the Ecole Polytechnique and Ecole des Ponts et Chaussées, he was attached as engineer to the Southern Railroad; and under his direction the lines from Tech to Rivesaltes and from Tet to Perpignan were built, including the remarkable viaduct of Bouzanne.

Afterward Carvallo became director of the work of canalizing the Ebro (Spain); and he established in the delta of that river a system of irrigation which permitted the cultivation of enormous tracts of land hitherto unproductive. From Spain Carvallo went to Italy, where he directed the works of the Roman railroads. On his return to Spain he was entrusted with the building of the line from Pampeluna to Saragossa, and later became the chief engineer of a Spanish water company.

Carvallo was the author of many dissertations printed in the "Comptes-Rendus de l'Académie des Sciences" and in many other scientific publications. Among his numerous contributions the most noteworthy were those on the piling up and solidification of embankments; on the formula of the maximum of stability and minimum of expense in public works; on the laws of oscillation of chain bridges, etc.

Amid his numerous works, Carvallo found time to devote himself to Jewish interests. He was one of the founders of the Alliance Israélite Universelle, and for many years served on the executive committee of that institution.

S. I. Br.

CASABLANCA (Spanish), or **BET AL ABYAD** (Arabic): Port of Morocco, Africa, on the Atlantic ocean. The Jewish community, numbering 6,000, in a total population of 20,000 inhabitants, is of recent date. The majority of its members are engaged in commerce in grain, spices, etc.; there are also a few tinsmiths. The community is governed by a council of administration, which aids the poor and subsidizes the schools with the revenues from the meat-tax, and with the voluntary contributions of its members. Besides the two schools supported by the Alliance Israélite Universelle, with 295 boys and 161 girls respectively, Casablanca has eight Talmud-Torahs with 500 pupils.

Casablanca possesses eleven synagogues, one of which, a synagogue for the poor, was erected about 1750, and another, the Synagogue Eliaou, about 1800. The chief rabbis of Casablanca since 1837 have been: Ḥayyim Elmaleh (d. 1857); Joseph Mehalem (d. 1867); David Quaknine (d. 1873); Messaoud Nahmias (d. 1876); Judah Ohama (d. 1882); and, finally, Isaac Marasch (still living, 1902).

There are three Jewish charitable and philanthropic societies, the Ḥebrat Lomede ha-Zohar, the Ḥebrat Eliyahu ha-Nabi, and the Ḥebrat Tehillim. In the neighborhood of Casablanca are three groups of Jews; viz., Ouled-Hriss (numbering 50); Stal (1,000); and Mzab (1,000).

CASAL MAGGIORE: Town in Italy, about twenty-two miles east-southeast of Cremona. In Sept., 1485, Joshua Solomon and Moses, sons of Israel Nathan of Soncino, began to print a large Maḥzor according to the Roman ritual. In the following year they erected a printing-establishment in the neighboring town of Casal Maggiore, where they completed the second part of the book, which contains 320 folio leaves. The Maḥzor, of which a number of copies were printed on parchment, was the only work printed at Casal Maggiore.

J. A. F.

CASE, CASA, or ḲAZA, JOSEPH B. ABRAHAM: One of the foremost Polish rabbis and Talmudists of the end of the sixteenth century and the beginning of the seventeenth; died at Posen about 1610. His name, "Case" (קאזי) or "Ḳaza" (קאזא) is most probably only a variant of the well-known surname "Cases." This would argue for Italian descent; but it does not agree with the fact that Case called himself "Shapiro," as Bloch has conclusively proved.

After serving as chief rabbi of Lemberg, Case became city rabbi of Posen, while Mordecai b. Abraham Jafe was the district rabbi of Greater Poland. Although Case apparently left no writings, he was one of the first Talmudic authorities of his time, as may be seen from Benjamin Aaron Solnik's responsum No. 22, and Meïr b. Gedaliah of Lublin's responsum No. 88. Case's son Solomon (d. Jan. 2, 1612, at Lemberg) was also an eminent Talmudist.

Bibliography: Bloch, in *Ha-Eshkol*, i. 151-154; Buber, *Anshe Shem*, Nos. 215, 508; Kohen Ẓedeḳ, *Liwyat Ḥen* (Supplement to vol. v. of *Oẓar ha-Sifrut*), p. 36.

L. G.

CASES or **CAZES**: Jewish Italian family that included among its members rabbis, physicians, and scholars. The more numerous branch of the family lived in Mantua; some lived in Ferrara; some emigrated to Turkey and Palestine (see Zunz, in Benjacob's edition of Dei Rossi's "Meor 'Enayim," iv. 30). **Benjamin Cazes**, a contemporary of Azulai, was rabbi of Safed and author of a commentary on Moses of Coucy's "Codex SeMaG," with the title "Megillat Sefer" (Constantinople, 1750). Of the Mantuan branch the following are the most distinguished:

Aaron b. Joseph Baruch Cazes: Scholar and physician; took his degree on Aug. 3, 1751; died 1767.

A. R.

Israel Gedaliah (Claudio) Cazes: Rabbi at Mantua; born there June 19, 1794; died there Jan. 1, 1841. Like his father and grandfather, he attained proficiency both in rabbinical literature and in medicine. In 1834 he succeeded his father in the rabbinate, which was transmitted from father to son in the Cazes family. In addition to the duties of the rabbinate, Cazes practised medicine with great success.

Bibliography: Jost, *Israelitische Annalen*, 1841, p. 144; Mortara, *Indice Alfabetico*, p. 11.

I. Br.

Israel Gedaliah ben Joseph Baruch Cazes: Italian physician and chief rabbi at Mantua; died Jan. 21, 1793. He enjoyed a threefold reputation as physician, as an acute Talmudist of wide reading, and as preacher. He wrote "Tefillot Libene Yisrael Ḳ. Ḳ. Mantova" (Prayers of the Israelites of the Holy Congregation of Mantua), being prayers for the victory of King Joseph II.'s army, written in Hebrew and translated into Italian (Mantua, 1788). He is said to have been a disciple of the abbé Canini, whose methods of medical treatment he successfully applied after having taken his degree in 1754.

Bibliography: Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 160; Mortara, *Indice Alfabetico*, p. 10; Steinschneider, in *Monatsschrift*, 1900, p. 84.

I. Ber.

Jacob b. Israel Cases Gedaliah I.: Physician, eighteenth to nineteenth century (Mortara, "Indice Alfabetico," p. 10).

A. R.

Joseph Baruch ben Moses Cazes: Italian Talmudist, rabbi, and physician; died between 1716 and 1726 at Mantua, his native place. He was famous both as physician and as Talmudist. His responsa, which Nepi declares brilliant, are quoted in the works of his contemporaries, among others in Isaac Lampronti's "Paḥad Yiẓḥaḳ" (letter א, fol. 79g, 102a; ב, fol. 60b; ג, fol. 63g *et seq.*; ק, fol. 127a). His Talmudic method of teaching is entirely logical. He was averse to useless discussions (letter ב, fol. 60b). Although he believed in the strict observance of all the Talmudic precepts, he advocated departures from the Law in certain cases, in order that religion might not become a burden to the people (letter א, fol. 79g; letter ג, fol. 63g and 66b); or when the welfare of individuals was endangered (letter א, fol. 103g).

Bibliography: Nepi-Ghirondi, *Toledot Gedole Yisrael*, pp. 129-254. The date of his death may be gathered from *Paḥad Yiẓḥaḳ*, letter א, fol. 79g, and ג, fol. 42a.

I. Ber.

Joseph Samuel b. Israel Gedaliah I. Cases: Scholar and physician; died 1775 (Mortara, "Indice Alfabetico," p. 10).

Luliane (Lelio) Shalom b. Samuel Cases: Seventeenth century; physician and scholar; took his degree Jan. 12, 1622. He is the author of "Derek Yesharah" (The Straight Path); a treatise on communal conduct in order to avoid dissensions. Zunz called this work "the swan-song of the Mantuan press." It was published in 1626 by Judah Samuel Perugia & Son.

Bibliography: Mortara, *Indice Alfabetico*, p. 11; Zunz, *Z. G.* p. 260.

A. R.

Moses ben Samuel Cazes: Italian Talmudist and physician; took his degree on Jan. 11, 1586; lived in the second half of the sixteenth century and the first quarter of the seventeenth at Mantua, where he was rabbi and director of a yeshibah. He was a pupil of the celebrated cabalist Menahem Azariah di Fano. Cazes enjoyed a more than ordinary reputation among his contemporaries; a gifted writer uttering the following opinion of him: "In the synagogues and schoolhouses of our time there is no one to equal him in wisdom and understanding, in counsel and courage, in knowledge and piety" (Abraham de Portaleone, "Shilṭe ha-Gibborim," p. 24d). Cazes was the author of the following works: (1) "Notes on Alfasi"; (2) Commentary on the Fifth and Sixth Orders of the Mishnah; (3) "Contributions to the Hermeneutics of the Talmud." They were never published.

Bibliography: Azulai, *Shem ha-Gedolim*, i. 143; Nepi-Ghirondi, *Toledot Gedole Yisrael*, pp. 254, 255; Mortara, *Indice Alfabetico*, p. 11; Benjacob, *Oẓar ha-Sefarim*, pp. 60, 180 (Nos. 387 and 406); Fürst, *Bibl. Jud.* i. 147 (mentions other works of Cazes, but without giving the place where they are to be found in MS.); Zunz, in Benjacob's edition of Dei Rossi's *Meor 'Enayim*, iii. 30.

I. Ber.

Samuel b. Moses Cases: Scholar of the sixteenth century. He edited Samuel Ẓarẓa's's "Meḳor Ḥayyim" (מקור חיים), Mantua, 1559; and is mentioned by Azariah dei Rossi ("Meor 'Enayim," i. 80; ii. 221) as a possessor of a manuscript of the Targum of Jonathan ben Uzziel (Zunz, in Benjacob's edition of De Rossi's "Meor 'Enayim," iii. 29-30).

The following two belonged to the Ferrara branch of the Cases family:

Hananiah b. Menahem Cases: Physician and rabbi of Florence; lived at the end of the seventeenth and beginning of the eighteenth centuries. Author of (1) "Ḳin'at Soferim" (Zeal of Writers), written in defense of the "Sefer ha-Miẓwot" of Maimonides against the attacks of Naḥmanides (Leghorn, 1740, reprinted in the Warsaw edition of the "Sefer ha-Miẓwot"); (2) an epistle (Iggeret) to R. Nehemiah b. Baruch concerning musical harmony in the chanting of the priestly benediction ("Birkat Kohanim") which is included in R. Nehemiah's "Meẓiẓ u-Meliẓ" (מציץ ומליץ), Venice, 1715; and (3) "Ḥoḳ le Yisrael" (Statute unto Israel), glosses and notes on Hezekiah di Silva's "Peri Ḥadash" on the "Yoreh De'ah" (Leghorn, 1740). Responsa of Cases may be found in the works of his contemporaries, among others in I. Lampronti's "Paḥad Yiẓḥak," letter א, fol. 102b, and ח, fol. 109b).

A. R.

Menahem ben Elhanan Cazes: Italian Talmudist; born about the beginning of the seventeenth century; died after 1664. He was rabbi at Modena (1642) and Ferrara (1655). Azulai saw two of his manuscript works: (1) "Shelom ha-Bayit" (The Peace of the House), a commentary on Solomon ibn Aderet's "Torat ha-Bayit" and Aaron ha-Levi's "Bedeḳ ha-Bayit"; (2) and "Ḥiddushim" (novellæ) on the treatise "Shabbat." Ghirondi had in his possession a manuscript of Cazes containing halakic decisions. A responsum by Cazes, which shows his wide range of Talmudic learning, has been published in Samuel Aboab's "Debar Shemuel" (Venice, 1702, No. 79).

L. G. I. Ber.

CASHMORE, MICHAEL: Australian communal worker; born in 1814; died at South Melbourne Oct. 17, 1886. He was one of the oldest colonists in Victoria, having arrived in Melbourne in 1838, after a stay of two years at Sydney. Cashmore was president of the Melbourne Hebrew Congregation and one of the trustees of the Bourke street synagogue. He was the first Jewish member of the city council, and the first Jewish magistrate appointed in the colony. For seventeen years he held the position of inspector of meat markets.

CASIMIR II., THE JUST: King of Poland; born 1138; ascended the throne on the deposition of his brother Mieczyslaw III., 1177; died 1194. He was one of the most amiable monarchs that ever ruled in Poland, a lover of peace, and a friend of the people. He protected the Jews from the oppression and extortions of the nobles, and by favorable legislation in the Diet of Leczyc, 1180, paved the way for the famous privileges granted to the Jews of Poland in 1264 by Duke Boleslaw of Kaliscz.

H. R.

CASIMIR III., THE GREAT (Polish, **Kazimierz**): King of Poland; born 1309; succeeded 1333; died in Cracow Nov. 5, 1370. He was a peaceful ruler, and, by his salutary reforms, strengthened his reign and developed trade and industry. On Oct. 9, 1334, he confirmed the privileges granted to the Jews in 1264 by Boleslaw the Pious. He was favorably disposed toward the Jews, who during his reign made themselves conspicuous in commerce, handicrafts, and agriculture. Under penalty of death he prohibited the kidnaping of Jewish children for the purpose of baptizing them, and inflicted heavy punishment for the desecration of Jewish cemeteries.

At the Diet of Wislica, March 11, 1347, he introduced salutary legal reforms in the jurisprudence of his country; he sanctioned a code of laws for Great and Little Poland, which gained for him the title of "the Polish Justinian"; and he also limited the rate of interest charged by Jewish money-lenders to Christians to 8⅓ per cent per annum. This measure must not be ascribed to his animosity against the Jews, but should rather be considered as a wise act tending to the welfare of the country as well as of the Jews.

Legislative Enactments.

The Inquisition, introduced in Poland under Vladislav Lokietek, remained impotent, in spite of all the intrigues of the lower clergy. On one occasion the Jews were accused of having murdered a Christian child, found on the road to the Lobsow wood, a few miles distant from Cracow (1347); but a public investigation, conducted under an order of the king by the state chancellor Jacob of Melchtin in conjunction with the humane priest Prandola (who shared the tolerant views of Casimir), proved their innocence. The consequence was that Casimir ordered the publication, in the form of an edict, of paragraph 31 of Boleslaw's statute, refuting the blood accusation and defining the punishment for such a charge when not sustained by proofs. In commemoration of this event Casimir founded a chapel at Cracow.

Casimir appears to have protected the Jews against outbreaks of the mob in 1348, for the groundless accusation of the poisoning of wells by the Jews had traveled from Germany into Poland and had roused the populace against the latter. Massacres occurred in Kaliscz, Cracow, Glogau, and other cities, especially those on the German frontier. According to Matteo Villani ("Istorie," p. 622, Milan, 1729), 10,000 Jews were killed in 1348 in Poland.

Esterka the Jewess.

In 1356 Casimir became infatuated with a beautiful Jewess, named Esther (Esterka), a tailor's daughter of Opoczno. She bore him two sons (Niemerz and Pelka) and one daughter (not two, as stated by Grätz). The sons were brought up in the Christian religion; the daughter, in the Jewish. Many Polish noble families, as the Lubienski, Niemir, Niemiryez, Niemirowski, claim to be their descendants. Polish historians ascribe the special favors and privileges bestowed on the Jews by Casimir to his love for Esther; but they are not correct in this ascription, since the privileges in question were confirmed by Casimir in 1334, twenty-two years before his relations with Esther. Czacki sees the origin of these favors in the king's sense of righteousness and justice. Czacki writes: "It is not known that the king granted to the Jews other privileges and rights owing, as Jan Dlugosz thinks, to his affection for Esterka. Envy and hatred surnamed this benefactor of the people 'Ahasuerus.' Poland, being a fertile but sparsely populated country, was in want of trade and industries. The Jews, who during the pestilence of 1360 fled from Germany, migrated to Poland with their wealth. It may also with certainty be admitted that foreign Jews provided Casimir with large sums of money, thus enabling him to found new cities and to develop many old ones."

Cracow was in Casimir's time one of the Hanse towns in alliance with forty other cities in Europe. So full of gratitude to Casimir were the Jews, that at the marriage of Casimir's granddaughter Elizabeth, Wierzynek, a Jewish merchant of Cracow, requested from the king the honor of being allowed to give the young bride a wedding present of 100,000 florins in gold, an immense sum at that time and one equal to her dowry from her grandfather.

H. R.

CASIMIR IV., JAGELLON: Grand duke of Lithuania and king of Poland; born 1427; died at Grodno 1492. He succeeded to the grand duchy in 1440, and followed his brother Ladislaus III. on the throne of Poland in 1447. For the greater part of his reign, when the influence of the clergy was lessened by the greater aggressiveness of the executive power, the Jews of Poland and Lithuania enjoyed happy days, as in the times of Casimir the Great. Casimir continued the liberal policy of his predecessor Withold toward the Jews of Lithuania; but he did not confirm the privileges Withold had granted to them. Bershadski thinks that this was not because of antipathy to the Jews, but because he had probably left it to the elders to rule them, or that he followed the example of his father, in allowing the Jews of Lithuania to enjoy the more extensive privileges of the Jews of Poland. Certain it is that soon after his accession to the throne of Lithuania, Casimir granted the Jews of Troki the Magdeburg law, which long before had been granted to the Christian inhabitants of that city as well as to the Jews of

Wilna and Kovno. According to this law, the Jews of Troki were subject to the jurisdiction of a Jewish bailiff, elected by his coreligionists and confirmed for life by the king, to whom alone he was responsible.

Soon after Casimir's accession to the throne of Poland, while he was visiting Posen, a fire broke out there, in which the original document, enumerating the privileges granted to the Jews by Casimir the Great (1334), was burned. Casimir IV. not only renewed and confirmed the old privileges, but granted new ones, such as the Jews of Poland had never before enjoyed.

Owing to the intrigues of Cardinal OLESNICKY ZBIEGNEW, archbishop of Cracow, and of the monk John CAPISTRANO, these privileges were abolished in 1454 on the pretense that they "conflicted with the laws of God and of the country." This repeal aggravated the condition of the Jews of Poland and led to the riots of CRACOW (April 12, 1464), in which about thirty Jews were killed. In 1467 the Diet again confirmed the rights and privileges of the Jews granted to them by Casimir in 1447.

The favor shown by Casimir to the Jews is supposed by some to have been due to the monetary help they afforded him. When he died he left unpaid many debts to the Jews.

CASIPHIA: The residence of the NETHINIM, who were under the leadership of Iddo (Ezra viii. 17). Ezra sent them a message from Ahava, which resulted in their joining his forces at that place. The exact site of Casiphia is uncertain.

J. JR. G. B. L.

CASLARI: Name of a family originally from Caylar (Latin, "Castalarium"), a village in the department of Hérault, France. A rather important Jewish community existed at Caylar in the Middle Ages. After the royal edict of Sept. 17, 1394, these Jews went to Provence and to the Comtat-Venaissin; in 1459 and 1487 some of them were at Tarascon, and in 1480 at Avignon (S. Kahn, "Les Juifs de Tarascon," pp. 30, 32; "Rev. Et. Juives," x. 172). The Caslari family enjoyed a considerable reputation as late as the second half of the sixteenth century. It produced the following scholars:

David Caslari (called also **Bongodas,** and entitled "**Maestro**") (Zunz, "Z. G." p. 465): Physician at Narbonne, and one of the Jews to whom the archbishop, in 1284, granted a number of privileges (Saige, "Les Juifs du Languedoc," p. 48). The poet Abraham Bedersi, who was an intimate friend of Caslari, addressed to him a liturgic poem at the feast of Purim, and proposed him, together with Abraham Saquil, Asher ha-Kohen, and Moses ben Judah Mansuri, as a judge of the literary contest to which he had invited the Jewish poets (Renan-Neubauer, "Les Rabbins Français," p. 715; compare Saige, *l.c.* p. 119). David translated from Latin into Hebrew Galen's treatise, "De Inæquali Intemperie" (Renan-Neubauer, *l.c.*, p. 646).

David ben Vadi Caslari: Lived at Perpignan about 1337. He was probably not related to Maestro David Caslari. His signature appears to the bill of divorce which the scholar David Bongoron was obliged to give (1337) to his wife, the daughter of the rich En Astruc Caravida of Girone (Gross, "Gallia Judaica," p. 469).

En Bongodah or **Bonjuda Yehacel Caslari**: Poet. He and his son **Yehacel** (Ezekiel), about 1400, exchanged poems with Solomon ben Reuben Bonfed, which are still extant in the manuscripts of Bonfed's diwan (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1984; Renan-Neubauer, "Ecrivains Juifs Français," p. 647; Steinschneider, "Hebr. Bibl." xiv. 98).

Mossé du Caylar or **Caslari**: Warden of the community at Avignon in 1480, together with Vital Dieu, Lo Sal of Carcassonne, Mossé of Softal, Isaac of Sant Pal (St. Paul), Isaac Boterel, and Mossé Ferrusol ("Rev. Et. Juives," x. 172).

Ẓemaḥ ben Jedidiah (called **Crescas of Caslari**): He copied in 1525 the Paris manuscript (No. 179) containing the commentary of Abraham ibn Ezra on the Pentateuch (Gross, *l.c.*, p. 621).

Ẓemaḥ ben Moises Caslari: Rabbi at Carpentras about 1583. His signature appears on a document confirmed at Carpentras Adar 7, 5343, in addition to the names of Moses, son of Judah Rouget, and Moses, son of Joseph Kolon (*ib.* x. 82).

G. S. K.

CASLARI, ABRAHAM BEN DAVID: Physician; lived at Besalu, Catalonia, in the first half of the fourteenth century. Caslari was considered one of the most skilful physicians of his time. He was the teacher of Moses Narboni of Perpignan, and one of the ten notables to whom, in 1323, Kalonymus ben Kalonymus of Arles addressed his treatise on morals, entitled, "Eben Boḥan" (Touchstone).

Abraham was the author of the following medical works, still extant in manuscript: (1) "'Aleh Ra'anan" (Verdant Leaf), or, as it is quoted by Judah ben Natan, "'Aleh ha-Refu'ah" (The Leaf of Healing), a treatise on fevers, divided into five books, completed Nov., 1326 (Parma MS. No. 946). The author says that he wrote the book at the request of his friends, who wished to possess a vade mecum on these matters. (2) "Ma'mar be-Ḳaddaḥot ha-Debriyot u-Mine ha-Ḳaddaḥat," a treatise on pestilential and other fevers, composed in 1349, when the Black Death decimated the populations of Provence, Catalonia, and Aragon (Bibl. Nat., Paris, MS. No. 1191, 7). (3) "Dine ha-Hakkazah" (Rules for Bleeding), Turin MS. No. 121. (4) "Mekalkel Maḥalah" (Who Sustains in Sickness), only an extract from which has been preserved (Neubauer, "Cat. Bodl. Hebr. MS." No. 2142, 39). He is also said to have translated into Latin the "Antidotarium" of Razi. The "Book of Foods," written by Isaac Israeli the Elder, is falsely ascribed to Caslari. Profiat Duran Efodi of Perpignan, called in Hebrew "Isaac b. Moses ha-Levi," borrowed from Caslari the astronomic note which he cites in his commentary on the "Moreh

Nebukim" of Maimonides (i. 72). He is also mentioned by Nissim Gerondi (Responsa, No. 33).

CASLARI, CRESCAS. See CRESCAS VIDAL DE CASLARI.

CASLARI, ISRAEL BEN JOSEPH HA-LEVI (known as **Crescas Caslari**): Physician and poet; lived at Avignon in 1327. He was the author of a liturgic poem for Purim, beginning with the words מי כמוך. In a manuscript of this poem ("Rev. Et. Juives," ix. 116) the signature contains the words לבני יצהר, from which Neubauer concludes that Crescas Caslari belonged to the family of the Yiẓhari. This opinion, shared by Zunz, is criticized by Gross, who holds that the appellation is merely honorary, as it is in the Bible (Zech. iv. 14).

According to Zunz ("Z. G." p. 466), Caslari was the author of a poem on the story of Esther and Mordecai, which he translated into the vernacular. A fragment of a Provençal poem by Maestro Crescas has been published in "Romania" (April, 1892). Caslari also translated Arnaud de Villeneuve's medical work entitled "Liber de Regimine Sanitatis," dedicating it to Jaime II. of Aragon.

BIBLIOGRAPHY: Renan-Neubauer, *Les Ecrivains Juifs Français*, pp. 647–650; Zunz, *Literaturgesch.* p. 504; Gross, *Gallia Judaica*, pp. 7, 257.

G. S. K.

CASLARI, JOSHUA: Liturgical poet; lived at Avignon about 1540. He wrote four elegies which are inserted in the manuscript Maḥzor of Avignon; his signature is found at the end of the last. Joshua Caslari is in all probability identical with the Jozué du Cayslar, named with Ferussol Pampelona, in a document dated June 15, 1558, as member-elect of the council of the Jewish community of Avignon.

G. S. K.

CASLUHIM: According to Gen. x. 14 (= I Chron. i. 12), the Casluhim are sons of Mizraim; *i.e.*, a part or dependency of the Egyptians. Bochart ("Geographia Sacra," iv. 31) knew no better identification than the Colchians in the eastern corner of the Black Sea, because, according to a strange and utterly improbable statement of Herodotus (ii. 104), repeated by Diodorus Siculus (i. 28, 55), Strabo, and others, these were Egyptians who had emigrated. Knobel ("Völkertafel"), after Forster, suggested their identity with the Casiotis between Pelusium and Rinocolura, a tract of desert coast before the Sirbonis lake, which is almost uninhabitable. Ebers, "Ägypten und die Bücher Moses" (p. 120), tried to support this view by an alleged Coptic etymology, "kaslokh" (arid mountain), which is impossible in every respect (the correct Egyptian form would be "tasrokḥ"). It is not possible to say anything on the name "Casluhim," the more so because the LXX. reads differently. Whether the latter's *Χασμωνιείμ* (!) has anything to do with the "Nitriotes nomos," or Natron valley, west of Egypt ("ḥesmen"; Egyptian, "Natron"; compare Ebers, *l.c.*), is very questionable.

G. W. M. M.

CASPARI, CHARLES PAUL: German Semite and Biblical scholar; born at Dessau 1814; died 1892. His parents were Jews, and he was reared in the Jewish faith, but in 1838 became a Christian. In 1847 he was called to the University of Christiania, where he remained until his death. The most enduring work of Caspari is his Arabic grammar, "Grammatica Arabica" (1844–48), very soon translated into German, since revised and enlarged by Wright in England (English translation, 3d ed., 1896) and A. Müller in Germany (1887), and now the standard Arabic grammar. Of his numerous exegetical works the following may be mentioned: commentary on Obadiah (1842); "Beiträge zur Einleitung in das Buch Jesaia und zur Gesch. der Jesaianischen Zeit" (1848); "Ueber den Syrisch-Ephraimitischen Krieg unter Jotham und Ahas" (1849); commentary on Micah (1851–52); and commentary on Isaiah (1867). He also translated the Psalter into Norwegian (1851), and had charge of the new Norwegian translation of the Bible (1891).

T.

CASPI, JOSEPH BEN ABBA MARI BEN JOSEPH BEN JACOB: Provençal exegete, grammarian, and philosopher; born in 1297 at Largentière, whence his surname "Caspi" (= made of silver); died at Tarascon in 1340. His Provençal name was Don Bonafous de Largentera. He traveled much, visiting Arles, Tarascon, Aragon, Catalonia, Majorca (where he must have foregathered with Leon Mosconi " [Rev. Et. Juives," xxxix. 249]), and Egypt, where, as he says in his "Ẓawwa'ah," he hoped to be instructed by the members of Maimonides' family. This hope was not realized, as the descendants of Maimonides were more pious than learned. At one time Caspi intended to go to Fez, where many renowned schools existed; but he seems to have abandoned this project and to have settled at Tarascon. He underwent much suffering at the time of the Pastoureaux persecution, and was threatened with punishment if he did not renounce his faith.

His Works.

Caspi was one of the most prolific writers of his time, being the author of twenty-nine works, the greater part of which are still extant in manuscript and the titles of the remainder being known from the list which he had the precaution to make. He began his literary career at the age of seventeen. At thirty he devoted himself to the study of logic and philosophy, which he eagerly cultivated until his death. The following is a list of his writings in their chronological order, some of them being no longer in existence: (1) "Perush," commentary on Ibn Ganaḥ's grammatical work; (2) supercommentaries on Ibn Ezra's commentary on the Pentateuch (one of these commentaries is purely grammatical, bearing the title "Porashat Kesef" [Sum of Money], and is still extant in manuscript [Bibliothèque Nationale, Paris, MS. No. 184, and elsewhere]); (3) "Terumat Kesef" (Oblation of Silver), summary of Averroes' commentaries on Aristotle's "Ethics" and Plato's "Republic," according to the Hebrew translation of Samuel of Marseilles (Parma MS. No. 442; Neubauer, " Cat. Bodl. Hebr. MSS." No. 1427); (4) "Ẓawwa'at Kaspi" (Testament

30

of Caspi), or "Yoreh De'ah," moral sentences dedicated to the author's son, and published by Eliezer Ashkenazi, Leipsic, 1844; (5) "Mattot Kesef" (Staves of Silver), commentaries on the Bible, with the exception of the Pentateuch; (6) "Mazref le-Kesef" (Crucible for Silver), commentary on the Bible; (7) "Kefore Kesef" (Cups of Silver), giving the author's reasons for the rejection of various explanations of Ibn Ezra and Maimonides; (8) "Kesef Siggim" (Silver Dross), questions and answers on the seeming contradictions in the Bible; (9) "Zeror ha-Kesef" (Bundle of Silver), or "Kizzur Higgayon," a compendium of logic (Bibliothèque Nationale, Paris, MS. No. 986); (10) "Retukot Kesef" (Chains of Silver), or "Pirke Yosef" (Chapters of Joseph), treatise on grammar ("Cat. Angel." No. 21); (11) "Shulhan Kesef" (Table of Silver), divided into four chapters called "regel" (foot), treating of prophets and miracles ("Cat. Peyron," p. 209); (12) "Tirat Kesef" (Palace of Silver), or "Sefer ha-Sod" (Book of Mystery), mystic commentary on the Pentateuch (Vatican MSS. Nos. 36, 46); (13) "Adne Kesef" (Thresholds of Silver), forming the second part of the preceding work and containing mystical explanations of the Biblical books other than the Pentateuch; (14) "Mizreke Kesef" (Basins of Silver), explanations of Biblical passages respecting the Creation; (15) "Mazmerot Kesef" (Sickles of Silver), commentary on Job (Munich MS. No. 265); (16) "Menorat Kesef" (Candelabra of Silver), commentary on the Mercabah (Heavenly Chariot); (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1631); (17) "Hagorat Kesef" (Girdle of Silver), commentary on Ezra and Chronicles (*ib.* No. 362); (18) "Kappot Kesef" (Spoons of Silver), commentary on Ruth and Lamentations (Munich MS. No. 265; Cambridge MS. No. 64); (19) "Gelile Kesef" (Scrolls of Silver), commentary on Esther (Bibliothèque Nationale, Paris, MS. No. 1092; Munich MS. No. 2653); (20) "Hazozerot Kesef" (Trumpets of Silver), commentaries on Proverbs, Ecclesiastes, and Song of Songs (Neubauer, "Cat. Bodl. Hebr. MSS." Nos. 362, 1349; Parma MS. No. 461); (21) "Ka'arot Kesef" (Bowls of Silver), in which Caspi endeavored to prove that the Law contains the idea of spiritual happiness and immortality, to explain the Biblical doctrine that God visits the iniquities of the fathers upon the children, and to explain the relation of wickedness to prosperity; (22 and 23) "'Ammude Kesef" (Pillars of Silver) and "Maskiyyot Kesef" (Images of Silver), commentaries on Maimonides' "Guide of the Perplexed," published by Werbluner, with notes and corrections by R. Kirchheim, Frankfort-on-the-Main, 1848; (24) "Gebi'a Kesef" (Mug of Silver), or "Yoreh De'ah" (Teacher of Science), supplement to the mystic commentaries on the Bible ("Cat. Peyron," p. 208; Munich MS. No. 267); (25) "Shasherot Kesef" (Chains of Silver), or "Sefer ha-Shorashim" (Book of Roots), on Biblical lexicography (Bibliothèque Nationale, Paris, MS. No. 1244); (26) "Kappot Kesef" (Spoons of Silver), in which Caspi explains some Biblical problems concerning the history of the Jews; (27) "Mezamrot Kesef" (Songs of Silver; in other lists, Shulhan Kesef), a commentary on the Psalms; (28) "Tam ha-Kesef" (The Silver Is Finished), on the destruction of both temples, Jeremiah's prophecies, and the arrival of the Messiah; (29) "Kebuzat Kesef" (Collection of Silver), containing a list of Caspi's works, published by Benjacob in the "Debarim 'Attikim," Leipsic, 1844.

Joseph Caspi's name is also to be found attached to many liturgic poems of merit. These, however, may belong to his namesake, Joseph Caspi ben Shalom of the sixteenth century, a liturgic poet of some importance.

Caspi's works were diversely estimated. Ibn Zarzah, Moses of Narbonne, and Efodi speak in praise of them. The cabalist Johanan Aleman recommends Caspi's commentaries on account of their mystic character. On the other hand, Isaac Abravanel and Simon Duran emphatically declare him to be antireligious because, among other things, in his commentary on the Moreh he admitted the eternity of the universe (i. 9, 70; ii. 26).

G. I. Br.

CASPI, NATHANAEL BEN NEHEMIAH (surnamed **BONSENIOR MACIF OF LARGENTIÉRE**): Provençal scholar; lived at the end of the fourteenth century and at the beginning of the fifteenth. He was a disciple of Frat Maimon, under whose direction he composed in 1424 his first work, a commentary on the "Cuzari." This commentary, still extant in manuscript (Bibliothèque Nationale, Paris, MS. No. 677, and elsewhere), is based upon the Hebrew translation of the "Cuzari" made by Judah Cardinal. Caspi was also the author of the following works: (1) a commentary on the "Ruah Hen," which treats of the terminology of Maimonides (*ib.* No. 678, 3; Parma, No. 395); (2) a commentary on Maimonides' "Shemoneh Perakim" (Paris, No. 678; Parma, No. 395); (3) "Likkutot," a collection of glosses on the Pentateuch (Munich MS. No. 252). These glosses are based upon those of Joseph Official. Many rabbis of eastern France are cited in these glosses, and many French words and sentences may be found in them.

CASSEL: City in the Prussian province of Hesse-Nassau. There was a persecution of the Jews at Wolfshagen, near Cassel, during the Black Death in 1348; and Hesse-Cassel is mentioned in the same year as a scene of persecution. In 1610 Landgrave Moritz accorded protection to the Jews of Cassel, on the payment of 1,000 reichsgulden. In 1635 only one Jew, Benedict Goldschmidt, was living at Cassel; in 1647 the brothers Abraham and Simon Goldschmidt. In 1649 the Cassel Jews were forced to listen to weekly sermons for their conversion, each Jew—even women and children—being obliged to appear at the town hall. Once, when sixteen Jews and their rabbi were celebrating the Day of Atonement and neglected to attend the sermon, the landgravine caused them to be imprisoned and severely punished, and expelled the rabbi. In 1651 the weekly sermons to the Jews were reduced to six a year, at the instance of the Jewish community. Every Jew without a "privilege" had to pay one ducat for every night that he stayed in Cassel—an ordinance that was renewed in 1673. In 1749 exceptions were made only in favor of the traveler who had papers from the government certifying that he was there on official business, in which case he was allowed to remain four days without payment. In 1751 the poll-tax on native Jews was fixed at four groschen, and that on foreign Jews at eight groschen. In 1766 the Jews were nevertheless ordered to dwell in the city during the fairs, even the district rabbi and the presidents being included. They were not allowed to buy houses except in the Unterneustadt, nor were they permitted to rent them. The next year twelve streets were named in which they might reside. In 1773 a Jews' street was laid out; and as late as 1820 it was ordered that no Jews should live in any of the principal streets of the Altstadt, and that they be entirely excluded from the Oberneustadt. In 1775 Jews were allowed to have open shops in the city.

The new synagogue was dedicated in 1839. The seat of the district rabbinate was transferred from Witzenhausen to Cassel in 1772. Among the rabbis were: Hirsch Kirchhain (died 1779); Joseph Hess (1780); Joseph Michael Kugelmann (about 1790); Loeb Meier Berlin (died 1814); Dr. Ph. Romann (1836-42); L. Adler (1852-83); and I. Prager. Cassel possesses a Jewish teachers' seminary and school.

At present (1902) there are 2,200 Jews in Cassel.

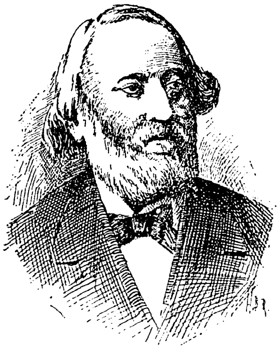
EXTERIOR OF SYNAGOGUE AT CASSEL, GERMANY.
(From a drawing by Lower.)

CASSEL, DAVID: German historian and theologian; born March 7, 1818, at Gross-Glogau, Silesia, Prussia, where he graduated from the gymnasium; died Jan. 22, 1893, in Berlin. Cassel's name is intimately connected with the founders of Jewish science in Germany—Zunz, Geiger, Steinschneider, Frankel, and others. In appreciating his great scholarship in Jewish literature it must not be forgotten that he was born in a city in which Jewish learning had been maintained at a very high standard, and which has given to the world many noted scholars: Solomon Munk, Joseph Zedner, Michael Sachs, H. Arnheim, and others.

Cassel became a student at the Berlin University, where he attended the lectures of the Orientalist

F. H. Petermann, the philosopher Fr. A. Trendelenburg, the philologist Philip Boeckh, and others. He, besides, maintained very friendly relations with Moritz Steinschneider, H. Jolowicz, L. Landshut, and Paul de Lagarde. During the whole time of his university studies he supported himself by giving lessons; and having thus experienced all the bitterness of poverty, he became later one of the founders of the Hülfs-Verein für Jüdische Studierende, a society for assisting poor Jewish students in Berlin, which is still in existence.



David Cassel.

Cassel began his career as an author with his doctor's thesis on "Die Psalmenüberschriften" (published in the "Literaturblatt des Orients," Leipsic, 1840). He received his rabbinical diploma in 1843 from J. J. Oettinger and Z. Frankel, but never accepted a rabbinical position, although he possessed a decided talent for the pulpit, as may be seen from his "Sabbath-Stunden zur Belehrung und Erbauung" (Berlin, 1868), a collection of 52 homilies on the Pentateuch, originally delivered as Sabbath lectures in a school for boys. In 1846 Cassel became principal of an educational institute called the "Dina-Nauen-Stift," in which position he remained until 1879. He was, besides, in 1850 and 1851 teacher of religion in Berlin at the congregational school for Jewish girls, and from 1852 to 1867 at the Jewish school for boys. From 1862 to 1873 he was also a teacher at the Jewish Normal School. In 1872, when the Lehranstalt für die Wissenschaft des Judenthums ("Hochschule") was established in Berlin, Cassel was elected one of the docents.

Cassel wrote a great number of valuable books, besides many essays for the Jewish magazines. Some of his works were written mainly for educational purposes; *e.g.*, the above-mentioned "Sabbath-Stunden" and the following: "Leitfaden für den Unterricht in der Jüdischen Gesch. und Litteratur," Berlin, 1868 (translated into various languages); "Gesch. der Jüdischen Litteratur," 2 vols., Berlin, 1872–73, dealing only with Biblical literature; "Hebräisch-Deutsches Wörterbuch," etc., Berlin, 1871, last ed., 1891; "Lehrbuch der Jüdischen Gesch. und Litteratur," Leipsic, 1879; 2d ed., Berlin, 1896. In addition to these he edited, or contributed introductions and notes to, several scientific works of great value, of which the following may be mentioned: "Cat. Hebräischer Schriften," Latin part by himself, and Hebrew by Rebenstein (Bernstein), Berlin, 1845; D. Conforte's "Ḳore ha-Dorot," a biographical and bibliographical lexicon of Jewish scholars with introduction and notes, Berlin, 1846; "Zikron Yehudah," responsa of Judah b. Asher, published by Rosenberg, with introduction and notes by Cassel, Berlin, 1846; "Teshubot Geonim Ḳadmonim," responsa of the earlier Geonim, edited from a Berlin manuscript, with an introduction by J. L. Rapoport, in "He-Ḥaluẓ," Berlin, 1848, viii. 138; the "Yesod 'Olam" of Isaac Israeli, an astronomical work edited by B. Goldberg and L. Rosenkranz, with an introduction and a German translation by Cassel, Berlin, 1848; קובץ מעשי ידי גאונים קדמונים, published by Rosenberg with notes and references by Cassel, Berlin, 1856; Index to De Rossi's "Dizionario Storico," Leipsic, 1846; the "Cuzari" of Judah ha-Levi, with a German introduction and translation and very numerous explanatory and critical notes, which fully testify to Cassel's erudition in Jewish-Arabic philosophy, Leipsic, 1840–53, Berlin, 1869 (in this work Cassel was assisted to some extent by H. Jolowicz); "Meor 'Enayim" of Azariah dei Rossi—a classical edition, Wilna, 1866; the Apocrypha, translated into German from the Greek, Berlin, 1864–71; "Die Pesach-Haggadah," with German introduction, translation, and critical notes (latest edition, Berlin, 1895); "Grammatik der Hebräischen Sprache" of H. Arnheim (died 1870), with introduction, notes, and additions by Cassel, Berlin, 1872.

Cassel further wrote pamphlets on questions of the day, such as "Woher und Wohin? Zur Verständigung über Jüdische Reformbestrebungen," Berlin, 1845; "Die Cultusfrage in der Jüdischen Gemeinde von Berlin," Berlin, 1856, a defense of his friend Michael Sachs against the attacks by the Orthodox; "Offener Brief eines Juden an Prof. Dr. Virchow," Berlin, 1869; and "Joseph Caro und das Buch Maggid Mesharim," published in the "Jahresbericht" of the Berlin Hochschule, Berlin, 1888, in which he proves, against Grätz, that this book was not written by Caro. Cassel is also the author of all the articles dealing with Judaism and Jewish literature in Brockhaus' "Konversations-Lexikon." He also wrote articles for the publications of the Society of Hebrew Literature of London.

Finally, it must be mentioned that Cassel, while still a young man, conceived the plan of publishing a Jewish encyclopedia containing everything of interest to Judaism. With the assistance of M. Steinschneider he composed the "Plan der Real-Encyclopädie des Judenthums," Krotoschin, 1844; but, inasmuch as Jewish studies were still in their infancy, the plan, though pursued for some time, could not be carried out.

Bibliography: For the great number of articles written by Cassel for Jewish and Christian magazines and encyclopedias (*e.g.*, the *Allgemeine Encyklopädie der Wissenschaften und Künste* of Ersch and Gruber) see Moïse Schwab, *Répertoire*, Paris, 1900, s.v. *Cassel*; S. Hochfeld, *David Cassel, Gedenk-Rede auf Seinen Heimgang*, Berlin, 1894; and especially H. Brody's pamphlet, *Toledot David Cassel*, Cracow, 1893.

s. H. M.

CASSEL, HARTWIG: Journalist and chess editor; born Nov. 2, 1850, at Konitz, West Prussia, where his father, Dr. Aaron Cassel, was rabbi. He was educated at the Real-Gymnasium in Landsberg on-the-Warta, and in 1879 went to England, where he began his journalistic career as the chess editor of the "Observer-Budget," Bradford, Yorkshire. He wrote chess articles for the metropolitan and provincial English papers, organized the Yorkshire County Chess Club, arranged the Blackburne-Günsberg match at Bradford (1887) and the International

Chess Masters' Tournament in 1888 at the same city. Cassel left England in 1889, and went to Havana for an English and New York newspaper syndicate to report the Tchigorin-Günsberg match. In 1890 he became chess editor of the New York papers, "The Sun" and the "Staats-Zeitung" (which appointments he still holds), and since then has contributed chess articles to most of the metropolitan journals. He was instrumental in establishing the "Staats-Zeitung" and Rice trophies, and arranged, among other important contests, the first cable chess match between the Manhattan and British chess clubs. He is the inventor of a chess cable code.

S. A. P.

CASSEL, JACOB: German physician; born at Schwerin-on-the-Warta, province of Posen, Prussia, May 25, 1859. He was educated at the universities of Berlin and Leipsic, from which latter place he was graduated as doctor of medicine in 1883. The same year he settled as a physician in Berlin, being assistant to Baginsky until 1890, when he opened a hospital for children. Cassel has contributed many essays to the "Archiv für Kinderkrankheiten" "Berliner Klinische Wochenschrift," "Deutsche Medizinische Wochenschrift," "Therapeutische Monatshefte," "Allgemeine Medizinische Centralzeitung," etc. Especially noteworthy is his "Ueber die Untersuchung Geistig Minderwerthiger Schulkinder," Berlin, 1901.

Bibliography: Pagel, *Biographisches Lexikon*, s.v., Vienna, 1901.

S. F. T. H.

CASSEL, PAULUS STEPHANUS (SELIG): Convert to Christianity and missionary to the Jews; born Feb. 27, 1821, in Gross-Glogau, Silesia; died Dec. 23, 1892, in Friedenau, near Berlin. His father was a sculptor, and his brother David was docent at the Berlin "Hochschule für die Wissenschaft des Judenthums." Cassel studied at the gymnasium at Schweidnitz and at the University of Berlin, where he followed with special attention the lectures of Leopold Ranke. In 1849 he edited in Erfurt "Die Constitutionelle Zeitung," and in 1850–56 "Die Erfurter Zeitung," in a royalist spirit. He was baptized May 28, 1855, in Buessleben, near Erfurt, and became librarian of the Royal Library and secretary of the Academy in Erfurt in the following year. He remained in Erfurt till 1859. Frederick William IV. bestowed the title of professor on Cassel in recognition of his loyal labors. In 1860 he removed to Berlin, where he was a teacher at a gymnasium for a short time, and occupied himself with literary work. In 1866–67 he was a Conservative member of the Prussian Chamber of Deputies.

Becomes a Missionary.

In 1867 Cassel was appointed missionary by the London Society for Promoting Christianity Among the Jews, a position which he retained till March, 1891. At the same time (1867) Cassel was assigned to the pastorate of the Christuskirche in Berlin, remaining in service for twenty-four years. In a pamphlet published a short time before his death, he complains of the inconsiderate treatment he had received at the hands of his Christian friends (see "Sendschreiben an Freunde in Deutschland und England über die Christuskirche in Berlin und Ihr Martyrium Durch die London Society," Berlin, 1891). H. L. Strack confesses that it is not clear what induced Cassel to join the Christian Church, though he contends that Cassel's reasons were obviously not mercenary (see Herzog-Hauck, "Real-Encyc." iii. 744). Cassel combated anti-Semitism with considerable warmth (in "Wider Heinrich von Treitschke für die Juden," Berlin, 1880; "Die Antisemiten und die Evangelische Kirche," 2d ed., Berlin, 1881; "Ahasverus, die Sage vom Ewigen Juden mit einem Kritischen Protest Wider Ed. von Hartmann und Adolf Stöcker," Berlin, 1885; also "Der Judengott und Richard Wagner, eine Antwort an die Bayreuther Blätter").

In his "Emancipation und Mission" Cassel endeavored to show that the Jews would obtain permanent relief from persecution not by civil enfranchisement, but through evangelization. In later years, however, he frankly receded from this view. De le Roi, the historian of Christian propaganda among the Jews, says that Cassel was animated by "a very decided Jewish spirit." In 1860 Cassel published a "History of the Jewish People Since the Destruction of Jerusalem," issued in Berlin by the "Gesellschaft zur Beförderung des Christenthums Unter den Juden." He exerted himself in the interest of proselytism among Jews. He stated his views on missionary work among them in a pamphlet: "Wie Ich über Judenmission Denke," Berlin, 1886; (see also "Nathanael," edited by H. L. Strack, 1897). From 1875 to 1889 he edited "Sunem, ein Berliner Wochenblatt für Christliches Leben und Wissen" (16 vols.). "Hallelujah, Einhundert und Acht und Achtzig Geistliche Lieder," is a collection of hymns reprinted from this journal. In 1847 Cassel wrote an earnest though somewhat fantastic study of Hungarian archeology, "Magyarische Alterthümer," which is still of value. Of especial interest is his translation (with notes) of the reply to Chisdai b. Isaac of Joseph, king of the Chazars (pp. 183 *et seq.*).

His History of the Jews.

His only methodic work is his history of the Jews from the destruction of Jerusalem to 1847 ("Juden [Geschichte]" in Ersch and Gruber, "Encyc." ii., part 27, pp. 1–238). This scientific treatment of Jewish history he wrote before his conversion; and it is signed "Selig Cassel." Jost, however, says of it: "It is one-sided and merely gives episodes out of the life of Jews in various countries. It is collated in a fragmentary manner, though rich in erudite notes" (see I. M. Jost, "Gesch. des Judenthums und Seiner Sekten," Section 3, p. 365, Leipsic, 1859). "Sabbathliche Erinnerungen" was also published before Cassel's conversion—the first part anonymously; the second (signed "S. C." in the preface) being put forth for the benefit of indigent veterans of 1813–15. Other publications of Cassel's are: "Wissenschaftliche Berichte, Unter Mitwirkung von Mitgliedern der Erfurter Akademie"; "Denkschrift der Königlichen Akademie Gemeinnütziger Wissenschaften in Erfurt, Herausgegeben am Sekulartage Ihrer Gründung, den 19. Juli, 1854"; "Irene, eine Sprachlich-Exegetische Skizze," Erfurt, 1855; "Der Mittler, ein Exegetischer Versuch zu Galater iii. 19, 20"; "Aus der Hagia Sophia, ein Akademisches Neujahrs-Programm"; "Ueber Thüringische Ortsnamen, Abdruck von Wissenschaftlichen Berichten der Erfurter Akademie"; "Dialoge über Wissenschaft und Christenthum." Essays with respect to Judaism, dating from this time, are the following: "Das Glaubensbekenntniss der Zenobia, Fürstin von Palmyra," in "Orient, Lit." 1841, Nos. 31 *et seq.*; "Der Apostat," *ib.* 1843, Nos. 18 *et seq.*; "Historische Versuche: Anmerkungen zu Benjamin von Tudela, Französische Städtenamen, Apologie," Berlin, 1847; "Die Rabbinerversammlung des Jahres 1650, eine Historische Abhandlung," Berlin, 1845. Other writings by Cassel with reference to Judaism and the Jews are the following: "Die Symbolik des Blutes und der Arme Heinrich von Hartmann von der Aue," Berlin, 1882; "Shylock, der Kaufmann von Venedig," in "Aus Literatur und Symbolik," pp. 368–386; "Caricaturnamen" in "Literatur und Geschichte, pp. 323–347; "Der Ewige Jude," in "G. S." i. 367–410; "Das Zicklein aus der Jüdischen Passahliturgie," in "Aus dem Lande des Sonnenaufgangs," pp. 1–16, Berlin, 1886; "Zur Naturgeschichte der Chuzpe," a reply to Fritz Mauthner's review of "Ahasverus," *ib.* pp. 89–100; an important treatise on medieval folk lore, and the contributions made thereto by Jews, is "Mischle Sindbad, Secundus Syntipas, Edirt, Emendirt und Erklärt; Einleitung und Deutung des Buches der Sieben Weisen Meister," 3d ed., Berlin, 1891.

Biblical Studies.

Cassel's Biblical studies are conservative; and it is surprising that he neglected to use the fund of rabbinical lore he undoubtedly possessed. In 1865 he wrote "Das Buch der Richter und Ruth" for J. P. Lange's "Theologisch-Homiletisches Bibelwerk." A second edition appeared in 1887, which was translated into English in 1872. In 1878 appeared "Das Buch Esther, ein Beitrag zur Gesch. des Morgenlandes, aus dem Hebräischen Uebersetzt, Historisch und Theologisch Erläutert," section 1, with an appendix, a translation of the Second Targum. The original text of the Second Targum Cassel published in "Aus Litteratur und Gesch." Berlin and Leipsic, 1885: "Zweites Targum zum Buche Esther, im Vocalisierten Urtext mit Sachlichen und Sprachlichen Erläuterungen Herausgegeben." An English translation by Aaron Bernstein was published in Edinburgh in 1888. This English edition also gives translations of several of Cassel's essays; viz., "Mithra" (pp. 345–361), "The Winged Bulls of Persepolis" (pp. 362–377), and "Zoroaster" (pp. 378–400). Most of Cassel's other literary work partakes of the character of controversy. His larger work on "Weihnachten, Ursprünge, Bräuche und Aberglauben, ein Beitrag zur Gesch. der Christlichen Kirche und des Deutschen Volkes," Berlin, 1861, is a medley of ingenious but unsystematized erudition, and is pervaded by a tone of pious emotionalism.

Altogether, Cassel's versatility has secured him merely the admiration of his contemporaries. He was incapable of acquiring a position of influence in the church of his adoption. His more general works are: "Vom Wege nach Damascus, Apologetische Abhandlungen," Gotha, 1872; "Aus Guter Stunde, Betrachtungen und Erinnerungen," Gotha, 1874; "Für Ernste Stunden, Betrachtungen und Erinnerungen," 2d ed., Berlin, 1881; "Aus Literatur und Symbolik," Leipsic, 1884; "Aus Literatur und Geschichte," Berlin and Leipsic, 1885; "Vom Nil zum Ganges, Wanderungen in die Orientalische Welt," Berlin, 1880; and "Das Leben des Menschen in Gesch. und Symbol," in "G. S." (only one volume published), Berlin, 1893. Besides, Cassel wrote a large number of pamphlets on theological, ethnological, and philological subjects.

S. L. Gr.

CASSIA: The term given as the translation for "ḳiddah" (Ex. xxx. 24; Ezek. xxvii. 19) and "ḳeẓi'ot" (Ps. xlv. 9). Ancient commentators agree in identifying the two. Onkelos to Ex. xxx. 24 renders "ḳiddah" by "ḳeẓi'ah"; Rashi does the same. Cassia belongs to the cinnamon group and resembles the ordinary species, though its fragrance is fainter. It is indigenous to Eastern countries, and in Biblical times was used along with myrrh and aloes both as a perfume (Ps. xlv. 9) and as an ingredient of the anointing-oil (Ex. xxx. 24). It formed one of the many commodities in which Tyre traded (Ezek. xxvii. 19).

J. Jr. G. B. L.

CASSIUS LONGINUS: Questor of Crassus in Syria in 53 B.C. After the unfortunate battle of Carrhæ, Syria, he became independent governor of the province, clearing it of the Parthians, and traversing all parts of the country in order to reestablish the fallen prestige of the Romans. Thus he came to Judea, where Pitholaus, a partizan of Aristobulus, had taken up arms against the Romans.

Cassius conquered the stronghold Tarichæa, killed the valiant Pitholaus at the instigation of Antipater, and carried away captive 30,000 Jews (Josephus, "Ant." xiv. 7, § 3; *idem*, "B. J." i. 8, § 9). He then went to Rome and was one of the conspirators against Julius Cæsar, who had appointed him pretor of Syria in 44. After Cæsar's murder he was sent as proconsul by the Senate in 43. Thus he came again to Judea, where, upheld by four Egyptian legions, he used his power to exact money from the Jews. The frightened Antipater quickly apportioned among the provinces the 700 talents of silver demanded by Cassius; and his son Herod was the first to pay his share. Malichus, however, the friend of Hyrcanus, seems to have hesitated, whereupon Cassius led away captive the inhabitants of the four cities Gophna, Emmaus, Lydda, and Thamma, and would have also killed Malichus, had not Hyrcanus appeased him with 100 talents ("Ant." xiv. 11, § 2; according to "B. J." i. 11, § 2, it was Antipater).

The Jews captured by Caius Cassius, as he is called, were liberated by a decree of Mark Antony ("Ant." xiv. 12, § 3), and it was ordered that Cassius' other depredations be repaired (*ib.* 12, § 5). During the war of Cassius and Brutus against Octavius Cæsar and Antony, Cassius, who was at that time in Syria, sought to gain the support of Herod by promising him the kingdom of Judea; Malichus was urged to poison Antipater ("Ant." xiv. 11, § 4; "B. J." i. 11, § 4). While Herod took the part of Cassius and the republicans, Malichus was looking forward to the victory of the Cæsarean party; so that it was in the interest of Cassius that Herod had the murderer of his father assassinated at Tyre, the old and weak Hyrcanus being induced to believe that the deed was instigated by Cassius ("Ant." xiv. 11, § 6; "B. J." i. 11, § 8). The anti-Herodian party joined issue with a certain Marion whom Cassius had left behind as master of Tyre; Herod, however, vanquished his enemies ("Ant." xiv. 11, § 7; 12, § 1; "B. J." i. 12, § 2) and thus put an end to Cassius' rule in Judea. Cassius soon after slew himself in the battle of Philippi, 42 B.C. ("B. J." i. 14, § 3).

G. S. Kr.

CASSUTO, JUDAH: Ḥazan of the Portuguese-Jewish community of Hamburg; born in Amsterdam 1808; died at Hamburg March 10, 1893. In 1827 he was elected ḥazan of the Portuguese-Jewish community, a post which he held until his death. Cassuto was not only cantor, but also spiritual chief of the congregation, and was entitled to act as rabbi at the solemnization of marriages among its members. He was a very learned man, and possessed a thorough knowledge of many modern languages. His lay occupation was that of teacher and translator. In 1843 Cassuto was appointed sworn interpreter and translator to the city of Hamburg. As a teacher he was active up to the hour of his death, which occurred suddenly. Until 1894, when a successor to Cassuto was chosen, the Portuguese congregation had no spiritual chief, marriages being solemnized by the rabbi of the German congregation.

Bibliography: *Jewish Chronicle*, London, March 17, 1893.

CASTANHO, ABRAHAM: Spanish poet; lived at Amsterdam in the middle of the seventeenth century. He was the author of an elegy on the martyr Abraham Nuñez of Bernal, who was burned at Cordova May 3, 1655. It was inserted in "Elogios que Zelosos Dedicaron á la Felice Memoria," etc., published probably at Amsterdam in 1656.

Bibliography: Wolf, *Bibl. Hebr.* iii., Nos. cxlix. *et seq.*; Kayserling, *Sephardim*, p. 262; idem, *Bibl. Esp.-Port.-Jud.* p. 35; Fürst, *Bibl. Jud.* i. 148.

G. I. Br.

CASTEL D'AJANO, SAMUEL DI: Italian physician and philosopher; lived at Mantua in the sixteenth century. A philosophical work of his on the articles of belief, entitled "Meor ha-Golah" (The Light of the Exile), is still extant in manuscript (Michael, "Or ha-Ḥayyim," No. 383). Castel d'Ajano is supposed to be the author of the liturgical poem לנועם שביה עניה ("For the Comfort of a Poor Captive"), which bears the signature שמואל הרופא (Roman Maḥzor, ii. 162b). He shows considerable knowledge of the Talmud in a casuistical note on a passage in R. Nissim's commentary on Megillah, which is still extant in manuscript (Neubauer, "Cat. Bodl. Hebr. MSS." No. 911, 8b).

It is likely that Samuel di Castel d'Ajano is identical with Samuel Castiglione, who, at the same epoch, practised as a physician at Mantua, and was also a liturgist (compare Zunz, "Literaturgesch." p. 417).

Bibliography: Luzzatto, *Mebo*, p. 34; Mortara, *Indice*, s.v.

G. I. Br.

CASTEL-BRANCO, JOEL RODRIGO. See Juan Rodrigo.

CASTEL-SARASSIN (Hebrew, קאשטיל שאראזין or קשטיל שרזין): Chief town of the department of Tarn-et-Garonne, France. A somewhat important Jewish community existed here in the Middle Ages. When attacked by the Pastoureaux in 1320, all the Jews except two killed one another, in order not to fall into the hands of their enemies, and these two subsequently threw themselves from the tower. The author of "Shebeṭ Yehudah" estimates the number of the martyrs to have been 200; but Grätz, following the Latin works that place the tragedy at Verdun, a city on the Garonne, considers 500 to be a more exact estimate.

Bibliography: Ibn Verga, *Shebeṭ Yehudah*, ed. Wiener, p. 5; Joseph ha-Kohen, *'Emeḳ ha-Baka*, p. 73, Cracow, 1895 (trans. Wiener, p. 48); Grätz, *Gesch. der Juden*, vii. 296.

G. S. K.

CASTELLACCIO DA ASOLA: Locality near Mantua, Italy, where there was a great slaughter of Jews in 1547. Gershon Cantarini, the ancestor of the celebrated family of that name, was born there in 1546.

Bibliography: Osimo Marco, *Narrazione della Strage Compiuta nel 1547 contro gli Ebrei di Asolo.*

J. I. E.

CASTELLAZZO: Italian-Jewish family which settled at the beginning of the sixteenth century in Cairo, where several members occupied the rabbinate with distinction. The most important were the following:

1. **Jehiel Castellazzo** (called **Ashkenazi** to signify that he was not by birth an Oriental): Rabbi at Cairo in the sixteenth century. He was a contemporary of Joseph Caro, whom he severely criticized on account of a Halakah.

2. **Moses Castellazzo:** Lived during the seventeenth century. He is eulogistically mentioned in the responsa of Meïr Boton.

3. **Moses dal Castellazzo** (whose name has been misread by copyists as "Moses Kastilin"): Portrait-painter; lived at Venice in the fifteenth and sixteenth centuries. He is highly praised by David Reubeni in his memoirs for having befriended the latter on his arrival in Venice from Arabia in 1524. Moses' reputation as an artist extended far beyond the limits of the ghetto of Venice; indeed, he was known throughout Italy. In 1521, in recognition of his great talent, the Council of Venice granted him the privilege of selling his artistic illustrations of the Pentateuch.

4. **Moses ha-Kohen Abigdor Castellazzo:** Son of Simeon (No. 5); was rabbi at Salonica, Rhodes, Damascus, and Cairo in the seventeenth century. In Cairo he was the colleague of Aaron b. Ḥayyim. He was almost ninety years old at his death.

5. **Simeon ben Jehiel Castellazzo:** Rabbi at Cairo; died May, 1588. He was well versed in the Cabala, and was renowned for his great piety. Conforte reports that he had seen a decision emanating from Joshua Soncin, rabbi of Constantinople at the time of Joseph Nasi, in which Soncin invokes the authority of Simeon ben Jehiel. Both Conforte and Joseph Sambari assert that Simeon wrote two

works: (1) a collection of responsa, and (2) "Megillot Setarim," a commentary, probably cabalistic, on the Book of Esther. Azulai mentions as many as eighty responsa by Simeon.

BIBLIOGRAPHY: Azulai, *Shem ha-Gedolim*, ed. Benjacob, i. 43; Conforte, *Ḳore ha-Dorot*, ed. Cassel, p. 40; Sambari, in Neubauer, *Anecdota Oxoniensia*, i. 159; Kaufmann, in *Rev. Etudes Juives*, xxiii. 139 *et seq.*

G. I. BR.

CASTELLI, DAVID: Italian scholar; born at Leghorn, Tuscany, Dec. 30, 1836; died 1901. He was educated at the rabbinical college of Leghorn, and from 1857 to 1863 was teacher of Hebrew and Italian in the Jewish schools of that city; then he became secretary of the Jewish congregation in Pisa, where at the same time he was a private teacher. From Jan., 1876, until his death he occupied the chair of Hebrew at the Istituto di Studi Superiori Pratici e di Perfezionamento in Florence.

Of Castelli's numerous works and essays the following may be mentioned: "L'Ecclesiaste, Traduzione e Studio Critico," Pisa, 1866; "Leggende Talmudiche, Traduzione con Prefazione Critica," *ib.* 1869; "Il Messia Secondo gli Ebrei," Florence, 1874; "Il Diritto di Testare nella Legislazione Ebraica," *ib.* 1878; "Della Poesia Biblica," *ib.* 1878; "Il Commento di Sabbatai Donnolo al Libro della Creazione, Testo Ebraico con Note Critiche e Introduzione in Ebraico e in Italiano," *ib.* 1880, in "Pubblicazioni del Regio Istituto di Studi Superiori"; "La Profezia nella Biblia," *ib.* 1882; "La Legge del Popolo Ebreo nel suo Storico Svolgimento," *ib.* 1884; "Storia degli Israeliti Secondo le Fonti Bibliche Criticamente Esposte," 2 vols., Milan, 1887-88; "Il Cantico dei Cantici, Studio Esegetico, Traduzione e Note," Florence, 1892; "Ammaestramenti del Vecchio e del Nuovo Testamento, Raccolti e Tradotti," *ib.* 1896; "Il Poema Semitico del Pessimismo (Il Libro di Job), Tradotto e Commentato," *ib.* 1897; "Gli Ebrei, Sunto di Storia Politica e Letteraria," *ib.* 1899.

S.

CASTELLO (CASTILHO), ABRAHAM ISAAC: Rabbi, preacher, and poet; born at Ancona 1726; died at Leghorn Aug. 1, 1789. At the age of thirteen he arrived, poor and destitute, in Leghorn, where, although he had previously intended to become a mechanic, his agreeable voice induced him to prepare himself to become a cantor. After the death of Adam Bondi, cantor of the Jewish congregation in Leghorn, whose daughter he had married, he became his successor. He then, with indefatigable diligence, devoted himself to the study of the Hebrew and Spanish languages, and to rabbinical science, and was soon advanced to the position of rabbi and preacher, in which capacity he so greatly distinguished himself that even Christian scholars delighted to discuss with him religious and philosophical topics. Castello is probably the Jewish scholar with whom Lessing conversed during his scientific tour in the company of Duke Leopold of Brunswick, and, on hearing whom, the duke is said to have exclaimed in astonishment, "Here we have one even greater than Mendelssohn—of far purer metaphysics."

Castello was the author of the following writings, all published at Leghorn: "Ḳol Millin," an allegorical drama in celebration of the wedding of Aaron Ergas and Deborah da Costa (1765); "Oracion Doctrinal" (1753); "A Memorial Sermon on the Death of Francis I. of Germany" (1765), written in Spanish, and translated by Castello's son Joseph into Italian. Besides these there were several occasional poems in Hebrew published by Sal. MICHELL in "Composizioni Poetichi" (1788), and by A. B. Piperno in the collection "Ḳol 'Ugab" (1846).

L. G. M. K.

CASTELLO (CASTELO), JACOB (ANTONIO): Poet at Amsterdam; died after 1684. He was a member of several academies of poetry in his native city, and was noted for his riddles. He is the author of verses on the "Coro de las Musas" of Miguel de BARRIOS, and the "Rumbos Peligrosos" of Joseph PENSO.

G. M. K.

CASTELLO (CASTILHO), JOSEPH: Physician; born at Leghorn about 1746; son of Abraham Isaac. After studying medicine at Pisa, he returned to his native city, where he soon acquired a reputation as a physician. A medical work written by Castello and dedicated to the archduke (afterward Emperor Leopold II.), did not appear until after his death, which occurred while he was still in the prime of manhood. Castello's brother Samuel was an eminent physician at Leghorn, and his son Abraham Isaac a lawyer and poet in the same city.

CASTELLON DE LA PLANA, or **DE BURRIANA:** City of Valencia. In 1320 the Jews of Castellon obtained permission to lay out a cemetery; and in 1432 to build a new synagogue. In 1391, in contradistinction to most of the other cities of Spain, at Castellon the magistrates protected the Jews from violence. In 1459 thirty-one Jewish families were living here. When in 1492 the Jews were compelled to leave Castellon, the city council demanded an indemnity for the taxes which the city would lose by their departure.

G. M. K.

CASTELNUOVO, SAMUEL DI: Secretary of the Jewish community of Rome; lived at the end of the sixteenth century and at the beginning of the seventeenth. He edited and probably translated into Italian: (1) Judah ha-Levi's piyyuṭ, "Mi kamoka," Venice, 1609, recited on the Sabbath preceding the Feast of Purim; (2) Moses Rieti's liturgic work, "Ma'on ha-Shoalim," Venice, 1609. The name of Castelnuovo occurs also in a halakic decision of Reggio on the ritual bath, inserted in "Mashbit Milḥamot," fol. 92.

G. I. Br.

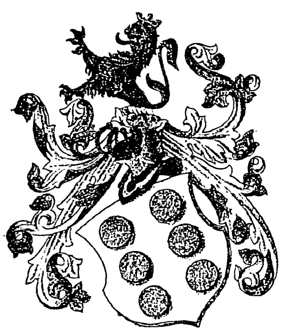
CASTLES. See Defense.

CASTRO, ADOLF DE: Spanish historian; member of the Academia de la Historia of Madrid; lived in Cadiz; died there Oct., 1898. He wrote the first short history of the Jews in Spain, based on careful studies; and this was so impartial and dispassionate that he found it necessary to assure his readers (p. 8): "Escribo esta historia sin pasion, ni artificio, como de cosas que nada me tocán. Ni soi judio, ni vengo de judaizantes" (I write this history dispassionately and without craft, as concerning things that do not touch me. I am not a Jew, nor am I of Jewish descent. De Castro's book was published under the title, "Historia de los Judios en España, desde los Tiempos de su Establecimiento hasta Principios del Presente Siglo," Cadiz, 1847; and was translated into English by Rev. Edward D. G. M. Kirwan, Cambridge, John Deighton, 1851.

Unlike J. Amador de los Rios, who, after him, treated the history of the Jews in Spain, De Castro condemned the Inquisition: "Pues los monarcas bien podran regir con las leyes de la fuerza los cuerpos de sus vasallos; pero no podrán sujetar los animos" (For monarchs can indeed command by forcible laws the bodies of their subjects, but can not subdue their souls).

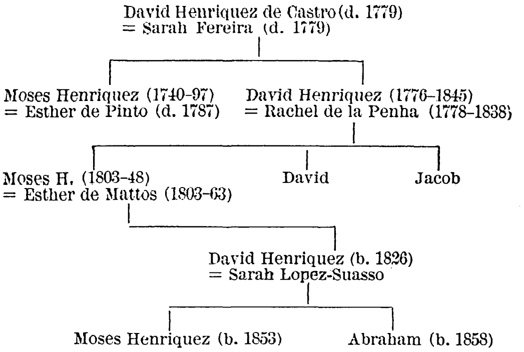
S. M. K.

CASTRO, DE, FAMILY: The various branches of this family are all of Spanish and Portuguese origin. Soon after the establishment of the Inquisition, members of the family emigrated to Bordeaux, Bayonne, Hamburg, and other cities in the Netherlands, and later, in the United States; to-day their descendants are found scattered throughout Turkey, Egypt, Holland, Germany, England, and Italy. Some branches of the family have continued to bear the simple name of "De Castro"; others are known by the following names: De Castro-Osorio; De Castro Sarmento; De Castro-Castello-Osorio; Pereira de Castro; De Castro Vieira de Pinto; Rodriguez de Castro; Orobio de Castro; De Castro de Paz; Henriquez de Castro, etc.



Arms of De Castro Family.

Among the members of this family, of some of whom a more detailed account will be found below, are the following: Aaron de Castro, or Crasto, parnas, Amsterdam, 1834; Abraham de Castro, who was among the Jews who returned to Amsterdam from Brazil when that country was lost to the Hollanders in 1654 ("Publ. Am. Jew. Hist. Soc." iii. 17); Abraham Nahamias de Castro, London, 1769; Dr. Baruch de Castro, Amsterdam, 1597–1684; Daniel de Castro, brother of Baruch; Daniel Gomez de Castro, parnas, Amsterdam, 1772; Dr. Ezekiel de Castro, Verona, 1639; Imanuel de Imanuel Nahmias de Crasto, parnas, Amsterdam, 1773; Dr. Isaac de Castro, surgeon, Amsterdam, 1683; Joseph Mendes de Castro, London, 1694; Mordecai de Castro, Amsterdam, 1650; Moses Gomez de Castro, parnas, *ib.*, 1784; Nissim de Castro, Constantinople, nineteenth century; Pedro Fernandes de Castro, alias Julio Fernandez de Castro of Valladolid, son-in-law of Simon Vaez "Publ. Am. Jew. Hist. Soc." iii. p. 57), Los Valles, Mexico; as a Judaizing heretic, Pedro Fernandez became reconciled in 1647 (*ib.*, vii. 4); Dr. Rodrigo de Castro, 1550–1629; Dr. Jacob de Castro-Sarmento, F.R.S., 1691–1761; David de Abraham de Castro-Tartas (often spelled "de Crasto)," noted printer in Amsterdam, seventeenth century. The only branch of the family of which it is possible to make a definite pedigree is the Dutch, as follows:



David Henriquez de Castro (d. 1779)
= Sarah Fereira (d. 1779)
Moses Henriquez (1740–97)
= Esther de Pinto (d. 1787)
David Henriquez (1776–1845)
= Rachel de la Penha (1778–1838)
Moses H. (1803–48)
= Esther de Mattos (1803–63)
David
Jacob
David Henriquez (b. 1826)
= Sarah Lopez-Suasso
Moses Henriquez (b. 1853)
Abraham (b. 1858)

J. H. Gut.—M. K.

Abraham de Castro: Master of the mint and farmer of the coinage for Sultan Sulaiman, in Cairo, Egypt, in the sixteenth century. Through his wealth and benevolence—he gave away 3,000 gold florins a year in alms—he acquired great influence among the Turkish officials, and was highly esteemed by his coreligionists, in whose affairs he took an active interest. When in 1524 Aḥmad, who had been appointed pasha of Egypt as a reward for his exploits at the capture of Rhodes in 1523, plotted to establish himself as an independent sovereign, and asked De Castro to mint the coins with his name in lieu of the sultan's, De Castro secretly left Egypt and hastened to Constantinople to inform the sultan of Aḥmad's plot. The sultan received him with high honors and gave him costly presents.

Aḥmad avenged De Castro's flight on the Jews; he imprisoned several of them, probably relations of De Castro, and imposed exorbitant taxes upon the community, with heavy penalties in case of non-payment. De Castro returned to Egypt after Aḥmad's execution; but the anxiety of the Jews was allayed only by the granting of a firman at the instance of De Castro. In commemoration of this deliverance in 1524, the Egyptian Jews for a long time celebrated the 27th or 28th of Adar, as a memorial day, with special festivities (Egyptian or Cairo Purim); see AḤMAD-PASHA.

D. M. K.

Balthazar (Isaac) Orobio de Castro: Philosopher, physician, and apologist; born at Braganza, Portugal, about 1620; died at Amsterdam Nov. 7, 1687. While still a child, he was taken to Seville by his parents, who were Maranos. He studied philosophy at Alcalá de Henares and became teacher of metaphysics at the University of Salamanca. Later he devoted himself to the study of medicine, and became a popular practitioner in Seville, and physician in ordinary to the duke of Medina-Celi and to a family nearly related to the king.

When married and father of a family, De Castro was, at the instigation of a servant whom he had punished for theft, denounced to the Inquisition as an adherent of Judaism, and thrown into a dark and narrow dungeon, where he remained for three years, subjected to the most frightful tortures. As he persistently denied the charge, he was finally released, but compelled to leave Spain and to wear the sanbenito, or penitential garment, for two years. He thereupon went to Toulouse, where he became professor of medicine at the university, at the same time receiving from Louis XIV. the title of councilor; but, weary at last of hypocrisy and dissimulation, he went to Amsterdam about 1666, and there made a public confession of Judaism, adopting the name "Isaac." In that city De Castro continued the practise of medicine, and soon became a celebrity, being elected to membership in the directory of the Spanish-Portuguese congregation and of several academies of poetry. Esther, his wife, died July 5, 1712.

Orobio de Castro was a very prolific writer. His work entitled "Certamen Philosophicum Propugnatæ Veritatis Divinæ ac Naturalis Adversus J. Bredenburgi Principia" was published at Amsterdam, 1684, 1703, 1731. This work, in which De Castro attacks the ethics of Spinoza, with whom he maintained a friendly correspondence, was translated into Spanish under the title "Certamen Philosophico, Defiende la Verdad Divina y Natural Contra los Principios de Juan Bredenburg," by G. de la Torre, The Hague, 1741. All the other writings of De Castro, like the foregoing translation, are still extant in manuscript. They are: "Prevenciones Divinas Contra la Vana Ydolatria de las Gentes" (Libro ii., "Contra los Falsos Misterios de las Gentes Advertidas a Ysrael en los Escritos Propheticos"); "Explicação Paraphrastica sobre o Capitulo 53 do Propheta Isahias. Feito por hum Curiozo da Nação Hebrea em Amsterdam, em o mez de Tisry anno 5433" (compare Neubauer, "The Fifty-third Chapter of Isaiah," pp. 21-118, London, 1876); "Tratado em que se Explica la Prophesia de las 70 Semanas de Daniel. Em Amsterdam à 6 Febrero anno 1675," a paraphrastic explanation of the 70 weeks of Daniel; "Epistola Invectiva Contra un Judio Philosopho Médico, que Negava la Ley de Mosse, y Siendo Atheista Affectava la Ley de Naturaleza." This is identical with "Epistola Invectiva Contra Prado, un Philosopho Medico, que Dubitava, o no Creya la Verdad de la Divina Escritura, y Pretendió Encubrir su Malicia con la Affecta Confacion de Dios, y Ley de Natureza," a work directed against Juan de Prado, a physician and author of Picardy who resided in Amsterdam. Long after De Castro's death a Jew by the name of Henriquez published an alleged work of his in French under the title "Israel Vengé," claiming it to have been originally written in Spanish (London, 1770). It has been translated into English by Grace Aguilar (London, 1839). De Castro's discussions on Christianity with the Dutch preacher Philipp von Limborch were published by the latter in the work entitled "De Veritate Religionis Christianæ Amica Collatio cum Erudito Judæo," Amsterdam, 1687.

G. M. K.

Benedict, (Baruch) Nehamias de Castro: Physician in ordinary to Queen Christina of Sweden, and writer on medicine; born at Hamburg in 1597; died there Jan. 31, 1684. He attended the gymnasium of that city in 1615, received preparatory instruction in medicine from his father, Rodrigo de CASTRO, and later prosecuted this study at several universities. After his graduation at Padua (or at Franeker), he began to practise in Hamburg (1622), acquiring such fame that in 1645 he was appointed physician in ordinary to the queen of Sweden. De Castro was for some time president of the Portuguese-Jewish congregation at Hamburg, and was a zealous adherent of Shabbethai Ẓebi. He was twice married. In his old age he was reduced to such poverty that he was compelled to sell his library and furniture, to obtain the means of subsistence. This "vir humanissimus," as Hugo Grotius calls him, was interred in the cemetery of the Portuguese congregation at Altona. The tombstone erected by his relatives bears the following inscription:

> "Do Benaventurado muy insigne Varão
> o Doutor Baruch Nahamyas de Castro
> faleczo em 15. Sebat año 5444.
> Sua alma gloria."

De Castro, under the pseudonym "Philotheo Castello," was the author of the following works: (1) "Flagellum Calumniantium, seu Apologia in qua Anonymi Cujusdem Calumniæ Refutantur, Ejusdem Mentiendi Libido Detegitur," Amsterdam, 1631, a polemical work, in which the author defends physicians of Portuguese origin against the malicious attacks of a certain Joachim Curtius. It is said to have been published at Antwerp in 1629, under the title "Tratado da Calumnia em o qual Brevemente se Mostram a Natureza, Causas e Effeitos deste Pernizioso Vicio." (2) "Monomachia sive Certamen Medicum, quo Verus in Febre Synocho Putrida cum Cruris Inflammatione Medendi Usus per Venæ Sectionem in Brachio . . . ." Hamburg, 1647, a work dedicated to Queen Christina.

Daniel (Andreas) de Castro: Physician; born in Hamburg 1599; younger brother of Baruch Nahamias, with whom he attended the gymnasium and studied medicine. He was physician in ordinary to King Christian IV. of Denmark, and lived at Glückstadt.

Bibliography: Kayserling, in *Monatsschrift*, ix. 97; idem, *Bibl. Esp.-Port.-Jud.* p. 36.

G. M. K.

David Henriques de Castro: Numismatist and author; born at Amsterdam, 1832; died there Oct. 10, 1898; son of Moses Henriques de Castro. He was a man of much learning, member of the board of directors of the Portuguese synagogue at Amsterdam, and president of the committee of the Portuguese Jews of the Netherlands. He possessed a rare collection of old coins and art treasures, and a library rich in Spanish and Portuguese manuscripts and printed works dealing with the history of the Jews, an elaborate catalogue of which appeared shortly after his death, under the title "Catalogue . . . de la Succession de Feu M. D. Henriques de Castro," Amsterdam, 1899 (with illustrations). The whole collection was sold at auction in April, 1899. De Castro was appointed knight of the Order of the Immaculate Conception by the king of Portugal. He was a member of the Royal Archeological Society at Amsterdam, the Netherlands Literary Society at Leyden, and the Zeeland Society of Arts and Science at Middelburg.

De Castro took a keen interest in the history of the Spanish-Portuguese congregation of Amsterdam, in the renowned men identified with it, notably Spinoza, and in the inscriptions on the tombstones of the old cemetery at Oudekerk. He laid bare an entire section of this old burial-ground and unearthed costly tombstones. He was also interested in the Jewish cemetery at Middelburg near Flushing, where he resided for some time. The results of his investigations are embodied in the following works: "De Synagoge der Portugeesch-Israelitische Gemeente te Amsterdam," 1675–1875, published on the occasion of its bicentenary; "Keur van Grafsteenen op de Nederl.-Portug.-Israel. Begraafplaats te Oudekerk aan den Amstel," Leyden, 1883 (text in both Dutch and German). De Castro was a contributor to several periodicals, such as the "Israelitische Weekblad."

Bibliography: *Jew. World*, London, April 21, 1899; *Jew. Chron.* London, Oct. 21, 1898.

G. M. K.

Ezekiel de Castro: Physician; born in Portugal in the early part of the seventeenth century. After completing his studies at Coimbra, he began the practise of medicine at Verona in 1639. Barbosa ("Bibl. Lusit. i. 767") calls him "insigne medico e subtil filosofo." De Castro possessed some knowledge of Jewish literature. He was the author of the following works on medicine: "De Colostro," about 1639; "Ignis Lambens, Historia Medica, Prolusio Physica, Rarum Pulchrescentis Naturæ Specimen," Verona, 1642, in which he refers at times to Biblical and Talmudic matters (a work entitled "De Igni Lambente in Deserto" was published by Pedro de Castro in the same year at Verona); "Amphiteatrum Medicum in quo Morbi Omnes Quibus Imposita Sunt Nomina ab Animalibus Raro Spectaculo Dibellantur," Verona, 1646.

Bibliography: Kayserling, in *Monatsschrift*, x. 38 *et seq.*; idem, *Bibl. Esp.-Port.-Jud.* p. 36.

G. M. K.

Felix de Castro: Spanish physician; lived at Agramunt in the first quarter of the eighteenth century. On Nov. 30, 1725, he was condemned by the Inquisition to imprisonment for life for Judaizing. A similar sentence had previously been imposed upon the following members (all physicians) of the De Castro family: Alvarez de Castro of Pontevedra, aged twenty-five, sentenced Sept. 21, 1722, at Santiago; Joseph de Castro of Madrid, aged forty-nine, and Simon de Castro of Badajoz, aged twenty-five, sentenced Nov. 30, 1722, at Llerena. To these may be added the following, who were condemned by the Toledo Inquisition: Manuel de Castro of Madrid (1561), Teresa de Castro (1485), Francisco de Castro (1625), Jorge de Castro (1664), Ana de Castro, wife of Rodriguez Mercado (1676); Ines de Castro, wife of Luis Cardoso (Toledo, 1679); Catalina de Castro, wife of Balthazar de Castro of Guadalajara (1691).

Bibliography: Kayserling, in *Monatsschrift*, x. 38.

G. M. K.

Hananeel de Castro: English communal worker; son of Mosseh and Judith de Castro; born at London Oct. 16, 1794; died March 23, 1849. During 1817–18 he served with the English volunteers in Barbados, and soon after returned to London, where, in Dec., 1828, he married his cousin, Deborah de Jacob Mendes da Costa.

In London De Castro at once took an important part in the communal life of the Bevis Marks synagogue. At the time of the blood accusation at Damascus (1840) he was president of the board of deputies of the British Jews, and was among the first to urge Sir Moses Montefiore's journey to the East. About the same period (Jan. 20, 1845) he laid the foundation of Sussex Hall, consisting of a library and lecture hall, which was the first Jewish literary institution in London.

During the bitter controversies following the promulgation of the ḥerem against the Reform synagogue in 1841, Hananeel de Castro strove unceasingly to bring about a reconciliation. Finally, March 9, 1849, a few weeks before his death, he secured the repeal of the ḥerem in so far as it applied to Ascama No. 1.

Bibliography: M. Gaster, *Bevis Marks Synagogue*, pp. 175–176.

J. M. W. L.

Isaac de Castro: Author; lived probably in Amsterdam about 1612; wrote the extremely rare work "Sobre o Principio e Restauração do Mundo," A. de 14 de Adar, 5372.

Bibliography: Kayserling, *Bibl. Esp.-Port.-Jud.* p. viii.

Isaac de Castro: Talmudist; born in Egypt about 1630; son of Jacob de Castro. He was distinguished for his Talmudic learning, and accumulated considerable wealth.

Bibliography: Conforte, *Ḳore ha-Dorot*, p. 50a.

G. M. K.

Isaac de Castro: Turkish printer; progenitor of the De Castro family of Constantinople; born at Venice in 1764; died at Constantinople in 1845. He founded an important printing-establishment in the latter city. In 1815 he was commissioned by the government of the sultan Mahmud II. to organize the national Ottoman printing-office. Of keen mind and exemplary probity, and being a great benefactor of his coreligionists, he was universally esteemed, and was decorated by the sultan Mahmud with the Order Nishan-Iftikhar. He was an English subject. At his death he left one daughter, Dolceta, and six sons, Abram, Jacques, Moses, Nissim, Joseph, and Léon.

S. M. Fr.

Jacob de Castro: First Jew born in Hamburg (1600); died there at the age of ninety-nine. He was a brother of Benedict and Daniel de Castro.

Bibliography: Kayserling, in *Monatsschrift*, ix. 98.

G. M. K.

Jacob de Castro (מהר"י"קש): Rabbinical authority; lived in Egypt; died there in 1610. He was a nephew—not a son—of the master of the mint, Abraham de Castro. On a pilgrimage to Safed he was the guest of Joseph Caro, by whom he was highly esteemed. De Castro corresponded among other of his contemporaries with Samuel de Medina, and was the author of the following works, which were published after his death: "'Erek Leḥem" (An Order of Bread), novellæ and notes to the four legal codes, Constantinople, 1718; "Ohole Ya'aḳob" (Tents of Jacob), ritual decisions, Leghorn, 1783; "Ḳol Ya'aḳob" (Voice of Jacob), derashot on the Pentateuch (cited by Azulai as manuscripts), Constantinople; "Nazir," and a number of similar writings on Talmudic subjects, published by Jacob Ḥagis in his "Halakot Ḳeṭanot," Venice, 1704.

G. M. K.

Jacob de Castro: Comedian; born in London Jan. 14, 1758; died after 1815; son of a Hebrew teacher. He was intended in his youth for the Jewish ministry, and, with this in view, attended the various scholastic institutions of the Portuguese synagogue. But he showed an early predilection for the stage, at the age of fifteen arranging plays and farces in commemoration of Purim. He first appeared at the Theater Royal, Covent Garden, in 1779, in a farce; then at the Royal Circus, at the Haymarket, in 1785. In 1786 he engaged with Philip Astley in the latter's "Amphitheater and Ambigu-Comique," remaining with him for a number of years, and performing in a long list of burlesques, musical farces, and pantomimes. He was the chief of a small body of performers who were colloquially spoken of as "Astley's Jews." In 1803 De Castro became manager of the Royalty Theater, but later returned to Astley, with whom he remained until his death, appearing frequently in his amphitheater in Dublin.

Bibliography: R. Humphreys (editor), *Memoirs of Jacob de Castro*, London, 1824; *Jew. Chron.* May 26, 1893. His portrait by Stanfield was engraved and published by Sherwood.

J. G. L.

Jacques de Castro: Turkish physician; son of Isaac de Castro; born in 1802; died in 1876. After finishing his medical studies at Paris, he was appointed by the sultan 'Abd al-Majid head physician of the military hospital at Constantinople. Castro was made a senator by Sultan 'Abd al-Aziz, and was appointed by Sultan Abd al-Ḥamid his consulting physician, receiving the Order of the Medjidie.

S. M. Fr.

Leon Ḥayim de Castro: Editor of the Spanish (Ladino) periodical, published at Constantinople in 1853, under the title "Or Yisrael," "La Luz de Israel."

G. M. K.

Moses de Castro: Rabbinical authority (presumably a pupil of Berab); lived in the sixteenth century. He was distinguished by great learning and ascetic piety. At first the head of a Talmudic school in Cairo, he settled later (about 1530) in Jerusalem. When Jacob Berab, rabbi of Safed, sought to invest the ordination of rabbinical judges with a higher authority, and to reestablish in Palestine a kind of Sanhedrin with himself as president, it was Moses de Castro and Levi b. Ḥabib who successfully opposed the movement.

Moses Orobio de Castro: Son of Balthazar (Isaac) Orobio de Castro, and a popular physician in Amsterdam.

G. M. K.

Nissim de Castro: Author of a Ladino textbook on astronomy, published at Constantinople 1850, entitled, "Una Mirada á los Cielos, ó la Puerta de la Astronomia."

Bibliography: Kayserling, *Bibl. Esp.-Port.-Jud.* p. 36; Franco, *Essai sur l'Hist. des Israélites de l'Empire Ottoman*, p. 242.

G. M. K.

Rodrigo de Castro: Physician; born 1550 at Lisbon; died at Hamburg, date disputed, but probably 1627. Several members of his family were physicians of some reputation, his uncle Emmanuel Vaëz having attended four kings of Portugal.

Castro studied medicine at Evora and Salamanca, and, after receiving there the degrees of doctor of philosophy and of medicine, he practised at Lisbon. Philip II. requested him on the completion of his studies to make a journey to East India, for the purpose of collecting medicinal herbs and studying them scientifically; but the request was refused. In order to escape the persecutions of the Inquisition, Castro settled in Antwerp with his wife, Katharina Rodriguez, and their two children. Here, by effecting some fortunate cures, he soon won high esteem; but when the Spanish reëstablished themselves in the Netherlands, considering himself insecure, he left Antwerp, probably living in northern Holland for several years, until his countryman and colleague, possibly also relative, Henrico Rodriguez, induced him to make Hamburg his permanent home (1594). When the plague broke out in that city in 1596, Castro distinguished himself by self-sacrificing devotion. He wrote a treatise on the plague and dedicated it to the Senate. Though he did not hold the office of "Medico del Senado" or city physician, as Daniel Levi de Barrios states in his "Relacion de los Poetas y Escritores Españoles," p. 55, he was a very popular and active physician, and was frequently summoned by the magnates of neighboring countries, among whom were the king of Denmark, the landgrave of Hesse, the count of Holstein, and the archbishop of Bremen.

During Castro's first years in Hamburg he did not avow himself a Jew; but the first list of Portuguese Jews published in the city council makes mention of Dr. Rodrigo de Castro "together with his wife, two full-grown sons, and other small children." After the death of his wife (1603), who, since there was no Jewish cemetery in Hamburg-Altona, was buried either in the Christian cemetery or in the place obtained by Castro "within the pale of the Church," he married again. For almost fifty years, thirty-five of which were spent at Hamburg, he acted as the friend and helper of suffering humanity, being styled "master of his art," "famous physician," and "prince of medicine of his time." He was buried in the cemetery of the Jewish-Portuguese congregation at Altona.

The following works of Rodrigo de Castro appeared in print: "Tractatus Brevis de Natura et Causis Pestis Quæ Hoc Anno 1596 Hamburgensem Civitatem Afflixit," Hamburg, 1596; "De Universa Mulierum Morborum Medicina," *ib.* 1603 (1604), 1628, 1664; Venice, 1644; Hanover, 1654; Cologne, 1689; Frankfort, 1668; "Medicus Politicus, sive de Officiis Medico-Politicis Tractatus," a kind of medical encyclopedia and methodology, Hamburg, 1614, 1662. The above were written in Latin, and the following in Portuguese: "Tratado de Herem, Em o Qual a Serca Desta Materia," etc., cited also under the title "Trattado da Halissa, En o Qual Sen a Desta Materia Dialogi xxv." 1614.

Castro, Jose Rodrigues de: Christian rabbinic scholar; librarian; born in Spain in 1739; died about 1795. Appointed royal librarian to Charles III. and Charles IV., he devoted himself to a revision of the bibliographical labors of Nicolas Antonio; producing at Madrid, in 1781, the "Biblioteca Española." This contains in the first volume accounts of Spanish Jewish authors, taken mainly from Bartolocci, though there is evidence that the writer knew some Rabbinic Hebrew, as his work includes Spanish translations of two Hebrew poems on chess. He addressed to Charles III. on his accession a number of Hebrew, Latin and Greek verses entitled "Congratulatio Regi," Madrid, 1759.

CASTRO SARMENTO, JACOB (HENRIQUEZ) DE: Physician, naturalist, and poet; born about 1691 in Bragança, Portugal; died at London in 1761. At the age of seventeen he entered the University of Evora, to study philosophy, and later studied medicine at Coimbra, receiving his baccalaureate in 1717. In order to escape the persecutions of the Inquisition, Henriquez — so-called as a Marano—went to London in 1720; there he continued his studies in medicine, physics, and chemistry, and passed his examinations in the theory and practise of medicine. He was elected a fellow of the Royal Society of London about 1725, in recognition of his having introduced a new medicine for curing fevers. Castro Sarmento corresponded with many scholars, among others with Prof. Mendes Sanchetto Barbosa of Lisbon, who reported to him the terrible earthquake that destroyed the capital of Portugal in 1755, and with the Jesuit B. Suarez, who communicated to him his astronomical observations made in Brazil.

The literary activity of Castro Sarmento began with a treatise on vaccination, "Dissertatio in Novam, Tutam, ac Utilem Methodum Inoculationis seu Transplantationis Variolorum" (London, 1721; German translation, Hamburg, 1722; Supplement, London, 1731; anonymously, Leyden). Other works are: "Historia Medica Physico-Hist.-Mechanica," part i., London, 1731; part ii., *ib.* 1735; "Syderohydrologia ó Discurso das Aguas Mineraes Espadañas ou Chalibeadas," *ib.* 1736, identical with "Da Uso e Abuso das Minhas (Minerales) Aguas da Inglaterra," London, 1756; "Tratado da Verdadeira Theoria dos Mares," London, 1737; and a Portuguese translation of the treatise of the surgeon Samuel Sharp: "Surgical Operations, with Plates and Descriptions of the Instruments Used" (London, 1744).

In recognition of his services to medicine the University of Aberdeen awarded to him, in July, 1739, a medical degree. Castro Sarmento was also a poet and a preacher. In Spanish, he published "Exemplar de Penitencia, Dividido en Tres Discursos Para ó dia Santo de Kipur" (London, 1724); "Extraordinaria Providencia Que el Gran Dios de Ysrael Uso con su Escogido Pueblo en Tiempo de su Mayor Affiicion por Medio de Mordehay y Ester Contra los Protervos Intentos del Tyrano Aman, Deducida de la Sagrada Escritura en el Sequinte Romance" (London, 1728); "Sermão Funebre as . . . Memorias do . . . Haham Morenu a R. e Doutor David Neto" (London, 1728).

CASTRO TARTAS, ISAAC DE: Marano and martyr; born at Tartas, Gascony, about 1623; died at Lisbon Dec. 15 (22), 1647. He was a brother of

David Castro Tartás, and a relative of the physician Elijah Montalto, and was himself trained in philosophy and in the classical languages. Early in life Isaac went to Parahiba, Brazil, where he lived for several years. Against the wishes of his relatives there, he went later to Bahia dos Santos, where he was recognized as a Jew, arrested by the Inquisition, and sent to Lisbon. Summoned before the tribunal of the Inquisition, he at once avowed his belief in Judaism and his determination to remain true to the faith. All the endeavors of the inquisitors to convert him to Christianity were in vain. On Dec. 15 (22), 1647 (not Sept. 23, as was erroneously supposed), this young man was led, together with five fellow-sufferers, to the stake. In the midst of the flames he called out in startling tones, "Shema' Yisrael! [Hear, O Israel!] The Lord our God is One!" With the word "Eḥad" (One), he breathed his last. For several years the public of Lisbon repeated his last words, so that the Inquisition was finally compelled to interdict this confession of the Jewish faith, under the threat of severe punishment. It is said that the martyrdom of De Castro Tartas so affected the hardened inquisitors that they determined to cease burning heretics at the stake. In Amsterdam the tragic end of this promising young man occasioned deep mourning. A memorial sermon was delivered by Saul Levi Morteira, and elegies in Hebrew and in Spanish were written in his honor by Solomon de Oliveyra and Jonas Abravanel.

CASTROJERIZ: Town in southern Castile, 18 miles west of Burgos. Jews lived there as early as the period of the Moorish rule. In the charter ("fuero") granted to the town in 974 by Garci Fernandez, count of Castile, it is ordered that the murder of a Jew be punished in the same way as that of a Christian. When, after the death of King Sancho, forty Jews were killed at Mercatello, Ferdinand I., his son and successor, settled the remaining Jews of that place at Castrojeriz (1035). After the death of Alfonso VI. of Castile, in 1106, the inhabitants of the neighboring Castro fell upon the Jews of Castrojeriz, killing many, making prisoners of others, and plundering their houses. The new king, Alfonso VII., and his wife, Urraca, forbade any further injury to the Jews of Castrojeriz on pain of heavy penalties. In 1234 Fernando III. confirmed the privileges which had been granted to the Jews. In 1474 the Jewish community paid 1,100 maravedis in taxes.

CASUISTRY. See Legalism.

CAT: There is no reference to the cat in the Old Testament, the domestication of that animal being later than the Bible, except in Egypt, where it was reverenced as a divine being, and probably thus became tame. Victor Hehn ("Culturpflanzen und Hausthiere," etc., Berlin, 1894) even declares that the tame cat was not introduced into Europe until after the invasion of the Huns. There is, however, evidence on Greek vases and Pompeian wall-paintings that the cat was domesticated in Greece and Rome before the common era (R. Engelmann, "Die Katzen im Alterthum," in "Jahrbuch des Kaiserlichen Deutschen Archäologischen Instituts," xiv. 136–143, Berlin, 1900). In the Talmud, on the other hand, there are many references to the cat, which is called חתול, a general name for the "pouncer," though at times it is called שונרא (שינרא), which is a specific term derived from the Persian (Sachau, in "Z. D. M. G."), and suggests the possibility that the domesticated cats of Syria and Europe were derived from that country.

The destructive qualities of the cat are generally recognized. With its five claws (Ḥul. 52b) it destroys not alone mice (B. Ḳ. 80a), weasels (Sanh. 105a), hens, young birds, lambs, and kids (Ḥul. 53a), but even large birds (Ket. 41b), as well as snakes (Pes. 112b), snake-poison being innocuous to it (Shab. 128b). It is dangerous to babies (B. Ḳ. 80b), who on that account wear a leather bandage (Kelim xxvi. 5; the reading is doubtful). White cats bite worse than black ones (B. Ḳ. 80b). The cat is regarded as a model of modesty, because of its cleanly habits ('Er. 100b); though the reason is also given that these are due to the desire to avoid being detected by mice.

That the cat was tamed in Talmudic times is shown by the statement that it never leaves a home it has once chosen, and therefore need not be watched (Shab. 51b). It bears young in 52 days (Bek. 8a), which nearly agrees with the right period of 55 days. The reason why the cat forgets its master, whereas the dog will always remember him, is stated to be because cats eat mice, which are eminently the cause of forgetfulness (Hor. 13a). This idea has lasted into modern times; for in Russia Jewish boys are not even now allowed to stroke a cat lest they lose their powers of memory. The prohibition does not, however, extend to girls.

In order to see demons, one should burn the fetus of a black cat, which must be the eldest female offspring of a black cat that is also the eldest female offspring of a black cat, and sprinkle the ashes on one's eyes (Ber. 6a). A woman's blood, offered to a cat, with magic formulas, will deprive a man of his virility (Shab. 75b). If rats kill a cat, the owner has no remedy, on the principle that "the man who is killed by women is no man" (B. M. 97a). Any one may kill a wild (perhaps mad) cat and take its skin (Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 266, 4); the pelt, being soft, is used for furs (B. Ḳ. 80b). Of enemies who become reconciled it is said proverbially "the cat and the weasel have made a match" (Sanh. 105a). In Russo-Jewish folk-lore, blood from the tail of a cat is regarded as a cure for erysipelas; while a cat put into a new cradle drives away evil spirits from the baby. When there is a thunder-storm, the cat is put outside in the rain. A black cat in the house is propitious; a white one, unlucky. When a house is built a black cat, among other domestic animals, is introduced into it for luck. In the cabalistic system of transmigration a person who uses the name of God is turned into a cat (Vital Calabrese, "Sefer ha-Gilgulim," ed. Warsaw, p. 125).

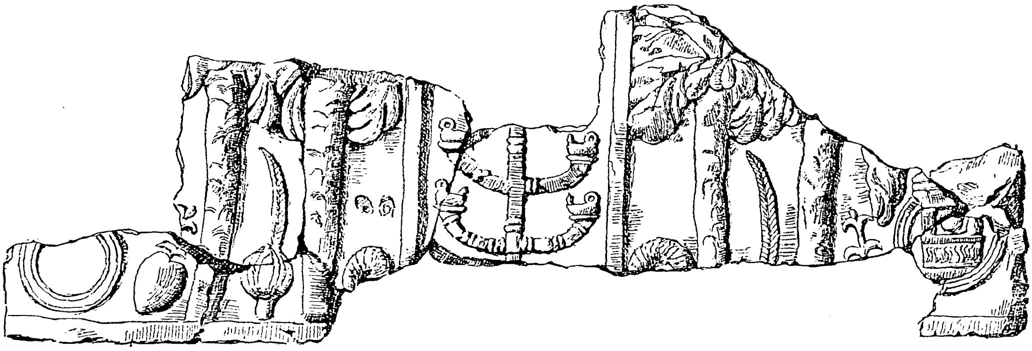
CATACOMBS: Underground galleries with excavations in their sides for tombs or in which human bones are stacked. The term is derived from "catacomba," a compound of the Greek *κατά* and the Latin "comba" ("cumba"), meaning "near the sepulchers." Originally it designated a definite place on the Via Appia near Rome, but since the ninth century it has been applied to all subterranean burial-places in Italy as well as in other countries. In the Middle Ages only Christian catacombs were known; in modern times, however, Jewish burial-places have been discovered resembling the Christian ones, and hence are also called catacombs.



Fragment of a Sarcophagus from the Vigna Randanini at Rome, Showing Jewish Symbols.
(From Garrucci, "Cimitero Degli Antichi Ebrei.")

In point of fact, the mode of burial followed in catacombs is undoubtedly of Jewish origin. Subterranean tombs were used in Palestine even in early times. While in the East corpses were usually put into the earth, in the West they were cremated. The earliest example of a subterranean tomb is the double cave of Machpelah, still preserved under the mosque built over it. Around Jerusalem there are so-called tombs of the Prophets—tombs of priests according to Sepp—that, in their labyrinthine arrangement, resemble the catacombs. Tombs of the judges—*i.e.*, tombs of the sanhedrists—are also to be found throughout Palestine. The architect Schick found at Jerusalem a catacomb begun by Jews and continued by Christians. These tombs, which are hewn out of the rock, differ from the Roman catacombs only in that they are difficult of access, while the latter are arranged with a view to the frequent visits of the living (Swoboda, "Die Altpalästinischen Felsengräber und die Catacomben," in "Römische Quartalschrift für Christl. Altertumskunde," p. 321, Rome, 1890; compare also the word *λατόμιον* = "quarry," used in the sense of "cemetery," which recalls these rock-tombs).

Wherever the Jews went in the course of their wanderings, they endeavored to preserve this custom of their fathers as far as the nature of the ground permitted; and they did so at Rome, in lower Italy, Carthage, Cyrene, etc. The Talmud gives a detailed description of this kind of tomb, the chief characteristic of which is that the bodies were placed in niches (Talmud, כוכין; Latin, "loculi") in the subterranean vaults. The Christian catacombs doubtless originated in imitation of this Jewish custom, although it would appear from the catacombs so far discovered at Rome that the Christian ones are older than the Jewish. Among Christians, moreover, Jesus' tomb in the rock must have been the model from the beginning.

Rome.

Jewish catacombs have been discovered at Rome as follows: (1) Before the Porta Portuensis; found in 1602 by Bosio under the Colle Rosato. This catacomb has since become inaccessible through the filling in of the neighborhood. Its arrangement was extremely simple and primitive, as it contained only two cubicula or burial-niches. It is evident, from its situation on the road leading to Porto, that it served as a cemetery for the Jews living in Trastevere. (2) In Porto itself, from which several Greek inscriptions of the first and second centuries have been preserved. These inscriptions throw much light on the history of the Jews at Rome. (3) In the Vigna Randanini on the Via Appia, discovered by Garrucci in 1862. He also found there two figured sarcophagi

and gilded glasses of Jewish origin, which furnish proof of the interesting fact that the Jews also followed the higher arts. (4) In the Vigna Cimarra near the Via Appia, discovered by De Rossi in 1867. Among its inscriptions, which are also important, one mentions the synagogue of Elea. (5) In the Vigna Apolloni on the Via Labicana, discovered in 1882 by Marucchi; it is less important, and contains only a very few inscriptions, but is marked by easily recognizable Jewish symbols. (6) On the Via Appia Pignatelli, discovered in 1885 by Nicolaus Müller (see "Mitteilungen des Archäologischen Instituts," Roman section, 1886, i. 49-56).

Arrangement.

According to F. X. Kraus's description, the Roman catacombs consist of an immense labyrinth of galleries excavated in the bowels of the earth and under the hills surrounding the city. The galleries are arranged in different stories ("piani"), often three or four of them one above the other, and crossing a number of times in the same story. The galleries are from one-half to one meter wide, hence generally very narrow; in height they vary with the nature of the rock out of which they are hewn. The walls on both sides are perforated by horizontal caves or niches like oblong ovens, each of which affords space for one or more bodies. The rows are broken at intervals by passageways leading into smaller chambers, the walls of which are also perforated by niches. There is little difference between the Christian and the Jewish catacombs; certain variations in construction being no greater than the differences among the several Christian catacombs themselves. There is the same arrangement of galleries and cubicula, the same method in the disposition of the graves, and the same decoration in colors and tints. It has been remarked, however, that the flags closing the niches on the outside are fitted better in the Jewish than in the Christian tombs; so that no one would suspect that tombs were behind these stones. The only real difference consists in the presence of Jewish formulas and symbols and in the absence of Christian ones.

Inscriptions.

The chief value of the Jewish catacombs at Rome lies in the numerous and multiform inscriptions that they furnish, which throw a strong light on the life of the Jews at Rome. A great number of names has been preserved thereby; and sometimes the titles of the offices and the status of those buried are given. Since about 110 of the inscriptions are in Greek and only about 40 in Latin, the former was probably the language of the Jews at Rome. The Greek inscriptions date from between the first and third centuries, from which time to the fourth century there are Latin inscriptions. A genuine Hebrew inscription has not yet been found, though the formulas שלום ("Peace") and שאלום על ישראל [sic!] ("Peace to Israel") have been noted in some instances. Where the inscription does not begin with the name of the deceased, the usual introductory formula is ΕΝΘΑΔΕ ΚΕΙΤΕ (for *κεῖθαι*): the Latin "Hic Jacet" (Here Lies) is seldom found. Eulogies recalling Biblical verses and idioms are used as final formulas; *e.g.*, Isa. lvii. 2 or Ps. iv. 9. The frequent *διὰ βίου*, taken to mean לחיי עולם ("for life eternal"), must also be considered a pious wish. The Jewish inscriptions of the catacombs of Rome have been collected in the works of Berliner and of Vogelstein and Rieger.

Symbols.

The commonest symbol found in the Jewish catacombs is the seven-branched candlestick, doubtless in reference to the verse, "The spirit of man is the candle of the Lord" (Prov. xx. 27). It is an infallible sign that the tomb in question is Jewish, as it is not found on Christian tombs. Another symbol is a fruit from which an ear of grain sprouts, and which is interpreted as "lulab" (palm-branch) and "etrog" (citron). This interpretation is, however, not certain. An oil-vessel is also found on some stones, a symbol probably identical with the candlestick. Garrucci interpreted it as referring to Ḥanukkah, but this is inadmissible. It may be considered an artistic expression of the thought, "A good name is better than precious ointment; and the day of death than the day of one's birth" (Eccl. vii. 1). There is no reason to doubt that a curved horn signifies the shofar. It is intended to symbolize the resurrection of the dead, which shall precede the Messianic times to be announced by the shofar. A heart-shaped leaf is often found, as also on Christian stones: this signifies sorrow for the dead.

The symbols of the Christian tombs also, in so far as they are taken from the Old Testament, are interesting from a Jewish point of view. The chief types are: Noah in the Ark, the sacrifice of Isaac, the miraculous water produced by Moses in the desert, Israel's passage through the Red Sea, the ascension of Elijah, Jonah's deliverance, the three youths in the fiery furnace, and Daniel in the den of lions. All these pictures express the thought that there are comfort and deliverance from sorrow and trouble. Kaufmann explains the fact that these and not other scenes from the Old Testament were used, by the circumstance that this cycle was based on an old passage of the Jewish liturgy.

In some Jewish tombs gilded glasses were found, having drawings in gold-leaf executed on the flat bottoms of the vessels in such a way that the letters and figures were visible from the inside. An illustration given by Berliner shows, in addition to the candlestick, the palm-branch, the heart-shaped leaf, and a lion beside the open book of the Law. On one of the glasses there is even a representation of the Temple at Jerusalem. The gilded glasses are supposed to be the "kiddush" cups used on the Sabbath and at festivals. Berliner supposes them to refer to the "cup of consolation" that was offered to the mourners.

Doubtful Catacombs at Rome.

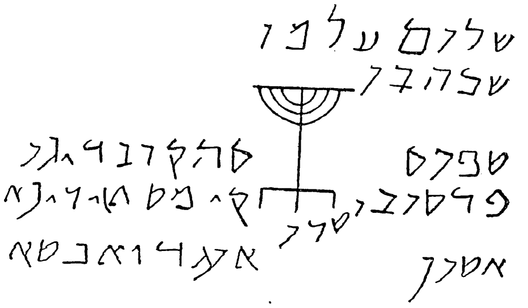
In addition to the six Jewish catacombs mentioned above, Rome has a few others that may be either Jewish or Christian. In the first decades of Christianity, baptized Jews probably used the existing Jewish catacombs as burial-places; thus, for example, the Hebrew inscription of one Shefael was found in the Catacomba Callisti. In the case of the large and well-known Catacomb of Domitilla (so called because the noble Domitilla, of the imperial Flavian house, is supposed to be buried there), its Jewish origin depends on the question whether Domitilla was a Jewish or a Christian proselyte. The architectural character of this catacomb points to Jewish origin, because one of its chambers contains only a single-trough tomb ("arcosolium"), with a bench in front. Since both of these, the single tomb as well as the flat bench, are specially characteristic of the Jewish rock-tombs in Palestine, it is possible that the Catacomba Domitillæ was originally laid out by Jews, although it was certainly finished by Christians. The architectural characteristics of this catacomb are so striking that even Müller admits Jewish influence, although he thinks that the Christian catacombs were constructed on pagan and not on Jewish patterns (Herzog-Hauck, "Real-Encyc." 3d ed., x. 863).

Venosa, Sicily, Carthage.

It is also impossible to determine whether certain catacombs in places other than Rome are Jewish or Christian, particularly as investigations have not yet been carried to the same extent as in Rome. This is especially the case at Naples and its vicinity, and, in general, throughout southern Italy. Aside from those near the little town of Matera, the catacombs of Venosa are a modern discovery, and none has been definitely recognized as Christian, while most of them are certainly Jewish. Discovered in 1853, these catacombs have been investigated and described by G. I. Ascoli, François Lenormant, and Nicolaus Müller. Notwithstanding the tufa, which tends to crumble easily, there are galleries here more than two meters wide; hence wider than those at Rome. In the subterranean main street the trough-tombs—*i.e.*, those hollowed out in the form of a trough ("arcosolia")—are much more numerous than the niche-tombs ("loculi"); moreover, not only the walls, but also the floors, contain many tombs. The chief interest of the catacombs of Venosa lies in their inscriptions. These are written partly in Latin and partly in Greek, the language in both cases being incorrect and barbaric. It is most important to note that Hebrew occurs more frequently; for there are epitaphs written entirely in that language; and the characters used are remarkable for paleographic reasons. One of these epitaphs reads:

משכבו של ביטה בן פווסטינו[ס] נוח נפשו נשמתו
לחי[י] עולם.

("Resting-place of Beta, son of Faustinus. Peace to his soul! May his spirit share in the life eternal!") An epitaph of which the second portion is Greek written in Hebrew characters is also noteworthy, and for that reason is given here, from a reproduction in Ascoli's "Iscrizioni Greche, Latine, Ebraiche di Antichi sepolcri Giudaici del Napolitano," No. 17.



("Peace to his resting-place.") (sic!) שלום על מושכהבו
טפוס סהקונדינו פרסוביטרו קי מטאירינא אטון
אוגדואנטא.

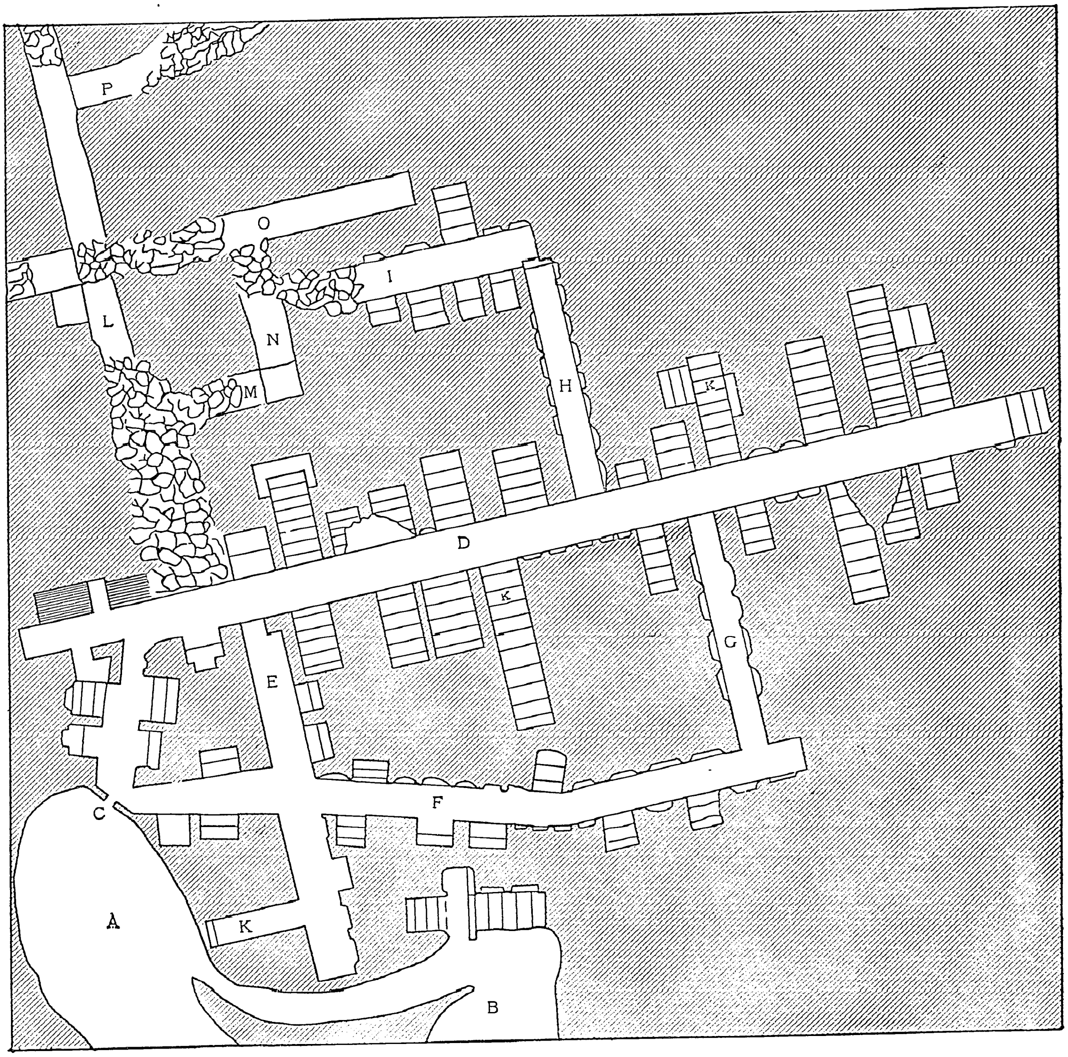
(*Τάφος Σεκονδίνου Πρεσβυτέρου καὶ Ματηρίνα[ς] ἐτῶν ὀγδοῆντα.*)

("Tomb of Secundinus [son of] Presbyterus and Materina, eighty years old.") Müller found a number of other catacombs at Venosa, in addition to those discovered in 1853. It has not yet been determined, however, whether they are of Jewish or Christian origin. The same symbols are found here, and in the places still to be mentioned, as are found at Rome.

The island of Sicily abounds in catacombs. These have not yet been thoroughly investigated, nor has their Jewish or Christian character been determined; but there certainly are Jewish catacombs at Syracuse (see Paolo Orsi, in "Römische Quartalschrift," 1897, pp. 475-495; *ib.* 1900, p. 190). The geological formation of the island was most favorable to the construction of rock-tombs, which were built by pagans, Jews, and Christians. There are more single than common tombs; and the bodies are placed not in niches, but in arcosolia. The Sicilian tombs must therefore be designated as hypogea—*i.e.*, subterranean vaults—rather than as catacombs, and resemble more closely their Palestinian models. Jewish hypogea have also been found in recent times at Heliopolis in Phrygia (Humann, "Altertümer von Heliopolis," p. 46, Berlin, 1898).

In Africa the first Jewish graveyards to be noted are those of Carthage, in which Jewish catacombs are recognized (see Delattre, in "Revue Archéologique," 3d series, xiii. 178, Paris, 1889). The necropolis lies to the north of the city, on moderately high hills near the hill Gamart. It contains about 200 tombs, that resemble the Palestinian hypogea, although the loculi give it the character of catacombs. It has been found that the Talmudic regulations regarding the rock-tombs have been implicitly observed in this necropolis; and the fact that it is Jewish is fully determined by the fragments of Hebrew inscriptions that have been found and the frequent representation of the seven-branched candlestick, although most of the inscriptions are in Latin. The tombs contained no vessels except the lamps; but the walls were richly decorated in relief and fresco, indicating a certain degree of wealth among the Jews of Carthage ("Rev. Etudes Juives," xliv. 14).

On closer investigation Jewish catacombs will be



GROUND-PLAN OF THE JEWISH CATACOMBS AT VENOSA.

(After Ascoli.)

found among the many Christian ones in Cyrenaica and in its capital, CYRENE. In Lower Egypt, also, especially near Alexandria, there are pagan, Jewish, and Christian catacombs ("Am. Jour. of Archeology," pp. 145 *et seq.*, Baltimore, 1887). **Egypt.** In the Egyptian catacombs there are many cell-tombs; *i.e.*, tombs in which the bodies are pushed forward into the niches. According to Schultze, this indicates that the tomb in question is Jewish. This assumption, however, is rightly criticized by other scholars, and a decision of the question must await further investigation. See BURIAL and CEMETERIES.

E. C. S. KR.

CATALAN, ABRAHAM: Well-known Talmudist of the seventeenth century. He and his son, **Abraham Catalan**, and his brother, **Elijah Catalan**, were contemporaneous with R. Ḥayyim Shabbethai in Salonica.

BIBLIOGRAPHY: Conforte, *Ḳore ha-Dorot*, p. 45a.

G. M. K.

CATALAN (CATALANO), ABRAHAM: Physician in Padua; died 1642. He is the author of "'Olam Hafuk," an unpublished manuscript treatise on the plague of 1630-31, during which time he was very active.

BIBLIOGRAPHY: M. Osimo, *Narrazione . . . Cenni Biografici della Famiglia Koen Cantarini*, pp. 50, 107 *et seq.*, Casale, Montferrat, 1875; Steinschneider, *Hebr. Bibl.* xvi. 36.

G. M. K.

CATALAN, ABRAHAM SOLOMON BEN ISAAC BEN SAMUEL (not **Solomon Abraham**): born in Catalonia; died 1492; author of a work treating of the eternity of the world, Providence, prophecy, immortality, and the resurrection, and also dealing with mathematical, physical, and cabalistic subjects. It appeared under the title "Neweh Shalom" (Dwelling of Peace), Constantinople, 1538; Venice, 1574, with a preface by Moses Almosnino, who cites it several times in his work, "Me'ammeẓ Koaḥ." Abraham Solomon translated into Hebrew Albertus Magnus' "Philosophia Pauperum," under the title "Ḳiẓẓur ha-Philosophia ha-Ṭib'it" (Synopsis of Natural Philosophy), and Marsilius ab Inghen's "Questions," under the title "Sha'alot u-Teshubot" (Questions and Answers). Both are still extant in manuscript; Catalan's preface to the latter work was published by A. Jellinek, without mention of the translator, together with the index of the questions, under the title "Marsilius ab Inghen" (Leipsic, 1859).

BIBLIOGRAPHY: De Rossi, *Hist. Wörterbuch der Jüd. Schriftsteller*, p. 69; Steinschneider, *Hebr. Uebers.* pp. 465, 469.

G. M. K.

CATALAN, GERSON B. SOLOMON: Author; lived at Arles in the middle of the thirteenth century; died (possibly) at Perpignan toward the end of the thirteenth century. According to Abraham Zacuto and others, he was the father of Levi b. Gerson (Gersonides). He compiled, about 1280, an encyclopedia entitled "Sha'ar ha-Shamayim" (Door of Heaven), which contains many quotations and even whole treatises from previous translations of works written in Arabic. Following Ibn Palquera, he divided his work into three parts, dealing respectively with: (1) physics, including a chapter on dreams; (2) astronomy, taken chiefly from Al-Fergani; and (3) theology or metaphysics, which part, as Catalan expressly says, contains nothing new, but is a copy of Maimonides' "Book of the Soul." The Greek authors cited are: Alexander of Aphrodisias, Aristotle, Empedocles, Galen, Hippocrates, Homer, Plato, Ptolemy, Pythagoras, Themistius, and Theophrastus; the Arabic: Ali ibn al-Abbas, Ali ibn Ridhwan, Averroes, Avicenna, Costa ibn Lucca, Al-Farabi, Al-Fergani, Ḥonain, Isaac Israeli, Ibn Tufail, and Ibn Zuhr. The work was published in Venice, 1547, Rödelheim, 1801.

G. M. K.

CATALAN, MOSES ḤAYYIM: Italian poet; born in Padua; son of the physician Abraham Catalan. He was rabbi in his native town, and died there at an advanced age in 1661. It was to him that the first letters of Isaac Vita Cantarini, whose teacher he was, were addressed. His "Meẓaref ha-Sekel," a rhetorical pamphlet on man, has never been published. He wrote a poem in honor of the marriage of his sister Perla to Raphael Gans Levi, which can be read either as Hebrew or as Italian. It has been reprinted by Wolf, "Bibl. Hebr." iii. 726. In 1645 he wrote a similar poem in honor of Shabbethai Astruc. An elegy on Lamentations in ottava rima was also published by him at Padua.

BIBLIOGRAPHY: Cantarini, *Paḥad Yiẓḥaḳ*, 10a; Osimo, *Narrazione*, p. 68; Delitzsch, *Zur Gesch. der Jüdischen Poesie*, p. 71; Steinschneider, *Cat. Bodl.* col. 1785; *Cat. Ghirondi* (Sam. Schönblum, Berlin, 1872), p. 2, cod. 4B (where the pamphlet is erroneously ascribed to Abraham Catalan, "rabbi in Padua"); Steinschneider, in *Monatsschrift*, xliii. 420.

G. M. K.

CATALAN, SOLOMON: Probably a grandson of Gerson b. Solomon Catalan. He was rabbi in the city of Coimbra in 1360.

BIBLIOGRAPHY: Kayserling, *Gesch. der Juden in Portugal*, p. 24.

CATALOGUES OF HEBREW BOOKS: These were of frequent use among the Jews in the Middle Ages. Judah ibn Tibbon (about 1200) speaks in loving terms of his collection of books and of its catalogue, both of which he recommends to his son Samuel. Specimens of old catalogues from various genizot have been brought to light within recent years, the oldest and most important, in respect to the number and interest of its volumes, being that published by E. N. Adler and I. Broydé in "Jew. Quart. Rev." xiii. 52 *et seq.* This fragment of a catalogue, compiled in the twelfth century, gives an Arabic description of 100 works offered for sale. The books are indeed summarily described without much method; still, the cataloguer states that they are divided into the following classes: Bible, Mishnah, Talmud, Theology, Halakah, and Liturgy—a fact which shows the existence of a system in the classification of books even at that early period.

Unfortunately, such catalogues, so important to bibliography, are very scarce; and this scarcity has caused a distinct gap in the history of Hebrew literature in the Middle Ages. It is only within the last two and a half centuries that public as well as private libraries have adopted the practise of publishing catalogues. In the following list of printed ones of both public and private collections of Hebrew books, the former are arranged in the alphabetical order of the towns in which the libraries exist, and the latter in that of the names of the owners of the collections:

PUBLIC COLLECTIONS.

Amsterdam: "Catalog der Hebraica und Judaica aus der L. Rosenthal'schen Bibliothek," by M. Roest, 2 vols., Amsterdam, 1875. A special division is devoted to a description of 32 MSS. in that library.

Berlin: "Die Handschriftlichen Verzeichnisse der Königl. Bibliothek," . . . by M. Steinschneider; 2 vols. in two divisions, describing 259 MSS., Berlin, 1878, 1897.

Bern: "Catalogus Codicum Bernensium," Bern, 1875. At the beginning is a description of 20 Hebrew MSS.

Bologna: "Catalogo dei Codici Ebraici della Università di Bologna," by Leonello Modona, in "Cataloghi dei Codici Orientali di Alcune Biblioteche d'Italia," Florence, 1878–97 (28 MSS.).

Breslau: (1) "Catalog der Bibliothek der Synagogen-Gemeinde," Breslau, 1861; (2) "Catalogus Bibl. Seminarii Jud.-Theol. Vratislaviensis," . . . by B. Zuckermann, Breslau, 1876 (190 MSS.).

Cambridge, England: "Catalogue of the Hebrew Manuscripts Preserved in the University Library," by S. M. Schiller-Szinessy, Cambridge, 1876, vol. i. (72 MSS., Bible and commentaries).

Copenhagen: "Codices Orientales Bibliothecæ Regiæ Hafniensis . . . Pars Altera Codices Hebraicos Continens," Copenhagen, 1851 (46 MSS.).

Florence: "Bibliothecæ Mediceo-Laurentainæ Catalogus . . . Tomus Primus, Codices Orientales Complectens," by Maria Bisconi, Florence, 1752–57 (221 MSS.).

Hamburg: "Catalog der Hebräischen Handschriften in der Stadtbibliothek zu Hamburg," by M. Steinschneider, Hamburg, 1878 (355 MSS.).

Leipsic: "Catalogus Librorum Manuscriptorum qui in Bibliotheca Civitatis Lipsiensis Asservantur," by Naumann. "Codices Orientalium Linguarum," by Fleischer and Delitzsch, Leipsic, 1838 (43 MSS.). With additamenta by Zunz.

Leyden: "Catalogus Codicum Hebræorum," . . . by M. Steinschneider, Leyden, 1858 (114 MSS.).

London (British Museum): "Catalogue of the Hebrew Books in the Library of the British Museum," by J. Zedner, London, 1867. "Catalogue of Hebrew Books in the British Museum Acquired During the Years 1868–92," by S. van Straalen, London, 1894. "Descriptive List of the Hebrew and Samaritan MSS. in the British Museum," by G. Margoliouth, London, 1893. "Catalogue of the Hebrew and Samaritan MSS. in the British Museum," by G. Margoliouth, vol. i. (339 Bible MSS.), London, 1899. (Bet ha-Midrash:) "Catalogue of the Hebrew MSS. in the Jews' College," by Ad. Neubauer, Oxford, 1886 (148 MSS.). "Catalogue of Hebraica and Judaica in the Library of the Corporation of the City of London," by A. Löwy, London, 1891.

Mantua: "Catalogo dei Manuscritti Ebraici della Communità Israelita di Mantova," by M. Mortara, Leghorn, 1878 (78 MSS.).

Milan (Ambrosiana): "Die Hebr. Handschriften," by A. Berliner, in "Magazin," vii. 111.

Modena: "Katalog der Hebräischen Handschriften der Königl. Bibliothek in Modena," by Grünwald, 1838 (27 MSS.).

Monte Cassino: "I Codici e le Carti a Monte Cassino," vol. i. Monte Cassino, 1869 (2 MSS.).

Munich: "Die Hebräischen Handschriften der K. Hof- und Staatsbibliothek," . . . by M. Steinschneider, Munich, 1875 (418 MSS.).

Nîmes: "MSs. Hébreux de la Bibliothèque de la Ville de Nîmes," by Joseph Simon, in "Rev. des Etudes Juives," iii. 225 *et seq.* (20 MSS.).

Oxford: "Catalogus Librorum Hebræorum in Bibliotheca Bodleiana," . . . by M. Steinschneider, Berlin, 1852–60. "Catalogue of the Hebrew Manuscripts in the Bodleian Library and in the College Libraries of Oxford," by Ad. Neubauer, Oxford, 1886 (2,541 MSS.).

Paris: "Catalogue des Manuscrits Hébreux et Samaritains de la Bibliothèque Impériale," by S. Munk and H. Zotenberg, Paris, 1866 (13 MSS.).

Parma: "Codices Hebraici Bibliot. I. B. De Rossi," 3 vols. Parma, 1803 (1,377 MSS.). "Catalogo dei Codici Ebraici della Bibl. di Parma non Descritti dal De Rossi," Florence, 1880 (111 MSS.).

Rome (Vatican): "Bibliothecæ-Apostolico-Vaticanæ Codicum Manuscriptorum Catalogus . . . Tomus Primus Complectens Ebraicos et Samaritanos," by Stefani Evodeo and Guiseppo Simone Assemani, Rome, 1756 (512 MSS.). (Casanata:) "Catalogo dei Codici Ebraici della Bibliotheca Casanatense," by Gustavo Sacerdote, in "Cataloghi dei Codici," etc. (230 MSS.). (Angelica:) "Catalogo dei Codici Ebraici della Bibliotheca Angelica," by Angelo di Capua, in "Cataloghi dei Codici Ebraici," etc. (53 MSS.).

St. Petersburg: "Catalog der Heb. und Samaritanischen Handschriften der Kaiserlichen Oeffentlichen Bibliothek," by A. Harkavy and H. L. Strack, 2 vols., St. Petersburg, 1875 (259 Biblical MSS.). "קהלת משה, Catalogus Librorum Impressorum Hebræorum in Museo Asiatico Imperialis," . . . by Samuel Wiener (in course of publication).

Strasburg: "Catalog," etc., by Landauer.

Turin: "Codices Hebraici Manu Exarati Regiæ Bibliothecæ quæ in Taurinensi Athenæo Asservantur," by Ber. Peyron, Turin, 1880 (249 MSS.).

Upsala: "Verzeichniss der Hebräischen und Aramäischen Handschriften der Königl. Universitäts-Bibl.," by R. V. Zettersteen, Lund, 1900 (38 MSS.).

Venice: "Catalogo dei Codici Ebraici della Bibliotheca Marciana," by Mose Lattes, in "Cataloghi dei Codici Orientali," etc. (19 MSS.).

Vienna: "Die Handschriftlichen Hebräischen Werke der Hof-Bibl." by Albr. Krafft and Simeon Deutsch, Vienna, 1847. Supplement by J. Goldenthal, Vienna, 1851 (257 MSS.).

PRIVATE COLLECTIONS.

Abbas, Samuel, Amsterdam, 1693. Aboab, Isaac, Amsterdam, 1693. Abraham, Judah Löb of Meseritz, The Hague, 1807. Adler, E. N. (only Karaitica), in "Jew. Quart. Rev." xiii. Aguilar, Moses Raphael de Amst., 1680. Almanzi, יד יוסף, by S. D. Luzzatto, Padua, 1864. Azulai, Ḥayyim Joseph, by Schönblum, Lemberg, 1872. Beer, אהל יששכר, Berlin, 1863. Berlin, Berlin, 1866. Berliner, "Aus Meiner Bibliothek," Frankfort-on-the-Main, 1898. Bondi, Simon, Dessau, 1818. Carmoly, Frankfort-on-the-Main, 1874. Chwolson, Daniel, Wilna, 1897. Cohen, Joshua, by Cyrus Adler, Baltimore, 1887. Costa, Da, Amsterdam, 1816. Dubno, Solomon, Amsterdam, 1814. Eger, Samuel, Hanover, 1843. Embden, Hartog, Amsterdam, 1856. Emden, Jacob, קרית ספר, by M. Roest, *ib.* 1867. Esseus, Man van, *ib.* 1889. Feibel, Solomon, Erlangen (?), 1804. Ghirondi, by M. Steinschneider, Berlin, 1872. Halberstamm, קהלת שלמה, Vienna, 1890. Heidenheim, Rödelheim, 1833. Heinemann, Jeremiah, Leipsic [1854?]. Holdheim, Berlin, 1866. Jacob ben Saul, Amsterdam, 1816. Jacobsohn, Meïr, מאיר, *ib.* 1864. Jeshurun, Solomon, *ib.* 1811. Jonghe, Wolf de, *ib.* 1839. Lehmans, Moses, *ib.* 1832. Lehren, *ib.* 1899. Leeser, by Cyrus Adler, Philadelphia, 1883. Leuwarden, Jacob, *ib.* 1797. Levi, Rofe, Amsterdam, 1789. Lion, A., Berlin, 1863. Lipmans, Meïr, Amsterdam, 1825. Lotze, Leipsic, 1876. Löwenstam, *ib.* 1846. Luna, Anshel Norden de, *ib.* 1797. Luzzatto, by Joseph Luzzatto, Padua, 1868. Merzbacher, אהל אברהם, by R. N. Rabbinowicz, Munich, 1888. Mesa, Solomon de, The Hague, 1743.

Michael, אוצרות חיים, Hamburg, 1848. Nathan Aaron of Schwerin, 1780. Nepi, Lemberg, 1873. Oma, Ḥayyim, Amsterdam, 1834. Oppenheimer, by Berend, Hamburg, 1782. קהלת דוד, by Israel Metz, Hamburg, 1826. Pinner, Berlin, 1861 (?). Pinsker, מזכיר לבני רשף, by Judah Bardach, Vienna, 1868. Raḥmanuth, Abraham, Amsterdam, 1837. Ruben Solomon, חשק שלמה, by Gabriel Polak, ib. 1857. Rubens, מאיר עינים, ib. 1864. Saravel, by M. Steinschneider, Triest, 1853. Selig ben Pharez, Amsterdam, 1835. Straschun, לקוטי שושנים, Berlin, 1889. Sulzberger, Mayer, אור מאיר, by E. Deinard, New York, 1896. Torres-Nunes, The Hague, 1728. Zedner, Joseph, Berlin, 1872.

The most interesting catalogues published by booksellers have been: Asher, Berlin, 1868. Benzian, by Steinschneider, *ib.* 1869, 1870, 1872. Bislicher Brothers, הפליט, by L. Zunz, with notes by S. Sachs, *ib.* 1850. Bodenheimer, Leipsic, 1869. Harassowitz, Otto, No. 30, *ib.* 1877. Kaufmann, Frankfort-on-the-Main, 1870, 1873 *et seq.* Köhler, No. 168, Leipsic, 1868. Levison, Amsterdam, 1858. Müller, בית לחם יהודה, *ib.* 1868 *et seq.* Proops, אפריון שלמה, *ib.* 1758, 1780, 1784, 1840, 1843. Rabbinowicz, N. R., Munich, 1888 (?).

J. I. Br.

CATALONIA: Duchy of Aragon in the northwest of Spain. Jews settled in Catalonia (which included originally the county of Barcelona; the following cities of Tarragona, viz., Ciudad de los Judios, Vich, Manresa, Gerona, Besalu, Peraleda, Conflent; and many other places) as early as the eighth century. Kaula ha-Jehudi ("the Jew") and his army fought the emir Al-Horr on Catalonian territory; and after the former had fallen in combat the Jews under his command, who were harassed by Al-Horr, were hospitably received in those Catalonian cities inhabited by their coreligionists. Contemporary Christian chroniclers deny the allegation that the numerous Jews resident in Barcelona, the capital of Catalonia, surrendered (890) the strongly fortified city to the commander 'Abd al-Karim.

Often the Jews had to suffer cruelties inflicted by Crusaders in Catalonia, who came to assist the Christians against the Moors. The pope, in a letter to the bishops, forbids these excesses. He says that a difference exists between Jews and Moors: "Against those who persecute the Christians and drive them from their cities and possessions, war is waged rightly; but the former [the Jews] are everywhere ready to serve."

Legal Position.

In early times the Jews of Catalonia secured property rights. Under Count Ramon Berenguer I. it was decreed in 1068, and again at the third Council of Gerona in 1078, that those Jews who bought lands were to pay a tithe to that parish in which the lands were situated, "quemadmodum si a Christianis coleretur" (Florez, "España Sagrada," xliii. 477). Moreover, here the Christian spirit soon got the upper hand. According to the old "Codigo de los Usatges," in a litigation between Jew and Gentile the Jew had to take an oath to the Christian, but never the latter to the former. Neither Jews nor Saracens were admitted as witnesses against a Christian. In 1024 the lands of a Jew accused of adultery with a Christian woman were confiscated and sold. The conversion of Jews to Christianity was favored here as early as the eleventh century. He who insulted a converted Jew, by calling him trimmer, deserter, or renegade, was punished by a fine of twenty ounces of gold.

In Catalonia, connected as it was for a long time, with southern France, the French spirit was altogether dominant; and this continued in all phases of development up to the union with Aragon. The condition of the Jews was on the whole, quiet and peaceful; they engaged in trade and industries, and studied the sciences, particularly medicine; they attained to honors and respect; medical knowledge opened the doors of princes and counts to them. The Jews of Barcelona, Gerona, Tarrega, Tarrasa, and Manresa were noted for their thrift not less than for their prosperity; and they contributed materially to the dissemination of Catalonian commerce. Many of the Jews whom the Almohades persecuted found safety and protection in the cities of Catalonia.

Relation to King.

The Jews living in Catalonia were, like the Saracens, the property of the ruler; they bore a direct relation to the king, and, with all of their goods, stood under his special protection. At the same time they could not be called slaves ("servi"); for they had free right of residence by law. The king gave them a special interest, or usury, law, and regulated their congregational relations.

Gradually, however, the clergy gained supremacy. Even before the reign of King Jaime I. the Jews on Catalonian territory were deprived of their right to act as judges or to exercise corporal punishment. Under Jaime I. Catalonia was united to Aragon and Valencia in one great kingdom. Henceforth the history of the Jews in Catalonia is that of their brethren in Aragon (see Aragon, Barcelona, Gerona, Manresa, Spain).

The connection between Catalonia and southern France is also shown from a religious standpoint, as later the question was discussed whether Gershom's arrangement forbidding polygamy for Germany and France was binding also on Catalonia. Catalonia had its own rite; and this generally coincided with that of Provence (Maḥzor Catalonia) in its principal points. "Kol Nidre" was not recited in Catalonian congregations.

Bibliography: Vict. Balaguer, *Historia de Cataluña*, i.; Amador de los Rios, *Historia*, i. 243, 254; Ersch and Gruber, *Encyc.* Section ii., part 28, pp. 210, 393; Zunz, *Ritus*, p. 41.

J. M. K.

CATARIVAS, SHEMARIAH: Talmudic writer of the eighteenth century. He was originally from Tiberias, and went to Tunis in 1750 as alms-collector, settling there after a sojourn in Algiers. He gained a reputation for scholarship and piety. Catarivas was an intimate friend of Abraham Cohen Baberrebi, one of the oldest rabbis of Tunis, whose grandson published Catarivas' "Zeker Ẓaddiḳ" (Memory of the Just), a commentary on the first two orders of the Mishnah, together with the "Abraham Yagel" of Abraham Cohen (Leghorn, 1843). Several of the responsa of Catarivas are contained in the "Yerek Ya'aḳob" of Jacob b. Abraham Faitosi, Leghorn, 1842.

Bibliography: D. Cazès, *Notes Bibliographiques sur la Littérature Juive Tunisienne*, etc., pp. 90 *et seq.*, 193, Paris, 1889.

L. G. M. K.

CATECHISMS: Manuals for religious instruction. The name as well as the form of Jewish catechisms has been adopted from the Christian Church in modern times in connection with a more systematized religious instruction. Catechesis as a term for instructing persons, particularly proselytes, in the principal parts of the faith before admitting them into the fold, was probably in use among the Greek-speaking Jews in pre-Christian times (see, for instance, Acts xviii. 25); the manual used for this purpose being simply called "Didache"-Torah = teaching (see Didache). In the Christian Church, however, the catechization—that is, the instruction and other preparation of the applicant for admission into membership—was made a well-defined branch of practical theology, and the existence of catechisms as an aid became a necessity. In accordance with the old—also Jewish—system of instruction of proselytes, the catechism originally consisted of a list of the capital sins to be shunned and of the duties or leading virtues to be practised, besides parts of the creed. With the introduction of more rational methods of education, due especially to the Reformation movement, and above all since Luther, who with fine pedagogical insight made the Decalogue the basis of instruction (1529), the catechism became a useful and almost indispensable means of religious instruction of the young, as it presented in clear concise language, in the form of questions and answers adapted to common use, the chief teachings, religious and moral, of the Church.

Jewish Catechism Not Required.

The need of such a catechism was not felt in Judaism of old, since with the cessation of a religious propaganda cases of the admission of proselytes became rare and isolated, while the regular curriculum of Jewish instruction comprised throughout the Middle Ages the entire Torah; that is, Bible and Talmud. Only for the observance and knowledge of the laws compendia were now and then composed to facilitate the study; but for the systematic comprehension of the creed no provision was made in the education of the young, the intercourse between Jew and non-Jew having been so rare as to render a specific religious instruction or a discussion of the distinctive characters of the Jewish belief unnecessary for the average student.

The first symptom of an awakened Jewish self-consciousness was Abraham Jagel's "Leḳaḥ Ṭob," a catechism published in Venice in 1587, and composed entirely after the model of the smaller catechism by the Catholic Peter Canisius (see Maybaum, "Abraham Jagel's Katechismus Leḳaḥ Ṭob," Berlin, 1892). After Luther's catechism had given a new impetus to systematic religious instruction even in Catholic Italy so as to give rise to Canisius' larger and smaller catechisms exactly after the Protestant model, the idea naturally suggested itself to the Jews of Italy, who stood in closer relation to their Christian neighbors than their coreligionists did elsewhere, of having also the tenets of the Jewish faith presented to the young in similar catechetic form. This was the declared purpose of Yagel's work. The need of a catechism, however, was not as yet felt by the Jews. The "Leḳaḥ Ṭob," written in Hebrew and in defense of the Jewish religion, with constant and clever use of rabbinical literature in support of views and conceptions largely adopted from the Catholic original, was—against the expectation of the author—never used as a school manual; but its popularity is shown by the fact that it was frequently republished in Hebrew and translated into Latin and into Judæo-German. The books used for elementary religious instruction contained mainly the 613 commandments and Maimonides' thirteen articles of faith with excerpts from the prayer-book and the Shulḥan 'Aruk. Such books were the "Emet we-Emunah" by Isaac Aruvas, Venice, 1654; the "Eleh ha-Miẓwot" by Gedaliah Taikus, Amsterdam, 1765, who also wrote in 1764 "Emunat Yisrael," a religious catechism not noticed by Güdemann.

The first systematic religious manual after Jagel's attempt seems to have been Judah ben Perez's "Fundamento Solido de la Divina Ley," a compendium of Jewish theology written in dialogue form in Spanish (Amsterdam, 1729). A similar one under the title of "Torat Emunat Yisrael" appeared 1764 in Leghorn, in Hebrew and Spanish, for the use of Turkish Jews, by Isaac de Moses Paz, and in 1782, in Verona, "Esamo Osia Catechismo ad un Giovane Israelito" by Simone Calimani (Strassburger's "Gesch. der Erziehung," p. 277).

The Mendelssohnian Era.

The Mendelssohnian era, which, owing to the closer contact of the Jews with the Christian world, made a more systematic religious instruction a necessity, brought a perfect tidal wave of catechistic literature. From 1782 to 1884 no less than 161 religious manuals appeared, according to David Kaufmann and Isidore Loeb (see Maybaum, "Methodik des Jüdischen Religionsunterrichts," p. 5), and the place of honor belongs not, as Maybaum has it, to W. Dessau, whose "Grundsätze der Jüdischen Religion" appeared 1782, but to Hartwig Wessely, who, at the suggestion of Moses Mendelssohn, published in 1782 the first sketch of a catechism in his "Miktabim," republished in the "Meassef." He had already recommended in his "Yen Lebanon" (1775) the composition of a religious manual, and in his "Gan Na'ul" presented the system in Hebrew. As to the method after which the matter should be arranged, the question was whether for the doctrinal part the thirteen articles of Maimonides or Albo's three fundamental articles should be made the basis, and whether for the duties the whole Pentateuchal system of laws—that is to say, all the ceremonial laws—or only the chief ceremonies, besides the festivals and the moral laws, should be treated.

A number of authors followed Luther's example; but, in accordance with Num. R. xiii. and Saadia's Azharot, they used the Decalogue as the basis for the treatment of the duties. J. A. Francolm, 1826; B. H. Auerbach, in "Torat Emet," 1839; S. Holdheim, in "Ha-Emunah we ha-De'ah," 1857; Leopold Stein, in "Ha-Torah we ha-Mizwah," 1858; and G. Lasch, in "Piḳḳude Adonai," Leipsic, 1857, all derived the 613 commandments from the Decalogue.

Among the leading catechisms of the conservative school may be mentioned those of Alexander Behr, 1826; Solomon Plessner, 1838; Auerbach, 1839; 2d ed. 1853; G. Lasch, 1857; Feilchenfeld, 1867; 2d ed. 1878; and M. Friedlander, London, 1891.

Catechism Literature.

In the year 1832 Zunz wrote in his "Gottesdienstliche Vorträge" (p. 457) that for the last thirty-three years more than fifty Jewish catechisms appeared in German, Danish, French, Italian, and Hebrew. In addition to these the following Hebrew catechisms may be mentioned: Abr. Jagel, "Leḳaḥ Ṭob," 1595; Isaac Aruvas, "Emet we-Emunah," 1654; and Gedaliah Taikus, "Emunat Yisrael," referred to above; Ben Ze'eb, "Yesode ha-Dat," Vienna, 1806, in Hebrew and German; David Zakkut de Modena, "Limmude Adonai," Hebrew and Italian, Reggio, 1815; A. Buchner, "Doresh Ṭob," Warsaw, 1825 and 1826; Jacob Tugendhold, "Ben Yaḳḳir," in Hebrew, German, and Polish, Warsaw, 1839.

Early Catechisms.

Herz Homberg published three catechisms: "Imre Shefer" (Vienna, 1808), in Hebrew, and German; "Bene Ẓiyyon" (Vienna, 1810), which had to be studied in Austria by brides before they could receive the marriage license; the third, "Ben Yaḳḳir" (Vienna, 1820), declares that Jewish soldiers might be exempt from the observance of Biblical laws. "'Edut Adonai" (Berlin, 1814; third edition, Leipsic, 1839, and under a new title, 1850) was published by E. Kley; "Gersha de Janḳutha" (Breslau, 1814), by B. Meseritz; "Dat Yisrael," in two volumes (Prague, 1810–11), by Peter Beer. He also published a "Handbook of the Mosaic Religion" (Prague, 1818 and 1821) and "Emet we'Emunah" (Prague, 1832, 2d edition). This catechism omits the ceremonial laws, and states that in the "interest of humanity every religious commandment may be set aside," and that "wars of conquest" are prohibited by the sixth commandment. Among the duties of the Jews are mentioned "bathing in fresh water and frequent change of linen," and that "employers must take care of their employees when they are sick or old."

"Doctrine and Faith," in Hebrew and German, by Heinemann, was published, 1812, in Cassel; also "Torat Dat Yisrael" and "Miẓwot Dat Yisrael" (Berlin, 1829 and 1830). A. Arnheim published "Leitfaden beim Unterrichte in der Mosaischen Religion" (Glogau, 1829); H. Miro, "Leitfaden beim Unterrichte der Israelitischen Religion" (Breslau, 1834); Joseph Maier, "Selection of Fruits from the Bible" (Frankfort-on-the-Main, 1820); and R. Benedict, "Elementary Instruction in the Mosaic Religion, with Appendix" (Prague, 1832). "Judaism in Its Relation to the State" was translated by Rabbi A. L. Landau (Breslau, 1832). The Hebrew title is "Ahabat Melek." "Teru'at Melek" was published by B. Fränkel (Breslau, 1833). H. M. Copenhagen published "Ẓefirat Tif'arah" (Breslau, 1833). The catechism of J. Wolf, Gotthold Salomon, and M. Frankel was published under the title, "Yesode ha-Limmud" (Dessau, 1810); J. Johlson's, as "Alume Yosef" (Fränkfort, 1814 and 1819; Vienna, 1824) and A. H. Bock's, as "Emunat Yisrael" (Berlin, 1814). Beer Fraenk was the author of "Maḥene Lewi" (Prague, 1816). Julius Schoenborn published a catechism (Cracow, 1819). "Emunat Yisrael" is the name of a catechism by Naphtali Benedict (Vienna, 1824), and "Gedankensammlung" of one published by J. M. Lilienfeld (Berlin, 1825). P. Hurwitz wrote "Torat Adonai Temimah" (Berlin, 1832), and Salomon Pappenheim "Maamar Ge'ullat Miẓrayim u-Mizwat Tefillin" (Breslau, 1815; published, after his death, by the Breslau Jewish Orphan Asylum). A. Büdinger was the author of "Moreh Limmudim" (Cassel, 1830), and Judah ben Ze'eb Loeb of "Explanation of the Ten Commandments" and "Religionsbuch für die Jüdische Jugend" (Darmstadt, 1834). H. Stern published the "Tree of Life" (Würzburg, 1834), and Abraham Gruenthal the "Mosaische Religionslehre" (Breslau, 1836). "Complete Ceremonies of Confirmation" was published by S. Lippmannsohn (Neukirchen, 1836). Naphtali Benedict published a "Torah Min ha-Shamayim" (Vienna, 1814). J. Johlson's "Shoreshe ha-Dat: Doctrines of the Mosaic Religion" (Frankfort, 1819) is a catechism which was accepted in the curriculum for rabbis and teachers in Bavaria. It has been translated into English, with certain omissions, by Isaac Leeser (Philadelphia, 1830), and has passed through several editions.

German Catechisms.

Aron Chorin published a catechism in dialogues under the title "Hillel" (Ofen, 1837), in Hebrew and German. Its leading thought is that the law of humanity is divine. Joseph Saalschütz's "Basis to Catechizations" (Vienna, 1833) contains fifty pages on "God's Attributes" and four on "Duties to Fellow-Men." The post-Mendelssohnian school imitated Christian catechisms, and dwelt on arguments for the existence of God at the expense of ethics and Jewish teaching.

Salomon Herxheimer displayed pedagogical skill in laying greater stress on ethics, and his "Israelitische Glaubens- und Pflichtenlehre" (Bernburg, 1831; 27th edition, 1889) won great popularity by its terseness. It was recommended by the Prussian minister of education "for its Kantian and Lessingian spirit" in 1886.

Samuel Hirsch's "Systematischer Katechismus der Israelitischen Religion" (Luxemburg, 1856; second edition, Philadelphia) bases ethics upon Biblical history, and declares the ceremonies, dietary laws, etc., to be needless to those who have the "religion of the heart," Judaism being not "law" (*Gesetz*), but "doctrine" (*Lehre*). Hirsch favors Sunday as a day of rest for Jews in the Occident, inasmuch as the Jew who would also rest on Saturday would break the commandment "six—[*and not five*]—days shalt thou labor." Joseph Aub's "Grundlagen zu einem Wissenschaftlichen Unterricht in der Mosaischen Religion" (Mayence, 1865; 2d edition, Leipsic, 1875) lays stress upon the fact that faith, in the language of the Bible, is "trust based on knowledge." Superstition and atheism spring from ignorance and materialism, which are twin sisters. Falsehood can not be made truth by miracles, and truth needs no miracles. David Einhorn's "Ner Tamid, the Doctrine of Judaism" (Philadelphia, 1866) declares that man through his conscience hears God's voice, which is revelation. The mission of Israel implies God's love for all nations. Sin is unnatural; original sin therefore is impossible. Israel's dispersion is a blessing and not a curse; hence the Ninth of Ab should be celebrated as a "day of joy," being the beginning of the realization of our mission, which is spiritual and not national. Yom Kippur emphasizes the idea that Judaism rejects the belief in a Mediator.

Leopold Stein's "Torah u-Miẓwah: Israelitisches Religionsbuch" (Frankfort-on-the-Main, 1858, 2d edition) is based upon the Decalogue; it takes the dietary laws to be "sanitary" laws. Salomon Formstecher's "Torat Moshe" (Giessen, 1860) is a condensed extract of his treatise, the "Religion of the Spirit" (Frankfort, 1841). Religion is the law in history and the spirit of mankind. The Temple in Jerusalem was destroyed in order to teach that God can be worshiped everywhere by prayer and by moral conduct. "Ha-Emunah we ha-Deʻah" (Berlin, 1857), by Samuel Holdheim, discriminates between moral and national laws, such as are Levitical, purity, and dietary laws. The Sabbath should be celebrated in the Occident on a day which can be conveniently observed. Ceremonies have only an educational character, and sacrifices have no atoning power without moral conduct.

"Israelitische Religionslehre" (Dessau, 1873, 2d edition), by Julius Popper, defines "revelation" as the work of the religious genius of Israel. Among ceremonies which he holds to have outlived their usefulness are: circumcision, dietary laws, and maẓẓot on Pesaḥ. Sunday is the real day of rest.

M. Levin's "Israelitische Religionslehre" (Berlin, 1892) defines religion as the "belief in God based on knowledge." Prayer should not be supplication, but adoration. Death atones for every guilt. Man must remove everything that might cause his defeat in the struggle for existence. The author apparently means that the Jew should not rest two days of the week, as by doing so he could not succeed against his competitors, who labor six days of the week.

Salomon Plessner's "Dat Mosheh we-Yisrael" (Berlin, 1838) represents extreme orthodoxy. Mysticism plays an important part in this catechism. The Sabbath is a blessing, because the six days of labor are a curse. That the dietary laws, in Plessner's opinion, are conducive to health is no sufficient reason for their observance, but the fact that they were ordained by God.

English Catechisms.

The first English catechism was a translation of Salomon Cohen's Hebrew "Shoreshe Emunah" (Roots of Faith; London, 1814). Leeser's translation of Johlson's "Shoreshe ha-Dat" has already been mentioned. A. P. Mendes published "The Law of Moses" (revised, London, 1870). He speaks of five "revelations": (1) to Adam and Noah; (2) to the Patriarchs; (3) to Moses; (4) to Israel on Sinai; (5) to the Prophets.

The first duty of a Jew is circumcision. Blood, certain fat, etc., are forbidden, in order to "keep our health from injury." The thirteen articles of creed are given precedence over the Ten Commandments.

Isaac M. Wise published "The Essence of Judaism" (Cincinnati, 1861) and "Judaism, Its Doctrines and Duties" (1880). He recognizes the authority of the Bible, but not that of the Talmud. "True religion is that the doctrines of which are taught in God's works and words." Among his four "cardinal doctrines the mission of Judaism is not included." "Miẓwah" means a Biblical commandment which is either expressed or implied in the Decalogue. "The Decalogue was written by divine authority for the sake of certainty, that it be known for sure that this is the moral law, as ordained by the Creator of man." "The fourth commandment opens the duties of man to man" (p. 42) and "teaches duties to ourselves" (p. 45). "Ḥuḳḳim are ordinances concerning the mode of worship, and are obligatory on every one in Israel," a definition which would make innovations in the mode of worship absolutely impossible.

George Jacobs' catechism (Philadelphia, 1882) teaches that "those who do not keep the Sabbath must surely die, and that the souls of those who eat leaven on Pesaḥ shall be cut off from Israel." Short catechisms in English were published by David Asher (London, 1845), Benjamin Szold, H. A. Henry, J. Mendes de Solla, N. S. Joseph, Julius Katzenberg, H. Loeb, I. Mayer, E. Pike, Gustave Gottheil, J. S. Goldammer, Joseph Strauss (London, 1895), M. Friedlander (London, 1896, 4th edition), Aron Messing, and Barnett Elzas; Koplowitz translated Feilchenfeld's "Manual." In Kaufmann Kohler's "Guide for Instruction in Judaism" (New York, 1898) rabbinical as well as Biblical ethics are duly considered, and the growth of Jewish religious ideas and ceremonies is traced through the Biblical and rabbinical stages of development. It also takes the Decalogue as a basis.

In French.

Following are the catechisms written in French: "Catechisme du Culte Judaïque" (Metz, 1818), written in Hebrew, German, and French; "Catechisme Judaïque, en Hébreu, en Allemand, en Français," by L. M. Lambert (Paris, 1837); "Précis Elémentaire d'Instruction Réligieuse et Morale," in Hebrew and French, by Elie Halévy (Paris, 1837); "La Foi d'Israel, Ses Dogmes, Son Culte, Ses Céremonies," by S. Bloch (Paris, 1859); "Histoire Abrégé des Juifs et de leurs Croyances," by Elie Astruc (Paris, 1869); "Quelques Paroles sur l'Instruction Réligieuse," by L. Kahn (Brussels 1862): "Précis Elémentaire d'Instruction Réligieuse et Morale," by the central consistory of the Israelites of France (Strasburg, 1838); "Morale en Action à l'Usages des Ecoles Israélites" (Mulhouse, 1858; 2d edition, Vienna, 1869); "Les Doctrines Réligieuses des Juifs," by M. Nicolas (Paris, 1860).

In Italian.

Among catechisms written in Italian are: "Catechisma de l'Istruzione Religiosa ad Uso della Gioventa Israelitica," by Salomon Jona (Ivrea, 1858); "Or Zaroaʻ, Corso d'Istruzione Religiosa," by Marco Mortara (Mantua, 1857–62); "Compendio della Religione Israelitica," by the same author (Mantua, 1855); and "La Prima Parte della Fede d'Israel," by R. M. Bachi.

In Danish.

"A Catechism of the Jewish Religion," by S. J. Cohn (Hamburg, 1811), was in 1812 translated into Danish. Abraham Alexander Wolf's "Lehre der Israelitischen Religion" (Mayence, 1825) was translated into Danish (1862), Dutch

(1844), Swedish (1844 and 1852), and republished in German (1863). Of Hungarian catechisms, the following deserve mention: the one written by Israel Bak (Budapest, 1878, 2d edition), by Solomon Kohn (Budapest, 1883 and 1885), and by Leopold Loew (Budapest, 1895). "A Plan of Instruction in Religion for the Jewish Congregation of Budapest" has been translated into German by Bernhardt Mandl (Vienna, 1894). David Kaufmann published a Hungarian essay: "On the Jewish Catechism" (Budapest, 1884; republished in German).

Other Languages.

Catechisms in Polish were published by S. Dankowitz (Cracow, 1873) and by Joachim Blumenthal (Drohobicz, 1882), and in Russian by J. L. Klatzko (Warsaw, 1884). Four Hebrew catechisms were published in the second half of the nineteenth century: "Ma'ase Abot" (Vienna, 1896); "Mizwoth Yisrael" (Cracow, 1891); The 613 "Mizwot" (Presburg, 1859), by J. Landau; and "'Ammude ha-'Olam" for Orthodox schools (Presburg, 1875), by Wilhelm Neuman. The last two were translated into German. Of modern authors of German catechisms may be further mentioned: Lazarus Adler (Cassel, 1872), Ignatz Baek (Leipsic, 1857), S. Baeck (Lissa, 1886), M. L. Belinsohn (Odessa, 1878), Hirsch B. Fassel (Vienna, 1864), Wolf Feilchenfeld (Posen, 1874), Joseph Horowitz (Grodno, 1878), Jacob H. Jacobsohn (Leipsic, 1876), L. Kahn (Vienna, 1860), Solomon Kohn (Budapest, 1860, 1873, 1878), E. Bondi (Brünn, 1880, 1885), Jacob Auerbach (Frankfort, 1869), L. Lewysohn (Worms, 1856), M. Levinger (Bremen, 1876), L. Levi (Hechingen, 1877), D. Leimdörfer (Nordhausen, 1876; Frankfort, 1881; Vienna, 1898), Gerson Lasch (Leipsic, 1857 and 1861), Julius Landsberger (Berlin, 1861; 2d edition, 1876), Georg Wolf (Vienna, 1878), Marcus Winter (Vienna, 1861), Abraham Singer (Ujhely, 1875), J. Schwarz (Great Kanisza, 1877), D. Rothschild (Breslau, 1879), Ludwig Philippson (Leipsic, 1844, 1858; Vienna, 1878), Emanuel Mandus (Breslau, 1860 and 1870, Orthodox), A. Kapka (Prague, 1882; 8th edition, Berlin, 1884), D. Kohn (Odessa, 1880), Michael Silberstein (Wiesbaden, 1888), Israel Singer (Ujhely, 1881), H. Sondheimer (Lahn, 1881), Jacob Mautner (Vienna, 1884, 1894, 1896), Ludwig Stern (Frankfort, 1895, Orthodox), Oscar Waldeck (pseudonym; Vienna, 1886), M. Spanier (Berlin, 1898), Adolf Weiss (Prague, 1894), M. Zuckermandl (Frankfort, 1889), T. M. Caro (Posen, 1883), J. Goldschmidt (Frankfort, 1896), Eisik Bentauvim (Jaffa, 1899), F. Feilchenfeld (Breslau, 1881; 3d edition, Frankfort, 1900), H. J. Schuetz (Cleve, 1854), Eliezer Nathan (pseudonym; Rödelheim, 1804), M. Gottlieb (Frankfort, 1896; Hanover, 1898, part ii.), U. Grünwald (Tilsit, 1893), J. Guttman (Teschen, 1896), Leopold Katz (Ratibor, 1890), H. Lesser (Colberg, 1853), W. Wessely (Prague, 1846), Israel Steinhardt (Arad), S. Stern (Prague, 1893).

CATECHUMENS, HOUSE OF (called also **Casa dei Neofiti**): A Roman institution for converting Jews to Catholicism, which the Jews, by means of taxes, were compelled to support. The Vatican founded this house for converts March 21, 1548 (Rieger, ii. 64), by setting apart various sums from its revenues. By a papal decree of Jan. 1, 1565, certain revenues were to be used for the support of the catechumens, and the fines levied on Jews for possessing scrip certificates of indebtedness, lending money on interest, or engaging in certain occupations were to go to their support also. Under Pius V. forcible conversions occurred in large numbers. His successor, Pope Gregory XIII., continued the institution. Hitherto many Jews became converts through the fear of powers that might be exerted against them; now many took this step in the hope of profiting thereby.

Burden of Support Put on the Jews.

For Gregory XIII. ordained that all church dignitaries should assist the converts by material encouragements and recommendations. Whereas the Vatican had protected these converts up to this time, it was decided that the Jews themselves had now to bear this burden. Sirleto, protector of the catechumens or neophytes, was active in his opposition to the Jews. Before the establishment of the House of Catechumens all conversions that took place were voluntary. The House marked the second stage, since it was designed as a retreat and prison for recalcitrant neophytes during the process of transition. Later, when the revenues for the catechumens had fallen to a very low point, conversion by means of the compulsory attendance of Jews three times a year at Christmas sermons against Judaism was begun.

Sixtus V., by a bull of Oct. 22, 1586, permitted the Jews to rebuild synagogues on the earlier sites, provided the contributions for the support of catechumens be not reduced in amount. And Clement VIII. reduced the tax of the Jews of Rome for the support of the House of Catechumens from 2,500 scudi to 800 scudi, whereof 300 scudi fell to the Cloister of Converts.

After the Jews had been expelled from the Romagna, with the exception of Rome and Ancona, those remaining were, in later times, taxed oppressively. In Nov., 1604, the chief rabbi of Rome, Joshua Assouth, with his four children, was forced to enter the Casa dei Neofiti, and the latter were baptized (Rieger, *l.c.* 193). Besides, where the neophyte refused to become a convert voluntarily, force often was applied, and finally the victims were killed by hanging. If they accepted baptism, a grant of money from the government was usually made in addition to the sum derived from Jewish taxes. The catechumens, as a Roman institution, survived until late into the eighteenth century. As late as 1784 sixty Jewish children were thrown into prison because two other children were being hidden from the officers of the Casa dei Neofiti; they had to be given up to release the remainder (Rieger, *l.c.* 253; "Monatsschrift," pp. 399 *et seq.*). The Jewish contributions to the Casa were abolished in 1810 (Rieger, *l.c.* 359).

CATEGORY (Greek, *κατηγορία* = מאמר): A term introduced by Aristotle into the philosophical vocabulary, signifying "attribute," "predicate." According to him every word contained in a proposition belongs to one of the following ten categories: substance, quantity, quality, relation, place, time, situation, possession, action, passion. Words being images of objects, it is obvious that every object can be predicated by one or more of these categories. For this reason, after having briefly expounded the categories in the book *Κατηγορίαι*, placed at the head of the "Organon," Aristotle treated this doctrine at length in his "Metaphysics." In the latter book, however, the categories change their characters somewhat, and instead of substance and attributes they represent being and its accidents. Of all the categories, only the first, that of substance which represents the being, has a real existence; the others are only appended to it, describing its qualities. For Aristotle there is no being but the individual being, as perceived by the senses; it follows that the ten categories must be found in every kind of being.

There was no fundamental change in the doctrine of the categories from the time of Aristotle to that of Kant. Plotinus, after a lengthy critique on Aristotle's categories, in the first books of the sixth "Ennead," distinguishes two classes of categories: five of the intelligible sphere, and five of the sensible world. The former are substance, rest, motion, identity, and difference; the latter, substance, relation, quantity, quality, and movement. Though allusions to this classification are to be found in the writings of the Jewish Neoplatonists, the classification of Aristotle was adopted even by the latter.

The first Jew to give an account of the categories was Saadia. In demonstrating the unity of God he analyzes the ten categories and shows that none of them can be applied to God ("Emunot we-De'ot," ii., viii. *et seq.*). Gabirol, in dealing with the nature of matter and form, frequently refers to the categories ("Meḳor Ḥayyim," § 2, pp. 11 *et seq.*, in Munk's "Mélanges"). Baḥya, like Saadia, mentions them in his demonstration of the unity of God ("Ḥobot ha-Lebabot," i., vii.) and in the definition of substance and accidents ("Torot ha-Nefesh," p. 6). Joseph ibn Ẓaddiḳ also points out that none of the categories can be applied to God ("Ha-'Olam ha-Ḳaṭan," ed. Jellinek, p. 53). Abraham ibn Daud devotes the first chapter of his "Emunah Rammah" to an explanation of the categories. Maimonides frequently refers to them in his "Guide of the Perplexed"; and, like Al-Farabi, he designates them under the appellation of "genus." Jacob Anatoli translated the *Κατηγορίαι* into Hebrew, and gave a full explanation of them in his work on the philosophical terms, entitled "Ruaḥ Ḥen."

The general term adopted in Hebrew for "category" is מאמר, which is the translation of the Arabic term "maḳalah," used by the Arabian philosophers. Hebrew designations of the several categories, also translated from the Arabic, are: מאמר העצם (substance), מאמר הכמות (quantity), מאמר האיכות (quality), מאמר המצב (situation), מאמר ההצטרפות (relation). מאמר מתי (time). מאמר אנה (place). מאמר הקנין (possession), מאמר שיפעל (action), מאמר שיתפעל (passion).

K. I. Br.

CATHERINE II.: Empress of Russia; born in Stettin May 2, 1729; died in St. Petersburg Nov. 17, 1796. She was the wife and successor of Peter III., and usurped the throne July 9, 1762.

Within a week of her accession, Catherine was called upon to ratify a decree of the Senate giving the Jews free admission to the interior of Russia. She was liberally inclined; but, having been raised to the throne through the extreme Orthodox party, found herself unable to carry out the suggestion of the Senate, and, in her perplexity, was relieved by having her attention drawn, by Prince Odojevski, to a side-note of Elizabeth Petrovna concerning a similar request: "I will not derive any profit from the enemies of Christ," whereupon Catherine postponed her decision ("Russki Archiv," 1865, p. 492). During the whole reign of Elizabeth Petrovna (1741–1762) the persecution of the Jews had been carried on. Catherine, in her zeal to maintain the traditions of Old Russia, and to flatter its prejudices, could not, with all her liberalism, openly favor the Jews; therefore they were not included in the edict issued Dec. 15, 1762, permitting foreigners to enter and to settle in Russia ("Complete Russian Code," xvi., No. 11,720). Her liberal attitude toward the Jews was, however, manifested in her letter, dated May 11, 1764, to Governor-General Browne of Riga, concerning certain foreign merchants of the New Russian provinces, who came under the tutelage of a bureau, instituted in 1763, for the protection of foreigners. These foreign merchants were to be permitted to live in Riga and to carry on business on the same legal conditions as merchants of other Russian provinces. Furthermore, if any clerks, agents, and workmen should be ordered by these merchants to settle in New Russia, they were to be provided with passports and with an adequate escort, irrespective of their religion. Finally, if three or four persons should arrive from Mitau, on their way to St. Petersburg, with claims upon the government, they were to be provided with passports, simply stating their names, without mentioning their nationality or religion. To prove their identity such persons were to present a letter from the merchant Lewin Wulff of St. Petersburg. To this letter the following postscript is added in German, in the hand of the empress: "Wenn Sie *mir* nicht verstehen, so wird es meine Schuld nicht seyn; *dieser* Brief hat der President von der Protection-Canzley selber geschrieben. Halten Sie dieses alles geheim." The "foreign merchants" mentioned in the letter were: the rabbi Israel Ḥayyim, and his assistant, Nathan Abraham of Birsen (Birzhi), and the merchants David Levi (Bamberg), Moses Aaron, Behr Benjamin, and Israel Lazer, the "mohel" Lasar Israel, and the laborer Jacob Marcus of Mitau. They were escorted to St. Petersburg. Some of them soon returned to Riga and settled there with

Edict Excluding Jews.

their families and servants (Buchholtz, "Gesch. der Juden in Riga," p. 57).

Liberal Attitude Toward the Jews.

In this diplomatic manner avoiding the name "Jew," the empress deemed it advisable to usher in the settlement of the Jews into Russia. In another letter to Governor-General Browne she speaks of her great intentions concerning the Jews, and of his knowledge of these intentions (*ib.* p. 61). In answer to a complaint of Benjamin Baehr, "factor of the Polish, Lithuanian, and Courland Jews," against the municipal authorities of Riga, Catherine wrote to Browne, Oct. 15, 1765, directing him to inquire whether the council (Rath) in spite of its privileges had the right to oppress such people, who had begun to develop trade in Riga to the benefit of the country, and enjoining that the complainants be protected and their petitions granted (*ib.* p. 65). The "foreign merchants" did not go to South Russia; most of them settled in Riga, and some of them in St. Petersburg. In 1769 Catherine permitted Jews to settle in the New Russian provinces on an equal footing with all foreigners, these being invited to people the deserted South Russian steppes.

With the first division of Poland in 1772, a great number of the Jews of White Russia became Russian subjects. In a manifesto issued by Count Chernishov, the new governor-general of White Russia, in the name of the empress, promised equal rights, without distinction of religion or nationality, to the inhabitants of the newly acquired territories. The phrase, "without distinction of religion or nationality" is used in most of the ukases of the empress. The Russian historian Gradovski emphasizes the fact that Catherine II., having declared, on ascending the throne, her *profession de foi* to rule in the Russian Orthodox spirit, never saw any danger to the Orthodox Church from the Jews and Judaism, as had her predecessors. While she often warned the governors against the Roman Catholic orders, and especially against the "plotting" Jesuits, she did not hesitate (in 1772) to grant religious rights to the Jews ("Otnosheniya k Yevreyam," etc., p. 478, note).

But notwithstanding the magnanimous intentions of Catherine, the Jews were restricted to a Pale of Settlement, almost immediately after the rights of equality had been officially granted them. This was certainly not the wish of the empress, but was due to the local authorities and the Senate, which at that time possessed great power in the administration of the empire. While the law recognized the Jews as Russian subjects, granting them equal rights with the other inhabitants throughout the empire ("Complete Russian Code," xix., No. 13,850), administrative decrees were issued, keeping them out of the great Russian provinces. By a ukase of 1776 the rule of the "kahal" was reestablished, and the old poll-tax reintroduced. In 1786 the Senate, in answer to an application of the Jews of White Russia to the empress, issued a decree curtailing the judicial, commercial, and industrial rights of the Jews. That the empress was opposed to the narrow-minded policy of the Senate may be seen from this remarkable decree: "Since the above-mentioned [White Russian] inhabitants, holding the Jewish faith, have, in virtue of the ukases issued, already entered into a position equal to that of other inhabitants, it is necessary in all cases to observe the rule that every one according to his rank and standing shall be enabled to enjoy his rights and benefits without distinction of faith or nationality" ("Voskhod," Jan., Feb., 1889, p. 45; Gradovski, "Otnosheniya," etc., i. 12). For the inhuman cruelties practised upon the Jews of Uman and other places in South Russia in 1782, Catherine was not responsible.

Restrictions upon the Jews.

At the end of Catherine's reign two ukases were issued which bear the signature of the empress, but are utterly opposed to her previous tendencies. The first, dated Jan. 3, 1792, under the pretext of giving the Jews of Yekaterinoslav and Taurida the same privileges as those given to the Jews of White Russia, prescribes that Jews can not be admitted into the gild of merchants of Smolensk and Moscow ("Complete Russian Code," xxiii., No. 1706). The second, issued July 4, 1794 (No. 17,224), determines the localities where Jews are permitted to carry on business and trade, thus in an indirect way depriving them of the right to carry on business in the great Russian provinces; it also compels the Jewish merchants to pay a tax for their business and trade licenses in the provinces open to them the double of that paid by Christian merchants. Only the Karaite Jews were, in 1795, exempt from the double tax, and from that time the Karaites enjoyed special privileges.

Thus the reforms introduced by the "Semiramis of the North" affecting the Jews did not, like many other of her well-meant reforms, accomplish the expected results; but through the fault of the narrow-minded officials they rather resulted in establishing the Pale of Settlement in which the Russian Jews are still shut up at the beginning of the twentieth century.

CATTANEO, CARLO: Italian Christian jurisconsult; born in Milan June 15, 1801; died at Castagnole, near Lugano, Feb. 5, 1869. Although Cattaneo was not favorably inclined toward the Jews, he vehemently protested against the oppressive laws to which the Jews in Italy were then subjected. In a work entitled "Ricerche Economiche sulle Interdizioni Imposte dalla Legge Civile agli Israeliti" (Milan, 1899), Cattaneo demonstrates that the outlawry of the Jews is detrimental to society.

CATTLE (Hebrew, מקנה = "possession"): Term used to denote all domestic animals, the principal possession of nomadic and pastoral peoples.

Cattle were very important in the early life of the Hebrews. The story of Abel, who was a "keeper of sheep," and offered unto the Lord "of the firstlings of his flock" (Gen. iv. 2, 4), is without doubt an indication of the conditions of early times. Abraham, Isaac, and Jacob his sons were "shepherds" in all the significance of the word (Gen. xlvi. 34; xlvii. 1, 3, 4, 6); and their respective stories show the importance of cattle in their lives. Their cattle furnished them their dwelling, the tent, their clothing, and their food, the last consisting of milk, cheese, and butter, and, on great occasions, meat. They also supplied them almost exclusively with the material of the sacrifices.

In Agriculture.

After having settled in the Land of Promise, the Israelites did not entirely abandon their early mode of life. Some tribes, particularly those of Reuben, Gad, and Simeon, continued in the pastoral life, in which they were encouraged by the nature of their respective territories. Others seem to have continued the rearing of cattle, along with their new agricultural occupations. Therefore the herds and flocks were a part of all blessings (Deut. viii. 13, xxviii. 4) and prophecies (Jer. xxxi. 27, xxxiii. 12, 13; Zech. ii. 4). In the ordinary usage of the language, kings were called "shepherds" (II Sam. v. 2, vii. 7; Isa. xli. 28), and the same figurative language is used to describe Providence (Ps. xxiii. 2).

The live stock of the Israelites consisted chiefly of small cattle, horned cattle, and asses. The camel and the horse were not common in Biblical times. Small cattle—*i.e.*, sheep and goats—were the most numerous, since Palestine, like the other Mediterranean countries, was in ancient times, as in modern, well suited to the habits of these animals. They were known by the collective name צאן; (ẓon; compare the Homeric *μῆλα*; see Goat, Sheep). Horned cattle were raised successfully only in well-watered places, as the valley of the Jordan, the plain of Sharon, and, particularly, the western part of Bashan. They were called בקר (baḳar, "plowers"; compare "armentum," from "arare"; see Ox). Asses were as common as they were good, and she-asses were especially appreciated (Gen. xii. 16, xxx. 43; Josh. vii. 24; I Sam. viii. 16), even after the introduction of the horse (Ezra ii. 66 *et seq.*; Neh. vii. 68 *et seq.*).

Kindness to Animals.

Many passages in the Scriptures enjoin on man kindness and humanity toward domestic animals. God, as Creator and Providence of all animals, gave man sway over them, delegating to him His providence, as well as His dominion. Punishing man, He strikes also the animals; making His peace with mankind, He extends the reconciliation to animals. The firstlings of the domestic animals are His, as are the first-born of Israel. Domestic animals were entitled to their rest on the Sabbath (Ex. xx. 10, xxiii. 12; Deut. v. 14), and during the Sabbatical year were allowed to wander through the fields feeding on the spontaneous products (Lev. xxv. 7; Ex. xxiii. 11). Castration was forbidden, according to Josephus ("Ant." iv. 8, § 40; probably based on Lev. xxii. 24), and, likewise, hybridization (Lev. xix. 19). To plow with an ass and an ox was not allowed, probably because of the superior strength of the ox, which was the plower par excellence (Deut. xxii. 10). The overladen ass must be relieved of part of his burden, and if he should fall under it, his master must help him up (Deut. xxii. 4). The ox treading out the corn was not to be muzzled (Deut. xxv. 4). A cow or a ewe and her young could not be killed in one day (Lev. xxii. 28). The origin of the command not to seethe a kid in its mother's milk (Ex. xxiii. 19, xxxiv. 26; Deut. xiv. 21) is uncertain. Its purpose seems to have been to deter the Israelites from a heathen custom (see Bochart, "Hierozoicon," pp. 634 *et seq.*; Dillmann, on Ex. xxiii. 19; Nowack, "Lehrbuch der Hebräischen Archäologie," p. 117. Maimonides, "Moreh Nebukim").

Shelter at Night.

During the summer cattle were left in the open air. At night they were driven into pens or folds, for which the Bible has a great variety of names: בצרה, Boẓrah (Micah ii. 12); מכלא, Mikla (Hab. iii. 17 *et seq.*); גדרה, Gederah (Num. xxxii. 16, 24, 36); משפתים, Mishpetayim (Gen. xlix. 14). These pens were sometimes fenced about with stakes; more often, however, they consisted of an enclosure with a dry-stone wall, to protect the cattle from wild beasts; and occasionally they were provided with watch-towers (II Chron. xxvi. 10). The cattle were counted in the morning and the evening when going out and coming in; and the shepherd was obliged to replace every missing head, unless he could prove that it had not perished through his own fault (Gen. xxxi. 39; Ex. xxii. 12–13; compare Amos iii. 12). In the neighborhood of the pens were watering-places, consisting generally of a well or cistern, with a trough. To dip out the water and fill the troughs must have been one of the hardest duties of the shepherds (Gen. xxiv. 20, xxix. 8–10). During the winter the cattle were sheltered in regular stables (מרבק, marbeḳ), which were furnished with cribs (אבוס, ebus). It is incidentally mentioned that the ox and the cow were generally fed on chopped straw (תבן, teben, Isa. xi., lxv. 25), or sometimes on a sour mixture (בליל חמיץ, belil ḥamiẓ), a provender consisting of various grains, mixed with alkaline herbs (Isa. xxx. 24), sometimes like the "farrago" of the Latin (see Bochart, *l.c.* pp. 113, 303; Blau, in "Z. D. M. G." xxvii. 522 *et seq.*). Horses also were fed on chopped straw and on barley. Oats and hay were then, as now, unknown in Oriental countries. Fatlings were probably kept always in the stables, hence the expression, "'egel" or "'egle marbeḳ" (עגל, עגלי מרבק, I Sam. xxviii. 24; Jer. xlvi. 21: see Gesenius, "Thesaurus," p. 1260; Bochart, *l.c.* pp. 302 *et seq.*). Elsewhere fat beeves are called בריאים (Beri'im = "fattened"), in contradistinction to רעי, re'i ("beeves of pasture," I Kings v. 3), or מריאים, meri'im (II Sam. vi. 13; I Kings i. 9). There is no evidence that the Hebrews understood the art of breeding with a view to the bettering of the race. Under this heading one would hardly consider the trick of Jacob, used to increase his flocks at the expense of his father-in-law.

CAUCASUS or **CAUCASIA** (Russian, "Kavkazski Krai" = the country of the Caucasus): A division of Russia, bounded on the north by European Russia; on the east by the Caspian sea; on the south by Persia and Asiatic Turkey; and on the west by the Black sea. It consists of six governments, four provinces, and two districts. The Jewish inhabitants, according to the census of 1897, numbered 58,471, or 6.3 per cent of the total population ("Voskhod," 1902, No. 3). These figures are probably too low.

The exact number of the Caucasian Jews is not easy to determine. Some of them (in the southern provinces) have adopted the Mohammedan religion; while others (in Georgia) have embraced Christianity. They are also often confounded with Jewish immigrants from European Russia. Von der Hoven estimates the number of the native Jews of the Caucasus to be about 100,000 ("Budushchnost," 1900, No. 52).

The following table illustrates the distribution of the Jews of the Caucasus among the various governments, provinces, and districts according to the censuses of 1886 and 1891-92:

Distribution of Jews of the Caucasus.

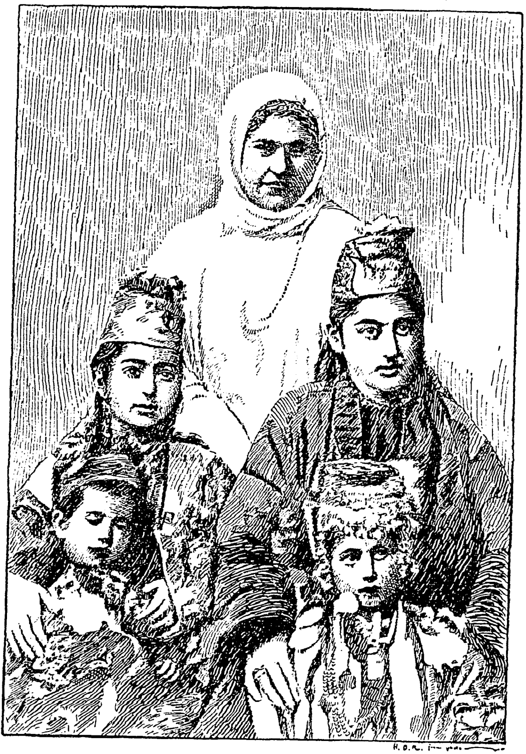
	Jews.	Per cent of Total Population.
NORTHERN CAUCASUS (1891-92):		
Government of Stavropol	1,215	0.4
Province of Tersk	4,965	0.6
Province of Kuban	5,100	0.3
District Chernomorski (Black sea)	52	—
TRANSCAUCASIA (1886):		
Government of Kutais	7,082	0.76
Government of Tiflis	7,632	0.94
Government of Erivan	44	0.01
Government of Baku	8,603	1.20
Government of Yelisavetpol	1,755	0.24
Province of Daghestan	9,210	1.46
Province of Karsk	—	—
District of Zakatalsk	8	—

Supposed Descent from Lost Ten Tribes.

Some of the Caucasian Jews claim to be descendants of the Lost Ten Tribes of Israel, which were taken captive by Nebuchadnezzar; while others (particularly the Georgians) are equally certain of their descent from the Israelites who were taken from Palestine by Shalmaneser. It is hard to determine whether this belief is based upon valid tradition or whether it is of later origin, and an attempt, by means of bad philology, to connect the "Habor," near which river the exiles were settled, with "Iberia," the name by which the Caucasus is known to classical writers. In the Georgian language the Jews are called "Huria," a term which is related to "Iberia" (Koch, "Reise Durch Russland," Preface, p. ix.).

Jewish Type Among Caucasian Peoples.

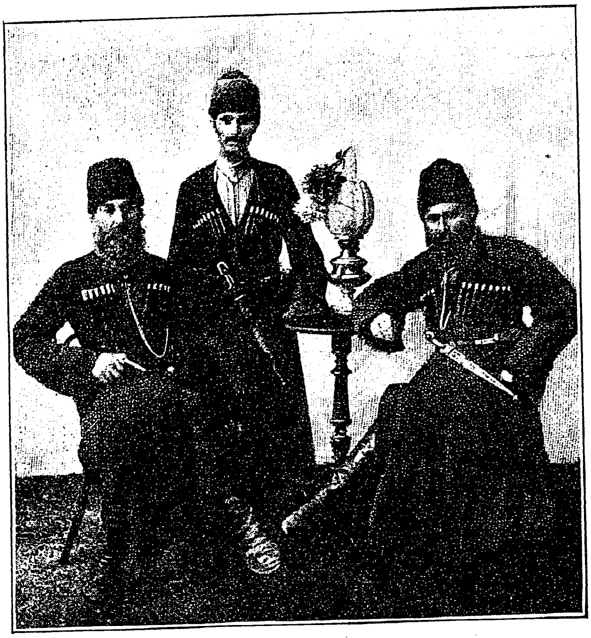
The Russian archeologist and linguist Vsevolod Miller believes that a large Jewish population formerly existed in that part of Media which was later called "Atturpatakan," and which is at present known under the name of "Azerbeijan," and that this country was probably the cradle of the Caucasian Jews. He thinks that they have preserved the old Semitic type to a more marked degree than the European Jews. The presence of a distinctive Jewish type among many of the Caucasian peoples has long been noticed by travelers and ethnographers. It is especially interesting, as some of these people, the Armenians, Georgians, and Ossetes, for instance, are not of one and the same race. Baron Peter Uslar suggests that during the past two thousand years Jewish tribes often emigrated to the Caucasus ("Russische Revue," xx. 42, xxi. 300). Miller is of the opinion that in very remote times they emigrated thither from Media. All the Armenian and Georgian historians speak of the existence of a large Jewish population in Transcaucasia until the beginning of the present era.



Caucasus Jewess and Her Children.
(After a photograph.)

When St. Nina came to the city of Urbnis in Georgia from Jerusalem in 314, she is said to have spoken to the Jews in the Hebrew language ("Histoire de la Georgie," translated by Brosset, I. i. 31, 37, 54, 64, 93, 100, 104-120). When the Persians took possession of Transcaucasia in 366, the Jews adopted the old Persian language, which they called "Parsee" or "Tat," from which they formed a jargon with an admixture of words taken from the Bible and from languages of local tribes. They write this jargon in Hebrew square characters.

From the Arabic writers Mas'udi, Ibn Ḥauḳal, and from the "Derbend Nameh" (a Persian history of Derbend) it is evident that the Arabs, when they conquered Daghestan in the eighth century, found a large number of Jews there. According to Pantyukhov (probably following Quatrefages, "Observations Anthropologiques au Caucase," Tiflis, 1893, cited in "Archiv für Anthropologie," xxvii. 448,) the Caucasian Jews may be considered descendants of the Chaldeans (early Babylonians), who originally dwelt on the upper Euphrates and in the vicinity of Lake Van, but who in later, though even still remote, times intermixed with the native Caucasians. In the course of time many of these Jews renounced Judaism and embraced Mohammedanism. It is probable that the Chewsures and a portion of the Swanetes and of the Lesghians are of Jewish descent. In the fifth century the rulers of Georgia claimed that their ancestors came from Jerusalem. The Chaldean has little in common with the Arabo-Semitic type. Erckert, as the result of a comparison of the head measurements of the Caucasian Jews with those of the other inhabitants of the districts in which they dwell, gives the following data:



Mountain Jews of the Caucasus.
(From a photograph.)

CEPHALIC INDEX:

Azerbeijan Tatars	79.4	mesocephalic
Georgians	83.5	brachycephalic
Armenians	85.6	hyperbrachycephalic
Mountain Jews	86.7	hyperbrachycephalic

HEIGHT OF HEAD:

Kalmucks	62.0
Georgians	67.9
Mountain Jews	67.9
Armenians	71.1

FACIAL INDEX:

Georgians	86.5
Kalmucks	87.0
Armenians	87.7
Mountain Jews	89.0

NASAL INDEX:

Mountain Jews	62.4
Armenians	62.5
Georgians	62.9
Kalmucks	75.3

If the shape of the head be taken as a standard of a fine type, the mountain Jew may be considered to rank first among the Caucasian races, which are classified by Erckert in the following order: mountain Jews, Armenians, Kumyks, Georgians, Azerbeijan Tatars, Ossetes, Circassians, Tshechentzy, Lesghians, Nogaians, Kalmucks ("Der Kaukasus und Seine Völker," pp. 370-377).

The stature of the Jews in the district of Kuba (government of Baku) is 1,618-1,621 mm.; that of the Jews in the government of Kutais, 1,630; of those of Daghestan, 1,644. These three groups exhibit slightly varying types; they have completely adopted the language of the people among whom they live (Pantyukhov, *l.c.*).

Mountain Jews ("Bergjuden") are those of the Caucasian Jews who live in villages ("auls") and some towns of the provinces of Daghestan, Tersk, Kuban, and in the governments of Baku and Yelisavetpol, and who speak an Iranian language, a dialect of the Tat. The Tats themselves are of Iranian origin, but have intermarried with Jews. They speak the same dialect (Tat mingled with Hebrew) as the mountain Jews. They probably arrived in the Caucasus with the Jews in the times of the Achæmenidæ, having been sent to guard the northern boundary of Persia on the Caspian sea. According to Anisimov, the Tats of to-day were Jews when they arrived in the Caucasus, and they embraced Mohammedanism only when the Arabs conquered the country. They themselves cherish this belief, and carefully preserve their Hebrew books (Hahn, "Aus dem Kaukasus," p. 181).

Ḥasdai ben Isaac, in his letters to the king of the Chazars (about 960), says that, according to a tradition, the Chazars formerly lived in the mountains of Seir (Serir in the eastern Caucasus). Miller is of the opinion that the Jews of the Caucasus introduced Judaism into the kingdom of the Chazars, and that the Jews of Daghestan originated in Azerbeijan. He refers to Esther iii. 8 and to II Kings xvii. 6. He thinks that old Jewish colonies in the Caucasus existed in Tabasseran and in Kaitak, in which region there is a place still called "Shuit-Katta" (Jewish pass). About three hundred years ago many Jews emigrated thence to Majlis, the capital of the Tatars, and a little later to Jangi-kent (= "New Settlement").

Large Jewish communities existed in the ninth century in Tiflis, Bardaa, Derbend, and other places in the Caucasus. According to Benjamin of Tudela (1160-73), the power of the exilarch extended over all the communities of Armenia, Kota, and Georgia. Guillaume de Rubruquis in 1254 found a large Jewish population in the eastern Caucasus.

The traveler Judah Chorny also concludes that the Jews arrived in the Caucasus before the destruction of the First Temple, and that up to the fourth century of the common era they lived under Persian protection. At the end of the Sassanian dynasty, when Tatar hordes overran Persia, and the Caucasian Jews were driven from their homes, the latter came in contact with their coreligionists in Babylonia, and adopted the rabbinical teachings as religious law. Soon they began to study the Talmud, of which they had an intimate knowledge when Eldad ha-Dani (ninth century) visited them. This is also corroborated by Benjamin of Tudela and Pethahiah of Regensburg. In the centuries when the great Talmudic schools flourished in Babylon, many eminent Talmudists lived in Derbent and the ancient Shemacha, in the government of Baku. In many regions in the government of Baku, where at present there are no mountain Jews, ruins of their auls and graves, and traces of irrigation trenches, etc., are to be found. The local Mohammedans still call these ruins by their old Jewish names; *e.g.*, "Chifut Tebe" (Jewish Hill), "Chifut Ḳabur" (Jewish Grave), etc. In some parts of Daghestan the Mohammedan religion has supplanted Judaism; but in many Mohammedan families are to be found Jewish books inherited from Jewish ancestors.

Superstitious Beliefs.

The Caucasian Jews can not be classed among the Karaites, as they still adhere closely to the Talmud. There is no question, however, that at the present time their Talmudic knowledge is not extensive and that they have added demonology to Judaism. Owing to this comparative ignorance they are nicknamed by the European Russian Jews "Byky" (oxen). The Jews of Daghestan and Baku believe in good and in evil spirits; *e.g.*, Seer-Ovy (the spirit of the water), Ider, Hudur-bai, Kessen-bai, and others. The most venerated is the mighty Num-Negyr (the spirit of travelers and of the family), which name signifies "unutterable" (literally, "do not take a name"). A belief in perpetual warfare between the good and the evil spirits is deep-rooted among the Jews as well as among the Mohammedans of the Caucasus. According to Erckert, the Caucasian Jews in the times of the Seleucids were in communication with Palestine. They helped to spread Christianity in Armenia, Georgia, and the highlands of Albania. The mountain Jews are probably later emigrants, who in the eighth century and at the beginning of the ninth settled in the region north of Derbent. It was not until the end of the sixteenth century that they removed to the neighboring Majlis. Another stream of emigrants may have followed about 1180 from Jerusalem and Bagdad via Persia. Erckert and many others are of the opinion that the Caucasian Jews amalgamated at an early date with the native tribes. It is certain that among the peoples of the Caucasus the Jewish type is everywhere represented, and that even among Christian and Mohammedan tribes many Jewish customs and habits have been preserved to the present day. Among the Ossetes the old Mosaic law of levirate marriage still exists, which, according to Chorny, the mountain Jews also strictly observe. Even the outward appearance and the manner of speech of the Ossetes resemble those of the Jews. Many of their villages bear Hebrew names, and the marriage and funeral ceremonies correspond in many respects with those of the ancient Hebrews. The same may be said about the Tshechentzy.

The Caucasian Jews differ greatly from the European Jews. Their language, dress, education, employments, and their whole character render them almost a separate people; and they even differ greatly among themselves.

Manners and Customs.

The Georgian, Lesghian, and Ossete Jews differ as much from one another as do the countries in which they live. The Jews of Daghestan have nothing in common with the foregoing, either in language, dress, mode of life, or moral views. They differ little from the other warlike mountain tribes among whom they dwell. They only differ from their Mohammedan and Christian neighbors in their adoption of the Tat language. They all dress in the Circassian style, and go about armed with daggers, pistols, and swords; even being armed when they go to bed or when praying in the synagogue. They are skilled horsemen. Their occupations are mostly dyeing, cattle-breeding, gardening, and viticulture. They own small farms, and rent land from their Mohammedan neighbors, by whom they are much oppressed. They raise tobacco, and manufacture excellent weapons. Even their ḥakams know how to handle the spade, the hoe, and the hammer.

Owing to their persecutions under Mohammedan rule, the mountain Jews in the Russo-Caucasian wars always sided with the Russians; and the Russian government, after the conquest of the Caucasus, in acknowledgment of their valuable services, granted them equal rights with the other Caucasian tribes. Lately, however, these rights have been curtailed.

Mountain and Georgian Jews.

In contradistinction to the mountain Jews, the Georgian Jews have always exhibited great patriotism, and have fought against the Russians. Their love for the fatherland is as proverbial as their bravery in war. Notwithstanding his warlike character, however, the Georgian Jew becomes penitent and humble in the synagogue. Here he may be seen to weep for the unfortunate destiny of his coreligionists scattered over the world. Georgian Jews are found in Tiflis, Kutais, Suran, Karasubazar, and the surrounding villages. Besides the Georgian and mountain Jews, mention should here be made of the Caucasian Subbotniki (Sabbatarians), who are probably descendants of the Chazars. Their type is more Slavonic than Semitic, but their mode of life is Jewish: they not only keep the Sabbath strictly, but also observe all the Mosaic laws and many rabbinical precepts. In Tiflis in 1894 their community numbered thirty families, besides many who lived outside the village and occupied themselves with cattle-breeding, agriculture, and the cultivation of the vine. They have the same prayers as the Russian Jews, but use the Russian language instead of the Hebrew. Some of them send their sons to Wilna for a higher rabbinical education. They consider it a great honor to intermarry with rabbinical Jews; but such marriages are rare. The Georgian and especially the mountain Jews deem it beneath their dignity to intermarry with the Subbotniki.

In recent years, with the improvements in communication, outside interest in the Caucasian Jews has become more extensive. Their coreligionists have endeavored to spread culture among them, while the Zionist organizations have established some schools for the rational study of Hebrew. For further details reference may be made to the articles on the respective cities, provinces, and peoples. See also ARMENIA and CHAZARS.

G.

CAUL.—Biblical Data: Nowadays applied to the membrane surrounding the human fetus; used also in other senses. In the Bible: **1.** A rendering of the Hebrew שבִיסִים, the second on the list of toilet articles worn by the women of Jerusalem (Isa. iii. 18). Schröder emends this to "shemisim," which he compares to the Arabic "shumaisah" (little sun). It would then mean an article of jewelry, perhaps a pendant. It is quite possible to take it to designate nets used as adornments for the hair. The Septuagint gives it this sense; and the Targum reproduces the word, which by Mishnaic usage is confirmed as a net for the hair (see Levy, "Neuhebr. Wörterb." iv. *s.v.*).

2. Used in an anatomical sense of the enclosure of the heart, perhaps of the pericardium (Hosea xiii. 8).

3. Most frequently, however, it is used to translate "yoteret," a word occurring frequently in the priestly regulations and in connection with the liver. It is best taken to mean the fatty mass surrounding the liver. This was always included (Ex. xxix. 13, 22; Lev. iii. 4, 10, 15; iv. 9; vii. 4; viii. 16, 25; ix. 10, 19) in the burnt offering.

E. G. H. G. B. L.

——In Rabbinical Literature: According to the A. V., it was the caul, with some other parts of the sacrifice, that was burned on the altar. For we read: "And thou shalt take all the fat that covereth the inwards, and the caul that is above the liver, and the two kidneys, and the fat that is upon them, and burn them upon the altar" (Ex. xxix. 13; compare references below). The Hebrew term here rendered "caul" is "yoteret" (יתרת), always occurring in connection with "kabed" (כבד = "liver"); this "yoteret" is variously translated by earlier and later scholars. Thus, the Septuagint renders it "the lobe of the liver"; and so do Josephus ("Ant." iii. 9, § 2), Gesenius ("Dict." *s.v.*), Kohut ("Aruch Completum," iii. 476, *s.v.* חצר כבד), Jastrow ("Dict." p. 572), and the Karaites (see Aaron b. Elijah, "Gan 'Eden," Sheḥiṭah, xxi.). This rendition does not seem to correspond with the phraseology of the original. Of the eleven Biblical passages containing the term "yoteret," seven are mandatory (Ex. xxix. 13, 22; Lev. iii. 4, 10, 15; iv. 9; vii. 4), and the remaining four (Lev. viii. 16, 25; ix. 10 [where the preposition מן, "from," is used], 19) are narrative. In six of the former (the only exception being Ex. xxix. 22), yoteret is described as being situated על הכבד ("over the liver"), which can not be said of a lobe or of any part of the liver itself. Were the preposition על ("above," "over," "upon") absent in the mandatory clauses as it is in the narratives, it might be assumed that "yoteret" is in the construct state, and the phrase יתרת הכבד would really mean "the pendant (יתר = 'redundant,' 'hanging over'; *i.e.*, 'lobe') of the liver." But the presence of the preposition in the six mandatory clauses precludes this construction, and consequently also this rendition.

That the narrative clauses do not embody the preposition does not prove the contrary. The narrator simply relied on the exact designation conveyed in the mandatory passages. The yoteret must, therefore, be looked for among the viscera adjacent to and over the liver. Leeser finds it in the midriff; and this partly agrees with Rashi's definition, as explained by Kohut (*l.c.* iv. 94, *s.v.* טרפש; compare Jastrow, *l.c.* 557b, *s.v.* טרפשא), "Rothfleisch," the fleshy fibers connecting the midriff with the costal cartilages. But, as even the midriff is not directly over the liver, a double layer of tissue intervening between them, the A. V. renders the phrase by "the caul over the liver." This definition is supported by the Vulgate, and agrees with that of Rashi (to Ex. xxix. 13, according to Musaphia, in "'Aruk," *s.v.* טרפש), and with the translations of Zunz (Arnheim), Luzzatto, Fürst (in Lev. *l.c.*; in Ex. *l.c.* he translates "lappen"); and by it is meant that part of the caul which forms the duplicature extending from the transverse fissure of the liver to the lesser curvature of the stomach, technically called the "gastrohepatic" or "small omentum" (compare Strack to Ex. xxix. 13; Kautzsch, Ex. and Lev. *l.c.*; contrast Kohut, *l.c.*, *s.v.* חצר כבד). Some object to this definition, because the small omentum is devoid of fat; but as the Bible never includes the yoteret under the fats, this objection is not tenable (compare Sifra, Wayiḳra, Ḥobah, ix. [ed. Weiss, p. 21b]; Pesiḳ. Zuṭṭa to Lev. iii. 10; Hastings, "Dict. Bible," *s.v.* "Caul"; Cheyne, "Encyc. Bibl." *s.v.* "Caul"; see SACRIFICE).

The Karaites include the yoteret among the animal parts forbidden to the Jews as food (see Aaron b. Elijah, *l.c.*; Elijah Bashyaẓi, "Aderet Eliyahu," Sheḥiṭah, xviii.); rabbinic law, however, knows of no such prohibition (see Ḥul. 117a; Rashi, *ad loc.*, *s.v.* יותרת; Pesiḳ. Zuṭṭa, *l.c.*; Maimonides, "Yad," Ma'akalot Asurot, vii. 5; Naḥmanides to Lev. iii. 6 *et* *seq.*). That the caul mentioned by Josephus ("Ant." iii. 11, § 2) in connection with such a law does not mean the yoteret is evident from his naming the caul and the lobe of the liver as distinct parts devoted to the altar (*ib.* iii. 9, § 2). What he means is doubtlessly the epiploon, or the fatty membrane constituting the gastrocolic or great omentum. The same is meant by Herodotus (ii. 47), who mentions the caul in connection with an ancient Egyptian sacrifice to the moon.

J. SR. S. M.

CAUTION (איום): Warning given to witnesses before testimony. Neither Biblical nor rabbinical law requires a witness to confirm his testimony by an oath. Jewish casuists are of opinion that the witness who would not tell the truth without an oath would not scruple to depose a falsehood with an oath (Tosef., Ḳid. 43b, *s.v.* "Hashta"; compare Josephus, "B. J." ii. 8, § 6).

Instead of an oath, rabbinical law prescribes in criminal cases a preliminary caution or admonition, in the course of which the witnesses are exhorted to testify to such matters only as have come under their personal observation, and are warned not to state anything based on imagination or hearsay. They are told that the court will subject them to a careful examination and a searching cross-examination. Finally, the formal caution laid down in the Mishnah (Sanh. iv. 5; Maimonides, "Yad," Sanh. xii. 3) proceeds as follows:

Responsibilities of Witness.

> "Know ye that the responsibilities devolving upon the witness in criminal cases are vastly more serious than those of the witness in civil suits. In civil suits a man makes good the losses sustained through his falsehood, and is forgiven; but in criminal cases the blood of the victim of falsehood and the blood of his possible offspring to the end of time, which is cut off by his undeserved death, fall on the head of the false witness. That such is the case is evident from God's rebuke administered to Cain, who slew his brother (Gen. iv. 10), where it is said, 'The voice of thy brother's bloods cry unto me.' Now, since the Bible says 'Thy brother's *bloods* (רמי אחיך), and not 'Thy brother's *blood*,' it teaches that Cain was considered guilty of shedding the blood of Abel's possible progeny, as well as that of Abel himself. Also the fact that, at the beginning, God created one man only, should teach thee that whosoever destroys a single innocent life is as guilty as if he had destroyed a whole generation; and that, on the contrary, whosoever saves a single innocent life is as meritorious as if he had saved a whole generation. . . . Say not, however, 'Why should we mix ourselves up in these troubles?' Scripture declares (Lev. v. 1), 'The witness who hath seen or known, and doth not tell it, shall bear his iniquity.' Nor must ye scruple about becoming the instruments of this man's death. Remember the Scriptural maxim (Prov. xi. 10), 'When the wicked perish there is shouting.'"

Object of Warning.

The object of the closing admonition is to remind the honest man of his duty to bear witness even against a person tried for his life, to impress upon him the verity that the escape of the guilty is an injury to the innocent, while the punishment of the wicked is a benefit to the public. Therefore, although the criminal's deed can not be undone, no mawkish compassion should prevent the giving of testimony leading to conviction (Deut. xix. 13; Sifre, *l.c.* 187); therefore, too, the honest witness must not scruple to testify against the accused, in the event of whose conviction he, the witness, must act as executioner (Deut. xvii. 7; Sifra, Ḳedoshim, viii.; Sifre, Deut. 89). See CAPITAL PUNISHMENT, WARNING.

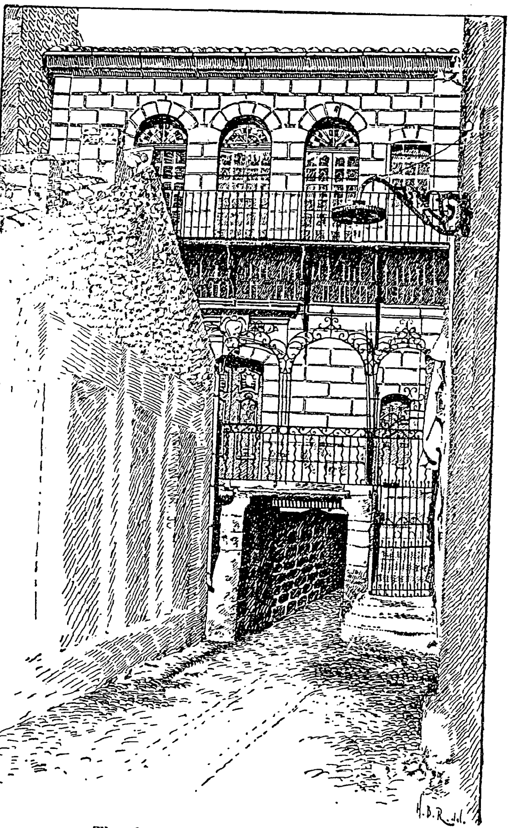
E. C. S. M.

CAVAILLON: Small town in the department of Vaucluse, France. In his book, "Réponses de Rabbins Français et Lorrains" (Vienna, 1881), Joël Müller mentions (No. 17) a rabbi of Cavaillon, Eliezer ben Judah, pupil of Isaac ben Menahem, who lived at Orleans in the second half of the eleventh century. It also appears from the same book (Nos. 21, 22) that the celebrated Rashi of Troyes was in correspondence with the scholars of Cavaillon. Gross ("Gallia Judaica," p. 591), however, maintains that the passage refers not to Cavaillon, but to Châlons-sur-Saône. However that may be, it is certain that Jews were living at an early period at Cavaillon. A Jew named Jaquiellus was a tenant of crown lands in 1303 (Bardinet, "Revue Historique," 1880, xiv. 36). A document of the year 1372 mentions five Jews who, in the name of the community, rendered homage to the bishop, to whom the Jews of Cavaillon paid an annual quit-rent for the houses and lands owned by them in his territory (*ib.* xii. 44, 46).



The Old Synagogue at Cavaillon.
(After a photograph.)

In 1453 the Jews were relegated to a special quarter ("Inventaire des Archives de la Communauté de Cavaillon," No. 127). The year 1485 was an unfortunate one for the Jews of Cavaillon. Imitating the inhabitants of Arles and Tarascon, the Christians of Cavaillon fell upon the Jews and pillaged their property ("Rev. Ét. Juives," vi. 35).

Toros of Cavaillon, one of the three wardens of the Jewish community of Avignon in 1400, is identified by Steinschneider with the physician Todros of Cavaillon, the author of a pharmacopœia written partly in Hebrew and partly in Latin (Renan-Neubauer, "Les Ecrivains Juifs," p. 725). Something is known of another scholar of Cavaillon, Jacob Léon, for whom Moses Farissol Botarel in 1465 wrote a treatise on the calendar. Gross (*l.c.* p. 539) identifies this Jacob Léon with Jacob of Cavaillon, at whose suggestion Mordecai Durant Farissol copied, in the same year, a part of Levi ben Gerson's book, "Milḥamot ha-Shem."

Cavaillon was one of the four communities ("arba' ḳehillot") having a special ritual of prayers (see CARPENTRAS), this being edited in 1767 at Avignon, by Elijah Carmi, a teacher at Carpentras. A new edition of this liturgy was published in 1855 at Aix, by Michel Milhaud.

The lists of the Jews of Carpentras ("Rev. Ét. Juives," xii. 193–212) contain the names of a number of Jews called after the town of Cavaillon. In 1413–1414 there were also at Perpignan Jews who came originally from Cavaillon (*ib.* xiv. 75). At Arles R. Joseph of Cavaillon was in 1385 a member of the rabbinical college of judges in the scandalous trial mentioned in the article on CADENET, Provence. R. Isaac ben Nathan of Cavaillon was in 1582 a member of the rabbinical court of Fossano, Italy. A document of the same year, relating to the excommunication of the woman Bonastorga of Carpentras, bears the signatures of Bongoias de la Rocca and David Cohen of Cavaillon ("Rev. Ét. Juives," x. 82). At Cavaillon, in 1713, lived the poet Gad ben Judah of Bédarride, author of a thanksgiving prayer preserved in the ritual of Avignon (Zunz, "Z. G." p. 466).

The old community has almost disappeared, only three Jewish families residing in Cavaillon in 1901. The synagogue, which was repaired in 1774, has been preserved. It rests partly upon an archway under which a street passes; and this arch was probably once the gate to the ghetto. The synagogue closely resembles that of Carpentras.

G. S. K.

CAVALLERO, CAVAGLIERO (קבלירה קאבליירו): Name of a family, with branches in Provence, Africa, Turkey, and Italy.

1. Abraham ben Judah Cavallero: Lived at Fez between 1688 and 1700.

BIBLIOGRAPHY: Steinschneider, *Hebräische Bibl.* xvi. 62.

2. Isaac Cavallero: Talmudic scholar. He began the study of the Talmud at Salonica about 1630, and was a fellow-student of David Conforte ("Ḳore ha-Dorot," ed. Cassel, 52b). He is probably not identical with the Isaac Cavellero who was a preacher at Venice in the second half of the seventeenth century, and whose sermons were published by his relative Judah ben Joseph Perez under the title "Naḥal Etan" in the "Peraḥ Lebanon" (Berlin 1712).

BIBLIOGRAPHY: Azulai, *Shem ha-Gedolim*, ii. 121.

L. G. M. K.

3. Isaac de Don Shem-Ṭob Cavallero: Italian scholar; son of Shem-Ṭob Cavallero; flourished at Venice at the end of the sixteenth and beginning of the seventeenth century. He was the author of "Orden de Oraciones" (Venice, prior to 1583), an edition of the prayer-book according to the ritual of the Spanish and Portuguese Jews, and containing the Hebrew text with a translation into the Spanish vernacular; a second edition, to which the "Declaracion de los Puntos" was appended, was published at Venice in 1622. The "Orden de Oraciones" was placed upon the "Index Librorum Prohibitorum," edited by Caspar á Quiroga (p. 69b, Madrid, 1583).

BIBLIOGRAPHY: Kayserling, *Bibl. Esp.-Port.-Jud.* pp. 37, 59, 60; Wolf, *Bibl. Hebr.* iii. 1279b; Steinschneider, *Cat. Bodl.* Nos. 2123, 2404, 5328.

J. M. W. L.

4. Jacob Cavallero: Lived in Turkey about the middle of the sixteenth century, and was correspondent of Jacob Berab and of Moses Trani (Conforte, *l.c.* p. 37a).

5. Jonas Cavallero: Of Besalu; was an intimate friend of Kalonymus b. Kalonymus, the author of "Eben Boḥan" (Touchstone).

BIBLIOGRAPHY: *Monatsschrift*, xxviii. 549.

6. Moses b. Jehiel Cavagliero: Physician; died at Ancona, 1583.

BIBLIOGRAPHY: *Revue Etudes Juives*, iii. 236.

7. Shealtiel b. Solomon Cavallero: Hebrew poet; lived at Salonica about the second half of the sixteenth century, and was probably the son of Solomon Cavallero (No. 8). He is classed among the Hebrew poets by Gedaliah ibn Yaḥya.

BIBLIOGRAPHY: Carmoly, *Jachia*, p. 40.

8. Solomon Cavallero: Lived at Salonica about 1515; corresponded with Elijah Mizraḥi and with Tam (Jacob) ibn Yaḥya (Conforte, *l.c.* pp. 33a *et seq*). It was for him, or for a contemporary mathematician of the same name living at Salonica, that Ephraim Mizraḥi translated into Hebrew Georg Peurbach's "Theorica Planetarum" under the title "Ṭiorika ha-Niḳra' Mahalak ha-Kokabim."

CAVES IN PALESTINE: By "me'arah" (מערה) the Hebrew designates natural caves. The mountains of Palestine, which for the greater part are formations of soft limestone, abound in natural caves and grottoes. Most of these have developed from an initial fissure or crack in the rock, which, widening, in time became the channel of a subterranean stream. But as the latter changed its bed in the course of years, a large, dry, hollow passageway was finally left. In many places the skill of man has completed the work of nature. This has been the case more particularly east of the Jordan, and especially in the Hauran. In the latter district, artificial caves are very numerous (see Wetzstein, "Reisebericht über Hauran und Trachonitis," pp. 22, 44 *et seq.*, Berlin, 1860).

These caves are historically of the highest interest. Undoubtedly they served for the original habitations

Caves in Prehistoric Times.

of prehistoric man. In the cave where the Nahr-al-Kabir takes its rise, in the grottoes at the bridge across the river near its mouth, and again in the Ferraja grotto in the district of Kesrawan, etc., flint knives, arrow-heads, and fragments of pottery have been found, of essentially the same kind as those unearthed in Europe; while the remains of animals are largely of species that are now extinct or have disappeared from the region. This circumstance points to a time when the climatic conditions were evidently different from those now prevailing; it presupposes a temperate, if not a semi-arctic, climate. Formerly it was the common opinion that the entire people of the Horites, who, anterior to and contemporaneously with the Edomites, inhabited the mountain of Seir (Deut. ii. 12, 22; Gen. xxxvi. 20), were troglodytes, their name being connected with חור, "ḥur" (hole, cave). It is not probable, however, that this may be applied to a whole people, and it is certainly more correct to identify חורי, "Ḥori," with the Egyptian "Haru," the designation of southern Syria.

Caves in Historic Times.

Caves were used: (*a*) as dwellings, and (*b*) as burial-places. (*a*) Even in historic periods, long after houses had become the common abodes, caves served, especially in time of war, as places of refuge or as natural fortresses (compare Josh. x. 16 *et seq.*; Judges vi. 2; I Sam. xiii. 6; Ezek. xxxiii. 27; I Macc. i. 56). Robbers made them their hiding-places; shepherds used them for folds, and as dwellings when the flock was at large; and travelers rested in them at night.

(*b*) The custom of using the caves for burial-places dates from the earliest times. The entrance was closed with large stones in order to protect the bodies against men and animals. Perhaps the best known of these burial-places is the Machpelah cave at Hebron, which Abraham bought from the inhabitants for a burial-plot for himself and his family (Gen. xxiii.). The descendants of David had their plot in the caves on Zion. Even to-day a large number of vaults in the rocks around Jerusalem show how wide-spread was this custom among the ancient inhabitants of Jerusalem (see Burial).

Important Caves in the Bible.

Tradition locates the so-called Machpelah cave in the eastern part of the present Hebron, on the edge of the valley, and the mosque which now stands there is supposed to enclose it. It is certain that this refers to a holy spot of great antiquity, whose associations antedate Josephus (compare Buhl, "Geographie Palästinas," pp. 161 *et seq.*). There is some difficulty in reconciling the Machpelah tradition with that of the Mamre oaks at Hebron, and it is not improbable that these two traditions date from different epochs (*ib.* pp. 160 *et seq.*).

The cave of Makkedah (Josh. x. 16 *et seq.*), where five kings are said to have hidden in the days of Joshua, is probably identical with one of the caves near the village Al-mughar, southwest of Ekron. That of En-gedi, where the encounter between Saul and David occurred (I Sam. xxiv.), can not be definitely located. On the old road northwest of En-gedi (I Sam. xxiv. 2) several caves may be seen to-day; *e.g.*, Magharat al-Nasraniyyah and Magharat al-Saḳf. It is probable that the cave of Adullam (מערת עדלם) owes its name to a scribal error, the true reading of the passage, I Sam. xxii. 1, 4 being מצודת or מצדת (compare I Sam. xxii. 1, 4 and II Sam. xxiii. 13, 14).

E. G. H. W. N.

CAYENNE or **FRENCH GUIANA:** An island of South America, and a town of the same name situated on this island that lies at the mouth of the Cayenne or Oyaque river, in the Atlantic.

A band of Jews settled in Dutch Guiana as early as 1644. They were chiefly immigrants from Holland, who had arrived two years before from Amsterdam, under the lead of Isaac Aboab and Moses Raphael de Aguilar. After the capitulation of Recife Jan. 23, 1654, when all Dutch possessions in South America, excepting Dutch Guiana, were ceded to Portugal, the Jews having supported Holland in the struggle for supremacy (1623–54), were compelled to leave Brazil. Many of them returned to their native country, whither their conquerors accorded them a safe-conduct; others migrated to New York or the West Indies, and the majority of them, under the captainship of David Nassy, a native Brazilian and a cultured and influential man, settled at Cayenne, in French Guiana. The directors of the West India Company, alive to the possibilities of such a colony, and eager to encourage Jewish settlements everywhere, granted them, under date of Sept. 12, 1659, a most liberal Charter of Privileges ("Vrijheden onder Exemptien"), wherein freedom of thought, liberty of conscience, and political autonomy were vouchsafed to the new colonists headed by David Nassy, who was the accredited representative of the company. This document, one of the most remarkable in American Jewish history, numbers 18 paragraphs and has been published at various times (see bibliography). Attracted by these generous inducements, the colonists thrived, and encouraged their coreligionists in Holland and elsewhere to join them. In 1660 one hundred and fifty-two Jews of both sexes arrived from Leghorn, Italy (on the 9th of Ab = August), and among them was the famous poet, historian, and litterateur Don Miguel Levi de Barrios, who afterward visited the West Indies, where his wife Deborah died. The colony prospered for nearly five years, but owing to the constant wars between Holland and Portugal and to the frequent depredations of the French, the settlement was, on May 15, 1664, transferred to Surinam, Dutch Guiana, where it flourished for two centuries, with occasional interruptions. Among the "Articles and Conditions" of surrender, agreed upon and signed by the French and the Dutch, March 15, 1664, when the island was ceded to France, we read that the Jews stipulated, among other things, "that the expenses incurred by the patron (patroon) and individuals of the Hebrew colony shall be repaid them," and that they be given "the free and public exercise of their religion."

It was on the Ile du Diable, off the coast of Cayenne, that Capt. Alfred Dreyfus was imprisoned.

Kohut, in Simon Wolf's *American Jew as Patriot, Soldier, and Citizen*, pp. 449, 451-455, Philadelphia, 1895. Full text of the Charter is given in the second, third, and fourth books in the above list.

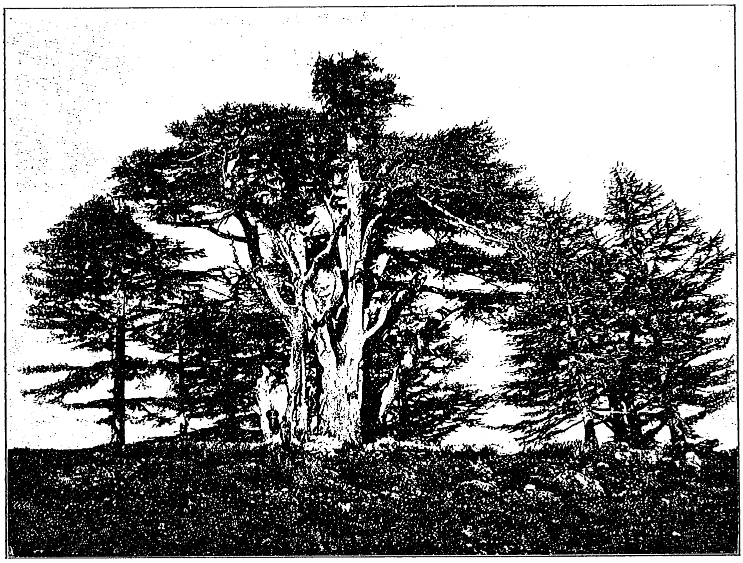
A. G. A. K.

CAZÈS, DAVID: Moroccan educator and writer; born at Tetuan in 1851. Sent to Paris in his early youth, he was educated by the Alliance Israélite Universelle, and at the age of eighteen was commissioned to establish and direct several primary schools in the East; namely, at Volo in Thessaly (1869), at Smyrna (1873), and at Tunis (1878-93). In each of these places he took part also in the organization of the communities. At Tunis especially the official organization of Judaism by the government of the French protectorate was his work. Since 1893 he has been in Buenos Ayres, Argentine Republic, serving as a member of the administrative committee of the colonization fund founded by the Baron Maurice de Hirsch under the name of the Jewish Colonization Association.

In 1878 Cazès was appointed an officer of the Order of Nishan Iftikhar of Tunis; and the French government in 1886 awarded him academic laurels, and in 1889 the rosette of Chevalier of the Legion of Honor.

Cazès is the author of the following works: "Essai sur l'Histoire des Israélites de Tunisie," Paris, 1889; "Notes Bibliographiques sur la Littérature Judéo-Tunisienne," Tunis, 1893, giving an exact picture of the literary life of the Jews of Tunis. He also contributed a large number of articles to the "Revue des Etudes Juives" and other Jewish periodicals.

S. M. Fr.



Cedars of Lebanon.
(From a photograph by Bonfils.)

CEDAR (ארז): A tree of the pine family frequently mentioned in the Old Testament, where the "cedar of Lebanon" is generally meant. The cedar-tree grows best in a high, dry, and sandy region, and it found these requirements in the northern part of Palestine in the Lebanon district. In this district there are to be seen trees that reach a girth measurement of no less than forty-two feet. The tree spreads its roots among the rocks, and thus secures a strong hold. From this hold the tree sometimes grows to a height of ninety feet, but this scarcely gives an idea of its size, for the cedar usually grows horizontally, the limbs out from the stem as well as the branches out from the limbs. The leaves are dark green, about an inch in length, and are evergreen; the shade they make is broad and dense. The wood of the cedar-tree is valuable for building purposes, since the oil in it prevents destruction by dry-rot and worms. Cedar-oil was used by the Romans for the protection of their manuscripts.

Various were the uses to which cedar was put in Biblical times. It was used by Solomon in building the Temple (I Kings vi. 18), the inside of which was all of cedar, no stone being visible. On the outside, also, cedar was used (I Kings vii. 12). The altar was made of the same wood (I Kings vi. 20). Later on it was employed in building the Second Temple (Ezra iii. 7). From Ezek. xvxii. 5 it is clear that cedar was used in the making of masts. In religious service it was used in cleansing the leper (Lev. xiv. 4, 49, 51, 52) and in the ceremony of the Red Heifer (Num. xix. 6).

It is natural to find so striking a tree introduced as a favorite figure of the Biblical writers. A maiden describes her lover as a choice cedar (Cant. v. 15). Oftentimes a strong nation is compared to the cedar; for example, the Amorite (Amos ii. 9) and Assyrian (Ezek. xxxi. 3). In Zech. xi. 2 it is a synonym of "powerful." The strength of the cedar as well as of the leviathan is brought out in Job xl. 17. Another favorite figure is based on the luxuriance of the growth of the cedar. A flourishing land is evidenced by the presence of the cedar (Isa. xli. 19); and the prosperity of the righteous is compared to it (Ps. xcii. 13 [A. V. 12]).

In Num. xxiv. 6 cedar is mentioned as growing beside water. This seems to be impossible; but it is to be noticed that the term "cedar" was applied very often to trees that were really not cedars. In Rosh ha-Shanah 23a the statement is made that the inhabitants of Palestine called ten different trees cedar.

J. JR. G. B. L.

CEDRON: **1.** Name of the brook Kidron as given in John xviii. 1. Near the stream was the garden in which Jesus was taken by the officials after he had been betrayed by Judas (see Kidron).

2. A place mentioned in connection with Jamnia (the "Jabneh" of II Chron. xxvi. 6) and fortified by Cendebeus at the command of Antiochus (I Macc. xv. 39). From Cedron as a base, Cendebeus began to ravage Judea. According to the account of Josephus ("Ant." xiii. 7, § 3), Simon Maccabeus, although at this time quite old, himself led the attack and drove back Cendebeus; but, according to I Macc. xv. 39–41, xvi. 9, Simon delegated the command to his sons Judas and John. Judas was wounded, but John continued the pursuit to Cedron and thence to Azotus (Ashdod). Cedron is perhaps the same as Gederoth (Josh. xv. 41; II Chron. xxviii. 18), and to be identified with the modern Ḳatra, three and one-half miles southwest of Ekron, the modern 'Aḳir.

Bibliography: Buhl, *Geographie des Alten Palästina*, p. 188; Guérin, *Judée*, ii. 35 *et seq.*

E. C. G. B. L.

CELIBACY: Deliberate renunciation of marriage. In the Old Testament there is no direct reference to the subject. The prophet Jeremiah was a celibate (Jer. xvi. 2). He seems to have regarded it as futile to beget offspring doomed to death in the impending national catastrophe (*ib.* iii. 4). The pessimistic author of Ecclesiastes, although no admirer of woman (Eccl. vii. 26, 28), counsels "enjoying life with a woman whom thou lovest" (*ib.* ix. 9).

In post-Biblical literature Jewish opinion stands out clear and simple: marriage is a duty, and celibacy a sin. "The world was created to produce life; He created it not a waste, He formed it to be inhabited" (Isa. xlv. 18; Giṭ. iv. 5 = 'Eduy. i. 13). "Be fruitful, and multiply" (Gen. i. 28) is taken as a command; marriage with a view to that end is a duty incumbent upon every male adult (according to some the duty devolves also upon woman; Yeb. vi. 8; Maimonides, "Yad," Ishut, xv.; Shulḥan 'Aruk, Eben ha-'Ezer, 1, 13).

Abstention from marital intercourse on the part of the husband exceeding a legitimate limit, which varies with the different occupations, may be taken by the wife as ground for a divorce (Ket. v. 6, 7). A single man who is past twenty may be compelled by the court to marry (Shulḥan 'Aruk, *l.c.* i. 3). Isserles adds that this custom is obsolete. Exception is made in favor of a student, who may postpone marriage until a time when his education is complete and beyond the possibility of being endangered by the cares incident to procuring a livelihood (*ib.*; the source is Ḳid. 29b). "He who is without a wife is without joy, without blessing, without happiness, without learning, without protection, without peace; indeed, he is no man; for it is written (Gen. v. 2), 'Male and female created He them, and called their name Man [A. V., "Adam"]'" (Yeb. 62b, 63a; Shulḥan 'Aruk, *l.c.* l. 1, note). "He who is not married is, as it were, guilty of bloodshed and deserves death: he causes the image of God to be diminished and the divine presence to withdraw from Israel" (Yeb. 63b, 64a).

The only known celibate among the rabbis of Talmudic times is Ben 'Azzai, who preached marriage to others, but did not practise it himself. "My soul is fond of the Law," he is reported as having said; "the world will be perpetuated by others" (Yeb. 63b). Regarding the passages which appear to indicate that Ben 'Azzai was married (Ket. 63a; Soṭah 4b), see Tosef., Ket. *s.v.* ברתיה, and Yeb. 63b, *s.v.* שיתקיים. The excuse is recognized by the Shulḥan 'Aruk (*l.c.* i. 4); it is by no means recommended to follow an example which, at best, is considered exceptional. According to Josephus ("B. J." ii. 8, § 2) marriage was repudiated by some of the Essenes. Inasmuch as intercourse with woman was regarded as polluting, the aspiration to the highest degree of Levitical purity and sanctity may have led them to the rejection of marriage. There is nothing in Jewish literature to parallel Matt. xix. 12 in phraseology or motive (Dalman, "Worte Jesu," p. 100). Paul's views on celibacy may be found in I Cor. vii. See Asceticism, Essenes.

K. M. L. M.

CELSUS (Κέλσος): Greek polemical writer against Christianity; flourished in the second century. He was the first pagan who denounced Christianity, and in his work, "The True Word" (Λόγος 'Αληθής), he attempted not only to refute but to ridicule the doctrines of Christianity. Although the work has been lost, large fragments of it are preserved in the apology of Christianity ("Contra Celsum," in eight books) written by Origen in answer to Celsus. An attempt was recently made by Keim and Muth to reconstruct the original from these fragments. Origen was not clear as to the person of Celsus; he mentions two Epicureans by that name, one of whom was said to have lived under Nero and the other under Hadrian; and it was against the latter that he directed his polemic. In designating his opponent by the opprobrious epithet of "Epicurean," Origen was misled by his prejudice; for Celsus, according to his own teachings, was an eclectic, following Plato and perhaps also Philo. Moreover, he must have lived after Hadrian's time, probably flourishing about 180 under Marcus Aurelius (161–180), since he mentions the Marcionites and the Marcellians. Lucian, who also denounced Christianity, dedicated to him his "Alexander, the Lying Prophet" ("Alex." xxi.).

Celsus and the Jews.

In the first book of Celsus from which Origen took his extracts, a Jew, introduced by Celsus, addresses Jesus; in the second book, the Jew addresses his Jewish coreligionists who have embraced Christianity; and in the remaining six books Celsus speaks in his own person. All this shows, as Mosheim says, that Celsus mingled with the Jews, getting from them the story of the life and passion of Jesus. Yet the Jew introduced knew so little about his own religion as to describe it often incorrectly; hence his introduction in the work is merely a rhetorical device, and Celsus himself is the speaker, promulgating opinions which he had heard or learned from Jews. Whether he reproduced mere verbal assertions of the Jews (compare Origen, "Contra Celsum," vi. § 27, and Justin, "Dial. cum Tryph." pp. 10, 17, 108), or information from written Jewish sources, can hardly be determined. Keim believes that Tertullian ("De Spect." xxx.) had a written Jewish polemical work before him; but it is certainly wrong to assume that Celsus used the "Toledot Yeshu."

Celsus was by no means friendly to the Jews, regarding them as slaves escaped from Egypt. He denounced their history, especially that contained in Genesis, as foolish fables (iv. 5, § 2), affirming that sensible Jews and Christians look upon these things as allegories. He knew the divine names "Adonai" and "Sabaoth," the rite of circumcision, and the command against eating pork; and he ridiculed these and similar laws. Although understanding why the Jews should cling to their own laws, he thought Christians foolish for renouncing Hellenism in order to become converts to a false doctrine. He compared the disputes of the Jews and Christians about the Messiah with the dispute about the shadow of the ass (iii. 1, § 2), and asked whether Moses or Jesus was right, since the latter countermanded what the former had ordained.

It has been assumed that Celsus' work contained material not to be found elsewhere; but he knows no more than is found in the Gospels, as has been proved. All beyond this is merely an addition to what has been called the Jesus myths.

Yet there are connections between Celsus and Judaism that must be emphasized; *e.g.*, he asserts that Jesus was the illegitimate son of a certain Panthera, and, again, that he had been a servant in Egypt, not when a child, as according to the New Testament, but when he was grown, and that he learned there the secret arts (i. 9, § 7). These statements are frequently identical with those of the Talmud. Celsus might have heard this from the Jews; he makes his Jew say that he could tell more about Jesus if he chose. Origen, however, rightly explains this phrase as a rhetorical device (ii. 3, § 1). Celsus agreed with the Jews in the chief points of their controversy with Christians, denying the divinity of Jesus, declaring all the marvelous stories about him to be fables similar to those of Greek mythology, and saying that the Jews were right in refusing to accept Jesus, especially as he was betrayed even by his own disciples, and left helpless into the hands of his enemies.

Origen.

Origen had no single historic fact to oppose to Celsus' assertions; he too knew only what the Gospels recount, but he interpreted them as a faithful Christian, and explained allegorically even the difficult passages in the Old Testament. Celsus gave all the ideas on miracles, angelology, and demonology current at his time even among the Jews; so that his treatise is important also for the study of Judaism.

CEMETERY: A place for the burial of the dead. The word "cemetery" is derived from the Greek *κοιμητήριον*, "the place where the dead sleep" (from *κοιμάω* ("to sleep"), used of the dead in I Kings xi. 43, LXX.; II Macc. xii. 45; Ecclus. (Sirach) xlvi. 19, xlviii. 13; Matt. xxvii. 52; I Cor. xv. 20, and is applied almost exclusively to Jewish and Christian graveyards (see Eusebius, "Hist. Eccl." vii. 11, 13; "Apost. Const." vi. 30; and Herzog-Hauck, "Real-Encyc." *s.v.* "Koimeterien"). In Hebrew it is variously termed: בית הקברות ("the place of sepulchers," Neh. ii. 3; Sanh. vi. 5), בית עולם ("house of eternity"; "long home," Eccl. xii. 5, A. V.), or בית עלמין (Eccl. R. x. 9; Targ. Isa. xlii. 11; Yer. M. Ḳ. i. 80b), and בית חיים ("house of the living," after Job xxx. 23 and Isa. xxvi. 19). The modern euphemistic name is "the good place," and among Polish-Russian Jews "the pure place." Non-Jewish names are: "hortus Judæorum" (garden of the Jews), probably from the trees surrounding the graves (Abrahams, "Jewish Life in the

Middle Ages," p. 77); "mons Judaicus" (Jewish hill; Berliner, "Gesch. der Juden in Rom," ii. 14); and "Juden-Sand" or "Sandhof" (sand-yard.)

(From a photograph.)

Site.

The ancient law (see BURIAL) required the burial-place to be at least fifty ells distant from the nearest house (B. B. ii. 9); the place for the cemetery was therefore selected as remote as convenient from the city (Luke vii. 12). In Talmudical times the tombs were either in caves—hence מערתא, frequently the name for a cemetery (M. Ḳ. 17a; B. M. 85a; B. B. 58a)—or hewn out of rocks; and the site was marked by a whitewashed stone (ציון, Sheḳ. i. 1) to warn passers-by against Levitical impurity. MAUSOLEUMS, MONUMENTS, and inscribed TOMBSTONES, though not unknown, were exceptional. In the Middle Ages the Jewish cemetery was as a rule situated at the extreme end of the ghetto, the hospital and other communal buildings being frequently erected in the neighborhood. The limited area often made it necessary to inter bodies above those previously buried; and thus the rule became general to leave a space of six handbreadths between them (Ṭur Yoreh De'ah, 363, after Hai Gaon, and Sifte Cohen to Yoreh De'ah, 362, 4).

Medieval Cemeteries.

The Jewish cemetery in London in 1285 was within the city walls and was surrounded by a protective wall (Abrahams, *l.c.* p. 78), as was one in Rome (Berliner, *l.c.* i. 14; compare *idem*, ii. 62). At times, however, the cemetery was at a great distance from the town (Berliner, *l.c.*; Abrahams, *l.c.*). In fact, it was frequently the case that many townships (ישובים = "settlements") had one cemetery in common. The London cemetery was the only one in England up to 1177; the Hamburg Jews had bury their dead in Altona; the Amsterdam Jews, in Ouderkerk (Schudt, "Merkwürdigkeiten," vi. 38, § 2; Jacobs, "Jews of Angevin England," p. 62); the Jews of both upper and lower Bavaria, in Regensburg (Berliner, "Aus dem Leben der Deutschen Juden im Mittelalter," p. 118); and the municipality often imposed a tax for the right of burial (Stobbe, "Rechtsverhältnisse der Juden," p. 21).

In ancient times the cemetery was a necropolis consisting of family sepulchers, and common burial-grounds, in which criminals had special sections assigned to them (Sanh. vi. 5; compare "the potter's field," Matt. xxvii. 7). In the Middle Ages the area was often limited, but the dead were as a rule buried in a row (Yaïr Bacharach, Responsa, No. 239). Rabbis and men of distinction were placed in a special row (see Feuchtwang, in Kaufmann Gedenkbuch, p. 370; and HOLDHEIM). On the other hand, baptized Jews and persons of evil repute, as well as suicides, were buried in a corner outside of the line (Shulḥan 'Aruk, Yoreh De'ah, 345 and 362). In regard to the direction in which the head was

(From Ulrich, "Jüdische Geschichte in der Schweiz," 1768.)

placed custom differed: some preferred it toward the east; others toward the west or south; others, again, toward the exit of the cemetery (see Horowitz, "Inschriften des Alten Friedhofs," Introduction, iii.). Each cemetery had, as a rule, a place for the ablution of the dead, called the Ṭaharah House, in which the prayers were also recited and the Haḳḳafot made. Adjacent to this hall or house lived the keeper, whose duty it was to watch the cemetery to prevent profanation.

In Talmudic times the cemetery was visited on fast-days for the sake of offering prayer at the graves of the departed, "in order that they may intercede in behalf of the living" (Ta'an. 16; Yer. Ta'an. ii. 65a; compare Soṭah 34b); and this remained the custom throughout the Middle Ages (see Isserles, Shulḥan 'Aruk, Oraḥ Ḥayyim, 459, 10, and 481, 4; Schudt, *l.c.* vi. 38, 78; Berliner, *l.c.* pp. 118 *et seq.*).

Sacredness of the Cemetery.

Any occupation showing disregard of the dead, such as eating, drinking, profane work, even the wearing of ṭallit and tefillin, or the use of a scroll of the Law, is forbidden in the cemetery; nor may the vegetation growing there, or the ground itself, be used for private purposes (Meg. 29a; Shulḥan 'Aruk, Yoreh De'ah, 367, 3-4, and 368). The non-use of the grass, however, often led to total neglect of the cemetery, which gave it a very dreary aspect not at all in keeping with its original design. In Talmudic times great care was bestowed upon the cemetery; so that the saying became current, "The Jewish tombs are fairer than royal palaces" (Sanh. 96b; compare Matt. xxiii. 29, and Schürer, "Gesch." 3d ed., iii. 14). Orthodox rabbis in modern times, however, have strongly objected to the decking of graves with flowers (see the report of a bitter controversy in Löw's "Ben Chananjah," 1858, pp. 433-442). A singular custom in the Middle Ages permitted first-born animals, which were held too sacred for private use (Yoreh De'ah, 309, 1), to pasture in the cemetery (Schudt, *l.c.* vi. 8, 39). On the other hand, the cemetery was an object of fear and superstition, inasmuch as it was regarded as the dwelling-place of spirits and demons (Isa. lxv. 4; Matt. viii. 28), and dangerous to remain in overnight (Ḥag. 3b; Nid. 17a); wherefore cabalists deprecated the idea of women—who since Eden's days have had a special predilection for the archfiend—visiting the cemetery.

On entering a cemetery the following benediction is to be recited: "Blessed be the Lord our God, King of the Universe, who created you in justice, who maintained and supported you in justice, who caused you to die in justice, and who recorded the number of you all in justice, and who is sure to resuscitate you in justice. Blessed art Thou, O Lord, who revivest the dead" (Ber. 58b). Compare an older and milder version in Yer. Ber. ix. 13, and Tosef., Ber. vi. 5: "Blessed be He who recordeth the number of you all. He shall judge you all, and He shall raise you all. Blessed be He who is faithful in His word, the Reviver of the Dead." Compare also Pesiḳ. R., ed. Buber, 46b, and Baer's "'Abodat Yisrael," p. 586. For other prayers composed later, see "Ma'abar Yabboḳ," compiled by Aaron Berechiah of Modena; L. Landshuth, סדר בקור חולים מעבר יבק וספר חיים, Berlin, 1867; and B. H. Ascher, "The Book of Life," 4th ed., London, 1874. A manual of prayers and devotional readings upon visiting the cemetery was prepared by the

New York Board of Jewish Ministers, and published (1898) under the title of "The Door of Hope."

Tragic Fate of Jewish Cemeteries.

The fate of their cemeteries forms one of the most tragic chapters in the tragic history of the Jewish people. Every massacre of the living was, as a rule, followed by furious attacks on the dead in their graves and by a wanton spoliation of the tombstones. Graveyards, though regarded as asylums by the pagan Roman and Teuton alike, were not sacred enough in the eyes of the numerous mobs to serve as a last refuge for the martyr race during the centuries of persecution. Old selihot and many eye-witnesses, quoted in Zunz, "Z. G." pp. 396-401, tell the same sad story of the Jewish cemeteries. Most of the tombstones were scattered about the cities and used for building and other purposes; and only occasionally were the lines of an inscription recorded by the historian. There is consequently little hope that the history of the old Jewish communities will ever, like that of buried cities of old, be unearthed. Nearly every trace of the ancient cemeteries and settlements has been wantonly effaced. Still, a few scanty records saved here and there, and occasional discoveries of scattered tombstones and of graveyards long concealed from sight, have brought considerable material to light, with which the historian is enabled to reconstruct in part the history of "those that sleep in the dust" and to revive their memory. See CATACOMBS and TOMBSTONE INSCRIPTIONS.

CENSER: An implement shaped like a bowl or a pan, intended for the burning of incense. In the English Bible the term is employed indiscriminately to render two Hebrew words which seem to have denoted different objects. One of these words, "miḳṭeret," occurs only three times (once in the variant "meḳaṭṭerot," II Chron. xxx. 14). This, according to its etymology, indicated a censer which was among the appointments of the Temple required for the performance of holy offices. The other word, "maḥtah," is mentioned in the Bible twenty-one times. In the English version it is rendered thirteen times as "censer," four times as "fire-pan," three times as "snuff-dishes," and once as "snuffer." Derived from the root "ḥatah" (to gather together coal or ashes), it was probably the name of various contrivances intended to remove the ashes or to carry live coals. Dillmann and Knobel contend that it was the saucer in which the snuffers were deposited. In Ex. xxv. 38 it stands for ladles used to remove the burnt portion of the wick (see Rashi on the passage). These may have been of small size. The larger ones in connection with the altar for burnt offerings (Ex. xxvii. 3; Num. xvii. 3 *et seq.*) may more properly be rendered by "fire-pans." From Mishnah Kelim ii. 3, 7 it is evident that various forms of these were known; some being open without rims, while others, designated as "complete," were provided with raised rims.

The maḥtah was, as a rule, not used to burn incense. From the documents, as now incorporated in the Pentateuch, it appears that only on the golden altar, or, as it is also called, "the inner altar," could incense be offered (Ex. xxx. 1–7; xl. 26, 27). The critical school has indeed contended that the inner or golden altar was not recognized in earlier times. But this does not weaken the evidence of the documents to the effect that in post-exilic periods censers were not proper utensils for the burning of incense. The story of Korah's adherents (Num. xvi. 17, 18), as well as Ezek. viii. 11, proves that in the opinion of the later days the use of the maḥtah for this purpose was regarded in the light of an illegal profanation.

But the maḥtah was used in conveying incense to the altar. An exception to this was in the ritual for the Day of Atonement. The high priest filled the censer with coals from the altar and, placing upon them a handful of incense, caused the smoke to cover the mercy-seat of the Ark in the Holy of Holies (Lev. xvi. 12, 13). These "pans" were of bronze, silver, and gold. Mishnah Tamid v. 5 indicates that those in the Temple were complicated in construction and of costly material (see also Yoma 43b).

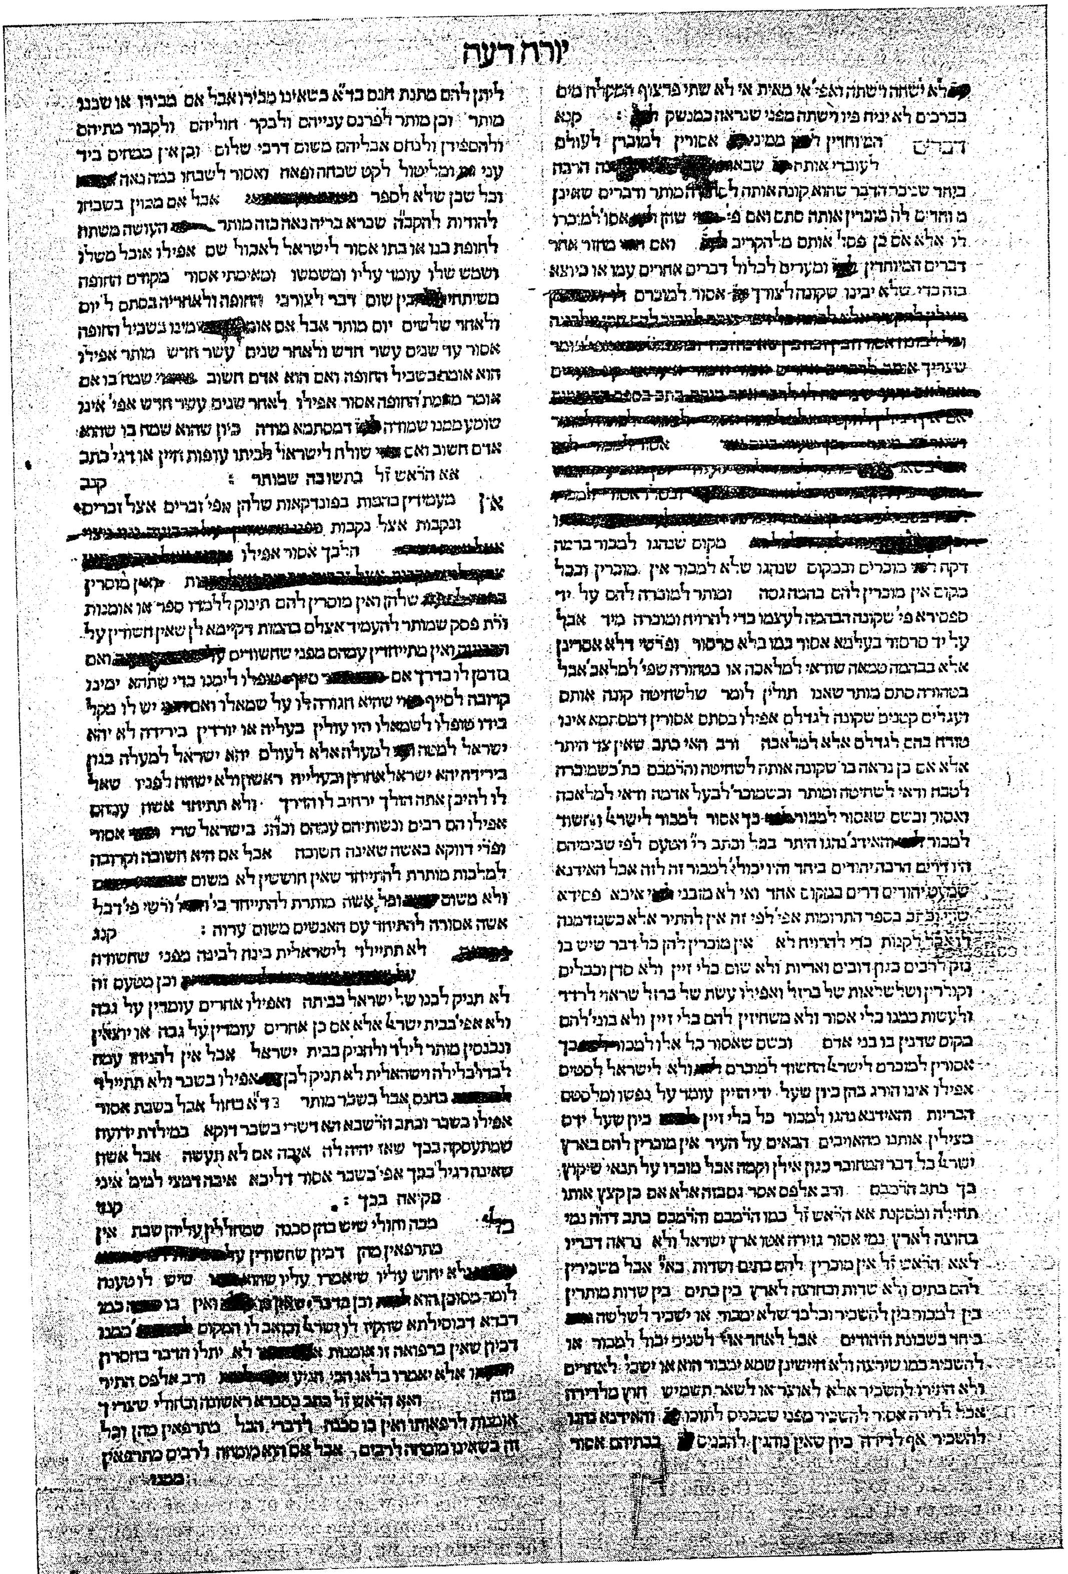
CENSORSHIP OF HEBREW BOOKS: Censorship is the regulation, first decreed by the Church and then carried out either by that institution or by the state, whereby books (both manuscript and printed) were examined for the purpose of ascertaining whether they contained heretical or other objectionable passages. Upon this examination depended the conditions under which a book might be used or printed, or its condemnation. If a book was unconditionally rejected, it was laid under the ban, and all copies that could be found were destroyed. If a book was authorized conditionally, all the words and passages that the authorities found objectionable had to be expunged, being either omitted entirely in works that were about to be printed, or rendered illegible in those that had already been set up. Censorship, however, as regards the books of the Jews, is generally taken to mean only the revision, expurgation, or purification (זקוק) of the text undertaken in Italy by persons appointed by the Inquisition.

The Words "Censura" and "Censor."

The word "censura," in the sense of objection to questionable passages, is found from the middle of the fifteenth century. "Censor" was the title of the official appointed by the Church to decide, after examination, whether a book was beyond all revision, and hence would have to be prohibited, or whether it could be revised and allowed to circulate after expurgation. But for the examination of Hebrew books before printing there were no censors, in the exact meaning of the word, in the sixteenth and seventeenth centuries. Such censors, employed by the state, are not found before the second half of the eight-



יורה דעה

A CENSORED PAGE FROM JACOB BEN ASHER'S "ARBA' ṬURIM," PRINTED BY SONCINO IN 1516.
(In the Columbia University Library, New York.)

eenth century, and then not in Italy, the chief seat of censorship, but in the territory of Austria. Since the beginning of the nineteenth century they are met with in Russia also. The description "censor" is not once found added to the signature in the numerous certificates of censorship of Hebrew books that have come down from Italy; but "reviser" ("revedetor," 1557; "reveditor," 1597; "riveditore" and "revisore" in the seventeenth century) is the usual title, and, as an exception, "expurgator" (1627). It would be more correct, therefore, to speak of the "revisers" than of the "censors" of Hebrew books in Italy. The three converts appointed by the bishop of Mantua to revise the Hebrew books are only occasionally (and then incorrectly) designated as "censores," in a document dated Aug. 27, 1595 (printed by Stern, "Urkundliche Beiträge," No. 158). Evidently none of them ever bore the title "censor" or added it to his signature.

No Censorship Proper.

There was no censorship for Hebrew books appointed and authorized by the Church as such. For even after a most careful expurgation the books of the Jews were not to be given such ecclesiastical authority as was conferred upon non-Jewish works when revised and certified by censors. Therefore the persons employed to examine the Hebrew books were not considered by the Church as censors in the full meaning of the word.

The censors (using the term in its common acceptance) proceeded as follows: The Hebrew books were demanded from their Jewish possessors in the name of the Inquisition, and were handed over to the local office. Concealment of books was rigorously punished, not only by seizure of the books and by large fines, but, under certain circumstances, also by imprisonment and by confiscation of property. The books collected were examined by the appointed revisers, who destroyed the interdicted ones, and punished their possessors. The objectionable books were then expurgated and restored to their owners with a certificate of censorship. The Jews had to provide the costs of the censorship; that is, the payment of the revisers. It was forbidden, on pain of heavy punishment, to restore the expurgated words, or to supply the missing passages between the lines or in the margins.

Objectionable Phrases and Passages.

All passages which, in the opinion of the revisers, contradicted the doctrines, regulations, or customs of the Christian Church, or contained blasphemies, heresies, or errors, were condemned. Thus they rendered illegible in Hebrew books any account of Christians and baptized Jews, clericals or heretics, the uncircumcised, Judæophobes, or observers of strange rites (עובדי עבודה זרה), unless the context showed unmistakably that only the idolatry of antiquity, and not Christianity, could be intended. They also expurgated all references to Judaism as the one true religion in contrast to all the others; all mention of the Messiah to come; any passages of Scripture interpreted apologetically in favor of Judaism, or polemically in an anti-Christian sense; all complimentary epithets (as, for instance, קדוש, צדיק = "pious," "holy") when applied to the Jewish race, to a Jewish community, or to individual Jews, especially to Jewish martyrs (in the Latin edition of Benjamin of Tudela's "Itinerary," expressions like "bonæ, felicis," or "probandæ memoriæ," etc., following the names of rabbis; "honesti viri," following "Judæi"; "sacra" before "synagoga," etc., are also condemned by the papal index of 1612). The revisers also deleted any reflection on non-Jews and non-Jewish matters, or even a commendation of Jews or Judaism, that could be construed into a reflection on the opposite parties; all expressions like מלכות הרשעה, מין, רומי, אדום, גוי ("wicked kingdom" "sectarian," "Roman," "Edom," "stranger"), that really or apparently referred to Christians and Christianity; all mention of the word תלמוד ("Talmud") or of the euphemistic phrase ירום הודו ("may his dignity be exalted"; usually applied to rulers), and similar expressions, when appended to the names of non-Christian rulers.

Proceedings in Detail.

The words to be expurgated were scored through more or less heavily with pen and ink, and sometimes were rendered quite illegible by means of cross-lines. In consequence of this heavy crossing with acid ink, the paper in the course of time frequently crumbled, as was especially the case with prayer-books, Bible commentaries, and liturgic works, wherein many so-called anti-Christian passages were treated with unusual severity. At the same time, in many other cases, the ink of the expurgator has in the course of centuries gradually faded and revealed the original text. The application of printing-ink, to render the passage completely and permanently illegible, seems to have been an invention of nineteenth-century censorship. Occasionally the objectionable passage was emended, not by being stricken out, but by the addition of one or more words, such as של after צלמים עבו"ם (עבו"ם = עובדי כוכבים ומולות, "worshipers of the stars and constellations"), in order to exclude any possibility of applying the word צלמים to the holy images of the Christians. Sometimes a totally unobjectionable word was substituted for that erased by the reviser: thus, instead of גוי, that might be referred to the Christians, was inserted the word כותי ("Cuthean") or בבלי ("Babylonian"); and for עבודה זרה, abbreviated into ע"ז ("strange rite"), which might also mean Christianity, was substituted עבודת אלילים, abbreviated ע"א ("idolatry"). Still, such emendations can hardly have been made by the Christian revisers, on account of the trouble connected therewith; they were probably undertaken by the Jewish owners themselves, either under compulsion or as a precaution. From the end of the sixteenth century, whenever a large part of the text of a folio, of a page, or even of a column was considered objectionable, the reviser, not taking the trouble to strike out the several expressions and passages, preferred to deal summarily by cutting or tearing out the whole folio or a part of it. This explains for example the absence of several folios from the middle (ch. iii., § 25) of Joseph Albo's "'Iḳḳarim" in most of the Italian copies of the first three editions.

In several cases it has been definitely stated that the revisers lightened their work either by correcting

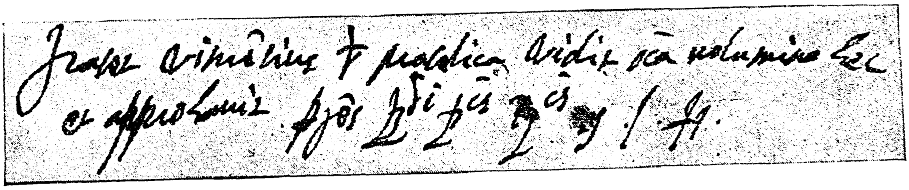
EXPURGATED PAGE FROM "SEFER SHA'AR HA-SHAMAYIM," OF GERSHON BEN SOLOMON. PRINTED AT VENICE, 1547."



Frater Vincentius [illegible] Matelica vidit [illegible] volumine hec
et approbavit [illegible]

HOLOGRAPH APPROBATION OF THE CENSOR VINCENTIUS MATELICA ON FRONT COVER OF "SEFER SHA'AR HA-SHAMAYIM."

only one copy of each book, and using that as a pattern for all the other copies of the same edition, or by employing the so-called "Index Expurgatorius" (ספר הזיקוק), a list of passages to be expunged, prepared either by themselves or other experts.

Censor's Certificate.

When the work of expurgation was finished, a short certificate by the censor, in Latin or in Italian, occasionally in Hebrew, or in Italian and Hebrew, was affixed to the last page of the book, or sometimes to the title-page. The oldest censor's note extant is as follows: "1555 Die 10. dec[em]bris Reuisus per D[ominum] Jac[obu]m Geraldini comiss[arium] ap[ostoli]cum. Cæsar Belliossus Curiæ Ep[iscopa]l[i]s Bonon[iensis] et dicti D[omini] Comiss[arii] not[a]r[ius] uicar[ius]," which may be translated: "Dec. 10, 1555, Jac. Geraldini, apostolic commissioner, revised this book and Cæsar Belliossus, notary (and vicar ?) testified to this by his signature to the bishop of Bologna and to the above mentioned commissioner." There is a similar endorsement of the episcopal notary at Reggio made in 1556 by order of the above-mentioned apostolic and ducal commissioner Geraldini.

The earliest censor's certificates (and even those as late as 1604) were formulated, at the request or with the consent of the ecclesiastical authority, by the notaries or the vicars of the Inquisition, who sometimes added the information that the inquisitor N. N. authorized the book, and that he (the notary or vicar) signed by order or in the place of the former. Toward the end of the sixteenth century, and less often during the seventeenth, the local inquisitor signed alone, sometimes adding a statement to the effect that he had commissioned the reviser N. N. to look through the book. In 1594 a reviser (Hippolitus Ferrarensis of Cremona) testified to the effect that the book revised by him had been passed by the Inquisition with the permission of the vicar N. N. A double signature to the same revision is also often found; as, for example, that of the reviser commissioned by the Inquisition, and below it that of the inquisitor by whom the order was given (end of the sixteenth century, at Turin); or that of the reviser, and below it that of the notary (1600).

Beginning with 1557, censors' certificates of the reviser—who sometimes adds that he has revised the book by order of the inquisitor (1590, 1622; Ancona, 1629) or of the Inquisition (1687)—are found side by side with these censors' certificates signed on the authority of the Inquisition by its officials, which, however, were declared inadmissible by the Roman Curia from the end of the sixteenth century. Sometimes, instead of the signature of the reviser himself, that of another person occurs (1622), with the remark that the revision has been undertaken by order of the appointed corrector, N. N., or that the book has been revised by another in the presence of the signer, by order of the Inquisitor. A curious entry of the year 1566 is found, to the effect that Rabbi Judah ha-Dani revised the book with the permission of the Inquisitor of Alexandria, Vincentio Perera. The books revised at Mantua in 1597 often have the signatures of two revisers, Domenico Irosolomitano and Alessandro Scipione. In most cases, however, the expurgation is testified to by one signature only, often containing merely the name of the expurgator, but occasionally other matter, as date, place, the nature of work done (correction, expurgation, revision, seldom approbation), and details of the commission (middle of sixteenth century): Vittorio Eliano, baptized grandson of the famous grammarian Elijah Levita of Venice wrote: "De ordine dei Essecutori contra la Biastema" (by order of the Executive Commission against Blasphemy); others wrote: "1622, by order and in the name of the bishop"; "1623, by the order of Rome"; "1683, by order of the archbishop of Urbino"; "1754, by order of the magister Sacri Palatii." The following protest, written in 1640–41 by the corrector Girolamo da Durallano, in the name of the possessor of the book is an exception: מלות כללות לגנאי על עכו"ם לא על הנוצרים נדפסו, probably meaning that expressions of disdain (כללות, probably misspelled for קללות) have been applied not to Christians, but to idol worshipers. Once, in 1754, in addition to the certificate of the reviser, Peruzzotti, there occurs a warning to the owner of the book (who has affixed his signature thereto), that the restoration of the erased words is forbidden on pain of a fine of 100 scudi.

Renewed Revision.

As the censorship of Hebrew works was never given an authoritative character, the Church refusing any responsibility for conscientious expurgation, books that had once been revised and attested could be again demanded for censorship, either by the Inquisition of another place, or even by the same local Inquisition. Frequently books are found containing five different censors' certificates within half a century; hence it is evident that the certificate of expurgation was by no means equivalent to an ecclesiastical sanction of the expurgated book. The repeated domiciliary visits and revisions of books in the sixteenth century may have been due to the suspicion that some Jews owned prohibited books, such as Talmud treatises. But even after experience had shown how groundless these suspicions were, the authorities did not cease to demand Hebrew books. Even works published with the permission of the authorities ("con licenza dei superiori"), and, hence, examined and sanctioned before printing, had to be produced again and again for purposes of censorship. Furthermore, the conscientiousness of the earlier revisers was sometimes doubted; and they were openly accused of superficiality and negligence in correcting, of unreliability, and even of bribery. It became evident at each new revision that, in spite of the censor's certificate, many books had, either accidentally or intentionally, been left wholly or almost intact: for, on the one hand, much offensive matter had not been expunged; and, on the other, many erased passages had been restored by means of chemicals or had been written in the margin, the severe interdiction notwithstanding. One local inquisition distrusted the other; one inquisitor, his predecessor; all mistrusted the baptized revisers and the Jewish owners. This distrust, increased by repeated denunciations and by the prevailing inclination to harass the Jews, led in Italy to repeated domiciliary visits and to the confiscation or renewed expurgation of Hebrew books in the old territory of the Pontifical States in 1753 and 1754. This last extensive book-inquisition marked the end of expurgatorial censorship in Italy.

Principles of Censorship.

The rules followed in the expurgation became more and more stringent as time went on. The revisers up to the end of the sixteenth century were much more lenient than those who came after; and the latter, again, were not so rigorous as the revisers of the seventeenth and eighteenth centuries. A list of the general rules to be observed in expurgating Hebrew books is found in the preface to the ספר הזיקוק, of which (as now known) only five copies are extant in manuscript. This book, written in Hebrew, is an "Index Expurgatorius" for several hundred Hebrew books, and was begun in 1594 by an anonymous Capuchin. It was finished in 1596 by Domenico Irosolomitano, who made additions, bringing it down to 1612. Finally it was further enlarged in 1626 by the reviser Renato da Modena. It was not used, however, until the seventeenth century. Although theoretically there was a definite agreement as to the methods to be followed in expurgating a book, practically the revisers acted most arbitrarily; so that frequently different copies of the same book were severely scored by one censor and hardly touched by another. No similarity of treatment was observed even by the same censor. At one time he would be severe, at another lenient; at one time thorough, and at another lax. Chance and bribery also came into play. As the revisers were paid by the Jews, and were mostly poor converts to whom money was a consideration, the Jews bought their good-will in order to save the books from being mutilated; hence the revisers were often bribed to certify to the expurgation, though the books had hardly been touched.

Ignorant Censorship.

Numerous blunders were made by the generally ignorant censors of the sixteenth and seventeenth centuries. The following striking examples, unlike the fictitious illustrations which, given first in the "Literaturblatt des Orients" (v. 548, vii. 251), have been widely copied, are genuine and attested. Laurentius Franguellus (1575) strikes out the word תלמוד ("knowledge," not "Talmud") in the prayer "Let us heed all the knowledge of Thy law," את כל דברי תלמוד תורתך; the verse of the Psalm אבדו גוים. מארצו; and similar Biblical passages, in which גוים, אדום, עשו occurs, as though these passages referred to Christianity. Luigi of Bologna (1602) deletes the words שרי לגלחו in the book תרומת הדשן (ed. Venice, 1545, § 86), where the cutting of the hair is referred to. Hence he read לְגַלָּחו and took it to mean a cleric (גלח). In the book פסקים וכתבים (ed. Venice, 1546) the same censor strikes out the first words in טובל ושרץ בידו, ("He who bathes while he holds an insect in his hand,") which he here connected with Christian baptism. Giovanni Domenico Vistorini (1609) deletes the Biblical passage ולא תלכו בחקות הגוי in the book ספר מצות גדול (Venice, 1547, fol. 10). In Abraham ibn Ezra's preface to his Pentateuch commentary the words משיח וישועה וכל מין are stricken out by several expurgators, who evidently took them to refer to the Messiah, to Jesus, and to all Christians, while, in reality, two Karaite commentators, Mashiaḥ and Jeshua, and similar sectaries, are meant.

The extent of the work of a busy censor may be estimated from a manuscript notice of Domenico Irosolimitano, probably of the year 1612 (in Porges copy of "Sefer ha-Ziḳḳuḳ"), which states that he had expurgated 21,167 (read "22,167") printed books, 4,311 manuscripts, and 2,533 books, partly printed and partly in manuscript; a total of 29,011 works.

History of Expurgation.

The first notice of Jews having been forced to expurgate alleged blasphemies against Christianity dates from the middle of the thirteenth century. On Aug. 19, 1263, King Jacob of Aragon ordered all the Jews within his domain to delete within three months all the so-called objectionable passages found in their books either by themselves or by Paul of Burgos. Failure to obey the command would entail the destruction of the books and a heavy fine. Books of the fifteenth century also show many omissions in the text, gaps not filled in, and textual emendations, which are due either to previously expurgated manuscript copies or to Jewish expurgation made before printing. In 1426 the Jews of Savoy expunged from their Talmud copies and prayer-books passages pointed out as objectionable by the Inquisition. In the second half of the fifteenth century the Jews in the duchy of Milan expurgated their prayer-books in order to anticipate the denunciations of the apostate Vicenzo. When compared with earlier editions, printed books of the first half of the sixteenth century also show many omissions, indicating a Jewish anticipatory expurgation; but whether this was undertaken from fear or by order of the authorities is not certain.

Eight months after the Talmud was publicly burned at Rome (Sept. 9, 1553), a papal bull (May 29, 1554) commanded the Jews, on pain of heavy punishment, to give up within four months all books containing alleged blasphemies or vituperations against Jesus; but they were allowed to retain other Hebrew books that contained no objectionable passages. Hereby expurgation of all Hebrew books was naturally assumed without being expressly demanded. An ecclesiastical decision from Rome, given through the "Essecutori contra la Biastema" in Venice toward the end of 1553, declared, in answer to the question which Talmudic books apart from the Talmud proper should be burned, that the non-Talmudic books should be revised by Christians who knew Hebrew.

The first one officially appointed for this work was the baptized Jew Jacob Geraldino (Geraldini), proposed by the Jews themselves and made apostolic commissioner by the pope in 1555. In 1556 he was appointed ducal commissioner by the duke of Modena. Another convert, Andrea de Monte, appointed not by the pope, but at the request of the Jews, was soon associated with him. Their work was merely superficial; and it gave subsequent censorial authorities much cause for complaint. Probably, in order to lighten the work of the expurgators, the rabbi Abraham Provenzale of Mantua began (1555) a list of passages to be expurgated, but did not get beyond thirty books, mostly Bible commentaries.

In order to anticipate the censorship by correcting the texts before printing, the printing establishment founded at Cremona in 1556 engaged as reviser Vittorio Eliano, a baptized grandson of the grammarian Elijah Levita. The Jews were so glad to save their non-Talmudic books from expurgation, that they willingly made great pecuniary sacrifices in order to soften the severity of the expurgators. There was a tendency in the Roman Inquisition, however, to restrict as much as possible the number of books permitted to be expurgated. When, in 1559, the first papal index of prohibited books appeared—which included the Talmud with all its compendiums, glosses, notes, interpretations, and expositions—the vicars of the Inquisition at Cremona (Sixtus of Siena and Hieronymus of Vercelli) endeavored to give to it the widest possible interpretation. On complaint of the Jews of the duchy of Milan, however—to which Cremona at that time belonged—most of the non-Talmudic books were restored, although grudgingly. The two above-mentioned vicars demanded a high price for the revision of the returned books, made either by themselves or by others, and in addressing the duke the Jews could unhesitatingly say that the two revisers had cared more for the money than for the expurgation.

The index of Pius IV. of Trent, which appeared March 24, 1564, permitted the Jews to use Hebrew and even Talmudic books, provided they were printed without the word "Talmud," and were purged from vituperations against the Christian religion. The expurgation of Hebrew books, thus expressly declared admissible, was henceforth regularly undertaken before printing, either by the Jews themselves or by Christian correctors; and this accounts for the more or less mutilated state of reprints since the middle of the sixteenth century.

Although the expurgation of Hebrew books and manuscripts was undertaken about 1560–74 in accordance with instructions of the Inquisition, it was certified to neither by the signatures of the Inquisition nor by those of the expurgators. There is a single certificate (1566) that the rabbi "Jhehodah" of the tribe of "Dan" expurgated a book by permission of the Inquisition. As late as 1589–90 it must have been customary in Mantua not to sign censors' certificates; for not a single signature by Alessandro Scipione is extant from this period, although in 1589–90 he corrected and revised all the Hebrew books in that city. The statement in Neubauer's "Catalogue of Hebrew Manuscripts in the Bodleian Library" (Index, "Censors"), that Laurentius "Franquella" signed censors' certificates as early as 1571, seems to be due to an error in reading the date; the signature of Laurentius Franguellus, who was one of the busiest revisers of whom there is record, is not found before Nov. 1574.

In 1571 the first papal Index Expurgatorius for non-Jewish books appeared. For Hebrew books busy expurgators doubtless used a similar index, as it would have been a waste of time to correct every book afresh page by page. None of these Hebrew indices, however, not even the "Sefer ha-Ziḳḳuḳ," already mentioned, received the authorization or ecclesiastical sanction granted to the Index Expurgatorius for non-Hebrew books. For, although the Church declared the expurgation of Hebrew books indispensable, neither the Roman Congregation of the Index, existing since 1571, nor the Congregatio Sancti Officii of Rome, founded 1588, nor any pope would vouch for the correctness of the expurgation undertaken by the Christian revisers, who were generally of Jewish origin; nor would they confer upon the purified texts the approbation of the Church. Furthermore, the opinions of the Church in regard to the admissibility and value of the expurgation of Hebrew books were continually changing, not only with successive incumbents of the papal chair, but at times even with one and the same pope.

Vacillation in Censorship.

By permission of Pope Gregory XIII. the censored (mutilated) edition of the Babylonian Talmud appeared at Basel in 1578–81 with many of its passages changed beyond recognition, a scandalous instance of Roman censorship. But even this "purified" Talmud did not receive ecclesiastical approbation, but was merely tolerated. In the third quarter of the sixteenth and in the first half of the seventeenth century extraordinarily large numbers of Hebrew books were expurgated. Notwithstanding the many annoyances and the heavy expenses connected therewith, the Jews were glad to be able to save their books from destruction, and to be protected against the punishment attendant upon the use of non-expurgated books.

Papal Inconsistency.

The customary inconsistency of the papal court was now again shown in the continual wavering between leniency and rigor. At the instance of the Jews, who shrank from no trouble and no sacrifices, Pope Sixtus V., in 1540, ordered a renewed expurgation of the Talmud by the Index commission, and the rules to be followed were formulated; but the year after Sixtus' death the Roman Inquisition wrote that the expurgation of the Talmud was a ridiculous and useless work. In 1592 the Inquisition repeatedly declared, in accordance with the wishes of Pope Clement VIII., that the Jews had no right to keep any Hebrew books except the Bible and grammars. A year later, however, a bull of the same pope limited the prohibition to a few Talmudic and cabalistic books, together with some other Hebrew books and manuscripts—already condemned by his predecessor—which could not be permitted, even under the pretext that they had been expurgated. A papal writ of April 17, 1593, allowed the Jews six weeks in which to expurgate other books that had not been expressly forbidden. The bishops and local inquisitors, confused by these contradictions, waverings, and changes of the chief authority, treated the books of the Jews according to their own personal likes or dislikes, rather than in accordance with the severe or lenient injunctions from Rome. As early as 1591, and more frequently since then, inquisitors were censured and threatened because they had participated in the expurgation of Hebrew books, and had affixed their signatures to them.

In 1588 various Jewish communities vainly urged the Roman Inquisition to depute an expurgator to purify their books from heresies and errors. The Inquisition continued to insist that it was the duty of the Church not to engage in any way in expurgating Hebrew books, but merely to punish those Jews found in possession of uncensored or insufficiently expurgated ones. Thus, the Jews of Mantua, who at their own expense had their books revised by the convert Alessandro Scipione (1589–90), could not obtain a signed official certificate of the revision. It was not until 1595 that the Jews of that city prevailed upon the bishop to appoint as censors of Hebrew books the three converts, Laurentius Franguellus, Domenico Irosolimitano, and Alessandro Scipione. All the Hebrew books of Mantua were again expurgated en masse; and the completed revision was certified to at the end of each book by the signature of one or two revisers. In the same way the Roman inquisitional tribunal, contrary to former ordinances, decreed in 1598 that Hebrew books, in so far as they were not among the prohibited ones, should be left to the local inquisition for correction; but in 1602 the Roman Inquisition ordered the local inquisitions to have nothing to do with the expurgation of Hebrew books. Nevertheless many censors' certificates of the end of the sixteenth century and the beginning of the seventeenth show that the local inquisitions often disregarded this decree of their superiors, and were repeatedly reprimanded therefor by the Holy Office.

The series of contradictions from Rome is repeated in the seventeenth century. Notwithstanding the strict prohibitions renewed from time to time, Hebrew books were expurgated not only by Christian revisers, but also by those appointed and authorized by the Church; as, for instance, in 1608, when Pietro Ferdinando signs himself "Revisore deputato." In 1618 Giovanni Domenico Carretto was appointed corrector for one year by the inquisitor-general of Mantua. Pope Gregory XV. (1621–23), unlike his predecessors, doubtless approved the censorship of Hebrew books by Christians; for during his incumbency of the papal chair at least three expurgators of Hebrew books were appointed by the Roman Inquisition: Vincentius Matelica, 1622, "auctoritate apostolica"; Isaia di Roma, 1623, "per ordine di Roma"; and Petrus de Trevio, 1623, "deputatus" (officially appointed to revise books). After the death of Gregory XV. more stringent rules in regard to books seem to have been adopted by Rome, probably at the instigation of the fanatic cardinal Carlo Borromeo. In 1625 it was again decreed that the Jews themselves should expurgate their books; but in the following year Renato da Modena was appointed expurgator by the Inquisition of that city.

Russian Censor's Marks on the Title-Page of the Manuscript of A. B. Dobsevage's "Lo Dubbim Welo Ya'ar."

In 1641 the work of expurgation was relaxed in Italy. The old Hebrew books and manuscripts had been repeatedly expurgated; the newly printed books were by a rigorous censorship purified of all objectionable matter before publication, and after that were generally again examined by expurgators. Yet the monk Antonio Francisco Enriquez, appointed by the archbishop of Urbino, was still busily employed as expurgator (1683–88).

In the eighteenth century, after an interval of more than sixty years, the work of revision was resumed with renewed zeal throughout the papal dominions, by Giovanni Antonio Costanzi, actively assisted by Philiop Peruzzotti (1753–54). Costanzi was scriptor in the library of the Vatican, and the author of the large catalogue of its Hebrew manuscripts that appeared in 1756 under Assemani's name. During the interval of rest, the Jews had undone the work of the censors by restoring the expunged or omitted passages. Though this was a dangerous thing to do, punishable not only by confiscation and large fines, but also by long imprisonment, as in the case of Rabbi Solomon Abi'ad Basila in Mantua, 1733, yet the Jews could not resist the temptation. They were suddenly dumbfounded when, at the instigation of Costanzi, searching domiciliary visits in quest of Hebrew books were made in all the ghettos of the pontifical states. The Hebrew books, without exception, were collected and divided into three classes: (1) those permitted without reserve, which were immediately returned; (2) those permitted conditionally, returned after having been revised and paid for; and (3) those absolutely unrevisable, which were confiscated. Whenever several copies of the same book had to be revised, the reviser corrected merely one copy, which he signed: the Jews were then obliged to correct all other copies by this one, and to bring them to the reviser for his signature.

After the arduous work of revision had been completed an edict was issued, in 1755, for the Pontifical States, either prohibiting Hebrew books entirely or permitting them under certain restrictions. Costanzi planned to formulate exact rules for the censorship of such works; endeavoring also to work out an Index Expurgatorius for Jewish books, similar to that first made by the Spanish Inquisition for non-Jewish books. His trouble was in vain; and his book, which, according to the opinion of the celebrated Assemani, was arranged with signal clearness and knowledge of the subject, is now buried in the library of the Vatican. Outside of Italy the expurgation of Hebrew books and manuscripts was undertaken only in the French territory belonging to the Pontifical States. For the censorship of Hebrew books in Russia and for a list of censors see below.

G. N. P.

——**In Russia:** Jews at once took advantage of the ukase of Catherine II., dated Jan. 27, 1783, permitting the establishment of printing-presses; and in the same year Hebrew books were published at Shklov and Polonnoe. These, as well as books imported from Poland (on account of there being no Hebrew censors among the censors of foreign books at the custom-houses, or among the censors of domestic printed matter in the chief towns), escaped the notice of the government. The attention of the authorities was first drawn by Governor-General Passek to the condition of affairs with regard to Hebrew books. This official reported in 1790 that he had ordered some Jewish books, imported from Poland, to be detained at the custom-house of Tolochin; holding the silence of the fiscal laws with regard to Hebrew books to be a prohibition against their admission into Russia—contrary to the dictum of the "kahal" (communal council) of Mohilev, which claimed that such silence implied only the non-taxation of Hebrew books. Catherine thereupon prohibited the importation of Hebrew books, stating that the Jews could obtain their supplies of religious literature from the Russian printing-offices.

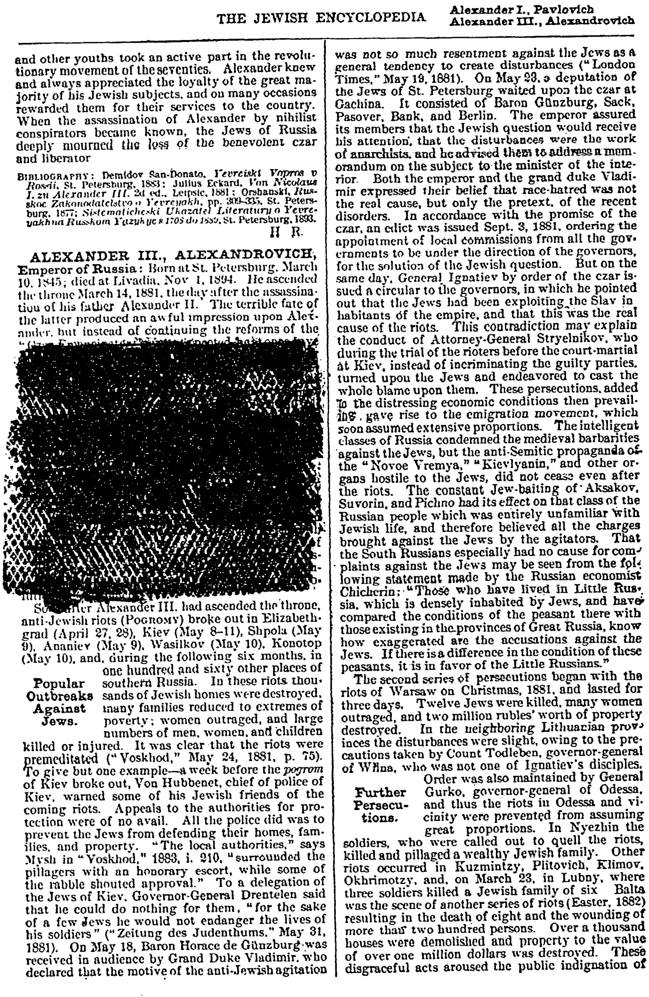
Beginning of Censorship.

For six years (1790–96) this prohibition was the subject of frequent complaints on the part of the Jews, who were compelled to have recourse to smuggling, the small and inadequate Russian printing-offices being unable to produce the large numbers of books needed. In 1796 the government legalized the importation of Hebrew books, having been compelled to do so in consequence of the ukase of Sept. 28 of that year, by which the liberty to establish printing-offices in Russia was withdrawn. Special censors, well versed in the Hebrew language, now became a necessity. On Oct. 17, 1796, Paul I. issued a ukase ordering the installation of two learned Jews in the censor's office at Riga, for the purpose of examining Hebrew books, both those published in Russia and those imported. The "two learned Jews" were found by Governor Richter of Livonia in the persons of Moses Hezekiel (or Hekiel) and Ezekiel David Lewy, both of Riga, who, after having been sworn (Jan. 1, 1798), entered upon their duties as subordinates of the Gentile censor at Riga, at a salary of 300 rubles a year. The first Jewish censor with full powers was Leon Elkan, a Prussian Jew, who, being well recommended to the authorities, was appointed Jewish censor at Riga at a salary of 600 rubles a year.

At Riga.

The Jewish communities soon felt the scarcity of sacred books, due first to the interference of the government with private enterprise in the printing industry, and secondly to the forced import of Hebrew books through one channel; namely, through Riga. Jewish merchants complained to the local officials, and petitioned the higher authorities at St. Petersburg. The censors at Radzivil also petitioned the attorney-general to increase the number of Jewish censors, on the ground that in the governments of Volhynia, Podolsk, and Minsk there were many Jews who needed Hebrew books "both for prayer and for the education of their children in the Law and Faith." The request was refused, the government considering one Jewish censor sufficient for the needs of all the Russian Jews. It was not until 1798 that a censor's office was established at Wilna, Karl Tile of Leipsic being appointed censor for Hebrew books in that year. The new office did not, however, commence operations until March 14, 1800; and in the mean while the censorship of Hebrew books, of either foreign or native production, continued to be exercised in Riga, whither the Jewish printing-houses of Grodno, Shklov, Slavuta, Koretz, and Novodvor had to send their works for approbation.

At Wilna.



THE JEWISH ENCYCLOPEDIA **Alexander I., Pavlovich**
Alexander III., Alexandrovich

and other youths took an active part in the revolutionary movement of the seventies. Alexander knew and always appreciated the loyalty of the great majority of his Jewish subjects, and on many occasions rewarded them for their services to the country. When the assassination of Alexander by nihilist conspirators became known, the Jews of Russia deeply mourned the loss of the benevolent czar and liberator

ALEXANDER III., ALEXANDROVICH, Emperor of Russia: Born at St. Petersburg, March 10, 1845; died at Livadia, Nov. 1, 1894. He ascended the throne March 14, 1881, the day after the assassination of his father Alexander II. The terrible fate of the latter produced an awful impression upon Alexander, but instead of continuing the reforms of the [redacted]ter Alexander III. had ascended the throne, anti-Jewish riots (Pogromy) broke out in Elizabethgrad (April 27, 28), Kiev (May 8–11), Shpola (May 9), Ananiev (May 9), Wasilkov (May 10), Konotop (May 10), and, during the following six months, in one hundred and sixty other places of southern Russia. In these riots thousands of Jewish homes were destroyed, many families reduced to extremes of poverty; women outraged, and large numbers of men, women, and children killed or injured. It was clear that the riots were premeditated ("Voskhod," May 24, 1881, p. 75). To give but one example—a week before the *pogrom* of Kiev broke out, Von Hubbenet, chief of police of Kiev, warned some of his Jewish friends of the coming riots. Appeals to the authorities for protection were of no avail. All the police did was to prevent the Jews from defending their homes, families, and property. "The local authorities," says Mysh in "Voskhod," 1883, i. 210, "surrounded the pillagers with an honorary escort, while some of the rabble shouted approval." To a delegation of the Jews of Kiev, Governor-General Drentelen said that he could do nothing for them, "for the sake of a few Jews he would not endanger the lives of his soldiers" ("Zeitung des Judenthums," May 31, 1881). On May 18, Baron Horace de Günzburg was received in audience by Grand Duke Vladimir, who declared that the motive of the anti-Jewish agitation was not so much resentment against the Jews as a general tendency to create disturbances ("London Times," May 19, 1881). On May 23, a deputation of the Jews of St. Petersburg waited upon the czar at Gachina. It consisted of Baron Günzburg, Sack, Pasover, Bank, and Berlin. The emperor assured its members that the Jewish question would receive his attention, that the disturbances were the work of anarchists, and he advised them to address a memorandum on the subject to the minister of the interior. Both the emperor and the grand duke Vladimir expressed their belief that race-hatred was not the real cause, but only the pretext, of the recent disorders. In accordance with the promise of the czar, an edict was issued Sept. 3, 1881, ordering the appointment of local commissions from all the governments to be under the direction of the governors, for the solution of the Jewish question. But on the same day, General Ignatiev by order of the czar issued a circular to the governors, in which he pointed out that the Jews had been exploiting the Slav inhabitants of the empire, and that this was the real cause of the riots. This contradiction may explain the conduct of Attorney-General Stryelnikov, who during the trial of the rioters before the court-martial at Kiev, instead of incriminating the guilty parties, turned upon the Jews and endeavored to cast the whole blame upon them. These persecutions, added to the distressing economic conditions then prevailing, gave rise to the emigration movement, which soon assumed extensive proportions. The intelligent classes of Russia condemned the medieval barbarities against the Jews, but the anti-Semitic propaganda of the "Novoe Vremya," "Kievlyanin," and other organs hostile to the Jews, did not cease even after the riots. The constant Jew-baiting of Aksakov, Suvorin, and Pichno had its effect on that class of the Russian people which was entirely unfamiliar with Jewish life, and therefore believed all the charges brought against the Jews by the agitators. That the South Russians especially had no cause for complaints against the Jews may be seen from the following statement made by the Russian economist Chicherin: "Those who have lived in Little Russia, which is densely inhabited by Jews, and have compared the conditions of the peasant there with those existing in the provinces of Great Russia, know how exaggerated are the accusations against the Jews. If there is a difference in the condition of these peasants, it is in favor of the Little Russians."

Popular Outbreaks Against Jews.

The second series of persecutions began with the riots of Warsaw on Christmas, 1881, and lasted for three days. Twelve Jews were killed, many women outraged, and two million rubles' worth of property destroyed. In the neighboring Lithuanian provinces the disturbances were slight, owing to the precautions taken by Count Todleben, governor-general of Wilna, who was not one of Ignatiev's disciples. Order was also maintained by General Gurko, governor-general of Odessa, and thus the riots in Odessa and vicinity were prevented from assuming great proportions. In Nyezhin the soldiers, who were called out to quell the riots, killed and pillaged a wealthy Jewish family. Other riots occurred in Kuzmintzy, Plitovich, Klimov, Okhrimotzy, and, on March 23, in Lubny, where three soldiers killed a Jewish family of six. Balta was the scene of another series of riots (Easter, 1882) resulting in the death of eight and the wounding of more than two hundred persons. Over a thousand houses were demolished and property to the value of over one million dollars was destroyed. These disgraceful acts aroused the public indignation of

Further Persecutions.

Reduced Facsimile of a Censored Page of The Jewish Encyclopedia.

It is interesting to note that the first book to puzzle the official censor as to its being in accord with the designs of the government was an ordinary prayer-book, entitled "Rosh Ḥodesh Siddurim." The most doubtful passages were found in the "Eighteen Benedictions," in "Taḥnun," and in the Sabbatic poem "Iklu Mashmannim": the passages in the first two containing hints about tyrants and the land of exile; while the last was considered immoral on account of its exhortations to feasting and drinking. Censor Elkan did not recommend the burning of the prayer-book; but he advised that the page containing "Iklu Mashmannim" be torn out, and in the other cases that the obnoxious words be obliterated. Of other books that were condemned by the censor the first to fall under the ban was the "Ḥizzuḳ Emunah," written at the end of the sixteenth century by Isaac ben Abraham Troki. In March, 1799, the entire edition of "Niẓẓaḥon," by Lipman Mülhausen, was confiscated, on the ground that it was written as a refutation of the Christian religion. In 1800 the historical work of Joseph ha-Kohen, "Dibre ha-Yamim le-Malke Ẓarfat," was prohibited because it contained passages disrespectful to Christians and the Christian religion. The same fate befell the "Teḥinnot Immahot," because the prayers for the New Moon contained allusions to cruel potentates calculated to breed hatred. The history of the Cossack persecutions under Chmielnicki, entitled "Yawen Meẓulah," was prohibited, because of the name יונים applied to Russians, and on the further ground that the reading of the book might prejudice the Jews against the natural-born subjects of the czar. The "Or ha-Ḥayyim," by Ya'abeẓ, was prohibited because of one passage stating that God in heaven, unlike the czars on earth, is not influenced by the high social standing of the sinner. Other books, notably "Babe Ma'aseh" and "Imre Yosef," were prohibited on account of alleged coarse or profane expressions in the text.

Confiscations.

By the ukase of April 30, 1800, the importation of books in any language was prohibited till further notice, and the Hebrew censors at Riga were dismissed. During the 28 months of their activity in office 126 books were confiscated out of a total of 6,225 which were imported.

With the accession of Alexander I. the importation of books was once more legalized, the censorship being entrusted to the civil governors. This arrangement did not last; and in 1804 a committee of censors was reestablished in every Russian university.

During the reign of Nicholas I. the censorship of Hebrew books was entrusted to the official rabbis, who, partly through ignorance and partly from fear of the government, showed themselves particularly severe. Under Alexander II. Jewish publications shared with Russian literature a liberal interpretation of the law with regard to censorship. Since the reign of Alexander III. Russian, and especially Hebrew, literature has suffered much from

Nicholas I. to Alexander III.

the severity of the censors. Thus, by order of the censor-in-chief at St. Petersburg, the press was forbidden to publish any news concerning the anti-Jewish riots. Other orders (May 2, 1882; Nov. 19, 1890; June 19 and July 12, 1891) forbade the Jewish periodicals (either in Russian or in Hebrew) to comment editorially upon, or to print any matter concerning, the "new, widely circulating rumors that some persons have the senseless and insolent intention to protest against a so-styled oppression of the Jews." Several Jewish papers were temporarily stopped; and those published abroad were not admitted into Russia. By a circular issued from the chief office of the censor Aug. 13, 1891, the publication of appeals for aid for Jewish emigrants, as well as the collection of subscriptions in their behalf, was forbidden.

The activity of the censor still continues in Russia, being exercised as late as 1901 on the first volume of the Jewish Encyclopedia, in which a passage relating to Alexander III. was blotted out in copies admitted into the czar's dominions.

CENSUS: A numbering of the people. Several cases are given in the Bible. The first mentioned is that in Num. i. (from which the book receives its name), when the males—*i.e.*, men capable of bearing arms—numbered 603,550 at the Exodus. Modern critics, foremost among them Bishop Colenso ("The Pentateuch and Joshua," pt. I. ch. v.), have pointed out the difficulties attached to such a number arising in four generations from the twelve sons of Israel, not to mention the commissariat required for at least four times that number. The numbering was again gone through six months later, according to the account of Num. xxvi.-xxvii., with exactly the same result. On these occasions, the numbering was done indirectly, half a shekel being given to the sanctuary by each person of the proper age, and then the half-shekels, and not the persons, were counted. This expedient, according to the critics, was resorted to by the writer of Numbers owing to the superstition which had arisen against a census through the experience in David's reign. After David had organized his kingdom he found it necessary, for military purposes, to know exactly how many men, of an age suitable for bearing arms, he could depend upon; and he determined to take a census (II Sam. xxiv.). Notwithstanding the remonstrances of Joab, David persisted in carrying out the numbering of the people. It appears to have been a laborious operation, as it took no less than nine months and twenty days to complete it. Unfortunately, the numbers given in the Biblical text are discrepant; the Book of Samuel giving 800,000 for Israel and 500,000 for Judah, whereas I Chron. xxi. raises the former to 1,100,000 and reduces the latter to 470,000. As these numbers included only the fighting men, they would imply a population of probably 5,000,000 for Israel and 2,000,000 for Judah. The Assyrian practise of counting captives shows that such a census was not uncommon at the time. The figures recorded are, however, regarded by Biblical critics as doubtful for various reasons, apart from the uncertainty of the text, which Budde would emend to 100,000 for Israel and 70,000 for Judah ("S. B. O. T." *ad loc.*). A pestilence appears to have occurred shortly after the census, and confirmed the people in the superstition, common among primitive nations, against being numbered. In the Biblical text David's action in ordering a census is regarded as sinful.

Census of Quirinius.

It is possible that this objection to being numbered had something to do with the uprising, led by Judas the Galilean, against the census undertaken by Quirinius (Cyrenius) in the years 6–7 (Luke ii. 2; Acts v. 37). This census, or rather the taxation which was the outcome of it, is mentioned by Josephus ("Ant." xviii. 1, § 1); and Luke connects with it the date of the birth of Jesus. But it has been conclusively proved by Schürer ("Gesch." i. 508–543) that such a census could not have been undertaken by a Roman official while Herod was still reigning. No details are known with regard to this census of Quirinius.

In modern civilized states, since the periodical taking of a census has been regarded as a necessary part of public policy, the number of Jews has been determined either by estimate or by actual count—in Hungary, for instance, since 1720; in Prussia, since 1816; and in Poland, since 1825. Custom varies in different countries with regard to the inclusion of the numbers of adherents to the several creeds in the census returns. At one time France included them, but no longer does so. Almost all the British colonies do so, as does Ireland; but England, Scotland, and the United States do not. In consequence, an exact enumeration of the Jewish population of the world is impossible.

Bibliography: Commentaries on II Sam. xxiv.; Schürer, as above.

J.
E. C.

CENTO (**צינטו**): City of 8,000 inhabitants in the province of Ferrara, central Italy. If the statement is correct that the Ha-Me'ati (**המאתי**), a family of translators, derived their name from their native place, Cento (מאה, "a hundred" = *cento*), there must have been a Jewish settlement in that city as early as the middle of the thirteenth century; and the beginnings of the community would then have been contemporary with those of the neighboring capital Ferrara. Authentic accounts record the existence of a Jewish population from the end of the fifteenth century. The Padoa family, still living at Cento, traces its genealogy back to Spanish exiles who came thither in 1492. In 1505 Duke Ercole d'Este decreed that the Jewish inhabitants of Cento should share, as far as they were able, the contributions of their coreligionists in the duchy of Ferrara.

Restrictions.

Under the Estes, the Jews enjoyed great liberty and many privileges; but when that family became extinct and the Jews passed under the papal dominion (1598), they were subjected to all the restrictions that, since the time of Paul IV., had been imposed upon their coreligionists in the Pontifical States. They were not allowed to acquire real estate; they had to sell the lands they then possessed; they were forbidden to engage in any business except money-lending and rag-picking; they had to live in a ghetto and to wear the Jews' badge. These severe laws remained in force for fully two centuries; but, nevertheless, certain Jews obtained special privileges and became active in public affairs. Thus the members of the Carpi family still possess a diploma showing that in 1774 their ancestor Moses Carpi was appointed "familiaris" to Cardinal Albani, being granted all privileges; and it is known that the Jews of Cento from their advent into the community always owned real estate, for they were aided by the authorities themselves in evading the unjust law.

Progress of Community.

The great changes brought about by the French Revolution caused the abolition of the ghetto at Cento in 1797. During the French occupation the Jews had full civic rights, and many of them were called upon to fill posts of honor; but when the papal supremacy was restored, in 1815, they were again subjected to exceptional laws that were enforced rigorously and cruelly, especially by Leo XII. Nevertheless, the severity of their operation was mitigated by the humanity of the authorities, who informed the Jews in advance of impending domiciliary visits in search of forbidden books and of children to be baptized, and who, in spite of the law, connived at the performance of work for the Jews on the Sabbath.

A happier era dawned only with the overthrow of the papal rule, in 1859, when Romagna became a part of the new kingdom of Italy, and when the Jews received all the rights of citizenship.

Though it is doubtful whether a community was organized when Jews first settled at Cento, there must have been a religious association before 1500; for, unlike others, this community has always preserved its Italian liturgy and did not introduce the Spanish liturgy or admit it on the same footing. This fact is probably attributable in part to the small number of the immigrants from Spain. The community seems to have been organized about 1600, when some families from the neighboring Pieve settled at Cento; it buried its dead for a long time in the cemetery at Pieve, and even to-day (1902) it holds services at that city on the Ninth of Ab and on the eve of the Day of Atonement. The new community at once founded a Talmud-Torah society for the advancement of Hebrew studies, and appointed a salaried teacher, who instructed the children and also officiated as ḥazan, or leader in prayer. In 1690 the twelve members of this society formed a second philanthropic society—Gemilut Ḥasadim—the statutes of which, in twenty-one articles, are still extant; the society proposed to nurse the sick and to render general philanthropic services, and determined to lay out at once a new cemetery at Cento, for which they obtained the permission of the papal legate.

Institutions.

In 1727 the community received a new constitution, and both the societies were merged into the single Confraternita di Studi Sacri e di Misericordia. The community was reorganized during the period of liberty under the French consistorial constitution. In 1814 a new section was added to the Confraternita for reciting special prayers. These societies and philanthropic foundations for preserving the ritual, providing dowries for poor girls, and for the relief of the poor still exist. Under the kingdom of Italy this community, like many others, has been constituted a free association, the expenses of public worship and other congregational institutions being defrayed chiefly by the generosity of the Modena, Carpi, and Padoa families. The community that numbered 150 persons in 1865 has been reduced to 34 (in 1902); it possesses a new synagogue and a cemetery.

Of the scholars and rabbis of Cento the following are known: Ishmael Ḥazaḳ (1613, Oxford MS. No. 1379); Eliah Daniel del Bene, מהטוב (1667–75); Gamaliel; Monselice; Nathaniel b. Meshullam Levi; Isaiah Bassani; Israel Berechiah Fontanella (1724); Reuben b. Zerachiah Yaḥya (1727); Solomon David b. Moses del Vecchio; Giuseppe Alexandro Modena and his son Isaac Mordecai (1761); Hananeel Neppi (1820–36); Abraham Carpanetti (–1853); David Jacob Maroni (–1860); Moses Sorani (–1880); Donato Camerini; Moses Levi (1902).

CEREMONIES AND THE CEREMONIAL LAW: Symbolic rites and observances, expressive of certain thoughts or sentiments. As social life demands forms of etiquette (see Greetings), so every religous system has its peculiar ceremonies indicative of its own particular truths. The Biblical name for ceremonies appears to be "'edut" ("testimonies," Deut. iv. 45; vi. 17, 20; see Naḥmanides on the last passage), in distinction to "mishpaṭim" ("judgments," "ordinances," Ex. xxi. 1, and elsewhere); while the term "ḥuḳḳim" ("statutes") is applied to both moral and ceremonial laws (Ex. xii. 14, 43; Lev. xviii. 4, and elsewhere). The Rabbis distinguish between mishpaṭim, moral laws—which are dictated by reason and common sense, such as laws concerning justice, incestuous marriages, and the like—and ḥuḳḳim, those divine statutes to which the "Yeẓer ha-Ra'" (the evil inclination) and the heathen object, such as the prohibition of pork or of wearing garments woven of wool and linen (Sifra, Aḥare Mot, xiii. on Lev. xviii. 5; Yoma 67b).

The Prophets laid the greatest stress upon the moral laws, while condemning mere ceremonialism (see Hosea vi. 6; Amos v. 21–24; Micah vi. 6–8; Isa. i. 13–17). The Psalmist (see Ps. xv.), and especially the Book of Wisdom, do not even refer to the ceremonial law. Whenever Judaism entered into relations with other nations and religions, the moral laws were accentuated, and the ceremonial laws were put into the background. Hellenistic Judaism, therefore (for Pseudo-Phocylides see Bernays, "Gesammelte Schriften," i. 227), Philo, and the entire propaganda literature to which the Didache belongs, take the same attitude toward the ceremonial laws. And, again, when the Jew came into contact with Arabic culture, this view of the ceremonial laws prevailed as being dictated by reason and common sense.

First Mention of Ceremonial Laws.

The discrimination between "laws based upon reason" and "laws demanding obedience to God's will" was adopted by Saadia ("Emunot we-De'ot," iii. 12; compare Ibn Ezra to Ex. xxi. and "Yesod Moreh," v.), and, with direct reference to the rabbinical passages quoted, by Maimonides ("Moreh Nebukim," iii. 2b; "Shemonah Peraḳim," vi.). Joseph Albo ("Iḳḳarim," iii. 25), if not Simon ben Ẓemaḥ Duran (see Zunz, "G. S." ii. 194), is the first who divides the Biblical laws into ceremonial, juridical, and moral laws. He admits, however, that he adopted this classification from a Christian controversialist; and, as a matter of fact, he forced himself in consequence to declare, with Maimonides (*l.c.* iii. 46), the sacrifices of the Mosaic law to be a concession to the pagan propensities of the people, and (in accordance with Sifre to Deut. xi. 13) prayer to be the true "service of the Lord"—a standpoint hardly to be reconciled with the belief in supernatural revelation and the permanence of the Mosaic law.

Biblical and Rabbinical Ceremonies.

The Mosaic law expressly states that certain ceremonies are to serve as "signs" and "memorials": (*a*) Circumcision is enjoined as "ot berit" ("a token of the covenant betwixt me and you," Gen. xvii. 11). (*b*) The Sabbath is to be "ot" ("a sign between me and you throughout your generations," Ex. xxxi. 13, 17; Ezek. xx. 17, 20). (*c*) The Passover feast "shall be for a sign [ot] unto thee upon thine hand and for a memorial between thine eyes" (Ex. xiii. 9). (*d*) Connected therewith is the redemption of the first-born to be a "token upon thine hands and for frontlets between thine eyes" (Ex. xiii. 16). According to rabbinical traditions, there are: (*e*) The putting on of the phylacteries or Tefillin prescribed in Deut. vi. 8, xi. 18, "Thou shalt bind them for a sign [ot] upon thine hand, and they shall be as frontlets between thine eyes." (*f*) The placing of Mezuzzot upon the doors (Deut. vi. 9, xi. 20): "Thou shalt write them upon the doorposts of thine house." (*g*) The Ẓiẓit, the fringe upon the borders of the garment, is also enjoined for the purpose "that ye may look upon it and remember all the commandments of the Lord" (Num. xv. 39).

In fact, all the festivals are to be "remembrances" of God's deliverance and protection of the people of Israel (Deut. xvi. 3, 12; vi. 24; Lev. xxiii. 43); the paschal lamb, the maẓẓah, and the bitter herb on Passover, and the sukkah and the four plants of the Feast of Tabernacles (Ex. xii. 8; Lev. xxiii. 40 *et seq.*), being the significant symbols. Similarly, the erection of the sanctuary and the sacrificial worship therein must be counted among the ceremonial laws, and no less so the dietary laws (Ex. xxii. 30; Lev. xi.; Deut. xvi. 3-21), as symbolically emphasizing the idea of Israel being God's "holy" or priest people.

To these, Pharisaic Judaism added a number of new ceremonies, among which may be mentioned the kindling of the lights, the blessing over the wine (see Ḳiddush and Habdalah) for Sabbaths and festival days, and the blessing of the Moon.

Ceremonies are the impressive part, the poetry of religion. They invest life at its various stages and periods with "the beauty of holiness." The need of such has been all the more felt by Judaism since images or signs representing the Deity have been scrupulously shunned; and the home and every-day life of the Jew was to be sanctified no less than the Temple, the ancient domain of the priest. But exactly as the pomp of ritual called forth the protest of the prophet against "the work of men learned by rote" (Isa. xxix. 13, Hebr.), so there was a danger lest the multitude of forms might crush the spirit, wherefore many haggadists and writers, like Aristobulus and Philo, attribute symbolical meanings to Biblical ceremonies. Medieval mysticism also, from Baḥya and Naḥmanides down to Isaac Luria, endeavored to imbue the old ceremonies with new spirituality; while the liberal spirit awakened in Italy in the seventeenth century found its echo in Leon de Modena's attack on ceremonialism in his "Ḳol Sakal."

Mendelssohn's View of Jewish Ceremonial Law.

The question of the relative value of the ceremonies in Judaism was brought to a focus through Moses Mendelssohn, who, in his "Jerusalem," presented a new view of the Jewish ceremonial laws. He proudly repelled the attempts of Christian writers to win him over to Christianity, and declared Judaism to be not a system of belief based upon creeds, but a revealed system of law based upon ceremonies. While granting liberty of conscience to all, because truth is the property of all and dictated solely by reason, the Jewish law demands strict obedience from its adherents, for whom the ceremonial law is a system of sign-language suggestive of thought and sentiment for mind and heart alike. It is a living force impelling people to act well and at the same time to think rightly—the only proper bond of union of a people to be educated for truth and for freedom of thought and to be kept together until God's design shall be fulfilled. Though some of these ceremonies have in the course of time lost their meaning, they nevertheless retain their value and importance as bonds of union, and, even when no longer understood as signs, remain binding upon the Jews until God in His own way and through some universally recognized authority abrogates or changes them. "Doctrines and beliefs," Mendelssohn writes to Herz Homberg, who objected to these postulates of blind obedience, "become shackles of the intellect. As long as polytheism, anthropomorphism, and religious despotism rule on earth, so long must a people of theists, such as the Jews are, remain banded together solely by symbolic actions; that is, by ceremonies" ("Schriften," iii. 311-319, 348-356; v. 669, Leipsic, 1843).

Mutability of the Ceremonial Law.

This was a powerful plea for the ceremonial laws; but it rendered Judaism a national concern void of a world-wide mission—a system of forms without the spirit of faith. Mendelssohn's own disciples were the first to surrender both the form and the faith. As soon as the modern Jew recognized the fact (which Mendelssohn, as follower of Wolfian deism, had failed to see) that in the historic development of humanity Judaism had a mission of its own, centered upon the monotheistic truth and the universal hope of man, the issue was raised between insistence on ceremony advocated by Orthodoxy and accentuating the prophetic ideas as the universal ideal, as was done by the leaders of Reform Judaism. The need of adequate and impressive ceremonies in place of the old and obsolete ones was urged by the Reform pioneers, and the introduction of forms, though adopted from Christian surroundings, roused a new religious life and zeal in many, but likewise awakened opposition from the conservatives. "Ceremonies," says Geiger, in an article on formalism ("Der Formenglaube in Seinem Unwerthe und Seinen Folgen") in his "Wiss. Zeit. für Jüd. Theol." 1839, pp. 1-12, "in order to imbue the people with a religious spirit and hallow their life, must have an elevating character and be in perfect harmony with their own mode of life, or else they lead to superstition bordering on idolatry. Blind obedience against one's conviction, 'the obedience of a dog,' is incompatible with the dignity of man and with faith in a holy God dwelling within him."

This view, advocating a gradual change of the ceremonial law, was pushed to its extreme, much to the detriment of the Reform movement, by the hazardous attempt of the Frankfurter Reform-Verein to abrogate circumcision and by the transfer of the Sabbath to Sunday made by the Berlin Reform congregation. Holdheim, the radical Reform leader, went so far as to deny the validity of the entire ceremonial law in his work, "Das Ceremonialgesetz im Messiasreich" (1845), taking the stand that it is closely interwoven with the national idea and with the temple as center of the Jewish commonwealth, whereas the Messianic era of which modern Israel is to be the herald and harbinger is to be the realization of the universal prophetic ideal. Less outspoken, but in sympathy with the principle ennunciated by Holdheim, were Einhorn, Geiger, Samuel Hirsch (who, however, claimed permanency for the Abrahamic rite), Herzfeld, Hess, and others; the Sabbath, as far as the choice of day was concerned, being included among the ceremonial laws, all of which were subject to change. A Talmudical passage, stating that "in the world to come [the Messianic time] the ceremonial commandments will cease to have validity" (Nid. 61b; compare Midr. Teh. to Ps. cxlvi. and Yalḳ. to Isa. xxvi. 2), is referred to by some as corroborating this statement (see Herzfeld, "Zwei Predigten über den Messias," 1844). Einhorn, in his "Sinai," 1856, p. 574, with deeper insight, refers to the frequent alterations and modifications of the Law in Biblical and Talmudical times, mentioned already by Albo ("Iḳḳarim," iii., xiii.–xvi.).

Against these radical Reform views Leopold Zunz advanced the doctrine that the SABBATH and CIRCUMCISION have ever been regarded institutions of a fundamental if not sacramental character, and can not be abrogated or radically altered without undermining Judaism itself (Zunz, "Gutachten über die Beschneidung," in "G. S." ii. 191–203). Joseph Aub also, in an article on "The Symbols of Faith of the Mosaic Religion," in Frankel's "Zeitschrift," 1845, pp. 409, 449, claims an exceptional position among the ceremonial laws for what he calls "the two fundamental symbols of Judaism" (see also Jost, "Neuere Gesch." iii. 218 *et seq.*, 261 ; compare Geiger, "Nachgelassene Schriften," v. 181, and "Sinai," 1857, pp. 696, 698 *et seq.*).

Issue Between Talmudic and Reform Judaism.

The issue between Reform and Orthodoxy hinges chiefly upon the view taken of the ceremonial law; the Talmudical conception of the Law knows of no such distinction as is claimed to exist between ceremonial and moral laws. The less important and the more important laws ("miẓwot ḳallot" and "ḥamurot") are rated alike (Yer. Ḳid. i. 61b; Tan., 'Eḳeb, 1). "Ceremonial laws must be obeyed as divine ordinances with unhesitating and unreflective obedience" (Yoma 67b), and "the wilful transgressor of any of the ceremonial laws is considered as a breaker of the law" (Ḥul. 5a). "Be as careful in the observance of the smallest commandment as of the greatest" is the ancient Mishnaic rule (Abot ii. 1). On the other hand, the fact is being more and more recognized that while certain ceremonies fall into disuse and others take their place, as has been the case with the sacrificial and Levitical laws, there are some ceremonies which form distinctive features of Judaism and must be upheld in order to keep it from disintegration.

Often imperceptibly old ceremonies are dropped and replaced by new ones. While practical life necessitates a compromise, the law of evolution (which rules religion as well as other domains of life) exerts its power also in regard to ceremonies. Deeper historical research discloses the fact that all forms of religion adapt themselves to the conditions of the time. The regulations concerning the ẓiẓit, the maẓẓah, the sukkah, and the lulab are not observed even by conservative Israelites in exactly the same manner as prescribed in the Law. All religious rites have undergone great and radical transformations, and receive in their modified and sanctioned form only a new meaning or interpretation at the hand of the religion which enjoins it as sacred or sacramental; and the Jewish religion forms no exception to the rule (see Tylor, "Primitive Culture," ii. 362). Consequently, the question of ceremonial observance becomes for the theologian part of the larger problem, how far the principle of evolution is admissible and reconcilable with the belief in revelation and the divine character of the Law, and how far every age has power and authority to change and modify the Law and the forms of religion.

K.

CERF, KARL FRIEDRICH: German theatrical manager; born at Unterreissheim-on-the-Main in 1782; died at Berlin Nov. 6, 1845. He embraced Christianity when very young, and had to support his father's family when only seventeen years old. After having been engaged for many years in the horse trade at Dessau, he rose to the post of chief military agent, and in this capacity took part in the campaign of 1813–15, under Count Wittgenstein, general of the Russian army. The courage and fidelity displayed by Cerf won for him the favor of Emperor Alexander, who conferred on him a gold medal.

Cerf then settled at Berlin, and obtained from Friedrich Wilhelm III. a perpetual grant for the erection of the Königsstädtisches Theater, which was devoted to French comedy and Italian opera, and which he managed until his death.

CERFBEER, HERZ, OF MEDELSHEIM: French philanthropist; born at Bischheim, Alsace, in 1730; died at Strasburg in 1793. He was a contractor to the army, and employed his wealth and his influence with the French government in promoting the material and spiritual welfare of his coreligionists. The government permitted him to settle at Strasburg, in opposition to the wishes of the authorities of that city, who zealously enforced the law excluding Jews.

Cerfbeer protected all Jews who were willing to earn a livelihood by manual labor. As soon as he had received (in 1775) from Louis XVI. the patent granting him the rights of citizenship, "for services rendered by him to the government and to the land during the famine of 1770 and 1771," Cerfbeer established factories, where he employed Jews, in order to withdraw them from petty trading, and also to deprive their accusers of all excuse for prejudice.

The narrow-minded Strasburg Germans, who made every effort to prevent the Jews from settling in that city, compelled Cerfbeer to endeavor to obtain from the government the repeal of exceptional laws. A petition to the king was drawn up by Cerfbeer and sent to Moses Mendelssohn for revision. The latter consulted DOHM, who offered to write an apology for the Jews. This apology, "Ueber die Bürgerliche Verbesserung der Juden," which Cerfbeer energetically spread in France, combined with his personal efforts, brought about the convocation by Malesherbes of a commission to make suggestions for the amelioration of the condition of the Jews in France. Cerfbeer was the leading member of this commission; and the first result of its efforts was the abrogation of the degrading poll-tax.

At the outbreak of the Reign of Terror in France, Cerfbeer was thrown into prison on suspicion of favoring the royal cause; but was set free after a year of confinement.

Being acquainted with the Talmud, Cerfbeer took a great interest in Jewish literature. He supported a yeshibah at Bischheim and published at his own expense rare Hebrew books, among which was the "Leḥem Setarim" of Solomon Algazi. Wessely wrote a poem in honor of Cerfbeer ("in Ha-Meassef," 1786, p. 49), and Abraham Auerbach dedicated to him his poem "Dibre ha-Mekes we-Biṭṭulo."

CERFBEER, MAX-THÉODORE: French officer and deputy; born at Nancy, Meurthe, Dec. 9, 1792; died Jan. 15, 1876. He entered the army at an early age, and was made an officer by Napoleon I. without having passed through the military school. In 1827 he was made captain on the general staff, and in 1834 commander of a squadron, and was attached to the War Department as staff secretary. When General Schneider became minister of war in 1839, he placed Cerfbeer at the head of his bureau. Cerfbeer, promoted to the rank of lieutenant-colonel, took his seat in the Chamber of Deputies July 9, 1842, as representative from Wissembourg, having received 86 out of a total of 161 votes against 71 cast for Renouard de Bussières, the retiring deputy. He supported the government, devoting himself chiefly to military questions; thus he succeeded in having the fund for the relief of old soldiers increased by 150,000 francs. Cerfbeer, now a colonel, was reelected to the Chamber of Deputies Aug. 1, 1846, having received 119 out of a total of 218 votes against 95 cast for Renouard de Bussières. He cast his vote for the ministry of Guizot. He retired from office after the revolution of February, 1848. In addition to his political duties, Cerfbeer had also acted as manager of the Théâtre du Gymnase at Paris. He was a commander of the Legion of Honor. S.

CERFBERR, ANATOLE: French journalist and author; born at Paris 1835; died at Neuilly 1896. Under various pseudonyms, among which were "Arthur Clary," "Antoine Cerlier," and "Fulgence Ridal," he contributed to numerous papers. He was an admirer of Balzac and Victor Hugo, an ardent socialist, and well versed in matters concerning the stage. Cerfberr published many poems, biographies, studies, etc., besides a work entitled "Répertoire de la Comédie Humaine de H. de Balzac," which was crowned by the Académie Française (Paris, 1887).

CERFBERR, AUGUSTE ÉDOUARD: French author; born at Epinal in 1811; died in 1858. Having completed his studies in law, Cerfberr entered the service of the government, in which he held many high positions. His last office was that of prefect and general inspector of the prisons at Grenoble. Cerfberr was the author of two works: (1) "Du Gouvernement d'Alger" (Paris, 1834); (2) "Des Sociétés de Bienfaisance Mutuelle, ou des Moyens d'Améliorer le Sort des Classes Ouvrières" (Grenoble, 1836).

S. I. Br.

CERFBERR, FRÉDÉRIC: French consul; born at Strasburg Oct. 27, 1786; died at sea Sept. 18, 1842, on a voyage from New York to France. Being fond of travel and foreign languages, he obtained (in 1809) the appointment as secretary of the imperial commissariat in the Ionian Isles. Later he successively represented France at New York (1822), New Orleans, Haiti (1827–32), and again in the last-named place as consul-general, distinguishing himself in all three offices. In 1826, when the French government could find no representative for Santo Domingo, on account of an outbreak there of yellow fever, Cerfberr freely offered his services. On learning the miserable state to which the inhabitants of Cayes were reduced in consequence of an earthquake, Cerfberr despatched at his own expense a ship loaded with food and other needful articles.

Cerfberr fell a victim to his devotion to duty. The destructive earthquake at Haiti, May 7, 1842, killed his only daughter, and wounded him so severely that he expired on his voyage home.

CERFBERR, MAXIMILIEN CHARLES ALPHONSE, OF MEDELSHEIM: French journalist; born at Epinal July 20, 1817; died at Paris Dec. 16, 1883. After traveling extensively in Algeria and the East, Cerfberr was attached in 1839 to the penitentiary administration in the Ministry of the Interior. In 1848 he held for a short time the position of commissary of the republic in the department of Saône-et-Loire.

Among Cerfberr's numerous writings the most noteworthy are: "Projet d'un Etablissement Pénitencier à Paris," 1841; "La Vérité sur les Prisons," 1844; "Le Silence en Prison, Réflexions d'un Condamné," 1847; "Ce Que Sont les Juifs en France," 1843; "Les Juifs, Leurs Histoire, Leurs Mœurs," 1846; "La Guyane, Civilisation et Barbarie, Coutumes et Usages," 1854; "Paraboles," 1854; "La Police d'Assurance," 1867; "L'Epargne par la Dépense," 1867; "Biographie Alsacienne," 1878; "Histoire d'un Village," 1881; L'Architecture en France," 1883.

Cerfberr wrote on several other subjects of less importance; and he translated several works from German into French.

Bibliography: Larousse, *Dict.* xvii. (2d Supplement), p. 761; *La Grande Encyclopédie*, x. 50.

S. I. Br.

CERFBERR, SAMSON, OF MEDELSHEIM: French soldier and author; born at Strasburg about 1780; committed suicide at Paris, 1826. He led an erratic and adventurous life, wandering over the world, changing his name and even his religion several times. At one time he is disguised as a Mussulman with the name of "Ibrahim Manṣur Effendi," serving in the Turkish army; at another he is found holding office in Westphalia under the name of "Medelsheim." In 1813 Cerfberr fought against the Servians in Bosnia. At the end of the war he wandered throughout the East, sojourned for a time in Austria and at Naples, and in 1814–17 served in the army of Ali Pasha of Janina.

On his return home Cerfberr published a work entitled "Mémoires sur la Grèce et l'Albanie Pendant le Gouvernement d'Ali-Pacha" (Paris, 1826), containing much valuable information.

s. I. Br.

CERVERA (סירבירה): Hill-town in Catalonia, Spain, which in the fourteenth and fifteenth centuries had a Jewish community. In 1328 a quarter near the San Miguel place was assigned by King Alfonso IV. to the Jews, who enjoyed full commercial freedom; but four years later, because of their increased trade, they received permission to live in the "Calle de Vent" (the Traders' street). At the time of the Black Death, in 1349, the Jews were attacked and plundered during a riot, and eighteen of them were killed. The rest fled, but returned to Cervera after order had been restored.

The liberality and benevolence of Don Juan II. won for him the hearts of his Hebrew subjects; and upon his death, in Jan., 1479, the Jewish communities of Agramont, Belpuig, Tarrega, and certain other places assembled at Cervera for memorial services. All were dressed in black. The most distinguished Jews of Cervera carried a coffin decorated with the royal escutcheon and covered with a silken pall. Four men bearing huge torches preceded it. Singing psalms and extracts from the Jewish liturgy, the procession marched from the "Calle de Mayor," the main street, to the market-place. There the coffin was set upon a platform erected for the purpose, with torches at the two ends; and men and women joined in antiphonal dirges. Crescas ha-Kohen, physician to the king, delivered the memorial address, dwelling on the virtues of the deceased monarch; and the impressive services were closed with more dirges.

CESENA (שיזינה): City of the Pontifical States. In early times a Jewish community existed here, of which the tosafist Eliezer is mentioned in the thirteenth century. The "payyeṭan" Moses de Rossi and the exegete Obadiah Sforno were born in the city toward the end of the fifteenth century; and the rabbi Isaac Joshua b. Immanuel de Lattes officiated there in the sixteenth century. Under the papal dominion the community was subjected to all the exceptional laws, and even to the Inquisition with all its horrors. The Jews amassed so much wealth by their commercial enterprises that in 1514 the people feared that the money so accumulated would enable the Jews to become masters of the whole city. The community was dissolved when the Jews were expelled from the papal dominions.

In 1459 Angiolo de Rossi da Cesena was granted by Pope Pius II. permission to practise medicine, and in 1474 Manuele de Solomone received similar permission from Sixtus IV., and in 1460 was appointed physician and confidant to the duke of Milan.

CHABRIS: Son of Gothoniel, and one of the three governors of Bethulia, a city besieged by Holofernes. Toward the end of the siege, which had entailed much suffering upon the Israelites, Chabris and his colleagues had agreed to hold out for five days longer in the hope of deliverance; promising the people that if no prospect of relief appeared by the end of that time, they would yield. For this they were reproached by Judith, who pledged her help, and redeemed her pledge by killing Holofernes (Judith vi. 15; vii. 1, 30; viii. 10; xiii. 8).

CHÆREMON (Χαιρήμων): Stoic philosopher and anti-Jewish writer (Origen, "Contra Celsum," i. 59; Eusebius, "Hist. Eccl." vi. 19), Egyptian priest (Porphyry, "De Abstinentia," iv. 6–8; Jerome, "Adversus Jovinianum Libri II.," ii. 13), teacher of Nero (Suidas, *s.v.* Ἀλέξανδρος Αἰγαῖος), and of Dionysius of Alexandria, and predecessor of the latter as librarian of Alexandria (Suidas, *s.v.* Διονύσιος Ἀλεξανδρεύς). Hence he flourished about the year 50. He was a younger contemporary of Josephus, who refutes in detail his anti-Jewish writings. Josephus quotes an extensive fragment from Chæremon's Egyptian history (Αἰγυπτιακὴ ἱστορία), in which he scornfully recounts and ridicules, in a manner similar to that of Manetho, the departure of the Jews from Egypt. Josephus points out his errors and untruths ("Contra Ap." i. 32, 33), and boasts of having refuted him as well as Manetho and others (*ib.* ii. 1). Chæremon's history is mentioned by Porphyry (Eusebius, "Præparatio Evangelica," iii. 4, v. 10; Porphyry, "De Abstinentia," iv. 6–8), who regards the author as a truthful and reliable writer. In this case hatred of the Jews must have induced an otherwise honest man to make false statements. Chæremon's description of Egypt recalls the ideas which Philo, Clement, Origen, and others introduced into the Old and the New Testament. The asceticism especially, which he ascribes to the ancient Egyptian priests, is analogous to the description in Philo's work, "De Vita Contemplativa"; still there is no literary connection between the two authors.

Fragments of the "History of Egypt" may still exist in a treatise of Psellus published in 1877 (Sathas, in "Bulletin de Correspondance Hellénique," vol. i.). According to Suidas (*s.v.* Χαιρήμων), another work of Chæremon was entitled "Hieroglyphica," and probably contained interpretations of the hieroglyphics (collected from the works of the Byzantian Tzetzes, in Müller's "Fragmenta Historicorum Græcorum," iii. 499); while a third work may be the book "On the Comets" mentioned by Origen ("Contra Celsum," i. 59). Origen also made use of other writings of Chæremon that are now lost (Suidas, *s.v.* 'Ωριγένης).

G. S. Kr.

CHAFF (מוץ or מץ): Separated husks of grain. The Bible frequently compares things evanescent to chaff blown away by the wind (Zeph. ii. 2; Ps. i. 4, xxxv. 5; Job xxi. 18; Hosea xxxiii. 3; Isa. xvii. 13, xxix. 5, xli. 15). In the process of winnowing, by tossing the cut straw, grain, and chaff into the air, or letting it fall from an inverted fork, the grain falls almost vertically back upon the heap; the straw is blown a short distance away, while the chaff, consisting of the husks and finer particles of the straw, is carried by the wind ten or fifteen feet away. Other uses of the word "chaff" in the Old Testament are not accurate, referring rather to cut straw (Isa. v. 24; Jer. xxiii. 28) than to chaff.

CHAIKIN, MOSES AVIGDOR: Rabbi and author; born at Sklow, government of Mohilev, in 1852, and removed at an early age with his father to St. Petersburg, where the latter became chief shoḥet. Chaikin was educated for the rabbinate, and obtained several rabbinical diplomas, among others one from Rabbi Spektor of Kovno. After the riots of 1881-82 he emigrated to Paris, where he served as rabbi of the Polish Jews from 1883 to 1887; but then returned to Russia and was rabbi at Rostov-on-the-Don from 1888 to 1889. Being expelled from Russia in 1890, he went to England, and in 1892 was appointed rabbi of Sheffield, England, and in 1901 of the Federation of Synagogues, London.

Chaikin is the author of "Apologie des Juifs," Paris, 1887, and "Celebrities of the Jews," Sheffield, 1889.

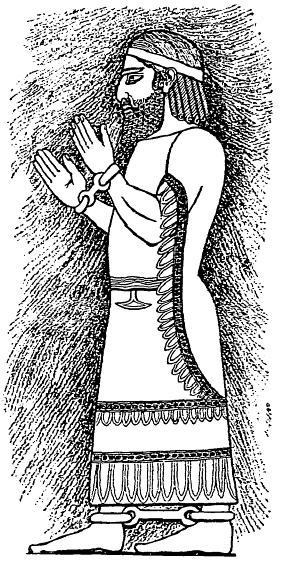
Bibliography: *Young Israel*, June, 1899.

J. G. L.

CHAINS: A word employed in English versions of the Bible as an equivalent for the various Hebrew terms applied to devices consisting of a series of links and used (1) as means of restraint, or (2) for ornamental purposes on persons or on buildings. These Hebrew terms are as follows:

1. אצעדה: Occurring in Num. xxxi. 50; R. V., "ankle chains." In II Sam. i. 10 it is translated "bracelet"; and this is evidently its more exact meaning (see Driver and Klostermann on II Sam. i. 10, and compare צעדה below No. 11).

2. המנוכא: occurring in Dan. v. 7, 16, 29 (read המניכה), and indicating a necklace worn as a mark of distinction. One was conferred upon Daniel for interpreting Belshazzar's dream. In the Targum it is employed for רביד (Gen. xli. 42). Compare No. 12 below.



Assyrian Captive in Chains.
(After Botta, "Monuments de Ninive.")

3. זקים: Occurs in Nahum iii. 10, and Ps. cxlix. 8, where it indicates fetters, probably of iron, for binding captives.

4. חח: Translated "chain" in Ezek. xix. 4, 9, A. V., but more correctly rendered "hook" in R. V. Inserted in the nose, it served as a means of leading captives (compare II Kings xix. 28). It is also indicated as an ornament (Ex. xxxv. 22, A. V. "bracelets"; R. V., "brooches"). From its insertion in the nose of the captive, it seems probable that as an ornament the חח was a nose-ring (compare נזם).

5. חרוזים: Occurs in Song of Solomon i. 10 (R. V., "strings"). Ornamental chains for the neck, probably strings of coral, metal, or pearls, are meant.

6. כושרה: This word occurs only in Ps. lxviii. 7 (6), and is translated as "chains" in A. V., but more correctly in R. V. as "prosperity" (compare dictionaries of Gesenius [-Buhl], Siegfried-Stade, and Baethgen. on Ps. lxviii. 7).

7. נחשת and **נחשתים:** Occurring in Lam. iii. 7, and often translated "fetters," as in Judges xvi. 21; II Kings xxv. 7. Chains for prisoners, made, as the name implies, of bronze. They consisted of two rings—one for each foot or arm—connected by a link.

8. נטפות: Rendered "chains" in Isa. iii. 19, A. V., but better taken, in R. V., as "pendants"—obviously with reference to the drop-like form of the ornament. In Judges viii. 26, A. V., it is rendered "collars" [margin, "sweet jewels"]; in R. V., "pendants."

9. עבת: Employed in Ex. xxviii. 14, xxxix. 15 to designate the gold chains on the ephod and breastplate of the high priest.

10. ענק: An ornament for the neck mentioned in Song of Solomon iv. 9, etc. (compare ענקתמו, Ps. lxxiii. 6). The word is used in Judges viii. 26 to designate the chains worn by camels.

11. צעדה: Rendered by R. V. in Isa. iii. 20 as "ankle chains"; A. V. has "ornaments of the legs." Compare אצעדה (No. 1) above.

12. רביד: Occurs in Gen. xli. 42 and Ezek. xvi. 11, where it indicates a necklace evidently employed as a sign of distinction. Pharaoh adorned Joseph with a chain of this kind when investing him with office.

13. רתוק: Applied (1) to chains of captivity (Ezek. vii. 23); (2) to the gold chains hung before the "oracle" (דביר) in the Temple (I Kings vi. 21); and (3) to silver chains hung upon a graven image (Isa. xl. 19).

14. שרות: Translated "bracelets" in Isa. iii. 19, both A. V. and R. V., but "chains" is the marginal rendering in the latter. The word seems to indicate arm-ornaments; compare the Arabic "siwar" (bracelet).

15. שרשרות: Chainwork used in ornamentation. It was employed in the Temple (II Chron. iii. 5, 16) and for the ephod and breastplate of the high priest (Ex. xxviii. 14, xxxix. 15). Compare שרשה (Ex. xxviii. 22), which is an abbreviated form of this word. See FETTERS.

CHAJES or **CHAJAS, ẒEBI HIRSCH B. MEÏR:** Talmudist, literary historian, and rabbi; born at Brody Nov. 20, 1805; died at Lemberg Oct. 12, 1855. His father, a scion of the famous ḤAYOT family of scholars, was a highly educated banker who lived for fifteen years at Florence before settling at Brody. He provided a good Jewish as well as secular education for his son, who even at the age of five years showed extraordinary talents. At Brody, where it was considered a sin for a Jew to speak German, the boy was taught French, German, and Italian by his father, who was himself familiar with six European languages. He also received instruction in Latin, natural science, history, etc. But rabbinical lore was his chief study, his teachers being Zanwil Margaliot of Przemysl, Ephraim Margaliot, and Elazar Landau of Brody. The last-named two Talmudists, although void of all modern scientific methods, were yet men of critical insight, and doubtless had a great influence on Chajes. At the age of twenty-two he received his diploma as rabbi, and a year later took charge of the important community of Zolkiev, which numbered among its members Nachman KROCHMAL. Although dissimilar in character and gifts, the two formed an intimate friendship, which exerted a specially wholesome critical influence on Chajes' knowledge and extraordinarily wide reading. When, in 1846, the law was promulgated in Austria compelling rabbinical candidates to pass a university examination in the liberal arts and philosophy, Chajes, though in office, passed his examination at Lemberg, and received the degree of doctor of philosophy. After officiating for twenty-four years as rabbi of Zolkiev, he accepted a call as chief rabbi of Kalisch, Russian Poland, where he remained until shortly before his death, when he returned to Zolkiev. He stayed there for a short time only, and then went for medical treatment to Lemberg, where he died. Chajes left several learned sons, among whom may be mentioned **Solomon, Moses,** and **Isaac,** chief rabbi of Brody, (born 1843 and died Feb. 1901).

Ẓebi Hirsch Chajes.

His Works.

Chajes was the author of the following works: "Misped Tamrurim," a funeral oration on the death of Emperor Francis I. (Zolkiev, 1835); "Torat Nebi'im," or "Eleh ha-Miẓwot," being thirteen treatises on the authority of Talmudic tradition, and on the organic structure and methodology of the Talmud (*ib.* 1836); "Iggeret Biḳḳoret," an examination into the Targumim and Midrashim (*ib.* 1840; with notes and revisions by Jacob Brüll, Presburg, 1853; German translation by Julius Fürst, in "Orient, Lit." i. Nos. 44 *et seq.*); "Aṭeret Ẓebi," six treatises on different subjects, which have appeared under separate titles, namely: (1) "Derush," an address on the accusation that the Jews are averse to agriculture and trades as means of livelihood; (2) "Mishpaṭ ha-Hora'ah," on the constitution and authority of the Great Sanhedrin; (3) "Tif'eret le-Mosheh"; and (4) "Darke Mosheh," a defense of Maimonides against the attacks of S. D. Luzzatto and Reggio, also on the dogmatics of Maimonides in his halakic works (a discourse on the blood accusation is added as an appendix); (5) "Iggeret Biḳḳoret," with newly added notes; and "Maṭbea' ha-Berakot," on the principle according to which the Rabbis pronounce the blessings in performing religious offices, to which are appended responsa under the title "Aṭeret Ẓebi" (*ib.* 1840–41). Chajes wrote also "Darke ha-Hora'ah," an examination of the rules that obtained in Talmudic times in deciding practical religious questions (Zolkiev, 1842); "Mebo ha-Talmud," Introduction to the Talmud (*ib.* 1845; translated in part by Jost in "Orient, Lit." vi. 16 *et seq.*); "She'elot u-Teshubot," responsa and scientific treatises (*ib.* 1850); "Imre Binah," six treatises, on the relation of Yerushalmi to Babli, on lost Haggadah collections, on the Targumim, on Rashi's commentary to Ta'anit, and on Bat Ḳol (*ib.* 1849); and "Minḥat Ḳena'ot" against Reform (*ib.* 1849). Chajes also contributed to different periodicals, among which were "Literaturblatt des Orients" and "Zion" (edited by Creizenach and Jost); and he included these contributions in his collected works. His notes to the Talmud, published first in the Vienna edition and then in that of Wilna, are most valuable, and throw much light on the text. The Wilna editions of Ḥabib's "En Ya'ḳob" (1876, 1894) contain the portion of Chajes' "Mebo' ha-Talmud" dealing with the Haggadah, as well as his notes to the haggadic passages of the Talmud.

His Importance.

Krochmal, Rapoport, and Chajes form the triumvirate of the critical school of Galicia in the second third of the nineteenth century. Although Chajes lacked the penetrating insight of the first-named and the critical sense of Rapoport, he excelled both in acumen and range of knowledge. His contributions to the history of the Targumim, the Halakah, and the Haggadah have to some extent been superseded by later investigations, yet he rendered great service in that field, because he paved the way for those investigations. Geiger's hypothesis regarding the Jerusalem Targumim is, as he himself admits ("Z. D. M. G." xiv. 314), but the carrying out of the idea which Chajes had developed in his "Imre Binah." There are few modern works dealing in detail with the Halakah or the Haggadah which have not profited by the labors of Chajes, although his name is often passed over in silence. His Introduction to the Talmud is especially noteworthy. For the conservative Chajes the Talmud is everywhere the source of law, even where it does not embody the oldest tradition; hence a Talmud introduction means for him chiefly a systematization of the forms that the traditional law and all connected with it assumed in the schools. In this respect Chajes' Introduction is the only attempt made on the part of Orthodoxy to formulate the nature, extent, and authority of tradition. Although the proofs of the truth and necessity of tradition are not valid from a strictly scientific point of view, yet it may be assumed that Chajes' conception of tradition was the one that must have prevailed in Talmudic times. Whatever one's practical attitude toward this question may be, Chajes' representation of tradition is highly important for the comprehension of Talmudic literature.

Attitude Toward Reform.

The views expressed in his works are not an entirely trustworthy criterion of Chajes' attitude on religious questions. A rabbi in a Galician town, most of the members of his community took him probably for an Apiḳoros, who only doubted the genuineness of the Zohar; therefore Chajes had to be guarded in the expression of his liberal views, and frequently his views on important doctrines are to be read only between the lines. On reading Chajes' treatise on the Haggadah in his "Introduction," one must admire the courage with which he uttered such heretical opinions without regard to his surroundings. Jost's criticism of Chajes that he changed "from a liberal thinker favoring Reform to a bitter persecutor and attacker of all that is calculated to arrest superstition" (Jost's "Annalen," 1841, p. 72) is unfounded. Chajes' tolerance toward scientific questions is best proved by his veneration for Jost, whose works he almost knew by heart. It was the radical Reform theories of Holdheim and Geiger that he opposed, at the same time avoiding all personal attacks on the reformers.

Bibliography: Buber, *Anshe Shem*, p. 199 (contains also Chajes' epitaph); I. Bodek, in *Ha-Maggid*, i. Nos. 8-11; Kohen-Zedek, in *Meged Yeraḥim*, i. 106-116; Z. Sagoradski, in *Ha-Asif*, iv. 155-160; Zeitlin, *Bibl. Post-Mendels.* pp. 53-55; Rapoport, in *Kerem Ḥemed*, vi. 204-259 (a very severe criticism of Chajes' *Iggeret Biḳḳoret*).

CHAJUN. See Ḥayyun.

CHALAFTA. See Ḥalafta.

CHALCIS: Capital of the island of Eubœa in the Ægean sea; under Greek dominion since 1832. Benjamin of Tudela found 200 Jews on the island. There is also testimony to the early residence of Jews in Chalcis in a Hebrew inscription on a gravestone set in the city walls at the entrance-gate. This stone, dated 5086 (1326 c.e.), shows that Jews came to Bœotia and Negropont before the expulsion from Spain, and therefore were not necessarily of Castilian origin.

According to information gathered at Chalcis, there were several Jewish communities in this region before the War of Independence (1821-27). The most important was at Thebes, where it is said there are still some Hebrew inscriptions. These communities suffered the ravages of the war, and some were completely broken up. The little synagogue of the congregation at Chalcis does not testify to any great prosperity in the past. The documents of the community were lost in a fire more than a century ago, and the synagogue itself, built about 1400, was also destroyed by fire in 1844, but was rebuilt five years later.

In a total population of 7,000 inhabitants there are in Chalcis about fifty Jewish families, all of the Sephardic ritual. All live in the same quarter, and are extremely poor, so that no rabbi is maintained and very little religious instruction is given. Few know the Torah or understand their prayers. Nevertheless they are attached to Judaism, and generally go to end their days in the Holy Land.

Their family names are for the most part Greek —such as Marzoukos, Kosty, Moschonas, Sakkys, Politi, Daskalaki—and their features are of the purest Greek type. Their language is Greek. The old men dress "à la Palikare," wearing the "shalvar," or fustanelle, with a high fez on the head, and a heavy tassel hanging down the neck. The old women cover their hair with an unbecoming headdress consisting of a dark silk kerchief twisted tightly around the head. The young people, however, like their Christian fellow-citizens, have recently adopted European dress.

The Jewish cemetery of Chalcis, which has no enclosure, covers a large extent of ground. The dead are buried in a most primitive way, without any sign to mark the grave.

CHALDEA: The Hebrew "Kasdim" (generally without the article) usually designates the Chaldeans as a people, sometimes also their country (Jer. l. 10; li. 24, 35; Ezek. xi. 24, xvi. 29, xxiii. 15 *et seq.*) or the people together with the country (Gen. xi. 28, 31; xv. 7; Neh. ix. 7). The word is Assyrian, or rather Babylonian, yet the Hebrew is the earlier form; while the cuneiform inscriptions give the later or classical Babylonian sound of the word, namely, "Kalde." Probably the Hebrew pronunciation was learned indirectly from the Chaldean tribes themselves before the latter had changed the earlier pronunciation.

The "land of the Chaldeans" (Jer. xxiv. 5 *et al.*) is also a frequently occurring phrase. The Chaldean country, in the strict sense, lay in southern Babylonia, on the lower Euphrates and Tigris. But the name was extended by the Biblical writers to include the whole of Babylonia, after the Chaldean Nebuchadnezzar had established the new Babylonian empire and brought his people to world-wide fame. Indeed, it is doubtful whether the Biblical "Chaldea" and "Chaldeans" ever connoted the ancient country and people; these terms, until the eighth century B.C., were restricted to the region along the head of the Persian gulf (see BABYLONIA). The only doubtful passages are those in which "Ur of the Chaldees" is spoken of (Gen. xi. 28 *et seq.*). On the whole, therefore, the Bible agrees with the inscriptions in making the Chaldeans of history a comparatively modern race, and in excluding them from all association with the ancient dynasties of Babylonia.

The term "Chaldaic," for the language spoken by the Chaldeans, does not occur in the Bible. What has been popularly signified under that name is properly called "Aramean" in Dan. ii. 4. The Chaldeans of course spoke Babylonian in the days of the prophet Daniel; but when the Book of Daniel was composed (second century B.C.), Aramean had come to be used by all classes throughout Babylonia.

E. G. H. J. F. McC.

The Land: Chaldea as the name of a country is used in two different senses. In the early period it was the name of a small territory in southern Babylonia extending along the northern and probably also the western shores of the Persian gulf. It is called in Assyrian "mat Kaldi"—that is, "land of Chaldea"—but there is also used, apparently synonymously, the expression "mat Bit Yakin." It would appear that Bit Yakin was the chief or capital city of the land; and the king of Chaldea is also called the king of Bit Yakin, just as the kings of Babylonia are regularly styled simply king of Babylon, the capital city. In the same way, the Persian gulf was sometimes called "the Sea of Bit Yakin, instead of "the Sea of the Land of Chaldea."

It is impossible to define narrowly the boundaries of this early land of Chaldea, and one may only locate it generally in the low, marshy, alluvial land about the estuaries of the Tigris and Euphrates, which then discharged their waters through separate mouths into the sea. In a later time, when the Chaldean people had burst their narrow bonds and obtained the ascendency over all Babylonia, they gave their name to the whole land of Babylonia, which then was called Chaldea.

The People: The Chaldeans were a Semitic people and apparently of very pure blood. Their original seat may have been Arabia, whence they migrated at an unknown period into the country of the sea-lands about the head of the Persian gulf. They seem to have appeared there at about the same time that the Arameans and the Sutu appeared in Babylonia. Though belonging to the same Semitic race, they are to be differentiated from the Aramean stock; and Sennacherib, for example, is careful in his inscriptions to distinguish them. When they came to possess the whole land their name became synonymous with Babylonian, and, though conquerors, they were speedily assimilated to Babylonian culture.

The language used by the Chaldeans was Semitic Babylonian, the same, save for slight peculiarities in sound and in characters, as Assyrian. In late periods the Babylonian language ceased to be spoken, and Aramaic took its place. One form of this widespread language is used in Daniel and Ezra, but the use of the name Chaldee for it, first introduced by Jerome, is a misnomer.

History: The Chaldeans, settled in the relatively poor country about the head of the Persian gulf, early coveted the rich cities and richly cultivated lands of the more favored Babylonians to the north of them. They began a running fire of efforts to possess themselves of the country. These efforts varied much. On the one hand, Chaldean communities were formed in several parts of Babylonia by the simple and peaceful process of immigration. On the other hand, Chaldean agitators were ever ready to participate in rebellions against Assyrian authority, hoping that the issue might make them the rulers of the independent kingdom. Such a man was MERODACH-BALADAN, who was king of Babylonia several times, being deposed by the Assyrians, but always succeeding in seizing the reins of power again. Methods similar to those which he pursued triumphed in the end, and the new empire, which began with the reign of Nabopolassar in 625 B.C. (see BABYLONIA), was Chaldean, though there is no positive proof that its founder was himself of pure Chaldean blood.

When the Chaldean empire was absorbed into the Persian, the name Chaldean lost its meaning as the name of a race of men, and came to be applied to a class. The Persians found the Chaldeans masters of reading and writing, and especially versed in all forms of incantation, in sorcery, witchcraft, and the magical arts. They quite naturally spoke of astrologists and astronomers as Chaldeans. It therefore resulted that Chaldean came to mean astrologist. In this sense it is used in the Book of Daniel (Dan. i. 4, ii. 2 *et seq.*), and with the same meaning it is used by the classical writers (for example, by Strabo).

CHALIẒAH. See ḤALIẒAH.

CHÂLONS-SUR-MARNE (Latin, **Catalaunum**; Old French, **Chaalons**): Capital of the department of Marne, France. Little is known of the Jews of this city. In 1292 Davy and his son Salemon, Jews of Chaalons, were living at Paris. The "Document sur les Juifs du Barrois" (1321–23) mentions for Châlons only Lyonnet, his mother Doucine, Morel, and two other Jews, whose names are not given. In 1306 the king, Philip the Fair, demanded the confiscated property of the Jews of Châlons in behalf of the royal treasury; but the bishop of the city maintained that as the Jews were subject to him their property also belonged to him. The Parliament was asked to settle the difficulty, but in the course of the proceedings the king yielded and presented the bishop with the cemetery of the Jews (1314). This cemetery seems to have been the burial-place of all the Jews of Barrois. The Jewish community of Châlons to-day consists of forty or fifty families; it has a synagogue and a rabbi.

Bibliography: *Rev. Et. Juives*, i. 68, 70; ii. 72; xix. 247, 254.

G. S. K.

CHÂLONS-SUR-SAÔNE (Hebrew, קאלון or קאלונש): Capital of the department of Saône-et-Loire, France. Jews were established in the city at an early period; the council that convened there in 630 forbade them to sell slaves abroad. A mint-master named Priscus, who held office at Châlons in 555, seems to be identical with the Jew of that name who, in the presence of Gregory of Tours, had a theological controversy with the king Chilperic. Among the other Jewish mint-masters of this period mention is made of Jacote of Châlons, Juse of Macon, Jacotus of Orleans, etc. In the second half of the eleventh century R. Eliezer ben Judah, the pupil of R. Isaac ben Menahem of Orleans, lived at Châlons. The celebrated Rashi of Troyes corresponded with the scholars of קבלון (Châlons; Latin, "Cabillonum"), who took part in the synod convened at Troyes about 1160 under the direction of R. Jacob Tam of Rameru.

In the thirteenth and fourteenth centuries the Jewish community of Châlons was one of the most important of Burgundy, although its members were still periodically subjected to harsh treatment. The most eminent Jews of the period (1306) were Hélion and Bénion, who numbered important personages among their debtors, and (1384-95) Alisa of Treves, Namiet Lévi, Solomon of Montréal, Saulcin Beaugey, Aaron Lévy, Croissant of Bourges, Isaac of Troyes, Maître Pérez, and R. Joseph, author of a commentary on the Pentateuch, in which he frequently cites the Bible commentator R. Eliakim מקולין or מקלין as his master and compatriot. Châlons-sur-Saône has to-day (1902) a small Jewish community, placed under the administrative and religious authority of the consistory of Lyons.

G. S. K.

CHALPHI: Father of Judas. The latter was one of the two captains who remained when all the others under Jonathan had fled at the battle of the plain of Nasor (I Macc. xi. 70). Josephus refers to Chalphi, but calls him "Chapsios."

J. JR. G. B. L.

CHALUḲKA. See Ḥaluḳḳa.

CHALYZIANS: A people who, according to the Byzantine historian, John Cinnamus (twelfth century), accepted the Mosaic law. They fought, together with the Dalmatians, against the Greeks in the reign of Manuel Comnenus in 1154. "Chalyzians," as A. Harkavy suggests, is probably the name given by Cinnamus to the Chazars, whom Duke Taksony of Hungary invited, among other tribes, to settle in his domains, in order to make good the losses in the population of the country, due to the many raids which the Hungarians undertook into surrounding countries, but which, after causing alarm to the whole of Europe, resulted in the final defeat of Duke Taksony in the year 970.

The Polish historian August Bielkowski, however, suggests that the Chalyzians of Cinnamus were the Chvalissy of Nestor. When the Hungarians removed to Dacia and Pannonia, the reigning family among them was the Kabary, one of the Chazar tribes.

G. H. R.

CHAMA (RAB). See Ḥama.

CHAMAI (GAON). See Ḥamai.

CHAMATI, NATHAN. See Nathan b. Gad of Ḥamath.

CHAMBERLAIN: The English rendering of סרים. This Hebrew word is also translated "officer" (Gen. xxxvii. 36; II Kings viii. 6). If "chamberlain" is to be used at all, it must be taken in a very broad sense. The chamberlain is sometimes a mere servant (Acts xii. 20), or messenger (II Kings viii. 6); at other times he holds a position of trust, and even has charge of the finances (Rom. xvi. 23). See Eunuch and Officer.

In Jer. li. 59 the word stands for שר מנוחה, which is incorrectly given by the A. V. as "a quiet prince." The chamberlain here referred to was a brother of Baruch, the secretary of Jeremiah.

E. G. H. G. B. L.

CHAMBERLAIN, HOUSTON STEWART: Anglo-German musical critic and anti-Semitic writer; born Sept. 9, 1855, at Portsmouth, England; son of Admiral W. C. Chamberlain. He went to school at Versailles, studied science at Geneva University, and finally became privat-docent in philosophy at the University of Vienna.

Besides several works on Richard Wagner, from whom he probably imbibed much of his anti-Semitism, he has attracted attention by his chief work, "Die Grundlagen des 19. Jahrhunderts," Munich, 1899; 4th ed., 1902. In this he regards all history as a conflict between the Aryans and the Semites; the latter being regarded as a special genus, "homo Syriacus," of which the Jew, "homo Judaicus," is a typical species. Race rules history; and the influence of the Semites in the early forms of Christianity broke down the ancient world, which had to be revived by the new blood of Germanism against which the Roman Catholic Church is perpetually struggling in order to introduce once more the abstract universalism of the Semite. Chamberlain dreads a world-supremacy on the part of the Jews, and attacks in every way their intellectual, moral, and religious qualities. While evincing great admiration for the character and views of Jesus, so great is his anti-Semitic bias that he denies Jesus' Jewish origin.

Chamberlain's journalistic style and wide generalizations have attracted considerable attention, especially in German-Jewish journalism, as can be seen from the accompanying bibliography.

E. C. J.

CHAMBÉRY: Capital of the department of Savoy, France. When the Jews were driven from France by Philippe Auguste in 1182, many of them sought refuge in Chambéry and the surrounding country, especially at Yenne, Seissel, Aiguebelle, and Saint-Genis (Gerson, "Notes sur les Juifs des États de la Savoie," in "Rev. Et. Juives," viii. 235; compare Loeb, "Un Episode de l'Histoire des Juifs de Savoie," in "Rev. Et. Juives," x. 32). They were subject to a tax, which in 1300 amounted to 75,374 francs; in 1328, to 2,400 florins (gold); and, in 1331, to 1,200 florins (Costa de Beauregard, "Notes et Documents sur la Condition des Juifs en Savoie," in "Mémoires de l'Académie Royale de Savoie," 2d series, 11; compare Victor de St.-Genis, "Histoire de Savoie," i. 456). Amadeus V. granted them privileges which were confirmed Nov. 17, 1323, these being chiefly in favor of the Jews Vivant de Vesos, Master Agin, his son-in-law, and Harasson de Biauna ("Rev. Et. Juives," x. 32).

In 1348, at the time of the Black Death, the Jews of Chambéry were accused of having poisoned the wells at the incitation of Rabbi Peyret and Aboget, a rich Jew. Many were massacred at Chambéry, Montmélian, Chillon, Chatel, Yenne, etc. (Costa de Beauregard, *l.c.*; compare Grätz, "Gesch. der Juden," vii. 362). Another persecution occurred in 1394, at the instigation of Vincent Ferrer (Joseph ha-Kohen, "'Emeḳ ha-Baka," translation by I. Sée, p. 85). In 1417 two converted Jewish physicians, Guillaume Saffon and Master Pierre of Macon, were commissioned to examine the books of the Jews at Chambéry in order to find therein the alleged blasphemies against the Christian religion with which they had been charged ("Mémoires de la Société Savois. d'Histoire et d'Archéologie," xv. 21, cited by Gerson in "Rev. Et. Juives," viii. 239).

At the request of the archbishop of Lyons, Marie de Berry, duchess of Bourbon, who governed the city of Trévoux in the absence of her husband, Jean de Bourbon, had the Jewish books examined in 1430. The physician Ayme (Amadeus), a converted Jew of Chambéry, was commissioned to examine works written in Hebrew, and to translate the passages that were to be condemned ("Rev. Et. Juives," x. 34). He also conducted an inquiry against the Jews of Savoy, whose books he ordered to be burned (*ib.* viii. 239).

Solomon ibn Verga ("Shebeṭ Yehudah," No. 11) tells of a general persecution of the Jews in Savoy and Piedmont in 1490. Gerson (*l.c.* p. 236) thinks, not without reason, that this was the persecution instigated in 1466 by Louis of Nice or Provence, a converted Jewish physician, commissioned by his godfather, Duke Louis, to make an inventory of the books of the Jews of Chambéry, who had been accused of witchcraft and sacrilege. This accusation was later acknowledged to be false (Costa de Beauregard, *l.c.* p. 106; compare "Rev. Et. Juives," viii. 239). In 1430 the Jews were confined to a special quarter assigned to them by Amadeus VII. The count of Savoy compelled them to wear, like the Jews of France, a wheel, half red and half white, upon the left shoulder ("Rev. Et. Juives," x. 33). They were finally forced to leave Chambéry in consequence of the general banishment of the Jews from Spain in 1492. According to Victor of St.-Genis, however (i. 455), this city had a Jewish community in 1714.

Among the scholars mentioned as having lived at Chambéry are: R. Aaron, commentator on the Pentateuch; R. Jacob Lévi; R. Solomon, the father of Joseph Kolon, who states that when he lived at Chambéry, about 1440, there were distinguished rabbis in that city; and the celebrated publisher, Gerson Soncino, who, in his preface to the Hebrew grammar of David Ḳimḥi (1532-34), says that he collected the Tosafot of Fouques in Chambéry. There were also several eminent Jewish physicians, among whom may be mentioned: Master Samson, physician to Amadeus V.; Master Palmieri, attached to the person of Amadeus VI., and physician of the city of Chambéry; Helias of Evian, called in 1418 to attend the daughters of the count of Savoy; Masters Isaac of Annecy and Jacob of Chambéry, physicians to Bonne de Berri, mother of Amadeus VIII.; Master Solomon, physician to Amadeus VIII.; Master Jacob of Cramonaz, physician to the regent Yolande ("Rev. Et. Juives," viii. 241, 242).

G. S. K.

CHAMELEON: An animal of the genus *Chamæleon*, the only genus of the tribe *Dendrosaura* (also *Chamæleonida, Rhiptoglossa, Vermilinguia*), of the *Chamæleontidæ* or *Chamæleonidæ* family, of which it is the type. Some sixty species of the genus are known to exist, the most common of which, *Chamæleon vulgaris*, is frequently found in Egypt and the Holy Land. The word "chameleon" is taken from the Greek *χαμαιλέων* (literally "ground-lion"), presumably a Greek adaptation of a foreign word. Bochart ("Hierozoicon," iv. ch. vi.) derives it from a supposed Punic word, גמליון ("little camel"). This conjecture he bases on the name "jamal al-Yahud" ("camel of the Jews"), which the Arabs give to the chameleon on account of the hump on its back.

In the A. V. "chameleon" is the rendering of the Hebrew כח (koaḥ), which occurs only once (in Lev. xi. 30), in a list of five unclean animals, where it occupies the second place. This rendering, apparently, has the support of the Septuagint and the Vulgate, which may, however, be due to the fact that the animals are not arranged in the same order in the LXX. as in the Hebrew. The same can be said of the rendering "ḥulda" of the Peshiṭta. The koaḥ is presumably a species of monitor, as the ḥulda is of the MOLE. It is now commonly thought that the chameleon is to be identified with the fifth animal on the list, תנשמת (tinshemet), in the R. V. This identification is based principally on the etymology of the word תנשמת ("the breather," "inhaler"), from the root נשם ("to blow," "to breathe"). The chameleon is remarkable for its habit of inflating itself, which, combined with its power of fasting, led the ancients to believe that it lived on air (see Bochart, *l.c.*, quoting Ḳimḥi). In reality it lives on insects, which it captures by darting at them its long and viscid tongue. The little animal, six or seven inches long, or, with the tail, eleven to twelve inches, lives almost exclusively upon trees, where it finds itself quite at home, thanks to its prehensile tail and feet.

Another peculiarity of the chameleon is its ability to change its color, supposedly in accordance with that of the objects with which it comes in contact. Whatever be the occasion of the phenomenon, its possibility is due to the presence in the skin of contractile cells, both clear and pigment-bearing, placed at various depths, and so arranged that, under the control of the nervous system, the one or the other only, or both kinds in various proportions, will come to the surface.

The tinshemet of Lev. xi. 30 must not be confounded with a bird of the same name mentioned in Lev. xi. 18.

CHAMOIS: The rendering of the Hebrew זמר (zemer), both in the A. V. and in the R. V., probably on the authority of Bochart ("Hierozoicon," iii. ch. xxi.). It must, however, be discarded, for the reason that the chamois is exclusively a European animal. The zemer can not be identified with precision. The word occurs only once (Deut. xiv. 5); and it has no parallel in the cognate languages. The versions of the Bible are at variance as to its translation. The Septuagint and the Vulgate, followed by the Coptic, have "camelopard" or "giraffe"—apparently a mere guess, and not a happy one considering the remoteness of the home of that animal from Palestine. The Peshiṭta translates "zemer" by *arna*, a word which does not occur elsewhere in Syriac literature; Bar-Bahlul renders it "mountain-sheep," on the authority of Gregory of Nyssa and Bar-Serushway; while BarAli (ed. Hoffmann, gloss 1518) has *althaital*, "wild goat," or *al-wa'il*, "mountain-sheep." Both the thaital and the wa'il belong to the wild goats (steinböke, bouquetins; see Hommel, "Die Namen der Saügethiere," pp. 280, 286). The rendering "elk" (Luther) is to be rejected for the same reason as "camelopard" or "chamois."

Modern naturalists generally agree that the zemer must have been a kind of wild sheep, of the same type as the ammotragus, the *aroui* of the Arabs which is represented on the Egyptian monuments and is still common in Egypt, Arabia Petræa, and the Atlas range.

CHAMPAGNE (קונפיינא, קפונייא, קלפייא, צמפן, קנפיינא, קנפנייא, קאנפאניאה): A former province of France, now known as the departments of Marne, Haute-Marne, Aube, and Ardennes, with part of Seine-et-Marne, Yonne, Aisne, and Meuse. Jews settled in Champagne as early as the Gallo-Roman epoch. They depended on the protection of the counts governing the country, this protection, however, being dearly bought. Often the Jews of Champagne moved into adjacent countries, being unable to pay the heavy taxes imposed upon them. To avoid this loss to the treasury and to get "their Jews" back, the counts of Champagne concluded treaties of extradition with the neighboring countries. Such a treaty was concluded in 1198 between Count Thibaud IV. and Philippe Auguste, and was renewed in 1201 by Countess Blanche, the widow of Thibaud. The latter claimed the extradition of a wealthy Jew named Cresselin, who sought refuge at Paris from the extortions of the countess.

In 1284 Champagne was incorporated into the kingdom of France, and the fate of the Jews of this province became that of all the French Jews. In taking possession of Champagne Philip the Fair imposed upon the Jews of the province the payment of 25,000 livres as a gift for the "happy event."

Champagne was renowned in the twelfth century for its Talmudical schools at Troyes, Ramerupt, Dampierre, and other places. It was the native country of Rashi, Jacob Tam, and many other Talmudical celebrities. Its religious customs are often cited in the ritual laws.

At the present day (1902) the greater part of the ancient Champagne belongs to the consistorial district of Lille.

CHAO YNG-CHENG: Chinese mandarin; flourished about 1653. After the sack of K'ai Fung-Foo, which followed the fall of the Ming dynasty in 1642, the synagogue there was destroyed, and the Jews took refuge on the north side of the river Hoang-Ho, having saved the scrolls, which had been thrown into the water. Ten years later Chao, who was a Jewish mandarin from the province of Chen-Si, was detailed to restore the city, and with the aid of his brother, Yng-teou, induced the Jews to cross the river and take up their old quarters, and rebuild the temple in 1653. One complete scroll of the Law was made up out of the fragments which had been saved from the waters, and other copies were made from this. Chao wrote an account of the saving of the scrolls and the rebuilding of the temple, which was expanded by his brother into a book of ten chapters. A stone stele dated 1663 was afterward erected, giving the details of his action.

CHAPMAN, JOHN: English educationist and communal worker; born 1845. Educated at Jews' College, London, he became an assistant master in that institution, and was subsequently appointed head master of the Jews' Hospital and Orphan Asylum. He has been for many years principal of the Great Ealing proprietary school, at which large numbers of Jewish lads of the middle class have been trained. For a time Chapman was minister of the Western Synagogue, Haymarket. He is the honorary secretary of the council of Jews' College.

Chapman was one of the founders of Ealing Public Library.

CHARASHIM. See Ge-Ḥarashim.

CHARCHEMISH. See Carchemish.

CHARES (Χάρης): Leader of the Zealots in the Judæo-Roman war, and one of the most eminent men of Gamala (Josephus, "B. J." iv. 1, § 9). When the men of Bathyra, "called the Babylonians," who sided with Agrippa and the peace party, were at Gamala without their leader, Philip, they were attacked by the Gamalians, and Chares, Philip's relative, and his brother Jesus were killed (*idem*, "Vita," xxxv., xxxvii.). Chares' name is found in inscriptions.

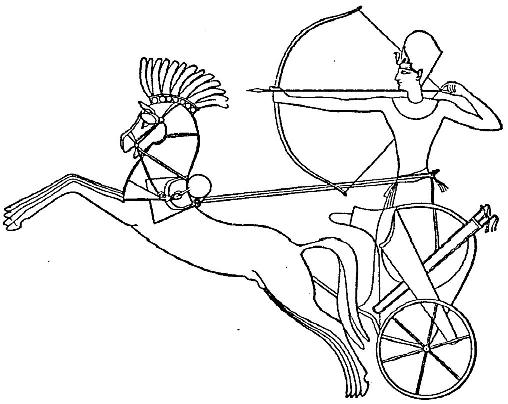
G. S. Kr.

CHARGER: A rendering of two Hebrew words and a Greek one: (1) קערה (ḳe'arah), occurring in the list of the donations of the chiefs of the tribes on the day of the dedication of the Tabernacle (Num. vii. 13 *et seq.*). Elsewhere the word is rendered Dish. (2) אגרטל (agarṭel), the etymology of which is uncertain. It is, perhaps, the Greek κάρταλος taken into the Aramaic. The word is found in the list of vessels restored by King Cyrus to the returning Jewish exiles (Ezra i. 9). (3) Πίναξ, the dish upon which the head of John the Baptist was presented to Herodias (Matt. xiv. 8, 11; Mark vi. 25, 28).

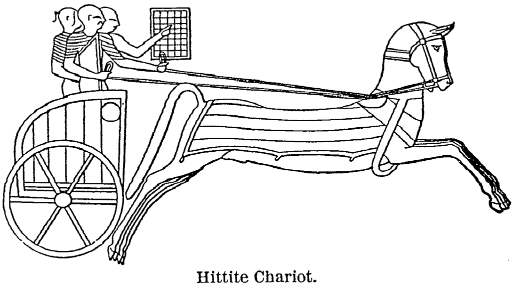
E. G. H. G. B. L.

CHARIOT: Vehicles are designated in Hebrew chiefly by two expressions, "'agalah" and "rakab," with "merkab" and "merkabah" derived from the latter. The former denotes the wagon used for heavy loads and general work, the name being connected with the root "to roll"; while the latter is the chariot of war or of state. Wagons for carrying burdens or persons are found among the different peoples of antiquity, having displaced at an early time the sledge and the drag on rollers, drawn by men or oxen (compare the pictures in Wilkinson, "Manners and Customs of the Ancient Egyptians," iii. 324). Early Egyptian monuments show also a frame like a litter, which was fastened between asses and used to carry persons.



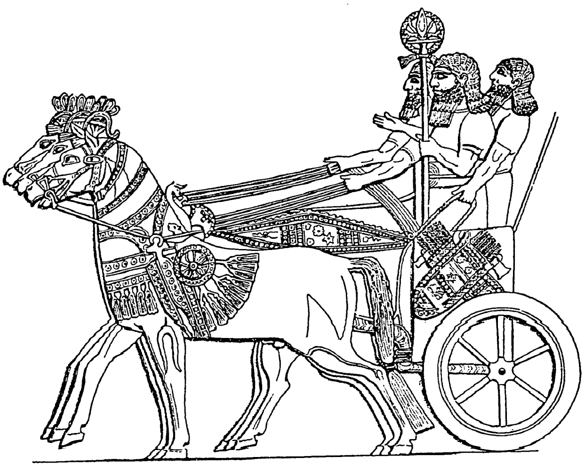
Egyptian Chariot.
(From Champollion, "Monuments de l'Egypte.")

Originally the wheels of the wagons were solid disks (*ib.* i. 369), but a more artistic type, consisting of hub, spokes, and fellies, was gradually evolved. The spokes, "ḥishshuḳim" (I Kings vii. 33), sprang from the hollow cylinder in the center of the wheel ("ofan" or "galgal"), that is, from the hub, "ḥishshurim" (I Kings vii. 33), around the stationary axletree, "yad," and connected it with the rim or the fellies, "gebim" (I Kings vii. 33; Ezek. i. 18, x. 12). In extant Assyrian illustrations the wheels generally have eight spokes, while in the Egyptian wagons four, or more frequently six, spokes are found. The body of the wagon and the pole were connected directly with the axletree. The pole had a yoke arranged for two animals only, so that each additional animal had to be harnessed separately, and not in



Hittite Chariot.
(From Champollion, "Monuments de l'Egypte.")

front, but on the side of the first two animals. As horses did not come into general use among the Israelites until the time of Solomon, oxen were originally the chief draft-animals (I Sam. vi. 7), while asses were generally used for the saddle. That the Israelites in very early times had wagons for carrying burdens, is evident from I Sam. vi. 7 and II Sam. vi. 3. Mention is also made of threshing-wagons (Isa. xxviii. 27). There is no definite information regarding harvesting-wagons (see Amos ii. 13). It is to be noticed that the latter are not used to-day in Palestine ("Zeit. Deutsch. Paläst. Ver." ix. 40, and the commentaries on Amos, *l.c.*). Persons traveled chiefly on asses, because the poor condition of the roads in Palestine made it difficult to use wagons to any extent, especially for long journeys. Nevertheless, the fact that the Egyptians evidently received the word עגלה (Egyptian, "'agolt"), as well as מרכבה (Egyptian, "merkobt"), from the Canaanites, shows that wagon-building was known at an early date in Canaan.



Assyrian Chariot.
(From Layard's "Nineveh.")

War-Chariots.

War-chariots proper were also known in Canaan at an early time, for as a result of having them the Canaanites were so superior to the Israelites that the latter could not meet them in open battle on the plain (Josh. xi. 4; Judges i. 19, iv. 3; I Sam. xiii. 5). These vehicles were indeed strange to the Israelites. Although David captured chariots and horses in his war with the Syrians, he did not use them, and even hamstrung the horses (II Sam. viii. 4). It remained for Solomon to introduce war-chariots, which were stationed partly in Jerusalem and partly in other cities (I Kings ix. 19). Beginning with his time, chariots and horsemen are often mentioned in the army of the southern as well as of the northern kingdom (I Kings xvi. 9; II Kings viii. 21, xiii. 7; Isa. ii. 7; Micah v. 9). Horses were indispensable to these chariots, and the great difficulty in procuring them (II Kings vii. 13, xviii. 23) probably often induced political leanings toward Egypt (Isa. xxx. 16, xxxi. 1, xxxvi. 9).

The war-chariots doubtless resembled the Assyrian and Egyptian two-wheeled chariots, open in the back; they were not furnished with scythes, as is often stated, for the latter were introduced by the Persians. They were made of fig-tree wood, and trimmed with bronze or iron. Like those of the Assyrians, the Hittites, and others, the chariots of the Israelites probably carried three men, שלישים, the driver, the warrior proper, and the shield-bearer; while on those of the Egyptians there were generally but two men. According to I Kings x. 29 the price of a chariot imported from Egypt in the time of Solomon was 600 shekels, and that of a horse 150 shekels.

Sun-Chariots.

During the last decades of the southern kingdom mention is made of sun-horses and sun-chariots stationed in the outer court of the Temple, these being removed later by Josiah. They had been introduced at the time that syncretism was flourishing, and the cult of the sun-god had become dominant under Assyrian influence. As in the case of the Canaanite Baal (in reality the sun-god), the Assyro-Babylonian sun-god had been identified with Yhwh, and his symbols placed in the court of the Temple. Such syncretism was not altogether foreign to Hebrew ideas, for Yhwh is not only the God of heaven, but also He who rides in a chariot (Hab. iii. 8; Ps. lxviii. 18[17]) and on the Cherubim, and who descends in a chariot of fire to take His saints into heaven (II Kings ii. 11, vi. 17, xiii. 14). For God's chariot-throne see Merkabah.

E. G. H. W. N.

CHARITY AND CHARITABLE INSTITUTIONS.—Ancient and Medieval Times. Charity is kindness shown to the needy; Hebrew, "ẓedaḳah" = "righteousness" (Deut. xxiv. 13; Isa. xxxii. 17; Prov. xiv. 34; Ps. cvi. 3; Dan. iv. 24); "gemilut ḥesed" or "gemilut ḥasadim" = "the bestowing of kindness," is the rabbinical term for personal charity. Charity may be regarded merely as a free tribute of love, as in the New Testament, where ἀγάπη is often translated in A. V. by "charity"; or it may be equivalent to "liberality," a term borrowed from the Roman world, where, as in Greece, only on a larger scale, the freeborn ("libri") or wealthy showed generosity by great donations to the lower classes. But in Judaism charity is an act of duty incumbent upon men of means to provide for those in want. Charity is righteousness in so far as God, the Giver of all blessings, claims from His gifts a share for the poor, and, as the actual owner of the land, claims certain portions of the produce for the fatherless and the widow, the Levite and the stranger: "Thou shalt surely give him [the poor], and thine heart shall not be grieved when thou givest unto him: because that for this thing the Lord thy God shall bless thee in all thy works and in all that thou puttest thine hand unto. For the poor shall never cease out

The Lord's Share.

of the land: therefore, I command thee, saying, Thou shalt open thine hand wide unto thy brother, to thy poor and thy needy in thy land" (Deut. xv. 10, 11). In the Mosaic legislation the right of proprietorship does not extend to the corners of the field, the gleanings of the harvest, the forgotten sheaf, and the growth of the seventh year; they "shall be for the stranger, the fatherless, and the widow" (Lev. xix. 9, 10; xxiii. 22; Deut. xxiv. 19–21; Ex. xxiii. 11; compare Lev. xxv. 23). The tithes of the yearly produce also were claimed every third year for the Levite, the stranger, the fatherless, and the widow (Deut. xiv. 22–29, xxvi. 12 *et seq.*; compare Mal. iii. 10). So should every enjoyment of God's gifts be shared by the needy (Deut. xvi. 11, 14). Charity from this point of view may be called an assessment of the rich in favor of the poor. This also is the view of the Rabbis. When asked by Tinnius Rufus: "Why does your God, being the lover of the needy, not Himself provide for their support?", R. Akiba replied: "By charity wealth is to be made a means of salvation; God, the Father of both the rich and the poor, wants the one to help the other, and thus to make the world a household of love" (B. B. 10a).

A Claim of Righteousness and Love.

Charity Is Righteousness.

In another aspect charity is righteousness. The helpless has a right to claim the help of his more fortunate brother. The cry of the distressed is an appeal to human compassion which must be responded to, lest the "gracious" God, who "doth execute the judgment of the fatherless and widow" (Deut. x. 18)- hear it and punish those who remain deaf to the call of duty (Ex. xxii. 20–25). The poor are "my people," says God: "If thy brother be waxen poor . . . thou shalt relieve him that he may live with thee" (Lev. xxv. 35). He is "of thine own flesh," and when thou seest him naked thou shouldst cover him, and give him bread when he is hungry, and shelter when he is cast out (Isa. lviii. 7). The idea that the poor and forsaken stand under the special protection of God, who "loves the stranger" and is "father of the fatherless and judge of the widows" (Deut. x. 18; Ps. lxviii. 6, 15), is the underlying motive of such charity as is expressed in Proverbs: "He that hath pity upon the poor lendeth unto the Lord" (xix. 17); "He that honoreth him hath mercy on the poor" (xiv. 31). Compare Ps. xli. 1: "Blessed is he that considereth the poor; the Lord will deliver him in time of trouble," and the whole of Ps. cxii. Accordingly, the ideal type of the righteous man is he who is "eyes to the blind," "feet to the lame," and "father to the poor" (Job xxix. 15); and that of the virtuous woman, she who "stretcheth out her hand to the poor" and "reacheth forth her hands to the needy" (Prov. xxxi. 20).

Charity a Human Obligation.

Charity is a human obligation. Man owes it to his fellow-man as a brother. It is expected of all men and toward all men (Deut. xxiii. 5; I Kings xx. 31; Amos i. 11–ii. 1; Philo, "De Caritate," §§ 17, 18). Abraham is a type of charity and benevolence (Gen. xviii. 3). In the Testaments of the Twelve Patriarchs it is simple-hearted Issachar (Issach. 3, 5, 7) who, by example and precept, teaches charity in "helping the poor and the feeble and sharing every gift of God with the needy." Philo (ed. Mangey, ii. 629), in the fragment preserved by Eusebius ("Præparatio Evangelica," viii. 7) gives, as especial ordinances of Moses the lawgiver, the Buzygian laws; that is, the old Athenian laws of humanity (see Bernays, "Gesammelte Schriften," i. 278 *et seq.*): "not to refuse fire to any one asking for it, nor to cut off a stream of water; to offer food to beggars and cripples, and to give decent burial to the unclaimed dead; not to add additional suffering to one who is in trouble, nor to treat animals with cruelty." Josephus ("Contra Ap." ii. 29) also gives as ordinances of Moses regarding all men: "to afford fire, water, and food to such as need them, to show them the road [see Bernays, *l.c.* p. 78], and not to let any one lie unburied."

With unmistakable reference to a similar rabbinical tradition are the words spoken by Jethro, the God-fearing Gentile, to Moses (Ex. xviii. 20): "Thou shalt teach them ordinances and laws and shalt show them the way which they should walk therein and the work that they should do," as interpreted by Eleazar of Modin in Mek., Yitro (compare B. Ḳ. 99b; B. M. 30b; and Targ. Yer. Ex. xviii. 20), to mean: "Show them the house of life," *i.e.*, the synagogue where the poor are to be sheltered; "the way," that is, to visit the sick; "where they should walk," that is, to bury the dead; "therein," that is, "to bestow kindness" to other persons in need; and "the work they should do," that is, to do "more than is strictly required." "To him who shows mercy to all his fellow-creatures, Heaven will also show mercy; to him who fails to show mercy to his fellow-creatures, Heaven will not show mercy" (Shab. 151b, based upon Deut. xiii. 18 [A. V. 17]). The Israelites are distinguished for charity, modesty, and benevolence (Yeb. 79a). When Moses asked the Lord to show him "His way," He showed him the treasures of heaven in store for those who do works of charity, especially for those who rear orphan children (Tanh. to Ex. xxxiii. 13).

Principles of Charity.

Charity, however, should not be so altruistic as to overlook one's duties toward self and those nearer home. "He commits a crime who imperils his life by refusing to take charity when he is in dire need" (Yer. Peah viii. 21b). Against the tendency prevailing in Essene and Christian circles to sell all one had and "give to the poor" in order to have "treasure in heaven" (Matt. xix. 21), the rabbis at the synod in Usha ordained that "no one should give away more than the fifth of his fortune lest from independence he may lapse into a state of dependence" (Ket. 50a). "He that doeth righteousness at all times" (Ps. cvi. 3) is he who supports his wife and small children (Ket. *l.c.*). The poor among one's own relatives, and then those in the same town, have the leading claims upon charity (B. M. 71a).

On the other hand, charity is to provide each poor person with "what is sufficient for his need in accordance with what he lacks"; that is to say, his personal claims and wants with a view to his former social position should be considered; "and if he needs a horse to ride on, it should not be withheld from him now that he is in reduced circumstances" (Sifre to Deut. xv. 8; Ket. 67b; Yer. Peah viii. 21b); the fundamental principle being expressed in Ps. xli. 1; see Midr. Teh. to the passage: "Blessed is he that considereth the poor." Furthermore, all possible secrecy should be maintained in order not to offend the recipient of charity (Ket. *l.c.*; B. B. 9b; see Alms). Of greater merit, therefore, than giving is the helping of the poor by lending him money, or in some other way facilitating his mode of living (Shab. 63a). But greater than all charity is that bestowing of personal kindness ("gemilut ḥasadim") which is enjoined by the words, "to love mercy" (Micah vi. 8). In fact, all charity is valued only by the element of personal kindness it contains (according to Hosea x. 12). "Charity is offered with one's money; kindness, with both one's person and one's money. Charity is bestowed upon the poor; kindness, upon both poor and rich. Charity is offered to the living; kindness, to both the living and the dead" (Suk. 49b). "The bestowal of kindness is one of the three things on which the world is stayed," teaches Simon the Just in the third pre-Christian century (Ab. i. 2). That is to say, the recognition of the needs of suffering humanity calls into existence a body of men who take charge of the various charitable works required for the maintenance of society. Such a body of elders of each city is held responsible for every case of neglect of human life which may lead to disastrous consequences; for why should the elders of that city "next unto the slain man" whose body has been found, "put away the guilt of innocent blood" from among them (Deut. xxi. 1-9), unless they have failed to provide properly for either the victim or the desperate murderer (Sifre, Deut. 210; Soṭah ix. 6).

Charity a Matter of Public Administration.

Here the principle is laid down for all times and places that charity, in its manifold ramifications, is a matter of public safety and public administration; and it is more than probable that the "Anshe Keneseth ha-Gedolah," of whom Simon the Just is said to have been one of the last remnants (Ab. i. 2), were also the organizers of the system of charity. It is one of the radical errors of Uhlhorn ("Die Christliche Liebesthätigkeit," 1882, p. 55) and all Christian writers to ascribe to the Cristian Church the merit of having originated systematic charitable work based on Matt. xxv. 35-39; the burying of the dead, as Uhlhorn says, having been added later to the six branches of charity mentioned there. The fact is that the whole description of the Messianic judgment in Matthew, *l.c.*, rests on the Midrashic interpretation of Ps. cxviii. 19 *et seq.* (see Midr. Teh. to the passage, where the deeds of charity are enumerated in words almost identical with those of Matthew). Indeed, these familiar Ḥasidic works of charity were regarded as having been practised from the beginning of the world, the Lord Himself having taught them to the Patriarchs (Soṭah 14a). Daniel, Job, and Abraham practised them (Ab. R. N. iv., vii.; ed. Schechter, pp. 21, 33), Abraham having learned them from Melchizedek (Midr. Teh. Ps. xxxvii.); and there are many indications that the ancient Ḥasidim divided themselves into groups attending to these (seven?) different branches of charitable work (see M. Ḳ. 27b; Sem. xii.; Ab. R. N. viii. 36 *et seq.*; Geiger, "Jüd. Zeit." vi. 279, ix. 7-9; Brüll, "Jahrb." i. 25; and art. Essenes). These seven branches, mutatis mutandis, mentioned in rabbinical literature, are: (1) feeding the hungry and giving the thirsty to drink; (2) clothing the naked; (3) visiting the sick; (4) burying the dead and comforting the mourners; (5) redeeming the captive; (6) educating the fatherless and sheltering the homeless; (7) providing poor maidens with dowries. The "Apostolic Constitutions" (iv. 2) enumerates ten branches.

Systematic Relief.

The Mosaic law, based upon the simple agricultural life of the Hebrews, offered provisions for widows, orphans, and strangers who had entered into a state of dependence; while the shiftless and otherwise unfortunate often sold themselves as slaves with the view of recovering their freedom in the seventh year and their patrimony in the jubilee year. In times of famine, emigration was resorted to (I Kings xvii. 9; Ruth i. 1). It is interesting to notice the changed conditions in Palestine during the first century, when Queen Helena of Adiabene during a great famine bought shiploads of wheat and figs to aid the starving, and her son Izates sent great sums of money "to the foremost men of Jerusalem for distribution among the people" (Josephus, "Ant." xx. 2, § 5). Here is the first historical evidence of the existence of a body of men at the head of the community having relief work in charge. And that the foremost men were selected for the office of charity collectors or overseers ("gabba'e ẓedaḳah"), may be learned from the ancient Mishnah (Ḳid. vi. 5): "He whose fathers belonged to the gabba'e ẓedaḳah is qualified to marry into priestly families without inquiry as to his pure descent." It is also known that at the beginning of the second century R. Akiba held the office of charity overseer (Ḳid. 28a).

The following system of relief was established in Mishnaic times. Every community had a charity-box, called "ḳuppah," or Korban (see Alms), or "arca" (Tertullian, "Apologia," xxxix.), containing the funds for the support of the indigent townsmen, who received every Friday money for the fourteen meals of the whole week, and for clothing, as well as the charity for the transient poor, who received only as much as was needed for the day, and on Sabbath eve for three meals; also a charity-bowl ("tamḥoi") for the keeping of victuals needed for immediate relief. The charity-box was given in charge of three trustees, who formed a regular bet din to decide on the worthiness and claims of the applicants before giving money; personal merit as well as parentage and former social station being considered. Beggars who went from door to door received nothing, or at best a pittance. For the collection of the money two men of the utmost respectability and trustworthiness were sent, endowed with full power to tax the people and to seize property until the sum required was given them. In order to avoid all suspicion, these collectors were not allowed to separate while collecting or holding the money (see Apostle). The victuals for the tamḥuy were both collected and distributed for immediate use by three officers. The collections for the ḳuppah were made weekly. A residence in the city for thirty days obliged persons to contribute to the ḳuppah, one of three months to the tamḥuy, one of six months to the clothing, and one of nine months to the burial fund (B. B. 8–9; Tosef. Peah iv. 8–15; Mishnah Peah viii. 7; Yer. Peah 21a, b). The task of the charity administrators—also called "parnasim" (פרנסים), from *πρόνοος* = "provider"; compare "Apostolic Constitutions," iii. 3, *προνοίαν ποιούμενος* (Tosef., Meg. iii. 4; Yer. Peah. viii. 21a, b; Sheḳ. v. 4, 48a)—was regarded as extremely delicate, and often entailed great sacrifice; while the reputation of the officers was so high that they were never called to account for their administration (Shab. 118b; B. B. 9a–11a; 'Ab. Zarah 17b).

Modes of Alms-giving.

The leading maxim was that the poor should never be put to shame by receiving charity (Ḥag. 5a). Maimonides ("Yad," Mattenot 'Aniyyim, x. 7–13) enumerates eight different ranks of givers of charity: (1) he who aids the poor in supporting himself by advancing money or by helping him to some lucrative occupation; (2) he who gives charity without knowing who is the recipient and without having the recipient know who is the giver, *i.e.* in the manner charity was practised in the chamber of the Ḥasshhaim (Essenes) in the Temple at Jerusalem (Sheḳ. v. 7); (3) he who gives in secret, casting the money into the houses of the poor, who remain ignorant as to the name of their benefactor: this was done by great masters in Israel (Ket. 67b), and should be done whenever the public charity is not administered in a proper way; (4) he who gives without knowing the recipient, by casting it among the poor, while the recipient knows who is the giver (Ket. *l.c.*); (5) he who gives before he is asked; (6) he who gives after he is asked; (7) he who gives inadequately, but with a good grace; (8) he who gives with a bad grace.

Impostors who pretended to have bodily defects, whereby to appeal to the sympathy of the charity officers, are mentioned (Peah viii. 9; Tosef. Peah iv. 14; Ket. 68a). Non-Jewish poor were also supported from the charity fund (Giṭ. 61a), but such Jews as wilfully transgressed the Law had no claim to support as "brothers" (Shulḥan 'Aruk, Yoreh De'ah, 251). A woman's claim had precedence of a man's; a student of the Law, over an ignorant man, even though of the highest rank (Hor. iii. 7–8; Ket. 6, 7a; Maimonides, *l.c.* viii. 15; Shulḥan 'Aruk, *l.c.*).

Charity was also regarded as a form of sacrifice offered to God on behalf of the poor (see ALTAR), and was invested with the sacred character of vows and free-will offerings (Deut. xxiii. 24; R. H. 6a). Hence it came that, while only worthy persons should receive charity (B. B. 9b; Ecclus. [Sirach] xii. 1–6 Didache, i. 5–6; "Apost. Const." iv. 3), it was also of great importance that the givers should be of unblemished character (Tosef., B. Ḳ. xi. 9 *et seq.*; "Apost. Const." iv. 6–10—a very important Jewish chapter on charity, stating that charity has the character of a sacrifice, for which nothing that is abominable to God [Deut. xxiii. 19] may be used, and to which none who is an abomination [Deut. xviii. 10 *et seq.*] may be a contributor; see DIDASCALIA). Especially idolaters, unless in cases of royal donors, were excluded from contributing to the charity fund (Sanh. 26b; B. B. 10b; Maimonides, *l.c.* viii. 9). A frequent form of charity practised in the pre-Christian and early Christian centuries was the hospice or public inn ("pandok," *πανδοκεῖον*), built on the high road to offer shelter and food to the poor traveler and the homeless. Ascribed alike to Abraham and to Job (Ab. R. N. vii., ed. Schechter, p. 34; Soṭah 10a; Gen. R. xlix., liv.; Test. Job iii.; see Kohler, in Kohut Memorial Volume, pp. 270, 318; compare Targ. Yer. to Deut. xxiii. 17); this practise was known in Philo's time (Philo, "De Caritate," § 12, and elsewhere), and later on in Babylonia, where Ḥana bar Ḥanilai kept an inn which had its four doors open on four sides, exactly like those of Job and Abraham, to all passers-by; sixty bakers being kept busy baking bread in the daytime, and sixty at night for the bashful poor who would not be seen asking bread by day (Ber. 58b; compare Test. Job iii. 11).

Public Inn for Travelers.

This *πανδοχεῖον* of the Essenes appears as a Christian institution in the fourth century under the name of "xenodochium" (inn for strangers), and connected with, or serving as, a "ptocheum" or "ptochotropheum" (sick-house) and was, as Hieronymus expressly states, transplanted from the East to the West "as a twig from Abraham's terebinth," a direct allusion to the rabbinical identification of Gen. xxi. 33 with such a hospice (see Uhlhorn, *l.c.* pp. 319–321, where Hieronymus' words are quoted, but seemingly without a comprehension of their significance). As a matter of fact, the emperor Julian, in instituting inns for strangers in every city, refers to both Jews and Christians, "the enemies of the gods," as models of philanthropy, inasmuch as with the former no beggar was to be found, and the latter also supported the heathen poor as well as their own (Julianus, "Epist." xxx. 49; Sozomen, "Hist. of the Church," v. 16). Abrahams (in his "Jewish Life in the Middle Ages," p. 314, note) is therefore not far from the truth when he suggests a possible connection of the ancient "pandok" with the communal inn of the Middle Ages for the lodging and feeding of poor or sick travelers, which became a special necessity after the Crusades. The halakic rule, fixed for all time, was that no city is worth living in for a devotee of the Law ("Talmid ḥakam") which has not a charity-box, "ḳuppah shel ẓedaḳah"; that is, a systematic relief of the poor (Sanh. 17b). Also the name "heḳdesh" for the Jewish hospital, found as early as the eleventh century in Cologne (see Brisch, "Gesch. der Juden in Coeln," 1879, p. 19; Berliner, "Aus dem Innern Leben der Deutschen Juden im Mittelalter," p. 120), and in the casuistic literature as "bet-heḳdesh [le 'aniyyim]" ("the house of the things consecrated [to the poor]," see Lampronti, *s.v.* הקדש), points to a long-established custom of the pious to consecrate property to God for the benefit of the poor (see Ta'an. 24a; B. B. 133b). This heḳdesh served all through the Middle Ages, like the ancient Christian xenodochium (Haeser, "Gesch. der Christl. Krankenpflege," 1857, 13), both as a poorhouse and as a hospital for the sick and the aged as well as for the stranger.

As has been shown by Abrahams (*l.c.* pp. 311–312), the tamḥoi or food distribution of old was gradually superseded either by private hospitality or by communal hostelries and by the benevolent activity of charitable societies formed for this purpose; while the institution of regular relief through the charity fund (ḳuppah) became universal (see Maimonides, *l.c.* ix. 3). Charity being the universal duty, all were forced to contribute (Ket. 49b), even women and children, and, as far as they could afford it, the poor themselves (B. Ḳ. 119a; Giṭ. 7b). In the synagogue the charity fund was remembered by vows made publicly (Tosef., Ter. i. 10; Tosef., Shab. xvii. 22), especially on occasions of joy or in commemoration of the dead ("Or Zarua‘," i. 26; Roḳeaḥ, § 217); and occasionally collections were made at festal banquets (Abrahams, *l.c.* pp. 31 *et seq.*). The average Jew was always expected to give one-tenth of his income to charity (Ket. 50a; Yer. Peah i. 15b; Maimonides, *l.c.* vii. 5); and the rabbis of the Middle Ages endeavored to make this a legal tax rather than a mere voluntary contribution (Abrahams, *l.c.* pp. 319 *et seq.*) See also Judah Hadassi, in "Eshkol ha-Kofer."

Charitable Societies.

In the thirteenth century (Abrahams, *l.c.* pp. 324 *et seq.*; Güdemann, "Gesch. des Erziehungswesens und der Cultur der Juden in Deutschland," i. 50, note; Berliner, "Gesch. der Juden in Rom," ii. 56; Vogelstein and Rieger, "Gesch. der Juden in Rom," ii. 315; "Ben Chananjah," 1861, p. 23) charitable societies were organized all over Europe for supporting and clothing the poor, for the education of the children of the poor, for endowing poor maidens, for nursing and educating orphans, for visiting the sick, for aid to sick and lying-in women among the poor, for sheltering the aged, for free burials, and for the ransom of prisoners, which, of all charitable objects, is declared in the Talmud to be the highest of merit (B. B. 8b; Maimonides, *l.c.* viii. 9–15; see Captives). The activity displayed by these societies in Rome in the seventeenth century is typical of all; though, according to Berliner (*l.c.* ii. 183), the Spanish and Italian Jews displayed a special talent for organization. There existed, and still exist, four central organizations in Rome: one by the name of "‘Ozer Dallim" for the help of the poor; a second by the name of "Gemilut Ḥasadim" for the benefit of the dead; a third by the name of "Moshab Zekenim," a home for the aged; and a fourth by the name of "Shomer Emunim" for the maintenance of the faith and worship. These comprise wellnigh thirty different societies, seven of which provide for the needs of the poor, children, widows, and prisoners; two for visiting the sick and for offering aid in cases of sudden death; two for dowries for poor brides; and one for the ransoming of captives. The nursing of sick women as well as the award of dowries to brides was in charge of a woman appointed as directress by the Jewish community. Non-Jewish poor were also supported by these Jewish societies, whose officers brought the required aid to the houses of the more respected poor. The women had their own society (see Berliner, *l.c.*; Vogelstein and Rieger, *l.c.*).

In a remarkable document by Samuel Portaleone ("Jew. Quart. Rev." v. 505–515) seven charity-boxes are mentioned as existing in Mantua or San Martino in 1630: a box for the land of Israel; another for Talmud-Torah; a third for burying the dead ("ḳuppat gemilut ḥasadim"); a fourth for charity ("ḳuppat raḥamim," the sick and aged); a fifth for maidens' dowries; a sixth for the relief of the poor; and a seventh for the redemption of captives. (For Amsterdam compare Zedner, "Cat. Hebr. Books Brit. Mus." p. 49.) The records of every Jewish community, ancient and modern, evidence the fact beautifully expressed in Cant. R. iv. 1, v. 2: "'Behold thou art fair, my love'—in all works of charity; 'I sleep, but my heart waketh'—'I sleep' in regard to all other commandments, but 'my heart waketh' whenever works of charity are to be performed." See Alms and Philanthropy.

——**Modern Times:** In more recent times the charities of some of the chief cities, as London, Paris, and New York, were organized and modeled on modern lines.

Early Organized Charity.

In London a number of charitable institutions connected with the Spanish and Portuguese synagogue had existed since the middle of the eighteenth century. Food charities were founded at the beginning of the nineteenth century, and the Jews' Hospital in 1808. In 1876 this was amalgamated with the Jews' Orphan Asylum, founded 1831. Many minor Jewish charities had their rise between 1840 and 1860; the Spanish and Portuguese Board of Guardians was founded in 1837 (reconstituted in 1878), and the German Board of Guardians in 1859. The earliest Portuguese charity arose in 1703, and the earliest German in 1745. Then, too, a certain part of the synagogue funds was used in relieving the poor. Almhouses had been erected, early in the century, by the Portuguese synagogue from the bequest of Joseph Barrows. In 1823 Sir Moses Montefiore supplied money for the same purpose. The Ashkenazim established some benevolent societies between 1815 and 1835. In 1862 the Solomons and Moses almshouses were opened; in 1865 the Jews' Deaf and Dumb Home. Since that time, some new shelters, soup-kitchens, and wards in general hospitals have been established.

In 1829 Jacob S. Solis of New York planned a Jewish orphan asylum, but not until 1859 was the first German Hebrew Benevolent Society established in New York: its asylum was opened in 1860. The Mount Sinai Hospital was established in 1852, and the Montefiore Home for Chronic Invalids in the early eighties. The Hebrew Sheltering Guardian Society was founded in 1879 by Philip J. Joachimsen of New York, and the Independent Order of B'nai B'rith Home for the Aged and Infirm in 1848. In 1855 the New Orleans Jewish Orphans' Home was founded, and the Philadelphia Hebrew Education Society in 1849. A number of hospitals, orphan asylums, and homes were founded by the Independent Order of B'nai B'rith throughout the United States, as at Cleveland in 1863 and at San Francisco in 1871.

Paris.

In Paris, the several societies were amalgamated as the Comité de Bienfaisance de la Ville de Paris on May 12, 1809. The heads of the Parisian charities were the commissioners who had charge of all matters affecting relief. Several times the Comité was reorganized both in the number of commissioners and in the relief afforded. April 15, 1839, new regulations went into effect, and 15 commissioners were appointed. The number finally reached 36 in 1877. Subcommittees have charge of the receipts and expenditures, of poor-relief, coal supplies, soup-kitchens, etc.

In 1843 a lottery for the benefit of the charities of the Comité was instituted, and between 1843 and 1853 a lying-in hospital and one for consumptives were organized and assistance offered to Jewish pedlers. The Comité, moreover, endeavored to reduce the number of Jewish mendicants. In 1809, when the Comité was first organized, a complete hospital service was established. But a hospital building was not acquired until January, 1841; this contained 15 beds. It was formally opened Jan. 16, 1842, and did much to relieve the poor, besides providing medical treatment for sick Israelites. The Rothschilds endowed the institution liberally, and founded an orphanage in 1855. After the Revolution of 1848 the affairs of the Comité were entirely reorganized, and since 1849 it has had charge of all Parisian Jewish charities. Notable was the founding of the Alliance Israélite Universelle in 1863.

Effect of Russian Persecution.

In 1882 the persecution of the Jews in Russia, resulting in a sudden emigration, thrust upon the Jews of various countries the problem of finding adequate relief for thousands of homeless and starving refugees. Soon it became necessary for the societies and institutions that existed in the communities to combine their efforts and enter into cooperation. In this manner Russian emigration gave impetus to the affiliation and consolidation of charitable effort, and especially affected such movements as had been started some time before. Within the past twenty-five years these organizations, originally formed to meet an imminent need, have developed into compact, systematic bodies. In the larger communities in particular, where thousands of Jews lived, many of whom were unknown to one another, the charity given indiscriminately by the individual gradually gave way to charity given by the organization after careful investigation of the applicant's needs, with the view of preventing pauperism and its attending evils. Along with this innovation came the introduction of the paid agent instead of the volunteer, it being the business of the former to study the complex conditions that encompassed the poor and to administer relief, not only from the standpoint of the poor, but from the standpoint of their relation to the community. The modern Jewish relief institution is based on the assumption that the administration of charity is a task for the sociologist who has studied the causes subjective and objective that produce poverty, and for the trained expert who has a knowledge of the particular agency that may be required to alleviate any form of distress.

Co-operation Due to Russian Exodus.

The organizations, societies, and agencies for the giving of charity in its various phases may be grouped under the following general headings:

1. The Care of Needy Families in Their Homes: It is almost axiomatic that the care of needy Jewish families in their homes to-day is not a matter for public relief by the state, even in communities where public outdoor relief is given. Such relief as may be needed is given by Jewish organizations which, as a rule are based on the same plan and carry on similar lines of work. The Boards of Guardians in England, the Unterstützungs-Vereine in Germany, the Sociétés de Bienfaisance in France, the United Hebrew Charities and other benevolent societies in the United States give material relief to the deserving poor in the shape of money, clothing, coal, medicine, food, etc., and practically combine under one administration the duties of smaller individual charities which they have replaced. Many of these larger societies conduct employment bureaus, loan bureaus, workrooms for unskilled women, day nurseries, and dispensaries as adjuncts to their regular work. An important feature is the granting of transportation to other communities where the applicant may be better able to prosecute his particular vocation.

Principles of Relief.

The larger societies have a registration bureau, in which the record of the applicant is carefully preserved, and which is intended for the use of the contributors and the public. The purpose of such a bureau is to overcome the possibility of overlapping and duplication in the giving of relief, and to weed out the beggar and the vagrant. The fundamental principle of these societies is that relief shall be given in cases of emergency and only after a thorough investigation of the applicant's condition; that the relief which is given shall come from one source; that it shall be adequate for the applicant's needs, and shall consider his future welfare as well as his present distress. To carry out the last idea, many organizations have instituted cooperating societies known as sisterhoods of personal service, whose duty it is to enter the homes of the poor and to supplement the material relief of the society with the helping hand and kind word of the individual. Such personal service is a phase of the old Jewish idea of "gemilut ḥesed," and the modern development of the thought that the best aid that can be given to the poor is to help them to help themselves. The motto of one of the charity organization societies in the United States, "Not alms, but a friend," is the fundamental motive of personal service and of the friendly visitor.

Many of these sisterhoods are adjuncts to the synagogue, and are a part of the contribution of the latter to the charitable work of the community. It is becoming more apparent daily that the friendly visitor, the man or woman who gives personal service to the poor, if intelligent and tactful, can be of inestimable benefit to the work of a relief society.

The London Board of Guardians for the relief of the Jewish poor stands as a type of the relief society that is to be found in England and its provinces. Its expenditures in 1899 were nearly £58,000 ($290,000). It represents practically the entire Jewish community of London, although there are a number of independent small societies which give similar relief. Its work is conducted by thirteen committees, who grant loans, conduct workrooms, assist emigrants, apprentice boys, supply tools, conduct almshouses, and give every form of material relief. Similar organizations are found in most of the cities and towns in the provinces and colonies and throughout the British possessions.

Local Centralized Institutions.

In Paris the Comité de Bienfaisance Israélite, assisted by the commissioners of charity, grants necessary assistance to worthy poor families, gives them tools and machines or the means to purchase the same, also grants money to purchase goods, makes loans, and provides medical relief. The Comité conducts an employment bureau and maintains two large Jewish soup-kitchens where, for ten and fifteen centimes, portions of soup, meat, and vegetables are given to all presenting orders from the Comité. Outside of Paris there exist in France but few important institutions as there are but comparatively few Jewish poor.

In the United States the United Hebrew Charities of New York is the largest organization of its kind, disbursing annually upward of $130,000, and is representative of similar institutions throughout the country. It endeavors to give every form of material relief that may be required by its beneficiaries, and to supplement this relief by educational and preventive agencies so that the grinding poverty common to congested communities, which rapidly tends to degeneracy, may not only be palliated, but suppressed. Not only in the larger cities of the United States, but in the smallest community where there is a Jewish population, similar organizations exist. In the "American Jewish Year-Book" for 1900–01, 593 philanthropic organizations are mentioned, of which the large majority assist in the care of needy families in their homes. There are, however, numbers of small relief and benefit societies which have been organized by the Russian, Rumanian, and Galician immigrants of the past twenty-five years and their descendants, which are little known outside of their immediate environment and which are not included in this list.

In Germany the Armen-Commission der Jüdischen Gemeinde in Berlin is typical of the general societies which look after the needy poor. This organization is composed of a committee from the United Congregations, in whose charge the philanthropic work of the community is placed. In this respect Germany differs from the other countries mentioned above, where the large communal organizations are as a rule separate from congregational effort. The Armen-Commission in Berlin has several subcommittees, one of which gives monetary relief, another work and mazzot, and a third food. There are among them also a number of smaller institutions, such as a society for the support of needy travelers, a society for the granting of pensions to students, and another for giving clothing. Characteristic of Germany are organizations known as Vereine Gegen Wander- und Hausbettelei, of which there are seventy-seven in the various German cities and towns. In the smaller communities, as in the larger, the care of the needy families is a portion of the work of the Jewish congregations.

2. Destitute, Neglected, and Delinquent Children: The orphaned child has always been the particular care of the Jewish community. Furnishing marriage portions to orphans was the work of special societies. Wherever it was possible, the orphan child was taken in charge by relatives or friends, or foster-parents were found for it. When this became impossible, orphanages and asylums were organized to look after the child bereft of either or both of its parents. The object of these societies was not only to give shelter, but to educate the inmates to become good Jewish men and women. Such orphan asylums sprang into existence as early as the latter part of the eighteenth century, and to-day are the accepted method of caring for the dependent and destitute child. Societies for the boarding out of children in homes under the supervision of proper guardians are less common. Of more recent growth is the development of what is known as the placing-out system under which the child is legally adopted. This system is based on the belief that the housing of large numbers of children in institutions is detrimental to their proper development and destroys individual characteristics which would be brought out in the more natural environment of a home. Attempts that have been made in the United States to place children in homes have given but meager results.

Boarding Out.

In London there are two institutions for dependent children, the Jews' Hospital and Orphan Asylum and the Spanish and Portuguese Orphan Society, the latter for children of Sephardim only. In the provinces there are no orphan asylums, but in a number of communities there are organizations which are in the nature of aid societies to the Jews' Hospital and Orphan Asylum. In Australia there is a Jewish Orphan and Neglected Children's Aid Society in Melbourne.

In Paris the Jewish Orphan Asylum founded and maintained by the Rothschild family receives and educates about 100 children of both sexes; the Refuge de Plessis-Piquet receives abandoned boys from six to fourteen years old, gives them an elementary education, and teaches them a trade. It has accommodations for 70 pupils. The Refuge de Neuilly conducts a similar institution for girls.

In the United States there are at present 16 Jewish asylums for dependent children, situated in the cities of Atlanta, Baltimore, Boston, Brooklyn, Chicago, Cincinnati, Cleveland, Newark, N. J., New Orleans, New York, Philadelphia, Pittsburg, Rochester, and San Francisco. Of these the largest are the Hebrew Sheltering Guardian Society of New York, which at present cares for over 900 children, and the Hebrew Benevolent and Orphan Asylum Society, which has nearly that number of children in its charge. The Hebrew Sheltering Guardian Society of New York and the Hebrew Infant Asylum of the same city are distinctive in that they receive not only orphan and half-orphan children, but any child for whom there is no proper guardianship. The latter institution confines its work to children under five years of age. The asylums in Atlanta, Ga., and Cleveland, Ohio, are under the auspices of the I. O. B. B. and receive their inmates from the respective districts which they represent. The other societies are local in character, and are conducted by private agencies.

The modern tendency in the care of dependent children is, as has been stated, against the institution, and in favor of the home as the natural place for child-training. On this supposition many of the Jewish relief societies grant pensions to deserving widows to enable them to keep their families intact. The United Hebrew Charities of New York disburses over $30,000 annually to this end. In the case of full orphans and half orphans, societies like the Orphans' Guardian Society of Philadelphia and the Frank Fund of Chicago board out such children under proper guardianship in families. The Federation of Charities of Boston, in connection with the state authorities, has succeeded in boarding out some of its dependent children in Massachusetts homes.

European Institutions.

In Germany, the institutional care of dependent children has developed further than in any other country, there being no less than 41 asylums of various kinds that look after the interests of children. Most of these institutions are local in character and have but few inmates; others, like the one founded by Baruch Auerbach in Berlin in 1833, are organizations of considerable importance. Besides this institution there are ten others in Berlin; in Frankfort there are three; in Hamburg, two; in Hanover, two; and the others are scattered throughout the smaller towns and cities.

There are no special institutions for delinquent Jewish children. In Paris such children are sent to the Refuge de Plessis-Piquet; in Frankfort there is a society known as the Stift für Gebrechliche oder Verwahrloste Israelitische Kinder. In neither of these institutions is there any attempt at classification. Whenever delinquent children have been found, they have been turned over to public officials and placed in state or private agencies, not Jewish, of a correctional or reformatory character. In large cities, such as New York, the growth in the number of juvenile Jewish delinquents will in all likelihood necessitate the introduction of Jewish reformatories in the future. In Chicago, the Ninth Ward Bureau of Charities, which is affiliated with the Federation of Jewish Charities, has cooperated with the secular authorities toward the establishment of a juvenile court and the paroling of delinquent Jewish children to probationary officers, in whose charge these children are placed and who are responsible to the court. In this manner many children who formerly were committed to correctional institutions for petty offenses are returned to their families under the supervision of the probation officer. The result has been salutary to a large degree.

3. Hospitals, Dispensaries, Nursing: The inns of the Middle Ages, for the accommodation of travelers and which also served as infirmaries, have given place to-day to magnificently equipped hospitals in all parts of the world, many of which differ radically from their originals, as they are founded on the highest principles of non-sectarian charity. Many of the institutions known as Jewish hospitals, while founded and endowed exclusively by Jews, are intended for the treatment of all, irrespective of creed, color, or race. The majority of these hospitals have a dispensary service attached to them, where outdoor medical relief is given. A number have district service, sending their physicians to the homes of the poor who are bedridden. Similar work is done by the relief-giving societies, the one in Chicago, for example, having its own dispensary. In connection with their other work, the hospitals frequently have training-schools for nurses, and of more recent growth are organizations similar to the nurses' settlement in New York, which combine training with district and neighborhood work. Institutions for the treatment of special diseases and for special classes of diseases are becoming more common, in line with the differentiation in charitable work.

In London, the Board of Guardians conducts a nursing-home and sends nurses to invalid children. Another organization, known as the Sick-Room Helps Association, provides attendants for the homes of the poor during illness and confinement. Convalescents are cared for by the Baroness de Hirsch Convalescent Home and the Jewish Convalescent Home. There are also a home and a hospital for Jewish incurables, and the Bet Holim Hospital for the aged.

The hospital founded by the Rothschild family in Paris is the only Jewish hospital in France. This is insufficient for the Jewish population, but the Jews do not hesitate to go to the general hospitals, where they obtain admission without difficulty. Connected with the Rothschild institution is a home for incurables, which accepts, besides those incurably ill, idiots and paralytics. At Berck-sur-Mer one member of the Rothschild family founded an institution for the special purpose of receiving and curing children up to fifteen years of age, who are of feeble constitution or scrofulous. Jewish hospitals are also to be found in Tunis, Smyrna, Constantinople, Salonica, Jaffa, and Jerusalem.

In the United States, medical relief is given by a large number of relief societies. There is a Jewish hospital in each of the following cities: Baltimore, Chicago, Cincinnati, Denver, New Orleans, and San Francisco. In New York there are four, in Philadelphia two. The hospital in Denver is a national Jewish institution for consumptives. A similar institution, local in character, is the Bedford Sanitarium of the Montefiore Home, recently established at Bedford Station, N. Y. In St. Louis and Omaha, hospital societies have recently been organized. In New York the sanitarium for Hebrew children gives medical relief and a summer's outing to Jewish children and to their mothers under certain restrictions. In Germany, there are over 30 hospitals, three being in Berlin and three in Frankfort. There is one in Nauheim, but it is for the treatment of children exclusively. Many of these, like the relief bureaus, are conducted under the auspices of the local congregations, and are partly supported by contributions from the latter.

Medical Relief Societies.

4. The Treatment of Criminals: Until recently there was no special institution in any part of the world for the treatment of Jewish criminals. In London a special reformatory has been established, and a visitation committee of the United Synagogues visits the prisons. The percentage of Jewish criminals in state institutions has always been a very small one. Imprisonment for major crimes has until recently been very rare. Petty offenses, such as larceny, are the most common. In large cities, such as New York, Jewish criminality is steadily on the increase, and is no longer confined to the minor crimes. In the year 1900, 433 Jewish men and women were sent to the various prisons, jails, and reformatories throughout the state of New York, 419 Jews were sent to the New York city workhouse, and 383 Jewish boys and girls were sent to correctional institutions. While the proportion is below that existing among Catholics and Protestants in the same community, it is higher than the figures of a few years ago. The Society for the Aid of Jewish Prisoners of New York has been organized to look after the condition of affairs and to ameliorate it if possible. It cares for the families of prisoners, and gives the prisoners a helping hand after being discharged.

5. Defectives: Special Jewish institutions for the care of this class of dependents are exceedingly uncommon, and separate Jewish institutions for the care of the insane are unknown. The same is true of institutions for the care of the epileptic and the feeble-minded. In London there are a Jews' Deaf and Dumb Home (1863) and an institution for the indigent blind founded as early as 1819 under Jewish auspices. In Berlin, in Tauberbischofsheim (Germany), and in Budapest, there are Jewish institutions for the deaf and dumb, and there is a Jewish Blind Institute in Vienna. In Berlin there is also a society known as the Verein zur Förderung der Interessen der Israelitischen Taubstummen in Deutschland. There are no corresponding institutions or societies either in France or the United States.

6. Care of Destitute Adults: Consistent with the general policy of Jewish charity, it has never been customary to allow the destitute adult to become a charge upon the state or to be supported by public funds. In the almshouses of America or the poorhouses of England or in the public institutions of other countries for the care of indigent adults a Jew is seldom found. Private benevolence has constructed homes for the aged in which the dietary laws are observed, or has arranged a system of life-pensions which permits those who have become incapacitated, through age or illness, to spend the remainder of their lives removed from the fear of becoming public charges.

In England there are but seven homes for the aged, of which six are in London and one in Manchester. One of these is under the auspices of the Jewish Board of Guardians; one conducted in connection with the United Synagogue, and one in connection with the Spanish and Portuguese Congregation. The others are conducted by private agencies. Most of these institutions are known as almshouses. In Birmingham the Hebrew Philanthropic Society grants pensions to aged persons. In Liverpool the Hebrew Provident Society provides old people with a weekly pension; a similar organization exists in Manchester. In the other cities throughout England the care of the aged poor is left to the various Boards of Guardians and relief societies. In the British colonies there are homes for aged men and women in Gibraltar and in Sydney, Australia. In France a home for the aged is connected with the Jewish Hospital in Paris. Similar institutions are to be found at Nancy, Bordeaux, and Luneville, maintained by the local Jewish charities. In the United States, homes for the aged are located in Baltimore, Boston, Chicago, Cincinnati, Cleveland, New Orleans, New York, Philadelphia, Richmond, St. Louis, San Francisco, and Yonkers, N. Y., the last-mentioned being conducted under the auspices of the I. O. B. B. The home at Cleveland is supported by the order Ḳesher Shel Barzel, the other institutions by private effort in the various communities. As with orphan asylums and hospitals, Germany has a larger number of institutions for the aged than any other country. There are at present 23 "Pfründnerhäuser" or homes for the aged, Breslau having three, Berlin two.

Alms-houses.

7. Preventive Work: The chief tendency of modern charity being in the direction of the prevention of poverty and pauperism rather than their palliation, it has been found necessary to create many new agencies that tend to this underlying idea. In the belief that the prosperity of the people is in direct proportion to their health, free baths have been established to inculcate cleanliness and order. Of such a kind are the free baths connected with the Hebrew Education Societies in Philadelphia, Cleveland, and San Francisco. To insure proper nourishment for children, the Milk and Ice Society of Philadelphia and Baltimore and the Nathan Straus milk depots in New York furnish sterilized milk at a nominal cost.

In London the soup-kitchen provides soup and bread for the Jewish poor during the winter months. Similar kitchens are conducted by the Société de Bienfaisance in Paris, where soup, meat, and vegetables are sold at a nominal price, and in Budapest. In Germany, people's kitchens exist in Berlin and Breslau. Special societies likewise look after the proper housing of the Jewish poor with the hope of either removing them from the congested centers in which they live in the large cities, or of providing them

Soup Kitchens.

with homes built according to the best principles of light, ventilation, and sanitation, which can be rented at a nominal price.

In London, The Four Per Cent Industrial Dwellings Company, Limited (1885), is conducted under Jewish auspices with the intention of furnishing healthy dwellings at a rental sufficient to yield a dividend of 4 per cent per annum on the investment. The City and Suburban Homes Company of New York, while non-sectarian in character, has a number of Jewish incorporators, and has a similar object to that of the London society. In the hope of bringing the worker into closer contact with the poorer classes, neighborhood houses and settlements have been organized in a number of communities. Of such a kind is the Maxwell Street Settlement in Chicago, Ill., and the Neighborhood House in St. Paul, Minn. In the latter there is a resident worker. Similar Jewish settlements are to be found in Cincinnati, Milwaukee, and Cleveland. Of a special nature is the Nurses' Settlement in New York. In all of these settlements the purpose is to raise the intellectual and moral level of the immediate neighborhood in which the settlement exists, by the organization of classes, by giving instruction to both the younger and the older element, and by developing the social characteristics of the vicinity along educational lines. Societies like the Educational Alliance in New York make this their aim. They give instruction in various trades, conduct boys' and girls' clubs, and by carefully arranged entertainments develop the social side of the neighborhood. Similar in character to the latter are the Hebrew Educational Society in Brooklyn and the Hebrew Education Society of Philadelphia. In London the Brady Street Club for working boys, the East London Jewish Communal League, the Jewish Lads' Brigade, Jewish Working Men's Club, and the Lads' Institute accomplish similar results. In France the Union Scolaire in Paris corresponds to the societies mentioned above. This organization is a club where young men meet for conferences, readings, etc. It assists young Jews to find employment, and grants loans to workmen and small tradespeople. In Germany there are societies, clubs, etc., in fifty cities for the cultivation of trades and handicrafts among Jews. Somewhat more technical in the instruction which they give are the Jewish Training School of Chicago, the Hebrew Free and Industrial School Society of St. Louis, the Hebrew Industrial School of Boston, the Clara de Hirsch Home for Working Girls, the Hebrew Technical Schools for Girls, the Hebrew Technical Institute, and the Baron de Hirsch Trade School of New York. In connection with their relief-work, the sisterhoods mentioned above conduct religious schools, industrial schools, day-nurseries, employment bureaus, cooking-classes, sewing-circles, classes for women, home circles, kindergartens, boys' and girls' clubs, mothers' meetings, and workrooms for unskilled women. Similar organizations are conducted by individual societies in most of the large cities.

Educational Settlements.

8. Supervisory and Educational Movements: Among the most marked features of the development of charitable work within the past twenty-five years is the tendency of various institutions to effect an organization that will add to their value, and that will give the members of any one society the opportunity of coming in contact with the workings of similar societies in other communities. In England, while there is no special supervisory or educational movement appertaining directly to charitable work among the Jews, organizations like the Anglo-Jewish Association and the Committee of Deputies of the British Jews interest themselves in all communal work, and indirectly in the charitable work of the various communities. These two societies have affiliated organizations throughout the cities and towns of England, as well as the provinces. In France there is likewise no special organization which devotes itself purely to federation of the philanthropic organizations. In Germany the Deutsche Israelitische Gemeindebund has been in existence for thirty years, and is practically the source and inspiration of the charitable work carried on there. This organization publishes every two weeks statistics of its work, and from time to time special communications to its members. Up to the present time fifty-five reports have been issued. They are mainly educational in character and, in connection with the statistics which are published, give a useful résumé of the philanthropic work that is carried on by the Jews in the German empire. In this Gemeindebund practically every town, and even the smallest village, in Germany is represented, so that there are complete federation and community of interest.

Combined Activity in Germany.

In the United States an attempt to bring the several relief societies into a union was attempted as early as 1885, when a conference was held in the city of St. Louis, but came to naught. In 1899 a similar movement was organized, and the first conference of this society, known as the National Conference of Jewish Charities, was held in Chicago in June, 1900. It now comprises all the important relief societies in the United States. It issues a volume of proceedings and rules for the guidance of its members on questions of transportation, desertion, etc. International organizations which interest themselves in philanthropic work and which can only be mentioned here incidentally, are the Jewish Colonization Society, the Alliance Israélite Universelle, and the numerous foundations and trusts that were established by the Baron de Hirsch.

9. Immigration: In connection with the work of relief societies in the United States, the United Hebrew Charities of New York has a special representative at the immigration bureau, who looks after the welfare of Jewish immigrants. In Philadelphia the Jewish Immigrant Aid Association supports a similar office. In England the London Board of Guardians has a special committee to which is entrusted the entire question of immigration and emigration. In Germany, and in France, the immigration question is almost altogether in the hands of the Jewish Colonization Association or the Alliance Israélite Universelle, which has agencies at various points.

CHARKOW, RUSSIA. See Kharkov.

CHARLEMAGNE: King of the Franks and emperor of the West; born April, 742; died Jan. 28, 814. His attitude toward the Jews was rather that of a clever politician than of a liberal-minded man. He realized the advantages to be derived by the country from the business abilities of the Jews, and gave them complete freedom with regard to their commercial transactions. Some Jews seem to have occupied prominent places at his court. Thus, Charlemagne had for his physician one named Ferragut. A Hebrew named Isaac was a member of an embassy sent by Charlemagne to Harun al-Rashid, probably in the capacity of dragoman. The account which connects Charlemagne with the coming of Makir to Narbonne is apocryphal.

But if the Jews were free in their commercial dealings, their political status generally remained almost the same under Charlemagne as under his predecessors. This is seen in his capitularies, some of which deal directly with the Jews. In bringing a charge against a Christian, the Jew was to have four, nine, or seven witnesses, while the Christian was held only to three. No Jew was to engage a Christian workman on a Sunday, nor was he to take in pledge, at the risk of the loss of his property and his right hand, anything that was the property of the Church. No Jew was allowed to force a Christian to go to prison as pledge for a Jew. When a Jew took an oath he was to hold a copy of the Pentateuch in his hand, and to swear: "So help me God! the same God that gave the Law on Mt. Sinai; may the leprosy of the Syrian Naaman not come upon me, as it did on him, nor the earth swallow me up as it did Dathan and Abiram; in this matter I have done thee nothing that is evil." Some of the capitularies were dictated by a spirit of proselytism. In regulating the laws of marriage, Charlemagne forbade the Jews to marry relatives within the seventh degree of consanguinity. "We desire," says he in this capitulary, "that any Christian man or woman, any Jew or Jewess, who would contract a marriage, should not be permitted to do so until after having provided a dowry and obtained in the Church of God the benediction of a priest." But the genuineness of some of the capitularies is not beyond doubt.

CHARLEMONT, ELIZABETH JANE CAULFIELD, Countess of: Convert to Judaism; born June 21, 1834; died at Roxborough Castle, Moy, County Tyrone, Ireland, May 31, 1882. She was the only daughter of William Meredyth, first Lord Athlumney, and married Dec., 1856, James Molyneux, third earl of Charlemont. Although a Christian by training, she became a regular attendant at synagogue worship, often seeking advice in spiritual matters from Jewish rabbis. Lady Charlemont resided in the country near Belfast, the synagogue of which town she frequently attended; while in London she worshiped at the services of the Bayswater and Central synagogues. She was a woman of varied accomplishments, an excellent linguist, and a good musician; and possessed a remarkable gift for recitation, which she utilized on behalf of charitable institutions.

CHARLESTON, S. C.: Capital of the county of the same name, and chief city of the state of South Carolina in the United States; founded in 1670. The colony of South Carolina was originally governed under an elaborate charter drawn up in 1669 by the English philosopher John Locke. This charter granted liberty of conscience to all settlers, expressly mentioning "Jews, heathens, and dissenters."

The earliest record of a Jew in Charleston appears in 1695, when one is mentioned as acting as interpreter for Governor Archdale. It is likely, however, that individual Jews had settled there at an earlier date. In 1702 Jews appeared in numbers; and they seem to have influenced a general election. The Jewish community at Charleston received a substantial addition during the years 1740–41, when the illiberal policy of the trustees of Georgia induced both Jews and Christians to leave that colony and to flock to South Carolina.

First Synagogue.

The first synagogue established at Charleston was that of the congregation Beth Elohim, founded in 1750. Several of its founders had come from Georgia. Its first minister was Isaac da Costa; and among its earliest members were Joseph and Michael Tobias, Moses Cohen, Abraham da Costa, Moses Pimenta, David de Olivera, Mordecai Sheftail, Michael Lazarus, and Abraham Nuñez Cardozo. The Beth Elohim congregation is still in existence. Its first synagogue was a small building on Union street; its present edifice is situated on Hasell street. The Jews of Charleston at an early date also established a Hebrew Benevolent Society, which still survives.

While the earliest congregation was composed mainly of Portuguese Jews, the German element soon became prominent. Even before 1786 the city possessed not only a Portuguese congregation, but a distinct German-Jewish one as well. The Jewish community soon became very prosperous; and before the Revolution several Jews had acquired wealth and gained distinction. Among these may be mentioned Moses Lindo, inspector-general for South Carolina.

During the struggle for independence the Jews of Charleston distinguished themselves by their patriotism. Not a single case of Toryism was to be found among them; while many instances of devotion to the cause of independence are recorded. The majority did good service in the field, mainly as officers. The most prominent Jew at the outbreak of the war was Francis Salvador, who resided near Charleston, and whose remains are interred in the old Charleston cemetery. Salvador was a member of the Colonial Assembly as early as 1774, and of the Provincial Congress as well. He was one of the leading patriots of the South.

CHAROSETH (ḤAROSETH). See SEDER.

CHARTOGRAPHY: The art of making maps. In the development of this art, during the Middle Ages, an epoch is made by the Catalan "portulani"—seamen's charts showing the directions and distances of sailing between different ports, chiefly of the Mediterranean. These differ from the medieval *mappæ mundi* by having tolerably accurate outlines of the Mediterranean littoral, and are thus, in some measure, the predecessors of modern maps. Baron Nordenskjöld has proved that these are derived from what he calls the normal portulano, compiled in Barcelona about 1280. The best known of the portulani are those drawn up in the island of Majorca, where a school of Jewish chartographers seems to have drawn up sea-charts for the use of seamen. In 1339 Angelico Dulcert drew up a portulano which still exists; and in 1375 this was greatly improved by Cresquez lo Juheu, who added to Dulcert's outline the discoveries of Marco Polo in the east of Asia. He thus made the voyage to the Indies westward appear less than it really was, and so helped toward the voyage of Columbus. This map, known as the "Catalan Portulano," was sent by the king of Aragon to the king of France, and is still retained in the Louvre. It formed a model for many globes and later maps, including those which most influenced Columbus, and is perhaps the best known of the portulani. See CRESQUEZ; GEOGRAPHERS, JEWS AS.

CHARTRES: Chief town of the department of Eure-et-Loire, France. From time immemorial Jews were established at Chartres, occupying a special quarter called "Rue aux Juifs." In 1394 their synagogue, which was in the Rue Saint-Père, was transformed into a hospital, becoming the property of the parish of St. Hilaire. In the "Réponses de Rabbins Français et Lorrains," p. 15, mention is made of דינרי 'קרטיינ"ש, interpreted by the editor as "current coin"; but by Neubauer, in "Rev. Etudes Juives," iii. 155, with more reason as "coins of Chartres." There was, in fact, a mint at Chartres, which was called "Chartrain," and in Old French "Chartain."

Among the prominent rabbis of Chartres have been Mattithiah of קרטרש or קרטראש, a well-known scholar who flourished at the time of Rashi; R. Joseph, Bible commentator; and Samuel ben Reuben, a liturgic poet.

CHASDAI. See ḤASDAI, ḤISDAI.

CHASEISCH, MOSES: German Talmudist; died at Halberstadt in 1793. Chaseisch enjoyed an established reputation among his contemporaries as a Talmudist, and was loved and honored by them on account of his modesty. Although his Talmudic attainments entitled him to the position of rabbinical assessor (or "klausner"), he preferred to devote his life to instructing the young in Talmudic science. Notwithstanding his straitened circumstances, he often refused to accept the fees for his lessons. Chaseisch taught not for the sake of profit, but for love of the Torah. As the fruit of his labors, the majority of the Jewish scholars who lived at Halberstadt between 1780 and 1840 owe to him their Talmudic knowledge and religious instruction.

CHASHKES, MOSES (LÖB) B. JACOB (alias **Danzig**): Neo-Hebrew poet and Russian translator; born in Wilna Sept. 27, 1848; removed later to Odessa. His first collection of Hebrew songs, entitled "Nite'e Na'amanim," appeared in Warsaw in 1869. In the same year appeared "Ha-Peraḥim" (Odessa), followed by "Nebel we-Kinnor" (Odessa, 1871), "Ẓippor Deror" (Odessa, 1872), "Ḳol ha-Tor," "Maḥaṭ ba-Basar ha-Ḥai" (St. Petersburg, 1877), all poetico-satirical productions. His "Sefer ha-Yomi," or diary, in which he attempts to describe in verse the life of a Jewish litterateur (St. Petersburg, 1881), is partly autobiographical. His latest Hebrew poetical work is "Kol Shire Moshe Löb Chashkes" (Warsaw, 1896), of which only the first part has appeared. Chashkes also contributed Yiddish songs to the "Volksblatt" of St. Petersburg, and published a collection of poems in that dialect entitled "Lieder fum Herzen" (Cracow, 1888). Among other works he translated the following: "Kartina Muchenichestva Yevreyyev" (St. Petersburg, 1879); Schleiden's "Die Romantik des Märtyrerthums bei den Juden im Mittelalter"; "Stradanya, Byedstvo i Zaschitniki Yevreyyev" (St. Petersburg, 1882); and the 3d edition of Ellenberg's "Leiden der Juden." He was also the publisher and part translator of volume 5 of Graetz's "History of the Jews," which appeared in Russian (Moscow, 1880), and later published a volume of Russian poetry, "Stikhi i Mysli" (St. Petersburg, 1888).

CHASHNIKI: Town in the government of Vitebsk, Russia, having (in 1897) a population of 4,590, of whom about 4,000 are Jews. Besides those engaged in dairying, which is entirely in the hands of the Jewish population, there are 310 Jewish artisans and 99 Jewish journeymen. In consequence of the general poverty, the number of emigrants and of those depending on charity is constantly growing. About 115 persons apply yearly for aid before the Passover holidays. With the exception of a Biḳḳur Ḥolim association, Chashniki has no charitable societies. A government school for Jews with a female department (95 pupils), and a private school (48 Jewish pupils), are the only educational institutions.

H. R. S. J.

CHASID. See Ḥasid.

CHASTISEMENT. See Punishment.

CHASTITY: Purity in regard to the relations of sex, implied in the commandment, "Ye shall be holy: for I the Lord your God am holy" (Lev. xix. 2). The ancient Semitic religions gave a prominent place to the adoration of those powers in nature which either fertilize or produce; the worship of the sexual was prominent in their cults; and ritual prostitution was a recognized and wide-spread institution (Kalisch, commentary to Lev. i. 312, 358–361; ii. 430). The gods were male and female; sexual intercourse was part of the rites at the shrines of Baal and Astarte in Phenicia and at similar sanctuaries elsewhere. This unchastity in the religious institutions naturally affected the relations of social life; and sexual purity was regarded as of little moment. Possibly in no way were the religious and domestic institutions of Israel more markedly differentiated from those of the surrounding peoples than by the stress laid upon the virtue of chastity. The conception of the God of Israel as the Holy One meant, first of all, purity—purity in worship, and hence also in life.

Before mentioning the special laws of the Pentateuch on this subject, attention must be called to the general statement addressed to the people in Lev. xviii. 3–5, which may be considered the basis of the legislation: "After the doings of the land of Egypt, wherein ye dwelt, shall ye not do; and after the doings of the land of Canaan, whither I bring you, shall ye not do: neither shall ye walk in their statutes. My judgments shall ye do, and my statutes shall ye keep, to walk therein: I am the Lord your God. Ye shall therefore keep my statutes and my judgments: which if a man do he shall live in them: I am the Lord." Hereupon follow the laws of chastity which were to be observed if the people were to avoid the doings of the lands of Egypt and Canaan. These laws of chastity, enumerated in this chapter and in other sections of the Pentateuch, concern (1) the religious and (2) the social-domestic life.

Kadesh and Kedeshah.

The Religious Life: The "ḳadesh" and the "ḳedeshah," the male and female prostitutes "consecrated" to the worship of the goddess of fertility, were recognized adjuncts of the Canaanitish cults (I Kings xiv. 24, xv. 12, xxii. 47; Amos ii. 7; Hosea iv. 14; Ezek. xxiii. 36; see also the Baal-peor incident referred to in Num. xxv. 1–4 and Hosea ix. 10). This might not be in Israel; for it was "an abomination of the Lord thy God" (Deut. xxiii. 18, 19; see also Lev. xix. 29).

The Social-Domestic Life: (*a*) The purity of the maid was safeguarded (Lev. xix. 29); and, in case of wrong-doing on the part of the man, rectification and indemnification were commanded (Ex. xxii. 15, 16; Deut. xxii. 28, 29). (*b*) Adultery was most stringently forbidden and punished (Ex. xx. 14; Lev. xviii. 20, xx. 10). "They shall both of them die . . . the man . . . and the woman; so shalt thou put away evil" (Deut. xxii. 22). A betrothed woman was regarded in the same light as a married woman, and was punished for adultery, as was also the man found with her (Deut. xxii. 23, 24; see, however, verses 25–28 for the modification of the punishment). Here must be mentioned the peculiar institution of the investigation of the Soṭah, the woman suspected by her husband of adultery, as detailed in Num. v. (*c*) The Forbidden Degrees of consanguinity are set forth in circumstantial detail (Lev. xviii. 8–18; xx. 11, 12, 14, 17, 21; Deut. xxvii. 20, 22, 23). (*d*) No woman was to be approached during the period of her uncleanness (Lev. xviii. 19). See Niddah. (*e*) The unnatural crimes against chastity, sodomy and pederasty, prevalent in heathendom, were strictly prohibited (Lev. xviii. 22, 23; xx. 13, 15, 16; Deut. xxvii. 21).

The sins against chastity were the particular abominations, the commission of which by the former inhabitants had caused the land to become unclean (Lev. xviii. 27). No wrong-doing, excepting idolatry, is more constantly and vehemently forbidden. Four out of the twelve curses which are pronounced in the chapter of curses in the Book of Deuteronomy (xxvii. 20–23) are directed against this vice in one or other of its forms. The Biblical attitude in this matter is perhaps best expressed in the story of Joseph, who, when tempted by Potiphar's wife, refused with the noble words: "How can I do this great wickedness and sin against God?" (Gen. xxxix. 9.) Unchastity was primarily a sin against God, the pure and holy.

In the Historical Books.

In the historical books of the Bible occasional passages indicate how clearly it was understood that chastity was an indispensable virtue. When Shechem, the son of Hamor, defiled Dinah, the sons of Jacob declared it a villainy (A. V., "folly") in Israel which ought not to be committed; and Simeon and Levi slew all the males of Shechem, saying to Jacob, when he rebuked them for their revengeful act: "Should he deal with our sister as with an harlot?" (Gen. xxxiv. 7, 31.) The one misdemeanor of Eli's two wicked sons that is mentioned by name is unchastity (I Sam. ii. 22). In Amnon's act of violence against Tamar she begs him to desist, "for no such thing ought to be done in Israel" (II Sam. xiii. 12). Among the sins of Judah in the reign of Rehoboam was that of ritual unchastity (I Kings xiv. 24), on account of which calamity came upon the kingdom (see also II Kings xiii. 6, xvii. 16, xviii. 4, xx. 1, 3, xxii. 4; II Chron. xxviii. 3, xxxiii. 3, xxxvi. 14). The Prophets laid the greatest stress upon chastity. Their condemnation of unchastity ranks among the most pronounced of their denunciations of the evils prevalent in their days (Amos ii. 7; Hosea iv. 2, 13, 14; Isa. lvii. 3; Jer. ix. 1; xxiii. 10, 14; xxix. 23; Ezek. xvi. 38; xviii. 6; xxii. 10, 11; xxiii. 48; xxxiii. 26). There is a further indication of the high esteem in which chastity was held in the fact that these prophets, in speaking of the punishment that would befall the people for their sins, mention the deflowering of the women by their captors, which evil would not have been considered as so dreadful had not chastity been regarded in the highest light (Isa. xiii. 16; Zech. xiv. 2; Lam. v. 11; see also Amos vii. 17).

In the Talmud.

The many admonitions in the Book of Proverbs against unchastity need but be adverted to for proof of the lofty place that the pure life held in the estimation of the wise men of Israel (Prov. v. 3–23, vi. 24–33, vii. 5–27, ix. 13–18, xxxi. 3). "I made a covenant with mine eyes; why then should I look upon a maid?" says Job (xxxi. 1). Similar are the injunctions of the later sage Ben Sira (Ecclus. ix. 3–9; xix. 2; xxiii. 22–26; xlii. 11), who counseled, "Go not after 'thy lusts'; and restrain thyself from thine appetites" (*ib.* xviii. 30). The spirit of the Rabbis appears in the advice of Jose ben Johanan, "Prolong not converse with woman" (Abot i. 5). "Follow not after your own eyes, after which ye use to go," etc. (Num. xv. 39): this means, "Ye shall not cast a lustful glance upon woman." One of the reasons given for the destruction of Jerusalem is the prevalence of "shamelessness," which undoubtedly means unchastity (Shab. 119b). In the days of the terrible persecutions under Hadrian the rabbis advised the people to suffer death rather than be guilty of "idolatry, incest, or bloodshed"; while they considered the transgression of any other commandment permissible if necessary to preserve life (Sanh. 74a; see also Maimonides, "Yad," Yesode ha-Torah, v. 9). As a further example of the attitude of the rabbis of Talmudic times, may be quoted the passage which was given as advice what to do when unchaste thoughts and desires assail: "My son, if that monster [the Yeẓer Hara'] meets you, drag it to the house of study; it will melt if it is of iron; it will break in pieces if it is of stone, as is said in Scripture (Jer. xxiii. 29): 'Is not my word like as a fire? saith the Lord; and like a hammer that breaketh the rock in pieces?'" (Ḳid. 30b.) The Talmudic term for chastity is צניעות. There can be no doubt of the fact that early marriage among the Jews was a strong factor in making them so chaste a people. Even such an unsympathetic and hostile exponent of rabbinic theology as Weber indicates this ("Jüd. Theol." p. 234). The age of eighteen was posited as the proper time for a youth to contract matrimony (Abot v. 21; Ḳid. 29b; Yeb. 62b, 63b; Sanh. 76b; Shulḥan 'Aruk, Eben ha-'Ezer, 1, 2). Early marriages continued in vogue among the Jews through medieval times (Abrahams, "Jewish Life in the Middle Ages," pp. 90, 167). Many enactments were made to safeguard the purity of the people and to insure chastity (Maimonides, "Yad," Issure Biah, xxi.; Shulḥan 'Aruk, Eben ha-'Ezer, 21–25).

In one of the sections of the "reasons for the commandments" ("ta'ame miẓwot") in his "Moreh Nebukim," Maimonides gives as the reason for such legislation the following: "The object of these precepts is to diminish sexual intercourse, to restrain as much as possible indulgence in lust, and [to teach] that this enjoyment does not, as foolish people think, include in itself its final cause" ("Moreh Nebukim," iii. 35; see also *ibid.* 33). In ch. xlix. he treats at length the law concerning forbidden sexual intercourse and that for the promotion of chastity, whose object is "to inculcate the lesson that we ought to limit sexual intercourse hold it in contempt, and only desire it rarely."

In speaking of the reason for the prohibition of intermarriage with a near relative, he expresses it as his opinion that one object of this is "to inculcate chastity in our hearts."

Views of the Philosophers.

Of ethical philosophers who have expressed Jewish thought on this subject, Saadia and Baḥya may be mentioned. The former, in the tenth chapter of his "Emunot we-De'ot," which is the ethical portion of the book, devotes two paragraphs to chastity; the third is "on sexual intercourse," and the fourth "on desire." His teaching concerning intercourse is "that it is not good for man, except for the purpose of producing offspring"; concerning desire, "man shall have no desire except for his wife, that he may love her and she may love him" ("Emunot we-De'ot," ed. Slucki, pp. 150, 151). In his ethical treatise, "The Duties of the Heart," Baḥya has frequent admonitions on the necessity of chastity and the overcoming of evil desires; as, for example, in the fifth division of the work, notably pp. 254, 258 *et seq.* (ed. Stern, Vienna, 1856). At the close of ch. ix. he quotes with approval and at length the last will and testament of a certain pious man in Israel, addressed to his son, and containing advice for the guidance of life. From this document one sentence may be set down here: "Be not one of those who, sunk in the folly of drunkenness and lust, submit like slaves to the dominance of evil passions; so that they think only of the satisfaction of sensual desires and the indulgence of bestial pleasures" (*ib.* p. 433). A similar word of advice may be quoted from a letter written by Naḥmanides to his son: "Be especially careful to keep aloof from women. Know that our God hates immorality; and Balaam could in no other way injure Israel than by inciting them to unchastity" (Schechter, "Studies in Judaism," p. 141).

A few further like injunctions from the moral treatises of medieval rabbis may here be given: "Let not the strange god, thy sensual desire, rule over thee; act so that thou hast not cause to blush before thyself; pay no heed to the biddings of desire; sin not and say, I will repent later" (from "Sefer Roḳeaḥ" by R. Eleazer b. Judah of Worms, in Zunz, "Z. G." pp. 132, 134); "Keep thy soul always pure: thou knowest not when thou wilt have to give it up" ("Sefer ha-Middot," fifteenth century, in *ib.* p. 153).

CHASTITY, PROOF OF. See Crimes and Divorce.

CHÂTEAU-THIERRY: Chief town of the arrondissement of the same name in the department of Aisne, France. At Château-Thierry, as in general throughout Champagne, the seigniors of the country were favorably disposed toward the Jews. The counts of Champagne, however, acted thus in their own interest; for they considered the Jews as their own property—a property which was very productive. Thibaut, count of Champagne, and Philip Augustus, king of France, signed in 1198 an agreement by the terms of which they bound themselves to surrender to each other all Jews who might migrate from the domain of the one to that of the other. This agreement was renewed in 1201, after the death of Thibaut, between the king of France and the Countess Blanche (Brussel, "Usage Général des Fiefs en France," i. xi. 39). Cresselin, the richest Jew of Champagne, who, in order to escape from the arbitrary rule of the countess, had gone to Paris, was compelled to return to Champagne and to remain there on penalty of having all his outstanding debts canceled by Blanche (Brussel, *l.c.* ch. xxxix.; compare Depping, "Les Juifs dans le Moyen Age," p. 116). When in 1284 Philip the Fair took possession of Champagne, he demanded from the Jews of that province 25,000 livres as a congratulatory gift on his accession (*ib.*). In a document of the year 1298 mention is made of a fine of 50 livres imposed upon the Jew Soninus of Château-Thierry. Another document shows payments for right of residence between 1321 and 1323 by Jews of Château-Thierry: thus, 20 livres by Chièrefame Denix of "Chatel Thierri"; 60 and 68 livres by Deulesault of "Chasteltierri"; 100 livres by Vivant of "Chastel Thieri" (*l.c.* xix. 250, 252, 255).

As early as the thirteenth century Château-Thierry had become an important center of Talmudical learning. Mention may be made of the following scholars, who either came thence or lived there:

David the Pious, one of the celebrated French rabbis to whom R. Meïr ben Todros Abulafia of Toledo addressed, about 1204, his letter against the theory of the resurrection as propounded by Maimonides.

Samuel of Evreux, director of the school of Château-Thierry in 1225, was a remarkable Talmudist. His name is mentioned in the Tosafot Ḳid. 27b, 39a; Ned. 90b; 'Ab. Zarah 68a; Beẓah 14b; Tem. 19b; the Tosafot upon Soṭah are also ascribed to him (Zunz, "Z. G." p. 38). Zunz (*l.c.*) says that Samuel was the son of R. Yom-Ṭob of Evreux and the disciple of R. Isaac b. Abraham of Dampierre. Gross ("Gallia Judaica," p. 39), on the contrary, identifies him with R. Samuel ben Shneor, the correspondent of R. Jehiel of Paris, and Nathaniel, the elder, of Chinon.

R. Isaac and his son Bonne Vie are two scholars of this place only known through the reference to them in the Tosafot upon Beẓah. See CHAMPAGNE.

CHATTANOOGA. See TENNESSEE.

CHATTELS: In English and American law property is divided into two kinds: real or landed, and personal or chattels; in Continental law, into immovable and movable. Jewish law speaks of "ḳarḳa'ot" (ground) and "miṭṭalṭelin" (movables). Slaves are included in the former; demands on other persons, in the latter, though in many respects the law governing the ownership and incidents of bonds ("sheṭarot") or other demands differs from the law of tangible, bodily chattels, as has been shown in the article ALIENATION. Lands and slaves are sometimes joined together under the name of "property which has responsibility" ("sharayot"), chattels, bond, and, other demands as property having none; because, under the Talmudic law (see DEEDS), a properly written and attested bond became as soon as delivered a lien on all of the debtor's lands, but not on his chattels and effects, and because, moreover, after the death of the debtor, only lands and slaves, not chattels or demands, were liable to his creditors. During the Middle Ages, however, as a matter of necessity, goods, moneys, and effects were made liable for the decedent's debts (see DEBTS; compare Ḥoshen Mishpaṭ, 107, 1).

Since the non-observance of the Jubilee there has been no difference in the laws of descent (see AGNATES) between landed estate and chattels. They form together one mass, as they do in countries having a system of civil law. The modes of ALIENATION AND ACQUISITION are different, as has been shown in the article under that caption. Moreover, a sale of chattels can be set aside or corrected for OVERREACHING on the sole ground of inadequacy or excessive price, while the law of overreaching ("ona'ah") does not apply to either lands or bonds. These broad distinctions are readily found in the Mishnah Ḳid. i. 1-6, and B. M. iv. 1-9; for details see the articles under the captions indicated above.

J. SR. L. N. D.

CHATZKIN, ISAAC ANDREYEVICH: Russian physician; born 1832; died at Odessa June, 1902. He settled in that city in 1869, and practised there for more than thirty years. In 1870 he became a member of the Medical Society of Odessa and a corresponding member of the Medical Society of Kherson. Chatzkin distinguished himself by several literary productions. In 1858 his letters on physiology appeared in the "Russki Vyestnik." He published, besides, Russian translations of the "Introduction to Medical Science," by Professor Lebert, and Virchow's "Cellular Pathology."

CHAUSSY: District town in the government of Mohilev, Russia. The Jewish community of Chaussy dates from the seventeenth century, as appears from a charter granted to the Jews Jan. 11, 1667, by Michael Casimir Pacz, castellan of Wilna, and confirmed by King August III. March 9, 1739. In 1780, at the time of a visit of Catherine II., there was a Jewish population of 355, in a total of 1,057; and the town possessed one synagogue. In 1803 the Jewish population was 453, in a total of 1,185; in 1870 it was 2,433, in a total of 4,167; and in 1897, 2,775, in a total of about 6,000. Some of the Jewish artisans are employed in the tanneries and in silk and woolen factories. The Jewish population in the district of Chaussy (including the town) in 1897 was 7,444, or 8.42 per cent of the total population.

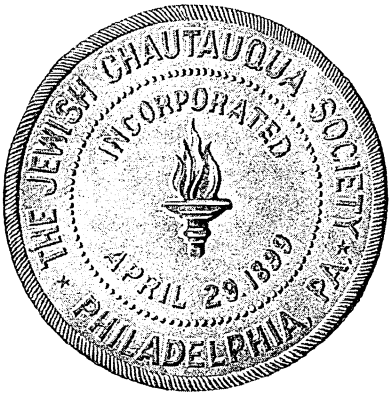
CHAUTAUQUA SOCIETY, THE JEWISH: A society formed in the United States for "the dissemination of knowledge of the Jewish religion by fostering the study of its history and literature, giving popular courses of instruction, issuing publications, establishing reading-circles, holding general assemblies, and by such other means as may from time to time be found necessary and proper." Its organization was the result of a suggestion offered by Rev. Dr. Henry Berkowitz in an address before his congregation, the Rodeph Shalom, Philadelphia, March 10, 1893. The Jewish literary societies of that city appointed a "committee on organization," which formulated plans. An agreement was entered into with the Chautauqua Literary and Scientific Circle convened at Lake Chautauqua, N. Y., for the use of the general methods of popular education known as the "Chautauqua System." A Jewish society, national in its scope, was then organized, with Dr. Berkowitz as chancellor.

In the winter of 1893 the society began the publication of a series of "course books" or syllabi for general readers and members of reading-circles or study classes. These guide-books give syllabi of courses in Biblical and post-Biblical history and literature, in the Hebrew language (correspondence method), and on Jewish characters in fiction.



Seal of the Jewish Chautauqua Society.

Extent of Work.

The society has succeeded in interesting several thousand persons in the United States and some in Great Britain, Canada, and British India, in pursuing the readings outlined. By correspondence and through the agency of a traveling field-secretary, numerous Chautauqua circles have been organized in many communities. Literary circles connected with congregations, lodges, sections of the Council of Jewish Women, Young Men's Hebrew associations, and Zionist societies use the Chautauqua plans of study.

The Chautauqua circles of West Virginia have formed a state organization and hold annual conventions.

Summer Assemblies.

The main source of inspiration for the home reading courses is derived from the summer assembly. Atlantic City, N. J., has been the seat of these summer gatherings of the Jewish Chautauquans during the past six years. In July, 1897, the first experiment was made in this direction. The program for a series of daily sessions continuing two weeks was arranged by the chancellor and carried out by the persons enlisted, under the management of Dr. Lee K. Frankel as director of the assembly. A course of popular lectures on Jewish and other themes was delivered. Chautauqua circles in Bible study and in post-Biblical history and literature were conducted. A teachers' institute supplied instruction and practical help to the teachers of the Jewish schools of the country. Conferences were arranged for the consideration of some of the practical problems of Jewish life. Social and literary gatherings were held from time to time. At the second summer assembly, in July, 1898, books, charts, maps, models, and various appliances for use in the classes of the religious schools were exhibited. In 1899 the society was incorporated under the laws of the state of Pennsylvania. The third assembly, which met in July of that year, was productive of such enthusiasm that on the recommendation of Dr. K. Kohler it was resolved to formulate plans for the addition of a regular summer school. In July, 1900, the fourth assembly was held, and the summer school was opened, with classes in the study of the principles of pedagogy applied to instruction in religion.

"The Assembly Record," a pamphlet giving a detailed report of these gatherings and edited by the secretary and director of the assembly, Isaac Hassler, has been issued each year by the society. The "Menorah" magazine is the official organ of the society.

"Papers presented at the fifth annual session of the summer assembly of the society held at Atlantic City, N. J., July 7 to 28, 1901," is the title of special series No. 7 of the books issued by The Jewish Publication Society of America, Philadelphia, June, 1902. A course in applied philanthropy was added to the features described above during the sixth assembly, held in July, 1902.

A. H. Be.

CHAVES: City in Portugal, which in the fourteenth century had a fairly large Jewish community, and an "aula," or school, "in which the Law was expounded by the rabbis." This school was subject to a special tax. Before the expulsion of the Jews from Portugal the Jewish quarter here annually paid 31,000 reis in taxes.

Bibliography: Kayserling, *Gesch. der Juden in Portugal*, p. 49.

G. M. K.

CHAVES: Jewish-Portuguese family that derived its name from its native place of Chaves in Portugal; members of it are found in Amsterdam and London.

A. de Chaves: Painter at Amsterdam in 1700.

Aaron de Chaves: Edited in Amsterdam, in 1767, Rehuel Jesurun's "Dialogo dos Montes," prefixing a Portuguese poem of his own.

David Chaves: Lived in London in 1720; celebrated in Latin verse Daniel Israel Lopez Laguna's Spanish translation of the Psalms, "Espejo Fiel de Vidas."

Isaac de Chaves: Ḥazan in London in 1702.

Jacob de Chaves: Son of the wealthy Moses de Chaves of Amsterdam; pupil of the Neo-Hebraic poet Moses Ḥayyim Luzzatto, who published his drama, "La-Yesharim Teḥillah" (Praise to the Virtuous), in honor of Jacob's marriage with Rachel de Vega Enriques in 1743.

Bibliography: Kayserling, *Bibl. Esp.-Port.-Jud.* pp. 38, 90; Grätz, *Gesch. der Juden.* x. 381.

CHAZANOWICZ, JOSEPH: Russian physician, and founder of the Jewish National Library at Jerusalem; born at Goniondz, government of Grodno, Russia, Oct. 22, 1844; son of Aaron Chazanowicz. After finishing his studies at the Jewish school and at the gymnasium of Grodno, Chazanowicz went to Germany to study medicine. While still a student he became volunteer assistant surgeon at one of the military hospitals of Berlin during the Franco-Prussian war, 1870–71. He received his degree of doctor of medicine from the University of Königsberg in 1872. Returning to Russia, he passed his state board examination at Dorpat, and began to practise at Byelostok, where he now (1902) resides, having been physician of the Jewish hospital for several years.

Chazanowicz founded at Byelostok the Ḥobebe Ẓiyyon, a society for the education of Jewish youth in the spirit of Zionism, and was for many years its president. He founded also the Linat ha-Ẓedeḳ, a hospital society; and takes an active part in the Zionist movement. In 1890 he visited Palestine and conceived the idea of founding a library at Jerusalem, together with the order B'nai B'rith; but his plan was necessarily postponed, as he unfortunately aroused the displeasure of the government soon after his return to Byelostok. An anti-Semitic Polish physician of Byelostok had been guilty of malpractise on a Jewish boy; and Chazanowicz so vehemently took up the defense of the victim that he was forced by the government to leave the town for a period of two years, during which time he established himself at Lodz. In 1893 he returned to Byelostok and began to execute his plan. In 1896 he sent to Jerusalem his large collection of books, amounting to nearly 10,000 volumes, to become the nucleus of the Abarbanel Library. The enlargement of this library and the collection of funds to erect a special building for it have become the life-work of Chazanowicz. See Abarbanel Library in Jerusalem.

Chief Rabbi of Szegedin, Hungary; Author of "Die Aramäischen Pflanzennamen."

S. H. MARGULIES, Ph.D.,

Principal of the Jewish Theological Seminary; Chief Rabbi of Florence, Italy.

H. OORT, D.D.,

Professor of Hebrew Language and Archeology at the State University, Leyden, Holland.

ABBÉ PIETRO PERREAU,

Formerly Librarian of the Reale Biblioteca Palatina, Parma, Italy.

MARTIN PHILIPPSON, Ph.D.,

Formerly Professor of History at the Universities of Bonn and Brussels; President of the Deutsch-Jüdische Gemeindebund, Berlin, Germany.

SAMUEL POZNANSKI, Ph.D.,

Rabbi in Warsaw, Russia.

E. SCHWARZFELD, LL.D.,

Secretary-General of the Jewish Colonization Association, Paris, France.

LUDWIG STEIN, Ph.D.,

Professor of Philosophy, University of Bern, Switzerland; Editor of "Archiv für Geschichte der Philosophie," etc.

HERMANN L. STRACK, Ph.D.,

Professor of Old Testament Exegesis and Semitic Languages, University of Berlin, Germany.

CHARLES TAYLOR, D.D., LL.D.,

Master of St. John's College, Cambridge, England; Editor of "Sayings of the Jewish Fathers," etc.

SYSTEMS OF TRANSLITERATION AND OF CITATION OF PROPER NAMES[*]

A.—Rules for the Transliteration of Hebrew and Aramaic.

1. All important names which occur in the Bible are cited as found in the authorized King James version; *e.g.*, *Moses*, not Mosheh; *Isaac*, not Yiẓḥaḳ; *Saul*, not Sha'ul or Shaül; *Solomon*, not Shelomoh, etc.

2. Names that have gained currency in English books on Jewish subjects, or that have become familiar to English readers, are always retained and cross-references given, though the topic be treated under the form transliterated according to the system tabulated below.

3. Hebrew subject-headings are transcribed according to the scheme of transliteration; cross-references are made as in the case of personal names.

4. The following system of transliteration has been used for Hebrew and Aramaic:

א *Not noted at the beginning or the end of a word; otherwise* ' *or by dieresis; e.g., Ze'eb or Meïr.*

ב	*b*	ז	*z*	ל	*l*	פּ	*with dagesh, p*	שׁ	*sh*
ג	*g*	ח	*ḥ*	מ	*m*	פ	*without dagesh, f*	שׂ	*s*
ד	*d*	ט	*ṭ*	נ	*n*	צ	*ẓ*	ת	*t*
ה	*h*	י	*y*	ס	*s*	ק	*ḳ*		
ו	*w*	כ	*k*	ע	'	ר	*r*		

NOTE: The presence of dagesh lene is not noted except in the case of *pe*. Dagesh forte is indicated by doubling the letter.

5. The vowels have been transcribed as follows:

◌ָ	*a*	◌ֻ	*u*	◌ַ	*a*	◌ֵ	*e*	וֹ	*o*
◌ֶ	*e*	◌ֱ	*e*	◌ֳ	*o*	◌ִי	*i*		
◌ִ	*i*	◌ְ	*e*	◌ֲ	*a*	וּ	*u*		

Ḳameẓ ḥaṭuf is represented by *o*.

The so-called "Continental" pronunciation of the English vowels is implied.

6. The Hebrew article is transcribed as *ha*, followed by a hyphen, without doubling the following letter. [Not *hak-Kohen* or *hak-Cohen*, nor *Rosh ha-shshanah.*]

B.—Rules for the Transliteration of Arabic.

1. All Arabic names and words except such as have become familiar to English readers in another form, as *Mohammed*, *Koran*, *mosque*, are transliterated according to the following system:

أ	*See* א *above*	خ	*kh*	ش	*sh*	غ	*gh*	ن	*n*
ب	*b*	د	*d*	ص	*ṣ*	ف	*f*	ه	*h*
ت	*t*	ذ	*dh*	ض	*ḍ*	ق	*ḳ*	و	*w*
ث	*th*	ر	*r*	ط	*ṭ*	ك	*k*	ي	*y*
ج	*j*	ز	*z*	ظ	*ẓ*	ل	*l*		
ح	*ḥ*	س	*s*	ع	'	م	*m*		

2. Only the three vowels—a, i, u—are represented:

◌َ	*a* or *ā*	◌ِ	*i* or *ī*	◌ُ	*u* or *ū*

No account has been taken of the *imālah; i* has not been written *e*, nor *u* written *o*.

---

[*] In all other matters of orthography the spelling preferred by the STANDARD DICTIONARY has usually been followed. Typographical exigencies have rendered occasional deviations from these systems necessary.

3. The Arabic article is invariably written *al;* no account being taken of the assimilation of the *l* to the following letter; *e.g.*, *Abū al-Salt*, not *Abu-l-Salt; Nafīs al-Daulah*, not *Nafīs ad-Daulah.* The article is joined by a hyphen to the following word.

4. At the end of words the feminine termination is written *ah;* but, when followed by a genitive, *at; e.g.*, *Risālah dhāt al-Kursiyy*, but *Hīʼat al-Aflāk.*

5. No account is taken of the overhanging vowels which distinguish the cases; *e.g.*, *ʻAmr*, not *ʻAmru* or *ʻAmrun; Yaʻaḳūb*, not *Yaʻaḳūbun;* or in a title, *Kitāb al-Amānāt wal-Iʻtiḳādāt.*

C.—Rules for the Transliteration of Russian.

All Russian names and words, except such as have become familiar to English readers in another form, as *Czar*, *Alexander*, *deciatine*, *Moscow*, are transliterated according to the following system:

А а	*a*	Н н	*n*	Щ щ	*shch*
Б б	*b*	О о	*o*	Ъ ъ	mute
В в	*v*	П п	*p*	Ы ы	*y*
Г г	*h*, *v*, or *g*	Р р	*r*	Ь ь	halfmute
Д д	*d*	С с	*s*	Ѣ ѣ	*ye*
Е е	*e* and *ye* at the beginning.	Т т	*t*	Э э	*e*
Ж ж	*zh*	У у	*u*	Ю ю	*yu*
З з	*z*	Ф ф	*f*	Я я	*ya*
И и І і	*i*	Х х	*kh*	Ѳ ѳ	*F*
К к	*k*	Ц ц	*tz*	Ѵ ѵ	*œ*
Л л	*l*	Ч ч	*ch*	Й й	*i*
М м	*m*	Ш ш	*sh*		

Rules for the Citation of Proper Names, Personal and Otherwise.

1. Whenever possible, an author is cited under his most specific name; *e.g.*, Moses Nigrin under *Nigrin;* Moses Zacuto under *Zacuto:* Moses Rieti under *Rieti;* all the Ḳimḥis (or Ḳamḥis) under *Ḳimḥi;* Israel ben Joseph Drohobiczer under *Drohobiczer.* Cross-references are freely made from any other form to the most specific one; *e.g.*, to Moses *Vidal* from Moses *Narboni;* to Solomon Nathan *Vidal* from Menahem *Meïri;* to Samuel *Kansi* from Samuel Astruc *Dascola;* to Jedaiah *Penini*, from both *Bedersi* and *En Bonet;* to *John* of Avignon from Moses de *Roquemaure.*

2. When a person is not referred to as above, he is cited under his own personal name followed by his official or other title; or, where he has borne no such title, by "of" followed by the place of his birth or residence; *e.g.*, *Johanan* ha-Sandlar; *Samuel* ha-Nagid; *Judah* ha-Ḥasid; *Gershom* of Metz, *Isaac* of Corbeil.

3. Names containing the word *d'*, *de*, *da*, *di*, or *van*, *von*, *y*, are arranged under the letter of the name following this word; *e.g.*, de Pomis under *Pomis*, de Barrios under *Barrios*, Jacob d'Illescas under *Illescas.*

4. In arranging the alphabetical order of personal names *ben*, *da*, *de*, *di*, *ha-*, *ibn*[*], *of* have not been taken into account. These names thus follow the order of the next succeeding capital letter:

Abraham of Augsburg
Abraham of Avila
Abraham ben Azriel
Abraham de Balmes
Abraham ben Baruch
Abraham of Beja
Abraham ben Benjamin Aaron
Abraham ben Benjamin Ze'eb
Abraham Benveniste

---

[*] When Ibn has come to be a specific part of a name, as Ibn Ezra, such name is treated in its alphabetical place under "I."

LIST OF ABBREVIATIONS

[Self-evident abbreviations, particularly those used in the bibliographies, are not included here.]

CONTRIBUTORS TO VOLUME IV

A.............**Cyrus Adler, Ph.D.,**
President of the American Jewish Historical Society; President of the Board of Trustees of the Jewish Theological Seminary of America; Librarian of the Smithsonian Institution, Washington, D. C.

A. A. G......**Amélie André Gedalge,**
Paris, France.

A. Bla.......**Armin Blau,**
Berlin, Germany.

A. F..........**A. Freimann, Ph.D.,**
Editor of the "Zeitschrift für Hebräische Bibliographie"; Librarian of the Hebrew Department, Stadtbibliothek, Frankfort-on-the-Main, Germany.

A. Fe........**Alfred Feilchenfeld, Ph.D.,**
Principal of the Realschule, Fürth, Bavaria, Germany.

A. Fr........**Aaron Friedenwald, M.D.** (*Deceased*),
Late of Baltimore, Md.

A. G..........**Adolf Guttmacher, Ph.D.,**
Rabbi of the Baltimore Hebrew Congregation, Baltimore, Md.

A. K..........**A. Kaminka, Ph.D.,**
Rabbi; Secretary of the "Wiener Israelitische Allianz," Vienna, Austria.

A. M. F......**Albert M. Friedenberg, B.S.,**
Correspondent of "The Jewish Comment," Baltimore, Md.; New York City.

A. P..........**A. Porter,**
Formerly Associate Editor of "The Forum"; Revising Editor "Standard Cyclopedia," New York City.

A. Pe........**A. Peiginsky, Ph.D.,**
New York City.

A. R..........**A. Rhine,**
Rabbi in Hot Springs, Ark.

B. B..........**Benuel H. Brumberg,**
Contributor to "National Cyclopedia of American Biography," New York City.

B. Ei.........**Benzion Eisenstadt,**
New York City.

B. Fi........ **Bertha Fishberg,**
New York City.

B. J..........**B. Jacob, Ph.D.,**
Rabbi in Göttingen, Germany.

B. P..........**Bernhard Pick, Ph.D., D.D.,**
Formerly pastor of St. John's Lutheran Church, Albany, N. Y.; now New York City.

C. A. T......**C. A. Trier,**
Copenhagen, Denmark.

C. de B......**C. de Bethencourt,**
Lisbon, Portugal.

C. I. de S....**Clarence I. de Sola,**
Montreal, Canada.

C. J. M......**Charles J. Mendelsohn,**
Philadelphia, Pa.

C. L..........**Caspar Levias, M.A.,**
Instructor of Exegesis and Talmudic Aramaic, Hebrew Union College, Cincinnati, Ohio.

D.............**Gotthard Deutsch, Ph.D.,**
Professor of Jewish History, Hebrew Union College, Cincinnati, Ohio.

D. Le........**David Levy,**
Rabbi in New Haven, Conn.

D. P..........**David Philipson, D.D.,**
Rabbi of the Congregation B'ne Israel; Professor of Homiletics, Hebrew Union College, Cincinnati, Ohio.

D. S..........**D. Simonsen,**
Professor; Former Chief Rabbi of Denmark; Copenhagen, Denmark.

D. W. A.....**David Werner Amram, LL.B.,**
Attorney at Law, Philadelphia, Pa.

E. A..........**Edouard André,**
Paris, France.

E. C..........**Executive Com. of the Editorial Board.**

E. G. H......**Emil G. Hirsch, Ph.D., LL.D., D.D.,**
Rabbi of Sinai Congregation; Professor of Rabbinical Literature and Philosophy in the University of Chicago, Chicago, Ill.

E. K..........**Eduard König, Ph.D., D.D.,**
Professor of Old Testament Exegesis, University of Bonn, Germany.

E. Me........**Eduard Meyer, Ph.D.,**
Professor of Ancient History, University of Berlin, Germany.

E. Ms....... **Edgar Mels,**
New York City.

E. N..........**Eduard Neumann, Ph.D.,**
Chief Rabbi of Nagy-Kanisza, Hungary.

E. Sd........**E. Schwarzfeld, LL.D.,**
Secretary of Jewish Colonization Association, Paris, France.

E. W. B......**Edward William Bennett,**
New York City.

F. Bu...... .**Franz Buhl, Ph.D.,**
Professor of Semitic Philology, University of Copenhagen, Denmark.

F. H. V......**Frank H. Vizetelly, F.S.A.,**
Associate Editor of the STANDARD DICTIONARY and the "Columbian Cyclopedia," New York City.

F. J...........**Friedman Janovsky,**
St. Petersburg, Russia.

F. K. S......**Frank Knight Sanders, Ph.D., D.D.,**
Professor of Biblical History and Archeology; Dean of the Divinity School, Yale University, New Haven, Conn.

F. R..........**F. Rosenthal, Ph.D.,**
Rabbi in Breslau, Germany.

F. T. H......**Frederick T. Haneman, M.D.,**
Brooklyn, N. Y.

G.............**Richard Gottheil, Ph.D.,**
Professor of Semitic Languages, Columbia University; Chief of the Oriental Department, New York Public Library; President of the Federation of American Zionists, New York City.

THE
JEWISH ENCYCLOPEDIA

[NOTE: For topics beginning with **Ch**, not found in alphabetical order, see under **H.**]

CHAZARS: A people of Turkish origin whose life and history are interwoven with the very beginnings of the history of the Jews of Russia. The kingdom of the Chazars was firmly established in most of South Russia long before the foundation of the Russian monarchy by the Varangians (855). Jews have lived on the shores of the Black and Caspian seas since the first centuries of the common era. Historical evidence points to the region of the Ural as the home of the Chazars. Among the classical writers of the Middle Ages they were known as the "Chozars," "Khazirs," "Akatzirs," and "Akatirs," and in the Russian chronicles as "Khwalisses" and "Ugry Byelyye."

The Armenian writers of the fifth and following centuries furnish ample information concerning this people. Moses of Chorene refers to the invasion by the "Khazirs" of Armenia and Iberia at the beginning of the third century: "The chaghan was the king of the North, the ruler of the Khazirs, and the queen was the chatoun" ("History of Armenia," ii. 357). The Chazars first came to Armenia with the Basileans in 198. Though at first repulsed, they subsequently became important factors in Armenian history for a period of 800 years. Driven onward by the nomadic tribes of the steppes and by their own desire for plunder and revenge, they made frequent invasions into Armenia. The latter country was made the battle-ground in the long struggle between the Romans and the Persians. This struggle, which finally resulted in the loss by Armenia of her independence, paved the way for the political importance of the Chazars. The conquest of eastern Armenia by the Persians in the fourth century rendered the latter dangerous to the Chazars, who, for their own protection, formed an alliance with the Byzantines. This alliance was renewed from time to time until the final conquest of the Chazars by the Russians. Their first aid was rendered to the Byzantine emperor Julian, in 363. About 434 they were for a time tributary to Attila—Sidonius Apollinaris relates that the Chazars followed the banners of Attila—and in 452 fought on the Catalanian fields in company with the Black Huns and Alans. The Persian king Kobad (488-531) undertook the construction of a line of forts through the pass between Derbent and the Caucasus, in order to guard against the invasion of the Chazars, Turks, and other warlike tribes. His son Chosroes Anoshirvan (531-579) built the wall of Derbent, repeatedly mentioned by the Oriental geographers and historians as Bab al-Abwab (Justi, "Gesch. des Alten Persiens," p. 208).

Early History.

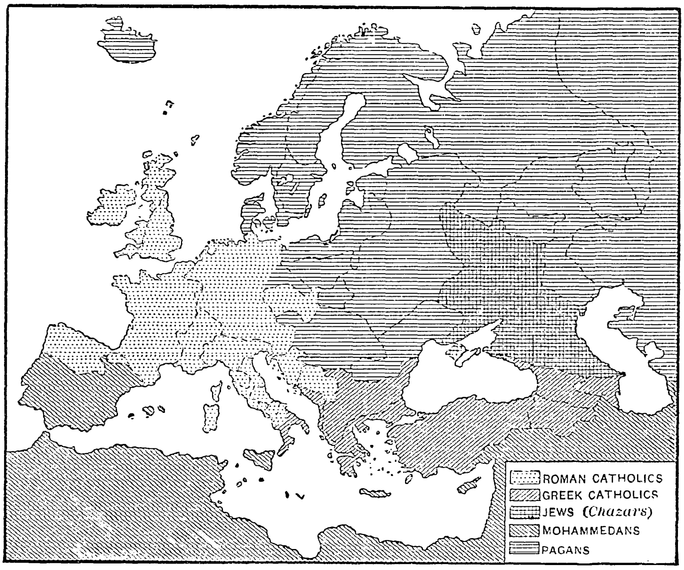
In the second half of the sixth century the Chazars moved westward. They established themselves in the territory bounded by the Sea of Azov, the Don and the lower Volga, the Caspian Sea, and the northern Caucasus. The Caucasian Goths (Tetraxites) were subjugated by the Chazars, probably about the seventh century (Löwe, "Die Reste der Germanen am Schwarzen Meere," p. 72, Halle, 1896). Early in that century the kingdom of the Chazars had become powerful enough to enable the chaghan to send to the Byzantine emperor Heraclius an army of 40,000 men, by whose aid he conquered the Persians (626-627). The Chazars had already occupied the northeastern part of the Black Sea region. According to the historian Moses Kalonkataci, the Chazars, under their leader Jebu Chaghan (called "Ziebel Chaghan" by the Greek writers), penetrated into Persian territory as early as the second campaign of Heraclius, on which occasion they devastated Albania ("Die Persischen Feldzüge des Kaisers Herakleios," in "Byzantinische Zeitschrift," iii. 364). Nicephorus testifies that Heraclius repeatedly showed marks of esteem to his ally, the chaghan of the Chazars, to whom he even promised his daughter in marriage. In the great battle between the Chazars and the Arabs near Kizliar 4,000 Mohammedan soldiers and their leader were slain.

In the year 669 the Ugrians or Zabirs freed themselves from the rule of the Obrians, settled between the Don and the Caucasus, and came under the dominion of the Chazars. For this reason the Ugrians, who had hitherto been called the "White" or "Independent" Ugrians, are described in the chronicles ascribed to Nestor as the "Black," or "Dependent," Ugrians. They were no longer governed by their own princes, but were ruled by the kings of the Chazars. In 735, when the Arab leader Mervan moved from Georgia against the Chazars, he attacked the Ugrians also. In 679 the Chazars subjugated the Bulgars and extended their sway farther west between the Don and the Dnieper, as far

Embrace Judaism.

as the head-waters of the Donetz in the province of Lebedia (K. Grot, "Moravia i Madyary," St. Petersburg, 1881; J. Danilevski and K. Grot, "O Puti Madyar s Urala v Lebediyu," in "Izvyestiya Imperatorskavo Russkavo Geograficheskavo Obshchestva," xix.). It was probably about that time that the chaghan of the Chazars and his grandees, together with a large number of his heathen people, embraced the Jewish religion. According to A. Harkavy ("Meassef Niddaḥim," i.), the conversion took place in 620; according to others, in 740. King Joseph, in his letter to Ḥasdai ibn Shaprut (about 960), gives the following account of the conversion:

> "Some centuries ago King Bulan reigned over the Chazars. To him God appeared in a dream and promised him might and glory. Encouraged by this dream, Bulan went by the road of Darian to the country of Ardebil, where he gained great victories [over the Arabs]. The Byzantine emperor and the calif of the Ishmaelites sent to him envoys with presents, and sages to convert him to their respective religions. Bulan invited also wise men of Israel, and proceeded to examine them all. As each of the champions believed his religion to be the best, Bulan separately questioned the Mohammedans and the Christians as to which of the other two religions they considered the better. When both gave preference to that of the Jews, that king perceived that it must be the true religion. He therefore adopted it" (see Harkavy, "Soobshchenija o Chazarakh," in "Yevreiskaya Biblioteka," vii. 153).



Map Showing the Distribution of Religions in Europe in the Tenth Century, C.E., Indicating Extent of the Kingdom of the Chazars.

(After Schrader, "Atlas de Géographie Historique.")

Succession of Kings.

This account of the conversion was considered to be of a legendary nature. Harkavy, however (in "Bilbasov" and "Yevreiskaya Biblioteka"), proved from Arabic and Slavonian sources that the religious disputation at the Chazarian court is a historical fact. Even the name of Sangari has been found in a liturgy of Constantine the Philosopher (Cyrill). It was one of the successors of Bulan, named Obadiah, who regenerated the kingdom and strengthened the Jewish religion. He invited Jewish scholars to settle in his dominions, and founded synagogues and schools. The people were instructed in the Bible, Mishnah, and Talmud, and in the "divine service of the ḥazzanim." In their writings the Chazars used the Hebrew letters (Harkavy, "Skazaniya," etc., p. 241). Obadiah was succeeded by his son Hezekiah; the latter by his son Manasseh; Manasseh by Ḥanukkah, a brother of Obadiah; Ḥanukkah by his son Isaac; Isaac by his son Moses (or Manasseh II.); the latter by his son Nisi; and Nisi by his son Aaron II. King Joseph himself was a son of Aaron, and ascended the throne in accordance with the law of the Chazars relating to succession. On the whole, King Joseph's account agrees generally with the evidence given by the Arabic writers of the tenth century, but in detail it contains a few discrepancies. According to Ibn Fadlan, Ibn Dastah, and others, only the king and the grandees were followers of Judaism. The rest of the Chazars were Christians, Mohammedans, and heathens; and the Jews were in a great minority (Frähn, "De Chazaris," pp. 13–18, 584–590). According to Mas'udi ("Les Prairies d'Or," ii. 8), the king and the Chazars proper were Jews; but the army consisted of Mohammedans, while the other inhabitants, especially the Slavonians and Russians, were heathens. From the work "Kitab al-Buldan," written about the ninth century (p. 121; cited by Chwolson in "Izvyestiya o Chazarakh," etc., p. 57), it appears as if all the Chazars were Jews and that they had been converted to Judaism only a short time before that book was written. But this work was probably inspired by Jaihani; and it may be assumed that in the ninth century many Chazar heathens became Jews, owing to the religious zeal of King Obadiah. "Such a conversion in great masses," says Chwolson (*ib.* p. 58), "may have been the reason for the embassy of Christians from the land of the Chazars to the Byzantine emperor Michael. The report of the embassy reads as follows: 'Quomodo nunc Judæi, nunc Saraceni ad suam fidem eos molirentur convertere'" (Schlözer, "Nestor," iii. 154).

Internal Administration and Commercial Relations.

The history of the kingdom of the Chazars undoubtedly presents one of the most remarkable features of the Middle Ages. Surrounded by wild, nomadic peoples, and themselves leading partly a nomadic life, the Chazars enjoyed all the privileges of civilized nations, a well-constituted and tolerant government, a flourishing trade, and a well-disciplined standing army. In a time when fanaticism, ignorance, and anarchy reigned in western Europe, the kingdom of the Chazars could boast of its just and broad-minded administration; and all who were persecuted on the score of their religion found refuge there. There was a supreme court of justice, composed of seven judges, of whom two were Jews, two Mohammedans, and two Christians, in charge of the interests of their respective faiths, while one heathen was appointed for the Slavonians, Russians, and other pagans (Mas'udi, *l.c.* ii. 8–11).

The Jewish population in the entire domain of the Chazars, in the period between the seventh and tenth centuries, must have been considerable. There is no doubt that the Caucasian and other Oriental Jews had lived and carried on business with the Chazars long before the arrival of the Jewish fugitives from Greece, who escaped (723) from the mania for conversion which possessed the Byzantine emperor Leo the Isaurian. From the correspondence between King Joseph and Ḥasdai it is apparent that two Spanish Jews, Judah ben Meïr ben Nathan and Joseph Gagris, had succeeded in settling in the land of the Chazars, and that it was a German Jew, Isaac ben Eliezer "from the land of Nyemetz" (Germany), who carried Ḥasdai's letter to the king. Saadia, who had a fair knowledge of the kingdom of the Chazars, mentions a certain Isaac ben Abraham who had removed from Sura to Chazaria (Harkavy, in Kohut Memorial Volume, p. 244). Among the various routes enumerated by the Arabic geographer Ibn Khurdadhbah (860–880) as being used by the Rahdanite Jewish merchants, there is one leading from Spain or France, via Allemania, through the land of the Slavonians, close by Atel, the capital of the Chazars, whence they crossed the Sea of the Chazars (Caspian Sea) and continued their voyage, via Balkh, Transoxania, and the land of the Tagasga, to India and China. These merchants, who spoke Arabic, Persian, Greek, Spanish, French, and Slavonic, "traveled continuously from west to east from east to west by sea and by land." They carried eunuchs, serving-maids, boys, silks, furs, swords, imported musk, aloes, camphor, cinnamon, and other products of the Far East (Harkavy, "Skazaniya Musulmanskikh Pisatelei o Slavyanakh i Russkikh," pp. 48, 53; "Journal Asiatique," 1865).

Ḥasdai ibn Shaprut, who was foreign minister to 'Abd al-Raḥman, Sultan of Cordova, in his letter to King Joseph of the Chazars (about 960), relates that the first information about that kingdom was communicated to him by envoys from Khorassan, and that their statements were corroborated by the ambassadors from Byzantium. The latter told him that the powerful Chazars were maintaining amicable relations with the Byzantine empire, with which they carried on by sea a trade in fish, skins, and other wares, the voyage from Constantinople occupying fifteen days. Ḥasdai determined to avail himself of the services of the Byzantine embassy to transmit his letter to the king of the Chazars, and with that view he despatched Isaac ben Nathan with valuable gifts to the emperor, requesting him to aid Isaac in his journey to Chazaria. But the Greeks interposed delays, and finally sent Isaac back to Cordova. Ḥasdai then decided to send his message by way of Jerusalem, Nisibis, Armenia, and Bardaa, but the envoys of the king of the Gebalim (Boleslav I. of Bohemia), who had then just arrived in Cordova, and among whom were two Jews, Saul and Joseph, suggested a different plan. They offered to send the letter to Jews living in "Hungarin" (Hungary), who, in their turn, would transmit it to "Russ" (Russia), and thence through "Bulgar" (probably the country of the Bulgarians on the Kuban) to its destination (Atel, the capital of Chazaria). As the envoys guaranteed the safe delivery of the message, Ḥasdai accepted the proposal. He further expressed his thankfulness that God in His mercy had not deprived the Jews of a deliverer, but had preserved the remnant of the Jewish race.

Taking a keen interest in everything relating to the kingdom of the Chazars, Ḥasdai begs the king to communicate to him a detailed account of the geography of his country, of its internal constitution, of the customs and occupations of its inhabitants, and especially of the history of his ancestry and of the state. In this letter Ḥasdai speaks of the tradition according to which the Chazars once dwelt near the Seir (Serir) Mountains; he refers to the narrative of Eldad ha-Dani, who thought he had discovered the Lost Ten Tribes; and inquires whether the Chazars know anything concerning "the end of the miracles" (the coming of the Messiah). As to Eldad ha-Dani's unauthenticated account of the Lost Ten Tribes on the River Sambation, it may be interesting to note that, according to Idrisi, the city of Sarmel (Sarkel-on-the-Don) was situated on the River Al-Sabt (Sambat), which is the River Don. The name for Kiev, as given by Constantine Porphyrogenitus, is also Sambatas (Σαμβάτας). These appellations of the River Don and of the city of Kiev point evidently to Jewish-Chazar influences (Westberg, "Ibrahim ibn Ya'ḳub's Reisebericht über die Slavenlande aus dem Jahre 965," p. 134, St. Petersburg, 1898).

The Chazarian Letters.

A complete account of the correspondence between Ḥasdai and King Joseph has been written by A. Harkavy ("Yevreiskaya Biblioteka," viii. 135), one of the leading authorities on the history of the Chazars, from which the following is, in substance, an extract:

The Chazarian correspondence was first published in the work "Ḳol-Mebasser" of Isaac 'Aḳrish (Constantinople, 1577), into whose hands these documents came while on a voyage from Egypt to Constantinople. He published them with the view of proving that even after the destruction of Jerusalem the Jews still had their own country, in accordance with the well-known passage in Genesis (xlix. 10), "the scepter shall not depart from Judah."

Among European scholars Johann Buxtorf, the son, was the first to become interested in the Chazarian letters, which he printed together with the text of 'Aḳrish in his Latin translation of "Cuzari" (Basel, 1660).

Buxtorf believed that the letters themselves and the entire history of the Chazarian kingdom were but fable, for the reason that no seafarers, merchants, or other travelers had brought any information concerning such a flourishing kingdom as that of the Chazars was reputed to be. The learned Orientalist D'Herbelot ("Bibliothèque Orientale," ii. 455, Paris, 1697), misled by a wrong conception of the "Cuzari" and its relation to the conversion of the Chazars to Judaism, leaves the authenticity of the correspondence an open question.

One of the greatest scholars of the 17th century, Samuel Bochart, in his derivation of the name of the Chazars, introduces the account of Joseph ben Gorion (Yosippon), and in his notes to the "Yuḥasin" of Zacuto gives information about the Chazarian kingdom and the Sea of the Chazars obtained from the "Geographia Nubiensis" of the Arabian writer Idrisi (12th century; see "Geographia Sacra," 1646, p. 226). Bochart's views, however, are not important because he had no knowledge of the "Cuzari" or of the Chazarian letters. All the skeptics of that time and those mentioned below had no knowledge of the facts concerning the Chazars and Chazarian Judaism as contained in Slavonic Russian sources, or of the "Acta Sanctorum," which discusses those sources. It is therefore not surprising that the first author of a comprehensive history of the Jews, Basnage, who in his "Histoire des Juifs," v. 446, Rotterdam, 1707, prints the Chazarian letters, has the boldness to declare as idle fancy, not only the kingdom of the Chazars, but even the existence of the Chazarian people, which was invented, he considers, by Jewish boastfulness.

About the same time Dom Augustine Calmet issued his Biblical researches, part of which treats of "the country whither the Ten Tribes were led away and where the said tribes now live." Calmet considers Media near the Caspian Sea to be "the country," and that it is also identical with "the country of the Chazars," which was glorified so much in the rabbinical writings. According to them the czar of the Chazars adopted the Jewish religion in the eighth century. Calmet, however, considers the whole story a fiction (Calmet, "Biblische Untersuchungen, Uebersetzt von Mosheim," iv. 406–407, Bremen, 1743).

BARATIER, "the remarkable child," also considered the story of the Chazars to be only a pleasing novel; but it may serve as an excuse for his opinion that when he wrote his work he was only eleven years of age (Baratier, "Voyage de R. Benjamin Fils de Jona de Tudela," ii. 285, Amsterdam, 1734). The Danish historiographer Frederick Suhm, who in 1779 wrote a remarkable work, for that time, on the Chazars, and who could not free himself from the view of the Hebraists of the time with regard to the letter of King Joseph, was the first to give a decided opinion in favor of the genuineness of the letter of Ḥasdai (Suhm, "Samlede Skrifter"). The ignorance of these writers is accounted for by the fact that only at the end of the eighteenth century were translations of the old Arabic writers, Mas'udi, Istakhri, Ibn Ḥauḳal, etc., on the Chazars, issued. The first to make use of the testimony of the Arabic writers to corroborate the accounts of the Jewish writers on the Chazars, was the Lithuanian historian Tadeusz CZACKI, who had the advantage of using copies of the Arabic manuscripts relating to the subject in the Library of Paris ("Rosprawa o Zydach," pp. 68–69, Wilna, 1807). The Russian historian Karamsin also made use of Mas'udi's information, given in the "Chrestomathy" of Silvestre de Sacy, and of Abulfeda's researches published in the fifth volume of Busching's "Historical Magazine."

The Russian academician Ch. Frähn and the Swedish scholar D'Ohsson collected and published, in the first quarter of the nineteenth century, all the Arabic testimony on the subject of the Chazars known at that time. The authenticity of the letter of King Joseph has, however, since been fully established by the very material which those scholars had at their disposal. Frähn acknowledges the genuineness of Ḥasdai's letter, but not that of King Joseph. In the same way D'Ohsson, although he found the information of the Arabic and Byzantine writers in conformity with the contents of the Chazar letters, could not help doubting its genuineness ("Peuples du Caucase," p. 205). This may be explained by the fact that as they did not understand Hebrew they did not care to commit themselves on a question which lay outside of their field of investigation.

But the Jewish scholars had no doubts whatever as to the genuineness of the Chazarian documents, especially since the beginning of the critical school of Rapoport and Zunz. They were made use of by many writers in Spain in the twelfth century; as, for instance, by Judah ha-Levi (1140), who displayed a close acquaintance with the contents of King Joseph's epistle (Cassel, "Das Buch Kusari," pp. 13–14, Leipsic, 1869), and by the historian Abraham ibn Daud of Toledo (1160), who distinctly refers to the same letter ("Sefer ha-Ḳabbalah," p. 46b, Amsterdam, 1711).

Later on, with the persecutions which ended with the expulsion of the Jews from Spain, the Chazarian documents, together with many other treasures of medieval Jewish literature, were lost to the learned, and were not recovered until the end of the sixteenth century, when they were found in Egypt by Isaac 'Aḳrish. The Jews of that time took little interest, however, in the history of the past, being absorbed by the cheerless events of their own epoch. The first reference, therefore, to the Chazar letters is by Rabbi Bacharach of Worms, in 1679, who discovered proofs of the genuineness of Ḥasdai's letter in an acrostic in the poem which served as a preface, and which reads as follows: "I, Ḥasdai, son of Isaac, son of Ezra ben Shaprut" (see "Ḥut ha-Shani," p. 110b, Frankfort-on-the-Main, 1769).

This acrostic, however, again remained unnoticed until it was rediscovered by Frensdorf, independently of Bacharach, in 1836 ("Zeitschrift für Jüdische Theologie," ii. 513). Four years later (1840) the genuineness of Ḥasdai's letter was absolutely proved by Joseph Zedner. He also acknowledged the authenticity of the chaghan's letter, but did not submit proofs ("Auswahl Historischer Stücke aus der Jüdischen Literatur," pp. 26–36, Berlin, 1840). At the same time Solomon Munk gave his opinion in favor of the genuineness of both letters ("Orient, Lit." i. 136; "Archives Israélites," 1848, p. 343; "Mélanges de Philosophie Juive et Arabe," p. 483, Paris, 1859). Since then most of the Jewish scholars have adopted his view, including Lebrecht, 1841; Michael Sachs, 1845; S. D. Luzzatto, 1846–50; Z. Frankel, 1852; D. Cassel and H. Jolovicz, 1853, 1859, 1872; Leop. Löw, 1855–74; Hartog, 1857; Jost, 1858; Steinschneider, 1860; Grätz, 1860 and 1871; Harkavy, beginning with 1864; Geiger, 1865; Kraushar, 1866; D. Kaufmann, 1877; and many others. A comparison of Jewish with other sources, especially with Arabic, as far as they were then known, must be credited to E. Carmoly. He began his work with the comparison of the various sources in his "Revue Orientale" (1840–44). He completed it in 1847 ("Itinéraires de la Terre Sainte," pp. 1–110, Brussels, 1847). Some useful supplements to Carmoly's works were presented by Paulus Cassel in 1848 and 1877 ("Magyarische Alterthümer," pp. 183–219, Berlin, 1848; "Der Chazarische Königsbrief aus dem 10. Jahrhundert," Berlin, 1877).

The results of these investigations were accepted by the following Christian scholars: Grigoryev, 1834; Schafarik, 1848; Lelevel, 1851–60; Vivien de San Martin, 1851; S. Solovyov, 1851–1874; Byelevski, 1864; Brun, 1866–77; Bilbasov, 1868–71; Kunik, 1874 and 1878; and many others. Still there were some writers who were misled by the earlier opinions, and on the strength of them spoke skeptically of the documents; as Jacob Goldenthal (1848); Dobryakov (1865); and even the historian Ilovaiski (1876).*

The Capital of Chazaria.

In 960 Atel (or Itil), at that time the capital of the kingdom of the Chazars, was situated about eight miles from the modern Astrakhan, on the right bank of the lower Volga, which river was also called "Atel" or "Itil." The meaning of "Atel" in the Gothic language is "father" or "little father," that of "Itil" in the Turanian language is "river"; it is difficult to decide which of these two words gave the river its name. The western part of the city was surrounded by a wall pierced by four gates, of which one led to the river, and the others to the steppes. Here was situated the king's palace, which was the only brick building in the city. According to Mas'udi, the city was divided into three parts, the palace of the chaghan standing on an island. The king had twenty-five wives, all of royal blood, and sixty concubines, all famous beauties. Each one dwelt in a separate tent and was watched by a eunuch. The authority of the chaghan was so absolute that during his absence from the capital, even his viceroy, or coregent (called "isha," or "bek," or "pech"), was powerless. The viceroy had to enter the chaghan's apartments barefooted and with the greatest reverence. He held in his right hand a chip of wood, which he lit when he saluted the chaghan, whereupon he took his seat to the right of the latter, on the throne, which was of gold. The walls of the palace were also gilded, and a golden gate ornamented the palace.

All the other dwellings of the then populous city were insignificant mud huts or felt tents. The position of the chaghan of the Chazars was evidently similar to that of the former mikados of Japan, while the bek, his military coregent, corresponded

---

*The translation of the letters given by Harkavy is from a manuscript in the St. Petersburg Public Library. The genuineness of the St. Petersburg manuscript has been demonstrated by him (against P. Cassel, Vambéry, etc.), in the "Russische Revue" and in "Meassef Niddaḥim," i., No. 10, pp. 149 *et seq.*

to the shoguns of the latter. Emperor Heraclius in 626 concluded a treaty with the chaghan of the Chazars, and Constantine Copronymus, in his description of the embassy of the Chazars (834), states that it was sent by the "*chaghan* and the pech." Ibn Faḍlan relates that the king of the Chazars was called the "great chaghan," and his deputy "chaghan-bhoa" ("bey," "beg," or "bek"). The bek led the army, administered the affairs of the country, and appeared among the people; and to him the neighboring kings paid allegiance. It will thus be seen that the extent of the powers of the bek varied with the times. When the chaghan wanted to punish any one, he said, "Go and commit suicide"—a method resembling the Japanese custom of hara-kiri.

The mother of the chaghan resided in the western part of the city, whose eastern part, called "Chazaran," was inhabited by merchants of various nationalities. The city and its environs were heavily shaded by trees. The Turkish and the Chazar languages predominated. The entourage of the chaghan, numbering 4,000 men, consisted of representatives of different nationalities. The White Chazars were renowned for their beauty; and according to Demidov, the mountaineers of the Crimea contrasted very favorably with the Nogay Tatars, because they were considerably intermixed with the Chazars and with the equally fine race of the Kumans. Besides the White Chazars, there were also Black Chazars (who were almost as dark as the Hindus), Turkish immigrants, Slavonians, Hunno-Bulgars, Jews, who lived mostly in the cities, and various Caucasian tribes, such as the Abghases, Kabardines, Ossetes, Avares, Lesghians, etc.

Trade and Commerce.

The Chazars cultivated rice, millet, fruit, grains, and the vine. They had important fisheries on the Caspian Sea, and the sturgeon constituted the main article of food. The Arabic writer Al-Maḳdisi remarks: "In Chazaria there are many sheep, and Jews, and much honey" ("Bibl. Geograph. Arabic." iii., Leyden, 1877). From the upper Volga they brought down from the Mordvines and Russians honey and valuable furs, which they exported to Africa, Spain, and France. They supplied the market of Constantinople with hides, furs, fish, Indian goods, and articles of luxury. The chaghan and his suite resided in the capital only during the winter months. From the month of Nisan (April) they led a nomadic life in the steppes, returning to the city about the Feast of Ḥanukkah (December). The estates and vineyards of the chaghan were on the island on which his palace was situated. Another city of the Chazars, Semender, between Atel and Bab al-Abwab, was surrounded by 40,000 vines. It was identical with the modern Tarku, near Petrovsk, which is now inhabited by Jews and Kumyks. The latter are supposed to be descended from the Chazars (Klaproth, "Mémoire sur les Khazars," in "Journal Asiatique," 1823, iii.).

Relations with Byzantium.

At the Byzantine court the chaghan was held in high esteem. In diplomatic correspondence with him the seal of three solidi was used, which marked him as a potentate of the first rank, above even the pope and the Carlovingian monarchs. Emperor Justinian II., after his flight from Kherson to Doros, took refuge during his exile with the chaghan, and married the chaghan's daughter Irene, who was famous for her beauty (702) (Nicephorus, "Breviarium," ed. Bonn, 1837, p. 46). Emperor Leo IV., "the Chazar" (775–780), the son of Constantine, was thus a grandson of the king of the Chazars. From his mother he inherited his mild, amiable disposition. Justinian's rival, Bardanes, likewise sought an asylum in Chazaria. Chazarian troops were among the body-guard of the Byzantine imperial court; and they fought for Leo VI. against Simeon of Bulgaria in 888.

King Joseph in his letter to Ḥasdai gives the following account of his kingdom:

Chazarian Territories.

> "The country up the river is within a four months' journey to the Orient, settled by the following nations who pay tribute to the Chazars: Burtas, Bulgar, Suvar, Arissu, Tzarmis, Ventit, Syever, and Slaviyun. Thence the boundary-line runs to Buarasm as far as the Jordjan. All the inhabitants of the seacoast that live within a month's distance pay tribute to the Chazars. To the south Semender, Bak-Tadlu, and the gates of the Bab al-Abwab are situated on the seashore. Thence the boundary-line extends to the mountains of Azur, Bak-Bagda, Sridi, Kiton, Arku, Shaula, Sagsar, Albusser, Ukusser, Kiadusser, Tzidlag, Zunikh, which are very high peaks, and to the Alans as far as the boundary of the Kassa, Kalkial, Takat, Gebul, and the Constantinian Sea. To the west, Sarkel, Samkrtz, Kertz, Sugdai, Aluss, Lambat, Bartnit, Alubika, Kut, Mankup, Budik, Alma, and Grusin—all these western localities are situated on the banks of the Constantinian (Black) Sea. Thence the boundary-line extends to the north, traversing the land of Basa, which is on the River Vaghez. Here on the plains live nomadic tribes, which extend to the frontier of the Gagries, as innumerable as the sands of the sea; and they all pay tribute to the Chazars. The king of the Chazars himself has established his residence at the mouth of the river, in order to guard its entrance and to prevent the Russians from reaching the Caspian Sea, and thus penetrating to the land of the Ishmaelites. In the same way the Chazars bar enemies from the gates of Bab al-Abwab."

Even the Russian Slavonians of Kiev had, in the ninth century, to pay as yearly tax to the Chazars a sword and the skin of a squirrel for each house.

War with Goths.

At the end of the eighth century, when the Crimean Goths rebelled against the sovereignty of the Chazars, the latter occupied the Gothic capital, Doros. The Chazars were at first repulsed by the Gothic bishop Joannes; but when he had surrendered, the Goths submitted to the rule of the Chazars (Braun, "Die Letzten Schicksale der Krimgothen," p. 14, St. Petersburg, 1890; Tomaschek, "Die Gothen in Taurien," Vienna, 1881).

In the second quarter of the ninth century, when the Chazars were often annoyed by the irruptions of the Petchenegs, Emperor Theophilus, fearing for the safety of the Byzantine trade with the neighboring nations, despatched his brother-in-law, Petron Kamateros, with materials and workmen to build for the Chazars the fortress Sarkel on the Don (834). Sarkel ("Sar-kel," the white abode; Russian, "Byelaya Vyezha") served as a military post and as a commercial depot for the north.

In the second half of the ninth century the apostle of the Slavonians, Constantine (Cyril), went to the Crimea to spread Christianity among the Chazars (Tomaschek, *l. c.* p. 25). At this time the kingdom of the Chazars stood at the height of its power, and was constantly at war with the Arabian califs and their leaders in Persia and the Caucasus. The Persian Jews hoped that the Chazars might succeed in destroying the califs' country (Harkavy, in Kohut Memorial Volume, p. 244). The high esteem in which the Chazars were held among the Jews of the Orient may be seen in the application to them—in an Arabic commentary on Isaiah ascribed by some to Saadia, and by others to Benjamin Nahawandi—of Isa. xlviii. 14: "The Lord hath loved him." "This," says the commentary, "refers to the Chazars, who will go and destroy Babel"—*i.e.*, Babylonia—a name used to designate the country of the Arabs (Harkavy, in "Ha-Maggid," 1877, p. 357).

Jewish Sympathies.

The chaghans of the Chazars, in their turn, took great interest in and protected their coreligionists, the Jews. When one of the chaghans received information (*c.* 921) that the Mohammedans had destroyed a synagogue in the land of Babung (according to Harkavy the market of Camomile in Atel is meant), he gave orders that the minaret of the mosque in his capital should be broken off, and the muezzin executed. He declared that he would have destroyed all the mosques in the country had he not been afraid that the Mohammedans would in turn destroy all the synagogues in their lands (Ibn Fadlan, in Frähn, "De Chazaris," p. 18). In the conquest of Hungary by the Magyars (889) the Chazars rendered considerable assistance. They had, however, settled in Pannonia before the arrival of the Magyars. This is evident from the names of such places as Kozar and Kis-Kozard in the Nógrad, and Great-Kozar and Ráczkozar in the Baranya district (Karl Szabó, "Magyar Akademiai Ertesitö," i. 132, cited by Vambéry in his "Ursprung der Magyaren," p. 132; compare Kohn, "A Zsidók Törtènete Magyarországon"—The History of the Jews in Hungary—i. 12 *et seq.*).

Mas'udi relates the following particulars concerning the Chazars in connection with Russian invasions of Tabaristan and neighboring countries:

War with Russians.

> "After the year 300 of the Hegira (913-914), five hundred Russian [Northmen's] ships, every one of which had a hundred men on board, came to the estuary of the Don, which opens into the Pontus, and is in communication with the river of the Chazars, the Volga. The king of the Chazars keeps a garrison on this side of the estuary with efficient, warlike equipment to exclude any other power from its passage. The king of the Chazars himself frequently takes the field against them if this garrison is too weak.
>
> "When the Russian vessels reached the fort they sent to the king of the Chazars to ask his permission to pass through his dominions, promising him half the plunder which they might take from the nations who lived on the coast of this sea. He gave them leave. They entered the country, and continuing their voyage up the River Don as far as the river of the Chazars, they went down this river past the town of Atel and entered through its mouth into the sea of the Chazars. They spread over el-Jil, ed-Dailem, Tabaristan, Aboskum, which is the name for the coast of Jordjan, the Naphtha country, and toward Aderbijan, the town of Ardobil, which is in Aderbijan, and about three days' journey from the sea. The nations on the coast had no means of repelling the Russians, although they put themselves in a state of defense; for the inhabitants of the coast of this sea are well civilized. When the Russians had secured their booty and captives, they sailed to the mouth of the river of the Chazars and sent messengers with money and spoils to the king, in conformity with the stipulations they had made. The Larissians and other Moslems in the country of the Chazars heard of the attack of the Russians, and they said to their king: 'The Russians have invaded the country of our Moslem brothers; they have shed their blood and made their wives and children captives, as they are unable to resist; permit us to oppose them.' The Moslem army, which numbered about 15,000, took the field and fought for three days. The Russians were put to the sword, many being drowned, and only 5,000 escaping. These were slain by the Burtas and by the Moslems of Targhiz. The Russians did not make a similar attempt after that year" (Mas'udi [tr. by Sprenger], in "Historical Encyc.," pp. 416-420).

Notwithstanding the assertions of Mas'udi, the Russians invaded the trans-Caucasian country in 944, but were careful in this expedition to take a different route.

This seems to have been the beginning of the downfall of the Chazar kingdom. The Russian Varangians had firmly established themselves at Kiev, while the powerful dominions of the Chazars had become dangerous to the Byzantine empire, and Constantine Porphyrogenitus, in his instructions on government written for his son, carefully enumerates the Alans, the Petchenegs, the Uzes, and the Bulgarians as the forces on which he must rely to check the influence of the Chazars.

Decline and Fall of the Chazars.

Five years after the correspondence between the king of the Chazars and Ḥasdai ibn Shaprut (965), the Russian prince Swyatoslaw made war upon the Chazars, apparently for the possession of Taurida and Taman. The Russians had already freed from the rule of the Chazars a part of the Black Bulgars, and had established a separate Russian duchy under the name of "Tmutrakan"; but in the Crimean peninsula the Chazars still had possessions, and from the Caucasian side the Russian Tmutrakan suffered from the irruption of the Kossogian and Karbardine princes, who were tributary to the chaghan of the Chazars. The fortress of Sarkel and the city of Atel were the chief obstacles to Russian predatory expeditions on the Caspian Sea. After a hard fight the Russians conquered the Chazars. Swyatoslaw destroyed Sarkel, subdued also the tribes of the Kossogians and Yass (Alans), and so strengthened the position of the Russian Tmutrakan. They destroyed the city of Bulgar, devastated the country of the Burtas, and took possession of Atel and Semender.

Four years later the Russians conquered all the Chazarian territory east of the Sea of Azov. Only the Crimean territory of the Chazars remained in their possession until 1016, when they were dispossessed by a joint expedition of Russians and Byzantines. The last of the chaghans, George Tzula, was taken prisoner; some of the Chazars took refuge in an island of the Caspian, Siahcouye; others retired to the Caucasus; while many were sent as prisoners of war to Kiev, where a Chazar community had long existed. Many intermingled in the Crimea with the local Jews; the Krimtschaki are probably their descendants—perhaps some of the Subbotniki also ("Voskhod," 1891, iv.-vi.). Some went to Hungary, but the great mass of the people remained in their native country. Many members of the Chazarian royal family emigrated to Spain. Until the thirteenth century the Crimea was known to European travelers as "Gazaria," the Italian form of "Chazaria."

H. R.

CHEBAR: Name of a Babylonian river or canal, by the side of which Ezekiel "saw visions" (Ezek. i. 1, 3; iii. 15, 23; x. 15 *et seq.*). The Hebrew "nahar" (נהר), usually rendered "river," was evidently used also for "canal" (= Babylonian "naru"; compare Ps. cxxxvii. 1, "naharoth Babel"; that is, "canals of Babylon"). In Babylonian, "Naru Kabaru" means, literally, "great canal." The river has usually been identified with the Chabor, a tributary discharging its waters into the Euphrates at Circesium; a mistake not to be justified in view of the definite statement that it was in the land of Chaldea. The stream intended is undoubtedly the Kabaru, a large navigable canal near Nippur, twice mentioned in an inscription recovered by the Babylonian Expedition of the University of Pennsylvania (see Hilprecht and Clay, "Babylonian Expedition of the University of Pennsylvania," ix. 50).

J. JR. R. W. R.

CHECHELNIK: Town in the government of Podolia, Russia, having (1898) a population of about 7,000, including 1,967 Jews. Their principal occupation is commerce; but 352 are engaged in various handicrafts, and 96 are journeymen. About 200 Jews earn a livelihood as farm-laborers; and 41 are employed in the local factories. There are no charitable organizations, and poverty among the Jewish inhabitants is general. A private school for boys with 100 pupils, and 23 ḥadarim with 367 pupils, constitute the Jewish educational institutions of Chechelnik.

H. R. S. J.

CHECHERSK: Town in the government of Mohilev, Russia, with a population (in 1898) of 2,819, including 1,692 Jews. The latter are principally engaged in commerce, but 323 follow various handicrafts. Of these 158 own shops, 60 are wage-workers, and 105 are apprentices. Shoemaking is the predominant industry, 120 persons being engaged in it. There are, besides, 81 day-laborers. The charitable organizations consist of a Gemilut Ḥasadim, a Leḥem Ebyonim and a Biḳḳur Ḥolim. Over 40 families apply yearly for aid for the Passover holidays. The educational institutions include an elementary government school with 80 pupils, 15 being Jews, and 15 ḥadarim, with 140 scholars. When the uprising under Bogdan Chmielnicki broke out in 1648, Chechersk was taken by the Cossacks, who massacred all the Jews there.

CHEDORLAOMER.—Biblical Data: Name of a king of Elam (Gen. xiv. 1), who made conquests as far west as Canaan and exercised supremacy over its southeastern part. After paying tribute to him for twelve years, the five local kings, or princes, rebelled in the thirteenth year, and in the fourteenth were assailed and reduced by Chedorlaomer, assisted by AMRAPHEL, King of Shinar; ARIOCH, King of Ellasar, and Tidal, King of Goyim.

——**Critical View:** The name "Chedorlaomer" has long been the subject of controversy, that has increased, rather than diminished, since the discovery of native Elamite and Babylonian documents. The first clue to an identification of the name is found in the fact, everywhere now regarded as established, that the name is a correct Elamite compound. Its first half, "Chedor" (= "Kudur," "servant of," or "worshiper of"), is found frequently in Elamite proper names, such as "Kudur-nanḫundi" ("naḫḫunte" in Susian or Elamite) and "Kudur-mabuk." The latter half of the name, "la'omer," (= "lagamaru"), is the name of an Elamite deity, mentioned by Assurbanipal.

Apart from these certain facts, all else is matter of controversy. Scheil believed that he had found the name on a tablet of Hammurabi in the form "Ku-du-la-uḫ-ga-mar" ("Revue Biblique," 1896, p. 600), but the name is now proved to be "Inuḫsham-mar." Pinches has found the name "Kudur-ku-ku-mal" in a tablet dating probably from the period of the Arsacidæ. In spite of the difficulty of the reading and the late date of the text, it is possible that the person intended is really the same as the Chedorlaomer of Genesis, though most scholars are opposed to this view. The tablet in question is couched in a florid, poetical style, and little material of historical value can be gleaned from it. For the present the records give only the rather negative result that from Babylonian and Elamite documents nothing definite has been learned of Chedorlaomer. It is, however, a matter of some consequence in estimating the character of the narrative in Gen. xiv. to have learned that the name of Chedorlaomer is not a fiction.

J. JR. R. W. R.

CHEESE: The curd of milk run into molds and allowed to coagulate. This article of food was known to the ancient Hebrews. Three expressions seem at least to indicate that various kinds and forms of cheese were in use: **1.** "Gebinah" (Job x. 10) denotes the ordinary article, prepared in Biblical times as it is to this day in Syria. Milk is passed through a cloth, and the curd, after being salted, is molded into disks about the size of the hand and dried in the sun. From such cheese a cool, acid drink is made by stirring it in water. **2.** "Ḥariẓe he-ḥalab" (I Sam. xvii. 18) appears to have been made of sweet milk, and to have been something like cottage-cheese. It is not certain what "shefot baḳar" (II Sam. xvii. 29) signifies. Perhaps the Masoretic reading is corrupt. If not, "cream" or "cheese" may be its meaning. **3.** "Ḥem'ah," ordinarily "cream," signifies "cheese" in Prov. xxx. 33.

In post-Biblical days the manufacture of cheese was in the hands of a distinct gild. Josephus ("B. J." v. 4, § 1), at all events, mentions "the valley of the cheese-makers," and many are the references in the Talmudic writings to the preparation of hard cheese (Shab. 96a; Tosef., Shab. x.; Yer. Shab. vii. 10a, end; Yer. Ma'as. ii. 3a; Yer. B. M. vii. 11b). Yer. Sheḳ. vii. 3c mentions a disk ("iggul") of cheese. Cheese and water are mentioned as constituting a very poor meal (Yer. M. Ḳ. iii. 83b; Yer. Ned. v. 40d, beginning).

Cheese was one of the articles included in the list of eighteen prohibitions enacted at the famous meeting in the upper chamber of Hananiah ben Hezekiah ben Garon (Shab. i. 7). which could never be revoked because they who had adopted them gave their lives for them (Yer. Shab. i. 7; 3c. The Mishnah does not enumerate them specifically; in the Gemara there are long debates concerning them; but a Baraita in the name of R. Simeon ben Yoḥai (*ib.*) furnishes the particulars. According to this war measure, Jews were forbidden to buy bread, oil, cheese, wine, vinegar, etc., from an idolater. In the Mishnah ('Ab. Zarah, ii. 5, 29a) cheese from Bet Oneiki (= Bithnica; Yer. reading ותירייקי; Tosefta has here היניקיא; according to Rapoport, "Erek Millin," Veneca in Media is referred to) is declared to be "issur" (interdicted), Rashi explaining that cheese from any other locality may be eaten. According to R. Meïr this issur carries with it the prohibition against using cheese for other purposes than eating, an opinion not accepted by the Rabbis. R. Joshua is reported as accounting for the prohibition by the fact that the makers of cheese, who were all either pagans (נוכרים) or Bithynians (see Pliny, "Historia Naturalis," xi. 97; Wiesner, in "Ben Chananja," 1866, col. 75), placed the cheese (to ripen it) in the rennet-bag of an animal that had died of disease. Another of the reasons advanced is that most of the Bithynian calves whose stomachs were used in the manufacture of cheese, were slaughtered for idolatrous rites ('Ab. Zarah 34b). Besides this, the contact of the rennet with the cheese would come under the general prohibition against mixing milk and meat.

The later religious practise has been to interdict all cheese made by non-Jews suspected of idolatry. Cheese made by Jews from the milk of animals originally destined for idolatry seems also to have been forbidden, and so was cheese of heathen manufacture, even if kept in leaves or herbs (see Shulḥan 'Aruk, Yoreh De'ah, 115, 2; "Yad," Ma'akalot Asurot, iii.). So strictly was this prohibition observed that for a long time the Jews of England used to get their cheese from Holland so as to be certain that it had been prepared according to Jewish custom.

CHELEBI, RAPHAEL JOSEPH. See RAPHAEL JOSEPH OF ALEPPO.

CHELLUS (*Χελους*; Codex Sinaiticus, *Χεσλους*; Syriac version, כלון): Place mentioned in Judith i. 9 as lying before Kadesh and the River of Egypt. Reland ("Palæstina ex Monumentis Veteribus Illustrata," p. 717) is probably correct in identifying it with the city of Elusa (according to the Targum, חלוצה), which was situated on the south of Beer-sheba, and was noted for its particular cult. Less probable is the supposition of Movers, according to which Chellus is the Biblical "Halhul," mentioned in Joshua xv. 58. The name does not occur in the O. T., but is found in the form "Alusa" in Josephus ("Ant." xiv. 1, § 4); not identical with "Allus," mentioned by Eusebius and Jerome ("Onomasticon," pp. 85, 6; 211, 3). The modern name is "Chalasa," and the place contains only ruins.
E. G. H. F. Bu.

CHELM or **CHOLM:** Town in the government of Kovno, Russia. It has a population of about 4,200, all of whom, with the exception of about 300, are Jews. Most of them are engaged in mercantile pursuits, only 549 being artisans. The town has a considerable trade in leather, wool, flax, hemp, bristles, and lumber, shipping these products to commercial centers, such as Königsberg, Riga, and Libau. About 30 Jews find employment in the local factories, corn mills, and sawmills; 80 are journeymen, draymen, and porters; 30 are engaged in gardening, cultivating a tract of 30 deciatines, which they partly own and partly hold on lease; and 8 live by dairying. In the vicinity of the town are several settlements inhabited by Jewish agriculturists.

The charitable institutions include societies for the visitation of the sick, for the relief of the poor, and for affording temporary shelter to the destitute. The only educational institutions are the ḥadarim.
H. R. S. J.

CHELM, EPHRAIM B. JOSEPH. See EPHRAIM B. JOSEPH CHELM.

CHELM, SOLOMON B. MOSES. See SOLOMON B. MOSES CHELM.

CHELOD: A name occurring in Judith i. 6b, and designating apparently the Chaldeans. In place of the rendering of the A. V., "many nations of the sons of Chelod assembled themselves to battle in the plain of Arioch in the days of Nebuchadnezzar and Arphaxad," it is perhaps better to translate—following the Greek version—"there came together many nations unto the array of the sons of Cheleul." The Syriac renders "to fight against the Chaldeans." And while it is true that Nebuchadnezzar is called "king of the Assyrians" in Judith, and not "of the Chaldeans," it is to be remembered that the term "Chaldeans" is used in the late Book of Daniel as a race-name for the Babylonians of the time of Nebuchadnezzar (see Prince, "Daniel," pp. 59–61). The text of Judith seems to imply that the "sons of Chelod" were Nebuchadnezzar's army. Although it is not impossible that "Chelod" or "Cheleul" comes from a corrupt Aramaic form denoting "Chaldeans," the whole matter is very uncertain.

The idea that Calneh is meant is quite as improbable as the theory that the word is from the Hebrew "ḥoled" (mole), and that "children of the mole" is an opprobrious term for the Syrians (Ewald, "Gesch. des Volkes Israel," iii. 543).
J. JR. J. D. P.

CHELUB: A Hebrew word meaning a cage, as in Jer. v. 27. It is also the name of two men: (1) The brother of Shuah and father of Mehir of the tribe of Judah (I Chron. iv. 11). In the Septuagint Χαλῶβ. (2) The father of David's chief gardener, Ezri (I Chron. xxvii. 26), 1014 B.C. In the Septuagint Χελούβ.

E. G. H. J. D. B.

CHELUBAI: This is probably another form of the name CALEB. It occurs in I Chron. ii. 9.

E. G. H. G. B. L.

CHEMARIM: Plural of כמר; occurs as transliteration of the Hebrew in the English translation of Zeph. i. 4, and also as the marginal reading both in A. V. and R. V. to II Kings xxiii. 5 and Hosea x. 5, where the text renders the Hebrew by "idolatrous priests" and "priests." In Zeph. i. 4 the Septuagint omits it, and this in connection with the parallelism goes far to indicate that there it is an interpolation. But Wellhausen and others have, by emending the passage in Hosea iv. 4, ועמך כמריבי, to read ועמי כבמריו (my people like its idolatrous priests), claimed for the word another passage in old Hebrew writings.

The meaning of the word is well assured to be "priests." It occurs with certainty in this acceptation in Semitic inscriptions (Halévy, in "Rev. Sém." 1896, pp. 280, 282; "C. I. S." ii. 170), and possibly as "kamiru" on the El-Amarna tablets (Bezold, "Oriental Dipolmacy," p. 92). In the Aramaic and in the Peshiṭta "kumra" stands for "priest" without tinge of evil sense. In Neo-Hebrew כומר designates a Catholic priest and monk. In the passages quoted above, the term without doubt carries a by-flavor of disrepute. It is the "idol-worshiping priest" that is so denominated. And in this sense the appellation is very frequent in the Talmud (נעשה כומר לעבודה זרה, 'Ar. 30b; יתרו היה כומר לעבודה זרה, Pesiḳ. R. 65c).

The etymology, however, is not so clear. Usually it is associated with the verb "kamar," to be black. Ḳimḥi, among others, is of this opinion, and derives the meaning "priest" from the circumstance that the "priests wore black garments." Others connect the root with the idea to be sad, "kumra" being a sad person; *i.e.*, an ascete, monk, priest. Delitzsch, in "Assyrisches Handwörterbuch," holds it to have sprung from "kamaru," to overthrow, to prostrate, the "priest" being he who prostrates himself before the idol. Perhaps the meaning of כמר in the Nif'al ("to grow hot") best explains the transition to "priest" with a by-sense of "reprobate." The old Semitic idols were without exception worshiped by intemperate (sexual) excesses. The "hot" "exciting man" was the priest *κατ' ἐξοχήν*.

E. G. H.

CHEMEROVTZY: Small town in the government of Podolia, Russia, with (in 1898) an almost exclusively Jewish population of 1,282. About 160 Jews follow various trades, but the bulk of the population is engaged in mercantile pursuits. Hair sacks form the principal article of commerce, being exported to the value of 100,000 rubles annually.

Poverty is increasing to such a degree that the scanty funds of the two existing charitable organizations can barely meet the needs of the poorer part of the community. The educational institutions include a Talmud Torah, with 10 pupils, and 10 ḥadarim (which are subdivided into 3 primary, 3 middle, and 4 higher departments), with 178 pupils.

H. R. S. J.

CHEMNITZ: Town in Saxony, with a Jewish population of 1,150. Jews first settled there in the latter half of the nineteenth century. In 1874 they organized a congregation, although on feast-days religious services had been held since 1871. The ḥebra ḳaddisha and the Jewish Women's Association were founded in 1876. On March 29, 1878, the prayer-house was consecrated; and in 1879 a cemetery was secured. The first rabbi of the congregation was Abraham Chatiner (d. 1882); he was succeeded by Jacob Mühlfelder, who is still officiating (1902). The congregation was granted corporate rights Oct. 12, 1885. In 1899 the building of a new synagogue, with a seating capacity of 685, was completed. The dedication took place March 7, 1899. In the same year the Max and Selma Bergmann's Widows and Orphans' Charitable Institution was founded. The congregation maintains a school with three teachers and two hundred pupils.

Chemnitz is the seat of the Saxonia Lodge XLIV., 497 I. O. B. B., established May 27, 1899.

E. C. S. So.

CHEMOSH: The national god of the Moabites. He became angry with his people and permitted them to become the vassals of Israel; his anger passed, he commanded Mesha to fight against Israel, and Moabitish independence was reestablished (Moabite Stone, lines 5, 9, 14 *et seq.*). A king in the days of Sennacherib was called "Chemoshnadab" ("K. B." ii. 90 *et seq.*; see JEHONADAB). Chemosh was a god developed out of the primitive Semitic mother-goddess Athtar, whose name he bears (Moabite Stone, line 17; compare Barton, "Semitic Origins," iv.). Peake wrongly holds that Ashtar-Chemosh was a deity distinct from Chemosh, while Moore and Bäthgen ("Beiträge zur Semitischen Religionsgeschichte," p. 14) regard "Ashtar" in this name as equivalent to "Astarte," who they believe was worshiped in the temple of Chemosh. "Ashtar" is more probably masculine here, as in South Arabia, and another name for Chemosh, the compound "Ashtar-Chemosh" being formed like "YHWH-Elohim" or "YHWH-Sebaoth." There seems to be no good reason for denying that Chemosh was a "baal," and that the names "Baal-maon" (Moabite Stone, line 30) and "Baal-peor" (Num. xxv. 3; Hosea ix. 10) apply to what was practically the same god as Chemosh. The way Mesha brings Baal-maon into his inscription identifies the latter with Chemosh; for when Baal-maon is pleased Chemosh speaks to Mesha (Moabite Stone, lines 30, 31). Whatever differences of conception may have attached to the god at different shrines, there is no adequate reason for doubting the substantial identity of the gods to whom these various names were applied. Hosea ix. 10 is proof that at some period (according to Wellhausen, at the time of the prophet himself) the impure cult of the Semitic goddess was practised at Baal-peor (compare Wellhausen, "Kleine Propheten"; Nowack's Commentary; and G. A. Smith, "Twelve Prophets," *ad loc.*). Chemosh, therefore, was in general a deity of the same nature as Baal. On critical occasions a human sacrifice was considered necessary to secure his favor (compare II Kings iii. 27), and when deliverance came, a sanctuary might be built to him (Moabite Stone, line 3). An ancient poem, twice quoted in the Old Testament (Num. xxi. 27–30; Jer. xlviii. 45, 46), regards the Moabites as the children of Chemosh, and also calls them "the people of Chemosh."

The etymology of "Chemosh" is unknown. The name of the father of Mesha, Chemosh-melek ("Chemosh is Malik," or "Chemosh is king"; compare Moabite Stone, line 1), indicates the possibility that Chemosh and Malik (or Moloch) were one and the same deity. Judges xi. 24 has been thought by some to be a proof of this, since it speaks of Chemosh as the god of the Ammonites, while Moloch is elsewhere their god (compare I Kings xi. 7, 33). Several critics rightly regard the statement in Judges as a mistake; but such an error was not unnatural, since both Chemosh and Moloch were developed, in different environments, from the same primitive divinity, and possessed many of the same epithets.

Solomon is said to have built a sanctuary to Chemosh on the Mount of Olives (I Kings xi. 7, 33), which was maintained till the reform of Josiah (II Kings xxiii. 13). This movement by Solomon was no doubt to some extent a political one, but it made the worship of Chemosh a part of the religious life of Israel for nearly 400 years.

J. JR. G. A. B.

CHENAANAH: Feminine form of "Canaan"; the name of two men: (1) The fourth-named of the seven sons of Bilham, son of Jediael, of the tribe of Benjamin, a leading warrior in the time of David (I Chron. vii. 10). (2) The father of the false prophet Zedekiah, who encouraged Ahab against Micaiah (I Kings xxii. 11, 24; II Chron. xviii. 10, 23).

Fürst ("Bibl. Jud.") attributes the existence of such names as this and "Tarshish" and "Cush" among the Benjamites to their intermarriages with the earlier races. The hostilities which the Benjamites had to endure during the civil war (see Judges xxi.) might have compelled them to establish alliances with their Phenician neighbors.

E. G. H. J. D. B.

CHENANIAH (literally, "established by God," I Chron. xv. 27; also found in the longer form "Chenanyahu," I Chron. xv. 22): A Levite of the family of Izharites (I Chron. xxvi. 29) and chief of the Temple singers who conducted the musical service when the Ark was removed from the house of Obed-edom to Jerusalem (I Chron. xv. 27).

E. G. H. J. D. B.

CHENSTOCHOV (Polish, **Czenstochowa**): City in the government of Petrokow, Russian Poland, the Jewish inhabitants of which in 1897 numbered 12,500 in a total population of 45,130. Most of the Jews are merchants, only 2,155 being artisans. Of the latter, 801 are tailors and 228 are shoemakers. Seven estates in the environs of Chenstochov are owned by Jews. In 1898 Jews owned 57 factories with 397 operatives.

Originally the Jewish factories of Chenstochov mostly manufactured medallions with pictures of the Virgin, and other articles of Christian worship, for the numerous pilgrims visiting the city; but when this industry was forbidden to the Jews, they turned to the manufacturing of toys, in which fifteen factories are now occupied, 80 per cent of the factory laborers being Jews.

After the establishment of the liquor monopoly by the Russian government eighty families remained without occupation. In 1898 about 460 Jewish families received fuel from charitable institutions. Poverty is increasing among the Jewish population, as may be seen from the following figures of families applying for help at Passover: 553 in 1894; 581 in 1895; 607 in 1896; 639 in 1897; 708 in 1898. Taking the average of five for a family, it appears that 3,500 persons, or 29 per cent of the Jewish population, have applied for charity, and in relieving distress the efforts of about ten charitable institutions are taxed to the utmost.

The Jewish children receive their education in the general schools as well as in special Jewish schools. Among the latter are a Talmud Torah with an industrial department, and 29 ḥadarim with 531 male and 90 female pupils.

In September, 1902, Chenstochov was the scene of an uprising on the part of the Jews, which, however, was soon suppressed by the authorities.

H. R. S. J.

CHEPHIRAH: City belonging originally to the Gibeonites (Josh. ix. 17), but which, in the apportionment of the land, fell to the lot of Benjamin (Josh. xviii. 26). Men of this city returned with Zerubbabel from the captivity in Babylon (Ezra ii. 25; Neh. vii. 29; in both instances the town is mentioned in connection with Kirjath-jearim [= arim] and Beeroth). In I Esd. v. 19 the place is called "Caphira." It is, perhaps, to be identified with the ruins now called "Kefire." The word "Kephirim" of Neh. vi. 2 may refer to Chephirah (F. Buhl, "Geographie des Alten Palästina," p. 169).

E. G. H. G. B. L.

CHERAN: A name occurring in the genealogy of Seir the Horite (Gen. xxxvi. 26), and in the corresponding list in I Chron. i. 41. Dillmann (commentary on Gen. xxxvi. 26) suggests that it comes from "kar" (a lamb). The names in the lists are clan-names; and a number of the clans have animal designations, such as Dishon, Ayyah, Shobal.

E. C. G. B. L.

CHEREI: A small town in the government of Mohilev, Russia, with (1898) about 3,000 inhabitants, of whom 1,300 are Jews. The principal occupations of the latter are commerce and handicrafts. The total number of artisans is 298, 189 being shop-owners, 35 wage-workers, and 74 apprentices. The predominating trades are shoemaking and tailoring, in which altogether 146 persons are engaged. About 61 Jews earn a livelihood as journeymen. There are, besides, 4 Jewish families occupied in agricultural pursuits, 8 families engaged in gardening, and 24 families who keep dairies. There are 20 ḥadarim, with 120 scholars; to the elementary school of the town, Jewish children are admitted only upon payment of a fee, while others are granted free tuition.

H. R. S. J.

CHERETHITES or **CHERETHIM.—Biblical Data:** Probably the name of a part of the Philistines; usually, however, designating the whole nation, as in Zeph. ii. 5, where "the nation of the Cherethites" evidently means the Philistines in general. Similarly, Ezek. xxv. 16 and xxx. 5 belong here. A. V. translates "the children of the land [that is in] league." But the true reading after the Ethiopic and partly after the LXX. (which omits the word "land") is: "the children of the Kerethi" (compare Cornill's "Ezekiel"). In Ezek. xxx. 5, where "the children of the land that is in league" are mentioned among the allies of Egypt, the whole of the Philistines must be meant. For the original special meaning compare the earliest passage, I Sam. xxx. 14, which mentions the Cherethites as living in a strip in the southwest of Palestine (the Negeb), near the territory of Judah and of Ziklag. This strip is called the "South" (Negeb) of the Cherethites. From verse 16, where the same district is designated as "the land of the Philistines," it may be inferred that the Cherethites belonged to the Philistines, or that the two terms were used promiscuously.

The name is also found in the frequent phrase "Cherethites and Pelethites." By this phrase was designated the *corps d'élite* and body-guard (thus correctly, Josephus, "Ant." vii. 5, § 4) of David; compare II Sam. viii. 18 (= I Chron. xviii. 17), xv. 18 (with "the Gittites"; *i.e.*, men from Gath), xx. 7 (among "all the mighty men"), *ib.* verse 23 (Ket., הכרתים); I Kings i. 38, 44 (escorting Solomon to his coronation). If the Carites and Cherethites (II Kings xi. 4) are identical, the same troop was still in existence in the time of Athaliah (see CARITES). It is evident, especially from II Sam. xv. 18, that this troop consisted of mercenaries recruited from the warlike Philistines. They are different from the special guards (Hebrew, "runners"; mentioned in Saul's time, I Sam. xxii. 17) of the kings (I Kings xiv. 27 = II Chron. xii. 10); compare "Carites" in II Kings xi. 4, R. V. The threat against "those that leap over the threshold" at the king's court (Zeph. i. 9) is usually explained as referring to soldiers and officials of Philistine blood (compare on their superstitious custom I Sam. v. 5), but see the commentaries for different explanations of that passage. "Pelethi" = "Pelethite" is now generally considered as a shortened form of "Pelishti" = "Philistine," adapted to the Hebrew (according to Ewald). This seems to establish a difference between the Cherethites and the majority of the Philistines. The Septuagint, in the Prophets, translates "Cherethite" by "Cretans," and the tradition is found that the "Palestinians" (Stephen of Byzanz; Tacitus, "Historiæ," v. 2, erroneously of the Jews) had come from Crete. This tradition seems to have sprung from the Septuagint; however, see CAPHTOR on the question of the origin of the Philistines from the "island [of Caphtor?]" and the frequent identification of "Caphtor" with "Crete." Less probable is the explanation of the two names of nations, "Cherethites" and "Pelethites" as appellative nouns; for instance, by Gesenius, "executioners and runners"; or by Targum (Pesh., some Greek MSS.), "bowmen and slingers"; by the Hexapla in Zephaniah, "corrupted people," for "Cherethites"; by Halévy, "the exiles excluded from their nation," etc.

BIBLIOGRAPHY: W. R. Smith, *The Old Testament in the Jewish Church*, ii. 262; Driver, *Notes on the Hebrew Text of the Books of Samuel*, p. 172; Kittel, *Hist. of the Hebr.* ii. 153, No. 164.

E. G. H. W. M. M.

——**In Rabbinical Literature:** The Haggadah, which always endeavors to idealize the ancient history of Israel, takes the כרתי ופלתי to be not David's heathen body-guard, but a designation for the Great Sanhedrin, to which a very early date is thus ascribed. Hence "kereti" (כרתי) is interpreted as derived from כרת ("to cut off") in the sense of גזר ("to cut off," "to decree"), the men of the Sanhedrin rendering legal decisions. Similarly, פלתי, from פלא, meaning "the elect," or those eminent through their doctrines (Ber. 4a, above; Sanh. 16b, above; on the correct reading compare Rabbinowicz, "Diḳduḳe Soferim," to the passage and Midr. Teh. iii.). Pseudo-Jerome, on II Sam. xx. 23, follows the Jewish tradition, according to which "kereti and peleti" means literally "accidentes et vivificantes," and is used to designate the "congregatio Dei." The Targum's rendering of the passage, "archers and slingers," is adopted by Ḳimḥi also, who adds that there were two families so called, who excelled in the use of those weapons of war (commentary on II Sam. xv. 18). L. G.

CHERIKOV: Town in the government of Mohilev, Russia. According to the last census (1897) it has 5,250 inhabitants, including 2,700 Jews. Most of the latter are small tradesmen; 12 are engaged in horticulture, and 10 in gardening. In the whole district of Cherikov 60 Jewish families follow agricultural pursuits. Out of 255 artisans (consisting of 155 shop-owners, 10 wage-workers, and 90 apprentices) 115 are tailors. There are, besides, 25 journeymen, and 8 Jews who find employment in the local Dutch tile-factory. Two associations lend money to the poor without interest. The educational institutions consist of a government elementary Jewish school with 73 pupils, one Talmud Torah with 70 pupils, and 20 ḥadarim.

In 1648 Ladislaus, King of Poland, granted the Jews of Cherikov a charter by which they were allowed to deal in liquors, grain, and other articles of trade, to acquire immovable property, and to have their own synagogue and cemetery, which should be exempted from taxation. By this charter the Jews of Cherikov were placed on an equal footing with the other Jewish communities of the grand duchy of Lithuania. In the same year (1648) the Jews of Cherikov were massacred by the Cossacks.

H. R. S. J.

CHERITH: The name of a brook or wadi near the Jordan, where Elijah, in the time of drought and famine, was told to hide himself, and there find water and food (I Kings xvii. 3, 5). When the brook dried up he was sent to Zarephath. In the verses cited from Kings the expression "before Jordan" (literally, "by the face of the Jordan") certainly points to the eastern side; hence Robinson's proposed identification with the Wadi al-Ḳalt, apart from philological difficulties, is impossible. Cheyne proposes Reḥoboth, which he explains as worn down into "Cherith," and further suggests that "Egypt" be substituted for "Jordan." Buhl ("Geog. des Alten Palästina," p. 121) argues for the identification of Cherith with Wadi al-Ḥimar, on the supposition that Tishbi is Khirbat Istib. None of the modern attempts at identification is satisfactory.

E. G. H. G. B. L.

CHERKASSY (Polish, **Czerkasy**): District town in the government of Kiev, Russia, situated on the right bank of the Dnieper, about 126 miles from Kiev.

The date of the establishment of the Jewish community of Cherkassy is not known. Being the chief town of the Cossacks since the beginning of the sixteenth century, including the time of Chmielnicki (1648–52), it may be surmised that only a few Jews, leaseholders, lived there. The census of 1765 gives only one Jew in Cherkassy, this one being "the farmer of taxes, who paid 10,000 florins for the general taxes and 400 florins for the saltpeter-factory." In 1789, of 561 houses, 14 belonged to Jews; and in 1797, after the annexation of Cherkassy by Russia (1795), the town had 783 Jewish inhabitants.

In 1870 there were 20,492 Jews in the district and town; which figures, by 1897, had increased to 29,982, or 9.75 per cent of the total population; and in 1898, out of a total population of 26.165 in the town alone, 5,884 were Jews. The majority of the latter are small traders, artisans, and day-laborers, while some are employed in the sugar- and tobacco-factories, and in the flour-mills. A great part of the Jews belong to the Ḥasidim, and are followers of the local "ẓaddiḳ," called by them the "gute Rov" (good rabbi) of Cherkassy.

H. R. M. R.

CHERNEVTZY: Town in the government of Podolia, Russia; it has (1898) a population of about 15,000, including about 2,000 Jews. Of the latter, 267 are artisans, but most of them earn a livelihood as small tradesmen. In the local sugar-refinery, which employs 400 men, only 14 Jews find work. There are, besides, 17 journeymen and 20 agricultural laborers. The number of Jewish poor in Chernevtzy is very considerable. In 1898 there were 60 families who received fuel from charitable organizations.

H. R. S. J.

CHERNIGOV: A city in Russia; capital of the government of the same name. The Jewish settlement at Chernigov is one of the oldest of the Ukraine. In the thirteenth century a rabbi, Isaac (Itze) of Chernigov, is mentioned, who spoke the Russian language. (Harkavy, "Yevrei i Slavyanskie Yazyky," p. 11). In 1623 King Ladislaus banished the Jews from the "voyevodstvos" (military districts) of Chernigov and Syeversk. The cause was probably jealousy on the part of the Christian merchants and tradesmen; the edict declaring that the Jews caused great damage to their business. However, soon after 1623 the Jews again came to Chernigov. In 1648, at the time of Chmielnicki's revolt, the whole Jewish population of Chernigov was exterminated by the Cossacks.

In the later histories of Chernigov indications are found of the hostility of the people toward the Jews. Thus, in 1665 the noblemen of Chernigov sent an embassy to the Council of Warsaw, mentioning in their instructions that justice called for the expulsion of the dishonest Jews from the country, or at least for the imposition of a Jewish poll-tax.

According to the census of 1897 there were in the town of Chernigov about 11,000 Jews in a total population of 27,006. The chief occupations of the Jews are industrial and commercial. In the neighborhood many tobacco-plantations and fruit-gardens are owned by Jews. There are in Chernigov 1,321 Jewish artisans, including 404 tailors and seamstresses, but the demand for artisan labor is limited to the town. There are 69 Jewish day-laborers, almost exclusively teamsters. But few are engaged in the factories.

The small charitable institutions of Chernigov were combined, in 1899, in the Committee of Relief for the Jewish Poor; but the different trade groups of the Jewish population have their own charitable institutions also. Thus the bakers, storekeepers, teamsters, tailors, and "melammedim" (teachers of Hebrew) have separate funds from which loans without interest, and, in cases of necessity, gratuitous help, are obtained.

The Jewish educational establishments include a Talmud Torah (115 pupils); a primary school for boys (40 pupils); a private school for girls (57 pupils); and there are 45 ḥadarim, where about 450 boys and 70 girls are taught Hebrew.

H. R. S. J.

CHERNIGOV: A government of Little Russia (Ukraine), with a Jewish population (1897) of 114,630 in a total population of 2,298,834, or nearly 5 per cent. In 1881 the Jewish inhabitants formed only 2.5 per cent of the total. By districts, the Jews in the government of Chernigov are distributed as follows: Chernigov 12,006 in a total population of 162,036 =7.41 per cent (in 1881 only 4.2 per cent); Borzna 3,542 in 146,730 =2.41 per cent (in 1881 1.6 per cent); Glukhov 5,493 in 142,814 =3.85 per cent (in 1881 about 5.1 per cent); Gorodnya 8,913 in 153,020 =5.82 per cent (in 1881 only 1.6 per cent); Kozeletz 4,741 in 135,101 =3.51 per cent (in 1881 1.5 per cent); Konotop 7,091 in 156,502 = 4.53 per cent (in 1881 1.7 per cent); Krolevetz 3,896 in 131,009 =2.97 per cent (in 1881 1.5 per cent); Mglin 10,014 in 139,357 =7.18 per cent (in 1881 3.2 per cent); Novgorod Syeversk 6,328 in 146,394 =4.32 per cent (in 1881 2.5 per cent); Novozybkov 8,852 in 164,789 =5.37 per cent (in 1881 1.0 per cent); Nyezhin 9,987 in 168,883 =5.91 per cent (in 1881 3.3 per cent); Oster 6,188 in 150,556 =4.11 per cent (in 1881 2.3 per cent); Sosnitza 7,525 in

170,268 =4.41 per cent (in 1881 2.3 per cent); Starodub 9,975 in 144,704 =6.89 per cent (in 1881 2.8 per cent); Surazh 10,078 in 188,596 = 5.4 per cent (in 1881 2.9 per cent).

The history of the Jews in the government will be treated under LITTLE RUSSIA, and under the respective cities. M. R.

Comparative statistics of population in the cities, towns, and villages in the government of Chernigov are given below:

H. R. S. J.

CHERNOBYL: Town in the government of Kiev, Russia; it has (1898) a population of 10,759, including 7,189 Jews. Of the latter, 651 are artisans, of whom 419 own shops 192 are wage-workers, and 40 are apprentices. The predominating trade is tailoring, in which 165 persons are engaged; 167 Jews are journeymen, and 120 are employed in a paper-mill. Several ḥadarim, and a Talmud Torah with 45 pupils, are the only educational institutions.

Bobrik and Bobry, situated at a distance of 60 versts (40 English miles) from Chernobyl, are Jewish colonies, in which 47 families cultivate 618 deciatines of land. S. J.

CHERUB (כרוב; plural, **Cherubim**).—**Biblical Data:** The name of a winged being mentioned frequently in the Bible. The prophet Ezekiel describes the cherubim as a tetrad of living creatures, each having four faces—of a lion, an ox, an eagle, and a man—the stature and hands of a man, the feet of a calf, and four wings. Two of the wings extended upward, meeting above and sustaining the throne of God; while the other two stretched downward and covered the creatures themselves. They never turned, but went "straight forward" as the wheels of the cherubic chariot, and they were full of eyes "like burning coals of fire" (Ezek. i. 5-28, ix. 3, x., xi. 22). Ezek. xxviii. 13-16 is manifestly a true account of a popular tradition, distinct from that in Gen. ii., iii.

In the Temple.

Ezek. xli. 18-25 and other passages show that the number and form of the cherubim vary in different representations. The books of Kings and Chronicles contain, in the main, a description of the cherubim of Solomon's Temple. The Ark was placed between the two colossal figures of cherubim, carved in olive-wood and plated with gold, ten cubits high, standing in the adytum (דביר) and facing the door. The distance between the points of their outstretched wings was ten cubits; the right wing of the one touching the point of the left wing of the other, while the outer wings extended to the walls (I Kings vi. 23-28; viii. 6, 7; II Chron. iii. 10-13, v. 7-8). II Chron. iii. 14 states that they were woven in the veil of the adytum; and in Ex. xxvi. 1, 31 and xxxvi. 8, 35 they are also referred to as wrought into the curtains and veil of the Temple. In Ex. xxv. 18-22, xxxvii. 7-9; Num. vii. 89 mention is made by the priestly writer of two cherubim of solid gold, upon the golden slab of the כפרת, facing each other. Their outstretched wings came together above, constituting a throne on which the glory of YHWH appeared, and from whence He spoke.

In the early days of Israel's history the cherubim became the divine chariot, the bearer of the throne of YHWH in its progress through the worlds (I Sam. iv. 4; II Sam. vi. 2; I Chron. xiii. 6). The cherubim of the Ark of the Covenant seem to be meant here, and this is probably also the case in II Kings xix. 15; Isa. xxxvii. 16; Ps. lxxx. 1, xcix. 1 (see Rahlfs, "עני und ענו in den Psalmen," 1892, pp. 36 *et seq.*). At an earlier period the cherubim were the living chariot of the theophanic God, possibly identical with the storm-winds (Ps. xviii. 11; II Sam. xxii. 11: "And he rode upon a cherub and did fly: and he was seen upon the wings of the wind"). Here is a conception similar to that of the Babylonians, where the cherubim originally symbolized the winds.

E. G. H. W. M.-A.—J. F. Mc C.

——**In Rabbinical and Apocryphal Literature:** The cherubim placed by God at the entrance of paradise (Gen. iii. 24) were angels created on the third day, and therefore they had no definite shape; appearing either as men or women, or as spirits or angelic beings (Gen. R. xxi., end). According to another authority, the cherubim were the first objects created in the universe (Tanna debe Eliyahu R., i. beginning); while in the Slavonic Book of Enoch they are said to dwell in both the sixth and seventh heavens. The passage referring to the sixth heaven is as follows (xix. 6): "In the midst of them [the archangels] are seven phenixes, and seven cherubim, and seven six-winged creatures [seraphim], being as one voice and singing with one voice. It is not possible to describe their singing; and they rejoice before the Lord at His footstool." Enoch then (xx. 1) describes how he saw in the seventh heaven "cherubim and seraphim and the watchfulness of many eyes" (= ofannim). The Ethiopian Book of Enoch also mentions these three classes of angels as those that never sleep, but always watch the throne of God (lxx. 7; compare also lxi. 10). In another passage of this book Gabriel is designated as the archangel who is set over the serpents, the garden (= paradise), and the cherubim (xx. 7).

In the passages of the Talmud that describe the heavens and their inhabitants, the seraphim, ofannim, and ḥayyot are mentioned, but not the cherubim (Ḥag. 12b); and the ancient liturgy also mentions only these three classes.

The following sentence of the Midrash is characteristic: "When a man sleeps, the body tells to the neshamah ["the soul"] what it has done during the day; the neshamah then reports it to the nefesh ["the spirit"], the nefesh to the angel, the angel to the cherub, and the cherub to the seraph, who then brings it before God [Lev. R. xxii.; Eccl. R. x. 20]. When Pharaoh pursued Israel at the Red Sea, God took a cherub from the wheels of His throne and flew to the spot—for He inspects the heavenly worlds while sitting on a cherub. The cherub, however, is דבר שאין בו ממש ["something not material"], and is carried by God, not vice versa" (Midr. Teh. xviii. 15; Cant. R. i. 9). Maimonides ("Yad," Yesode ha-Torah, ii. 7) enumerates ten classes of angels, the cherubim being the ninth; while the cabalistic "Masseket Aẓilut" designates the cherubim as the third class of angels, with a leader named Kerubiel (כרוביאל; Jellinek, "Auswahl Kabbalistischer Mystik," p. 3). In the Zohar, where also ten classes of angels are enumerated, the cherubim are not mentioned as a special class (compare Zohar, Ex. Bo, 43a).

The Cherubim of the Temple.

As regards the representations of the cherubim in the Temple, Josephus holds that no one knows or can even guess what form they had ("Ant." viii. 3, § 3); Philo thinks they represented the two supreme attributes of God, goodness and authority ("De Cherubim," x.; "De Vita Moysis," iii. 8; ed. Mangey, ii. 150): he says, however, that some authorities took the cherubim to represent the two hemispheres ("De Cherubim," vii.). The rabbinical sources evince an archeological rather than a theological interest in the cherubim. Onkelos, the proselyte (beginning of the second century C.E.), says that "the cherubim had their heads bent backward, like a pupil who is going away from his master" (B. B. 99a): this is intended to explain the somewhat ambiguous verse referring to the cherubim in the Tabernacle (Ex. xxv. 20), meaning that the faces of the cherubim were bent downward toward the cover (כפרת) of the Ark, but still with their eyes turned toward each other. Onkelos' view is also given in the Targ. O. on the passage, while the Targ. Yer. thinks that the faces of both the opposite cherubim were turned downward toward the cover (compare Friedmann, "Onkelos und Akylas," pp. 98–99).

Concerning the form of these cherubim, an authority of the end of the third century says that they had the form of youths (כרוב, derived from כ = "like," and רוב = "youth"; Suk. 5b; Ḥag. 13b). The last-named passage says that the cherubim which Ezekiel saw in his vision (Ezek. x. 1) also had this form, adding that the four creatures at the throne of God were originally man, lion, bull, and eagle, but that Ezekiel implored God to take a cherub instead of a bull; Ezekiel desiring that God should not always look upon a bull, which would continually remind Him of Israel's worship of that animal. It seems that the Talmud had noticed that Ezekiel's conception of the heavenly creatures differed from the traditional one.

Communion of Israel with God.

It is recorded as a miracle that when Israel was worshiping the Lord, the cherubim lovingly turned their faces toward each other (B. B. *l.c.*), and even embraced like a loving couple. On these occasions the curtain was raised so that the Jews who had come on pilgrimage might convince themselves how much God loved them (Yoma 54a). At the destruction of the Temple the heathen found the cherubim in this posture; and they mocked the Jews because of their obscene worship, thinking the cherubim to be the objects of it (Yoma 54b). This conception of the cherubim, as representing the union of Israel with God, has been further developed by the Cabala, the cherubim being taken to represent the mysterious union of the earthly with the heavenly (see Baḥya b. Asher to Ex. xxv. 20; Zohar, Terumah, ii. 176a). The symbolical interpretation of the Alexandrians, mentioned above, is also found in rabbinical sources. Midr. Tadshe (ed. Epstein, p. 15), like Philo, takes the cherubim to symbolize the two names of God, YHWH and Elohim, by which rabbinical theology (see, for example, Sifre, Deut. 26) designates the two attributes רחמים ("goodness") and דין ("justice"). Another Midrash (Num. R. iv.) compares the cherubim with heaven and earth, as do the Alexandrians mentioned by Philo ("De Cherubim," vii.). Maimonides says ("Moreh Nebukim," iii. 45) that the figures of the cherubim were placed in the sanctuary only to preserve among the people the belief in angels, there being two in order that the people might not be led to believe that they were the image of God. There were no cherubim in the Temple of Herod; but according to some authorities, its walls were painted with figures of cherubim (Yoma 54a). L. G.

——**Critical View:** Primitive Hebrew tradition must have conceived of the cherubim as guardians of the Garden of Eden (Gen. iii. 34; see also Ezek. xxviii. 14). Back of this lies the primitive Semitic belief in beings of superhuman power and devoid of human feelings, whose duty it was to represent the gods, and as guardians of their sanctuaries to repel intruders. Compare the account in the Nimrod-Epos, Tablet IX.; and see Kosters, in "Theolog. Tijdschrift," 1874, pp. 445 *et seq.*

From the brief and meager Biblical descriptions of the statues representing the cherubim, it is impossible to judge of their real form. They were hardly sphinx-shaped; for all the representations of the winged sphinx have the wings bent backward rather than extended toward the sides. Whether the cherub was a union of man and some animal form, such as the hawk-headed man so frequently found on Egyptian monuments and also at Nineveh, or only a winged man, as the representation of the palace guardian at Khorsabad, is not certain. Such figures, however, are very common in Babylonian decorations; and winged men and animals are found in ancient sculptures throughout Syria. Cheyne con-

FORMS OF CHERUBIM.

siders the cherubim of Hittite origin, the originality of the Hittites in the use of animal forms being well known.

Probable Source.

The Hittite griffin appears almost always not as a fierce beast of prey, but seated in calm dignity, like an irresistible guardian of holy things. The Phenicians, and probably the Canaanites, and through them the Israelites, attached greater importance to the cherub. The origin of the cherub myth antedates history, and points to the time when primitive man began to shape his ideas of supernatural powers by mystic forms, especially by the combination of parts of the two strongest animals of land and air—the lion and the eagle. Many are the grotesque figures found thus far, survivals of ancient Oriental sculpture.

Thus, in Babylonia there is the winged sphinx having a king's head, a lion's body, and an eagle's wings (see B. Teloni, "Zeitschrift für Assyriologie," vi. 124–140; text published by Bezold, *ib.* ix. 114–119; and Puchstein's comment, *ib.* 410–421). This was adopted largely in Phenicia. The wings, because of their artistic beauty, soon became the most prominent part, and animals of various kinds were adorned with wings; consequently, wings were bestowed also upon man. The next step, from cherubim to the angels of the Old Testament as well as of the New, was inevitable.

Etymology.

Following Lenormant's suggestions, Friedrich Delitzsch connected the Hebrew כרוב with the Assyrian "kirubu" = "shedu" (the name of the winged bull). Against this combination see Feuchtwang, in "Zeitschrift für Assyriologie," etc., i. 68 *et seq.*; Teloni, *ib.* vi. 124 *et seq.*; Budge, in "The Expositor," April and May, 1885. Later on, Delitzsch ("Assyrisches Handwörterbuch," p. 352) connected it with the Assyrian "karubu" (great, mighty); so, also, Karppe, in "Journal Asiatique," July–Aug., 1897, pp. 91–93. Haupt, in Toy, "Ezekiel" ("S. B. O. T."), Hebrew text, p. 56, line 11, says: "The name כרוב may be Babylonian; it does not mean 'powerful,' however, but 'propitious' (synonym 'damḳu')." For the original conception of the Babylonian cherubim see Haupt's notes on the English translation of Ezekiel, pp. 181–184 ("S. B. O. T."), and the abstract of Haupt's paper on "Cherubim and Seraphim," in the "Bulletins of the Twelfth International Congress of Orientalists," No. 18, p. 9, Rome, 1899. See also Haupt, in Paterson, "Numbers" ("S. B. O. T."), p. 46: "The stem of כרוב is the Assyrian 'karâbu' (= be propitious, bless), which is nothing but a transposition of the Hebrew ברך." Dillmann, Duff, and others still favor the connection with γρύψ ("gryphus" = the Hindu "Garuda.")

CHESALON: A border town of Judah (Josh. xv. 10), also known as "Mount Jearim." It lies in a directly west of Jerusalem, at a distance of twelve miles, and is the modern Kesla (Buhl, "Geographie des Alten Palästina," pp. 91, 166).

E. G. H. G. B. L.

CHESED: A son of Nahor and Milcah (Gen. xxii. 22). From the name the term "Casdim" (Chaldeans) is clearly derived.

E. G. H. G. B. L.

CHESS: A game of skill, usually played by two persons, with sixteen pieces each, on a board divided into sixty-four squares alternately light and dark. Authoritative opinions agree that chess, under the Sanskrit name of "chaturanga" (= the four "angas" or members of an army), was known earliest to the Hindus—possibly as early as the sixth century of the present era. From India the game was carried into Persia, its name being changed into "shatranj." Mas'udi (947) speaks of chess as an Indian invention sent by an Indian king to Chosroes, King of Persia (531–579), the sixteen pieces of one side being of emerald, and those of the other being of ruby. From Persia the game passed into Arabia, and thence to central and western Europe; but how or when has not been determined.

When the Jews first became acquainted with chess is not known. It has been supposed that the game was referred to in the Talmud; but the consensus of opinion now seems to be that certain games mentioned therein, which some have identified with chess, were not chess at all, but were played with dice, under the designations פסיפס or נרדשיר, which Rashi ('Er. 61a) interprets as "chess." Nathan ben Jehiel of Rome (1103), however, in his "'Aruk," distinctly translates the word נרדשיר, supposed by some to indicate chess, by the Arabic "al-nard," which he renders by the Italian "dadi" (= dice). פסיפס is clearly derived from the Greek ψῆφος, and refers to some game with pebbles or dice (Yer. R. H. i. 57c). The matter has been fully discussed by Franz Delitzsch ("Ueber das Schach und die Damit Verwandten Spiele in den Talmuden," in "Orient, Lit." Jan., 1840, pp. 42–53), who concludes that, as the Talmud was completed in the fifth century, chess could not have been referred to therein, inasmuch as the Persians, from whom the Jews would have learned the game, did not know it themselves until the close of that century (see also L. Löw, "Lebensalter," p. 324).

Ninth to Thirteenth Century.

Steinschneider ("Schach bei den Juden," p. 33) conjectures that the first Jew to recommend chess was the convert Ali, son of "Rabbi" Saul of Taberistan, teacher of the physician Razi (ninth century), who considered the game a remedy for low spirits and dejected mental condition. By the eleventh century it was commonly played in Spain. After Rashi, the first European to mention chess was Moses Sephardi, born in Spain in 1062 and baptized at the age of forty-four as Petrus Alfonsi, who in his "Disciplina Clericalis" includes chess in the seven accomplishments ("probitates") of a knight. In Italy it was known at the same period, having been probably derived

from the East through Byzantium. In the twelfth century chess had spread to France, Germany, and England, and by 1200 had become a favorite gambling game throughout Europe; to such an extent, indeed, that it was prohibited by the Council of Paris, 1212, and afterward by Louis IX. At the same epoch the "Sefer Ḥasidim" (Book of the Pious), § 400, strongly recommended the game.

Notwithstanding the clerical prohibition, there is a legend to the effect that the pope himself played chess with a Jew: it occurs in "Das Leben Elchanans oder Elchonons," pp. 27, 46, Frankfort-on-the-Main, 1753: "This pope is the best one they ever had, since he can not get along without Jews, with whom he plays chess. . . . Rabbi Simeon is a great master of chess; but the pope mates him." The pope is even recognized by R. Simeon as his son through a particular move which he had taught him. This Simeon seems to have been Simeon ha-Gadol, who lived at Mayence about the beginning of the eleventh century. See Andreas.

Early Hebrew Works on Chess.

The earliest writer to treat of chess among the Jews is Hyde, who, in the second volume of his "De Ludis Orientalibus" (1694), prints three Hebrew works on chess, with excellent translations in Latin. These are: (1) a poem attributed to Abraham ibn Ezra, חרוזים, the Latin title being "Carmina Rhythmica de Ludo Schah-mat, R. Abraham Abben-Ezra, Beatæ Memoriæ" (Steinschneider, "Cat. Bodl." col. 684); (2) "Meliẓat ha-Seḥoḳ ha-Ishḳaḳi," a poem by Bonsenior ibn Yaḥya (in Berechiah ha-Nakdan's "Mishle Shu'alim," Mantua, 1557–58; "Cat. Bodl." col. 796); and (3) "Ma'adanne Melek" ("Cat. Bodl." col. 604), attributed by Steinschneider to Judah or Leo di Modena (1571–1648). If the poem first mentioned is correctly ascribed to Ibn Ezra (d. 1167), it certainly gives the oldest set of chess rules extant; and it has been reprinted six times under that impression. The Hebrew text is given in Steinschneider ("Schach bei den Juden," pp. 43–45), as well as a German rendering (*ib.* pp. 12–15); and the following English translation is by Nina Davis (now Mrs. Salomon), in "Songs of Exile" (pp. 129–131), issued by the Jewish Publication Society of America, Philadelphia, 1901:

The Song of Chess.

I will sing a song of battle
Planned in days long passed and over.
Men of skill and science set it
On a plain of eight divisions,
And designed in squares all chequered.
Two camps face each one the other,
And the kings stand by for battle,
And 'twixt these two is the fighting.
Bent on war the face of each is,
Ever moving or encamping,
Yet no swords are drawn in warfare,
For a war of thoughts their war is.
They are known by signs and tokens
Sealed and written on their bodies;
And a man who sees them, thinketh
Edomites and Ethiopians
Are these two that fight together.
And the Ethiopian forces
Overspread the field of battle,
And the Edomites pursue them.

First in battle the foot-soldier
Comes to fight upon the highway,
Ever marching straight before him,
But to capture moving sideways,
Straying not from off his pathway,
Neither do his steps go backward;
He may leap at the beginning
Anywhere within three chequers.
Should he take his steps in battle
Far away unto the eighth row,
Then a Queen to all appearance
He becomes and fights as she does.
And the Queen directs her moving
As she will to any quarter.
Backs the Elephant or advances,
Stands aside as 'twere an ambush;
As the Queen's way, so is his way,
But o'er him she hath advantage;
He stands only in the third rank.
Swift the Horse is in the battle,
Moving on a crooked pathway;
Ways of his are ever crooked;
'Mid the Squares, three form his limit.

Straight the Wind moves o'er the war-path
In the field across or lengthwise;
Ways of crookedness he seeks not,
But straight paths without perverseness.
Turning every way the King goes,
Giving aid unto his subjects;
In his actions he is cautious,
Whether fighting or encamping.
If his foe come to dismay him,
From his place he flees in terror,
Or the Wind can give him refuge.
Sometimes he must flee before him;
Multitudes at times support him;
And all slaughter each the other,
Wasting with great wrath each other.
Mighty men of both the sovereigns
Slaughtered fall, with yet no bloodshed.
Ethiopia sometimes triumphs,
Edom flees away before her;
Now victorious is Edom:
Ethiopia and her sovereign
Are defeated in the battle.

Should a King in the destruction
Fall within the foeman's power,
He is never granted mercy,
Neither refuge nor deliv'rance,
Nor a flight to refuge-city.
Judged by foes, and lacking rescue,
Though not slain he is checkmated.
Hosts about him all are slaughtered,
Giving life for his deliverance.
Quenched and vanished is their glory,
For they see their lord is smitten;
Yet they fight again this battle,
For in death is resurrection.

It is characteristic of this poem that the pawn moves two spaces at the first move, as at present, but not as in the Arabic game. The queening of a pawn is also mentioned. The queen may move in all directions, but only one space, like the king at present. The bishop "fil" or (elephant) moves diagonally, but only three spaces. Castling is unknown. The "wind" is the rook. Steinschneider declares on subjective grounds, against the attribution to Ibn Ezra, and is supported by the like opinion of Dr. Egers, the editor of Ibn Ezra's poetry.

Bonsenior (lived not later than the fifteenth century), in his poem, also pictures the game as a battle, and describes the pieces in the following order:

King, מלך, moves one in any direction.

Queen, שגל, to the right of the king, moves two or three spaces in any direction.

Knights, פרשים or סוסים (= "horsemen" or "horses"), move one space obliquely and one space straight forward.

Bishops, פילים (= elephants; editio princeps חילים = "camps"), move obliquely to the third space.

Rooks, רוקים, move straight, forward, backward, or from side to side.

Pawns, גבורים ("heroes"), move straight forward.

The chief characteristic of Bonsenior's work is the large number of Biblical texts which he employs.

Leo di Modena's work ("Ma'adanne Melek") was written for the purpose of teaching the author's two sons the game, and in the hope of inducing them to give up card-playing. The book is particularly interesting for its reference (1) to the queening of a pawn, (2) to castling, and (3) to the queen's position at the commencement of the game. The following is the author's description of the pieces:

King, שה (Persian "shah"), may castle.

Queen, פרזאן ("ferzân" or "parzan"), occupies at the beginning of game the space of its own color.

Both king and queen have the following three noblemen by their sides:

Bishop, פיל ("fil"), elephant.

Knight, פרש ("parash"), horseman.

Rook, רוק or רוח (Persian "rokh").

Pawn, רגל, foot-soldier, moves two boxes at the first move, and may become a queen.

A number of other early works on chess will be found in Steinschneider's "Schach bei den Juden" (pp. 22–33). Among these may be specially mentioned a Catalan poem by Moses Azan, translated into Castilian in 1350; a poem of 1532, which describes castling as an interchange of places between king and rook; and "Ha-Ḳerab" (The War), a poem in Hebrew, composed by Jacob Eichenbaum in Odessa, and printed in London (n.d.; dedication dated Sept. 3, 1839). It has been translated into Russian by Joseph Ossip Rabbinovicz.

Hebrew riddles on chess occur in medieval manuscripts, and are given by Steinschneider. One of them describes the game as:

> "A country without earth: kings and princes walking without soul.
> If the King be wasted, all is without soul."

Lawfulness of the Game.

Chess is referred to by Maimonides (1155–1204), who mentions a forced mate and declares professional chess-players as unworthy of credence in the law courts (commentary on Mishnah Sanh. ii. 3), and by Kalonymus ben Kalonymus (*c.* 1300). The former condemns the game only when played for money; the latter, whether played for stakes or not. During the thirteenth and the four following centuries chess was quite commonly played; and Jewish literature contains numerous rabbinical opinions for and against it. Strangely enough, Joseph Caro does not refer to it in his great code, the Shulḥan 'Aruk. Moses Isserles (d. 1573) terms it "the game with bones called chess," and approves of its being played not only on weekdays, but on the Sabbath, though not for money. An old responsum (Dukes, in "Ben Chananja," 1864, pp. 601, 650) states that in Spain the game of chess (אישקש [? אישקקש]) was sanctioned by the Rabbis. After a visitation of the plague in 1575 the three rabbis of Cremona declared that *with the exception of chess* ("ishḳaḳi") all games were "primary evils and the cause of all troubles" (Lampronti, "Paḥad Yiẓḥaḳ," iii. 54). Schudt ("Jüdische Merckwürdigkeiten," pt. VI., ch. xxxv., p. 317) records that in Frankfort-on-the-Main, after the great fire of 1711, the Jewish community passed a resolution forbidding for a period of fourteen years any Jew or Jewess (except sick persons and lying-in women) to play chess. When played on the Sabbath, it became customary in Germany, in honor of the day, to use chessmen made of silver ("Shilṭe ha-Gibborim," on 'Er. 127b), though wooden pieces were not disallowed.

Popular Among Jewesses.

Chess was popular among Jewesses, as is seen from Schudt's remark (*l.c.* IV. ii. 381) that "it is not at all strange that Jews should play chess well, since Jewish women have for many years played and practised the game." In 1617 a Jewess of Venice became well known for her skill in chess. Indeed, Abrahams ("Jewish Life in the Middle Ages," p. 388) goes so far as to suggest that it first made its way among Jewish circles as a woman's game.

R. Aaron Sason of Constantinople recommends the avoidance of chess on Sabbath (Responsa, No. 180). Elijah de Vidas appears to have been the sole halakist who absolutely forbade the game ("Shebeṭ Musar," 1712, ch. xlii.). Children under fourteen were allowed to learn the game, on the ground that it rendered the intellect more acute.

Elijah Cohen of Smyrna ("Shebeṭ Musar," *l.c.*) objects to chess on the ground that it wastes time and takes the mind away from study. Azulai (1774) agrees with Ali ben Saul, mentioned above, in favoring chess only as a remedy for illness or melancholy. He also cites opinions for and against playing chess on Saturdays (Berliner, "Aus dem Inneren Leben der Deutschen Juden im Mittelalter," pp. 12, 53, Berlin, 1871). Mendelssohn was a passionate lover of the game, and is said to have cemented his friendship with Lessing over the chessboard. Yet he is credited with the dictum: "Chess is too earnest for a game; too much of a game to be in earnest about it" ("Für Spiel ist es zu viel Ernst, für Ernst zu viel Spiel"; compare Dukes, in "Ben Chananja," 1864, vii. 636; something similar is attributed to Montaigne).

From the eighteenth century (to which belongs Albert [Aaron] Alexandre) onward, Jews came more and more to the front as chess-players; and it is not too much to say that in recent years they have proved themselves paramount as exponents of the game both in Europe and in America. As a race they seem to possess those intellectual qualities which are necessary to excel in chess. It must suffice here merely to mention a few names, such as S. Alapin, O. Blumenthal, W. Cohn, E. Delmar, L. R. Eisenberg, B. Englisch, E. Epstein, I. Gunsberg, D. Harrwitz, Leopold Hoffer, B. Horwitz, Herbert Jacobs, D. Janowski, Baron Ignaz von Kolisch, J. J. Löwenthal, S. Lipschütz, S. Rosenthal, E. Schiffers, Carl Schlechter, S. Tarrasch, Max Weiss, and S. Winawer. Besides these, three Jewish chess masters stand out with especial prominence as having held the primacy of the chess world since 1866; viz., J. H. Zukertort, William Steinitz, and Emanuel Lasker.

Johannes H. Zukertort (1842–88) was a pupil of the celebrated player A. Anderssen, whom he at length defeated in 1871 with a score of 5 to 2. In 1878 he gained the first prize at the international tournament at Paris, and in 1883 took the same position at the great London tournament, in which all the greatest chess masters of the day (except Paulsen) competed. Zukertort excelled as a blindfold player. In 1876 he played thus against 16 strong amateurs, the result being: won 12, lost 1, drew 3.

In Modern Times.

William Steinitz (1836–1900) held the chess championship of the world for a period of twenty-eight years (1866–1894), and during that time may be said to have formed a new school of chess. In place of the fierce attack, he sought to win by a combination of minor advantages; and his method was gradually adopted by the leading experts. The Steinitz gambit (see below), though now generally discarded, had for a time a considerable number of adherents.

Emanuel Lasker (b. 1868) is the present champion of the world (1902), having succeeded in wresting that title from Steinitz in 1894. In 1896 he was first in the Nuremberg tourney; in 1899, first in the London tournament; and again first in that at the Paris Exposition of 1900.

The following list of tournaments since 1851 shows the positions gained by Jewish players and by their principal competitors. It will be seen that during the past fifty years the leading places have been in most cases secured by Jews. Non-Jewish players are indicated by italics:

TOURNAMENTS.

1851, London: *Anderssen* 1; Horwitz 7.
1857, Manchester: Löwenthal 1; *Anderssen* 2.
1858, Birmingham: Löwenthal 1; Falkbeer 2.
1860, Cambridge: Kolisch 1; *Stanley* 2.
1862, London: *Anderssen* 1; Steinitz 6.
1865, Dublin: Steinitz 1; *MacDonnell* 2.
1866, British Chess Association: Steinitz 1; *Green* 2.
1867, Paris: Kolisch 1; Winawer 2: Steinitz 3.
1867, Dundee: *Neumann* 1; Steinitz 2; *De Vere* 3.
1868, British Chess Association Handicap: Steinitz 1; *Wisker* 2; *Blackburne* 3.
1870, Baden-Baden: *Anderssen* 1: Steinitz 2; *Blackburne* 3.
1872, London: Steinitz 1; *Blackburne* 2; Zukertort 3.
1873, Vienna: Steinitz 1; *Blackburne* 2; *Anderssen* 3; Rosenthal 4.
1876, London: *Blackburne* 1; Zukertort 2.
1878, Paris: Zukertort 1; Winawer 2.
1881, Berlin: *Blackburne* 1; Zukertort 2; *Tchigorin* 3.
1882, Vienna: Steinitz and Winawer 1 and 2; Zukertort 5.
1883, London: Zukertort 1; Steinitz 2.
1883, Nuremberg: Winawer 1; *Blackburne* 2.
1885, Hamburg: Gunsberg 1; Englisch, Tarrasch, Weiss (tied) 2.
1886, London: Gunsberg and Taubenhaus 3 and 4.
1886, Nottingham: Gunsberg and Taubenhaus 3 and 4.
1887, Frankfort: *Bardeleben* 4; Tarrasch 5 (Gunsberg and Zukertort not placed).
1888, Bradford: Gunsberg 1; *Mackenzie* 2.
1889, New York: *Tchigorin* 1; Weiss 2; Gunsberg 3.
1889, Breslau: Tarrasch 1; *Burn* 2; Weiss 3; (Gunsberg 4.
1890, Amsterdam: *Burn* 1; Lasker 2; *Mason* 3.
1890, Manchester: Tarrasch 1; *Blackburne* 2.
1892, Dresden: Tarrasch 1; Markovetz 2; Porges 3.
1894, Leipsic: Tarrasch 1; Lipke and Teichman 2 and 3.
1895, Hastings: *Pillsbury* 1; *Tchigorin* 2; Lasker 3; Tarrasch 4; Steinitz 5.
1896, Nuremberg: Lasker 1; *Maroczy* 2; Tarrasch 4.
1896, Budapest: *Tchigorin* 1; Charousek 2; *Pillsbury* 3.)
1898, Vienna: Tarrasch 1: *Pillsbury* 2.
1898, Cologne: *Burn* 1; Charousek 2; Cohn 3.
1899, London: Lasker 1; Janowsky, *Maroczy*, and *Pillsbury* tied for 2, 3, and 4.
1900, Munich: *Maroczy*, *Pillsbury*, and Schlechter tied for 1, 2, and 3.
1900, Paris: Lasker 1; *Pillsbury* 2; Janowsky 3.
1901, Monte Carlo: Janowsky 1: Schlechter 2.
1902, Hanover: Janowsky 1; *Pillsbury* 2.

Of 33 important matches since 1834, enumerated in the "Encyc. Brit." Supplement, 1902, *s.v.* "Chess," only 5 (all before 1863) have been without a Jewish competitor. Of 42 living contemporary first-class players of Europe and America mentioned in that article, 19 are Jews.

"Gambits."

What is known in chess as the "gambit" consists in sacrificing a piece for the sake of certain advantages of position. It is first met with in Italy about the middle of the sixteenth century. Two Jewish chess-players have given their names to gambits: viz., Steinitz and Isaac L. RICE of New York. The Steinitz gambit may be played as follows:

WHITE.	BLACK.
1 P—K 4	1 P—K 4
2 Kt—QB 3	2 Kt—QB 3
3 P—B 4	3 P x P
4 P—Q 4	4 Q—R 5 ch
5 K—K 2	5 P—Q 3
6 Kt—B 3	6 B—K Kt 5
7 B x P	7 Castles

The Rice gambit is as follows, and is only possible after Black plays 7 B—Q 3. White, after giving up the knight, is able to withstand a violent attack.

WHITE.	BLACK.
1 P—K 4	1 P—K 4
2 P—K B 4	2 P x P
3 Kt—K B 3	3 P—K Kt 4
4 P—K R 4	4 P—Kt 5
5 Kt—K 5	5 Kt—K B 3
6 B—B 4	6 P—Q 4
7 P x P	7 B—Q 3
8 Castles	8 B x Kt
9 R—K sq	

Though so successful in matches, Jews have not shown themselves particularly brilliant in the composition of problems. Schlechter, Teichman, and Mieses, however, have displayed some talent in this direction, and E. N. Frankenstein was part author of "The Chess Problem Text-Book," London, 1887.

In 1782 Moses Hirschel of Breslau wrote the first work in German on the chess writings of Greco and Stamma. Of other Jewish writers on chess may be mentioned the following, with dates of publication: W. Schlesinger ("Beiträge zum Unterricht im Schachspiel," Presburg, 1804); E. M. Oettinger ("Bibliotheca Shahiludii," Leipsic, 1844); P. Bendix (1824–1833). ("Recueil de Parties d'Echec; Tant Entières que Finales, avec des Observations Instructives," St. Petersburg, 1824); H. Silberschmidt ("Die Neuentdeckten Geheimnisse im Gebiete des Schachspiels," Braunschweig, 1826; "Lehrbuch des Schachspiels," Wolfenbüttel); Albert (Aaron) Alexandre ("Encyclopédie des Echecs," Paris, 1837, and "Collection des Plus Beaux Problèmes d'Echecs," giving 2,120 examples, *ib.* 1846); D. M. Fränkel (1838); A. Schmid ("Literatur des Schachspiels," 1847); J. Horwitz ("Das Schachspiel," Berlin, 1879); D. Nathan (1851–1852); S. Tarrasch ("Dreihundert Schachpartien," Leipsic, 1855); Leon Hollaenderski (a French trans-

Modern Jewish Chess Authors.

lation of the three Hebrew manuscripts given in Hyde, 1864); J. J. Löwenthal (1857–69) ("Transactions of the British Chess Association," 1867–69); D. Harrwitz ("Lehrbuch des Schachspiels," Berlin, 1862; J. H. Zukertort ("Leitfaden des Schachspiels," 1870); L. Hoffer ("Chess," London, 1892); W. Steinitz ("The Modern Chess Instructor," New York, 1895); and E. Lasker ("Common Sense in Chess," London, 1896).

Several important chess journals have been edited by Jews, as "The Chess-Players' Magazine," by J. J. Löwenthal, 1865–67; the "Neue Berliner Schachzeitung," by Zukertort, 1867; "The Chess Monthly" (which had an existence of seventeen years, 1879–96), by Zukertort and Hoffer, and by the latter alone after Zukertort's death; and "The International Chess Magazine," by Steinitz, 1885–1900. Books commemorative of the important tournaments, giving the games with annotations, have also been published by Jewish authors.

CHEST. See Ark.

CHESTNUT-TREE: The rendering of ערמון given in the A. V. (Gen. xxx. 37; Ezek. xxxi. 8); the R. V., however, preferring "plane-tree." There are two considerations lending weight to the rejection of the translation given in the A. V.: (1) the plane (*Platanus orientalis*) is indigenous to western Asia, where, under favorable conditions, it attains a commanding size, and is remarkable for the luxuriance of its growth; and (2) the etymology of the word ערמון, which is connected with the Arabic "'aram" (= to strip off bark): the plane-tree being noted for annually casting its bark. This latter consideration is, apparently, the determining one.

The chestnut, which found its way from Asia into Europe through Greece and Italy, takes its botanical name (*Castanea vulgaris*) from an ancient Thessalian town, Castanum. Like the plane, it is distinguished by the magnificence of its growth, preferring, however, high and dry situations; while the plane develops more freely in low and moist ground.

According to Tristram, the plane-tree "is common on the banks of the upper Jordan and of the Leontes, where it overhangs the water" ("Natural History of the Bible," p. 345).

CHEVRA. See Ḥebra.

CHEYNE, THOMAS KELLEY: English Christian Biblical critic, and Oriel professor of Biblical exegesis at the University of Oxford, England; born at London Sept. 18, 1841; educated at Merchant Taylors' School, London, Worcester College, Oxford, and under Ewald at Göttingen. Before graduating he showed his interest in Hebrew studies by taking the Pusey, Ellerton, and Kennicott scholarships, and his post-graduate life has been devoted almost exclusively to Old Testament exegesis and theology. For a long time he was almost the sole representative of the higher criticism in England. Together with Professor Driver, he provided the Queen's Printers' Bible, 1881, with a series of variorum readings and renderings which were of great use to Bible students. He has devoted particular attention to the Book of Isaiah, of which he published notes on the Hebrew text in 1869, a translation in 1870, an edition in 1880–81, an introduction in 1896, and a new translation, based on a critical text, in the Polychrome Bible in 1898. Besides this, he has given two versions of Psalms to the world, in 1884 and 1889, while in 1891 he treated of the "Origin of the Psalter" in his Bampton Lectures, probably his most important contribution to Old Testament exegesis. A volume on "Job and Solomon" in 1886 treated of the Wisdom literature, while his "Founders of Old Testament Criticism" in 1893 gave the only adequate history of that subject in existence.

In the winter of 1897–98 Cheyne visited the United States and delivered lectures on "Jewish Religious Life in the Post-Exilic Period"; these were subsequently published (London and New York, 1898), and show a certain sympathy with specifically Jewish religious thought, which was also shown in his Bampton Lectures. Cheyne has frequently contributed to the "Jewish Quarterly Review."

Cheyne has shown great daring in textual emendation, which has grown upon him of recent years. His most recent contributions to Biblical study consist of numerous articles contained in the "Encyclopedia Biblica," which was edited by himself and A. S. Black, and which bears the stamp of Cheyne's influence on every page.

T. J.

CHIARINI, LUIGI: Italian abbé; born near Montepulciano, Italy, April 26, 1789; died at Warsaw Feb. 28, 1832. He was appointed professor of history and Oriental languages at the University of Warsaw, Poland (1826).

Chiarini was a prominent member of the so-called "Jewish Committee," consisting exclusively of Christian members, organized by imperial decree May 22, 1825. This committee established schools for Jewish boys and girls as well as classes of Hebrew for Christian young men to study Jewish history, rabbinical literature, and even Judæo-German, which would enable them to do organization (missionary) work among the Jews of Poland. Chiarini was entrusted by this body to translate the Babylonian Talmud, for which the Russian government granted him a subsidy of 12,000 thalers. He published his work, "Théorie du Judaïsme Appliquée à la Réforme des Israélites de Tous les Pays de l'Europe, et Servant en Même Temps d'Ouvrage Préparatoire à la Version du Talmud de Babylone," 2 vols., Paris, 1830, as a precursor to the prescribed version of the Talmud which was to appear in six large folio volumes. Chiarini's book planned the reform of the Polish Jews, and also the general improvement of the condition of all Jews. This work is divided into three parts; in the first Chiarini states the difficulties of knowing the true character of Judaism; in the second he elucidates the theory of Judaism; and in the third the author treats of the reform of Judaism and discusses the means of removing its "pernicious" elements. In brief, Chiarini endeavors to prove that the so-called evils of Judaism originate chiefly from the alleged harmful antisocial teachings of the Talmud. He argues that the state should assist the Jews in freeing themselves from the influence of the Talmud, and that they should return to the simple Mosaic faith. This goal can be attained in two ways: first, by the establishment of schools where Bible instruction is given and the Hebrew grammar studied; and, secondly, by a French translation of the Babylonian Talmud, with explanatory notes and refutations.

Chiarini recognized that the popular knowledge of the Jews and Judaism was inadequate and defective, and that their enemies furnish nothing but distorted instead of correct information. Nevertheless, his work is pervaded with some of the traditional prejudices against which he protests; but, at the same time, he expresses a sincere concern for the spiritual and material welfare of the Jews, and a desire to improve their condition.

Of Chiarini's translation of the Talmud only two volumes appeared, under the title "Le Talmud de Babylone, Traduit en Langue Française et Complété par Celui de Jérusalem et par d'Autres Monuments de l'Antiquité Judaïque," Leipsic, 1831. It contains a copious preface. The translation of Berakot, which is partly based on previous translations, has many faults. Chiarini's "Théorie du Judaïsme" was widely criticized and caused considerable discussion in the "Revue Encyclopédique" and in separate pamphlets by Zunz, Jost, and others. Besides many other works on Italian poetry (Pisa, 1816 and 1818) and on the history of astronomy in the Orient, Chiarini wrote a Hebrew grammar and a Hebrew dictionary, both in Latin, translated into Polish by Piotr Chlebowski, Warsaw, 1826 and 1829; he wrote also "Dei Funerari degli Ebrei Polacchi," Bologna, 1826.

Bibliography: Zunz, *G. S.* i. 271-298, Berlin, 1878; Jost, *Eine Freimüthige und Unpartheiische Beleuchtung des Werkes: Théorie du Judaïsme*, Berlin, 1830; Orgelbrand, *Encyklopedja Powszechna*, iii., *s.v.*, Warsaw, 1898; *Nuova Enciclopedia Italiana*, 6th ed., vol. v., Turin, 1878; E. Bischoff, *Kritische Geschichte der Talmud-Uebersetzungen*, etc., p. 68, Frankfort-on-the-Main, 1899.

H. R.

CHICAGO: Capital of Cook county, Illinois; the second largest city of the United States. It was incorporated as a city in 1837, and a year later the first Jewish settler, J. Gottlieb, arrived. Whence he came, and what his business was, are not known. In 1840 Gottlieb was followed by Isaac Ziegler, the brothers Benedict and Jacob Schubert, and Philip Newberg. Ziegler was for a number of years a pedler in the city and vicinity. Benedict Schubert was the first Jew to establish a merchant-tailoring business in Chicago. He prospered, and became one of the leading men in his trade. The first brick house in the city was built for him on Lake street, and he carried on business there for a number of years. Philip Newberg was the first Jewish tobacco-dealer. The first Jewish child born in Chicago was a son of Jacob Rosenberg, whose wife was Hannah Reese.

About twenty German Jews arrived between 1840 and 1844, and the community was slowly augmented by incoming settlers up to 1849, in which year a strong tide of Jewish immigration set in, following the completion of the Galena and Chicago Railway to Elgin. Most of the early settlers were German Jews, principally from Bavaria and the Rhenish Palatinate.

Religious services were held for the first time in the Jewish settlement on the Day of Atonement, 1845. The congregation met in a private room on a street now known as Fifth avenue. Only ten men were present; Mayer Klein and Philip Newberg officiated as readers. The following year services were again held on the Day of Atonement, the attendance being, however, no larger than on the previous occasion.

The first Jewish organization, the Jewish Burial-Ground Society, was established in 1846. It purchased from the city for $46 one acre of ground, to be used as a cemetery; and this was the first public act by which the Jews of Chicago demonstrated their existence as an integral portion of the body corporate. This first Jewish burial-ground was located east of the city limits, toward the north along the shore of Lake Michigan.

First Congregation.

Kehillat Anshe Ma'arab, the first Jewish congregation, was established Nov. 3, 1847, when a constitution was adopted and signed by fourteen members. Morris L. Leopold, a young man of twenty-six, born in Laubheim, Württemberg, was elected president. The Jewish Burial-Ground Society turned over to the congregation all its property, including the cemetery, and dissolved. Kehillat Anshe Ma'arab held its first regular service in a private room on the second floor of a building on the southwest corner of Lake and Wells streets, and in 1849 leased a lot on Clark street, between Adams and Quincy streets (where the post-office now stands), on which it erected a frame synagogue.

In 1853 this congregation established a day-school, where Hebrew was taught in addition to the regular common-school curriculum. This school was in operation for twenty years. In 1856 a new cemetery on Green Bay road (now North Clark street) and Belmont avenue was purchased. In 1857 the old burial-ground, having been included in the city extensions, had to be abandoned. In 1882 the ground was sold to the park commissioners, and it is now merged in Lincoln Park. On the date of the closing of the old burial-ground (June 11, 1857) the first interment in the new cemetery took place.

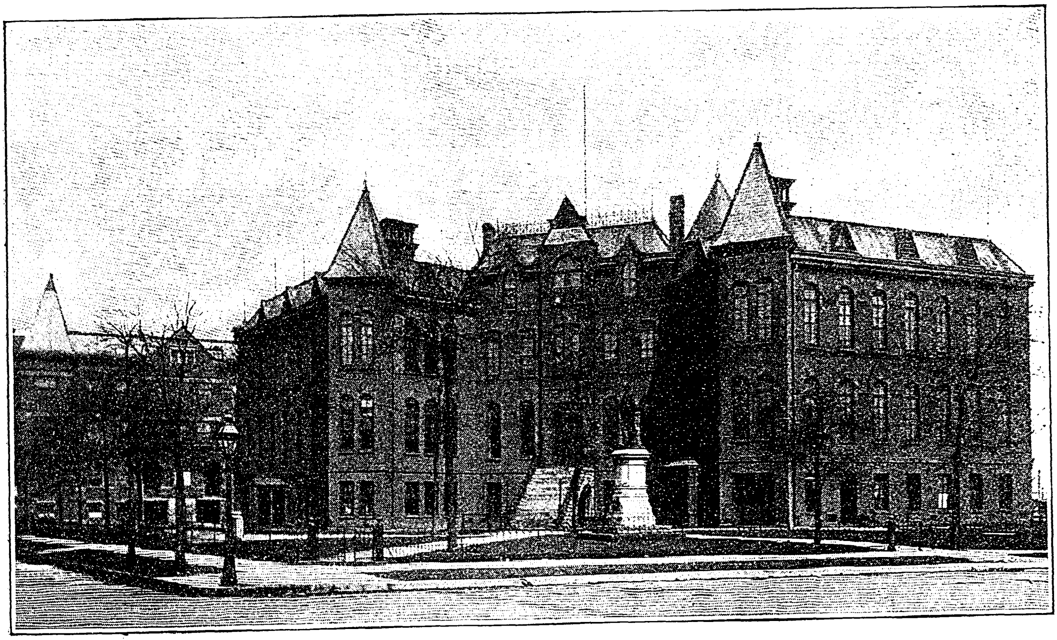
In 1868 the congregation purchased the northwest corner of Wabash avenue and Peck court, with the church standing upon it. The latter was converted into a synagogue. In the great fire of 1871 the synagogue escaped destruction, but all the records, which had been placed by Joseph Pollak, the secretary of the congregation, and at that time clerk of Cook county, in a vault of the court-house, were lost. In 1873 Dr. Merzbacher's prayer-book was adopted. An organ, choir, and family pews had been introduced several years before. In the fire of

1874, Kehillat Anshe Ma'arab lost the synagogue on Wabash avenue, and in December of that year it purchased the church and site on the corner of Indiana avenue and Twenty-sixth street. The church was converted into a synagogue, and the property on Wabash avenue and Peck court was sold. In 1888 Jacob Rosenberg, then vice-president, presented to the congregation twenty acres of land in the town of Jefferson, to be used as a burial-ground. This is now called "Mount Ma'arab Cemetery." The bodies in the North Clark street cemetery were transferred to Mount Ma'arab, and the vacated property was sold. The latter is now completely built over, and all traces of the former cemetery have vanished.

In 1889 Kehillat Anshe Ma'arab found that most of its members had moved farther south. The location of the synagogue being, therefore, no longer convenient for the majority, a plot on the southeast corner of Indiana avenue and Thirty-third street was purchased, and the temple now in use was erected. The latter has a seating capacity of 1,500 persons. The membership is 175. In 1902 the Einhorn ritual, in the English version, was adopted.

Early Rabbis.

The first rabbi was the Rev. Ignatz Kunreuther, who was called from New York in 1847. He was born in 1811, in Gelnhausen, near Frankfort-on-the-Main. He remained with the congregation six years, and then retired to private life. He died in Chicago June 27, 1884. Dr. S. Friedlander, who was called from New York in 1855, was but a short time in Chicago, when he died suddenly. In 1861 the Rev. Liebmann ADLER was called from Detroit. During his long and eventful ministration, M. M. Gerstley was president of Kehillat Anshe Ma'arab; and the influence of these two leaders was most beneficial to the Jewish community, especially to the younger generation. Adler was succeeded by Dr. M. Machol. Dr. Samuel Sale was his successor, and was followed successively by Dr. Isaac S. Moses, the Rev. M. P. Jacobson, and Dr. Tobias Schanfarber, the present incumbent (1902).



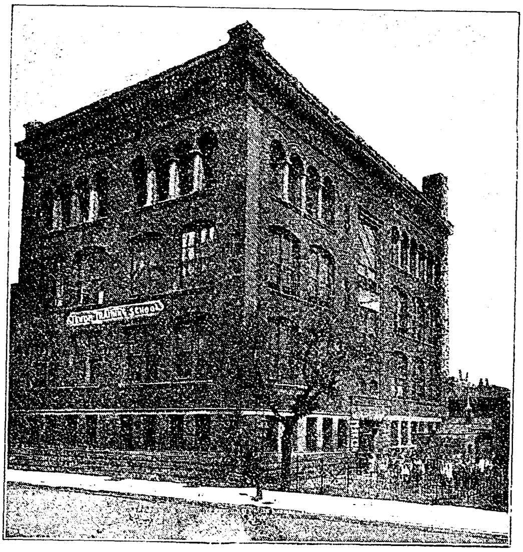
MICHAEL REESE HOSPITAL, CHICAGO, ILL.
(From a photograph.)

Congregations Before the Great Fire.

B'nai Sholom, the second oldest congregation, was organized May 25, 1852, by fourteen members. Its first temple was built in 1864, on the corner of Harrison street and Fourth avenue. It was at that time the handsomest Jewish house of worship in Chicago. This temple was destroyed by the fire of 1871. A new one was erected on Michigan avenue near Fourteenth street; but this property was sold in 1889, and B'nai Sholom purchased the synagogue of Kehillat Anshe Ma'arab, on the corner of Indiana avenue and Twenty-sixth street. The Rev. A. J. Messing is the present rabbi.

Sinai Congregation, the third oldest, was the result of the Reform movement started in Chicago in 1858. In that year the ritual question agitated the minds of the members of Kehillat Anshe Ma'arab. The younger element was dissatisfied with the conservatism of the older members, and demanded sweeping reforms. Dr. Bernhard Felsenthal, a young Jewish teacher who had just arrived in Chicago, became the leader of the Progressives. He published a pamphlet entitled "Ḳol Ḳore ba-Midbar" (A Voice Crying in the Wilderness), in which he strongly advocated Reform. This publication encouraged the Progressives, and they organized a Reform-Verein, of which Dr. Felsenthal was elected secretary. This Reform-Verein was the foundation upon which four years later the Sinai congregation was built by twenty-six members who had seceded from the parent organization.

Sinai congregation was established April 7, 1861. B. Schoeneman was the first president, and Dr. B. Felsenthal the first rabbi. Its first house of worship was a frame building, formerly a church, on Monroe street, between Clark and La Salle streets. At the dedication of this temple, June 21, 1861, the Einhorn ritual was used for the first time in a Western congregation. In 1863 Dr. Felsenthal declined reelection, and Dr. Chronic was elected rabbi, upon the recommendation of Dr. Abraham Geiger. Dr. Chronic founded in Chicago "Zeichen der Zeit" (Signs of the Times), a German monthly in the interest of Jewish Reform. At the rabbinical conference held in Philadelphia in 1869, Dr. Chronic, the delegate of Sinai, moved to transfer the celebration of the Sabbath to Sunday; but no action was taken upon the motion. In 1867 Sinai made a contract with the Rosehill Cemetery Company for a burial plot. This was the first instance in Chicago of a Jewish congregation securing a burial-plot in a non-Jewish cemetery.



Jewish Training-School, Chicago, Ill.
(From a photograph.)

The great fire of 1871 destroyed Sinai temple. Dr. Chronic had gone back to Europe, and Dr. K. Kohler, then minister of Beth-El congregation in Detroit, Mich., was elected rabbi. Sunday services were held for the first time by the Sinai congregation in Martin's Hall, corner Twenty-second street and Indiana avenue, on Jan. 15, 1874. The site of their temple, on the corner of Indiana avenue and Twenty-first street, had been purchased in 1872, and the structure was finished in 1876. In 1879 Dr. Kohler was called to New York; and in 1880 Dr. Emil G. Hirsch, then at Louisville, Ky., was elected rabbi. In 1885 Dr. Hirsch was relieved from preaching on Saturdays. In 1892 the temple was remodeled and enlarged. Sinai is by far the largest Jewish congregation in Chicago, having a membership of nearly 600. It maintains a Jewish mission-school —the Sinai West Side Sabbath-School—where over 300 children, boys and girls, are instructed in Jewish history and religion.

Zion Congregation, the fourth oldest in Chicago, was organized on the West Side in 1864; Henry Greenebaum being the first president, and Dr. B. Felsenthal the first rabbi. The first house of worship was on Desplaines street, between Madison street and Washington boulevard. The present temple is located on Ogden avenue, opposite Union Park. In 1886 Dr. Felsenthal retired on account of old age, and Dr. Joseph Stolz was elected his successor. For many years Zion was a prominent factor in the spiritual and educational development of the Jewish community; but during the last decade it has suffered considerably through the migration of its members to the South Side. The present rabbi is Dr. Jacob S. Jacobson.

The North Side Hebrew Congregation was established in 1867. Its first house of worship was dedicated Sept. 27 in that year by the Rev. A. Ollendorf, who had been called to the rabbinate. In 1870 the Rev. A. Norden was elected rabbi. The fire of 1871 destroyed the synagogue, and the existence of the congregation was temporarily suspended. It was reorganized, however, in 1875, and the Rev. A. Norden was reelected; but the synagogue was not rebuilt until 1884. In 1898 Rabbi Norden retired, and the Rev. Abraham Hirschberg became his successor.

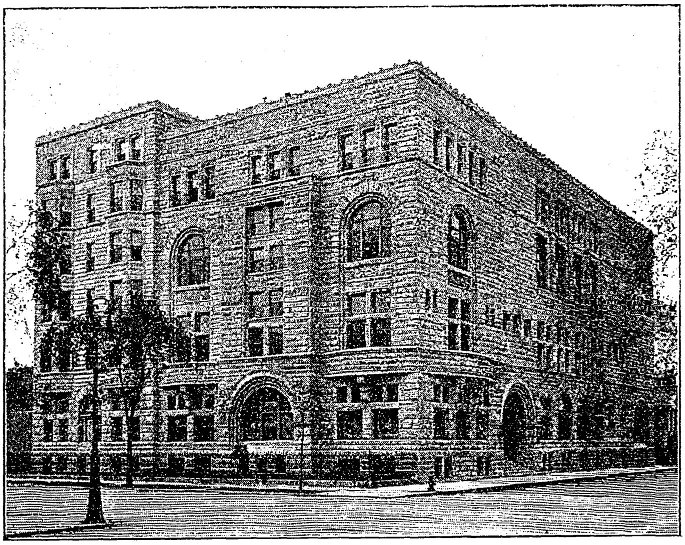
B'nai Abraham was organized on the West Side in 1870. The first rabbi was the Rev. Isaac Fall. In 1888 Dr. A. R. Levi, the present incumbent, was elected.

Of these six congregations, that of Sinai is the most radical, and B'nai Sholom and B'nai Abraham are the most conservative. The others belong to the class comprising the majority of American Jewish Reform congregations. A number of ultra-Orthodox congregations were also established before the great fire. In several instances a number of small "hebrahs" among the Jews of Slavonic parentage amalgamated and formed congregations. The most prominent among these congregations are **Bet ha-Midrash Hagadol u-Benai Jacob,** a charter for which was obtained in March, 1867, and **Ohabai Shalom Mariampole,** established in 1870. The latter has an extensive library of Hebrew books in its large synagogue. The congregation has instituted a loan association, and is in many other ways a beneficently active factor in the community.

Congregations After the Great Fire.

After the fire the number of congregations increased rapidly. The most prominent among the younger congregations are Isaiah, Emanuel, and Beth-El. **Beth-El Congregation,** on the northwest side of the city, was organized Oct. 7, 1871, immediately after the fire. The first services were held in the home of one of the members, but in the following week a hall was rented at the corner of Peoria and Ohio streets, where regular services were held every Friday night and Saturday morning. D. Gottlieb and Ignatz Kunreuther officiated. Six months later the congregation bought some ground at the corner of May and Huron streets, to which they moved a frame church building which they had purchased from a Norwegian congregation. Herman Eliassof was elected in 1873 as the regular minister and teacher of Beth-El. On Sunday, June 22, 1873, a cyclone destroyed the synagogue.

But the same evening a meeting of the congregation was called, and a fund was raised sufficient to start the building of a new synagogue, a modest frame structure, still standing on the site of the old building. It now serves as a Lutheran church, having been sold by Beth-El in 1901. The ministers succeeding Rabbi Eliassof were Bonheim Lippmansohn, Bien, and Jacob Dansk, the last of whom officiated from 1881 to 1891, dying in the prime of life. The present incumbent, Rabbi Julius Rappaport, took charge of the congregation in July, 1891. To-day (1902) there are 100 members, partly Germans and partly Bohemians. A new synagogue was erected on Crystal and Hoyne avenues, and was dedicated Sept. 28, 1902. The tendency of the congregation is toward Reform, and the "Minhag America" ritual is used. Family pews, an organ, and a choir have been introduced, mostly during the ministry of the present rabbi; Friday services are likewise a recent innovation, prayers and lectures being delivered in the English language. The Saturday morning services are held in German. There are a ladies' society—Sisters of Beth-El—numbering 120 members, and a Young People's Auxiliary Society, connected with the congregation.



Standard Club, Chicago, Ill.
(From a photograph.)

Congregation Emanuel was founded in 1880, in a hall at the corner of Sedgwick and Blackhawk streets; the church of the Swedish congregation at No. 280 Franklin street being purchased three years afterward. In 1889 moderate Reform and the prayer-book "Minḥag America" were adopted, and later the cause of advanced Reform was further strengthened by the introduction of the German (Einhorn) prayer-book and the practise of worshiping with uncovered head. The majority of the members having moved farther north, in the spring of 1897 the congregation rented the Baptist church at the corner of Belden avenue and Halsted street, where services are now (1902) held, though in 1900 a site for a synagogue was purchased at Belden avenue and Burling street. The congregation owns a cemetery at Waldheim. Connected with the congregation are the Emanuel Gemeinde Frauenverein, established in 1897, and the Emanuel Auxiliary Society, founded in 1900 by the younger members of the congregation.

The names of the successive rabbis of Congregation Emanuel are: Austrian E. Brown, Julius Newman, and Dr. Emanuel Schreiber, the incumbency of the last-named dating from 1899.

The Reform Congregation of Isaiah Temple was organized Oct. 24, 1895, by members from Zion congregation who had moved to the South Side. At the first meeting Dr. Joseph Stolz was chosen rabbi and still (1902) holds that position. The first services were held Jan. 4, 1896, at the Oakland Club Hall, Ellis avenue and 39th street, which continued to be used in this capacity for three years.

In May, 1898, some ground was purchased on the corner of Vincennes avenue and 45th street, and on Sept. 11 following Dr. Isaac M. Wise laid the corner-stone of a synagogue designed by Dankmar Adler. The schoolhouse attached to the synagogue was dedicated on Jan. 14, 1899, and two months later (March 17) Dr. Wise dedicated the synagogue. Its membership numbers 228, and the Sabbath-school has 383 children enrolled. The Sabbath-school holds Saturday and Sunday sessions, teaches Hebrew, and has a class for the deaf, at present composed of three pupils. Affiliated with the congregation are the Isaiah Woman's Club and the Isaac M. Wise Auxiliary Lodge I.O.B.B.

The principal Jewish charitable institutions of Chicago are the following: (1) The United Hebrew Charities of Chicago, organized in 1859 as the United Hebrew Relief Association, for the purpose of providing an asylum for widows and orphans, and a hospital. The present name of the association was adopted in 1888. The first hospital was erected on La Salle avenue, and opened to patients Aug. 9, 1868. It was destroyed by the fire of 1871. In 1879 Henry L. Frank and his brother Joseph, as the trustees of a fund bequeathed by Michael Reese of San Francisco, Cal., offered the sum of $30,000 for the building of a hospital, on condition that it should be known as (2) "The Michael Reese Hospital." Jacob Rosenberg and Mrs. Henrietta Rosenfeld, also trustees of a fund bequeathed by the same Michael Reese, offered on the same condition $50,000 as an endowment for the maintenance of the new hospital. The United Hebrew Relief Association accepted both offers. The new hospital was built, and opened to patients in 1881. The Michael Reese Hospital is one of the best equipped in Chicago.

Charitable Institutions.

(3) The Jewish Training-School, opened on Judd street near Clinton street, in 1890, in the heart of the district inhabited by the poorest of the Jewish population. It is a manual-training school, not a trade-school, where pupils receive an excellent general education also. Prof. G. Bamberger is the superintendent. (4) The Home for Aged Jews, established in 1891. Abraham Slimmer of Waverly, Iowa, donated $50,000 for such a home in Chicago, on condition that the Jews of Chicago raise an equal amount. The money was obtained without difficulty. (5) The Chicago Home for Jewish Orphans, opened Oct. 7, 1894, in a rented house on Vernon avenue. Two years later a piece of property was donated by Henry Siegel and others. Mr. Slimmer again came forward with a donation of $25,000 toward the erection of a suitable building, on condition that a like sum was collected in Chicago. The amount was raised, and the home was dedicated April 23, 1899. (6) The Beth Moshav Z'keinim (Orthodox Home for Aged Jews), organized Sept. 7, 1899. In 1901 Mr. Slimmer promised the society which undertook to establish the home the sum of $20,000, on conditions similar to those accompanying his previous donations. The conditions were of course accepted; and the building is now in course of construction on the corner of Ogden and Albany avenues. (7) The Jewish Agriculturists' Aid Society of America, established in 1888 by three Chicago rabbis, Dr. Hirsch, Dr. Moses, and Dr. Levi. The society has its headquarters in Chicago, but it is national in aim and scope. The object of the society is to assist able-bodied poor Jews who are willing to establish themselves as farmers, in obtaining land on favorable terms. (8) The Home for Jewish Friendless and Working Girls, the youngest Jewish charitable institution in Chicago, established by a number of ladies' societies Oct. 15, 1901.

Besides these there are a great number of Jewish societies for various benevolent, educational, and social purposes. The United Hebrew Charities of Chicago maintains a number of branch institutions, such as an employment bureau, a free dispensary, and a training-school for nurses. All charities are now federated in the Associated Jewish Charities, founded in 1900, through which all collections are made.

The total number of Jewish congregations is fifty-five. Thirty cemeteries are owned and managed by Jewish congregations and societies, and five Jewish clubs minister to the social needs of the community. The Jewish population of Chicago is fully eighty thousand.

As in other large cities of the United States, there exist several social clubs, which, though nominally not restricted in their membership, are practically recruited exclusively from Jewish circles. The first club so organized was named "Concordia," and may be considered the parent of the present Standard Club, which, founded in 1872, is now located in a club-house at Twenty-fourth street and Michigan avenue. The Lake-Side, at Forty-second street and Grand boulevard; the Ideal, on Lasalle avenue; the Unity, and the West-Side are clubs similar in character to the Standard. The latest of these social clubs is the Ravisloe, recently established (1901). It is a country club, devoted to athletics.

From the earliest days of the municipality the Jews of Chicago have taken an honorable part in public life. On the two municipal boards, the board of education and the directory of the Public Library, Jews have distinguished themselves, the president's chair having been often occupied by one of their number. Adolf Kraus was president of the board of education for several terms, while Berthold Loewenthal has served as president of the Public Library board—an honor also conferred on Dr. Emil G. Hirsch, who was a director for nine years and president for six. Under Dr. Hirsch's administration the present splendid home of the Public Library was erected, while another Jew, Bernard Moos, acted as chairman of the building committee, rendering in this capacity the most signal services. Among the other Jewish members on the board of the library at various times may be mentioned Julius Rosenthal (founder and librarian of the Law Institute), Adolf Moses, and Jacob Franks. The following Jews have served on the school board: Herman Felsenthal, David Kohn, B. J. Rosenthal, James Rosenthal, Edward Rose, Charles Kozminski, and Dr. Joseph Stolz. Schools have been named after Herman Felsenthal and Charles Kozminski, in recognition of their services; while another public school, not in a Jewish district, has been named after Sir Moses Montefiore.

Among the charter members of the civic federation was Dr. Emil G. Hirsch; while Adolf Nathan, a member of the Columbian Fair executive committee, was president. Dr. Hirsch is also president of the Rabida Fresh Air Sanitarium. The following Jews have held other offices: corporation counsel, Adolf Kraus, Siegmund Zeisler; county clerk, Joseph Pollak, General Solomon; presidential elector, Henry Greenebaum, Emil G. Hirsch; county commissioner, Isa Monheimer, Jacob L. Cahn, Morris Rosenfeld; city alderman, Henry Greenebaum, Jacob Rosenberg, Abe Ballenberg, David Horner, Milton J. Foreman; South Park commissioner, Henry G. Foreman, Henry Greenebaum; judge of the circuit court, Philip Stein; justice of the peace, E. C. Hamburgher, Adolph J. Sabath, Max L. Wolf; city clerk, William Loeffler; controller of the city, Charles M. Schwab.

In the militia, may be mentioned Major Milton J. Foreman (cavalry); Lieut. Robert Hart (1st Ill. Infantry); and Emil G. Hirsch, the chaplain of the Illinois Naval Militia, with rank of lieutenant-commander.

The Jews have been contributors to the endowment fund of the Chicago University. Their original contribution of $35,000 saved the first donation by J. D. Rockefeller of $600,000, being made at a time when it seemed impossible to fulfil the conditions attaching to that gift. Sinai congregation later donated $5,000 for a Semitic library. Eli B. Felsenthal is a member of the board of trustees of the university, while the following Jews belong to the faculty: Professor Michaelson, head of the department of physics; Julius Stieglitz and Felix Lengfeld (the latter resigned), professors of chemistry; Ernst Freund, professor of jurisprudence; Julian W. Mack, professor of law; Emil G. Hirsch, professor of rabbinical literature and philosophy; S. H. Clark, professor of elocution. Dr. Joseph Zeisler holds the chair of dermatology in the North-Western Medical School.

CHICAGO ISRAELITE, THE: An American weekly newspaper devoted to Jewish interests; founded January, 1885, and first issued under the editorship of Leo Wise, who for several years conducted a department of "Notes and Comments" of a personal character. Occasionally the work of this department was done by Dr. Emil G. Hirsch, Levi A. Eliel, and Dr. Julius Wise, the last of whom wrote under the pen-name "Nickerdown."

"The Chicago Israelite" makes a feature of the local news of the congregations, lodges, and philanthropic and other societies.

G. F. H. V.

CHIDON: The owner of the threshing-floor at which Uzza or Uzzah, attempting to steady the Ark of the Covenant, was killed (I Chron. xiii. 9). In II Sam. vi. 6 the place is called "Nachon."

E. G. H. G. B. L.

CHIEF: Term used by the English Bible versions as an approximate rendering of a number of Hebrew words. The leaders of the Levites are called "chiefs" (נשיא, Num. iii. 24, 30), although elsewhere the same word is rendered "prince" (Num. vii. 18). From the fact that on the day of the dedication of the Tabernacle every chief gave exactly the same donation to the service, it can be inferred that the chiefs were here representing the tribes, and were not giving of themselves only. The tribes, furthermore, were divided into several sections, and the leader of each section (as, for example, the leader of the Gershon branch of the tribe of Levi) was called "nasi" also; and the leader of the whole tribe was called "the chief of the chiefs" (Num. iii. 24, 32). The authority of the "nasi" was very great, and marked respect was to be shown him (Ex. xxii. 27, A. V. 28).

In the days of royalty the rights and privileges, as well as the name, were absorbed by the king (I Kings xi. 34), and later by Zerubbabel (Ezra i. 8). A fuller phrase, "nesi ha-arez," occurs in Gen. xxxiv. 2. In the early stages the chiefs helped the central authority. They assisted in counting the Levites (Num. iv. 34).

Other terms for "chief" are: (1) "Pinnat kol ha-'am" (corner-stone of the people; Judges xx. 2; I Sam. xiv. 38); and the reference here, too, is to the tribe and family representatives. (2) "Ba'al," applied to the priest, not in the sense of an officer, but as one standing out preeminent. (3) "'Attud" (Isa. xiv. 9); but such a rendering only loosely corresponds to the original. (4) "Rosh" is rendered "chief" seventy-eight times, and is used almost interchangeably with "nasi." It stands for the head of a family (Ex. vi. 14, 25), and for larger tribal sections (I Kings viii. 1; Num. xxxii. 38), and is applied to the high priest (II Chron. xix. 11, xxiv. 6). In the New Testament "chief" is the rendering for ἀρχών (Luke xi. 15), and for πρῶτος (Matt. xx. 27; Luke xix. 47). An officer termed the "Asiarch" (chief of Asia) is mentioned in Acts xix. 31.

CHIERA, ESTHER. See Kiera, Esther.

CHIGIRIN: Town in the government of Kiev, Russia, with a population (in 1897) of 9,870, including about 3,000 Jews. The latter are engaged principally in commerce and the handicrafts, the total number of artisans being 551. Tailoring is the predominating trade, 204 being engaged in it. There are, besides, 37 journeymen; and 16 Jews find employment in the local tannery and factories. About 200 families apply yearly for aid at Passover. The educational institutions comprise a government school with 300 pupils, of whom 120 are Jews; about 30 ḥadarim aggregating 230 scholars; and a Talmud Torah with 45 pupils.

H. R. S. J.

CHILD, THE: Since the days of Abraham (Gen. xv. 2), to possess a child was always considered as the greatest blessing God could bestow; and to be without children was regarded as the greatest curse. The Rabbis regarded the childless man as dead; while the cabalist in the Middle Ages thought of him who died without posterity as of one who had failed in his mission in this world, so that he would have to appear again on the planet to fulfil this duty.

As human imagination always occupies itself with the unknown, the embryonic or preliminary stage of child-life became the subject of fanciful legend and myth. The soul before birth is warned that it will be held responsible for its actions through life, and takes an oath to lead a holy life (Jellinek, "B. H." i.). Two guardian angels teach the soul the Torah every morning and display the glories of the just in paradise. In the evening hell is shown. As the memory of this would interfere with free-will, the child forgets all it has seen and heard in this stage. The depression in the middle of the upper lip represents the stroke by which this knowledge and wisdom are made to disappear. For this reason, too, children cry when they are born.

One of the oldest ceremonies connected with the birth of a child was that of tree-planting. In the case of a boy a cedar was planted; in that of a girl, a pine (Giṭ. 57a). Among the ceremonies observed for the protection of the new-born son was the reading of the Shema', and at times of Psalm xc. in the presence of the children of the community. This was usually continued every evening of the week, but in some places took place only on the eve of the Berit Milah (see Circumcision). The custom of paying a visit to an infant boy on the first

Sabbath of his existence (שלום זכר = "peace-boy") was also of Jewish origin.

Male children received their "sacred" names on the occasion of the Berit Milah. The so-called "profane" name ("kinnui") was given on the Sabbath after the mother paid her first visit to the synagogue; this was accompanied by a feast termed Holle Kreish (see Perles, in Grätz Memorial Volume, pp. 24-26). Girls were given their names about a month after their birth, when the father was called up to read the Law, and the Holle Kreish was also celebrated on the return home.

In the case of the first-born the ceremony of "redeeming the child" (פדיון הבן, Ex. xiii. 2-15) occurred on the thirtieth day. According to the author of "Ḥuḳḳot ha-Torah" (Güdemann, "Gesch. des Erziehungswesens und der Cultur der Juden," i. 93), it was customary in the thirteenth century for a father to vow his first-born son to the study of the Torah.

"Halaḳah," the custom of cutting a boy's hair for the first time, took place after his fourth birthday, when care was taken to avoid touching the "corners" (Lev. xix. 27). In Palestine this occurred on the second day of Passover; and it was considered a religious privilege for each of the friends and relatives to cut a few hairs. In Talmudic times it was also customary to weigh the child and to present the weight in coin to the poor.

For the lullabies with which mothers soothe their children to sleep see Cradle Songs.

The various diseases to which the child was subject, especially in Palestine (ראיית הכמה. Gen. R. xx. [ed. Cracow, p. 374]), were included under "the difficulties of bringing up children." If the child died, it was said to be because of the sins of the parents. God Himself supervised the education of the prematurely deceased children ('Ab. Zarah 3b). If a boy remained healthy, he studied the Torah in order to be rendered fit for the priestly office, for which learning was a necessary condition. The Rabbis tell of many infant prodigies. Leo de Modena is said to have read the Haftarah at the age of two and one-half years. But generally they preferred promise rather than performance at so early an age. The regular curriculum was for boys to learn Scripture at five, Mishnah at ten, and to fulfil the whole Law at thirteen. In the times of the Temple youths took part in religious ceremonies at a very early age. In the Sabbatical year they were brought to the Temple when the king read Deuteronomy (Deut. xxxi. 10-12). A boy's religious life began in his fourth year, as soon as he was able to speak distinctly; for although the child was held to be free from religious duties, it was required of the father to accustom him early to fulfil them (לחנכו במצות). This was considered all the more desirable because of the belief that the prayer of a child was more readily heard by God. Girls, too, went to the synagogue at a tender age. The presence of children in the synagogue was often troublesome. The boys frequently played during worship; hence the Sephardim confined them to one place.

The Duty of Learning.

Certain rites were observed when the boy first went to school (see Education). "Children of the house [school] of the master" is a regular phrase in Jewish literature. Words of Scripture uttered innocently by them were viewed as oracles by the Rabbis. In the school, the boys had hours of recreation as well as of study. In play, the angel Sandalphon (סנדלפן) was their patron; but there were few specifically Jewish Games, most of them being taken from the peoples among whom the Jews lived. Parents did not pamper their children, but treated them severely, slight corporal punishments by the father being allowed, though not recommended. Temperance, abstemiousness, and poverty were inculcated as virtues; and, even though any boy might enter the priesthood, all had to learn a handicraft and swimming.

The duty of providing for such education, as well as for circumcision, for redemption from the Kohen, for teaching of the Law, and, when the child was of the proper age, for marriage, was imposed by the Talmud upon the father. The synod of Asa imposed upon him, furthermore, the obligation to provide for the necessities of the child until his seventh year. It, however, strongly recommended the continuation of such provision until the child should have attained his majority (Ket. 49b).

Although enjoying all the protection of the law, the child was declared irresponsible by the Talmud, and had not to account for any mischief he might do. Nor was the father answerable for damages for injury due to such mischief; he was only morally responsible. This moral responsibility, however, ended when the child had attained his religious majority ceased to be a child, and became a "son of the Law" (see Bar Mizwah)—namely at the age of thirteen. On this occasion the father pronounces the following benediction: "Blessed be He for having freed me from this punishment." Actual legal responsibility on the part of the young man, however, began only with the age of twenty.

In later times little children were taken to the synagogue to sip the wine of the "sanctification cup" ("ḳiddush") or to take part in the Simḥat Torah ceremony. They participated in the Passover and Sabbath festivals, too, singing the "Praise" (הלל, Ps. cxiii.-cxviii.). When a little older, the boy had to attend the synagogue and school regularly. He recited certain prayers (קדיש and ברוך שאמר). Indeed, he enjoyed almost all the rights of majority long before the day of his becoming "the son of the Law."

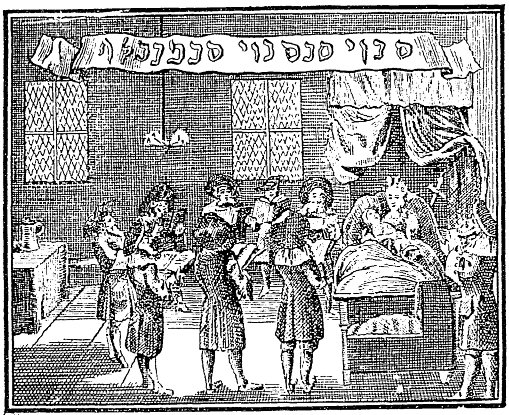
CHILD MARRIAGE. See Marriage.

CHILDBIRTH: The following are some of the Biblical and Talmudical details touching the birth of children:

The child might be brought into the world with or without a midwife (Gen. xxxviii. 28; Ex. i. 15 *et seq.*; compare Mishnah R. H. ii. 5; Oh. vii. 6). The expression in Gen. xxx. 3, "she shall bear upon my knees," and similar phrases are to be taken literally (see Ploss, "Das Weib," and compare the say-

In the Bible.

ing in Gen. R. lx., "'Twixt wife and midwife the child of the poor woman perishes"; see also Dukes, "Blumenlese," p. 128). Immediately after birth the infant was bathed, rubbed with salt, and wrapped in swaddling-clothes (Ezek. xvi. 4 *et seq.*). Josephus ("Contra Ap." ii. 26) says: "The law does not permit us [the Jews] to make festivals at the birth of our children, and thereby to occasion drinking to excess." The child was usually suckled by its mother, but sometimes by a wet-nurse (Gen. xxxv. 8; II Kings xi. 2, 3; III Macc. i. 20). Thirty-three days after the birth of a male child, and sixty-six after that of a female child, the mother offered up a sacrifice of purification (Lev xii. 2 *et seq.*; see CIRCUMCISION and REDEMPTION OF THE FIRST-BORN). The weaning, often long deferred, was accompanied by sacrifices and festivities.



Reciting the "Ha-Mal'ak ha-Go'el" Prayer at Childbirth.
(From Kirchner, "Jüdisches Ceremoniel," 1726.)

The cradle is said to have been first used in Isaac's time; it occurs in similes, as with Homer (Gen. R. liii. 10; lxix. 3; Bacher, Ag. Pal. Amor., pp. 126, 344). On it were hung bells, which generally were employed together with amulets in order to guard children against demons ("Monatsschrift," 1900, p. 382; compare Blau, "Zauberwesen," pp. 90, 160; "Mitteilungen der Gesellschaft für Jüdische Volkskunde," v. 75, note 5. Hamburg, 1900).

A woman during confinement is recommended to particular attention; and her death is ascribed to negligence of the duties specially prescribed for Jewish women (Shab. ii. 6; concerning the origin of leprosy among children, compare Lev. R. xv. 5). New-born children, according to the Talmud as well as the Bible, were sprinkled with salt (Shab. 129b; compare Jerome and Galen in Wiesner, "Scholien," ii. 248); those that made no sound were rubbed with the afterbirth (Wunderbar, in "Orient. Lit." 1850, p. 104; Hamburger, "R. B. T." ii. 256). Air was breathed into those born apparently inanimate; and a beaker filled with hot coals was held near the mouth of one that refused the breast, to stimulate the action of the facial muscles (Shab. 134a). Operations to assist birth were known (compare Rabbinowicz, "La Médecine du Talmud," i. 29). It was considered a heathen custom to fasten a piece of iron on the bed for the protection of the woman (Tosef., Shab. vi. [vii.] 4), as well as, on the night before circumcision, to place on the table viands which should not be touched (Shulḥan 'Aruk, Yoreh De'ah, 178, 3, gloss; 179, 17; compare M. Schuhl, "Superstitions et Coutumes Populaires du Judaïsme Contemporain," p. 6). The use of a Torah scroll as a charm for easing birth (Pitḥe Teshubah on Yoreh De'ah, 179, 9) and for the protection of the child (Yoreh De'ah, *l.c.*; Maimonides, "Yad" Hil. 'Akkum, xi. 12) seems to be of early date; and the origin of the ceremony of lighting candles on the "watch-night"—*i.e.*, the night before circumcision—is to be ascribed to the Talmud (Yer. Ket. i. 25c; Sanh. 32b).

Customs and Superstitions.

In Rumania, as soon as the labor-pains of the woman begin, all the female inmates of the house loosen their hair. In Poland, for the purpose of easing birth, all knots in the woman's clothing are untied; and she wraps herself in a "mappah" or "wimpel"; that is, the band which is wound around the Torah. In the Caucasus the woman is held in the strictest seclusion. For seven weeks prior to her expected accouchement no one, except the midwife and the female relatives, is allowed to see her. On the night of birth the door of the lying-in room is locked; one light burns near to the mezuzah, and another next to the hearth (Chorny, "Sefer ha-Massa'ot be-Ereẓ Ḳauḳaz," pp. 196, 296). Despite the repeated prohibition of their rabbis, the Caucasian Jews practise the superstitious custom of mixing in a glass of water some earth from the grave of one deceased within the last forty days, and giving it to the parturient woman to drink. If it is not effective the dose is repeated with earth obtained at a greater depth.

In Poland and Galicia the custom still obtains that once prevailed in Germany, of making a chalk-mark around the lying-in chamber or of describing black circles on the wall. It is also the practise in many places to hang Psalm-verses over the woman's bed (the same custom obtains among Christians in Germany; see L. Löw, "Lebensalter," pp. 75 *et seq.*). Sometimes Ps. xx. 2 is inscribed on the door, and the following invocation is recited: "May He who harkened to thy mother, harken to thee also!" In

Feast at Childbirth.
(From Kirchner, "Jüdisches Ceremoniel," 1726.)

Hesse a circle is drawn with chalk on the floor, and the verse, "My help cometh from the Lord," etc. (Ps. cxxi. 2), is written within it. In Kurdistan and elsewhere in the Orient, sweet-smelling herbs are burned in a censer, with which first the synagogue and then the lying-in room are perfumed. In Poland the Book of Raziel is laid under the head of the woman, and white cloths are hung at the windows and around the bed.

In older Jewish recipe-books ("Mitteilungen," v. 58 *et seq.*) the following directions are given:

Recipes in Old Books.

Whisper into the ear of the woman in travail: "And Moses spake unto the people, Get thee out, and all the people that follow thee; and after that I will go out. And he went out" (Ex. xi. 8; compare Raziel, 43a). Or write on a "Ränftel" (head) of cheese to be given her to eat, "Satur arepo tenet opera rutas" (made up of "Sator [are] poten [ter] et opera[re] r[ati]o t[u]a s[it]"; compare Steinschneider, "Hebr. Bibl." xvii. 60; *idem*, "Cat. Bodl." No. 100). Or whisper in her right ear: "He went up on Mount Sinai and heard a calling and a crying. And he spoke unto the Lord: 'What meaneth this calling and this crying that I hear?' The Lord answered him: 'It is the voice of a woman in labor. Now go and say unto her: "Get thee out! The earth demands thee!" And all these thy servants shall come down unto Me and bow down themselves unto Me, saying, "Get thee out, and all the people that follow,"'" etc. Or mix the fat (or milk) of a bitch with water and give it to the woman to drink. Or stand at the door next to the mezuzah and read the "Haftarah Shofeṭim" (Isa. li.): then say Gen. xxi. 1, and pronounce the Lord's name thus, צא אתה (= "Get thee out!"). Or strew ground black pepper under the woman in labor: . . . or place a ram's horn in her hand, or the skin of a snake on her heart: . . . or the eyes and bladder of a salt herring: or let another woman put her hand on her and say with her Ps. xix. 6: or lay upon her a clay vessel on which is inscribed: ה״וק ה״ק הר״ש צ״ום; or write on a kosher parchment the magic square (compare Abraham ibn Ezra, "Yesod Mora," ed. Creizenach, p. 125), and lay it on the spot where the tefillin are laid; or place between her teeth a silver ring on which has been inscribed with a new graving-tool: פו״ק, פק״ו, וק״פ, ופ״ק, קו״פ, קפ״ו (compare "Mitteilungen," iii. 67, No. 123). If the child dies in the womb, the gall of an ox should be mixed with water and given to the woman.

ז	ה	ג
ו	א	ח

Magic Square.

It is further stated in the same recipe-books that "Sannui, Sansannui, and Samangaluf (סנוי וסנסנוי וסמנגלף) are known as the great and noble angels whom men call upon to protect women in labor against Lilith, and whose names written in any locality, even if on the wall, serve to exorcise Lilith's brood therefrom. Therefore, it is effective to write these names in the four cardinal points near the woman, especially at an opening, as at a door or window." This prescription against the beautiful Lilith, Adam's first wife (compare second part of Goethe's "Faust"), was zealously observed (see the satire of Isaac Erter in "Kerem Ḥemed," iii. 106, and Flögel-Ebeling, "Gesch. des Grotesk-Komischen," p. 14).

Lilith and Amulets.

Older amulets for the lying-in chamber contained the following (see illustration to AMULET; compare "Mitteilungen," ii. 79 *et seq.*; v. 61, 47: on "Zakar," *ib.* v. 35): "Adam and Eve," within (compare *ib.* i. 91; "Am Urquell," ii. 144, 196; iv. 95); "Lilith and the first Eve," without, "Sannui, Sansannui, Samangaluf, Shumriel, Ḥasdiel." The text continues: "In the name of the Lord God of Israel, who reigns over the cherubim, whose name is mighty and fearful, Elijah the prophet—may he be mentioned for good!—once went upon his way and met Lilith, with all her kith and kin. And he said unto Lilith, the fiend: 'Thou unrivaled in impurity, and ye, ye goodly crew, whither are ye going?' She answered: 'My master Elijah, I am going where I may find a woman in travail. I will cause a deep sleep to come upon her, and I will rob her of her new-born child. I will drink its blood, and suck its marrow, and devour its flesh.' And Elijah—may he be mentioned for good!—spake angrily: 'May God, blessed be He! banish you hence! May you become stiff and stark as stone!' Lilith replied: 'For God's sake, spare me, and I will get me hence. I swear to you by the name of the Lord God of Israel, I will desist from my intent upon the woman and her child; and whenever I hear my name called I will go away. Now I will tell unto you my names; and whenever they are spoken, neither I nor those that are mine will have the power to do harm or to go to the house of a woman in labor, or to do her any evil. These are my names: Lilith, Abitu [compare "Mitteilungen," v. 80, אדם חוה אבטן אבוטור (אבתור of the Mandæans); I. Wohlstein, "Dämonenbeschwörungen aus Nachtalmudischer Zeit," pp. 52, 57, Berlin, 1894; "Zeitschrift für Assyriologie und Verwandte Gebiete," ix. 136], Abihu, Amsarfu, Hagash, Ores, Iḳpodu, Iylu, Tatrota, Abhanuḳtah, Satruna [probably to be compared with שטרניאל; "Mitteilungen," v. 57], Ḳahkatasa, Thilathuy, Piratsha. . . .'"

Amulets such as are described in "Mitteilungen," i. 91 *et seq*, and others having inscribed on them "Magen David," the signs of the zodiac, and Ps. lxvii., are still in use and may be obtained at any Jewish book-shop. When travail is difficult a Torah-roll is brought into the room.

Old representations show the employment of delivery-chairs (compare Müller-Schlossar, "Haggadah von Sarajevo"). In Rumania the child stays in the bed with its mother as long as she remains there, and a sefer (any holy book) is placed under its pillow. Into its first bath are put pieces of bread and sugar. In Poland the rocking of an empty cradle is avoided. If any one comes with a basket into a house in which there is a new-born child, a piece is cut from the basket and laid in the cradle, in order that the infant may not be robbed of sleep and rest. For the same reason care is taken not to remove from such a house utensils of any kind, especially such as hold burning coals.

Customs After Birth.

If the child is born with a caul, the latter is taken as a sign of good luck (the same is the case in Iceland; compare Grimm, "Märchen," ii. 59), and is preserved for a talisman. A boy is welcomed into the world with the words: זכר בא לעולם ברכה באה לעולם ("A boy is born to the world; a blessing has come into the world"), but at a girl's birth the walls weep. It is a belief in Rumania that until the completion of the first year of its life the child speaks with God and the angels. The latter show it golden fruit in its sleep: if it can grasp the fruit, it laughs; if it can not, it weeps. Elsewhere a child's laughing in its sleep is said to betoken that it is playing with the angel of death; therefore it is recommended that the child be lightly tapped on the mouth.

A child should not be kissed on the feet, since this is the custom at the "meḥillah prayer"; that is, on asking the dead for forgiveness. A child must not be held before a mirror, else a second child will be born within the year. If the hair be cut, the child will get an elf-lock. Scurf ("pareḥ"; compare Lev. xiii. 12) gives promise of beautiful hair (compare "Mitteilungen," i. 81 on "ḥalaḳah"). The woman who has been delivered must not be left alone. Under her pillow or under the mattress is laid a knife, without which she may never leave her bed. Or a dagger is stuck in the ground near her head; and daily for thirty days it is carried three times around her couch. In northern Germany this serves to guard against the werwolf (Wuttke, "Der Deutsche Volksaberglaube der Gegenwart," p. 260), or, according to Grimm ("Mythologie," xc.), against the wicked fairies (for the customs among the Romans see Pliny, "Historia Naturalis," xxxiv. 44). While making the circuit with the dagger about the bed the following verses are sung:

"Ich mache einen Kreis
Den Gott wohl weiss. . . .
Also mancher Ziegel ist auf diesem Dach,
Also mancher Engel bei uns wach!"

(Translation.)

I make a circle
(Which God well knows):
As many tiles as are on this roof,
So many angels keep watch o'er us!

At a hard labor three or four women pray:

"Auf meinem rechten Fuss tret' ich,
Gott, den Herrn, bitt' ich,
Dass er entbind."

(Translation.)

I press upon my right foot,
God, the Lord, entreating,
That He may deliver!

During the same thirty days in which the dagger is carried about the bed the school-children recite the evening prayers in the lying-in chamber, in order to keep off the "Benemmerin" (pixies); that is, elves. In Hamburg, for the protection of mother and child a skein of red silk is bound about the child's wrists (see "Am Urquell," iv. 96). Of efficacy against "Frau Holle" is the "Holle Kreisch" (compare Löw, *l.c.* p. 105; Bodenschatz, "Kirchliche Verfassung," iv. 73; "Mitteilungen," iv. 146, v. 7). Here may be mentioned the custom existing in Breslau of scattering almonds and raisins on the first Simḥat Torah after birth. The night before circumcision (watch-night or wheat-night), and in Palestine every night between birth and circumcision, for the protection of the child the people in the house "study" (compare Grünbaum, in Winter and Wünsche, "Die Jüdische Litteratur," iii. 587). At Salonica a ballad is sung on the watch-night (compare "Rev. Etudes Juives," 1896, ii. 138 *et seq.*). In Palestine, on the night before the circumcision an oil-lamp with many wicks is brought into the house, and there is general rejoicing. In Upper Silesia the knife for circumcision must be in the house the night before the ceremony. The Friday evening before circumcision ("Zakar") a feast is spread, to which every one is welcomed. In Hamburg, peas with pepper, whisky, and cake are provided; among the Portuguese, nasturtium seeds; in Poland, "fristtlech" ("faworiski"; that is, a thin pastry mixed with oil), round peas, and mead ("Mitteilungen," i. 100).

Most of these customs and superstitions are not of Jewish origin; but, as a review of Grimm's "Mythologie" and Wuttke's work (see bibliography below) shows, they have been borrowed from neighboring peoples.

For parturient women the regulations are the same as for the Niddah. At the birth of a male the bath (miḳweh) may not be taken before the expiration of eight days; at the birth of a female, not before fifteen days, provided clean white linen has been put on and the seven days of purification have taken place within that time. Where it is the custom for the women to visit the miḳweh at the end of forty days after bearing a male, and fifty after bearing a female, regulations are made accordingly (Yoreh De'ah, 19, 4).

CHILDREN, SONG OF THE THREE. See Daniel, Book of.

CHILDREN OF GOD. See God's Children; God's Son.

CHILE: A republic of South America, bounded by Peru on the north, Bolivia and the Argentine Republic on the east, and the Pacific Ocean on the south and west. Soon after the discovery of the American continent many Jews, professed and secret, settled in the different sections of South America, and changed their places of residence according to the pressure of the Inquisition. At the beginning of the sixteenth century many New Christians ("Christianos Nuevos") who had recently arrived at Callao, Peru, drifted to Santiago, Chile. It was not long before the spies ("familiares") of the Holy Office ferreted them out, accumulating evidence as to their antecedents from Buenos Ayres, Mexico, and the cities of the Old World, until sufficient data had been secured to warrant their apprehension. Thus, an accused Jew would be imprisoned in Chile, tortured until he confessed, and, sometimes after languishing for years in the secret dungeons of the tribunal in Santiago, finally be surrendered to the secular arm for execution in Cartagena or Lima. The martyrdom of the scholar and theologian Francisco Maldonado de Silva, whose trial was a cause célèbre, is a case in point. He suffered imprisonment in Chile, and was burned at an auto da fé in Lima Jan. 23, 1639. Nor was his case an exception to the rule. In the following paragraphs will be found the first summary in English of these trials for Judaizing.

Hesse a circle is drawn with chalk on the floor, and the verse, "My help cometh from the Lord," etc. (Ps. cxxi. 2), is written within it. In Kurdistan and elsewhere in the Orient, sweet-smelling herbs are burned in a censer, with which first the synagogue and then the lying-in room are perfumed. In Poland the Book of Raziel is laid under the head of the woman, and white cloths are hung at the windows and around the bed.

In older Jewish recipe-books ("Mitteilungen," v. 58 *et seq.*) the following directions are given:

CHILDREN, SONG OF THE THREE. See Daniel, Book of.

CHILDREN OF GOD. See God's Children; God's Son.

CHILE: A republic of South America, bounded by Peru on the north, Bolivia and the Argentine Republic on the east, and the Pacific Ocean on the south and west. Soon after the discovery of the American continent many Jews, professed and secret, settled in the different sections of South America, and changed their places of residence according to the pressure of the Inquisition. At the beginning of the sixteenth century many New Christians ("Christianos Nuevos") who had recently arrived at Callao, Peru, drifted to Santiago, Chile. It was not long before the spies ("familiares") of the Holy Office ferreted them out, accumulating evidence as to their antecedents from Buenos Ayres, Mexico, and the cities of the Old World, until sufficient data had been secured to warrant their apprehension. Thus, an accused Jew would be imprisoned in Chile, tortured until he confessed, and, sometimes after languishing for years in the secret dungeons of the tribunal in Santiago, finally be surrendered to the secular arm for execution in Cartagena or Lima. The martyrdom of the scholar and theologian Francisco Maldonado de Silva, whose trial was a cause célèbre, is a case in point. He suffered imprisonment in Chile, and was burned at an auto da fé in Lima Jan. 23, 1639. Nor was his case an exception to the rule. In the following paragraphs will be found the first summary in English of these trials for Judaizing.

Earliest Victims of Inquisition.

The case of Luis Noble or Luis Duarte (see Duarte) is probably the first on record. A Portuguese by birth, he served as a soldier in Chile, and was arraigned before the tribunal at Callao for stealing a crucifix. He confessed to being a Jew (Aug., 1614). Duarte does not seem to have been severely dealt with, escaping with a whipping and a light sentence. From 1636 to 1641 the following persons were accused and punished for Judaizing: Antonio de Acunha, from Arronchez, Portugal, aged 24 years; Antonio Corderes; Diego López de Fonseca, from Badajoz, aged 40 years; Manuel Baptista Perez, merchant, aged 46 years; Manuel de la Rosa. All these Jews were incarcerated in Chile, and their possessions were confiscated, which seems to have been the leading motive for these prosecutions for heresy. The above-named, it appears from another record, all suffered martyrdom in Lima at an auto da fé held in that city Jan. 23, 1639.

Don Manuel Baptista Perez was rated as a millionaire, and is described as the owner of a regal residence in Lima, which yet bears the name of "the house of Pilate." Don Diego Lopez de Fonseca, who was burned at the same auto da fé, was charged with selling goods cheaper to people who would enter his shop through the door, beneath the threshold of which he had buried a cross in mockery of Jesus, than to others (see Sobremonte). Juan de la Parra, a Chilean by birth, was imprisoned and sentenced by the Holy Office "for observing the religion of Moses," in 1661. There were several others who suffered imprisonment in Chile and martyrdom in Peru. J. T. Medina devotes two long chapters to leading Jewish cases in his history of the tribunal in Chile (see subjoined bibliography), and gives the whole trial of de Silva at length.

In 1680 proceedings were begun against Leon Gomez de Silva, or Oliva (as his name is spelled in another place). He was born in Portugal and resided at Santiago, and was denounced as a Judaizer. The accused was still alive in Santiago twenty years after proceedings were instituted against him; and his property, at one time confiscated by the authorities, had been restored.

The celebrated Hungarian-Jewish violinist, Michael Hauser, who had been the guest of Don Elias, President of Peru, in 1852, and who was everywhere received with extraordinary honors, was compelled to fly for his life in Santiago, charged with "conspiring diabolically to ruin Christian folk and, by reason of hellish art [his violin], in league with the devil." Thanks to the friendly offices of a humane Creole who had been charmed by his music, he hid until the arrival of a ship bound for Australia (see his "Aus dem Wanderbuche eines Oesterreichischen Virtuosen," Leipsic, 1859; also Ignaz Reich's "Beth-El," ii. 97). On a proposal made to Oliver Cromwell in 1655 to seize Chile, see Simon de Caceres.

Of the modern history of the Jews in Chile nothing definite can be ascertained. There are a large number of prosperous Jewish merchants in Santiago, mostly Europeans; but it is not known whether they form a religious community. For other data see South America.

CHILEAB: A son of David, born to him at Hebron. His mother was Abigail, whom David married after the death of her husband Nabal, the Carmelite (II Sam. iii. 3). The parallel account in I Chron. iii. 1 gives his name as "Daniel." In II Sam. iii. 1 the Septuagint reads *Δαλουία*, and in I Chron. iii. 1 *Δαμνιήλ*.) (The Alexandrine, however, reads here, too, *Δαλουία*.) It is impossible to restore the original name, although "Daniel" is much nearer than "Chileab." Berakot 4a (Bab.) gives a fanciful interpretation to the name. He was called "Chileab" because he shamed (מכלים) Mephibosheth in the Law.

E. G. H. G. B. L.

CHILIASM, CHILIAST, CHILIASTIC. See Millennium.

CHILION: A son of Elimelech and Naomi, the Bethlehemites who emigrated to Moab because of the severe famine in Judea (Ruth i. 2). This might have been the reason for the name "Chilion" (wasting), as also for his brother's name "Mahlon" (disease). In Moab, Chilion married Orpah (*ib.*), and, after living in that land for ten years, died there.

E. G. H. G. B. L.

CHILMAD: A name occurring in the long list of those nations supplying merchandise for Tyre (Ezek. xxvii. 23). The Septuagint reads *καὶ Χαρμάν*, which seems to point to Carmania. The Targum renders it "the Medes," which Rashi follows. David Ḳimḥi quotes his father's opinion that the word contains the root למד. The word would then mean "as taught." George A. Smith identifies the name with "Chalwadh." Of all these identifications that of the Targum is the simplest and, perhaps, the most acceptable; for other corruptions of the text have been noted in this verse, and it is probable, as Cheyne suggests, that the first syllable in כלמד came from the following רכל, the ר of which fell out owing to the preceding ר.

E. G. H. G. B. L.

CHIMHAM: A son of Barzillai, who supported David while the latter was in exile at Mahanaim. After the death of Absalom, Barzillai was invited to spend the rest of his days with the king; but he declined, and sent his son Chimham instead. In Jer. xli. 17 mention is made of the camp of Chimham near Bethlehem, from which it would seem that David bestowed upon him some land which passed on to his descendants in his name. This rendering is indicated by the Targum, and is accepted by Rashi and Ḳimḥi (II Sam. xix. 38, 39, 41; R. V. 37, 38, 40).

Chinese Name for Jews.

I. History: Whether China was known to Biblical writers is a matter of dispute among scholars. The majority of Bible commentators identify it with ארץ סינים ("the land of the Sinim"), whence the deported sons of Israel shall return to their land (Isa. xlix. 12); others, however, deny the identification. At any rate, the Jews in Persia from early times were connected with the silk trade, and, as a consequence, entered into direct relations with the "silkmen" ("Seres," from "ser" = שראים = "sericum" = "silk"), as the Chinese were called by the Romans.

(For the identification see commentaries of Gesenius, Delitzsch, Hitzig, Cheyne, and Orelli; also Kautzsch, in Riehm's "Handwörterbuch der Biblischen Alterthümer," *s.v.* "Sinim"; Von Strauss-Torney, in Delitzsch's "Isaiah," p. 712; Lassen, "Indische Alterthumskunde," 1867, i. 1028; further, Dillmann, Duhm, and Marti, in their commentaries; König, in Hauck's "Real-Encyc." *s.v.* "Sinim"; and Von Richthofen, "China," i. 436; for the "Seres," see Silk; Kohler, "The Jews and Commerce," in "The Menorah," 1887, p. 211; Heyd, "Gesch. des Levantehandels," i. 12, notes 1, 24; compare Mommsen, "Römische Gesch." v. 346, 465–470; Herzfeld, "Handelsgesch. der Juden," pp. 110, 308).

First Jewish Settlement.

At what time, however, the first Jewish settlement in China took place it is difficult to say. In all likelihood Jewish merchants immigrated, or changed a temporary sojourn into a permanent one, at various epochs. In an "Account Written by Two Mohammedan Travelers Through India and China" in 851 (Renaudot, transl., London, 1733, p. 42), it is stated that "the Jews have been settled in that empire [China] from time immemorial." Notwithstanding this, it is as hazardous to connect the first Jewish settlement in China with the Lost Ten Tribes ("Jew. Quart. Rev." xiii. 23) as it is an unwarranted skepticism to doubt the correctness of the tradition of the Chinese Jews themselves, which traces the first immigration back to the Han dynasty between 206 B.C. and 221 C.E. (Möllendorf, in "Monatsschrift," 1895, p. 329), and more exactly to the time of the emperor Ming-ti. This opinion is based upon the oral tradition of the Jews, reported by Father Brotier: "These Jews say that they entered China under the Han dynasty during the reign of Han Ming-ti [58–76 C.E.]." And further: "Several of these Jews have assured me that they arrived during the reign of Ming-ti" (Tobar, "Inscrip. Juives de Kai-Fung-Fu," p. 90). A certain Sulaiman (Jewish traveler of the ninth century) similarly claims that they entered in 65 C.E. Grätz (iv. 376) places the first immigration in the year 231 C.E., connecting it with the persecution of Jews in Persia, which caused also their first settlement in India; furthermore, the Jews of K'ai-Fung-Foo themselves claim that they received their religion from India (compare Finn, "The Orphan Colony of Jews in China," p. 40; but see passages cited below); but there is nothing to support this hypothetical date, or the statement of Glover in the "Babylonian and Oriental Record," vi. 247, 288; vii. 149, that the Jews were not in China before the fifth century. On the other hand there are many reasons for the assumption of an earlier date. The Chinese everywhere call the Jews "Tiao Kiu Kiaou" (the sect which extracts the sinews, after Gen. xxxii. 33); and this name itself, as a characterization of the Jews, indicates great antiquity. Rabbinical Judaism would have suggested more distinctive peculiarities of the Jews to the Chinese.

Jews Known as "Tiao Kiu Kiaou."

As will be shown later, there are also many intrinsic evidences of early Jewish settlements in China to be found in peculiar rites, preserved in connection with their synagogue; the records which will be cited below are obviously copies of older documents; and there is also the fact that the Arabic writers of the ninth and fourteenth centuries confirm the existence of old Jewish commercial colonies in China. Indeed, all facts tend to show a long and peculiar development of religious as well as social life of the Jews in China, the beginnings of which can hardly have been later than the first Christian century. K.

Concerning the history of the Chinese Jews in the Middle Ages a very few isolated facts are known. The two Mohammedan travelers of 851 who are quoted above state that at that period "many of them, for the sake of riches and preferment, have abjured their own religion." This is corroborated by Abu Zaid Ḥasan al-Sirafi (Reinaud, "Géographie d'Abulfeda," i. lxxxiii., Paris, 1848), according to whom "120,000 Mohammedans, Jews, Christians, and Parsees, who had come there for commerce, were in the revolt of Baichu in the year 884 massacred in Canfu, the chief port for all the Arabian merchants." It seems very probable that in the tenth century a new colony of Jews came into China, as Professor Chavannes declares: "Between 960 and 1126 (Sung dynasty) Jews coming from India brought, for the first time, as tribute to the court of China, stuffs from western maritime countries ('si yang poo'). The Jews came to China by sea, and not by crossing central Asia: they were members of the Jewish colonies settled in India. Lastly, their arrival does not appear to have been prior to the end of the tenth century C.E."

Marco Polo refers to the powerful commercial and political influence of the Jews in China in 1286 (see Murray's translation of "Polo's Travels," p. 99). Ibn Batuta (see "Monatsschrift," 1895, p. 329) in the fourteenth century speaks of Al-Khansa—which Möllendorf identifies with Hangchau; Neubauer ("Jew. Quart. Rev." x. 125) with Canfu—as having many resident Mohammedans, Jews, and Christians.

The Jews, who were never active participants in Chinese affairs, being taken for Mohammedans ("Hwei Hwei"), are nevertheless mentioned in Chinese annals:

"The Jews are referred to for the first time in the 'Yuen shi' under the year 1329, on the occasion of the reestablishment of the law on the collection of taxes from Dissenters. Mention of them is again made under the year 1354, when, on account of several insurrections in China, rich Mohammedans and Jews were invited to the capital in order to join the army. In both cases they are named 'Chu hu' (Djuhud)" ("Journal North-China Branch of Royal Asiatic Society," new series, x. 38).

(From "Jewish Quarterly Review.")

The Jews of K'ai-Fung-Foo.

Throughout the Middle Ages the European Jews had no knowledge of the existence of Jews in China; even Benjamin of Tudela, who mentions China (= צין; see Asher's ed. of the "Itinerary," i. 194, ii. 189), seems to know nothing about them. It was through Catholic missionaries in the seventeenth century that the first information reached Europe of a Jewish community, consisting of about five hundred or six hundred members, in K'ai-Fung-Foo, the ancient capital of Honan; of one at Hangchau-Foo; and of others in other Chinese towns. But owing to the existence of an ancient synagogue at K'ai-Fung-Foo, which, though rebuilt several times, had preserved the oldest records of Jewish settlements, the interest of the historians was centered upon the Jews there; and the inscriptions in the Chinese language found on its marble tablets, dating from the years 1489, 1512, and 1663, which have been often translated and published, have cast unexpected light upon a hitherto entirely unknown chapter of Jewish history. The following abstracts of these inscriptions, taken from "Inscriptions Juives de Kai-Fung-Fu," Shanghai, 1900 (see "Jew. Quart. Rev." xiii. 20), give an insight into both the history and the character of the Chinese Jews.

The Synagogue Records.

The inscription of 1489 referring to the immigration states: "Seventy families came from the Western lands offering tribute of cotton cloth to the emperor, who allowed them to settle at Peen-lang" (K'ai-Fung-Foo). In 1163 the synagogue was erected by a certain Yen-too-la; and in 1279 it was rebuilt on a larger scale. In 1390 the Jews were granted land and additional privileges by Tai-tsou, the founder of the Ming dynasty. In 1421 permission was given by the emperor Yen-Tcheng, a physician greatly honored by him, to repair synagogue, incense for use therein being presented by the emperor. In 1461 the synagogue was destroyed by flood, but was restored by a prominent Jew. New copies of the Law were procured; and the table of offerings, the bronze vase, the flower-vases, the candlesticks, the Ark, the triumphal arch, the balustrades, and other furniture were presented to the synagogue by prominent members of the Jewish community.

The end of the inscription of 1489 reads:

"Composed by a promoted literary graduate of the prefecture of K'ai-Fung-Foo, named Kiu-chung; inscribed by a literary graduate of purchased rank, belonging to the district of Tsĕang-Fu, named Tsaou-tsò; and engraved by a literary graduate of purchased rank, belonging to the prefecture of K'ai-Fung-Foo, named Foo-joô. Erected on a fortunate day, in the middle of summer, in the second year of Hung-chê, A.D. 1488 [read 1489], in the forty-sixth year of the seventieth cycle, by a disciple of the religion of Truth and Purity."

In an inscription of 1512 set up by a Chinese mandarin it is stated: "Adam the first man was from Teen-chou in the West." [This seems to point to India or Ceylon as the Chinese Eden, as does also, perhaps, a rather obscure sentence in the previous (1489) inscription: "Our religion comes originally from T'heen-chuh" = India.—K.]

High Reputation of Chinese Jews.

Referring to the immigration, this inscription says: "During the Han dynasty this religion entered China. In 1164 a synagogue was built at Peen [K'ai-Fung-Foo]. In 1296 it was rebuilt. [The dates in Tobar's and Glover's translations differ slightly.] Those who practise this religion are found in other places than Peen [K'ai-Fung-Foo]; but, wherever they are met with, they all, without exception, honor the sacred writings and venerate Eternal Reason in the same manner as the Chinese, shunning superstitious practises and image-worship. These sacred books concern not Jews only, but all men, kings and subjects, parents and children, old and young. Differing little from our [the Chinese!] laws, they are summed up in the worship of heaven [God], the honor of parents, and the veneration of ancestors." Speaking of the Jews themselves, the Chinese monumental testimony continues: "They excel in agriculture, in merchandise, in magistracies, and in warfare, and are highly esteemed for integrity, fidelity, and a strict observance of their religion."

At the end of the inscription of 1512 occurs:

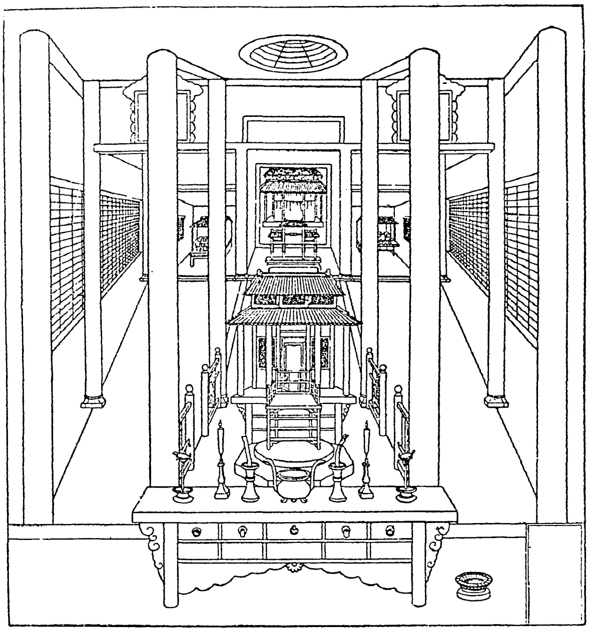
"This tablet was erected by the families Yen, Lè, Kaou, Chaou, Kin, E, and Cheng, at the rebuilding of the synagogue, in the first month of autumn, in the seventh year of Chíng-tih, of the Ming dynasty, A.D. 1511 [read 1512]."

Another inscription dated 1663, by a Chinese mandarin, afterward minister of state, *begins in the same manner as the first two*, dwelling first on the virtues of Adam, Noah, Abraham, and Moses, and then on the conformity of the Jewish law and literature with those of the Chinese. After relating the history of the Jewish settlement, it gives a graphic account of the rebellion which caused the fall of the Ming dynasty in 1642 and the destruction of the city, the synagogue, and many Jewish lives, and of the rescue of the sacred writings by a Jewish mandarin, who, with the help of the troops, restored the city, and together with his brother rebuilt the synagogue in 1653 (see CHAO YNG-CHENG). Only one complete scroll of the Law having been recovered from the waters, this was placed in the middle of the : and twelve other scrolls were copied and placed around it. Other holy writings and prayer-books were repaired by members of the community, whose names are perpetuated in the tablet, together with the names of all the dignitaries who took part in the restoration.

Commercial and Social Decline.

So long as the Jewish inhabitants of China continued to enjoy the imperial protection as mighty men of commerce, their Persian brethren furnished them with all the necessary means of religious education. Their commercial and social decline broke off their connection with the West; and a state of ignorance followed. Thus were they found by the Catholic missionaries in the seventeenth century, and in a worse condition by the Protestant missionaries—both endeavoring to convert them, until the Chinese government interfered with their attempts.

At the beginning of the seventeenth century the founder of the Jesuit mission at Peking, Father Matteo Ricci, received a young Jew who came to see him, declaring that he worshiped one God. At the mission, seeing a picture representing the Virgin with the child Jesus, he believed she was Rebekah with Esau or Jacob, and said that he came from K'ai-Fung-Foo, in the province of Honan, where ten or twelve families belonging to his religion dwelt, having a synagogue, in which there were books written in the language (Hebrew) of a Bible shown to him by Ricci. Too old to travel, Ricci sent to K'ai-Fung-Foo a Chinese Jesuit. Later, the Jesuits Aleni (1613), Gozani (1704), Gaubel, and Domenge (Father Tobar, "Inscriptions Juives de Kai-Fung-Fu," Shanghai, 1900), brought with them much information from K'ai-Fung-Foo, which they had visited.



Interior of the Synagogue at K'ai-Fung-Foo, China.
(From "Jewish Quarterly Review.")

When the existence of Jews in China became known to their European brethren, steps were taken to communicate with them by Isaac Nieto, haham of London (1760), who addressed a Hebrew letter to them imploring them to give information of their origin, their condition, and their needs. Their answer, written in Hebrew and Chinese, has disappeared. In 1842 James Finn, British consul at Jerusalem, interested himself in these Chinese Jews; and a letter which he received from them (1870) in reply to his own, printed in his work "The Orphan Colony of Jews in China," 1872, disclosed the sad fact of their utter destitution and religious decay. But this state of affairs had been made known as early as 1850 by Dr. Smith, Bishop of Victoria, after inquiries made on behalf of the London Missionary Society.

In order to secure information of the Chinese Jews at K'ai-Fung-Foo, a number of missionaries and Jewish merchants were sent thither. They reported that a few families, Jewish in name only, but sharply differentiated from the surrounding heathens and Mohammedans, lived there in abject poverty. They could read no Hebrew, had not had a rabbi for fifty years, intermarried outside the faith, and preserved only a few ceremonies and names of holy days.

> "The expectation of a Messiah seems to have been entirely lost. The rite of circumcision, which appears to have been observed at the period of their discovery by the Jesuits two centuries ago, had been totally discontinued. . . . They had petitioned the Chinese emperor to have pity on their poverty, and to rebuild their temple. No reply had been received from Peking; but to this feeble hope they still clung. Out of seventy family names or clans [see above] not more than seven now remained, numbering about 200 individuals in all, dispersed over the neighborhood. A few of them were shopkeepers in the city; others were agriculturists at some little distance from the suburbs; while a few families also lived in the temple precincts, almost destitute of raiment and shelter. According to present appearances, in the judgment of native messengers, after a few years all traces of Judaism will probably have disappeared, and this Jewish remnant will have been amalgamated with and absorbed into surrounding Mohammedanism" (Smith, "The Jews at Kai-Fung-Fu," London, 1851, *passim*: "Jews in China," in "North-China Herald," No. 25, Jan. 18, 1851).

Two of the Chinese travelers were sent a second time to K'ai-Fung-Foo, and returned to Shanghai in July, 1851, bringing with them new information which corrected in part the previous reports:

> "During their former visit our travelers, by mistaking family names for individuals, greatly underrated the number of the Jewish community. Circumcision also appears to be practised, though the tradition respecting its origin and object appears to be lost among them."

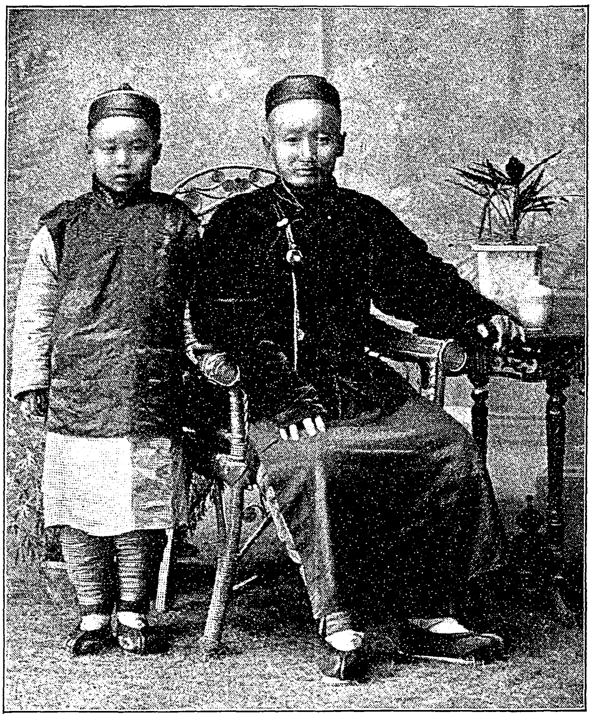
Attempts to send Jews to offer a helping hand to the forlorn brethren and to revive the colony were made in England and in the United States in 1852 and 1864, but without success, owing to the occurrence of the T'ai-P'ing rebellion, the federal war, and the death of Benjamin II., the Jewish traveler, who had interested himself in them (see Benjamin II., "Acht Jahre in Asien und Afrika," 1858, p. 157, and the appeal made in the "Jewish Chronicle" for April 29, 1864).

After the T'ai-P'ing rebels had left the Yang-tse

Attempts to Rehabilitate Colony.

River, going northward in 1857, the Jewish colony of K'ai-Fung-Foo was scattered with the rest of the population, and its members fled to various places, even to the seaports. Two or three of these were known to the present writer. They had all of the characteristic features of those of their race who came to Shanghai in 1851, although they were dressed like the other Chinese and wore a cue. Most of them returned to K'ai-Fung-Foo.

The information given by Aaron Arnauld in 1855 (see Benjamin II., *l.c.*); by A. P. Martin, the American missionary, in his work "A Cycle of Cathay" (see also "Monatsschrift," 1895, p. 328); by Liebermann, in his report to the Anglo-Jewish Association (see "Jew. Chron." July 11, 1879); and, finally, by Lehmann, an officer of the German army at Kiau-Chau ("American Hebrew," Jan. 12, 1900), has given the impulse to an agitation which promises to bring relief and possibly reinstation to the orphan colony (see "Jew. Quart. Rev." xiii. 40; "Jew. Chron." June 22, 1900, and Aug. 28, 1902). According to Aaron Arnauld, cousin of Aaron Arnauld, the grand rabbi of Strasburg (see Benjamin II., *l.c.*), many Jews have emigrated, during the Chinese wars with the Tatars, to Kiang-su, to Amoy, and to Peking; but they have no synagogue in those places. A number of Jews have under English protection removed to Shanghai and Hongkong, where they have engaged in the opium and cotton trades.



Jews of K'ai-Fung-Foo, China.
(From a photograph.)

In 1900 the community of K'ai-Fung-Foo numbered 140 souls, without a leader, synagogue, or any well-defined system of education. Since 1900 renewed efforts have been made by the Society for the Rescue of the Chinese Jews, looking toward the restoration of the Jewish religion at K'ai-Fung-Foo. Several Jews of Shanghai have interested themselves in this work.

G. H. Cr.

The Synagogue at K'ai-Fung-Foo.

Peculiar Religious Rites.

II. Religious Customs: The synagogue of K'ai-Fung-Foo, since 1870 a heap of ruins, is described by the Jesuit fathers of the eighteenth century as having covered a space from 300 to 400 feet in length and 150 feet in width, with its four courts facing the west; that is, toward Jerusalem (see I Kings viii. 38; Dan. vi. 11). In the center of the first court stood, surrounded in Chinese fashion by trees, a large triumphal arch, bearing an inscription in Chinese characters recording the dedication of the building to the Creator and Preserver of all things. The bath-houses and lavatories in these precincts were apparently used for ablution in preparation for divine service. The second court, entered by a great gate, was opened only on special occasions. Dwellings for the keepers of the edifice flanked its northern and southern walls. The third court, containing reception-rooms for guests, led through another triumphal arch into memorial chapels on each side. The fourth court consisted of two divisions separated by a row of trees. In the center of one stood a large brazen vase of incense and a marble lion upon a pedestal, on either side of which there was placed a brazen vase filled with flowers—certainly in accordance with Chinese customs and views. Adjoining the northern wall, however, was a recess in which, in conformity with Gen. xxxii. 33, the sinews were extracted from the animals slain for food—an institution all the more remarkable since nowhere else is the synagogue chosen for that practise. The Chinese were so impressed by it that they gave the Jews the name of "sinew-pluckers." The second division of the court led, through an empty space in its center, into the "Hall of Ancestors" to the right and the left. Here at the vernal and autumnal equinoxes veneration was paid in Chinese manner to the Jewish patriarchs. The mode of veneration, however, differed from the Chinese in that only the names of the Biblical ancestors were written on a tablet, and no picture was presented. Further, instead of the animal sacrifices mentioned in the inscription (see below), incense was used, a censer being assigned to each patriarch; the largest one to Abraham as the most venerated, the rest for the other patriarchs (the twelve sons of Jacob), Moses, Aaron, Joshua, Ezra, and other Biblical personages, both men and women. In the open space between these chapels tabernacles ornamented with flowers were erected every year at the Feast of Tabernacles.

The synagogue proper—an edifice about 60 x 40 feet, to which a portico with a double row of four columns formed the entrance—had in the center a magnificent elevated chair with embroidered cushions, upon which the scroll of the Law rested while being read. This was called the "chair of Moses" (compare Matt. xxiii. 2; "Rev. Et. Juives," xxxiv. 299, xxxv. 110; see ALMEMAR). In front of this a table was placed, upon which the name of the emperor was written in golden letters, accompanied by the prayer "May he live ten thousand myriads of years!" Over the chair of Moses was a dome with the "Shema' Yisrael," "Baruk shem kebod malkuto," and other Hebrew sentences inscribed in golden Hebrew letters.

On a large table by the door stood six candelabra having three different kinds of light, a vase for incense, and a tablet recording the generous donations of incense by the emperors of the Ming dynasty. A laver for the washing of hands (probably for the priests before reciting the benediction) stood near.

Holy of Holies.

At the extreme end of the synagogue was the Holy of Holies (which was totally dark) containing the Ark. In the latter were placed the thirteen scrolls of the Law, each in a separate case and enclosed in silk curtains; that in the middle, which was the one most venerated, representing Moses, and the others representing the twelve tribes. The whole of this part of the synagogue was elevated, stairs leading up to it on both sides, and was inaccessible to any one but the rabbi and the priests, probably because the scrolls were too sacred to be handled by any but the rabbi, and because the priests used the place for the "dukan," or blessing, both priests and rabbi undergoing ablution before the services. The place, however, regarded with especial reverence as the Holy of Holies, bore the name "House of Heaven [of God], Bet-El." The name given to the synagogue in general was "Li-pai-se" (Place of Ceremony, or, according to others, Weekly Meeting-House), which seems to indicate that it was used only on Sabbath for service.

As in most Eastern countries, the worshipers put off their shoes on entering the synagogue. During service they wore a blue head-dress in contradistinction to the Mohammedans, who wear a white one. A remarkable custom prescribed that he who read the Law should cover his face with a transparent veil of gauze, in imitation of Moses (Ex. xxxiv. 33), a practise unknown otherwise, but to which Paul seems to allude as being well established in his time, when he says: "For until this day remaineth the same veil untaken away in the reading of the Old Testament" (II Cor. iii. 14).

At the side of the reader stood a monitor, to correct his reading if necessary (this is probably a survival of the meturgeman). The practise of calling up laymen to read from the Law does not seem to have been known. In the inscription of 1489 these rules are given regarding divine service:

"Thrice a day we pray: morning (at the fourth hour), noon, and evening (at the sixth hour)." This corresponds with Ps. lv. 18, not with the Mishnah Ber. iv. 1. "The worshiper first bends his body (השתחויה); then he offers the silent prayer, swaying the body to and fro; and at the close he retreats three paces and then advances five, afterward turning toward the left and the right, and finally looks upward and downward in order thus to profess the belief that God is everywhere" (compare R. Akiba in Ber. 31a).

Very singular, and indicative of powerful Chinese influence, is the following: "It is incumbent upon the Jew to venerate his ancestors. Twice in the year—in spring and in autumn—he offers them oxen and sheep together with the fruits of the season" (compare Tobit iv. 17; Tosef., Shek. i. 12). Noteworthy also are the following passages: "Four days every month are devoted to purification, fasting, and charitable acts" [whether these are Fridays, the preparatory days for the Sabbath, or the four lunar phases of each month, is not clear]. "Each seventh day is devoted to rest, and a fresh period of good deeds commences anew." Here reference is made to the ancient Chinese work, the "Book of Diagrams." "In the fourth season of the year the Jew places himself under severe restraint for seven days [seven in place of the Ten Penitential Days]. One entire day [Day of Atonement] he abstains altogether from food, devoting the time to prayer and repentance."

Sabbaths and Festivals.

The Sabbath and festivals were, indeed, strictly observed by them, including even the Feast of Simḥat Torah, when Pater Domenge saw them carry the thirteen scrolls of the Law in procession round the Bet-El Ark; the Song of Moses, however, was read the day before, on Shemini 'Aẓeret. Services for the Fast of Ab and for Purim are also included in their liturgies. Their celebration of the New Moon as a festival is proof of a pre-Talmudic tradition (compare Soferim xix. 9). Their calendar was regulated by the moon like that of the rest of the Jews, and like that of the Chinese. In this connection the fact should be noted that their division of the Torah is into fifty-three weekly portions for the Sabbaths of the year, as is stated also in the account of the handing down of the Law given in the inscription of 1489:

Abraham is "the nineteenth in descent from Adam, who in the year 146 of the Chow dynasty (2108 B.C.) became the founder of the religion of the One God, denouncing the worship of images. His sublime doctrine was submitted to Moses, who in the six hundred and thirteenth year of the Chow dynasty (1641 B.C.), after forty days' stay on Mount Sinai spent in fasting and in communion with God, brought down the Law. From him were the fifty-three portions of the Torah, together with the tradition handed down to Ezra, the great reformer and contemporary of the founder of the Chinese religion [Confucius]."

This division differs from the Masoretic tradition, which, as a rule, has fifty-four portions (see Zunz, "G. V." p. 4, note *cc.*, where only two exceptional authorities are quoted); it seems to have been based upon the regular fifty-two Sabbaths of the year, with an additional parashah (Deut. xxxiii.-xxxiv.) for Shemini 'Aẓeret or Simḥat Torah. As will be seen further on, they had also Hafṭarot for the Minḥah service, which, again, differed from Talmudical custom, and had only its parallel in some Babylonian (or ancient Persian?) congregations (see Shab. 116b; Rapoport, "'Erek Millin," pp. 170 *et seq.*). Their pronunciation of Hebrew was found by the Jesuit fathers to correspond with the one generally accepted by the Jews; also their views of the Merkabah and of the future. Bibliomancy was practised by them. If the statement in Finn's "The Jews in China" (p. 7) be correct, they were not particular in regard to eating forbidden animals.

Their literature also bears the stamp of various epochs, a fact not fully kept in mind by Jewish writers on the subject. According to a description given by the missionaries (Finn, *l.c.* pp. 28-48), the following classes of books were deposited in the Bet-El Ark besides the scrolls of the Law: (1) The Ta-King, or Temple Scripture, containing the fifty-three parashiyyot for the Sabbaths of the year, written in large letters with the vowel-points, accents, and other scribal signs. (2) The Haftarah, or "supplementary books," containing selected portions from Joshua, Judges, Samuel, Kings, and the Later Prophets. (3) The historical books—probably more correctly, as Finn thinks, the Hagiographa, comprising Esther, Ezra, Nehemiah, the first chapters of Chronicles, and the two books of the Maccabees. These last, together with Judith and Ben Sira, in their possession, are another indication of a greater antiquity than has been assigned them by many writers. (4) Expositors. What these books contained was not ascertained by the Catholic fathers; possibly they were of a Midrashic character, and, if so, they would be of great value to students if they could be obtained. (5) Ritual books, about fifty in number, one of which bore the title "Minḥah Tamid" (Perpetual Afternoon Service), and contained besides the prayers the readings for each Sabbath afternoon of the year and a special Minḥah Maftir (Hafṭarah). A special Minḥah for the New Moon festival was also pointed out.

Their Literature.

Their liturgy, as preserved in the books taken to Europe, bears quite a different character. These books, after careful examination by Neubauer and Elkan Adler ("Jew. Quart. Rev." viii. 123, x. 584), have been shown to belong to the geonic time—some of the piyyuṭim are compositions of Saadia—and they were introduced into China from Persia. The ritual is decidedly Persian; and the directions for the prayers, the translations of parts of the piyyuṭim, as well as the colophons at the end of the Pentateuch sections, are in Persian. Parts of the Mishnah are quoted in their prayer-book, but nothing from the Gemara.

Their Liturgy.

The Pentateuch shows observance of the same soferic rules regarding the letter "waw" and the ביה שמו as are found in the Yemenite scrolls (see G. Margoliouth, in "Cat. Hebrew and Samaritan MSS. Brit. Mus." 1899, p. 3, No. 6). The Aramean language is used in special supplications and songs; also in the announcement of the New Moon, which is strongly tinged with Messianic hopes. So also in the Elijah song for the close of the Sabbaṭh. In the "Hazkarat Neshamot" seven Biblical men—Abraham, Isaac, Jacob, Moses, Aaron, Elijah, and Elisha (perhaps Joshua and Elijah originally)—and seven Biblical women—Sarah, Rebekah, Rachel, Leah, Jochebed, Miriam, and Zipporah—are mentioned as representatives of the seven classes of saints who dwell under the tree of life in Eden. The Pesaḥ Haggadah is almost the same as that of the Yemen Jews. As Elkan Adler ("Jew. Quart. Rev." x. 601) suggests, the שליח ("messenger") who signed his name as copyist upon the Pentateuch was the typical transmitter of Persian rites, rituals, and writings to these Chinese Jews. Another characteristic name for a copyist is "ha-melammed" (the teacher). Some of the writings mentioned above were first made accessible to European scholars when brought to Shanghai from K'ai-Fung-Foo by the two Chinese travelers in 1851, as is narrated in the following extract:

> Six of the twelve rolls of the Law, which they saw during their previous visit, each containing a complete copy of the whole Pentateuch, were purchased for four hundred taels of silver (about £130) from the Jews duly assembled to the number of 300 persons; and the manuscripts were conveyed in open day from the synagogue to the lodgings of our travelers. They are each written in a fine legible hand on thick sheepskins sewed together, and are without points, or any of the modern divisions into sections or even books. They are in excellent preservation, except one, which was injured by a flood during the Ming dynasty, but is considered critically of the greatest value. . . . Forty smaller Hebrew manuscripts were also brought away, which, on further examination, may possibly throw light on their early history and migration.

Facsimiles of the following Hebrew manuscripts, which were brought back by the two Chinese envoys from the synagogue, were published in 1851 at Shanghai (printed at the London Missionary Society's Press):

(*a*) Thirteenth section of the Law, ואלה שמות (Ex. i. 1-vi. 1). The last page contains the following note: "Holiness to Jehovah! The Rabbi Akiba, the son of Aaron, the son of Ezra, heard it. Shadiavor, the son of Bethuel, the son of Moses, read it. Mordecai, the son of Moses, witnessed it. And he believed in Jehovah: and He counted it to him for righteousness." (*b*) Twenty-third section of the Law, אלה פקודי (Ex. xxxviii. 21-xl. 38). The following note is appended to the last page: "Holiness to Jehovah! The learṇed Rabbi Phinehas, the son of Israel, the son of Joshua, the son of Benjamin, heard the reading. I have waited for Thy salvation, O Jehovah, Amen."

E. C. K.

CHINNERETH, also **CHINNEROTH**: 1. The sea marking the eastern boundary of the Israelitish possessions, whence the boundary proceeded by the River Jordan to the Dead Sea (Num. xxxiv. 11). It also marked the western boundary of the trans-Jordanic tribes (Deut. iii. 17). In later times the sea was called Gennesaret or lake of Galilee; the modern name is Baḥr Ṭabariyyah (Lake of Tiberias). It is about 13 miles in length and 8 miles wide, its greatest width being a little north of the center. It is 680 feet below sea-level. The Jordan flows into and passes out of it. The lake itself is filled with various kinds of fish, and even in ancient times provided a livelihood for many fishermen. At present the land round the lake is sterile, but, according to the description of Josephus, was at one time very fertile.

2. In Josh. xix. 35, Chinnereth is the name of a town which by Talmudic authority is identified with Gennesor (Neubauer, "G. T." p. 214). It is of considerable antiquity, as it occurs in a hieroglyphic inscription of Thothmes III. (W. Max Müller, "Asien und Europa," p. 84).

CHINON, SIMSON OF. See Simson of Chinon.

CHIOS: Island in the Ægean Sea; Turkish possession, 344 miles west of Smyrna. It is not known with any certainty when the Jews first established themselves at Chios. According to the local legends reported by the traveler Joseph Benjamin II., the Jewish cemetery of the island contains the tomb of Jacob ben Asher, author of the "Ṭurim," who is said to have put in at the island in order to avoid shipwreck, and lived there for a number of years, until his death in 1340. The supposed tombstone of this learned rabbi is situated at the foot of a terebinth, but the inscription has become illegible. The tomb is regarded by the Jews as holy ground. Formerly troops of pilgrims from Smyrna met there, especially on the thirty-third day of 'Omer. The synagogue of the island of Chios is named after Jacob ben Asher.

Chios was an object of dispute in the Middle Ages among the Byzantine emperors, the Genoese and the Venetians; and it fell into the hands of the Ottoman Turks in 1595. Probably under the Turkish dominion the Jewish community of the island gradually grew. Toward 1700 Isaac al-Ghazzi, a rabbi belonging to a Smyrnese family of Talmudists, was chief rabbi of the island; he is the author of a Hebrew work, "Doresh Ṭob," a collection of discourses. Nothing further is heard of this community, although it continued to exist, for the magnificent marble tomb of Fernandez Diaz, a Jew of Salonica, dating somewhat prior to 1800, still attracts the attention of visitors to the cemetery.

The spiritual leaders of the community during the nineteenth century were R. Mordecai Aboab, R. Matathia Alluf, and R. Abraham Franco, who officiated for twelve years (1846–58). The chief event in the history of the Jews of Chios during that century was the earthquake of April 4, 1881. Twenty-one of them were killed, eight disappeared, and twenty-four were crippled. The Alliance Israélite Universelle sent aid to the island through its representatives at Smyrna. The catastrophe had some good results, however, for the ghetto, situated within the walls of the castle, was completely destroyed, and the Jews, determining to live outside the city, settled in the Frankish quarter, among the Greek Orthodox, Catholic, and Protestant inhabitants.

The Jews of Chios number only 200 in a total of 62,000 inhabitants, including Greek Orthodox, Roman Catholics, and Mohammedans. In 1885 they built, through public subscription, a fine synagogue in the Frankish quarter. As the community is too small to be elaborately organized, it has a lay president who guards the interests of his coreligionists before the government, and raises a tax (the "gabelle") on meat, which is the only revenue for paying the expenses of the synagogue and for contributing to the support of the two Jewish schools. The schools, which are both in the same building, are subsidized by the Alliance Israélite Universelle; together they count seventy pupils, fifteen of whom are Gentiles. Since 1890 Moses Issachar has been president of the community, succeeding his brother Judah, who died in that year.

CHIQUITILLA. See Gikatilla.

CHISDAI. See Ḥasdai; Ḥisdai.

CHITTIM (KITTIM). See Cyprus.

CHIUN: A word occurring in connection with "Siccuth" in Amos v. 26. Scholars have long been puzzled to know whether in this passage they are common nouns or proper names. "Siccuth" is probably the Assyrian "Sakkut" (Schrader, "K. A. T." pp. 442 *et seq.*), an epithet of Ninib and Anu. Ninib was identified with Saturn (Jensen, "Kosmologie," p. 136), the Assyrian name of which was "Kaiman" ("Kaiwan"). The Septuagint and Syriac readings give ground for holding that כיון originally stood in the Hebrew text in place of כיון (compare Barton, "Studies of Oriental Club of Philadelphia," p. 113; and Nowack, "Kleine Propheten," p. 143), the pointing of the latter being a Masoretic distortion on the pattern of שקוץ ("abomination"). "Sakkut" and "Kaiwan" occur together in Rawlinson, "Inscriptions of Western Asia," iv. pl. 52, col. 4, line 9, in a list of epithets (compare Zimmern, "Beitr. zur Kenntniss der Babylonischen Religion," i. 10). Probably they were introduced together here through Babylonian influence in a verse regarded by Wellhausen ("Kleine Propheten," *ad loc.*) and Nowack, on the basis of II Kings xvii. 30, as a gloss. Budde ("Religion of Israel to the Exile," pp. 67 *et seq.*) regards the verse as genuine, and the Babylonian influence as potent in the wilderness. Reuss and W. R. Smith ("Old Testament and the Jewish Church," 2d ed., p. 294) translate the two words as common nouns and find no trace of foreign worship in the verse, which they regard as genuine. This view is not so probable as the other.

J. JR. G. A. B.

CHMIELNICKI, BOGDAN ZINOVI: Hetman of the Zaporogian Cossacks; born about 1595; died at Chigirin Aug. 16, 1675. Unlike many other Little-Russian pupils of the Jesuits, Chmielnicki did not embrace Roman Catholicism, but early in life became a champion of the Greek Orthodox faith, to which most of the Cossacks and the Little-Russian peasants belonged. While still in the subordinate position of a "sotski" (an officer over a hundred) of the Cossacks, subject to the Polish magnate Koniecpolski, he was deprived by Chaplinski, the bailiff of Chigirin, of his estate of Subotovo. Chaplinski availed himself of Chmielnicki's absence to make a raid on the place, during which the young son of the owner received injuries from which he ultimately died, and Chmielnicki's (second) wife was carried off. In this raid Chaplinski was aided by the leaseholder of Chigirin, the Jew Zachariah Zabilenki. At another time, it is related, a Jew reported to the Polish government a secret treaty concluded by Chmielnicki with the Tatars. These personal indignities and injuries embittered him against the Poles and the Jews. Still, he was not without friends among the Jews themselves; for, according to Nathan Hannover, the Jew Jacob Zabilenki—possibly a relative of Zachariah—aided him to escape from prison when arrested by Koniecpolski.

It appears, therefore, that though his personal resentment influenced his decision to rid the Ukraine of the Jews, yet there is little doubt that it was his great ambition to become the ruler of the liberated Ukraine, which was the main motive that led him to instigate the uprising of the Little-Russian people against the Poles and the Jews. For years the people of Little Russia had been oppressed by the Polish landlord. Unwilling to attend to the details of administration himself, Chmielnicki made the Jew a go-between in his transactions with the peasants of Little Russia. He sold and leased certain privileges to Jews for a lump sum, and, while enjoying himself at the court, left it to the Jewish leaseholder and collector to become the embodiment of hatred to the oppressed and long-suffering peasant. The accumulated store of animosity was utilized by Chmielnicki in directing his cruel measures against the Jews. He told the people that the Poles had sold them as slaves "into the hands of the accursed Jews." With this as their battle-cry, the Cossacks let loose their wildest passions and most ruthlessly massacred about three hundred thousand Jews with such cruelties as the world had seldom witnessed (1648–1649).

For this great catastrophe the Jews might have prepared themselves had they taken warning from the uprising of the Cossacks in 1637, when about 2,000 Jewish leaseholders and tax-collectors were killed in Pereyaslav and its vicinity. This inexcusable short-sightedness may be accounted for in part by the influence of the cabalistic teachings which dominated the minds of the South-Russian Jews, and which, according to the interpretation of the Zohar by the cabalists, brought them to believe firmly in the coming of the Messiah in 1648.

It may be added that, in spite of his numerous massacres of Poles and Jews, Chmielnicki failed to secure the liberation of the Ukraine. See also Cossacks and Little Russia. H. R.

CHOBA or **CHOBAI:** A town included among those which the Jews fortified against the attacks of Holofernes. It is mentioned in two places (Judith iv. 4; xv. 4, 5). Its connection with Jericho in Judith iv. 4 has induced Reland to look for it in the neighborhood of that city. He identifies it with Coabis. Conder ("Pal. Explor. Fund Memoirs," ii. 231) seeks to identify it with Al-Makhubbi.

E. G. H. G. B. L.

CHOIR: A collection of singers with trained voices who take part in divine service and who are separated from the congregation. The first choir mentioned in the Bible is the one organized by the Levites for the Temple service, to be accompanied by musicians. The choir also sang at the offering of public sacrifices ("when the burnt offering began, the song of the Lord began," II Chron. xxix. 27) and at the wine-libation (Maimonides, "Yad," Ḳele ha-Miḳdash, iii.). Two priests with silver trumpets gave the signal for the choir to begin (Tamid vii. 3).

Levitical Choir in the Temple.

The prophet Samuel and King David are said to have subdivided the Levites into twenty-four orders, each to serve a certain day (Ta'an. 27b; compare I Chron. xxv.). Some acted as doorkeepers, and others were engaged as either singers or musicians. Each one was assigned his post in the choir or orchestra, and was not permitted, under penalty, to assume the position of another. Hence the choristers could not be instrumentalists, nor vice versa. Five years' preparation, from the age of twenty-five to thirty, was required of every Levite; this preparation included instruction in singing. This limitation, in vogue at the Tabernacle, was, according to the Talmud, eliminated in the Temple service, where ability to sing, and not age, was the qualification of the Levite chorister (Ḥul. 24a). At the dedication of Solomon's Temple the sons of the Levites accompanied the choir in singing the praise of God (II Chron. v. 13). These young Levites "sweetened" the music with their soprano voices, but were not permitted to use instruments, and were restricted from entering the priests' hall in the Temple before the adult Levites had begun to sing. They were not allowed to stand on the same platform with the latter, but had to take up a position on the ground below ('Ar. 13b). The Temple choir was composed of no less than twelve adult singers besides the young assistants.

The question whether vocal or instrumental music formed the principal service is decided in favor of the choir (Suk. 50b; Maimonides, *ib.*). Graetz infers that the twelve Levites mentioned in the Mishnah served in the dual capacity of singers and players "Kritischer Commentar zu den Psalmen," p. 65, Breslau, 1882), which is contrary to Maimonides, who states: "The instrumentalists were not included in the number of twelve. . . . Others who stood there were playing the musical instruments" ("Yad," *ib.* iii. 3).

Female Choristers.

Women took an active part in choir-singing. At the exodus from Egypt, Miriam formed a chorus composed of women, and sounded the praise of God to the accompaniment of drums and dance-music. It is said: "God gave to Heman fourteen sons and three daughters. All these were under the hands of their father for song in the house of the Lord" (I Chron. xxv. 5), from which passage some writers erroneously infer that women were included in the Temple choir. But the words "all these" refer only to the sons, and not to the daughters, as is proved by the number of choir members mentioned in the list (*ib.* 7–31; Weisel, *ad loc.*). Ezra mentions 200 singing men and singing women among those that returned from Babylon to Jerusalem (Ezra ii. 65); but for the Temple service only the *sons* of Asaph are counted (*ib.* iii. 10; compare Neh. vii. 67–xi. 22). The women choristers, however, were heard in dirges in honor of the dead. "All the singing men and the singing women spake of Josiah in their lamentations" (II Chron. xxxv. 25). R. Meïr says those were the wives of the Levites (Pirke R. El. xvii.).

After Temple Times.

The Rabbis, after the destruction of the Second Temple, issued a decree prohibiting all instrumental or vocal music, as a sign of national mourning: "The ear that listens to music should be [barren] deaf; any house where there is song should eventually be destroyed" (Giṭ. 7a). Later on, however, R. Hai Gaon contended that this referred only to Arabian love-songs. Maimonides permitted the choir to sing in God's praise at the synagogue and at all religious feasts ("Yad," Ta'aniyot, v. 14; Shulḥan 'Aruk, Oraḥ Ḥayyim, 560, 3).

R. Isaiah Hurwitz (died in 1573 at Safed, Palestine) regrets the choir's custom of prolonging their singing at the end of the benedictions, thus interfering with the prompt response of "Amen" by the congregation; also their arbitrary connection and division of the words and syllables, which produce a wrong and meaningless reading. "Surely the choir of our holy Temple was sweet and pleasing both to God and to men, with due respect to precision and correct pronunciation of every letter of the words. This example we must follow" ("Shene Luḥot ha-Berit," p. 253b, Amsterdam, 1698). See also "Sefer Ḥasidim," § 158, on the necessity for singing prayers and the praises of God.

Scientific Musical Choir in Later Times.

The modern musical scale was introduced into the synagogue at Venice about 1600. Six to eight members, who became masters of music, formed a choir and sang on every holiday the "Hallel," "En Kelohenu," "'Alenu," "Yigdal," and "Adon 'Olam." Some members objected to this innovation; and the question, submitted in 1605, was decided favorably by R. Judah Aryeh Modena, who was supported by the opinion of the following rabbis: Benzion Ẓarfato, Leib Saraval, Baruch b. Samuel, Ezra Panu of Mantua, and Judah b. Moses of Venice ("Te'udat Shelomoh," xxiv.).

Solomon Ḥazzan of Metz, in his manual for cantors, admits that a cantor can not get along without choristers, "just as it is impossible for the earth to exist without wind"; but he deprecates the low character of some of the singers, and their misbehavior in frequenting drinking-places, in neglecting to pray in the synagogue daily, and in chatting during the prayers when they attend on Saturdays and holidays (*ib.* xxiii.). He admonishes the choir to be careful in singing the Sabbath "Zemirot" at home, lest it appear that they praise God for remuneration only (*ib.* xvi.).

Among Ḥasidim and Reformers.

The beginning of the nineteenth century gave birth to two extreme parties: the Neo-Ḥasidim in Poland and the Reformers in Germany. While diametrically opposite in their views, both agreed that singing in the house of prayer is an essential part of the service. The Ḥasidim, however, opposed the church music and the special, organized choir, as they all joined in singing at prayers and sang the "Zemirot" at home. On the other hand, the Reformers not only chose a trained choir, but, through the influence of Israel Jacobsohn at Berlin in 1817, introduced the organ to accompany them (see ORGAN); and afterward permitted even a mixed choir of men and women. This action, according to Graetz, "History of the Jews," v. 563–572, called out strong protests from the Orthodox rabbis headed by R. Moses Sofer, as being prohibited according to the Talmud: "to listen to the voice of woman is leading to lusting after her" (Ber. 24a; Shulḥan 'Aruk, Oraḥ Ḥayyim, 75, 3). The male choir is still maintained in Orthodox synagogues. [A far more important question than that raised by the employment of female choristers, is whether non-Jewish choristers of either sex should be engaged in a Jewish synagogue; whether the most sacred parts of the service should thus be sung by persons unable to enter into the spirit of the religious community which they represent. It is greatly to be deplored that this question has never received the serious consideration on the part of modern congregations which it really deserves.—K.]

CHOLERA ASIATICA (In Hebrew sometimes חלי רע, "the bad disease"): A specific and communicable disease, characterized by violent vomiting and purging. It prevails endemically in some parts of India, and from time to time is diffused epidemically throughout the world. The mortality is about 50 per cent of all the persons attacked. The first appearance of the disease in Europe occurred in 1817, when it broke out in Lower Bengal and thence spread over Europe, until it disappeared in 1823. Since then the disease has appeared in Europe on six different occasions; viz., in 1826, 1837, 1846, 1863, 1882, and 1892–96.

Immunity of Jews.

According to all the etiological factors, excepting ALCOHOLISM, of course, the Jews should suffer from cholera more frequently than, or at least as often as, other races. But careful investigation has shown that during most of the epidemics Jews were affected to a lesser degree than non-Jews; indeed, during some epidemics they are said to have shown perfect immunity.

According to Boudin, the Jews in Algiers, notwithstanding the fact that they are overcrowded in small and dark dwellings, and often in underground cellars, enjoy better health than the inhabitants of other races. Thus during the cholera epidemic of 1844–45, the mortality per 1,000 of the population was as follows:

	1844	1845
Europeans	42.9	45.5
Mussulmans	32.4	40.8
Jews	21.6	36.1

During the epidemic of cholera in Budapest, Hungary, in 1851, while the mortality among Christians was 1.85 per cent, that among the Jews was only 0.257 per cent, or one-seventh as great. During the epidemic of 1866 there were in every 100 deaths in the general hospital 51.76 deaths from cholera, and in the Jewish hospital 34.0 only (Tormay).

From a pamphlet published in 1868 by Dr. Scalzi, professor of medicine in the University of Rome, it appears that in every 100 attacks of cholera in 1866, the Catholics had 69.13 deaths; the inhabitants belonging to other non-Jewish cults, 42.13; the Jews, 22.0 only. In proportion to the population the mortality from cholera would have been 0.45 per cent for the Jews, and 1 per cent for others.

London Epidemics.

Dr Mopother of Dublin ("Revue Scientifique," 1881, p. 625), in one of his lectures on public hygiene, states that there was noted a surprising immunity of the Jews in Whitechapel, London, during recent and former epidemics of cholera; and Mr. Wolff, surgeon to the poor of the Spanish and Portuguese synagogues in London, thus refers to the immunity of the London Jews in 1849:

> "They [the Jews] do not suffer from the depression caused by habitual intoxication. These circumstances in their favor enabled them during the epidemic of 1849 to enjoy an almost complete immunity from the disease, which raged with frightful violence in the immediate neighborhood of the district where they most congregate, and the sanitary conditions of which, as regards cleanliness, ventilation, etc., were decidedly unfavorable" ("Medical Times and Gazette," London, vol. vii., 1853, p. 356).

During some epidemics, however, the Jews are stated to have suffered severely. Thus, according to Hirsch, in Algiers and in Smyrna, in 1831, the Jewish population suffered more from cholera than the rest of the population. The same was the case in 1831 with the Jews in Poland, Jassy (Rumania), and many other places (Hirsch, "Handbuch der Historisch-Geograph. Pathologie," Erlangen, 1851, i. 129). From evidence collected by Boudin the mortality of the Jews during the cholera epidemic in 1831 seems to have been perceptibly higher than that of the non-Jews; but thirteen years later (as shown above) the exact opposite was the case.

During the last epidemic of cholera in Europe (1891–96), there is also evidence that in some places at least the Jews enjoyed a relative immunity from the disease. Thus in 1892 in Hamburg, Germany, according to Dr. J. J. Reincke ("Deutsche Medicinische Wochenschrift," 1893, p. 193), during the months of August and September there were buried in the general cemetery 6.4 times the average number of dead for the three previous years; in the Jewish cemetery, only 3.5 times as many. According to Dr. Georg Buschan ("Globus," lxvii. 47), there is evidence tending to show that in Berlin, Breslau, etc., the Jews suffered during the recent epidemics of cholera in Germany in a lesser degree and had a lower mortality than non-Jews.

In Germany and Russia.

Similar evidence is given concerning Russia. During the cholera epidemic in Nicolayev the Jews had a lower rate of morbidity and mortality than the non-Jews. In that city there were at that time about 75,000 inhabitants, of whom about 15,000 were Jews; that is, one Jew to four non-Jews. Among the latter the scourge attacked 756, of whom 382 died; among the former only 36 were attacked, and but 13 of these succumbed ("Vrach," 1893, xiv. 115).

Dr. Barazhnikov reported to the St. Petersburg Medical Society that during the epidemic of cholera in 1894 in the government of Mohilev the morbidity among the Jews was greater, and the disease, as a rule, ran a severer course, than among the non-Jews; but the percentage of mortality was smaller among the Jews. He adds that the fact must not be forgotten that the Jews in that locality, although generally poorer, are more intelligent than their neighbors, and take better care of their health ("Proceedings of the St. Petersburg Medical Society," 1895, p. 206).

As to the causes of this comparative immunity of the Jews from cholera, authorities differ. Some think that it is due to the Jews' regular habits of life, and to the fact that they are engaged mostly in occupations and professions which do not expose them to infection (Lombroso, Bordier, Lagneau, Boudin, Hirsch, etc.). But, as Buschan aptly points out, while this may hold good in epidemics of other infectious diseases, in the case of cholera the Jew should, according to present knowledge as to the propagation of the disease, be attacked more frequently. The Jewish population is engaged mostly in occupations which favor the infection of cholera. Second-hand clothing is usually bought by the Jews, and, according to Buschan, during epidemics of cholera they do an exceptionally large business of this kind.

Varying Opinions Respecting Immunity.

Buschan points out that the immunity of the Jews is due to a racial characteristic of a somatic nature, which enables them to resist infection better than the Aryan races. On the other hand, those who argue that the immunity is not due to any racial characteristic, point out that the disease attacks preferably people addicted to the abuse of alcohol, who suffer (as a result of this) from the various forms of dyspepsia common among habitual drinkers, and that people of temperate habits are seldom attacked. The Jews are known all over the world as an abstemious people, and their immunity is commensurate with their sobriety. The latter view seems to be borne out by facts observed by physicians practising among the Jews.

CHOR-ASHAN (R. V. **Cor-Ashan**): This is, perhaps, better given, with the earlier manuscripts (Baer), as "Bor-ashan." The Septuagint also confirms the latter spelling, although one reading gives "Beersheba." Chor-ashan (I Sam. xxx. 30) or Bor-ashan is probably the place known as Ashan.

E. G. H. G. B. L.

CHORIN (CHORINER), AARON: Hungarian rabbi; born at Weisskirchen, Moravia, Aug. 3, 1766; died at Arad, Hungary, Aug 24, 1844. At the age of fourteen he studied in the yeshibah of Rabbi Jeremias in Mattersdorf, Hungary, and two years later at Prague in the higher Talmudical school of Ezekiel Landau. Here he also learned German. Chorin married Dec. 26, 1783, and entered commerce; but his business career being unsuccessful, he accepted the post of rabbi at Arad in the spring of 1789, which position he occupied till his death.

His First Work.

In 1798 Chorin published his first pamphlet, "Imre No'am" (Words of Pleasantness), in which he argued that as the sturgeon had scales it was permitted as food according to Scripture. His opinion, although following that of Ezekiel Landau and other authorities, was strongly opposed by Mordecai Benet and his partizans. Rabbi Isaac Krieshaber of Páks wrote a refutation, "Maḳḳel No'am" (Staff of Pleasantness), which called forth a second pamphlet by Chorin, "Shiryon Ḳasḳassim" (Coat of Mail), Prague, 1799.

By his determined opposition to the traditional usages in Hungary, Chorin incurred the hostility of most of his colleagues. In the spring of 1802 he journeyed to the Somogy district. The favorable impression which his sermons made upon his Jewish hearers there induced him to consider himself as the future rabbi of this district, and on the title-page of a pamphlet he published he assumed this title. The rich and prominent Moses Lakenbacher, president of the congregation of Gross-Kanizsa, promised Chorin his influence with his brethren of the district; but when Lakenbacher became aware of the strong opposition of the conservative party against the reformer, he soon turned against him.

Opposition by the Orthodox.

At Prague in 1803 Chorin published "'Emeḳ ha-Shaweh" (Vale of the Plain), a work divided into three parts. The first and most important part, "Rosh Amanah" (Head of the Perennial Stream), in which he granted to the spiritual guides of the people authority to modify the traditional laws and adapt them to the requirements of the time, led to much opposition to him. Chorin treats of Maimonides' thirteen articles of faith, and gives evidence of knowledge rare among his Hungarian contemporaries. Next to the Halakah, Chorin also interpreted the Haggadah in a philosophical way. This method he applied in like manner to the Zohar, which he, far from all mysticism, considered as a rich source of speculative knowledge. This view referred only to the theoretic or intuitive, and not the practical, Cabala, the belief in which he considered as contradictory to sound reason. At the beginning of this book are printed the approbation of Rabbi Moses Münz and a eulogistic Hebrew poem of Rabbi Moses Kunitz. This work gave great offense to the Orthodox party, which thwarted the publication of a second edition, for which Chorin had prepared many corrections and additions. Mord. Benet wrote to the Arad congregation that the book contained heresies and must be burned. The congregation, however, stood by their rabbi; but some of its members sided with Benet, and their leader, a rich man, publicly insulted Chorin while he was preaching. The Arad board now applied to Moses Münz to certify that the book contained no heresies. Having given his approbation to the author, Münz was in a great dilemma, since he was urged by the Orthodox party to condemn Chorin and to inflict upon him an exemplary punishment. He concluded to yield to the insinuations, and Sept. 1, 1805, he invited two rabbis to come to Alt-Ofen to form with him a tribunal before which Chorin was summoned. The session of the court was prolonged to the next day, but then Münz failed to appear. Samuel Butschowitz, rabbi of Assod, now pronounced sentence that "Chorin must retract the contents of his book. Should he refuse to do so, his beard will be cut off as a penalty for his heretical transgressions." Thereupon Chorin, whom the populace had stoned in the courtyard of the synagogue, declared that he subordinated his views to those of the theologians of his time, and desired that his book be suppressed. The court also decreed a reduction of Chorin's salary, but the board of his congregation indignantly rejected this decree. Chorin appealed to the imperial government, which, June 24, 1806, annulled the judgment and condemned the leader of his adversaries at Arad to pay the expenses of the lawsuit; the same was also to be punished for his scandalous conduct on Sabbath Teshubah, 1804. Chorin declared that he forgave his adversary, and declined his claims for compensation of the expenses. To avoid further trouble, he determined to give up writing.

Sentence Pronounced.

Attitude Toward Reform.

The Reform movement among the Jews of Hamburg met his hearty approval. In "Ḳin'at ha-Emet" (Zeal for Truth), a paper written April 7, 1818, and published in the collection "Nogah ha-Ẓedeḳ" (Light of Righteousness), he declared himself in favor of reforms, such as German prayers, the use of the organ, and other liturgical modifications. The principal prayers, the Shema', and the eighteen benedictions, however, should be said in Hebrew, he declared, as this language keeps alive the belief in the restoration of Israel. He also pleaded for opening the temple for daily service. Influenced by Moses Münz, Chorin recalled this writing Feb. 19, 1819; but a year later he published "Dabar be-'Itto" (A Word in Its Time), in which he reaffirmed the views expressed in "Ḳin'at ha-Emet," and pleaded strongly for the right of Reform. A German translation by Löb Herzfeld appeared at Vienna. This directed upon him the attention of the progressive party in Austria and in Germany. Michael Lazar Biedermann, a prominent man, proposed the appointment of Chorin at the new temple to be erected at Vienna; but the government being opposed to it, Mannheimer was elected instead.

Consulted by Baden.

The government of the grand duchy of Baden asked Chorin (Feb. 3, 1821), through the banker S. Haber, for his opinion about the duties of a rabbi, and about the reforms in the Austrian states. Chorin answered by writing "Iggeret Elasaf," or "Letter of an African Rabbi to His Colleagues in Europe," which was published by M. I. Landau, Prague, 1826. In it he stated that the Torah comprised religious truths and religious laws, the latter partly applicable only in Palestine, partly obligatory everywhere. These may be temporarily suspended, but not entirely abolished, by a competent authority, such as a synod. Only ordinances and precautionary laws which are of human origin may be abrogated in conformity with the circumstances of the time. As for mere customs and usages (minhagim), the government, after having consulted Jewish men of knowledge, may modify or abolish them; but in no other way may it interfere with religious affairs. Chorin also pleaded for the establishment of consistories, schools, a theological seminary, and for the promotion of agriculture and professions among the Jews. Some of these ideas he carried out in his own congregation, which included a great number of mechanics. He succeeded in founding a school, and introducing liturgical reforms into the synagogue; even an organ was installed at his instance. He permitted the eating of rice and pulse during the days of Passover.

To his theory of a synod regulating and modifying Jewish laws and customs, Chorin always adhered. In his "Treue Bote" (Prague, 1831) he declared himself against the transfer of the Sabbath to Sunday, but expressed the opinion that, considering the requirements of our time, synods might mitigate the severity of the Sabbatical laws, especially in regard to traveling and writing.

In another treatise, "Hillel," which appeared at Ofen, 1835, he interpreted the prophetic promises about the reuniting of Israel to signify the establishing of a supreme religious authority at Jerusalem. "Hillel," in the form of a dialogue, and other contributions of his pen were published in the fourth volume of "Bikkure ha-'Ittim." In 1819 he wrote "Abaḳ Sofer" (The Dust of a Writer), published by M. I. Landau, Prague, 1828, containing glosses about Yoreh De'ah, Eben ha-'Ezer, the phylacteries, an exposition of Prov. i. 10 *et seq.*, and two riddles.

In his "Yeled Zeḳunim" (Child of Old Age), Vienna, 1839, partly in Hebrew, partly in German, he again strongly advocated practical reforms in regard to railroad traveling on the Sabbath and on holidays, the abridgment of the seven days of mourning, the use of the organ, etc., and gave a short sketch of his life. His biographer, Leopold Löw, wrote an introduction to this work.

In consequence of the Damascus affair in 1840, Chorin republished the apology written 1753 by Sonnenfels, in which the author proves the falsity of the blood accusation. Chorin added an introduction and Löw a biographical notice.

On July 26, 1844, during the last weeks of his life, he wrote from his sick-bed a declaration expressing his full accord with the rabbinical conference at Brunswick, and Aug. 11 he sent an address to the conference of Hungarian rabbis at Páks.

He took an active part in the efforts for Jewish emancipation, and was very influential with the state authorities. His grandson, Franz Chorin, was Hungarian deputy.

L. G. S. MAN.

CHORIN, FRANZ: Hungarian deputy; grandson of Aaron Chorin; born at Arad May 11, 1842. He studied law at Arad, Budapest, and Vienna, and began practise in his native city, where he soon became vice-president of the bar association. He was elected in 1870 as representative of the city of Arad to the Hungarian Parliament, of which he was a member continuously for twenty-one years. He is recognized as one of the leading orators and jurists of the country. The Exchange Law of 1876 is entirely his work. For many years he agitated for the modification of Hungarian criminal procedure in accordance with the more liberal English laws. His efforts culminated in success when, in 1896, he was appointed to draft and report upon this bill, which was subsequently passed by the House. In Parliament he had often the opportunity of defending his coreligionists, and contributed largely to the eradication of anti-Jewish prejudice. In 1881 he became director of the coal-mining company of Salgótarján; since then he has devoted himself to labor questions. The city of Szatmár, which he represented in the Hungarian Parliament from 1895 to 1901, elected him an honorary citizen in 1902, in recognition of his public services.

CHORNY, JOSEPH JUDAH: Russian traveler; born at Minsk April 20, 1835; died at Odessa April 28, 1880. His parents destined him for the wine-growing industry; but after having been graduated as a viticulturalist, he, owing to an indomitable passion for travel and exploration, abandoned this career. For eight years Chorny, with practically no means, explored a great part of the Caucasus, Transcaucasia, and many Asiatic countries; studying everywhere the life, customs, and history of the inhabitants, and chiefly those of the Jews. In 1875, on returning from his travels, he endeavored to publish his studies on the Jews of the countries he had visited, but failed to find the necessary means. He resumed the life of an explorer; and after five years of hardships and privations returned, in ill health and poverty, to Odessa, where he died shortly after his arrival.

Chorny was highly appreciated by the officials of the Russian government, and his studies on the Caucasus and Transcaucasia, published in various Russian papers, attracted the attention of the minister of the interior, Loris Melikov, who recommended Chorny to the protection of the governor-general of Odessa. The most noteworthy of Chorny's studies were: "Kratkiya Istoricheskiya Svyedeniya o Gorskikh Yevreyakh Terskoi Oblasti," Terskiya Vyedomosti, 1869; "Gorskie Yevrei," in "Kavkaz," 1870, vol. iii.; "On the Caucasian Jews," in "Den," 1870, No. 38.

Chorny bequeathed his manuscripts to the Society for Promoting Culture Among the Russian Jews; and the latter commissioned A. Harkavy to edit them. They were published with Harkavy's notes under the title "Sefer ha-Massa'ot" (Book of Travels), St. Petersburg, 1884.

CHOSAMEUS: One of "the sons of Annas" that had "strange wives" (I Esd. ix. 32). The name can not be identified with any in the corresponding list of Ezra x. 32. It is, most probably, a combination of the last part of "Maluch" with the first part of "Shemariah," names found in the Ezra list, the remaining syllables of these names having been elided.

E. G. H. G. B. L.

CHOSEN PEOPLE.—Biblical Data: Name for the Jewish people expressive of the idea of their having been chosen by God to fulfil the mission of proclaiming His truth among all the nations. This choice does not imply a superior claim, but a superior duty and responsibility on the part of the Jewish people, inasmuch as they have been pledged by the covenant which God concluded with Abraham, their ancestor, and again with the entire nation on Sinai, to testify, by precept and example, to the truth revealed to them, to lead a holy life as God's priest-people, and, if needs be, sacrifice their very lives for the sake of this truth. In this peculiar sense they are called God's own people; their religious genius, as manifested in their patriarchs, prophets, inspired poets, sages, and heroes, having rendered them the chosen people of religion to a far greater extent than the artistic and philosophical genius of the Greeks made that nation the chosen people of art and philosophy, or the juridical and political genius of the Romans made them the chosen people of law and politics.

Consciousness of Selection.

Unlike any other nation, the Jewish people began their career conscious of their life-purpose and world-duty as the priests and teachers of a universal religious truth; and their whole history, with all its tragic sternness, was and to the end of time will be devoted to the carrying out of this purpose and the discharge of this duty. This view is expressed in all the Biblical and rabbinical passages referring to Israel as the chosen people, or to Abraham as their ancestor. "For I have singled him out [A. V., "have known him"] to the end that he may command his children and his house after him, that they may keep the way of the Lord to do justice and judgment" (Gen. xviii. 1, Hebr.: compare Neh. ix. 7, "Thou art the Lord, the God who didst choose Abram").

Conditions of Choice.

That Israel's character as the chosen people is conditioned by obedience to God's commandments is stated in the very words of the Sinai covenant: "Now therefore, if ye will obey my voice indeed, and keep my covenant, then ye shall be a peculiar treasure unto me above all people: for all the earth is mine: and ye shall be unto me a kingdom of priests, and an holy nation" (Ex. xix. 5, 6). "The Lord did not set his love upon you, nor choose you, because ye were more in number than any people; for ye were the fewest of all people: but because the Lord loved you, and because he would keep the oath which he had sworn unto your fathers" (Deut. vii. 7, 8). The great obligation imposed upon Israel as the chosen people is especially emphasized by the prophet Amos (iii. 2): "You only have I singled out [R. V., "known"] of all the families of the earth: therefore will I visit upon you all your iniquities." Compare Deut. xiv. 2: "Thou art an holy people unto the Lord thy God, and the Lord hath chosen thee to be a peculiar people unto himself, above all peoples that are upon the face of the earth," and *ib.* xxiv. 18, 19, R. V.

God's Witnesses and Their Inheritance.

Particularly is the world-mission of the chosen people dwelt upon by Deutero-Isaiah, the seer of the Exile (Isa. xli.; xlii. 1-7; xliii. 10, "Ye are my witnesses, saith the Lord, and my servant whom I have chosen"; *ib.* verse 21, R. V., "The people which I formed for myself that they might set forth my praise"; compare xliv. 1, 2; xlix. 6, 7).

As God's chosen people, Israel is also called His "inheritance" (Deut. iv. 20; ix. 26, 29; xxxii. 9; Ps. xxxiii. 12: "The people whom he hath chosen for his own inheritance"; I Kings viii. 53, Jer. x. 16; and elsewhere). As the children of the Patriarchs they are His chosen ones (Ps. cv. 6).

——**In Rabbinical Literature:** According to the Rabbis, Israel has not been chosen as the people of the Law on account of its racial superiority. "Israel is of all nations the most wilful or headstrong one [עז שבאומות], and the Torah was to give it the right scope and power of resistance, or else the world could not have withstood its fierceness" (Beẓah, 25b). "The Lord offered the Law to all nations; but all refused to accept it except Israel" (Mek. Yitro, Pes. R. K. 103b, 186a, 200a). "A Gentile who consecrates his life to the study and observance of the Law ranks as high as the high priest," says R. Meïr, by deduction from Lev. xviii. 5; II Sam. vii. 19; Isa. xxvi. 2; Ps. xxxiii. 1, cxviii. 20, cxxv. 4, where all stress is laid not on Israel, but on man or the righteous one (Sifra, Aḥare Mot, 86b; Bacher, "Ag. Tan." ii. 31). Israel is likened to the olive. Just as this fruit yields its precious oil only after being much pressed and squeezed, so Israel's destiny is one of great oppression and hardship, in order that it may thereby give forth its illuminating wisdom (Ex. R. xxvi.). Poverty is the quality most befitting Israel as the chosen people (Ḥag. 9b). Only on account of its good works is Israel among the nations "as the lily among thorns" (Cant. R. ii. 2), or "as wheat among the chaff" (Midr. Teh. i. 4; Weber's "System der Altsynagogalen Theologie," etc., pp. 59-69, is full of glaring errors and misstatements on the subject of Israel as the chosen people).

In the Jewish liturgy, praise is frequently offered to God for having chosen Israel from among all the

In the Liturgy.

nations of the earth: in Ahabah Rabbah, in the benediction before the reading from the Law, and in the seven benedictions of the holy days and New Moon; concerning which see Geiger's "Jüd. Zeit." vii. 55; and Einhorn, in "Protocolle der Zweiten Rabbinerversammlung," p. 75, Frankfort-on-the-Main, 1845.

"The character of Israel as the chosen people," writes Güdemann ("Das Judenthum," 1902, p. 44) "does not involve the inferiority of other nations. The universality of Israel's idea of God is sufficient proof against such an assumption. Every nation requires a certain self-consciousness for the carrying out of its mission. Israel's self-consciousness was tempered by the memory of its servitude in Egypt and the recognition of its being 'the servant of the Lord.' It was the noblesse oblige of the God-appointed worker for the entire human race."

E. C. K.

CHOSROES (KHOSRU) II. PARWIZ ("The Conqueror"): King of Persia from 591 to 628. Chosroes, on the plea of avenging the death of his father-in-law, the Byzantine emperor Maurice (Mauritius), who had been murdered by the usurper Phocas (602), invaded Asia Minor and Syria at the head of a large army. The Jews joined the Persians in great numbers under the leadership of Benjamin of Tiberias, a man of immense wealth, by whom they were enlisted and armed. The Tiberian Jews, with those of Nazareth and the mountain cities of Galilee, marched on Jerusalem with the Persian division commanded by Shahrbaraz. Later they were joined by the Jews of southern Palestine; and supported by a band of Arabs, the united forces took Jerusalem by storm (July, 614). Ninety thousand Christians are said to have perished. The story that the Jews purchased the Christian prisoners from their Persian captors and put them to death in cold blood is a pure invention. In conjunction with the Persians, the Jews swept through Palestine, destroyed the monasteries which abounded in the country, and expelled or killed the monks. Bands of Jews from Jerusalem, Tiberias, Galilee, Damascus, and even from Cyprus, united and undertook an incursion against Tyre, having been invited by the 4,000 Jewish inhabitants of that city to surprise and massacre the Christians on Easter night. The Jewish army is said to have consisted of 20,000 men. The expedition, however, miscarried, as the Christians of Tyre learned of the impending danger, and seized the 4,000 Tyrian Jews as hostages. The Jewish invaders destroyed the churches around Tyre, an act which the Christians avenged by killing two thousand of their Jewish prisoners. The besiegers, to save the remaining prisoners, withdrew.

The immediate results of these wars filled the Jews with joy. Many Christians became Jews through fear. A Sinaitic monk embraced Judaism of his own free will, and became a vehement assailant of his former belief.

The Palestinian Jews were free from the Christian yoke for about fourteen years; and they seem to have deluded themselves with the hope that Chosroes would resign Jerusalem and a province to them, in order that they might establish a Jewish commonwealth. Not only did Chosroes, however, do nothing to promote the establishment of a Jewish commonwealth, but, on the contrary, it is probable that he taxed the Jews oppressively.

Results of the Invasion.

Thus there arose great discord between the allies, which ended in the deportation of many Palestinian Jews to Persia. This treatment caused the Jews to go over to the Roman emperor Heraclius, who had succeeded Phocas, and who concluded a treaty (627), promising them amnesty and other advantages. Chosroes, defeated by Heraclius in a series of battles, fled from his capital, but was seized and, after a confinement of four days, executed (Feb. 28, 628).

K. A. R.

CHOTZNER, JOSEPH: English rabbi and author; born at Cracow, Austria, May 11, 1844; educated at the Breslau rabbinical seminary and the University of Breslau. After his ordination Chotzner became the first rabbi of the congregation at Belfast, Ireland, officiating from 1870 to 1880; and he again held the rabbinate there from 1892 to 1897. In the mean time (1880-92) he had become house master and teacher of Hebrew at Harrow School, where several Jewish boys had recently entered. The experiment was made of placing all of them in a separate house under the supervision of Dr. Chotzner. After some twelve years' experience it was found more expedient to spread the Jewish boys among their comrades, and Dr. Chotzner left Harrow for Belfast. Since 1897 he has been lecturer at Montefiore College, Ramsgate.

Chotzner is the author of: (1) "Lel Shimmurim" (The Night of Observances), a collection of satirical poems on certain Hebrew superstitions, Breslau, 1864; (2) "The Songs of Mirza Schaffy," translated into Hebrew, *ib.* 1868; (3) "Modern Judaism" (1876); (4) "Humor and Irony of the Hebrew Bible," 1883; (5) "Zikronot" (Records), 1885.

His son, **Alfred James Chotzner,** was gold medalist at Cambridge University, and subsequently entered the Indian civil service.

J. E. Ms.

CHOVEVEI ZION (Lovers of Zion): Associations, in Europe and the United States, of persons interested in agricultural settlement of Jews in Palestine and in the connection of Jews with the future of the Holy Land.

This movement, which was the predecessor of political Zionism (see Basel Congress), had as its sponsors a number of men living in different countries, but whose common interest in and observations of the phenomena of Jewish life, stimulated by the persecution of the Jews in Rumania prior to 1880, and more recently in Russia, led to the foundation of organizations like the Chovevei Zion Association of England, whose objects are:

1. To foster the "national idea" in Israel.
2. To promote the colonization of Palestine and

neighboring territories by Jews by establishing new colonies, or by assisting those already established.

3. To diffuse the knowledge of Hebrew as a living language.

4. To better the moral, intellectual, and material status of Israel.

5. The members of the association pledge themselves to render cheerful obedience to the laws of the lands in which they live, and as good citizens to promote their welfare as far as lies in their power.

The appeal from Palestine to Jews to settle there as agriculturists, made in 1867, went unheeded. But from 1879 on, there were active in the advocacy of colonization Dr. Lippe and Pineles in Rumania, Lilienblum and Leon Pinsker in Russia, a non-Jewish Syrian and Palestinian Association in London, and Laurence Oliphant. The idea of agricultural settlement in Palestine, tested first by the founding of the colony of Samarin by the Rumanian Chovevei Zion, was voiced in 1881 by N. L. Lilienblum in an article in the "Razsvyet" entitled "The Jewish Question and the Holy Land." The most serious objection to the new idea came from those who feared that resettlement in Palestine would mean the observance of the 613 commandments and the rebuilding of the Temple. Charles Netter, who subsequently became the leading exponent of the agricultural settlement idea, opposed the new movement—which had excited the enthusiastic interest of the Jews of Russia—on the ground that Palestine was unsuitable for colonization.

Baron Edmund de Rothschild having agreed to pay the expenses of six colonists to Palestine, the movement, initiated by Pinsker and supported by Rabbi Mohilewer of Byelostock, took practical shape. The Odessa Central Committee, which had been called into existence in 1881, and which was now recognized by the Russian government, went no further in the direction of active propaganda than to send Pinsker and Mohilewer upon a tour of private and public agitation throughout Europe.

However, the movement spread with the emigration from Russia. Various societies with a similar purpose were founded at Berlin (Ezra), Vienna (Kadimah), London (B'nei Zion, 1887), and America (Shove Zion in New York, Chovevei Zion in Philadelphia, 1891).

In 1890 it was recognized that some endeavor should be made to give form and coherence to these various movements, and Dr. Haffkine, with M. Meyerson, encouraged by the prospect of financial support from Baron Edmund de Rothschild, organized the Paris Central Committee. The actual leadership of the movement, however, remained with the Odessa committee, which was well supported, and which kept in close touch with those who had already settled in Palestine. The movement, however, reached its zenith in 1893, when organizations existed in every country, except France, that had an appreciable Jewish population.

In December, 1892, the movement of Jews toward Palestine was checked by the Turkish authorities, who prohibited further immigration. Additional discouragement was caused by the difficulty of finding markets for the produce of the colonies, and also by the coloring given to the idea by such men as Colonel Goldsmid, who, at the head of the Chovevei Zion Association of England, with its military organizations, sought to give the movement a strong national tendency. In addition, the colonists were in constant need of support. The Hirsch Argentine Settlement followed, and affected the agitation in Western Europe. Though the colonies continued to find support, and though some new ones were founded the movement seemed, by 1894, to have spent its force.

Typical of the enthusiasm which the idea had once aroused was the mass-meeting held in London in 1892, on the advice of Sir Samuel Montagu, to petition the sultan, through Lord Rothschild and the British Foreign Office, for the right of settlement. A detailed plan was then worked out for colonization on a large and regulated scale.

The decline of the Chovevei Zion was consequent upon the suddenly created leadership, in 1896, of Dr. Theodor HERZL. Indirectly every Chovevei Zion championed, without formally adopting, his doctrine, and, indirectly, all were represented at the first Zionist congress. A more or less direct adherence to the Zionist movement, which had no sympathy for individual, sporadic colonization, was forced upon the old organizations by their members. But while they would not disavow the nationalist standpoint, they declined to become a medium of the new propaganda. A conference, the first of its kind in London, was held (March, 1898) in the Finsbury (Clerkenwell) town-hall, and lasting twelve hours: it decided upon reorganization, and accepted the leadership of the Vienna Executive Committee created by the previous congress. This was typical of the process of transition from a philanthropic to an avowed political movement, which continued until the Minsker Conference (September, 1902), when the Russian Chovevei Zion associations without exception accepted the platform of the Zionist congresses.

The literature of the movement is extensive, but scattered. A vast number of polemical pamphlets have been published, as well as brochures on colonization and propagandist literature and on the fostering of Hebrew as a living tongue, which must be included in the literary efforts of the Chovevei Zion (see ZIONISM).

E. C. J. DE H.

CHOYNSKI, JOSEPH: American heavyweight pugilist; born at San Francisco, Cal., Nov. 8, 1868. His first appearance in the prize-ring was in 1884, when he met and was defeated by J. J. Corbett in one round. He has encountered most of the prominent pugilists; and among those whom he has defeated, or with whom he has fought drawn battles, have been Dan Creedon, "Kid" McCoy, James Jeffries, T. Sharkey, and Steve O'Donnell. Choynski has fought more than fifty battles, of which he has lost but seven.

CHRIST (Greek, Χριστός): Septuagint translation of Hebrew "Mashiaḥ" ("Messiah" = The Anointed), applied by Christians exclusively to Jesus as the Messiah (see Jesus of Nazareth and Messiah).

J. K.

CHRISTIAN: A word denoting a follower of Jesus as the Messiah or Christ. It originated, according to Acts xi. 26, in Antioch, the Syrian capital, where, shortly after the failure of the Hellenistic movement in Jerusalem (*ib.* viii. 1, xi. 19), the doctrine of the risen Christ was propagated among the non-Jewish population, and where the first important church of the Christians was established by Barnabas and Paul about the year 44. This early origin of the name has been questioned by F. C. Baer ("Paulus, der Apostel Jesu Christi," i. 103), Lipsius ("Ueber den Ursprung des Christennamens," 1873), Hausrath ("Neutestamentliche Zeitgeschichte," ii. 392), and Weizsäcker ("Apostolisches Zeitalter," p. 90), but is upheld by Keim ("Aus dem Urchristenthum," pp. 171–181). Josephus, in the well-known passage concerning Jesus ("Ant." xviii. 3, § 3; not all of which is spurious), speaks of the "tribe of Christians" as still existing.

It is certain that except in Acts xi. 26, xxvi. 28, and I Peter iv. 16—passages referring to the persecution of Christians in Rome—the name occurs nowhere in the New Testament or in the early Christian literature. In all probability it owes its origin to a Roman or Latin-speaking population. The fact that the early Christians met for worship in the name of Christ and called themselves those "of Christ" (I Cor. i. 12) induced the pagans to regard them as the partizan followers of a leader of that name. Hence they coined the name "Christiani" for them, as a nickname after the example of "Cæsarians" or "Pompeians." Unfamiliar with the name "Christus," the pagans pronounced the name also "Chrestos" (Χρηστός), and spoke of the Christians as "Chrestiani" (Tertullian, "Apologia," p. 3; Justin, "Apologia," i. 4; compare Suetonius, "Claudius," p. 25: "Judæos impulsore Chresto assidue tumultuantes Roma expulit"; Grätz, "Gesch." iii. 3, 449, is wrong in taking Chrestos for a special agitator in Rome).

The name came into general use among the Christians themselves during the second century, when it became endeared to them all the more because it entailed persecution and martyrdom (I Peter iv. 16; Luke iv. 22; Tacitus, "Hist." xv. 44; Suetonius, "Nero," p. 16; Pliny, "Epistles," x. 96; Ignatius, "Epistles to the Magnesians," p. 4; and elsewhere). They continued, however, to call one another also "the brethren" (Acts ix. 30, xi. 1; Rom. xvi. 14; Gal. i. 2), "the saints" (Acts ix. 13, 32; xxvi. 10; Rom. xii. 13, xvi. 15; Heb. vi. 10), "believers" or "faithful ones" (Acts x. 45; I Tim. iv. 3), "the elect" (Matt. xxiv. 22, 24; Mark xiii. 20–22; I Peter i. 1, 2), and in the earlier time also "the disciples" (Acts ix. 26, xiii. 52, xx. 30).

To the Jews, to whom the reported appearance of the Messiah was a matter of frequent occurrence in those times, when the good tidings of redemption from the domination of Rome were constantly expected (Josephus, "Ant." xvii. 10, §§ 6, 7; xviii. 4, § 1; xx. 5, § 1), the word "Christian" had no specific meaning; and when the followers of Jesus of Nazareth began to teach a "way" different from that of the mother-synagogue (Acts ix. 2; xviii. 25; xix. 9, 23; xxii. 4; xxiv. 14, 22), they received the name of "the sect of the Nazarenes" (Acts xxiv. 5, xxviii. 22; in Hebrew, "Noẓerim").

CHRISTIANI, FRIEDRICH ALBRECHT: Jewish convert to Christianity; born in the middle of the seventeenth century; died at Prossnitz at the beginning of the eighteenth. He was baptized in 1674 at Strasburg, having formerly borne the name of Baruch as ḥazzan at Bruchsal. After having occupied for twenty years the chair of Semitic studies at the University of Leipsic, he retired to Prossnitz, where he returned to Judaism.

Christiani's works comprise the following, all published at Leipsic: (1) "Zebaḥ Pesaḥ" (The Sacrifice of Easter), 1677, an account of the Jewish celebration of Easter in the time of Jesus and at the present; (2) "Se'udat Purim" (The Meal of Purim), 1677, a description of Jewish fasting and feasting; (3) "Ẓaḥaḳan Melummad u-Mitḥareṭ" (The Scholarly Gambler Repenting), 1683, a German translation of the work of Leon of Modena on gambling; (4) Abravanel's commentary on the first Prophets, with a Latin index, 1686; (5) the text of Jonah with Targum, Masorah, and the commentaries of Rashi, Ibn Ezra, Ḳimḥi, and Abravanel, and a Hebrew-Latin vocabulary, 1683; (6) "Iggeret" (Letter), 1676, the epistle of St. Paul to the Jews, translated from the Greek into Hebrew; (7) "Traktat von dem Glauben und Unglauben der Juden," 1713.

CHRISTIANI, MORITZ WILHELM: Author and Jewish convert to Christianity; born at Altorf at the end of the seventeenth century; died at Prague about 1740; probably a member of the Keyser family of Schleusingen (Bavaria). He claimed to have been a rabbi at Schleusingen before his baptism in 1715.

Christiani wrote: (1) "Kurze Beschreibung einer Jüdischen Synagoge und eine Beschreibung der Synagogalen Gebräuche" (Regensburg, 1723); (2) "Die Schlacht- und Visitir-Kunst" (*ib.* 1724); (3) "Ausgang von dem Verstockten Judenthum und Eingang zum Wahren Christenthum," an account of his conversion, his profession of faith, and several orations (Erfurt, 1720); (4) "Rede zur Einladung für Rabbinische Studien," written in Hebrew and German, inserted in Johann David Köhler's "Program" (Altorf, 1715); (5) a German translation of the

"Sefer ha-Minhagim" of Jacob Levi (MaHaRIL), published at Bremen in 1733.

CHRISTIANI, PABLO: Jewish convert of Montpellier, France; contemporary of NAḤMANIDES. After having been baptized, Christiani joined the Order of the Dominicans and attempted to convert his former coreligionists. Failing to make proselytes among the Jews of Provence, to whom he had been sent by his zealous general, Raymond de Penyaforte, Christiani planned the conversion by force of the Aragonian Jews. To this purpose he persuaded Raymond de Penyaforte to bring about a religious controversy between him and Naḥmanides, in which he felt assured of victory. Raymond de Penyaforte secured the consent of King James; and Naḥmanides was summoned to Barcelona, in 1263, to answer Christiani's questions.

The disputation took place in the king's palace, in the presence of the whole court and many ecclesiastical dignitaries, and lasted four days (July 20–24). As suggested by Naḥmanides, the subjects of discussion were three: (1) whether the Messiah had appeared; (2) whether the Messiah announced by the Prophets was to be considered as a god, or as a man born of human parents; and (3) whether the Jews or the Christians were in possession of the true faith. Christiani undertook to demonstrate from the Talmud itself the truth of the Christian faith, and feigned indignation at Naḥmanides when he declared that he did not believe in those and other Haggadic stories. Christiani hoped to profit by the reserve he felt Naḥmanides would be forced to maintain through fear of wounding the feelings of the Christian dignitaries who were present.

Naḥmanides Victorious.

He was, however, deceived. Naḥmanides moderately but firmly refuted all the arguments of Christiani. As the disputation turned in favor of Naḥmanides the Jews of Barcelona, fearing the resentment of the Dominicans, entreated him to discontinue; but the king, whom Naḥmanides acquainted with the apprehensions of the Jews, desired him to proceed. The controversy was therefore resumed, and concluded in a complete victory for Naḥmanides, who was dismissed by the king with a gift of three hundred maravedis as a mark of his respect.

The Dominicans, nevertheless, claimed the victory, and Naḥmanides felt obliged to publish the proceedings of the controversy. Obtaining a copy of this publication, Christiani selected from it certain passages which he construed as blasphemies against the Christian religion, and denounced them as such to Raymond de Penyaforte. A capital charge was then instituted, and a formal complaint against the work and its author was lodged with the king. Finally, Naḥmanides was sentenced to exile for two years, and his pamphlet was ordered to be burned.

Christiani's Proselytizing Tour.

The failure of the controversy did not, however, discourage Christiani. Provided through the agency of Raymond de Penyaforte with letters of protection from King James, he went on missionary journeys, compelling the Jews everywhere to listen to his speeches and to answer his questions, either in their synagogues or wherever else he pleased. They were even required to defray the expenses of his mission. In spite of the protection granted him by the king, Christiani did not meet with the success he had expected; he therefore went to Pope Clement IV. and denounced the Talmud, asserting that it contained passages derogatory to Jesus and Mary. The pope issued a bull (1264) to the Bishop of Tarragona, commanding him to submit all the copies of the Talmud to the examination of the Dominicans and Franciscans. A commission was then appointed by the king, Christiani being one of its members, to act as censors of the Talmud; and they obliterated all passages which seemed to them to be hostile to Christianity. In 1269 Christiani interceded with King Louis IX. of France and obtained from him the enforcement of the canonical edict requiring Jews to wear badges.

CHRISTIANITY IN ITS RELATION TO JUDAISM: Christianity is the system of religious truth based upon the belief that Jesus of Nazareth was the expected Messiah, or Christ, and that in him all the hopes and prophecies of Israel concerning the future have been fulfilled. While comprising creeds which differ widely from one another in doctrine and in practise, Christianity as a whole rests upon the belief in the God of Israel and in the Hebrew Scriptures as the word of God; but it claims that these Scriptures, which it calls the Old Testament, receive their true meaning and interpretation from the New Testament, taken to be the written testimonies of the Apostles that Jesus appeared as the end and fulfilment of all Hebrew prophecy. It furthermore claims that Jesus, its Christ, was and is a son of God in a higher and an essentially different sense than any other human being, sharing in His divine nature, a cosmic principle destined to counteract the principle of evil embodied in Satan; that, therefore, the death of the crucified Christ was designed by God to be the means of atonement for the sin inherited by the human race through the fall of Adam, the first man; and, consequently, that without belief in Jesus, in whom the Old Testament sacrifice is typified, there is no salvation. Finally, Christianity, as a world-power, claims that it represents the highest form of civilization, inasmuch as, having made its appearance when the nations of antiquity had run their course and mankind longed for a higher and deeper religious life, it regenerated the human race while uniting Hebrew and Greek to become the heir to both; and because it has since become the ruling power of history, influencing the life of all nations and races to such an extent that all other creeds and systems of thought must recede and pale before it.

These three claims of Christianity, which have frequently been asserted in such a manner as directly or implicitly to deny to Judaism, its mother religion, the purpose, if not the very right of its continued existence, will be examined from a historical point of view under three heads: (1) the New Testament claim as to the Christship of Jesus; (2) the Church's claim as to the dogmatic truths of Christianity, whether Trinitarian or Unitarian; and (3) the claim of Christianity to be the great power of civilization. The attitude taken by Jews toward Christianity in public debates and in literary controversies will be treated under Polemics and Polemical Literature; while the New Testament as literature and the personality of Jesus of Nazareth will also be discussed in separate articles.

The Messianic Movement.

I. It is a matter of extreme significance that the Talmudic literature, which is based on tradition at least a century older than Christianity, has not even a specific name for the Christian belief or doctrine, but mentions it only occasionally under the general category of "Minim" (literally, "distinctive species of belief"), heresies, or Gnostic sects. As one of these it could only be regarded in the second century, when Christianity was in danger of being entirely absorbed by Gnosticism. At first it was viewed by the Jews simply as one of the numerous Messianic movements which, aimed against Roman rule, ended tragically for their instigators, and from which it differed only in one singular fact; viz., that the death of the leader, far from crushing the movement, gave, on the contrary, rise to a new faith which gradually, both in principle and in attitude, antagonized as none other the parent faith, and came to manifest the greatest hostility to it. There is no indication in Jewish literature that the appearance of Jesus, either as a teacher or as a social or political leader, made at the time a deep or lasting impression on the Jewish people in general. Outside of Galilee he was scarcely known. This at least seems to be the only explanation of the fact that the Talmudic passages, some of which are old, confound Jesus, on the one hand, with Ben Sṭada, who was tried in Lydda—probably identical with Theudas "the magician," the pseudo-Messiah who appeared in 44 (Josephus, "Ant." xx. 5, § 1; Acts v. 36)—and, on the other, with the Egyptian "false prophet" who created a Messianic revolt a few years later ("Ant." xx. 8, § 6; *idem*, "B. J." ii. 13, § 5; Acts xxi. 38; see Tosef., Sanh. x. 11; Sanh. 67a, 107b; Shab. 104b; Soṭah 47a; compare Matt. xxiv. 11 and 24). As to Jesus ben Pandera, or Jesus the pupil of R. Joshua ben Peraḥyah, see Jesus in Jewish Legend.

The only reference to Jesus in contemporary Jewish literature is found in Josephus, "Antiquities" xviii. 3, § 3, a passage which has been interpolated by Christian copyists, but appears to have originally contained the following words (see Theodore Reinach, in "Rev. Etudes Juives," xxxv. 1–18; A. v. Gutschmid, "Kleine Schriften," 1893, iv. 352): "There was about that time [a certain] Jesus, a wise man; for he was a worker of miracles, a teacher of men eager to receive [new (revolutionary) tidings], and he drew over to him many Jews and also many of the Hellenic world. He was [proclaimed] Christ; and when, on denunciation by the principal men amongst us, Pilate condemned him to be crucified, those that were first [captivated] by him did not cease to adhere to him; and the tribe of Christians, so named after him, is not extinct at this day."

John the Baptist.

The Gospel records agree upon one essential point confirmed by Josephus (*l.c.* 5, § 2; compare Matt. iii. 1–13; Mark i. 2–9; Luke iii. 1–21; John iii. 22 *et seq.*; Acts xiii. 24); viz., that the main impulse to the Christian movement was given by John the Baptist, an Essene saint, who—among the many that, by penitence, fasting, and baptisms, prepared themselves for the coming of the Messiah (Luke ii. 25, 36 *et seq.*; Mark xv. 43; compare *ib.* ii. 18; Matt. ix. 14, xi. 18; compare Pesiḳ R. xxxiii., xxxiv.; Josephus, "Vita," § 2)—stood forth as the preacher of repentance and "good tidings," causing the people to flock to the Jordan to wash themselves clean of their sins in expectation of the Messianic kingdom. Some of his followers were known afterward as a class of Baptists under the name "Disciples of John" (Acts viii. 25; xix. 3, 4), and seem partly to have joined the Mandæans (Brandt, "Die Mandäische Religion," pp. 137 *et seq.*, 218 *et seq.*, 228; see also Hemerobaptists). Jesus, however, being one of John's disciples, the moment the latter had been put in prison stepped to the front as a preacher of the "Kingdom of Heaven" in the very language of his master (Matt. iv. 12 *et seq.*, xiv. 3–5; Mark i. 14). Still, to the very last he had to admit in his argument with the elders (Matt. xx. 26; Mark xi. 32; compare *ib.* viii. 28) that John was universally acknowledged prophet, while he was not. Indeed, Herod Antipas, upon learning of Jesus' miraculous performances, expressed the belief that John the Baptist had risen from the dead (Matt. xiv. 2, xvi. 14; Mark vi. 14). Nor did Jesus himself, according to the older records, lay claim to any title other than that of a prophet or worker by the Holy Spirit, like any other Essene saint (Matt. xiii. 57; xxi. 11, 46; Luke vii. 16, 39; xiii. 33; xxiv. 19; John iv. 19, 44; compare Josephus, "B. J." i. 3, § 5; ii. 8, § 12; *idem*, "Ant." xiii. 10, § 7; Luke ii. 25, 36). Gradually, however, the fame of Jesus as "healer" and "helper" of those stricken with disease so eclipsed that of John, at least in Galilean circles, that the latter was declared to have been only the forerunner of the one destined to subdue the whole kingdom of Satan—that is, the Elijah of the Messianic kingdom—and a declaration to this effect was finally put into the mouth of John as though made by him at the very start (Mark i. 2, ix. 13, xi. 2–19; Luke i. 17).

Jesus as a Man of the People.

Jesus, as a man of the people, deviated from the practise of the Essenes and Pharisees in not shunning contact with the sinners, the Publicans and the despised 'Am ha-Areẓ, as contaminating, and in endeavoring to elevate them; following the maxim, "They that are whole need not a physician, but they that are sick" (Matt. ix. 12, and parallels; compare Antisthenes, in Diogenes Laertius, vi. 6). He felt the calling to preach the gospel to the poor (Luke iv. 16 *et seq.*, after Isa. lxi. 1 *et seq.*), and truly became the redeemer of the lower classes, who were not slow to lift him to the station of the Messiah. Still, he apparently made no such claim before his entrance into Jerusalem, as is evidenced by the warning given to the disciples and to the spirits of the possessed not to disclose the secret of his being the Son of David (Matt. xii. 16, xvi. 20; Mark i. 24, iii. 12, viii. 30; Luke iv. 41). His reference to himself as the "Son of man," after the manner of Dan. vii. 13, and Enoch, xlvi. 2 *et seq.*, in Matt. xx. 18, and Mark x. 33, has no historical value; whereas in Mark ii. 28 and Matt. viii. 20 "Son of man" stands for "man" or "myself." While the eschatological predictions in Matt. xxiv., xxv.; Luke xvii. 22 *et seq.*, and elsewhere have been taken over literally from Jewish apocalypses and put into the mouth of Jesus, the teachings and doings of Jesus betray, on closer analysis, rather an intense longing after the Messianic time than joy and satisfaction over its arrival. And as the so-called "Lord's Prayer"—an exquisite compilation of Ḥasidic prayer formulas (Luke xi. 1–13; Matt. vi. 9–13; see Charles Taylor, "Sayings of the Jewish Fathers," 1901, p. 176)—is, like the Ḳaddish, a petition rather than a thanksgiving for the Messianic kingdom, so is the entire code of ethics laid down by Jesus for his disciples in the Sermon on the Mount (Matt. v.–vii., x.; Luke vi. 20, xi.–xii., and elsewhere) not a law of conduct for a world rejoicing in a redeemer that has come, but a guide for a few of the elect and saintly ones who wait for the immediate downfall of this world and the rise of another (Matt. x. 23, xix. 28, xxiv. 34–37). Only later events caused the allusion to the "Son of man" in these sayings to be referred to Jesus. As a matter of fact, a spirit of great anxiety and unrest permeates the sayings of Jesus and the entire New Testament epoch, as is indicated by such utterances as "Watch, therefore; for ye know not what hour your Lord doth come" (Matt. xxiv. 42, xxv. 13); "The kingdom of God cometh not with observation [that is, calculation], but suddenly, imperceptibly it is among you" (Luke xvii. 20, 21); compare the rabbinical saying: "The Messiah cometh בהיסח הדעת [when least expected], like a thief in the night" (Sanh. 97a, b). See, further, Matt. xxiv. 43; I Thess. v. 2; II Peter iii. 10; Rev. iii. 3. A number of sayings allude to the sword, to contention, and to violence, which do not altogether harmonize with the gentle and submissive character assigned generally to Jesus. Such are the following: "Think not that I came to send peace on the earth: I came not to send peace, but a sword" (Matt. x. 34, R. V.); "Suppose ye that I am come to give peace on earth? I tell you, Nay; but rather division. . . . The father shall be divided against the son, and the son against the father," etc. (Luke xii. 51–53); "From the days of John the Baptist until now the kingdom of heaven suffereth violence, and the violent take it by force" (Matt. xi. 12)—words hardly reconcilable with the concluding sentences of the chapter: "Come unto me, all ye that labor and are heavy laden. . . . Take my yoke upon you . . . and ye shall find rest" (*l.c.* xi. 28–30). The advice given by Jesus to his disciples to provide themselves each with a sword (Luke xxii. 36; compare *ib.* verse 49; John xix. 10, though disavowed in Matt. xxvi. 52, 53); the allusion by Simeon the saint to the sword and to the strife as resulting from Jesus' birth (Luke ii. 34, 35); and the disappointment voiced by Cleopas, "We trusted that it had been he which should have redeemed Israel" (Luke xxiv. 21; compare Matt. i. 21, where Jesus is explained as יהושע, Joshua, who shall "save his people from sin")—all these point to some action which gave cause for his being handed over to Pontius Pilate as one who was "perverting the nation, and forbidding to give tribute to Cæsar" (Luke xxiii. 2); though the charge was refuted by the saying, "Render unto Cæsar the things that are Cæsar's" (Matt. xxii. 21; Mark xii. 17; Luke xx. 25, R. V.). He was tried and crucified as "King of the Jews" or "Messiah"; and all the alleged charges of blasphemy, in that he called himself "Son of God" in the Messianic sense, or announced the destruction of the Temple, prove, in the light of the ancient Jewish law, to be later inventions (Matt. xxvi. 63–65; Mark xiv. 58; Luke xxii. 70). See Crucifixion of Jesus.

The Risen Christ.

That the movement did not end with the crucifixion, but gave birth to that belief in the risen Christ which brought the scattered adherents together and founded Christianity, is due to two psychic forces that never before had come so strongly into play: (1) the great personality of Jesus, which had so impressed itself upon the simple people of Galilee as to become a living power to them even after his death; and (2) the transcendentalism, or other-worldliness, in which those penance doing, saintly men and women of the common classes, in their longing for godliness, lived. In entranced visions they beheld their crucified Messiah expounding the Scriptures for them, or breaking the bread for them at their love-feasts, or even assisting them when they were out on the lake fishing (Luke xxiv. 15, 30, 31, 36; John xx. 19, xxi.). In an atmosphere of such perfect naïveté the miracle of the Resurrection seemed as natural as had been the miracle of the healing of the sick. Memory and vision combined to weave the stories of Jesus walking on the water (compare Matt. xiv. 25, Mark vi. 49, and John vi. 19 with John xxi. 1–14), of the transfiguration on the Mount (compare Matt. xvii. 1–13, Mark ix. 2–13, and Luke ix. 29–36 with Matt. xxviii. 16 *et seq.*), and of his moving through the air to be near the divine throne, served by the angels and the holy (not "wild") beasts ("ḥayyot"), and holding Scriptural combats with Satan (Mark i. 12, 13; Matt. iv. 1–11; compare with Acts vii. 15, vii. 55). The Messiahship of Jesus having once become an axiomatic truth to the "believers," as they called themselves, his whole life was reconstructed and woven together out of Messianic passages of the Scriptures. In him all the Testament prophecies had "to be fulfilled" (Matt. i. 22; ii. 5, 15, 17; iii. 3; iv. 14; viii. 17; xii. 17; xiii. 14, 35; xx. 14; xxvi. 56; xxvii. 19; John xii. 38; xiii. 18; xv. 25; xvii. 12; xviii. 9; xix. 24, 36). Thus, according to the Jewish view, shared by many Christian theologians, there grew up, through a sort of Messianic Midrash, the myths of Jesus' birth from a virgin (after Isa. vii. 14), in Bethlehem, the city of David (after Micah v. 1 *et seq.*; there was a town of Bethlehem also in Galilee, which Grätz identifies with Nazareth; see "Monatsschrift," xxix. 481); the genealogies in Luke iii. 23–38 and in Matt. i. 1–17, with the singular stress laid upon Tamar, Rahab, and Ruth, the converted sinners and heathens, as mothers of the elect one (compare Gen. R. ii.; Hor. 10b; Nazir 23b; Meg. 14b); likewise the story of Jesus' triumphal entry into Jerusalem riding upon a young ass (after Zech. ix. 9), and of his being hailed by the people's "Hosanna" (after Ps. cxviii. 26; compare Midr. Teh. to the passage; also Matt. xxi. 1–11, and parallels).

Similarly, his healing powers were made proofs of his Messiahship (after Isa. xxxv. 5, 6; compare Gen. R. xcv. and Midr. Teh. cxlviii.), also his death on the cross was taken, with reference to Isa. liii. and old Essene tradition of the suffering Messiah (Pesik. R. xxxiv.-xxxvii.), to be the atoning sacrifice of the Lamb of God slain for man's sin (John i. 29; Acts viii. 32; Rev. xiii. 8; compare Enoch xc. 8), and his resurrection the beginning of a new life (after Zech. xiv. 5; I Chron. iii. 24; Sibyllines, ii. 242; Matt. xxiv. 30; I Thess. iv. 16). Men held their love-feasts in his memory—turned into paschal feasts of the new covenant (Matt. xxvi. 28, and parallels; John xix. 33 *et seq.*)—and led lives of voluntary poverty and of partial celibacy (Acts ii. 44; Matt. xix. 12).

Jesus' Teachings.

Out of these elements arose the life-picture of Jesus, shaped after later events and to a great extent reflecting the hostile sentiments entertained against the Jewish people by the new sect when, in the final struggle with Rome, the latter no longer shared the views and destinies of the former. Many antinomistic views put into the mouth of Jesus have their origin in Pauline—*i.e.*, anti-Judean—circles. Thus the saying, "Not that which goeth into the mouth defileth a man; but that which cometh out of the mouth, this defileth a man" (Matt. xv. 11, and parallels), is irreconcilable with Peter's action and vision in Acts xi. 1–10. What Jesus actually said and did is difficult to determine. Many of his teachings can be traced to rabbinical sayings current in the Pharisaic schools; and many sentences, if not entire chapters, have been taken over from Essene writings (see DIDASCALIA; ESSENES; GOLDEN RULE; JESUS OF NAZARETH; MATTHEW).

On the other hand, there are utterances of striking originality and wondrous power which denote great genius. He certainly had a message to bring to the forlorn, to "the lost sheep of the house of Israel" (Matt. x. 6, xv. 24), to the outcast, to the lower classes, to the "'am ha-arez," to the sinners, and to the publicans. And whether the whole life-picture is reality or poetic imagination, in him the Essene ideal reached its culmination. But it is not correct to speak, as Christian theologians do, of a possible recognition or an actual rejection of Jesus' Christship by the Jews. Whatever his greatness as teacher or as friend of the people, this could not establish his claim to the Messianic title; and whether his Galilean followers were justified in according it to him, or the authorities at Jerusalem in denying it and in denouncing him to the Roman prefect—probably more from fear than from spite (John xix. 15)—is not a matter that can be decided from the scanty records (compare Matt. xxvi. 5; Luke xiii. 31; xix. 47, 48; xx. 19; xxiii. 43 with Matt. xxvii. 25–28; Mark xv. 14; Luke xxiii. 23 (see CRUCIFIXION). The vehement language of Jesus, in denouncing Sadducean misrule and the hypocrisy and narrowness of the Pharisaic leaders, was not altogether new and unheard of: it was the privilege of the Essene preachers, the popular Haggadists (see PHARISEES and SADDUCEES). Most of his teachings, a great number of which echo rabbinical sayings, and have been misunderstood or misapplied altogether by the late Gospel compilers (see GOSPELS, THE FOUR), were addressed to a circle of men who lived in a world of their own, far away from the centers of commerce and industry. His attitude toward Judaism is defined by the words: "Think not that I am come to destroy the law or the prophets: I am not come to destroy, but to fulfil" (Matt. v. 17). The rejection of the Law by Christianity, therefore, was a departure from its Christ, all the New Testament statements to the contrary notwithstanding. He himself declined even the title of "good master," because he wanted to reserve this epithet for God alone (Matt. xix. 17): Christianity, contrary to all his teaching, turned him into a God.

Paul's Anti-nomistic and Gnostic Views.

II. This radical change was brought about by SAUL OF TARSUS or Paul, the real founder of the Christian Church, though Peter formed the first community of the risen Christ (Matt. xvi. 16; Acts i. 15; I Cor. xv. 5). Having, under the influence of a vision, turned from an earnest persecutor of the new sect into its vigorous champion (Acts ix. 1-14, xxii. 3–16, xxvi. 9–18; I Cor. ix. 1, xv. 8 *et seq.*; Gal. i. 16), he construed the belief in the atoning death of Christ held by the rest into a system altogether antagonistic to Judaism and its Law, claiming to have received the apostleship to the heathen world from the Christ he beheld in his visions. Operating with certain Gnostic ideas, which rendered the Messiah as Son of God a cosmic power, like Philo's "logos," aiding in the world's creation and mediating between God and man, he saw both in the Crucifixion and in the Incarnation acts of divine self-humiliation suffered for the sake of redeeming a world polluted and doomed by sin since the fall of Adam. Faith alone in Christ should save man, baptism being the seal of the belief in God's redeeming love. It meant dying with Christ to sin which is inherited from Adam, and rising again with Christ to put on the new Adam (Rom. vi. 1–4; I Cor. xv.; Gal. iii.-iv.). See BAPTISM.

On the other hand, Paul taught, the law of Moses, the seal of which was CIRCUMCISION, failed to redeem man, because it made sin unavoidable. By a course of reasoning he discarded the Law as being under the curse (Gal. iii. 10 *et seq.*), declaring only those who believed in Christ as the Son of God to be free from all bondage (Gal. iv.). In opposition to those who distinguished between full PROSELYTES and "proselytes of the gate," who only accepted the Noachidian laws (Acts xv. 20), he abrogated the whole Law; claiming God to be the god of the heathen as well as of the Jews (Rom. iii. 29). Yet in enunciating this seemingly liberal doctrine he deprived faith, as typified by Abraham (Gen. xv. 6; Rom. iv. 3), of its naturalness, and forged the shackles of the Christian dogma, with its terrors of damnation and hell for the unbeliever. God, as Father and the just Ruler, was pushed into the background; and the Christ—who in the Gospels as well as in the Jewish apocalyptic literature figured as judge of the souls under God's sovereignty (Matt. xvi. 27, xxv. 31-33; compare Enoch, iv. xiv. *et seq.*; II Esd. vii. 33 with Rom. xiv. 10; II Cor. v. 10)—was rendered the central figure, because he, as head and glory of the divine kingdom, has, like Bel of Babylonian mythology fighting with the dragon, to combat Satan and his kingdom of evil, sin, and death. While thus opening wide the door to admit the pagan world, Paul caused the influx of the entire pagan mythology in the guise of Gnostic and anti-Gnostic names and formulas. No wonder if he was frequently assailed and beaten by the officials of the synagogue: he used this very synagogue, which during many centuries had been made the center of Jewish propaganda also among the heathen for the pure monotheistic faith of Abraham and the law of Moses, as the starting-point of his antinomistic and anti-Judean agitations (Acts xiii. 14, xiv. 1, xvii. 1 *et seq.*, xxi. 27).

Early Christianity a Jewish Sect.

For a long time Christianity regarded itself as part of Judaism. It had its center in Jerusalem (Irenæus, "Adversus Hæreses, i. 26); its first fifteen bishops were circumcised Jews, they observed the Law and were rather unfriendly to heathenism (Sulpicius Severus, "Historia Sacra," ii. 31; Eusebius, "Hist. Eccl." iv. 5; compare Matt. xv. 26), while they held friendly intercourse with the leaders of the synagogue (see Grätz, "Gesch. der Juden," iv. 373 *et seq.*; and Ebionites, Minim, and Nazarenes). Many a halakic and haggadic discussion is recorded in the Talmud as having taken place between the Christians and the Rabbis (see Jacob the Gnostic). Probably the Christian Congregation, or Church of the Saints, did not distinguish itself in outward form from the "Ḳehala Ḳaddisha" at Jerusalem, under which name the Essene community survived the downfall of the Temple (Ber. 9b; compare Eccl. R. ix. 9: 'Edah Ḳedoshah). Of course, the destruction of the Temple and of the Judean state and the cessation of sacrifice could not but promote the cause of Christianity (see Justin, "Dial. cum Tryph." xi.); and under the impression of these important events the Gospels were written and accordingly colored. Still, Jew and Christian looked in common for the erection of the kingdom of heaven by the Messiah either soon to appear or to reappear (see Joël, "Blicke in die Religionsgesch." i. 32 *et seq.*). It was during the last struggle with Rome in the days of Bar Kokba and Akiba that, amidst denunciations on the part of the Christians and execrations on the part of the Jewish leaders, those hostilities began which separated Church and Synagogue forever, and made the former an ally of the arch-enemy. Pauline Christianity greatly aided in the Romanizing of the Church. It gravitated toward Rome as toward the great world-empire, and soon the Church became in the eyes of the Jew heir to Edom (Gen. xxvii. 40). The emperor Constantine completed what Paul had begun—a world hostile to the faith in which Jesus had lived and died. The Council of Nice in 325 determined that Church and Synagogue should have nothing in common, and that whatever smacked of the unity of God and of the freedom of man, or offered a Jewish aspect of worship, must be eliminated from Catholic Christendom.

Paganism Predominant.

Woman's Part in the Early Church.

Three causes seem to have been at work in making the Pauline system dominant in the Church. First, the pagan world, particularly its lower classes, having lost faith in its old gods, yearned for a redeemer, a man-like god, and, on the other hand, was captivated by that work of redeeming love which the Christian communities practised, in the name of Jesus, in pursuance of the ancient Essene ideals (see Charity). Secondly, the blending of Jewish, Oriental, and Hellenic thought created those strange mystic or Gnostic systems which fascinated and bewildered the minds of the more educated classes, and seemed to lend a deeper meaning to the old beliefs and superstitions. Thirdly, woman appeared on the scene as a new factor of Church life. While the women of Syria and of Rome were on the whole attracted by the brightness and purity of Jewish home life, women in the New Testament, and most of all in Paul's life and letters, are prominent in other directions. Aside from those visions of Mary Magdalene which lent support to the belief in the Resurrection (Matt. xxviii. 1, and parallels), there was an undisguised tendency on the part of some women of these circles, such as Salome; Thecla, the friend of Paul; and others (see "Gospel of the Egyptians," in Clement, "Stromata," iii. 964; Conybeare, "Apology and Acts of Apollonius and Other Monuments of Early Christianity," pp. 24, 183, 284), to free themselves from the trammels of those principles upon which the sanctity of home rested (see Eccl. R. vii. 26). A morbid emotionalism, prizing love as "the greatest of all things" in place of truth and justice, and a pagan view of holiness which tended to make life oscillate between austere asceticism (demanding virginity and eunuchism) on the one side, and licentiousness on the other (see Matt. xix. 12; Sulpicius Severus, "Dialogi Duo," i. 9, 13, 15; Eusebius, "Hist. Eccl." vi. 8; Clement, *l.c.* iii. 4; Cyprian, Ep. iv.; Rev. ii. 14), went hand in hand with Gnosticism. Against this exaggeration of the divine attribute of love and the neglect of that of justice, the Rabbis in the ancient Mishnah seem to utter their warning (Meg. iv. 9; Yer. Ber. i. 3). When, finally, the reaction set in, and Gnosticism both as an intellectual and as a sexual degeneracy (compare Sifre on Num. xv. 39) was checked by a strong counter-movement in favor of positive Christianity, two principles of extraordinary character were laid down by the framers of the Church: (1) the Trinitarian dogma with all its corollaries; and (2) a double code of morality, one for the world-fleeing monks and nuns and the clergy—called the really religious ones—and another for the laity, the men of the world.

The Trinitarian formula first occurs in Matthew (xxviii. 19, R. V.) in the words spoken by the risen Christ to the disciples in Galilee: "Go ye therefore, and make disciples of all the [heathen] nations, baptizing them in the name of the Father, and of the Son, and of the Holy Ghost"; but it appears to have been still unknown to Paul (I Cor. vi. 11; Acts ii. 38).

Trinitarianism.

It is quite significant for the historian to observe that, while in the older Gospel (Mark xii. 29) Jesus began reciting the first commandment with the Jewish confession, "Hear, O Israel; the Lord our God, the Lord is one," this verse is omitted in Matt. xxii. 37. Christ, the preexistent Messiah (Gen. R. i.), being either identified with the Shekinah or divine glory (Rom. ix. 4; Col. i. 27; see Mayor, "Epistle of James," p. 75, notes), or with the "Memra" or "Logos," Philo's second god ("Fragments," ed. Mangey, ii. 625; compare "De Somniis," i. 39-41, ed. Mangey, i. 655 *et seq.*), was raised by Paul to the rank of a god and placed alongside of God the Father (I Cor. viii. 6, xii. 3; Titus ii. 13; compare I John v. 20); and in II Cor. xiii. 14 the Trinity is almost complete. In vain did the early Christians protest against the deification of Jesus ("Clementine Homilies," xvi. 15). He is in Paul's system the image of God the Father (II Cor. iv. 4; compare I Cor. viii. 6); and, being opposed "to Satan, the god of this world," his title "God of the world to come" is assured. However repugnant expressions such as "the blood," "the suffering," and "the death of God" (Ignatius, "Ad. Romanus," iii., v. 13; *idem*, "Ad. Ephesios," i. 1; Tertullian, "Ad Praxeam") must have been to the still monotheistic sentiment of many, the opponents of Jesus' deification were defeated as Jewish heretics (Tertullian, *l.c.* 30; see Arianism and Monarchians).

The idea of a Trinity, which, since the Council of Nice, and especially through Basil the Great (370), had become the Catholic dogma, is of course regarded by Jews as antagonistic to their monotheistic faith and as due to the paganistic tendency of the Church; God the Father and God the Son, together with "the Holy Ghost ["Ruaḥ ha-Ḳodesh"] conceived of as a female being," having their parallels in all the heathen mythologies, as has been shown by many Christian scholars, such as Zimmern, in his "Vater, Sohn, und Fürsprecher," 1896, and in Schrader's "K. A. T." 1902, p. 377; Ebers, in his "Sinnbildliches: die Koptische Kunst," 1892, p. 10; and others.

There was a time when the Demiurgos, as a second god, threatened to becloud Jewish monotheism (see Gnosticism and Elisha ben Abuyah): but this was at once checked, and the absolute unity of God became the impregnable bulwark of Judaism. "If a man says: 'I am God,' he lies, and if 'Son of man,' he will repent," was the bold interpretation of Num. xxiii. 18, given by R. Abbahu with reference to Christianity (Yer. Ta'an. ii. 1, 65b). "When Nebuchadnezzar spoke of the 'Son of God' (Dan. iii. 25), an angel came and smote him on the face," saying: "Hath God a son?" (Yer. Shab. vi. 8d). In the Church, Unitarianism was suppressed and persecuted whenever it endeavored to assert its birthright to reason; and it is owing chiefly to Justinian's fanatic persecution of the Syrian Unitarians that Islam, with its insistence on pure monotheism, triumphed over the Eastern Church. Henceforth Moslem and Jewish philosophy stood together for the absolute unity of God, not allowing any predicate of the Deity which might endanger this principle (see Attributes); whereas Christian philosophers, from Augustine to Hegel successively, attempted to overcome the metaphysical difficulties involved in the conception of a Trinity (see David Friedrich Strauss, "Glaubenslehre," i. 425-490).

Persecution of Unitarians.

The next radical deviation from Judaism was the worship of the Virgin Mary as the mother of God; the canonical and, still more, the apocryphal writings of the New Testament offering the welcome points of support to justify such a cult. The Jew could only abhor the medieval adoration of Mary, which seemed to differ little from the worship of Isis and her son Horus, Isthar and Tammuz, Frig and Balder. Yet this was but part of the humanization of the Deity and deification of man instituted in the Church in the shape of image-worship, despite synods and imperial decrees, prohibitions and iconoclasm. The cross, the lamb, and the fish, as symbols of the new faith, failed to satisfy the heathen minds; in the terms of John of Damascus, they demanded "to see the image of God, while God the Father was hidden from sight"; and consequently the second commandment had to give way (see "Image-Worship," in Schaff-Herzog, "Encyc."). It is no wonder, then, that the Jews beheld idolatry in all this, and felt constrained to apply the law, "Make no mention of the name of other gods" (Ex. xxiii. 13; Mek. to the passage and Sanh. 63b), also to Jesus; so that the name of one of the best and truest of Jewish teachers was shunned by the medieval Jew. Still, the Jewish code of law offered some toleration to the Christian Trinity, in that it permitted semi-proselytes ("ger toshab") to worship other divine powers together with the One God (Tosef., Sanh. 63b; Shulḥan 'Aruk, Oraḥ Ḥayyim, 156, Moses Isserles' note).

Medieval Image-Worship.

It was, indeed, no easy matter for the Jew to distinguish between pagan idolatry and Christian image-worship (Shulḥan 'Aruk, Yoreh De'ah, 141). Moreover, image-worship went hand in hand with relic-worship and saint-worship; and so the door was opened wide to admit in the guise of saints the various deities of paganism, the policy of the medieval Church being to create a large pantheon of saints, apostles, and angels alongside of the Trinity in order to facilitate the conquest of heathen nations. In contrast to the uncompromising attitude of Judaism, the Church was ever ready for compromise to win the great multitudes. It was this spirit of polytheism which led to all those abuses the opposition to which was the chief factor of the Reformation—whose aim and purpose were a return to Pauline Christianity and the New Testament with the help of a deeper study of the Old Testament at the hand of Jewish scholarship (see Luther; Reformation; Reuchlin).

But the Trinitarian dogma rested mainly upon Paul's conception of the mediatorship of Christ. For no sooner was the idea of the atoning power

Mediatorship of Christ.

of the death of the righteous (Isa. liii. 4–10; see Atonement) applied to Jesus (Matt. xx. 28; Luke xxii. 37; Acts viii. 32) than Christ became the necessary mediator, "delivering man from the power of Satan and the last enemy—death" (I Tim. ii. 5; Col. i. 13; I Cor. xv. 26). While Judaism has no room for dualism, since God spoke through the seer, "I formed the light and created the darkness: I make peace and create evil" (Isa. xlv. 7); and while the divine attributes of justice and love, punitive wrath and forgiving mercy, are only contrasted (מדת הדין ומדת הרחמים, Ber. 7a; Philo, "Quis Rerum Divinarum Heres Sit," xxxiv.; Siegfried, "Philo," pp. 213 *et seq.*), but never divided into separate powers, the world of Satan and the world of Christ are arrayed against each other, and an at-one-ment by the blood of the cross is necessitated in the Pauline system (Col. i. 20; Rom. iii. 25).

God had to reconcile the world to Himself through the death of Jesus (II Cor. v. 18) and render "the children of wrath" children of His grace (Ephes. ii. 3; Rom. iii. 25, v. 10). "The love of God required the sacrifice of his own begotten Son" (John iii. 16). This view is regarded as repugnant by the pure monotheistic sentiment of the Jew, itself grounded upon the spirituality and holiness of God, and was opposed by R. Akiba when he, with direct reference to the Christian doctrine, said: "Happy are ye, Israelites! Before whom do ye purify yourselves, and who is the one who purifieth you but your Father in heaven, for it is said: 'Israel's hope ["miḳweh," also interpreted as "source of purification"] is God'" (Jer. xvii. 13; Mishnah Yoma, end). But the whole dogma of Jesus' incarnation and crucifixion has for its background a world of sin and death ruled by Satan and his hosts of demons (II Cor. iv. 4; Ephes. ii. 1, vi. 12 *et seq.*; II Tim. ii. 26). In fact, the whole coming of Christ is viewed in the New Testament as a battle with Satan (see Matt. iv. 1 *et seq.*, xii. 29; Luke x. 18; John xii. 31; John iii. 8). The story of Adam's fall, which caused the Book of Wisdom to say (ii. 24) that "through the envy of the devil death came into the world" (compare Ecclus. [Sirach] xxv. 24), was made by Paul (compare II Esdras iii. 7, 21, and Apoc. Baruch, xvii. 3) the keynote of the entire human history (Rom. v. 12). For those of the Rabbis who accepted this view the Law was an antidote against "the venom of the Serpent"—that is, the germ or the inclination to sin ('Ab. Zarah, 22b; Shab. 146a); to Paul, who antagonized the Law, the "breath of the serpent" became a power of sin and everlasting doom of such a nature that none but God Himself, through Christ His son, could overcome it.

The Doctrine of Original Sin.

In adopting this view as the doctrine of Original Sin the Church deprived man of both his moral and his intellectual birthright as the child of God (Tertullian, "De Anima," xvi., xl.; Augustine, "De Nuptiis et Concupiscentiis," i. 24, ii. 34; Strauss, "Glaubenslehre," ii. 43 *et seq.*), and declared all the generations of man to have been born in sin—a belief accepted also by the Lutherans in the Augsburg Confession and by Calvin ("Institutes," II. i. 6–8; Strauss, *l.c.* ii. 49). In vain did Pelagius, Socinus, and the Arminians protest against a view which deprived man of his prerogative as a free, responsible person (Strauss, *l.c.* p. 53). No longer could the Christian recite the ancient prayer of the Synagogue: "My God, the soul which Thou gavest unto me is pure" (Ber. 60b). And while, in all Hellenistic or pre-Christian writings, Enoch, Methuselah, Job, and other Gentiles of old were viewed as prototypes of humanity, the prevailing opinion of the Rabbis being that "the righteous among the heathen have a share in the world to come" (Tosef., Sanh. xiii. 2; Sanh. 105a; see all the passages and the views of a dissenting minority in Zunz, "Z. G." pp. 373–385), the Church, Catholic and Protestant alike, consigns without exception all those who do not believe in Jesus to the eternal doom of hell (Strauss, *l.c.* ii. 686, 687). Christ's descent into hell to liberate his own soul from the pangs of eternal doom became, therefore, one of the fundamentals of the Apostolic creed, after I Peter iii. 18, iv. 6 (see Schaff-Herzog, "Encyc." art. "Hell, Christ's Descent into"). It is obvious that this view of God could not well inculcate kindly feelings toward Jews and heretics; and the tragic fate of the medieval Jew, the persecutions he suffered, and the hatred he experienced, must be chiefly attributed to this doctrine.

Faith and Reason.

Paul's deprecation of the Law and his laudation of faith (in Christ) as the only saving power for Jew and Gentile (Rom. iii. 28, x. 4; Gal. iii. 7 *et seq.*) had, in the Middle Ages, an injurious effect upon the mental progress of man. Faith, as exhibited by Abraham and as demanded of the people in the Old Testament and rabbinical writings, is אמונה, a simple, childlike trust in God; and accordingly "littleness of faith"—that is, want of perfect confidence in the divine goodness—is declared by Jesus as well as by the Rabbis in the Talmud as unworthy of the true servant and son of God (Gen. xv. 6; Ex. xiv. 31; Num. xiv. 11, xx. 12; Hab. ii. 4; II Chron. xx. 20; Mek. to Ex. xiv. 31; Matt. vi. 30; Soṭah 48b). Paul's theology made faith a meritorious act of saving quality (Rom. i. 16); and the more meritorious it is the less is it in harmony with the wisdom of the wise, appearing rather as "foolishness" (I Cor. i. 18–31). From this it was but one step to Tertullian's perfect surrender of reason, as expressed in "Credo quia absurdum," or, more correctly, "Credibile quia ineptum; certum est quia impossibile est" (To be believed because it is foolish; certain because impossible"; "De Carne Christi," v.). Blind faith, which renders the impossible possible (Mark ix. 23, 24), produced a credulity throughout Christendom which became indifferent to the laws of nature and which deprecated learning, as was shown by Draper ("History of the Conflict between Science and Religion") and by White ("History of the Warfare of Science with Theology"). A craving for the miraculous and supernatural created ever new superstitions, or sanctioned, under the form of relic-worship, old pagan forms of belief. In the name of the Christian faith reason and research were condemned, Greek philosophy and literature were exterminated, and free thinking was suppressed. Whereas Judaism made the study of the Law, or rather of the Torah—which is learning, and included science and philosophy as well as religion—the foremost duty of each member of the household (Deut. vi. 7, xi. 19; Josephus, "Contra Ap." ii. §§ 18, 26, 41), medieval Christianity tended to find bliss in ignorance, because knowledge and belief seemed incompatible (Lecky, "History of European Morals from Augustus to Charlemagne," ii. 203–210; *idem*, "History of the Rise and Influence of the Spirit of Rationalism in Europe," i. 1–201).

It was the resuscitated pagan thinkers, it was the Mohammedan and the Jew, who kept the lamps of knowledge and science burning; and to them in large measure the revival of learning, through scholastic philosophy in the Catholic cloisters and afterward in western Europe in general, is due. Not merely the burning of witches and heretics, but the charges, raised by priests and mobs against the Jews, of having poisoned the wells, pierced the consecrated host, and slain innocent children in order to use their blood, can mainly be traced to that stupor of the mind which beholds in every intellectual feat the working of Satanic powers, alliance with which was believed to be bought with blood. On the other hand, the Church was ever busy infusing into the popular mind the belief that those rites which served as symbolic expressions of the faith were endowed with supernatural powers, "sacrament" being the Latin word used for "mysterion," the name given to forms which had a certain magic spell for the believer. Both baptism and the eucharist were regarded as miracle-working powers of the Christian faith, on participation in which the salvation of the soul depended, and exclusion from which meant eternal damnation (see the literature in Schaff-Herzog, "Encyc." *s.v.* "Sacrament").

Asceticism in the Monasteries.

The expectation by early Christianity of a speedy regeneration of the world by the reappearance of Jesus exerted a strange influence also on the whole moral and social state of humanity. The entire Christian life being a preparation for the world to come (and this change being expected to take place soon; Matt. x. 23; I Cor. i. 7; I Peter i. 13), only those that renounced the joys of the flesh were certain of entering the latter. This view gave rise to asceticism in the monasteries, for which genuine religiosity was claimed; while marriage, home, and state, and all earthly comforts, were only concessions to the flesh. Henceforth the ideal life for the priest and recluse was to differ from that for the people at large, who were to rank as inferiors (Strauss, *l.c.* i. 41 *et seq.*). Whereas in Judaism the high priest was not allowed to officiate on the Day of Atonement unless he had a wife that made home sacred to him (Yoma i. 1, after Lev. xvi. 11, 17), celibacy and virginity were prized as the higher virtues of the Christian elect, contempt of the world with all its material, social, and intellectual pursuits being rendered the ideal of life (see Ziegler, "Gesch. der Ethik," 1886, pp. 192–242). Thus, to the Jew Christendom, from the days of the emperor Constantine, presented a strange aspect. The Church, formerly the declared enemy of Rome-Babel (Rev. xvii.), had become her ally, accepting Edom's blessing, "By thy sword shalt thou live" (Gen. xxvii. 40), as her own; and, on the other hand, there appeared her priests ("gallaḥ" = hair-clipped) and monks ("kummarim"), in the guise of the old Hebrew Nazarites and saints, claiming to be the true heirs to Israel's prophecy and priesthood. Indeed, medieval Judaism and Christianity formed the greatest contrast. Children of the same household, invoking the same God and using the same Scriptures as His revealed word, they interpreted differently life and its meaning, God and religion. Their Bible, Sabbath, and festivals, their whole bent of mind and soul, had become widely divergent. They no longer understood each other.

Medieval Jewish Views of Christianity.

Yet, while neither Augustine nor Thomas Aquinas, the chief framers of the Church dogma, nor even Luther and Calvin, the Reformers, had any tolerance for Jew or Moslem, the authorities of the Synagogue accorded to Christianity and Islam a high providential mission in human history. Saadia (died 942), the first to examine the Christian dogma, says (in his "Emunot we-De'ot," ii. 5) that, unconcerned by the sensual Trinitarian belief of the common crowd, he would discuss only the speculative value given by Christian thinkers to the Trinity; and so, with penetrating acumen and profound earnestness and love of truth, he endeavors to lay bare either the metaphysical errors of those who, as he says, make of such attributes as life, power, and knowledge separate parts of the Deity, or the defects of the various philosophical constructions of the divinity of Jesus (see Kaufmann, "Gesch. der Attributenlehre," pp. 38–52; Guttmann, "Die Religionsphilosophie des Saadia," pp. 103–113).

Grander still is the view of Christianity taken by Judah ha-Levi in the "Cuzari." After having rejected as incompatible with reason all the claims of the Trinity and of Christ's origin (i. 5), and remarked that both Christianity and Islam accepted the roots, but not the logical conclusions, of Israel's faith, (iv. 11)—rather amalgamating the same with pagan rites and notions—he declares (iv. 23) that both form the preparatory steps to the Messianic time which will ripen the fruit in which adherents of those faiths, too, will have a share, all the branches thus proving to be "the one tree" of Israel (Ezek. xxxvii. 17; see D. Cassel, "Das Buch Kuzari," 337). This view is shared by Maimonides, who writes in "Yad," Melakim, xi. 4: "The teachings of the Nazarene and the Ishmaelite [Mohammed] serve the divine purpose of preparing the way for the Messiah, who is sent to make the whole world perfect by worshiping God with one spirit: for they have spread the words of the Scriptures and the law of truth over the wide globe; and, whatever of errors they adhere to, they will turn toward the full truth at the arrival of the Messianic time." And in his Responsa (No. 58) he declares: "The Christians believe and profess in common with us that the Bible is of divine origin and given through Moses, our teacher; they have it completely written down, though they frequently interpret it differently."

The great rabbinical authorities, R. Gershom of Mayence (d. 1040; see "Ha-Ḥoḳer," i. 2, 45); Rashi and his school; the French Tosafists of the twelfth century ('Ab. Zarah, 2a); Solomon ben Adret of Barcelona, of the thirteenth century; Isaac b. Sheshet of the fourteenth century (Responsa No. 119); Joseph Caro (Shulḥan 'Aruk, Oraḥ Ḥayyim, 156, end; Yoreh De'ah, 148; and Ḥoshen Mishpaṭ, 266), and Moses Isserles of the sixteenth century declare that Christians are to be regarded as Proselytes of the Gate and not as idolaters, in spite of their image-worship. Still more emphatic in the recognition of Christianity, as teaching a belief in the Creator, revelation, retribution, and resurrection, is Joseph Yaabeẓ, a victim of Spanish persecution (1492), who, in his "Ma'amar ha-Aḥdut," iii., goes so far as to assert that "but for these Christian nations we might ourselves have become infirm in our faith during our long dispersion."

Christianity Compared with Islam.

The same generous view is taken by his contemporary Isaac Arama ("'Aḳedat Yiẓḥaḳ," lxxxviii.). Eliezer Ashkenazi (sixteenth century) warns his coreligionists, in his "Ma'ase ha-Shem," written in Turkey, "not to curse a whole Christian nation because a portion wrongs us, as little as one would curse one's own brother or son for some wrong inflicted." Jacob Emden at the middle of the eighteenth century wrote: "Christianity has been given as part of the Jewish religion by the Apostles to the Gentile world; and its founder has even made the moral laws stricter than are those contained in Mosaism. There are, accordingly, many Christians of high qualities and excellent morals who keep from hatred and do no harm, even to their enemies. Would that Christians would all live in conformity with their precepts! They are not enjoined, like the Israelites, to observe the laws of Moses; nor do they sin if they associate other beings with God in worshiping a triune God. They will receive reward from God for having propagated a belief in Him among nations that never heard His name; for 'He looks into the heart.' Yea, many have come forth to the rescue of Jews and their literature" ("Resen Mat'eh," p. 15b, Amsterdam, 1758, and "Leḥem ha-Shamayim" to Ab. v. 17). Leone del Bene (Judah Asahel Meha-Ṭob) also may be mentioned, who, in his "Kis'ot le-Bet David," 1646, xxiv., xxvi., xlvi., xlviii., compares Mohammedanism with Christianity, and declares the latter as superior, notwithstanding its Trinitarian dogma. A highly favorable opinion of Jesus is expressed also in a Karaite fragment noted in Steinschneider, "Oẓerot Ḥayyim," Catalogue of the Michael Library, pp. 377 *et seq.*, Hamburg, 1848. Compare Jew. Encyc. i. 223, *s.v.* Afendopolo.

The persistent attacks of Christian controversialists against the Jewish belief gave rise, of course, to a number of polemical works, written in self-defense, in which both the Christian dogmas and the New Testament writings are submitted to unsparing criticism. Foremost among these—not to mention Naḥmanides' published disputation with Pablo Christiani—is that of Ḥasdai Crescas, who, in a Spanish "tratado" on the Christian creeds (1396), showed the irrationality of the doctrines of Original Sin, the Trinity, the Incarnation, the Virginity of Jesus' Mother, and Transubstantiation, and who investigated the value of baptism and of the New Testament compared with the Old; beginning with the following three axioms: "(1) Reason can not be forced into belief; (2) God Himself can not alter the laws of a priori truth and understanding; (3) God's justice must comprise all His children." Another vigorous defender of Judaism against Christianity was Simon ben Ẓemah Duran (1361–1440), who, in his great work, "Magen Abot," reiterates the assertion that Jesus, according to his own words, did not come to abrogate the Law; and then exposes the many self-contradictory statements in the New Testament concerning Jesus. The "Iḳkarim" of Joseph Albo is (not merely in ch. xxv. of sect. iii., but in its totality) a defense of liberal Jewish thought against Christian dogmatism; and it therefore dwells with especial emphasis on the fact—which all Jewish thinkers from Saadia and Maimonides down to Mendelssohn accentuated—that miracles can never testify to the verity of a belief, because every belief claims them for itself. As to the two Hebrew standard works of New Testament criticism in the Middle Ages, written for apologetic purposes, the "Sefer Niẓẓaḥon" and the "Ḥizzuḳ Emunah," see Mühlhausen; Lippmann, and Isaac ben Abraham Troki.

Christianity's Historic Mission.

III. To offer to the great Gentile world the Jewish truth adapted to its psychic and intellectual capacities—this was the providential mission of Christianity. Yet, in order to become a unifying power for all the nations on the globe, shaping and reshaping empires, and concentrating the social, political, and spiritual forces of humanity in a manner never before attempted or dreamed of, it required an inspiring ideal of sublime grandeur and beauty, which should at once fascinate and stir souls to their very depths and satisfy their longings. Nothing less than the conquests of Cyrus the Lord's "anointed," called "to subdue nations and to break their prison doors" (Isa. xlv. 1, 2), than Alexander's great empire over the earth, still more than a kingdom that would encompass all that for which Rome and Alexandria and Jerusalem stood—"a kingdom of the people of the saints of the Most High" (Dan. vii. 17–27)—nothing less than this was the goal which they that were told to "go forth and make disciples of all nations" (Matt. xxviii. 19) had in view. The Jewish propaganda, begun in the Babylonian Exile (Isa. xlv. 6; xlix. 6; lvi. 6, 7; lxvi. 21), and systematically pursued in Alexandria and Rome (Matt. xxiii. 15; Schürer, "Gesch." iii. 302 *et seq.*, 420 *et seq.*), was to be left far behind, and, by battering down the barriers of the Law and the Abrahamic faith, was to be rendered elastic enough to suit the needs of a polytheistic world. Such was the view of the missionary of Tarsus.

But it was, after all, the glad tidings of the Jew Jesus which won humanity for Abraham's God. Jewish righteousness, "Ẓedaḳah," which is the power of helpful love readjusting social inadequacies, was destined to go forth from the Synagogue in order to lift the burden of wo from suffering humanity and to organize everywhere works of charity. By this the Church, "the congregation of the Lord," conquered the masses of the vast Roman empire, and, as she learned the better to apply the Jewish system (see ESSENES) to the larger field opened, achieved ever-increasing wonders with the mighty resources at her disposal. The poorhouse, or hospital, "transplanted as a branch of the terebinth of Abraham to Rome" (see CHARITY), became a mighty factor of human beneficence, and moved the deepest forces of the Church to glorious activity. Christianity, following the matchless ideal of its Christ, redeemed the despised and outcast, and ennobled suffering. It checked infanticide and founded asylums for the young; it removed the curse of slavery by making the humblest bondsman proud of being a child of God; it fought against the cruelties of the arena; it invested the home with purity and proclaimed, in the spirit of Ezek. xviii. and Yer. Sanh. iv. 22a, the value of each human soul as a treasure in the eyes of God; and it so leavened the great masses of the empire as to render the cross of Christ the sign of victory for its legions in place of the Roman eagle. The "Galilean" entered the world as conqueror. The Church became the educator of the pagan nations; and one race after another was brought under her tutorship. The Latin races were followed by the Celt, the Teuton, and the Slav. The same burning enthusiasm which sent forth the first apostle also set the missionaries aglow, and brought all Europe and Africa, and finally the American continent, under the scepter of an omnipotent Church. The sword and the cross paved the way through vast deserts and across the seas, and spread the blessings of a civilization claimed to be Christian because its end was the rule of Christ.

Messianic Promises Not Fulfilled.

Judaism, however, denies the validity of this claim. As Isaac Troki (in his "Ḥizzuḳ Emunah," i. 2, 4a, 6) says, "none of the Messianic promises of a time of perfect peace and unity among men, of love and truth of universal knowledge and undisturbed happiness, of the cessation of all wrong-doing, superstition, idolatry, falsehood, and hatred [Isa. ii. 1 *et seq.*, 18; xi. 1-9, lxv. 19, 23; Jer. iii. 17; Ezek. xxxiv. 25, xxxvi. 25 *et seq.*, xxxvii. 26; Zech. xiii. 2, xiv. 9; Zeph. iii. 13] have been fulfilled by the Church." On the contrary, the medieval Church divided men into believers and unbelievers, who are to inherit heaven and hell respectively. With the love which she poured forth as the fountain of divine grace, she also sent forth streams of hatred. She did not foster that spirit of true holiness which sanctifies the whole of life—marriage and home, industry and commerce—but in Jewish eyes seemed to cultivate only the feminine virtues, love and humility, not liberty and justice, manhood and independence of thought. She has done much in refining the emotions, unfolding those faculties of the soul which produce the heavenly strains of music and the beauties of art and poetry; but she also did all in her power to check intellectual progress, scientific research, and the application of knowledge. Her tutorship sufficed as long as the nations under her care were in the infant stage; but as soon as they awoke to self-consciousness and longed for freedom, they burst the shackles of dogma and of ecclesiastical authority. Thus the Church was broken up into churches. Under the influence of Judaism and of Arabic philosophy, Scholasticism arose, and then came the REFORMATION; and the process of disintegration continues throughout Protestantism. The tendency of historical inquiry and Biblical criticism is to leave nothing but the picture of the man Jesus, the Jew, as a noble type of humanity, and to return to simple monotheism (see Renan, "Le Judaïsme et le Christianisme," 1883; *idem*, "L'Eglise Chrétienne," 1879, p. 248; Alexander von Humboldt, in Samter, "Moderne Judentaufen," and in A. Kohut, "Alexander von Humboldt und das Judenthum," 1871, p. 176; Berner, "Judenthum und Christenthum," 1891, p. 31; Alphonse de Candolle, in Jellinek, "Franzosen über Juden," 1880, p. 27; Singer, "Briefe Berühmter Christ. Zeigenossen," p. 114. No human individual, however great in his own environment, can, according to the Jewish view, present a perfect ideal of humanity for all ages and phases of life. "No one is holy but God": to this Jewish conception of man Jesus also gave expression (Matt. xix. 17). Man as the image of God requires all the ages and historical conditions of progress to unfold the infinite possibilities of the divine life planted in him. "Each age has its own types of righteousness" (Tan., Miḳeẓ, Vienna ed., p. 48), and only by the blending of all human efforts toward the realization of the true, the good, and the beautiful can the highest perfection be attained at the end of history, "each mount of vision forming a stepping-stone to Zion as the sublime goal" (Midr. Teh. to Ps. xxxvi. 6).

Christianity is not an end, but the means to an end; namely, the establishment of the brotherhood of man and the fatherhood of God. Here Christianity presents itself as an orb of light, but not so central as to exclude Islam, nor so bright and unique as to eclipse Judaism, the parent of both. Moreover, room is left for other spiritual forces, for whatever of permanent value is contained in Brahmanism, especially its modern theistic sects, and in Buddhism (see Eucken, "Der Wahrheitsgehalt der Religion," Leipsic, 1901; Happel, "Die Religiösen und Philosophischen Grundanschauungen der Inder," 1902), and in the theosophic principles derived from it, and for all religious and philosophical systems that may yet be evolved in the process of the ages. In fact, whatever constitutes humanity and bears the image of God, whatever man does in order to unfold the divine life (Gen. i. 27; Lev. xviii. 5; Ps. viii. 6; Job xxviii. 28; Eccl. xii. 13)—that helps to make up the sum of religion. For the modern tendency toward pure theistic and humanitarian views among the various systems of religious thought, see ETHICAL CULTURE; HUMANITARIANISM; DEISM; UNITARIANISM.

K.

CHRISTINA AUGUSTA: Queen of Sweden; born at Stockholm Dec. 7, 1626; died at Rome April 19, 1689. She was a daughter of Gustavus Adolphus and Mary Eleanora of Brandenburg, and reigned from 1632 to 1654. Her attitude toward the Jews was most benevolent. Acquainted with Hebrew literature, which she eagerly studied in her youth, she welcomed eminent Hebrew scholars at her court. Thus Menasseh ben Israel, recommended to her by Vossius, was kindly received; and his pleadings for the Jews and their literature met with great sympathy.

Christina was, furthermore, interested, together with England, in permitting Jews to settle in the West Indies, and especially favored a Portuguese Marano, Isaac Manoel Texeira, whom she appointed financial agent and resident minister at Hamburg, and on account of whom she more than once remonstrated with the Senate of Hamburg, demanding for her Jewish minister the honors enjoyed by other ministers resident. During her sojourn at Hamburg she resided at the home of Manoel Texeira, regardless of the severe censures pronounced upon her from the Protestant pulpits. She appointed as her physician Benedito de Castro (Baruch Nehemiah).

Christina contrived by every possible means to prevent the banishment of the Jews of Vienna, decreed by Emperor Leopold in 1670; but unfortunate circumstances rendered her efforts futile.

CHRISTOLOGY. See Messiah.

CHRONEGK, LUDWIG: German actor; born at Brandenburg-on-the-Havel Nov. 3, 1837; died at Meiningen July 8, 1890. He was the stage-manager and "Intendanzrath" of the famous Meininger troupe established at Weimar by Duke George of Meiningen. Chronegk had but little schooling, as his bent for the stage asserted itself while he was still a boy. At eighteen he went to Paris to study French methods. A year later, 1856, he returned to Berlin, where he continued in histrionic training under Görner, the manager of Kroll's Theater. On being graduated, Chronegk went to Liegnitz, Görlitz, Hamburg (Thalia Theater), and Leipsic (Stadttheater), playing juvenile rôles.

In 1866 he joined the Meiningers, with whom he acted until 1870, when he became "regisseur." Two years later he was appointed stage-director, and from that time dates the fame of both company and director. Chronegk, whose eye for stage-realism was far in advance of his time, realized that the puppet-like maneuvers of the supernumeraries were neither natural nor graceful, and he took each individual in hand and converted him or her into an independent force. He reanimated the various individuals of the mobs, caused them to act as human beings, and in so doing revolutionized German stage-methods. This course antagonized the conservative element, and in consequence Chronegk was denounced by members of his profession, and more particularly by a short-sighted press. He persisted, however, and lived to see his methods indorsed and imitated.

But whatever good Chronegk accomplished in this one direction, he almost counteracted by the harm he did in another. In perfecting the ensemble, he sacrificed the individual, and as a consequence the Meiningers gave performances which, though exceptional as a whole, were yet full of flaws when viewed critically and analytically. When the company appeared in London in 1881, this fact was most apparent, especially in "Julius Cæsar," which was produced with a *Brutus* so pitifully weak as to mar the entire performance. It was the same with "Othello," in which Ludwig Barnay alone escaped being classed as respectably mediocre.

During the twenty-six years that Chronegk was with the Meiningers, from May 1, 1874—when they first appeared at the Friedrich-Wilhelm Theater, Berlin—until 1890, he staged 2,591 plays, in eighteen foreign and eighteen German cities.

CHRONICLES. See Historiography.

CHRONICLES, BOOKS OF.—Biblical Data: The two books of Chronicles form a history of the Temple and its priesthood, and of the house of David and the tribe of Judah, as guardians of the Temple, with references to the other tribes, and with some connected material. The contents may be briefly summarized as follows:

(a) I Chron. i.-ix. contains chiefly genealogies, from Adam, through Noah's sons, and then particularly through the line of Shem to Esau and Israel and their descendants. The last twelve verses of ch. i. contain a list of Edomitish kings and chiefs. Brief narratives from various periods are interspersed among the genealogies (*e.g.*, ii. 23; iv. 9, 10, 39-43; v. 9, 10, 18-22, 25, 26). The last genealogy in this collection, ix. 35-44, that of Saul's family, forms a kind of transition to the following section.

(b) I Chron. x.-xxix. This section is concerned with David's reign, the introduction being the last battle and the death of Saul (x. 1-12, parallel to I Sam. xxxi. 1-13), and the conclusion, the accession of Solomon (xxiii. 1; xxviii. 5 *et seq.*; xxix. 22 *et seq.*).

(c) II Chron. i.-ix. is devoted to Solomon's reign. The first chapter speaks of his sacrifice at Gibeon (vs. 1-13) and Solomon's splendor (vs. 14-17). The building of the Temple is described in ch. ii.-iv., and its dedication in v. 1-14. The following chapters speak of Solomon's prayer, vision, sacrifices, glory, and in ix. 31 the death of Solomon is mentioned.

(d) II Chron. x.-xxxvi. contains the history of the kingdom of Judah down to the fall of Jerusalem, with the division of the kingdoms as preface, and the restoration-edict of Cyrus as appendix (viz., x. 1-19, accession of Rehoboam and division of the kingdom; xi. xii., Rehoboam; xiii. 1-22, Abijah; xiv.-xvi., Asa; xvii.-xx., Jehoshaphat; xxi., Jehoram; xxii. 1–9, Ahaziah; xxii. 10–12, xxiii., Athaliah; xxiv., Joash; xxv., Amaziah; xxvi., Uzziah; xxvii., Jotham; xxviii., Ahaz; xxix.-xxxii., Hezekiah; xxxiii. 1–20, Manasseh; xxxiii. 21–25, Amon; xxxiv., xxxv., Josiah; xxxvi. 1–3, Jehoahaz; xxxvi. 4–8, Jehoiakim; xxxvi. 9, 10, Jehoiachin; xxxvi. 11–13, Zedekiah; xxxvi. 17–21, fall of Jerusalem; xxxvi. 22, 23, restoration-edict of Cyrus.

——**In Rabbinical Literature:** Rabbinical literature does not recognize the division of Chronicles into two books. In B. B. 15a it is named as one (ספר) דברי הימים, and the Masorah counts the verse I Chron. xxvii. 25 as the middle of the book. Tradition regards this one book as consisting of two unequal parts; viz., (1) lists largely of a genealogical nature with brief historical details; and (2) an extensive history of the kings in Jerusalem. The authorship of the first part, which is designated "Yaḥas" (יחס = "genealogy") of the "Dibre ha-Yamim" is ascribed to Ezra (B. B. 15a). In Pes. 62b this part is connected with a Midrash and quoted as ספר יוחסין ("Book of the Descents"); while Rashi names the Midrash (מתניתין דדברי הימים), "Mishnah of Dibre ha-Yamim," etc., which, according to him, contained expositions of certain passages of the Torah. This part was not to be explained to the men of Lud nor to those of Nehardea, for reasons not stated; perhaps it was feared that these interpretations might meet with irreverence.

On the whole, Chronicles was regarded with suspicion; its historical accuracy was doubted by the Talmudic authorities, it being held to be a book for homiletic interpretation, לא נתנו דברי הימים אלא לידרש (Lev. R. i. 3; Ruth R. ii., beginning; compare Meg. 13a). The names were treated with great freedom; and many which clearly belonged to different persons were declared to indicate one and the same man or woman (Soṭah 12a; Ex. R. i. 17, *et passim*). Numerous as these fanciful interpretations of verses in Chronicles are in Talmudic-Midrashic literature, the loss of many similar expositions was deplored (Pes. 62b). E. G. H.

Title.

——**Critical View.—I. Position in Old Testament Literature:** Chronicles, which in the Hebrew canon consists of a single book, is called in the Hebrew Bible דברי הימים ("Annals"); in the LXX.—Codex B, *παραλειπομένων* ("of things left out"); Codex A adds (*τῶν*) *βασιλέων* Ιουδὰ ("concerning the kings of Judah"); *i.e.*, a supplement to the Book of Kings; in the Vulgate, Liber Primus (and Secundus) "Paralipomenon." The modern title "Chronicles" was suggested by Jerome's speaking of the book in his "Prologus Galeatus" as "Chronicon totius divinæ historiæ." The book belongs to the Hagiographa, or "Ketubim," the third and latest-formed section of the Hebrew canon. The view that its canonicity was matter of discussion among the Jews seems to rest on insufficient evidence (Buhl, "Kanon und Text des A. T." Eng. ed., p. 31). In Hebrew lists, manuscripts, and printed Bibles, Chronicles is placed either first (Western or Palestinian practise, as in the St. Petersburg Codex), or last (Eastern or Babylonian, as in the Babylonian Talmud); see Ginsburg, "Introduction," pp. 1–8. In Greek and Latin lists, and in manuscripts and editions of the LXX. and Vulgate, Chronicles usually follows Kings; the exceptions are more numerous in the Latin lists (Swete, "The Old Testament in Greek According to the Septuagint," Introduction, pp. 201–230).

Chronicles, originally a single work, is first found divided into two books in Codices A and B of the LXX., which were followed by subsequent versions, and ultimately by printed editions of the Hebrew text. It is part of a larger work, Chronicles-Ezra-Nehemiah, composed (see Section II.) in the Greek period between the death of Alexander (B.C. 323) and the revolt of the Maccabees (B.C. 167). It expresses the piety of the Temple community, and their interest in its services and history. They felt that the services had reached an ideal perfection, and were led to think of the "good kings" as having shaped their religious policy according to this ideal. Probably the author of Chronicles did not intend to supersede Samuel and Kings. There are slight traces of Chronicles in Ecclesiasticus (Sirach), (*e.g.*, xlvii. 8 *et seq.*; compare I Chron. xxv.); perhaps also in Philo (see Ryle, "Philo and Holy Scriptures," pp. 286 *et seq.*), and in the N. T. (for example, compare II Chron. xxiv. 21 with Matt. xxiii. 35). The references to Samuel-Kings are more numerous. The omission (see Swete, *l.c.* p. 227) of Chronicles from some Christian lists of canonical books is probably accidental.

Authorship and Date.

II. Composition: (a) *Relation to Ezra-Nehemiah.* Chronicles, Ezra, and Nehemiah were originally a single work. This is shown by the identity of style, theological standpoint, and ecclesiastical interests, as well as by the fact that Chronicles concludes with a portion of a paragraph (II Chron. xxxvi. 22, 23) which is repeated and completed in Ezra i. 1–4. Comparison shows that Chronicles ends in the middle of a sentence. The division of the original work arose from the diverse nature of its contents: Chronicles was merely a less interesting edition of Samuel-Kings; but Ezra-Nehemiah contained history not otherwise accessible. Hence readers desired Ezra-Nehemiah alone; and Chronicles (from its position in many manuscripts, etc., after Nehemiah) only obtained its place in the canon by an afterthought.

(b) *Author.* The author's name is unknown; the ascription by some Peshiṭta manuscripts to "Johanan the priest," perhaps the Johanan of Neh. xii. 23 (Barnes, "Chronicles," p. xii., in "Cambridge Bible for Schools and Colleges"; *idem*, "An Apparatus Criticus to Chronicles in the Peshiṭta Version," p. 1), can have no weight. From the keen interest shown in the inferior officials of the Temple, especially the singers, the author seems to have been a Levite, possibly one of the Temple choir.

(c) *Date.* Chronicles-Ezra-Nehemiah must be later than the times of Ezra and Nehemiah (458–432). In style and language the book belongs to the latest period of Biblical Hebrew. The descendants of Zerubbabel (I Chron. iii. 24) are given, in the Masoretic text, to the sixth generation (about B.C. 350); in the LXX., Syriac, and Vulgate, to the eleventh generation after Zerubbabel (about B.C. 200). The list of high priests in Neh. xii. 10, 11, extends to Jaddua (*c.* 330). These lists might, indeed, have been made up to date after the book was completed; but other considerations point conclusively to the Greek period; *e.g.*, in Ezra vi. 22, Darius is called "the king of Assyria." On the other hand, the use of the book in Ecclesiasticus (Sirach) referred to above, the absence of any trace of the Maccabean struggle, and the use of the LXX. Chronicles by Eupolemus (*c.* B.C. 150; see Swete, *l.c.* p. 24), point to a date not later than B.C. 200. Hence Chronicles is usually assigned to the period B.C. 300–250.

(d) *Sources.* Chronicles contains (see Section I.) much material found, often word for word, in other books of the Bible, and has also frequent references to other authorities. In regard to these sources, the contents may be classified thus: (*A*) passages taken from other O. T. books, with textual or editorial changes, the latter sometimes important; (*B*) passages based upon sections of other O. T. books, largely recast; (*C*) passages supposed on internal evidence to have been taken from or based on ancient sources, no longer extant and not much later than the close of the Exile, and in some cases perhaps earlier (see classification, p. 62); (*D*) passages supposed on internal evidence to be the work of late

Genealogies: from Adam to David; of the tribes and clans; of the houses of Saul, David, the high priests, etc.	vi. 54–81 = Josh. xxi. 5–39.	i. 1–ii. 17, based on Gen., Num., Josh., I Kings, and Ruth. iii. 1–16, based on II Sam. and Kings. iv. 24, 28–33, based on Gen., Ex., Num., and Josh.	ii. 9, 25–33, 42–45, 49. iv. 1–20, 25–27, 35–43. vi. 1–15. vii. 14–24.	iii. 17–24. iv. 21–23. v. vi. 16–53. vii. 1–13, 25–40. viii., ix.
x. to xxi.	History of David, from the death of Saul to the Census and Plague.	x. 1–xi. 41a = I Sam. xxxi.; II Sam. v. 1–3, 6–10; xxiii. 8–39. xiii. 6–xiv. 17 = II Sam. vi. 1–11; v. 11–23. xvi. 8–24 = Ps. cv. 1–15; xcvi. 1–13; cvi. 1, 47 *et seq.* xvii.-xx. = II Sam. vii.; viii.; x.; xi. 1; xii. 26, 30, 31; xxi. 18–22.	xv. 1–xvi. 7, 37–43, based on II. Sam. vi. 12–20. xxi., based upon II Sam. xxiv.	x. 41b–47.	xii. 1–xxiii. 5.
xxii. to xxix.	Preparations for building the Temple, anointing of Solomon, death of David.				xxii.–xxix.

II CHRONICLES.

Chapters.	Contents.	A.	B.	C.	D.
i. to ix.	Solomon.	i. 14–17 = I Kings x. 26–29. viii. 1–11 = I Kings ix. 10, 11, 17–24. viii. 17–ix. 31 = I Kings ix. 25–x. 28; xi. 41–43.	i. 1–13, based upon I Kings 4–13. ii.-vii., based upon I Kings v.-ix.		viii. 12–16.
x. to xxviii.	Rehoboam to Ahaz.	x. 1–xi. 4 = I Kings xii. 1–24. xv. 16–xvi. 6 = 1 Kings xv. 13–22. xviii. = I Kings xxii. 2–35a. xxi. 1, 5–10a = I Kings xxii. 50, II Kings viii. 17–22, 24a. xxv. 1–4, 17–28 = II Kings xiv. 2–14, 17, 19, 20. xxvi. 1–4 = II Kings xiv. 21, 22; xv. 2, 3. xxvii. 1–3, 7–9 = II Kings xv. 33–35, 38.	xii. 2a, 9–xiii. 2, 22, based on I Kings xiv. 21, 25–28; xv. 1, 2, 7. xx. 31–37, based on I Kings xxii. 41–49. xxii., xxiii., based on II Kings vii. 24–xi. 20. xxiv., based on II Kings xi. 20–xii. 21. xxvi. 20–23, based on II Kings xv. 5–8. xxviii., based on II Kings xvi.	xi. 5–12. xiv. 8, 9, 11, 12. xxvi. 6–10. xxvii. 4–6.	xi. 13–xii. 8. xiii. 3–21. xiv. 1–7, 9–11, 13–xv. 15. xvi. 7–14. xvii. xix. 1–xx. 30. xxi. 2–4, 10b–20. xxv. 5–16. xxvi. 5, 11–20.
xxix. to xxxvi.	Hezekiah to the return from the Exile.	xxxiii. 1–10 = II Kings xxi. 1–10, 18. xxxvi. 22, 23 = Ezra i. 1–3a.	xxix.–xxxii., based on II Kings xviii.–xx. xxxiii. 21–25, based on II Kings xxi. 19–24. xxxiv. 1–xxxvi. 21, based on II Kings xxii.–xxv.	xxxii. 30.	xxxiii. 11–19.

post-exilic writers (compare *ib.*). In the preceding table space prevents the presentation of details. In *C* and *D*, Kittel's analysis in "S. B. O. T." is mostly followed, but not in all details, nor in his separation of the *D* material into various strata. Small portions from extant books embedded in *B*, *C*, and *D* are not indicated.

The non-Biblical sources may be classified thus:

(1) An earlier historical work cited as: "The Book of the Kings of Judah and Israel" (II Chron. xvi. 11, xxv. 26, xxviii. 26); "The Book of the Kings of Israel and Judah" (*ib.* xxvii. 7, xxxv. 26); "The Acts of the Kings of Israel" (*ib.* xxxiii. 18); and perhaps also as "The Midrash of the Book of Kings" (*ib.* xxiv. 27).

(2) Sections of a similar history of David and Solomon (unless these references are to that portion of the former work which dealt with these kings), cited as: "The Words of Samuel the Seer" (I Chron. xxix. 29); "The Words of Nathan the Prophet" (*ib.*; II Chron. ix. 29); and "The Words of Gad the Seer" (I Chron. xxix. 29).

(3) Sections of "The Book of the Kings of Israel and Judah," and possibly of other similar works, cited as: "The Words of Shemaiah the Prophet and of Iddo the Seer" (II Chron. xii. 15); "The Words of Jehu the Son of Hanani" (*ib.* xx. 34); "The Words of the Seers" (LXX., R.V., margin); "of his Seers" ("S. B. O. T."); "of Hozai" (II Chron. xxxiii. 19–20, R. V.); "The Vision of Iddo the Seer" (*ib.* ix. 29); "The Vision of Isaiah the Prophet" (*ib.* xxxii. 32); "The Midrash of the Prophet Iddo (*ib.* xiii. 22); "The Acts of Uzziah, Written by Isaiah the Prophet" (*ib.* xxvi. 22); and "The Prophecy of Ahijah the Shilonite" (*ib.* ix. 29).

In the absence of numbered divisions like the present chapters and verses, portions of the work are indicated by the name of the prophet who figures in it—probably because the Prophets were supposed to have been the annalists (*ib.* xxvi. 22). Thus, "the Vision of Isaiah" is said to be in "The Book of the Kings of Judah and Israel"; and "the Words of Jehu the son of Hanani," inserted in "The Book of the Kings of Israel."

Thus the main source of Chronicles seems to have been a late post-exilic Midrashic history of the kings of Judah and Israel. Possibly, this had been divided into histories of David and Solomon, and of the later kings. The author may also have used a collection of genealogies; and perhaps additions were made to the book after it was substantially complete. In dealing with matter not found in other books it is difficult to distinguish between matter which the chronicler found in his source, matter which he added himself, and later additions, as all the authors concerned wrote in the same spirit and style; but it may perhaps be concluded that details about Levites, porters, and singers are the work of the chronicler (compare Section III. of this article).

III. Relationship to Samuel-Kings: (a) *Comparison of Contents.* Chronicles omits most of the material relating to Saul and the northern kingdom, including the accounts of Samuel, Elijah, and Elisha, and most of what is to the discredit of the "good kings"; *e.g.*, the story of Bathsheba. Chronicles adds (see table, *B* and *D*) long accounts of the Temple, its priests and its services, and of the observance of the Pentateuchal laws; also records of sins which account for the misfortunes of "good kings" —*e.g.*, the apostasy of Joash (II Chron. xxiv.); of the misfortunes which punished the sins of "bad kings" —*e.g.*, the invasions in the reign of Ahaz (*ib.* xxviii.); and of the repentance which resulted in the long reign of Manasseh (*ib.* xxxiii.); besides numerous genealogies and statistics. Chronicles has numerous other alterations tending, like the additions and omissions, to show that the "good kings" observed the law of Moses, and were righteous and prosperous (compare *ib.* viii. 2 and I Kings ix. 10, 11; see also below).

(b) *Literary Connection.* It might seem natural to identify the main source of Chronicles with Samuel-Kings, or with "The Book of the Chronicles of the Kings of Israel" and "The Book of the Chronicles of the Kings of Judah," frequently referred to in Kings. But the principal source can not have been Kings, because "The Book of the Kings" is sometimes said to contain material not in Kings—*e.g.*, the wars of Jotham (II Chron. xxvii. 7); neither can it have been the "Chronicles" cited in Kings, because it is styled "Midrash" (A. V., "story"; R. V., "commentary"), which was a late form of Jewish literature (II Chron. xiii. 22, xxiv. 27). This main source, "The Book of the Kings," is therefore commonly supposed (see II. d) to have been a post-exilic work similar in style and spirit to Chronicles. The relation of this source to Kings is difficult to determine. It is clear that Chronicles contains matter taken either directly or indirectly from Kings, because it includes verses inserted by the editor of Kings (compare II Chron. xiv. 1, 2 and I Kings xv. 8,11). Either Chronicles used Kings and "The Book of the Kings," both of which works used the older "Chronicles" (so Driver, "Introduction to the Literature of the O. T." 6th ed., p. 532), or Chronicles used "The Book of the Kings," which had used both Kings and the older "Chronicles," or works based on them.

(c) *Text.* It is not always possible to distinguish minor editorial changes from textual errors; but, when the former have been eliminated, Chronicles presents an alternative text for the passages common to it and Samuel-Kings. As in the case of two manuscripts, sometimes the one text, sometimes the other, is correct. For example, I Chron. xviii. 3 has, wrongly, "Hadarezer," where II Sam. viii. 3 has "Hadadezer"; but conversely I Chron. xvii. 6 has, rightly, "judges," where II Sam. vii. 7 has "tribes."

IV. Historical Value: (a) *Omissions.* Almost all these are explained by the chronicler's anxiety to edify his readers (compare Section III. a); and they in no way discredit the narratives omitted.

(b) *Contradictions.* Where Chronicles contradicts Samuel-Kings preference must be given to the older work, except where the text of the latter is clearly corrupt. With the same exception, it may be assumed that sections of the primitive "Chronicles" are much more accurately preserved in Samuel-Kings than in Chronicles.

(c) *Additions.* The passages which describe the

Temple ritual and priesthood and the observance of the Pentateuchal law before the Exile are a translation of ancient history into the terms of the chronicler's own experience. The prophetical admonitions and other speeches are the chronicler's exposition of the religious significance of past history according to a familiar convention of ancient literature. Such material is most valuable: it gives unique information as to the Temple and the religious ideas of the early Greek period. Most of the material included under *C* in Section II. d, above has apparently been borrowed from an older source, and may constitute an addition to present knowledge of pre-exilic Israelitish history. The religious and other interests of the chronicler and his main source do not seem to account for the origin of the genealogies, statistics, accounts of buildings, etc., in *C*.

The character of another set of additions is not so clear; viz., Abijah's victory (II Chron. xiii.), Zerah's invasion (*ib.* xiv., xv.), and Manasseh's captivity (*ib.* xxxiii.). However little the chronicler may have cared about writing scientific history, the fact that he narrates an incident not mentioned elsewhere does not prove it to be imaginary. Kings is fragmentary; and its editors had views as to edification different from those of the chronicler (see JUDGES), which might lead them to omit what their successor would restore. Driver and others hold that Chronicles is connected with early sources by another line than that through Kings (note also *C*, Section II. d). Hence the silence of Kings is not conclusive against these additions. Nevertheless, such narratives, in the present state of knowledge, rest on the unsupported testimony of a very late and uncritical authority. Much turns on internal evidence, which has been very variously interpreted. Some recognize a historical basis for these narratives (W. E. Barnes, in "Cambridge Bible," pp. xxx. *et seq.*; A. H. Sayce, "The Higher Criticism and the Verdict of the Monuments," p. 465); others regard them as wholly unhistorical (see "Chronicles, Books of," in "Encyc. Bibl."). As to Chronicles in general, Professor Sayce writes (*l.c.* p. 464): "The consistent exaggeration of numbers on the part of the chronicler shows us that from a historical point of view his unsupported statements must be received with caution. But they do not justify the accusations of deliberate fraud and 'fiction' which have been brought against him. What they prove is that he did not possess that sense of historical exactitude which we now demand from the historian."

CHRONOGRAM (from the Greek *χρόνος* = "time," and *γράμμα* = "writing"): A sentence or verse certain letters of which express a date, while the sentence itself alludes to or is descriptive of the event to which the date belongs. The words "chronograph," "chronicon," "chronostichon," "eteostichon," and "eteamenchemerodistichon" are all synonyms for "chronogram"; but the latter is now almost exclusively used. In general, the Latin literature of the Middle Ages is the richest in chronograms; but they are also found in German, Dutch, Belgian, and Hungarian. In English and French but few are found, and in Italian hardly any. Chronograms are especially popular in the East, there being several books in Persian on the art of constructing a "ta'rikh," the Persian equivalent for "chronogram" (see Rodgers, "Tarikhs," in "Jour. Royal Asiatic Soc." 1898, pp. 715-739). It is not improbable that the chronogram originated in the East, where such poetic juggling is common. The great popularity of chronograms among the Jews, and the extent to which they have been cultivated, may be explained by the fact that they are a variety of GEMAṬRIA, which latter was highly regarded by the Jews and much practised by them.

The earliest chronogram in Jewish literature is one found in a Hebrew poem of the year 1205 by Al-Ḥarizi (ed. Kaminka, p. 412; compare Rapoport, in "Kerem Ḥemed," vii. 252), while the earliest Latin chronogram is dated five years later (compare Hilton, "Chronograms," iii. 4). According to Firkowich, Hebrew chronograms date back to 582 (compare the epitaphs in his work "Abne Zikkaron," p. 10); but the inscriptions cited by him are probably forgeries. In the thirteenth century chronograms are found in the epitaphs of German Jews (Lewysohn, "Nafshot Ẓaddiḳim," No. 14, of the year 1261; No. 16, of the year 1275).

In Epitaphs.

It is evident, therefore, that for a period of five hundred years chronograms occurred in the epitaphs of European Jews. Thus the dates of the epitaphs of the family of Asher b. Jehiel in the first half of the fourteenth century are indicated by chronograms (Almanzi, "Abne Zikkaron," pp. 4, 6, 9); and among sixty-eight Frankfort epitaphs of that century four chronograms have been preserved (Horowitz, "Inschriften . . . zu Frankfurt-am-Main," Nos. 8, 29, 36, 68). The German Jews seem to have possessed little skill in the composition of chronograms, there being only about twenty-five (and these very simple) in a total of some 6,000 inscriptions. In Bohemia and Poland, chronograms in epitaphs occur more frequently, and are often very clever; for example, the epitaph of the physician Menahem b. Asher Mazzerato, who died at Prague in 1680, reads as follows: איש צדיק ישר חכם וענו האלוף מהר"ר מנחם רופא מומחה (Lieben, "Gal 'Ed," p. 36); and the numerical value of the marked initial letters therein amounts to 440; *i.e.*, 5440, the Jewish year in which Menahem died. The year of death of the associate rabbi of Prague, Zalman, who perished in the great fire of 1689 (=5449 Jewish era), is indicated by the words באש יצא מאת ד' (*ib.* No. 59).

In Books.

While the epitaphs, in addition to the chronograms, in many cases directly mention the dates, many manuscripts, and an even greater number of printed books, are dated simply by means of chronograms; authors, copyists, and typographers rivaling one another in hiding the dates in intricate chronograms, most difficult to decipher. Hence, many data of Jewish bibliography still remain to be determined, or at least rectified. Down to recent times the custom of indicating dates by means of chronograms was so prevalent in Jewish literature that but few books are dated by numerals only. In the earliest printed books the chronograms consist of one or two words only: the Soncino edition of the Talmud, for instance, has for its date the earliest printed chronogram, גמרא ("Gemara") = 244 (1484 C.E.). Words like רננו ("rejoice ye!"), שמחה ("joy"), ברנה ("with rejoicing") were especially used for this purpose, as they express happiness. Later on, entire verses of the Bible, or sentences from other books, having some reference to the contents or title of the book, or to the name of the author, publisher, printer, etc., were used. In longer sentences, in which some of the letters were not utilized in the chronogram, those that counted were marked by dots, lines, or different type, or were distinguished in other ways. Innumerable errors have been made by bibliographers because the distinguishing marks were missing or blotted, or had been omitted. To this source of confusion must be added the varying methods of indicating the "thousand" of the Jewish era. The Italian, Oriental, and earlier Amsterdam editions frequently designate the thousand as לפ׳ג (= לפרט גדול, "the major era"). The German and Polish editions omit the thousand, considering only לפ׳ק (= לפרט קטון, "the minor era"); but as neither the former nor the latter is employed throughout the respective editions, many errors arise. The following chronogram, which Samuel Schotten adds to his work "Kos ha-Yeshu'ot" (Frankfort-on-the-Main, 1711), shows how artificial and verbose chronograms may be: "Let him who wishes to know the year of the Creation pour the contents out of the cup [*i.e.*, count the word "kos," כוס, with defective spelling כס = 80] and seek aid [ישועה = 391; together 471] in the sixth millennium." The days of the month and week are indicated in the same way.

The chronograms on the works and documents of persons who were followers of Shabbethaism, and who in this manner indicated their belief, are most interesting. Thus, Samuel b. David ha-Levi's well-known work, "Naḥalat Shib'ah" (Amsterdam, 1667), has the date משיח בן דוד בא ("Messiah, son of David, is come!") on the title-page; and the community of Holleschau, in Moravia, similarly engraved in the epitaph of its beloved rabbi, Shabbethai b. Meïr ha-Kohen, the words היום בא משיח לגאולה ("Messiah is come to-day for a redemption"; compare Weisse, in "Kokebe Yiẓḥaḳ," i. 77). Many important years in Jewish history are indicated by their respective chronograms; *e.g.*, the year 1492 by מזרה ("scatterer" = 252, after Jer. xxi. 10, which says that God scattered Israel). This was the year when the Jews were expelled from Spain (Abravanel's Introduction to his Commentary on Kings).

In Poetry.

Neo-Hebraic poetry, which laid especial stress on the formal side of verse, also cultivated chronograms. A number of Hebrew poems were produced in the first half of the nineteenth century, in which the letters of each verse have the same numerical value, being generally the year in which it was written. A New-Year's poem in this style, written in the year 579 (=1819), is found in Shalom Cohen's "Ketab Yosher" (ed. Warsaw, p. 146). Two years later Jacob Eichenbaum wrote a poem in honor of a friend, each line of which had the numerical value of 581 ("Ḳol Zimrah," ed. Leipsic, pp. 50–53). While this poem is really a work of art, in spite of the artifice employed, Eichenbaum's imitators have in their translations merely produced rimes with certain numerical values. Gottlober (in "Ha-Kokabim," i. 31) wrote an excellent satire on these rimesters, each line of his poem having the numerical value of 618 (=1858). The first two verses of the poem are as follows:

עם הלפקים כה אריבה
ולאלה כגמול ידם להם אשיבה

But even poets like I. L. Gordon and A. B. Lewensohn have a great weakness for the לפקים ("minor eras"), though employing them only in the superscriptions to their poems. The modern school of Hebrew poets has given up these artifices, the "minor eras" being now chiefly employed for New-Year congratulations, especially by the poor of Palestine, who frequently distribute printed New-Year cards, the wish consisting of a verse whose numerical value is equal to the year.

G. L. G.

CHRONOLOGY *** (I.)**: The science that treats of the computation and adjustment of time or periods of time, and of the record and arrangement of events in the order of time. The chronology of Jewish literature may be divided into two periods: (1) that of the Biblical books; and (2) that of post-Biblical times.

Division of Time in the Biblical Books: From the earliest periods the day was divided into night and morning. Genesis records the division into two parts of what is now termed the "tropical or solar day." It is probable that the Israelites divided the day into twelve "dihoræ," or twenty-four hours; but in the Hebrew texts no trace thereof is found. The earliest mention of the hour ("sha'ah") is in the Aramaic texts of Daniel (iii. 6, 15). In documents of the Greek epoch, as also in the Assyrian texts, references occur to "night-watches" ("ashmurah"), by which the night was divided into three parts (Ps. xc. 4; Lam. ii. 19). As regards instruments for measuring time, II Kings (xx. 11) and Isaiah (xxxviii. 8) give some vague information concerning the gnomon of King Ahaz, and the degrees marked on his sun-dial (see DIAL).

The week, with the attribution of each day to one of the seven planets, is one of the most ancient institutions of the Babylonians. This nation commenced the hebdomadal period with the sun, followed by the moon, Mars, Mercury, Jupiter, Venus, and Saturn. Every planet in succession presided over twenty-four hours, but not in the order assumed for their spheres, which was as follows: the sun, Venus, Mercury, the moon, Saturn, Jupiter, Mars. The initial hour of the first day was consecrated to the sun; the twenty-fifth, or the initial hour of the second day, to the moon; the forty-ninth to Mars; the seventy-third to Mercury; the ninety-seventh to Jupiter; the one hundred and twenty-first to Venus; and the one hundred and forty-fifth to Saturn.

---

*The foundations of Biblical chronology being still a matter of discussion, it is deemed desirable to present the divergent views in separate articles.

It has been claimed that this arrangement is of more modern invention; but indications of its existence are found in the earliest texts. The Mosaic accounts of Creation, of course, ignore the assignment of the week-days to divers stars; but, independently of all astral influence, the seventh day was instituted as a sacred day, quite distinct in character from the seventh day of the lunar synodic month, which was regarded as a holy day by the Chaldeans.

From the Mosaic times down the synodical month in the Jewish calendar was calculated, as in the Babylonian, from one new moon to the next. This is proved by the well-known passage in Ex. xii. 2. Here no Egyptian influence may be assumed. But the system of thirty-day months, also, seems to have been recognized by the Jewish calendar.

The Jewish year was solar-lunar. In the early Biblical statements no indication whatever is found of an intercalary month. Still it is safely assumed that the difference of ten or eleven hours between the twelve synodical months and the tropical year was equalized by the insertion of an embolismic month; and in the cuneiform Sumerian texts express mention is made of this intercalation as far back as the fifth millennium B.C. It is very probable that the equivalence of 19 tropical years and 235 synodical months was known in the most remote times; but a regular intercalary system was not introduced before Greek influence asserted itself—that is, not before 367 B.C. In Chaldea the embolismic months were inserted merely for astrological reasons: the methods employed later by the Jewish authorities (see CALENDAR) to adjust astronomical irregularities can not be held to have been in vogue among the Chaldeans.

Post-Biblical Times: The modern Jewish calendar is adapted to the Greek computation exclusively. The Talmudic tractate Rosh ha-Shanah (ch. i.) indicates that four ways for commencing the year were known and observed. The day was divided into twenty-four hours, and each hour into 1,080 "ḥalaḳim." The passage in Rosh ha-Shanah gives, almost exactly, the length of the average synodical month as 29 days, 6 hours, and 793 ḥalaḳim (44 minutes, $3\frac{1}{3}$ seconds), which is only $\frac{4}{9}$ second too long: the real duration being 29 days, 6 hours, 44 minutes, 2.89 seconds. This estimate is of Greek origin, like the Metonic embolismic cycle of the years 3, 6, 8, 11, 14, 17, 19 of the nineteen-year Metonic period. The new Jewish calendar seems to have been inaugurated in 363 (Tishri), and Rabbi Hillel apparently modified it by introducing some innovations; but it is not known exactly what they were. Some hints in Talmudic texts, which can not be dwelt upon here, seem to indicate that the "forbidden days"—that is, days of the week on which Rosh ha-Shanah (New-Year) could not fall—were introduced at that time. The Talmud speaks of Shabu'ot falling on a Saturday, which can not happen now. The first of Tishri can not fall on Sunday, Wednesday, or Friday (אדו); nor can the first of Nisan be on Monday, Wednesday, or Friday (בדו). These forbidden days cause a great complication of the calendar. As a starting-point for calculation, the first of Tishri in the year 1 is indicated by the symbol בהרד, signifying Monday (ב or second day of week), 5 (ה) hours, 204 (רד) ḥalaḳim, corresponding to Oct. 7 in the Julian, or Sept. 7 in the Gregorian, calendar of the year 3761–3760 B.C. (6240 of the modern computation, which adds 10,000 years to the common era). This is the astronomical day 347,999. The cycles ("maḥzor") count from that epoch. In order to ascertain the year of the cycle, the number is divided by 19, the remainder giving the year of the cycle; for example: 5661 (1900–1901) $\div 19 = 297 + 18$; *i.e.*, the year 5661 is the eighteenth year of the 298th cycle.

Eras.

The idea of an era beginning with and counted from an historical event is an ingenious invention of the Greeks, who represented by an impersonal fact computations referring to a person. The first public application of it was the Seleucid era, dating from Oct., 312 (or, at Babylon, from April 2, 311) B.C.; and this era was accepted by the Jews, who maintained it generally down to the eleventh century; in Egypt, however, it survived into the sixteenth century, when Rabbi David ibn Abi Zimra brought about its disuse, while in South Arabia it was used, along with the "aera mundi," even as late as the nineteenth century. For the Temple and the dating of private records there existed the era from the Exodus. Not only is the existence of this era a mathematical conclusion based on the 200 dates in Kings, but it is also definitely indicated in I Kings vi. 1, where the beginning of the construction of Solomon's Temple is assigned to the year 480 of the Exodus era. The Hebrew context is of such characteristic precision that no one can seriously pretend this to be an intentional combination of 12 times 40 years. Why this number and not another? It would be no less absurd to claim that the 480 years of the Roman republic (510–30 B.C.) or the equal duration of the Parthian realm (256 B.C.–225 C.E.) had been assumed only in order to have the product of 12 × 40, or 60 × 8. The question to be decided is whether the date then obtained for the Exodus—viz., 1492 B.C.—is the real one; for whether or not the chroniclers of this period were mistaken as to the epoch or the era is quite a different matter for examination. Most of the eras in use assume a conventional starting date which is not accurately that of the event from which the name is derived. The Dionysian era of the birth of Jesus, perhaps the Mohammedan one of the Hegira, or flight of the prophet from Mecca to Medina, the Jewish one of the Creation, besides some 150 other modes of starting a chronological series, are illustrations of this common practise.

The months in the era employed by the Biblical chronographers were counted from Nisan, the first month, to Adar, the twelfth, or We-Adar, the thirteenth. On the other hand, it is found that Biblical texts in giving the years of the kings commence with the dates of their accession to the throne, just as the kings of England and the popes determine their regnal years. Thus in II Chron. xxix. 3 the reference to the first day of the first month in year 1 of Hezekiah is not to the day of his accession, but to the first of Nisan of the first year of his reign: that is, according to the modern computation, March or April, 726 B.C. If the date of 1492 for the Exodus is correct, the starting date for the annals is 767 B.C. By this system it is possible to assign with certainty the destruction of the First Temple to Sunday, Aug. 27 (Julian), 587 B.C. (9413; astronomical day 1,507,261); that is, the 9th of Ab of the year 906 of the era of the Exodus.

The Biblical figures are given in the *n*th year; that is, from the accession to the throne down to the event there had elapsed $n - 1$ year plus a fraction of a year, which fraction is expressed by a Greek letter. For instance, Uzziah reigned fifty-two years; in his fifty-second year Pekah of Israel was king; and Uzziah died in the second year of Pekah. This example, among many similar ones, shows mathematically that the beginning of the royal years can not be the same. The problem may be stated as follows:

Uzziah reigned before Pekah	$51 + \alpha$
Uzziah reigned simultaneously with Pekah	$1 + \beta$
Total length of Uzziah's reign	$52 + (\alpha + \beta)$ years

where the sum of the fractions α and β does not amount to one-half.

All the Biblical calculations start from a different date, the date of accession; and the agreement of all these figures proves that the original date must have been changed to conform with the fixed harmonizing scheme of the annalist, the synchronous tables of the kings' reigns.

Jewish chronology includes: (1) the non-chronological, mythical numbers of Genesis; and (2) the real chronology, from the Exodus to the end of the Jewish dominion (1492 B.C. to 70 of the common era).

The Non-Chronological, Mythical Numbers of Genesis: The figures of Genesis, handed down in their original form by the Hebrew texts followed by the Vulgate, are the results of a fictitious reduction of the enormous numbers put forth by the Chaldeans, the Egyptians, and the Hindus. The Jews and Greeks were not willing to admit that the world had been created long before their appearance in history. The original figures of one of the systems named were reduced to a certain scale. Only one of the Chaldean systems, preserved by the fragments of Berosus, is known. It is probable that his figures are those of the Babylonian school; while those of Sippara and Orchoë had possibly other units of time to express the same original arithmetical numbers.

The Creation: One of the Chaldean schools assumed seven periods, each of 240,000 years; that is, 1,680,000 years. Each period of 10,000 years is measured by an hour of the seven days which comprise Creation in Genesis ($168 = 7 \times 24$).

From the Creation to the Deluge: The Chaldeans admitted the eternity of the world without any beginning; but the existing astronomical bodies had a commencement. For the time from the creation of these to the great cataclysm, or the Deluge, they assumed a sexagesimal unit, the number of the seconds of the day: $60 \times 60 \times 24$, or 86,400 units. The unit of the Babylonian school was 60 months, or 5 years; that is, 432,000 years. The Hindus fix the unit at 5,000 years, or 432,000,000. The Jews reduced this to 86,400 weeks, or 1,656 years; that is, 72 periods of 23 years each. The 23 years give just 8,400 days, or 1,200 weeks; the unit of 72 periods being divided into three unequal parts, containing respectively 20, 18 (which is one-fourth of 72), and 34 periods of 1,200 weeks or 23 years each. The number 23 is found in the number resulting from adding the years elapsing between the births of father and son in the three groups given in Gen. v.; namely:

(1) Adam, Seth, Enos, Cainan, and Jared: $130 + 105 + 90 + 70 + 65 = 460 = 20 \times 23$, or $20 \times 1{,}200 = 24{,}000$ weeks.
(2) Mahalaleel, Enoch, Methuselah: $162 + 65 + 187 = 414 = 23 \times 18$ (the fourth of the period, as in the Chaldean) $= 1{,}200 \times 18 = 21{,}600$ weeks.
(3) Lamech: $182 + 600 = 782 = 23 \times 34 = 40{,}800$ weeks.

The corresponding Babylonian figures relating to the ten antediluvian kings are:

The first three together	93,600 years	= 18,720 lustra
The following two together,	108,000 "	= 21,600 "
The remaining five (?)	230,400 "	= 46,080 "
	432,000 "	= 86,400 "
The Bible has		86,400 weeks
The Chaldean texts have		86,400 lustra

The three periods correspond to legends now altogether lost, as the chronological tables in Genesis show.

The postdiluvian times down to the end of Genesis include:

From the Deluge to the birth of Abraham	292 years
From the birth of Abraham to the end of Genesis	361 "
	653 "

These 292 and 361 years are the reduction to one-sixtieth of the Berosian figures, which give:

For the first two kings	5,100 years
For the 86 following	34,080 "
	39,180 "

These 39,180 years are composed of 12 Sothic periods of 1,460 years, and of twelve lunar periods (Assyrian, "tupḳot nannar") of 1,805 years. After 1,805 years the eclipses recur in the same order; and this cycle was known to the Chaldeans, not by calculation, but by actual observations and registrations of eclipses during centuries and millennia.

The Babylonian figures are controlled by the sexagesimal notation of sosses ("shushi" = σῦσσος) of 60, ners ("neru" = νῆρος) of 600, and sars ("shar" = σάρος) of 3,600 years. There are thus:

12 Sothic periods of 1,460 years = 17,520 years, or 292 sosses
12 lunar " " 1,805 " = 21,660 " " 361 "

The Biblical number of 292 years, quoted by Josephus ("Ant." i. 6, § 5) comprises the nine generations from Arphaxad to Terah, the father of Abraham; namely:

$$2 + 35 + 30 + 34 + 30 + 32 + 29 + 30 + 70 = 292 \text{ years.}$$

In order to obtain the necessary 292, Terah must have reached his seventieth year before begetting Abraham.

From the birth of Abraham to that of Isaac...	100 years
From the birth of Isaac to that of Jacob.......	60 "
From the birth of Jacob to that of Joseph.....	91 "
Lifetime of Joseph, end of Genesis............	110 "
	361 "

In order to secure the total of 361 years which the system required, Joseph must be given neither more nor less than 110 years.

Besides this computation of generations, there existed another, originally quite independent thereof, enumerating only the years of life of each ancestor. These numbers referring to the length of life might have been derived from Babylonian statements; but the almost complete destruction of cuneiform historical documents has removed all tradition of this kind. It must be remarked that the prime number 23 is also found in the sums of this series, a phenomenon which is probably to be explained by assuming that some analogous fact existed in the Chaldean mythology.

The Biblical sums are as follows:

From Adam to Cainan..........	3,657 = 23 × 159 years
From Mahalaleel to Shem.......	5,520 = 23 × 240 "
From Arphaxad to Jacob........	2,898 = 23 × 126 "
	12,075 = 23 × 525 "

It is, of course, very strange that these 12,075 years should be equal to 525 ×1,200 weeks, or 630,000 weeks; that is, the result of 70, 90, and 100. It would correspond to a Babylonian epoch of 3,150,000 years.

These two different traditions have been combined by the redactors of the Biblical text, in order to explain the now lost legends of the antediluvian and postdiluvian times of the Jewish people. An exact scrutiny of the figures as they are found in the present form of the text provides the basis for very singular and awkward results, of which Biblical tradition compels acceptance, and which have during many centuries caused numerous falsifications and discussions.

CHRONOLOGY OF GENESIS.

ANTEDILUVIAN PERIOD, 86,400 WEEKS.

First part, 24,000 weeks.

Year of Creation.		Year of Creation.	
1	Adam born	325	Cainan born
130	Seth "	395	Mahalaleel born
235	Enos "	460	Jared born

Second part, 21,600 weeks, one-quarter of the whole.

Year of Creation.		Year of Creation.	
460	Jared born	687	Methuselah born
622	Enoch "	874	Lamech "

Third part, 40,800 weeks. All die except Noah and Shem.

Year of Creation.		Year of Creation.	
874	Lamech born	1290	Mahalaleel dies
930	Adam dies	1422	Jared dies
987	Enoch translated	1556	Shem born
1042	Seth dies	1654	Lamech dies
1056	Noah born	1656	Methuselah dies
1140	Enos dies		The Deluge
1235	Cainan "		

POSTDILUVIAN PERIOD, 653 SOSSES, REDUCED TO 653 YEARS.

First part, from the Deluge to the birth of Abraham.
No one dies.

Year of the Deluge.		Year of the Deluge.	
2	Arphaxad born	163	Serug born
37	Salah "	192	Nahor "
67	Eber "	222	Terah "
101	Peleg "	292	Abraham born
131	Reu "		

Second part, from the birth of Abraham to the end of Genesis, 361 sosses, reduced to 361 years. All die.

Year of the Deluge.		Year of the Deluge.	
292	Abraham born	452	Jacob born
340	Peleg dies	457	Abraham dies
341	Nahor "	470	Salah "
350	Noah " (!)	502	Shem dies (!)
367	The calling of Abraham	531	Eber "
		543	Joseph born
370	Reu dies	572	Isaac dies
392	Isaac born	582	Arrival of Jacob in Egypt
393	Serug dies		
427	Terah "	599	Jacob dies
440	Arphaxad dies	653	Joseph "

These figures had been known for centuries. Shem survived Abraham; therefore legends pretend that Melchizedek was really Shem and had handed down the antediluvian traditions. The antediluvian times produced a great many traditions that have been altogether lost. In the first fortunate period nobody died; in the second, death may have been threatened; in the third, all men perished, and the aged Methuselah died in the actual year of the Deluge.

The combination of the two systems has produced considerable bewilderment among subsequent translators and exegetes. The LXX., to avoid awkward chronological results, hit upon the expedient of falsifying the real figures, by adding to each of the post-Semitic personages 100 years. Instead of 2 they have 102; for 35 they substituted 135; and so on.

When this chronology of cycles was invented, it is idle to discuss. It is highly possible that it arose during the time of the First Temple; and there is no reason for bringing its origin down to the post-exilian epoch. Israel and Judah had at this period a systematized chronology; and there had existed, beginning with the seventeenth century B.C., a close connection between Palestine and Chaldea.

Real Chronology: 1. *From the Exodus to the Destruction of the First Temple (1492 to 587 B.C.).*

The first part, the four centuries between the Exodus and David (1492–1047), can not be fixed with certainty. The duration of the several judges' reigns is involved in doubt, and arguments can not be advanced with the slightest hope of success; for the needed documents are wanting. With David commences a sound and really historical chronology. The two hundred chronological dates handed down by the books of Samuel, Kings, and Chronicles are, with one or two exceptions (*e.g.*, the twelfth year of Ahaz, instead of the thirteenth year; see II Kings xvii. 1), of remarkable consistency. In a few cases, again, the figures are rightly given, but are by the present text attributed to some other event, owing to the transposition of the fragments of records saved from destruction at the fall of the First Temple. For example: the fourteenth year of Hezekiah is not the year of the expedition of Sennacherib, but that of the sickness of Hezekiah and of the embassy of Merodach-baladan, King of Babylon. The twenty-seventh year of Jeroboam II., King of Israel (II Kings xv. 1), is mentioned as the first year of Uzziah, in flagrant contradiction to all the statements of the previous chapter, which makes it correspond with the fifteenth or sixteenth year.

Intentional mutilation of the text and suppression of all notice of the temporary suspension of the independence of the kingdom of Israel by the Syrians are the real cause of the larger number (15 or 16) given in ch. xiv.: the end of that chapter, and Isa. vii. 3, which can not be understood otherwise, indicate clearly that for eleven years Jeroboam II. had been expelled from Samaria by the Syrians. The subsequent passages have been ruthlessly altered, in order to obviate the slightest mention of this cessation of Israel's realm. A similar mutilation has been practised at the end of ch. xv., where the interruption of Pekah's reign for nine years, and his supersession by Menahem II. mentioned in the Tiglath-pileser texts, are passed over in perfect silence.

The statements are always to be analyzed in the only possible mathematical manner; *i.e.*, by the formula that the *n*th year signifies n−1 years and a fraction of a year after the event.

For the absolute fixation we have the solar eclipse of the eponym "Isid-seti-igbi," June 13, 809 B.C., 91 years before which occurred the battle of Karkor, during Ahab's lifetime, and 78 years before which Jehu sent his tribute to Shalmaneser III. of Nineveh.

The eponymic tablets and the Babylonian chronicle fix the date of the downfall of Samaria as Jan., 721 B.C.

The two eclipses of the year 7 of Cambyses (523–522 B.C.) fix the date of Nebuchadnezzar's accession as May–June, 605 B.C., and the date of the delivery of Jehoiachin by Evil-merodach, son of Nebuchadnezzar, as the 27th (II Kings xxv. 27) or 25th (Jer. lii. 31) of Adar, either Sunday, Feb. 29, or Tuesday, March 2, 561 B.C.

These starting-points admit of the establishment of the chronology with certainty in the following manner—the only one possible—without alterations of the text in the historical documents:

KINGS OF JUDAH.

David	1047–1017
Solomon	1017–978
Rehoboam	978–960
Abijam (Abijah)	960–958
Asa	958–917
Jehoshaphat, alone	917–895
Jehoshaphat and Joram	895–892
Joram alone	892–888
Ahaziah	888–887
Athaliah (Queen)	887–881
Joash	881–840
Amaziah	840–811
Uzziah or Azariah	811–758
Jotham	758–742
Ahaz	742–727
Hezekiah	727–698
Manasseh	698–642
Amon	642–640
Josiah	640–609
Joahaz	–609
Jehoiakim	609–598
Jehoiachin	–598
Zedekiah	598–587

Destruction of the Temple, Sunday, Aug. 27, 587 B.C.

KINGS OF ISRAEL.

Jeroboam I.	977–956
Nadab	956–955
Baasha	955–932
Elah	932–931
Zimri (seven days)	–931
Omri with Tibni	931–927
Omri, alone	927–920
Ahab	920–900
Ahaziah	900–899
Joram	899–887
Jehu	887–859
Jehoahaz	859–842
Joash	842–825
Jeroboam II., first reign	825–799
Domination of Syria	799–788
Jeroboam II., second reign	788–773
Zachariah (six months)	773–772
Shallum (one month)	–772
Menahem I.	772–761
Pekahiah	761–759
Pekah, first reign	759–744
Menahem II., under the Assyrian Tiglath-pileser	744–735
Pekah, second reign	735–730
Hoshea	730–721

Destruction of Samaria, Jan., 721 B.C.

The great chronologists of the seventeenth century have long pointed out the apparent discrepancy between the statements of the duration of the reigns of Jeroboam II. and Pekah and the time resulting from the synchronisms. But there is no error. Indeed, between the commencement and the end of the reign of Jeroboam II. fifty-two years elapsed; but during eleven of these he was superseded, and his de facto occupation of the throne counts only forty-one years, as the Biblical text affirms. Similarly Pekah reigned only twenty years in Samaria, although twenty-nine intervened between his accession and his death.

2. *From the Destruction of the First Temple to that of the Second under Titus (587 B.C. to 70 of the Common Era).*

The important events and dates are as follows:

B.C.	
587–168	Loss of Jewish independence.
538	Decree of Cyrus, King of Babylon, signed Oct., 539, allowing the Jews to return to Palestine.
473	Institution of the Feast of Purim under Xerxes (Ahasuerus); troubles in Palestine caused by the enemies of the Jews.
398	Ezra, under Artaxerxes Mnemon.
385	Nehemiah's second organization. Government of the high priest.
332	Alexander subdues Palestine.
312	Establishment of the Syrian power.
170	Antiochus IV. (Epiphanes) plunders Jerusalem. The Jews lose their independence, 168 B.C. to 6 C.E.
168	Mattathias the Hasmonean or Maccabean.
58	Herod supersedes the Hasmoneans.
4	Early in April, death of Herod, and division of Palestine into four independent provinces.
C.E.	
6	Judea a province of Rome.
69	Revolt of the Jews.
70	Sunday, Aug. 5, destruction of the Second Temple.

E. G. H. J. O.

(II.) Biblical: In this article there will be briefly given (1) the methods used for dating events and periods in the Old Testament; (2) the scientific data upon which the most reliable chronological system has been founded; and (3) the most valuable results in the fixing of important dates.

1. Methods of Dating: Two main stages may be distinguished in the attempts made by Bible writers of the various periods to indicate the times of occurrence of events. The first is that in which the narrator chooses any one out of a number of well-known events as a time-mark; and the second is that in which an authoritative system is assumed as already prevailing.

Unsystematic Usages: Reference is made to: (*a*) a memorable phenomenon of nature; thus Amos (i. 1) dates from an earthquake (compare Zech. xiv. 5); (*b*) a great national movement; thus, the establishment of the Hyksos dynasty in Egypt is marked by the building of the city of Zoan (Num. xiii. 22); (*c*) a decisive military movement, as the expedition of Sargon of Assyria against Ashdod (Isa. xx. 1); (*d*) the death of a king of the writer's country, as of Uzziah or of Ahab (Isa. vi. 1, xiv. 28).

Jeremiah and Ezekiel.

A Conventional System: Such devices as the above-named could have only local vogue and value. Familiarity with the businesslike methods of outside communities, especially in the days of the later kings and during the Exile, led to the adoption of a methodical scheme for the dating of events. The decisive epoch was the period between Isaiah and Jeremiah, when the Judahites were completely under Assyrian domination. Dates are attached to several individual prophecies of Jeremiah; and the statements are, for the most part, of contemporary origin (Jer. xxvii. *et seq.*). The point of departure in the reckoning is the beginning of the reign of the then King of Judah, sometimes with the addition of the regnal year of the great King of Babylon, Nebuchadnezzar (*e.g.*, xxxii. 1). A little later Ezekiel's prophecies were regularly dated, as was natural to a writer living in Babylonia. In accordance with the same custom several of the prophetical books were furnished with headings indicating the limits of the professional careers of the authors. But these were added by later editors.

Jeroboam and Asa.

The Dates Assigned to Ahaz.

More systematic and extensive are the chronological data of the books of Kings and Chronicles, where, throughout the history of the divided kingdoms, are found not only the lengths of the reigns of the several rulers, but the dates of their accessions, in two separate series of synchronisms. Thus it is said: "In the twentieth year of Jeroboam king of Israel began Asa to reign over Judah. . . . Forty and one years reigned he in Jerusalem" (I Kings xv. 9, 10). Many of the numbers given, especially the synchronisms, are erroneous, as is proved by the fact that no attempt to harmonize the two series has been successful [see, however, CHRONOLOGY (I.)]. The sum of the years of the kings of Israel from the schism to the Exile is 242; while that of the years of the kings of Judah for the same period is 260. Startling inconsistencies are also found where the several synchronisms for the same king are worked out. Thus, for the accession of Ahaz of Judah one has to choose between 727, 720, and 715 B.C., according as one set of data or another is followed. Inferential evidence points conclusively to the fact that all of these numbers were inserted, as a separate part of the narrative, in the editorial period that followed the loss of Jerusalem. It is equally certain that the synchronisms were a matter of independent calculation. But there is good reason to believe that if the regnal years were not found in surviving royal annals, they were at least preserved by a fairly reliable tradition supported in part by documentary testimony. By the help of Assyrian data they may be used with a fair degree of accuracy.

From the Exodus to Solomon.

One step backward beyond the division of the kingdom, Solomon, David, and Saul are each credited with a reign of forty years. This suggests a conjectural systematization. The hypothesis is strengthened by the frequent occurrence of the number forty in numerations made for still earlier personages and events. Indeed, the summation of the years between the Exodus and the beginning of Solomon's Temple, found in I Kings vi. 1, has been plausibly conjectured to be made up of twelve generations, each of forty years. The number 480 thus given is, however, too large by one-half; since the Exodus can not have occurred much before 1200 B.C., and the Temple was built about 960 B.C.

The Earliest Period.

For the chronology of the long period before Moses there are no sure data, since the numbers of the Masoretic text differ widely from those variously given by the Septuagint, the Samaritan Pentateuch, and the Book of Jubilees (first century C.E.). In the Masoretic data there are, moreover, several artificial schemes of systematization. For the details of these any good modern commentary on Genesis or special treatise on Bible chronology may be consulted.

2. Scientific Data: All chronological accuracy depends upon the fulfilment of two conditions. To ascertain or verify the date of any event there must be a fixed point of departure, from which or to which the event in question is to be reckoned. Again, the data from which the time of the event is inferred must be adjusted to a connected system of time-reckoning reliable throughout. In other words, some ancient authority, referring to an established scheme or system, must have made a notation of the event itself or of something synchronous with it.

Babylonian Methods of Numeration.

The Babylonians, and their kindred and disciples, the Assyrians, were the only people of Oriental antiquity who duly kept such a required system of time-notation. It is to them that the current divisions of time generally, as well as the beginnings of mathematics and astronomy, are due. They had already in their earliest recorded history the sense of number and computation. The Hebrew writers were still working with round numbers and employing primitive and uncertain eras thousands of years after the Babylonians had begun to keep their sacred and public records by separate and successive years and to preserve the results for later reference or tabulation.

Helpful Cuneiform Records.

Naturally, most is gained for Biblical chronology from the synchronisms with contemporary Assyrian or Babylonian history. Of special importance are those available for the period of the kings of Israel and Judah, when the relations with Assyria were close and continuous, and at the same time the Biblical data are most abundant. There are three main sources of information in the inscriptions. One is the royal annals, in which events are often described as occurring in a given year of the king's reign, or in the year of office of a given eponym. The second is the lists of such eponyms as were chosen successively from among Assyrian rulers of different grades to mark their respective years, which were accordingly called by their names. These lists are preserved in more than one form; and by combining them it is possible to make up a complete series for the period 893–666 B.C., as well as for shorter intervals both before and after. Their accuracy has been confirmed by every possible check. Not only historical events, but business documents also, were dated by the years of the proper eponyms. The third aid of this kind consists of lists of kings in the order of their succession, with the lengths of their several reigns, as well as brief summaries of important events, usually referred to by modern scholars as "chronicles."

Application of Assyrian Data.

An instance of the application of Assyrian data to Old Testament chronological problems may be given here. Shalmaneser II., who reigned 860–825 B.C., describes frequent expeditions to Syria and Palestine, and mentions by name Ahab and Jehu of Israel. He relates that in the year of his reign which is found to correspond to 842 B.C., he received tribute from Jehu. Presumably this was at the accession of Jehu, who would be anxious to secure support for his new pretensions; but this is only a conjecture. He mentions, also, that in 854 he fought a great battle against a league of western rulers, among whom were Ahab of Israel and Ben-hadad of Damascus. The history of Ahab, as given in the Bible, indicates that there was only one occasion on which Ahab and Ben-hadad could have made such a league with each other; namely, in the brief period between the peace of Aphek (I Kings xx. 34) and the death of Ahab in the third year thereafter (*ib.* xxii. 2 *et seq.*). The middle year of this interval suggests itself as the date of the league, 854 B.C. Ahab, therefore, must have died in 853 B.C. According to the narrative in Kings, Jehu came to the throne in the twelfth year thereafter; that is to say, in 842. Using with necessary caution the Biblical numbers, one may now reckon backward and forward from these dates and obtain a fairly correct chronology of the whole period from the schism to the close of the Exile.

3. Results: The following are some of the most important dates which have been ascertained from combinations and inferences made upon the principles set forth above. Others had already been learned by the aid of Greek writers, especially Ptolemy.

B.C.	
934	Division of the kingdom.
886	Omri made King of Israel. Samaria founded.
855	Peace with Damascus.
853	Death of Ahab.
842	Jehu made king and pays tribute to Assyria.
797	Damascus taken by the Assyrians.
763	Amos prophesies.
738	Isaiah prophesies. Death of King Uzziah. Northern Israel tributary to Tiglath-pileser III.
734	Judah under Ahaz pays homage to Assyria.
733	Damascus and Samaria taken by Tiglath-pileser. Part of Israel deported.
722–21	Fall of Samaria. Deportation of people by Sargon of Assyria, who acceded in Jan., 721.
567	Nebuchadnezzar invades Egypt.
539	In July, Babylon taken by Gobryas the Mede, general of Cyrus. In October, Cyrus himself enters the city.

E. G. H. J. F. McC.

——**Post-Biblical:** The chronological system of the Jews was derived, like most of their science, from the Greeks. They used the "minyan sheṭarot" (era of contracts, really the Seleucidan era, dating from 312 B.C.) till the Middle Ages, when the method of reckoning from the creation of the world was introduced—probably by the later geonim, as it was employed by R. Sherira (987 C.E.). This era begins with the year corresponding to 3760 B.C. Maimonides on occasions used no less than three eras, as in the Mishneh Torah (Shemiṭṭah, x. 4): "In the year 1107 of the destruction of the Temple, 1487 of the Seleucidan era, 4936 of the Creation." For a short time the era of the Hasmoneans, dating from the autumn of 143 B.C. (see I Macc. xiii. 41–42), was in use. See Era.

The dates recorded according to these various eras are based in Jewish chronology on certain estimated intervals between important events in post-Biblical Jewish history. These intervals are given in 'Ab. Zarah 9a, 10a (probably derived from Seder 'Olam Rabbah, xxix.), which counts 34 years from the Second Temple to Alexander; 180 for the Greek empire; 103 from the beginning of the Hasmonean dynasty under John Hyrcanus (135 B.C.) to Herod; 103 from Herod to the destruction of the Temple; making in all 420 years. According to this reckoning, the era of contracts is placed six years after that of Alexander, the interval between whose appearance in Palestine and the destruction of the Second Temple is much less than in reality. The date of the accession of Herod is placed two years too late; and that of the destruction of the Temple is fixed at 68, which is, of course, two years too early. Loeb ("Revue Etudes Juives," xix. 202–205) has ingeniously explained these discrepancies as due to a desire on the part of R. Jose, the author of the Seder 'Olam Rabbah, to make them agree with the prediction of Dan. ix. 24 *et seq.*, that seventy weeks (of years), or 490 years, would elapse between the Return from the Exile and the destruction of the Second Temple. As the Exile was assumed to last seventy years, in accordance with Jeremiah, this left 420 years from the Return (537 B.C.) to the destruction of the Temple (70 C.E.), a discrepancy of 187 years. This is got rid of in part by making the Persian domination last 34 instead of 204 years (537–333 B.C.). This was done in order to make the interval between the Exodus and the era of contracts exactly 1,000 years.

Dates of Jewish Annalists.

Owing to these discrepancies, great confusion exists in the annals of the Jewish chroniclers, who have generally tried to combine the dates recorded by their predecessors with those of more recent events, using the era of creation almost exclusively (see I. Loeb, "Josef Haccohen et les Chroniqueurs Juifs," Paris, 1888, reprinted from "Revue Etudes Juives," xv., xvi.); and it is dangerous to trust to their lists unless checked by contemporary annals. In the subjoined chronological table the dates of the most prominent events of Jewish history have been derived from Henrietta Szold's "Tables of Jewish History" in the index volume (pp. 104 *et seq.*) of the American edition of Graetz's "History of the Jews." For events of lesser importance the sources are in almost every case the local annalists as utilized by the historians of the Jews in the respective countries. Particular attention has been given to the successive stages of legislation, while only selections have been made from the many cases of autos da fé, blood accusations, expulsions, host-tragedies, and acts of emancipation, for all of which complete lists are given in separate articles under the respective headings.

In contradistinction to the usual custom, but few literary events have been included in the table, only those works which have affected the public opinion of the non-Jewish world having been regarded as of more direct historic importance. The ruling principle has been to confine the list to strictly historic events; *i.e.*, to incidents affecting either directly or indirectly the relations of the Jews to the states in whose territories they have dwelt. Incidents affecting merely the internal concerns of the Jewish communities have not, as a rule, been included.

A Jewish Chronology from the Destruction of Jerusalem to the Year 1902.

C.E.

70. Jerusalem besieged and conquered by Titus; the Temple destroyed.
72. Judea completely conquered; the "Fiscus Judaicus" instituted by Vespasian.
115. The Jews of Babylonia, Palestine, Egypt, Cyprus, Cyrene, and Libya rise against Trajan.
118. The Jews of Palestine rise against Trajan and Hadrian; "War of Lucius Quietus."
133. Rebellion of Bar Kokba against Hadrian; restoration of the Jewish state.
135. Fall of Bethar; end of Bar Kokba's rebellion.
161. Revolution in Palestine against Antoninus Pius.
280. Judah III., son of Judah II., patriarch, collects a tax from foreign communities.
306. Council of Elvira forbids Christians to eat with Jews or to intermarry with them.
325. First Nicene Council separates the celebration of Easter from that of the Jewish Passover.
339. Constantius forbids, under penalty of death, marriage of a Jew with a Christian woman, and circumcision of slaves.
361. Restoration of the Temple at Jerusalem undertaken under Julian the Apostate.
362. Julian the Apostate abolishes the Jew tax.
400. Moses, the false Messiah of Crete.
415. Cyril, Bishop of Alexandria, drives the Jews from Alexandria.
418. (March 10) Jews excluded from all public offices and dignities in the Roman empire.
425. Extinction of the patriarchate.
455. Persecution of the Babylonian Jews under Yezdegerd III.
465. The Council of Vannes (Gaul) prohibits the clergy from taking part in Jewish banquets.
471. Persecution of the Babylonian Jews under Firuz (Perozes); the exilarch Huna Mari and others suffer martyrdom.
500 (*circa*). Abu-Kariba, Himyarite king, adopts Judaism, and converts his army and his people.
511. Mar-Zutra II., prince of the Captivity (exilarch), establishes an independent Jewish state in Babylonia under the Persian king Kobad.
516. (May 14, 15) Uprising against Jews of Clermont; synagogue destroyed.
517. The Council of Epaon forbids Christians to take part in Jewish banquets.
518. Persecution of the Jews by Kobad, King of Persia.
532. Justinian I. decrees that the testimony of Jews shall be valid only in Jewish cases.
537. Justinian declares Jews incapable of holding any official dignity.
538. The Council of Orleans forbids Jews to appear on the street at Eastertide.
589. Reccared, Visigothic King of Spain, completely isolates Jews from Christians.
612. Sisebut, Visigothic king, forces the Jews to accept baptism or to emigrate.
624. The Banu Ḳainuḳa'a, a Jewish-Arabic tribe, driven from Arabia by Mohammed.
627. Emperor Heraclius forbids Jews to enter Jerusalem, and in other ways harasses the Palestinian Jews.
629. Dagobert orders the Jews of the Frankish empire to accept baptism or to emigrate.
633. The Council of Toledo under Sisenand, Visigothic king, and Isidore of Seville, forces converts to Judaism back to Christianity.
638. Chintila enacts that only professing Catholics shall remain in Visigothic Spain; Jews emigrate.
640. Omar, the second calif, banishes all Jews from Arabia; the "Pact of Omar" imposes restrictions upon Jews in the whole Mohammedan world.
641. Bulan, khan of the Chazars, becomes a Jew.
658. Beginning of the Gaonate; Mar-Isaac, head of the Sura Academy, takes the title "Gaon."
694. (Nov.) All Jews in Spain and Gallic Provence declared slaves; children under seven forcibly baptized.
720. Omar II., Ommiad Calif of Damascus, reenacts the "Pact of Omar."
721. Appearance of the false Messiah Serenus in Syria causes many Spanish Jews to emigrate to Palestine.
761. The Karaite schism led by Anan ben David.
797. Isaac sent by Charlemagne on an embassy to Harun al-Rashid.
814. "Capitula de Judeis" of Charlemagne and Ludwig decide that Jews should not have Church utensils in pledge.
827 (*circa*). Eberard, "Magister Judæorum" under Louis I. the Pious, king of the Franks, protects the Jews against Agobard, Bishop of Lyons.
845. The Council of Meaux, under Amolo, Bishop of Lyons, enacts anti-Jewish decrees, renewing those of Constantine and Theodosius II.
850. Al-Mutawakkil orders the "Peoples of the Book" to wear yellow kerchiefs.
878. Ibrahim ibn Aḥmad orders Jews of Sicily to wear a badge.
982. (July 13) Kalonymus saves life of Otto II. after battle of Cotrone.
1007. Persecution at Rouen by Robert the Devil.
1012. (Nov.) Jews driven from Mayence by Emperor Henry II.
1013. (Apr. 19) Massacre at Cordova by soldiers of Sulaiman ibn al-Ḥakim.
1021. Al-Ḥakim renews the "Pact of Omar" in Egypt.
1066. Banishment of the Jews from Granada.
1078. Pope Gregory VII. (Hildebrand) promulgates canonical law against Jews holding office in Christendom.
1079. Jews repulsed from Ireland.
1085. Pope Gregory VII. protests against Jews being placed by the King of Castile in authority over Christians.
1090. "Fuero" (decree) of Alfonso VI. appoints duel as means

of settling litigation between Christian and Jew. (Feb. 19) Henry IV. grants to Judah ben Kalonymus and other Jews of Speyer protection to life and property.

1096. First Crusade; Jews massacred along the Rhine and elsewhere.

1099. The Jews of Jerusalem burned in a synagogue by the Crusaders under Godfrey of Bouillon.

1103. (Jan. 6) The "Constitutio Pacis" of the imperial court at Mayence assures the Jews of the "emperor's peace."

1108. Massacre at Toledo.

1117. Persecution at Rome; appearance of a false Messiah at Cordova.

1120. Calixtus II. issues bull "Sicut Judæis," the charter of the Roman Jews.

1124. Ladislaus I. of Bohemia decrees that no Christian shall serve Jews.

1144. Alleged martyrdom of St. William of Norwich (first case of blood accusation).

1146. Second Crusade: Jews massacred throughout France and Germany. Beginning of the Almohad persecution in northern Africa and southern Spain; Jews flee, or pretend to accept Islam.

1150. Statutes of Arles appoint a special Jewish oath.

1156. Jews of Persia persecuted on account of pseudo-Messiah, David Alroy.

1168. Latins and Greeks, Jews and Saracens, granted right of being judged by their own laws in Sicily.

1171. Thirty-one Jews and Jewesses of Blois burned on the charge of having used human blood in the Passover.

1172. Persecution of the Jews of Yemen. Messianic excitement.

1174. Sultan Nureddin Maḥmud removes all Jews of Syria and Egypt from public offices.

1178. Riot at Toledo, at which Fermosa, the Jewish mistress of Alfonso VIII., is killed.

1179. The third Lateran Council passes decrees protecting the religious liberty of the Jews. (Aug.) Jews of Boppard and neighborhood slain because body of Christian woman is found on banks of Rhine. Jews expelled from Bohemia.

1182. (April) Philip Augustus of France banishes the Jews from his hereditary provinces and takes one-third of their debts.

1189. Attack on the Jews of London at coronation of Richard I.

1190. (May 17) Self-immolation of 150 Jews at York to avoid baptism.

1194. "Ordinances of the Jewry" passed in England for registering Jewish debts, thus preparing the way for the exchequer of Jews.

1198. Jews permitted to return to France by Philip Augustus on payment of 15,000 livres in silver.

1200. Bishop Conrad of Mayence issues a formula for an oath in German for Jews of Erfurt.

1205. (July 15) Innocent III. writes to Archbishop of Sens and Bishop of Paris laying down the principle that Jews are bound to perpetual subjection because of the Crucifixion.

1209. Council of Avignon issues restrictive measures against the Jews. (July 22) French Jews attacked and plundered; 200 murdered.

1210. (Nov. 1) The Jews of England imprisoned by King John.

1211. Many French and English rabbis emigrate to Palestine.

1212. The Jews of Toledo killed by Crusaders under the Cistercian monk Arnold; first persecution of Jews in Castile.

1215. Magna Charta of England limits rights of the crown in Jewish debts to the principal. Fourth Lateran Council under Pope Innocent III., among many anti-Jewish measures, decrees the Jew badge.

1221. Jews killed at Erfurt.

1222. Golden Bull of Hungary refuses Jews the right to hold public office. Council of Oxford imposes restrictions on the English Jews.

1223. (Nov. 8) Rabbinical Synod of Mayence regulates the payment of the Jewish taxes.

1227. Council of Narbonne reenacts the anti-Jewish decrees of the fourth Lateran Council.

1230. (Dec.) "Statutum de Judeis" in France by Louis IX. prohibits Jews from making contracts or leaving their lords' lands.

1234. (Dec. 10) Jews of Fulda find a murdered Christian; 261 Jews killed in consequence.

1236. Frederick II. takes Jews of Sicily under his protection as being his "*servi camerae*" (first use of this term).

1240. (June 25) Disputation before Louis IX. of France between Nicholas Donin and the Jews represented by Jehiel of Paris, Moses of Coucy, Talmudist and itinerant preacher, and two others.

1241. (May 24) Riot at Frankfort on account of a Jewish convert. Jewish Parliament summoned to Worcester, England.

1244. Archduke Frederick II. the Valiant, of Austria, grants privileges to the Jews ("Privilegium Fredericianum"). Twenty-four wagon-loads of Talmuds and other manuscripts (1200) burned at Paris.

1246. James I. of Aragon, in the Ordenamiento of Huesca, declares Jews to be "in commanda regis." Council of Béziers forbids Jews to practise medicine.

1254. (Dec.) Louis IX. expels Jews from France.

1255. (July 31) St. Hugh of Lincoln disappears, and the Jews are accused of murdering him for ritual purposes.

1259. Jahudan de Cavalleria becomes "bayle-general" and treasurer of Aragon. Provincial council of Fritzlar for province of Mayence repeats several of the canonical restrictions, including the badge (first time in Germany).

1261. Expulsion from Brabant, under will of Henry III., of all Jews except those living by trade.

1263. Disputation at Barcelona between Pablo Christiani and Naḥmanides.

1264. Massacres at London, Canterbury, Winchester, and Cambridge by the barons in revolt against Henry III.

1265. (May 2) Persecution at Sunzig; 72 persons burned in synagogue.

1267. (May 12) Synod of Vienna, under Cardinal Guida, orders Jews to wear pointed hats.

1270. (June 23) Persecution at Weissenburg.

1273. (Nov. 4) Jews of Lerida obtain permission to substitute oath by the Ten Commandments for the oath "more Judaico."

1274. (July 7) Gregory X. issues bull against blood accusation.

1275. Jews expelled from Marlborough, Gloucester, Worcester, and Cambridge, at request of the queen-mother.

1280. Alfonso X. orders all Jews of Leon and Castile to be imprisoned till they pay 12.000 maravedis, and 12,000 for every day of delay in payment. English Jews forced to attend sermons of Dominicans.

1285. Blood accusation at Munich.

1286. (June 28) Meïr ben Baruch of Rothenburg (1220–93), chief rabbi of Germany, imprisoned when about to emigrate. Sancho of Castile in Cortes of Palencia orders Jews to submit their cases to the ordinary alcaldes (abolition of legislative autonomy). (Nov. 30) Bull of Honorius IV. to archbishops of York and Canterbury against Talmud.

1287. (May 2) All Jews in England thrown into prison.

1290. (Nov. 1) Jews banished from England.

1292. Ritual murder accusation and riot at Colmar.

1294. (Aug. 7) Bolko I. of Silesia grants Jews "Privilegium Fredericianum."

1295. (June 23) Boniface VIII. enters Rome and spurns the Torah presented to him by Jewish deputation.

1297. "Judenordnung" for Brandenburg.

1298. Persecution of the Jews in Germany instigated by Rindfleisch; Mordecai ben Hillel a martyr.

1301. Jews plundered and slain at Magdeburg.

1303. Ordinance of Philip the Fair enacts that all trials between Christians and Jews be decided by regular courts.

1306. First expulsion of the Jews from France under Philip the Fair.

1315. (July 28) Jews recalled to France by Louis X. for twelve years.

1320. The Pastoureaux persecutions in France ("gezeret ha-Ro'im").

1321. The Leper persecution in France ("gezeret meẓora'im"). (June 24) Second expulsion of the Jews from France. Five thousand slain in Dauphiné on charge of well-poisoning.

1322. (Pentecost) Talmuds burned in Rome.

1330. Alleged desecration of host at Güstrow.

1334. (Oct. 9) Casimir III. the Great, of Poland, grants Jews "Privilegium Fredericianum."

1334. Host-tragedy at Constance.

1337. (May) Armleder massacres at Ensisheim, Mühlhausen, Rufach, etc.

1346. Blood accusation at Munich.

1348. (Feb. 28) The Ordenamiento of Alcaza orders all usury to cease. (July 16) Karl IV. forbids Jews being summoned before the Vehmgericht.

1348–49. Persecution of the Jews in central Europe on account of the Black Death. Pope Clement VI. issues two bulls protecting them.

1350. Alfonso IV. of Portugal enforces the badge (first in the Peninsula).

1351. Cortes of Valladolid demands the abolition of the judicial autonomy of Spanish-Jewish communities. Jews burned at Königsberg in Neumark.

1353. Jews invited back to Worms on account of their usefulness.

1360. (Nov.) Samuel Abulafia dies under torture on the charge of peculation. Manessier de Vesoul obtains from King John a decree permitting Jews to dwell in France.

1365. Jews expelled by Louis the Great from Hungary: many go to Wallachia.

1370. All Jews imprisoned and robbed in Austria.

1380. (Nov. 16) Riot at Paris; many Jews plundered, several killed, most fled.

1381. A synod at Mayence regulates the rabbinical marriage laws.

1387. Jews expelled from Basel.

1389. (Apr. 18) The charge of insult to a priest carrying the sacrament leads to the massacre of the Jews in Prague.

1391. (June 6) Spanish horrors begin; Ferdinand Martinez incites the mob against the Jews of Seville; anti-Jewish riots spread throughout Castile and Aragon.

1394. (Nov. 3) Third and last expulsion of the Jews from France, under Charles VI.

1400. Persecution of the Jews of Prague at the instigation of the convert Pessach; Lipmann of Mühlhausen among the sufferers.

1403. (Oct. 25) Juan II. of Castile withdraws civil jurisdiction from Jews.

1405. Jews expelled from Speyer.

1407. (Oct. 26) Jews attacked at Cracow.

1410. (Sept.) Meïr Alguades slain on charge of host-desecration.

1411. Vincent Ferrer raises the populace against the Jews. Second general massacre of Jews in all the Spanish provinces.

1413. (Jan. 7) Religious disputation at Tortosa arranged by Pope Benedict XIII. between Geronimo de Santa Fé and Vidal ben Benveniste ibn Labi and Joseph Albo.

1415. (May 11) Bull of Benedict XIII. against the Talmud and any Jewish book attacking Christianity.

1420. Charges of host-desecration lead to the putting to death of a number of Jews and to the expulsion of the remainder from Lower and Upper Austria.

1423. Jews expelled from Cologne.

1424. Jews expelled from Zurich.

1432. Rabbinical synod at Valladolid. Host-tragedy at Segovia. A synod at Avila, under Abraham Benveniste Senior, provides for an educational system for Jewish Spain.

1434. The Council of Basel renews old and devises new canonical restrictions against Jews. Annihilation of the Jews of Majorca.

1435. Jews expelled from Speyer.

1438. Jews expelled from Mayence.

1440. Jews expelled from Augsburg.

1447. Casimir IV. of Poland grants special privileges to Jews.

1450. Ludwig X. of Bavaria throws all the Jews in forty towns into prison and confiscates their property.

1451. Nicholas de Cusa enforces the wearing of the Jew badge in Germany.

1454. (May 2) Forty-one Jews burned at Breslau, and Jews expelled from Brünn and Olmütz, through Capistrano.

1458. Jews expelled from Erfurt.

1460. (March 5) The states of Austria demand that no Jew be permitted to dwell there. Jews expelled from Savoy.

1464. (Apr. 12) Jews plundered and murdered by soldiers in Cracow.

1467. Eighteen Jews burned at Nuremberg.

1468. Jews expelled from Neisse by the gilds. Blood accusation brought against Jews of Sepulveda.

1469. Jews plundered and slain at Posen.

1470. Jews expelled from bishopric of Mayence.

1475. Bernardinus of Feltre preaches against the Jews in Italy. The Jews charged with the murder of Simon of Trent for ritual purposes. Riots in Padua and elsewhere in Italy and Sicily.

1476. Blood accusation in Regensburg through the convert Wolfram.

1477. Jews plundered at Colmar and burned at Passau; the rest expelled through bishop.

1478. Jews expelled from diocese of Bamberg on account of Simon of Trent affair.

1481. The Inquisition against the Maranos established in Seville and at other places in Castile.

1482. Inquisition established in Aragon; Thomas de Torquemada, chief inquisitor.

1484. Jews expelled from Arles.

1486. (Feb. 12) Auto da fé at Toledo at which 740 were absolved. (Dec. 10) Another auto at same place; 900 Jews "reconciled."

1488. (Jan. 25) First auto at Barcelona. (May 24 and July 30) Autos da fé at Toledo: at former, 21 Jews burned, 400 punished; at latter, 76 burned.

1490. (Dec.) Jews expelled from Geneva.

1492. (Aug. 2) Expulsion of the Jews from Spain.

1494. Jews plundered in Naples. Blood accusation at Tyrnau.

1495. Jews expelled from Florence, but readmitted after a few months on account of their utility; Jews expelled from Lithuania.

1496. Expulsion of Jews from Styria. Manoel of Portugal orders the Jews to accept baptism or leave the country.

1498. The exiles settled in Navarre banished. Jews expelled from Nuremberg and Ulm.

1501. (July) Fifty-four Jews burned at Seville.

1502. Appearance of the pseudo-Messiah Asher Lämmlein.

1503. Pfefferkorn denounces Reuchlin. (March 22) Jews permitted to return to Lithuania. (Dec. 27) Judaizing followers of Zechariah of Kiev burned at Moscow.

1505. Jews expelled from Orange. All slain at Budweis on a child-murder accusation.

1506. Jews settle in Pinsk and secure synagogues and cemetery. Massacre of 4,000 Maranos in Lisbon.

1508. (July 15) Royal decree issued expelling Jews from Portugal.

1510. Burning of Jewish books at Frankfort. Thirty-eight Jews burned in Berlin for host-desecration and child-murder (Grätz, ix. 94).

1516. (March) Venice sets apart a special quarter for a ghetto (first use of the term).

1524. The Jews of Cairo threatened with destruction by Aḥmad Shaitan, viceroy of Egypt. Jews return to Genoa.

1529. (May 21) Thirty Jews burned at Pösing on blood accusation. Solomon Molko (Diogo Pires, 1501–32) begins his Messianic agitation.

1530. (Aug. 12) Josel of Rosheim obtains extension of Alsatian privileges from Charles V.

1531. Clement VII. issues a bull establishing the Portuguese Inquisition for Maranos.

1541. Jews expelled from Naples.

1542. Jews expelled from Bohemia because of fires in Prague and other towns.

1543. Luther publishes his attack on the Jews.

1548. (July 10) Eighteen hundred Maranos released from the prisons of the Inquisition in Portugal.

1550. (April 2) Jews banished from Genoa.

1551. Jews expelled from Bavaria and Württemberg.

1554. (June 21) Rabbinical synod at Ferrara.

1555. Paul IV. issues the bull "Cum Nimis Absurdum." Jews expelled from the Palatinate.

1556. Twenty-four Jews of Ancona hanged and burned by order of Paul IV.

1567. Don Joseph Nassi appointed ruler of Naxos and eleven other islands of the Grecian archipelago. (June 15) Jews expelled from Genoese territory.

1568. Isaac Luria Levi (1534–72), cabalist, pretends to be the Messiah, son of Joseph.

1569. (Feb. 26) Bull of Pius V., "Hebræorum Gens," expels Jews from Papal States except Rome, Bologna, and Ancona.

1570. Solomon Ashkenazi sent as an envoy to Venice by Sultan Selim II.

1573. (Jan. 28) The Jew Lippold executed at Berlin; all Jews expelled from Brandenburg.

1576. Stephen Bathori allows the Jews of Poland to carry on trade without restrictions.

1582. Expulsion from Silesia.

1586 (*circa*). The Jews of Poland establish the Council of Four Lands; Mordecai Jafe probably its first president.

1592. (Aug. 17) Papal edict forbids Jews to admit Christians into synagogues, etc.

1593. Clement VIII. expels the Jews from all the Papal States except Rome and Ancona. The first Marano settlement in Holland made at Amsterdam under Jacob Tirado.

1596. Persecution of the Persian Jews by Shah Abbas the Great.

1598. Bet Jacob synagogue consecrated at Amsterdam.

1612. Portuguese Jews granted right of residence in Hamburg.

1614. (Sept. 2) Vincent Fettmilch's attack upon the Jews of Frankfort.

1615. Jews of Worms banished.

1616. Jews return to Frankfort and Worms.
1617. (Jan. 3) "Neue Stättigkeit" for Frankfort makes right of domicil for Jews perpetual.
1629. (June 26) Lippman Heller forced to leave his post as rabbi in Prague.
1632. (April 20) Proselyte Nicolas Antoine burned at Geneva.
(July 4) Auto da fé at Madrid.
1639. Dutch West India Company grants Jews of Guiana full religious liberty.
1642. Six hundred Jews of Amsterdam with Isaac Aboab as ḥakam settle at Pernambuco.
1646. The Jews in Brazil side with the Dutch in their war with the Portuguese.
1648. The beginning of the Cossack persecutions of the Jews in Poland under Chmielnicki.
1652. Two leagues along the coast of Curaçao granted to David Nassi for a Jewish colony.
1654. (July 8) Twenty-four Jews land at New Amsterdam from Brazil.
1655. (Oct.) Menasseh ben Israel goes to London to obtain from Cromwell the readmission of Jews into England.
1657. (Feb. 4) Resettlement Day; Oliver Cromwell grants Carvajal right of residence for Jews in England.
1659. (Feb. 26) Jews expelled from all the Papal States except Rome and Ancona.
1660. Jews expelled from Kiev by Alexis.
1665. Shabbethai Ẓebi (1626–1676) publicly accepted as the Messiah at Smyrna.
1667. (Feb. 14) Jews run races at the Roman carnival for the last time.
1670. Jews banished from Vienna and Lower Austria by Emperor Leopold I. Synod of Lithuanian rabbis and deputies settle spheres of jurisdiction in relation to central ḳahals.
1671. Frederick William, the Great Elector, grants a privilege for twenty years to fifty families driven from Austria.
1678. Appearance of the pseudo-Messiah Mordecai Moshiaḥ of Eisenstadt.
1680. (June 30) Auto da fé at Madrid.
1682. (May 10) Auto da fé at Lisbon.
1686. Jews the victims of the Imperialist soldiery at the recapture of Buda from Turks.
1690. Ninety Jews from Curaçao settle at Newport, R. I.
1695. Jews forbidden to enter Sweden by Charles IX.
1700. The house of Oppenheimer in Vienna attacked by a mob. Eisenmenger attempts to publish his "Entdecktes Judenthum."
1703. Jonas Aaron settles in Philadelphia.
1710. The "Judenordnung" of Hamburg determines the social condition of the Jews of that city.
1716. (July 24–25) Serious uprising against the Jews at storming of Posen.
1727. (April 26) Jews expelled from Russia and the Ukraine by Catharine. (Nov. 15) Act passed by General Assembly of New York permitting Jews to omit "on the faith of a Christian" from oath of abjuration.
1732. (Sept. 2) "Editto sopra gli Ebrei" of Clement III. renews all restrictions against Jews of Rome.
1733. (July) Forty Jews from Lisbon arrive at Savannah, Ga.
1738. (Feb. 4) Joseph Süss Oppenheimer executed at Vienna.
1740. (Feb. 3) Charles the Bourbon, King of Naples and of the two Sicilies, invites the Jews back for fifty years. (July 11) Jews expelled from Little Russia by Czarina Anne. Act passed by English Parliament naturalizing Jews settled in the American colonies.
1742. (Dec. 2) Jews expelled from Great Russia by Czarina Elizabeth.
1744. (Dec. 18) Expulsion of Jews from Bohemia and Moravia.
1747. Bull of Benedict XIV. decides that a Jewish child baptized, even against canonical law, must be brought up under Christian influences.
1748. Jews permitted to remain in Bohemia on payment of a "Judensteuer" of 216,000 florins.
1750. (April 17) Frederick the Great issues a "Generalprivilegium" for the Prussian Jews.
1753. Act passed by English Parliament permitting Jews to be naturalized. "No Jews, no wooden shoes" riots in England.
1754. Act granting naturalization to English Jews repealed.
1756. Blood accusation in Jampol, Poland.
1757. Jacob Frank becomes leader of the Shabbethaians. Bishop of Kamenitz-Podolsk orders Talmuds to be burned.
1761. Persecution of Jews in Yemen.
1767. (June 20) Cossacks slay thousands of Jews at Homel.
1772. Jews settle in Stockholm, Karlskrona, and Gothenburg, by favor of Gustavus III.
1776. (Oct. 17) Senatorial decree of Russia grants freedom of settlement and other rights to baptized Jews.
1781. Joseph II. of Austria abolishes the Jewish poll-tax, and grants civil liberties to the Jews.
1782. Joseph II. issues his Toleration Edict.
1787. Frederick William II. removes the "Leibzoll" in Prussia.
1790. The French National Assembly grants citizenship to the Sephardic Jews of Bordeaux. New constitution for Jews of Silesia; a few receive general privileges, etc.
1791. The French National Assembly grants full civil rights to the Jews.
1796. Jews of Holland declared by the National Assembly to be full citizens of the Batavian Republic.
1797. (Aug. 1) Two Jews, Bromet and De Lemon, elected members of the second National Assembly of Holland.
1801. "Leibzoll" removed in Nassau.
1803. Israel Jacobson and Wolff Breidenbach agitate the abolition of the poll-tax for Jews in Germany.
1804. (Dec. 9) "Enactment concerning the Jews" passed by Alexander I. of Russia.
1807. The Great Sanhedrin convened by Napoleon; Joseph David Sinzheim president.
1808. (Jan. 27) Jerome Napoleon issues decree giving full civic rights to Jews of Westphalia. (Dec. 11) Napoleon at Madrid issues decree dividing the French empire into Jewish consistories.
1809. Law of Baden forms Jews into special religious community with all privileges.
1811. The Jews of Hamburg emancipated.
1812. The Jews of Prussia emancipated.
1813. (Feb. 18) The Jews of Mecklenburg emancipated.
1815. (June 8) "Bundesakte" passed at the Congress of Vienna decrees maintenance of status quo in the political condition of the Jews.
1818. First Reform Temple in Hamburg opened.
1819. (Aug.) The beginning of the "Hep, hep!" persecutions. Formation of the Society for the Culture and Science of the Jews, by Zunz, Gans, and Moser.
1820. Jews admitted again at Lisbon.
1825. Jews expelled from St. Petersburg through influence of gilds.
1826. Jews obtain full civic rights in the state of Maryland, U. S. A. Decree issued in Russia enrolling Jews for military service.
1831. Louis Philippe orders salaries of rabbis to be paid by the state.
1833. (Oct. 29) Jews of Kur-Hessen granted full emancipation.
1835. (April 13) General Jewish regulations issued in Russia. Edict of Nicholas I. founding agricultural colonies in Russia.
1836. Law refusing Jews the right to bear Christian names renewed in Prussia.
1839. Sultan 'Abd al-Majid grants citizenship to Turkish Jews.
1840. (Feb. 5) Damascus blood accusation. (Nov. 6) Firman issued by sultan against blood accusation.
1844. (May 25) Louis Philippe issues regulations for the internal organization of French Jews. (June) Rabbinical conference at Brunswick.
1845. (April) Ukase issued ordering Russian and Polish Jews to adopt ordinary costume.
1848. Emancipation Year: most of the countries of central Europe grant full civic and political rights to Jews—in the majority of cases, repealed the next year. (May 19–20) Riots in Presburg.
1849. (July 3) Baron Lionel de Rothschild, previously returned as M.P. for city of London, not allowed to take seat.
1852. (Sept. 3) Violent anti-Jewish riots at Stockholm.
1856. (Feb. 18) "Ḥaṭṭi-Humayun" issued, granting full civic rights to Turkish Jews.
1858. (June 24) Edgar Mortara in Ancona forcibly taken from his family by Bishop of Bologna on plea that he had been baptized when an infant by a Roman Catholic servant. The oath "on the true faith of a Christian" abolished in England; Jewish disabilities removed.
1860. Alliance Israélite Universelle founded.
1863. (July) Emancipation of Swiss Jews.
1866. Rumanian constitution, clause 7, makes all Rumanian Jews "aliens."
1868. Jews permitted to return to Spain. The law of the North German Federation of July 3 decrees that no state shall retain restrictions on the ground of religious belief.
1870. (March) Thirteen hundred and sixty Jews expelled from districts of Falcin and Vaslui, Rumania.
1871. Anglo-Jewish Association founded.
1873. Union of American Hebrew Congregations established.

1876. (July 28) E. Lasker procures the passing of the "Austrittgesetz," permitting Jews to change their congregation.
1878. (July 13) The Berlin Congress inserts clause 44, that distinction of religion shall not be a bar to civil and political rights in Rumania.
1880. (Nov. 20-22) Debate in Prussian Diet on Kantorowicz incident.
1881. Atrocities against Jews in South Russia. (April 25) Anti-Semitic league in Germany presents petition with 255,000 signatures to Prince Bismarck. (April 27) Riot at Argenau.
1882. (April 7) Disappearance of Esther Solymosi causes a trial on blood accusation at Tisza-Eszlar. (May 3) "May Laws" issued by General Ignatief confining the Jews in the Pale of Settlement to the towns.
1884. (March 7) Rumanian law prohibiting hawking puts 5,000 Jewish families out of employment. (July 9) Lord Rothschild takes his seat as first Jewish peer in the British House of Lords.
1885. Pittsburg Conference of American Rabbis establishes a platform for Reform Judaism.
1886. Drumont publishes "La France Juive."
1887. (Feb. 28) Rumanian law excluding Jews from public service and from tobacco trade and from employment in retail trade.
1889. (May 12) Rumanian law limiting number of Jewish factory hands to one-third.
1890. (Dec. 10) Guildhall meeting against persecution of Russian Jews by May Laws.
1891. (June 29) Blood accusation at Xanten.
1892. Jewish Colonization Association founded by Baron de Hirsch.
1893. (Jan. 14) Rumanian law prohibiting Jews from being employed in public medical department.
1895. Capt. Alfred Dreyfus condemned and degraded as a spy and deported to Devil's Isle, Cayenne.
1897. (Aug. 29-31) First Zionist Congress at Basel.
1898. (Oct.) Eleven thousand two hundred Jewish children refused admission to public schools in Rumania.
1899. (March 31) Rumanian law excluding Jews from agricultural and professional schools. (Sept. 2) Dreyfus condemned a second time, but "pardoned" on Sept. 19.
1900. (Aug. 13-16) Fourth Zionist Congress at London. (Sept. 8) Israelsky, accused of ritual murder at Konitz, acquitted.
1901. (Dec.) Rumanian law prohibiting Jews from holding saloons or stores in rural districts.
1902. (March) Rumanian law prohibiting employment of Jewish working men.

G. J.

CHRYSOSTOMUS, JOANNES (generally known as **St. Chrysostom**): Patriarch of Constantinople, one of the most celebrated of the Church Fathers, and the most eminent orator of the early Christian period; born in 347 at Antioch; died Sept. 14, 407, near Comana, in Pontus. Chrysostom originally devoted himself to the law, but soon felt dissatisfied with this vocation, and at the age of twenty-three was made a deacon. About fifteen years later (386) he advanced to the rank of presbyter, and in 398 was appointed by the emperor Bishop of Constantinople. Having attacked the empress Eudoxia in his sermons, he was banished (403), but was recalled soon after, upon the unanimous demand of his congregation. He repeated his attacks upon the empress, and was again banished in 404, first to Nicæa, then to Cucusus in the desert of the Taurus, and finally to Pityos on the Black Sea; but he died while on the way to the last-named place.

The name "Chrysostomus" ("golden-mouthed": *χρυσός* = "gold," and *στόμα* = "mouth") is a title of honor conferred on this Church father only. It was first used by Isidore of Seville (636), and is significant of the importance of the man, whose sermons, of which one thousand have been preserved, are among the very best products of Christian rhetoric. As a teacher of dogmatics and exegesis Chrysostom is not of so much importance, although much space in his works is devoted to these two branches. Among his sermons, the "Orationes VIII. Adversus Judæos" (ed. Migne, i. 843-944) deserve special notice, inasmuch as they mark a turning-point in anti-Jewish polemics. While up to that time the Church aspired merely to attack the dogmas of Judaism, and did that in a manner intended only for the learned, with Chrysostom there began the endeavor, which eventually brought so much suffering upon the Jews, to prejudice the whole of Christendom against the latter, and to erect hitherto unknown barriers between Jews and Christians.

Attack on Jews.

It was the existing friendly intercourse between Jews and Christians which impelled Chrysostom to his furious attacks upon the former. Religious motives were not lacking, for many Christians were in the habit of celebrating the Feast of the Blowing of the Shofar, or New-Year, the Day of Atonement, and the Feast of Tabernacles ("Adversus Judæos," i.; ed. Migne, i. 848). "What forgiveness can we expect," he exclaimed, "when we run to their synagogues, merely following an impulse or a habit, and call their physicians and conjurers to our houses?" (*ib.* viii.). In another place Chrysostom says: "I invoke heaven and earth as witnesses against you if any one of you should go to attend the Feast of the Blowing of the Trumpets, or participate in the fasts, or the observance of the Sabbath, or observe an important or unimportant rite of the Jews, and I will be innocent of your blood" (*ib.* i. 8; ed. Migne, i. 855). Not only had Chrysostom to combat the pro-Jewish inclinations of the Antiochians in religious matters, but the Jews were held in so much respect at that time, that Christians preferred to bring their lawsuits before Jewish judges, because the form of the Jewish oath seemed to them more impressive and binding than their own (*ib.* i. 3; ed. Migne, i. 847).

Arguments Against Judaism.

Chrysostom further argues at length in his writings that Judaism has been overcome and displaced by Christianity. He attempts to prove this by showing that the Jewish religion can not exist without a temple and sacrifice and a religious center in Jerusalem, and that none of the later religious institutions can fill the place of the ancient ones. Chrysostom derides the Patriarchs, who, he declares, were no priests, but gave themselves the appearance of such, and merely played their parts like actors. He adds: "The holy Ark, which the Jews now have in their synagogues, appears to be no better than any wooden box offered for sale in the market" (*ib.* vi. 7; ed. Migne, i. 614).

But he is not satisfied with the derision of all things sacred to the Jews. He tries to convince his hearers that it is the duty of all Christians to hate the Jews (*ib.* vi. 7; ed. Migne, i. 854), and declares it a sin for Christians to treat them with respect. In spite of his hatred of the Jews and Judaism, Chrysostom—as, indeed, the whole Antiochian school in their Bible exegesis—shows a dependence upon the Haggadah, which at the time predominated among the Palestinian Jews. A few parallels with the Haggadists have been given by Weiss, but they could be easily increased; and even in instances not directly taken from the Haggadah, its influence can be noticed in the writings of Chrysostom.

K. L. G.

CHUDNOV: Town in the government of Volhynia, Russia. A Jewish community existed here before the uprising of the Cossacks in 1648. In 1898 the town had nearly 8,000 inhabitants. Among them there were about 3,500 Jews, who were principally engaged in handicrafts and commercial pursuits. The former employed 1,252 Jews, of whom 475 owned their shops, 498 were wage-workers, and 279 were apprentices. The principal trades followed by the Jews are tailoring and shoemaking, the former, in 1898, employing 475 men, and the latter 350. The journeymen numbered 55.

The educational institutions include a Talmud Torah with 30 pupils, a private school for male pupils, one for female pupils, and 30 ḥadarim with an attendance of about 300.

CHUETAS ("Pork-Eaters") or **INDIVIDUOS DE LA CALLE** ("Ghetto People"): Names given to the descendants of the secret Jews in Majorca, who at heart were still faithful to Judaism, but who, in order to induce the belief that they were good Christians, publicly ate pork ("chuya," diminutive "chueta"); the second term, "Ghetto People," is self-explanatory. Their fate was similar to that of the Cagots of the Pyrenees, who are still held in abhorrence by the natives of that region. People were afraid to approach them; at church they sat apart; and even in the cemetery their bodies were isolated. When the tribunal of the Inquisition was established in Majorca in 1488, it granted a general amnesty to all Jews that solicited pardon for their apostasy, and it received back the repentant ones, to the number of 680, on payment of a considerable fine. Beginning with 1509, however, several secret Jews were publicly burned before the Gate of Jesus at Palma; and in 1679, when a synagogue was discovered in an outlying house, several hundred of them were condemned by the tribunal to imprisonment for life, and their property was confiscated.

To escape these continuous persecutions and extortions, a number of Chuetas, reputed to be the wealthiest inhabitants of Palma, decided to leave the "Golden Island" in an English vessel which they had hired for the purpose; and they had set sail, when unfavorable winds compelled them to return to the harbor of Palma. After having been imprisoned for five years, these unfortunates were, in 1691, condemned by the Inquisition to the confiscation of their property, and more than fifty of them were garroted and then burned at the stake. Among the latter were Raphael Valls, "an excellent rabbi"; Raphael Benito Terongi, his most faithful pupil; and Catalina Terongi, a sister of the latter. These hero-martyrs were commemorated by Majorcan troubadours, whose verses are still sung by the women of the island while at their work. The Inquisition did its utmost to fan the prejudice of the people against the outlawed. Their portraits were placed in the Dominican monastery; and in 1755 a list was published in which were mentioned the names and rank of all those condemned to death or to confiscation of property from 1645 to 1691.

Not until the publication of the royal decree, Dec. 16, 1782, was an amelioration effected in the condition of these people, who were thenceforward permitted to reside in any street in the city of Palma and in any part of the island, and were no longer to be called Jews, Hebrews, or Chuetas, under penalty of the galleys or imprisonment in the fortress. Three years later they were declared eligible to the army and the navy as well as to public offices. Notwithstanding, as late as 1857 there appeared a special book directed against them. It bore the title "La Sinagoga Balear. Historia de los Judios de Mallorca," and the purpose of the author, Juan de la Puerta Vizcains, was, by means of it, to levy blackmail upon them. They, however, bought up all but three copies of the work. The descendants of the Chuetas, who bear to-day the same names that their ancestors bore in the fourteenth century, now occupy a respected position in industry and agriculture, as well as in the departments of science and politics.

CHUFUT-KALE: Suburb of Bakhchiserai, a town in the government of Taurida, Russia. It is called by the Tatars "Kirk-er" (Place of Forty), and by the Karaites, to which sect the greater part of its inhabitants belong, "Sela' ha-Yehudim" (The Rock of the Jews). There are many legends concerning the place. According to one, it was called "Kirk-er" because the khans Mengli-Girei and Takhtamish, the founders of the city, brought with them forty Karaite families, and in their honor called it the "Place of Forty."

Another legend, fostered by the Karaites to show the antiquity of their sect, says that Karaites were brought there from Persia at the time of the first Exile. The early settlers of the city exercised great influence upon their neighbors, the Chazars. The ḥakam Abraham Firkowitsch, who was very skilful in falsifying epitaphs and manuscripts, pretended to have unearthed at the cemetery of Chufut-Kale tombstones dating from the year 6 of the common era, and to have discovered the tomb of Sangari, which is still shown by the Karaites. According to Harkavy, however, no epitaph earlier than 1203 can be seen at the cemetery of Chufut-Kale, called "Vale of Jehoshaphat"; and the tombs do not belong to Karaites, but to the old Rabbinite settlers called "Krimchaki." Chufut-Kale, however, existed as early as the seventh century. Abu al-Fida mentions it under the name "Kirk-er."

The Karaite community possesses two synagogues; it has a bet din consisting of three members, the ḥakam, the ḥazzan, and the beadle (shammash). A printing-office for Karaite works was established there in 1734. The first work published was the Karaite ritual, according to Aaron ben Joseph, the author of "Sefer ha-Mibḥar." For history of suburb see Crimea; Karaites.

H. R. I. Br.

CHUMACEIRO, ARON MENDES: Ḥakam of Curaçao, Dutch West Indies; born at Amsterdam Jan. 28, 1810; died there Sept. 18, 1882. He received the various rabbinical degrees (that of "morenu" in 1846) at the celebrated bet ha-midrash Ets Haim. In 1848 he was awarded the royal gold medal for the best sermon in the Dutch language. When the Sephardic synagogue of Amsterdam proposed to elect him preacher in the vernacular, it met with strenuous opposition, Ladino being the only language, except Hebrew, used in the synagogue. When in 1852 Chumaceiro was elected first ab bet din, he succeeded in overcoming the opposition to Dutch, and soon established a reputation as one of the foremost pulpit orators in Holland. In 1852 he edited the first Dutch Jewish weekly, "Het Israelietisch Weekblad." In the same year he was elected head of the bet ha-midrash Ets Haim.

Aaron Mendes Chumaceiro.

Delegated by the parnasim of his congregation in 1854 to receive the future King Pedro V. of Portugal, he conducted the royal visitor and his suite to the bet ha-midrash, where the king, noticing the names of the donors to that institution inscribed on the walls, made the significant remark: "Me faz pareçer que estoy em mea propia terra do Portugal" (It seems as though I were in my own land of Portugal). When Pedro V. ascended the throne in 1856, he removed the civil disabilities of the Jews.

On account of his liberal-conservative views Chumaceiro was strongly opposed by the ultra-Orthodox party, and he therefore accepted in 1855 from King William III. the appointment of chief rabbi of the colony of Curaçao. At the solicitation of the special ambassador, O. van Rees, who was sent by the king to adjust the claims of the persecuted Dutch Jews of Coro, Venezuela, he succeeded in settling the complicated disputes to the entire satisfaction of the contending parties.

Chumaceiro visited his birthplace in 1861, when the office of ḥakam was tendered to him, which he declined, receiving on that occasion a costly testimonial from the Sephardic synagogue. He obtained his discharge as ḥakam of Curaçao in 1869, and received a liberal pension from the king for "the numerous and faithful services rendered to his country."

Chumaceiro had four sons:

1. Abraham Mendes Chumaceiro: Attorney at law; born at Amsterdam Nov. 16, 1841; died at Curaçao, Dutch West Indies, Aug. 19, 1902. He moved to Curaçao, in 1856, studied law, and was admitted to the bar in 1872. He soon acquired great prominence in his profession. Among his literary works are "Is Curaçao te Koop?" and "Het Kiesrecht in de Kolonie Curaçao."

2. Benjamin Mendes Chumaceiro: Ḥazzan; born in Amsterdam in 1871. He received a ministerial training at the bet ha-midrash Ets Haim of Amsterdam. In 1892 he was elected assistant ḥazzan of the Portuguese synagogue at The Hague; and in 1895 ḥazzan of that of Hamburg.

3. Jacob Mendes Chumaceiro: Dayyan and editor; born at Amsterdam March 11, 1833; died Feb. 8, 1900. Besides being dayyan of the Sephardic synagogue, and acting ḥakam for the Portuguese Jews of North and South Holland, he was inspector of the Jewish schools of Amsterdam, head and librarian of the bet ha-midrash Ets Haim, and editor of "Het Israelietisch Weekblad."

4. Joseph Ḥayyim Mendes Chumaceiro: Rabbi and editor; born in Amsterdam July 3, 1844; studied for the ministry under his father at Curaçao. From 1867 to 1874 he was rabbi of Beth-El congregation, Charleston, S. C.; from 1874 to 1880, of Nefashot Yehudah, New Orleans, La.; from 1884 to 1887, of Beth-El Emeth, Philadelphia, Pa.; from 1889 to 1891, of Mikwe Yisrael, Curaçao; from 1892 to 1898, of Children of Israel, Augusta, Ga.; and was recalled as rabbi to Curaçao in 1898. During part (1879-83) of his residence at New Orleans he was also editor of "The Jewish South," a weekly journal.

Besides many sermons and discourses, he published "The Evidences of Free-Masonry from Ancient Hebrew Records," 1900, which reached a third edition; "La Revelacion," the first Jewish catechism in Spanish; and "Verdediging is geen Aanval," a correspondence between a Christian divine and a Jewish rabbi on Jesus as the Messiah.

A. J. H. M. C.

CHURCH COUNCILS: Synods of the Roman Catholic Church, possessing legislative power in matters pertaining to doctrine and discipline. The Apostles' synod at Jerusalem (Acts xv.) is regarded as the oldest example of such an assembly. Besides the general (ecumenical) councils, of which the Catholic Church recognizes twenty, there are national and provincial councils and diocesan synods. The decisions of these lesser synods were naturally authoritative only within their own particular districts; but as they were sometimes recognized by other provincial synods, or even by a general council, they acquired a more or less general validity. Many of the Church councils have concerned themselves with the Jews, with the object of removing Judaizing institutions and teachings from among Christians, destroying any influence which Jews might exercise upon Christians, preventing, on the one hand, the return to Judaism of baptized Jews, and devising, on the other, means to convert Jews to Christianity. It is characteristic of the decisions of these councils in respect to the Jews that up to the end of the Middle Ages they became ever harsher and more hostile, a few isolated instances only of benevolent resolutions standing on record. Many of the Church decrees, however, were enforced only after they had been several times confirmed; while some of them were never enforced at all.

Spanish Synods.

The Jews are mentioned for the first time in the resolutions of the synod at Elvira, at the beginning of the fourth century, immediately after the persecutions under Diocletian. The synod opposed the custom existing among Christians of having the fruits of their fields blessed by Jews, and forbade all familiar intercourse, especially eating, with Jews (canons 49, 50). The spirit of intolerance, arising almost before the persecution of the Christians themselves had ended, remained characteristic of the Spanish Church. When the Arian creed was exchanged for the Catholic by the third Toledo Synod held under Reccared in 582, resolutions hostile to the Jews were passed. The synod forbade intermarriage with Jews, and claimed the children of mixed marriages for Christianity. It disqualified Jews from holding any public office in which they would have power to punish Christians, and forbade them to keep slaves for their own use (canon 14). Still more severe are the decrees of the fourth Synod of Toledo, in 633 (canons 57–66), directed more especially against the pretended Christianity of those converted by force under Sisebut. Though it was decreed that in the future no Jew should be baptized by force, those who were once baptized were obliged to remain Christians. Whoever protected the Jews was threatened with excommunication. The sixth Synod of Toledo, in 638, confirmed King Chintila's decree providing for the expulsion of the Jews, and demanded that every future king on his accession should take an oath to observe faithfully the laws concerning the Jews. The twelfth Synod of Toledo, in 681, went furthest, and adopted in its resolutions (canon 90) King Erwig's laws in reference to Jews ("Leges Visigothorum," xii. 3): celebration of the Sabbath and of feast-days, observance of dietary laws, work on Sunday, defense of their religion, and even emigration were forbidden. One generation later Spain was under Moorish dominion.

Other Synods.

More comprehensive were the measures adopted by the councils outside of Spain. Before 450 they confined themselves to the prohibition of familiar intercourse with Jews; of the celebration of their feast-days, especially the Passover; of resting from labor on their Sabbath; of entrance into their synagogues, etc. The General Council of Chalcedon (451) went a step further, though only as a result of previous resolutions, in forbidding intermarriage—at first only in the case of the children of lectors or precentors (canon 14). The synods of Orléans (in 533 and 538) and the above-mentioned Spanish synods forbade marriages between Jews and Christians altogether, and this legislation was repeated by the Synod of Rome in 743. As the Jews themselves were opposed to such marriage, there was no difficulty in the enforcement of these decrees. Only in countries where Christianity had not yet gained entire mastery was there a repetition of these marriage prohibitions, as in Hungary (1092) and in Spain (1239). The Quinisext Synod of Constantinople, in 692, and a number of later synods forbade Christians to receive treatment from Jewish physicians. In spite of this interdiction (repeated several times, at Avignon as late as 1594), even popes often employed Jews as court physicians.

Third Lateran Council, 1179.

After the Synod of Orléans, in 538, the councils turned their attention to the Christian slaves in the service of Jews, at first merely prescribing the protection of the slaves' persons and religious belief, but later prohibiting absolutely the possession of Christian slaves. Together with this decree, which only repeated a law in the Theodosian Code, came laws forbidding Jews to have free Christians in their employ. By a general decree of the third Lateran Council of 1179 (canon 26), Christians were strictly forbidden to act as servants to Jews, with so little effect, however, that nearly all later Church councils had to renew the interdict; for instance, the Synod of Milan in 1565 (canon 14). Jews of all lands were in great fear of the third Lateran Council ("Shebeṭ Yehudah," ed. Wiener, p. 112). Their fears, however, proved groundless; for, aside from the decree in respect to the employment of Christian servants, especially of nurses and midwives—a decree due to the fear of the common people's apostasy to Judaism—the following are the important decisions of the council: (1) Christians must not live together with Jews (a repetition of an old decree); (2) new synagogues must not be built; old ones may be repaired only when dilapidated, but on no account may they be beautified; (3) the testimony of Christians against Jews must be admitted, since Jews are accepted as witnesses against Christians; (4) neophytes must be protected against the fanaticism of the Jews, and Jews are forbidden to disinherit baptized persons (compare "Codex Theodosian.," xvi. 8, 28). A characteristic clause states that Jews may be protected only for reasons of common humanity.

The fourth Lateran Council, in 1215, was of crucial importance. Its resolutions inaugurated a new era of ecclesiastical legislation in regard to the Jews, and reduced them virtually to the grade of pariahs. In the south of France an assembly of Jewish notables, which was held at the demand of Isaac Benveniste, sent a delegation to Rome to try to avert the impending evil. The last four resolutions or canons which the council adopted were concerned with the Jews.

Fourth Lateran Council, 1215.

Canon 67 adopts measures against usury by the Jews. A synod at Avignon had anticipated the Lateran Council in this respect, and it was imitated by other councils of the thirteenth century. At the same time very strict regulations were made against Lombard usurers, who, according to Matthew of Paris, were much worse than the Jews. For houses and landed property Jews were obliged to give a tithe to the Church, and besides each Jewish family had to pay at Easter a tax of six denarii. Canon 68 ordains a special dress for Jews and Saracens, ostensibly "to prevent sexual intercourse, which has occasionally occurred by mistake," but in reality to make a sharp distinction between Jews and Christians. The Jewish badge and hat exposed the Jews to scorn and ridicule, and their complete abasement dates from this time. Later councils, even up to comparatively modern times, have renewed these regulations, fixing the form and color of the Jewish badge in various countries, or forbidding the Jews to wear certain costumes (see BADGE; HEAD, COVERING OF).

Because many Jews were said to parade in their best clothes during Holy Week (in which the Feast of the Passover usually falls) on purpose to mock the Christians, the Jews were not thenceforth allowed to leave their houses at all during those days. This Draconian decree, however, supported by similar decrees of French and Spanish synods of the sixth century, was not without its advantages for the Jews, as many subsequent synods (for instance, at Narbonne, 1227; Béziers, 1246) were obliged expressly to protect the Jews against ill treatment during Holy Week. Other synods of the thirteenth century forbade Jews to eat meat on Christian fast-days (Avignon, 1209), or to carry it across the street (Vienna, 1267). The synods of Narbonne (1227), Béziers (1246), Albi (1255), and Anse (1300) forbade altogether the sale of meat by Jews. Canon 69, which declares Jews disqualified from holding public offices, only incorporated in ecclesiastical law a decree of the Holy Christian Empire. As has been mentioned, the synods of Toledo, and the French councils also, had debarred Jews from the office of judge, and from any office in which they would possess the right to punish Christians. The fourth Lateran Council simply extended this statute over the whole Roman Catholic world, referring to the synods of Toledo in support of its decision. Canon 70 takes measures to prevent converted Jews from returning to their former belief.

Vienna Synod of 1267.

The concluding act of the fourth Lateran Council—the Crusades decree—compelled Jewish creditors to renounce all claim to interest on debts, and facilitated in other ways the movements of the Crusaders. Similar ordinances were adopted by the first Council of Lyons (1245). The decisions of the Synod of Vienna, in 1267, were practically the same as those of the fourth Lateran Council, but were more severe in some points. For example, Jews were forbidden to frequent Christian inns or baths; they were ordered to stay at home with closed doors and windows when the host was carried past, etc. Nevertheless, these decrees did not succeed in making entirely unbearable the position of the Jews in Austria (see Bärwald, in "Jahrbuch für Israeliten," 1859). The same may be said of the decrees of the Hungarian Council at Ofen, in 1279 (Grätz, "Geschichte," vii. 139 *et seq.*).

The later councils went a step further in restricting and humiliating the Jews by limiting their freedom in the choice of dwelling-places. The Synod of Bourges, 1276, ordained that Jews should live only in cities or large towns, in order that the simple country folk might not be led astray. Similarly the Synod of Ravenna, 1311, ordained that Jews should be allowed to live only in cities that had synagogues. The Synod of Bologna, 1317, forbade renting or selling houses to Jews, and the Synod of Salamanca, 1335, forbade Jews to live near a churchyard or in houses belonging to the Church. Finally, the Spanish Council of Palencia, 1388, under the presidency of Pedro de Luna, demanded separate quarters for Jews and Saracens, a demand afterward renewed by many Church councils.

Council of Basel.

The compulsory conversion of Jews was often forbidden by the councils (for instance, Toledo, 633; Prague, 1349). Toward the end of the Middle Ages the General Council of Basel, in its nineteenth sitting (1434), adopted a new method of moral suasion by compelling the Jews to listen periodically to sermons for their conversion, a decision renewed, for instance, by the Synod of Milan in 1565.

A last attack on the scanty freedom of the Jews was brought about directly by the art of printing. The committee on index of the General Council of Trent (1563) decided to refer to the pope the question of placing the Talmud on the list of forbidden books; and although the Italian Jews succeeded with bribes in preventing the absolute prohibition of the work, it was permitted to be printed only on condition that the title "Talmud" and all passages supposed to be hostile to Christianity be omitted (Mortara, in "Hebr. Bibl." 1862, pp. 74, 96; see CENSORSHIP OF HEBREW BOOKS).

Vatican Council, 1869-70.

The General Vatican Council of 1869–70 did not concern itself at all about the Jews beyond inviting them, on the suggestion of the convert Léman, to attend the council (Friedberg, "Sammlung der Aktenstücke zum Ersten Vatikanischen Concil." pp. 65 *et seq.*).

Regarding a supposed synod in Rome in 314–324, directed against the Jews (Jaffe, "Regesta Pontif. Roman."), nothing is known. Untrustworthy also is the report that a synod, summoned at Toulouse in 883 by the Frankish king Carloman, on the complaint brought by Jews of their ill treatment, ordained the corporal chastisement of a Jew before the church door on Christmas Day, Good Friday, and Ascension Day, and that the degradation was increased by compelling the Jew to acknowledge his punishment as just (Mansi, "Concilia," xvii. 565).

G. H. V.

CHURCH FATHERS: The early teachers and defenders of Christianity. The most important of the fathers lived and worked in a period when Christianity still had many points of contact with Judaism, and they found that the latter was a splendid support in the contest against paganism, although it had to be combated in the development of Christian doctrine. So the Fathers of the Church are seen at one time holding to a Jewish conception of the universe and making use of Jewish arguments, at another rejecting a part of such teaching and formulating a new one. In the contest of Christianity against paganism the Church Fathers employ the language of the Hellenistic literature as found in Philo, Josephus, the Apocrypha, and the Sibylline Books, all of which draw upon the Prophets of the Old Testament. Thus, practically, only the polemic features in the activity of the Church Fathers directed against Judaism can be considered as new and original. But in order to wage successful war against paganism, they, as well as Christians in general, had to acquaint themselves with the religious documents of Judaism; and this was possible only if they entered into personal relations with the Jews: through these personal relations the Church Fathers become of signal importance to Judaism. The contemporaries and, in part, the coworkers of those men who are known from the Talmud and the Midrash as the depositaries of the Jewish doctrine, were the instructors who transmitted this doctrine to the Church Fathers also. Hence such a mass of haggadic material is found in the work of the fathers as to constitute an important part of Jewish theological lore. This article is primarily concerned with their interpretation of the texts of the Bible and of the Apocrypha, which differs in essential points from those of the Jews.

Their Importance to Judaism.

Personal Relations with Jews: After the Bar Kokba war against the Romans, Ariston of Pella, a converted Jew, wrote, as is generally accepted, a dialogue in which the Christian Jason and the Jew Papiscus are made the speakers, and in which the nature of Jesus is discussed (*'Ιάσονος καὶ Παπίσκου ἀντιλογία περὶ Χριστοῦ*). This dialogue, already mentioned by Celsus, may be wholly imaginary and without historical basis. But the famous dialogue of Justin Martyr with the Jew Tryphon, which took place at Ephesus (Eusebius, "Historia Ecclesiastica," iv. 18) at the time of the Bar Kokba war, is strictly historical, as certain details show; for instance, the statement that on the first day no strangers were present, while on the second day some Jews of Ephesus accompanied Tryphon and took part in the discussion (Justin, "Dialogus cum Tryphone," cxviii.), a certain Mnaseas being expressly mentioned (*ib.* lxxxv.). The Jewish auditors are not only able to follow the intricate discussion intelligently, but their demeanor also is seemly; Tryphon especially proves himself a true disciple of Greek philosophy, and his scholarship is freely acknowledged by Justin (*ib.* lxxx.). At the close of the debate, Jew and Christian confess that they have learned much from each other, and part with expressions of mutual good-will (*ib.* at the end). Justin was born and reared in proximity to Jews; for he calls himself a Samaritan (*ib.* cxx.), meaning thereby probably not that he professed the religion of the Samaritans, but that he came from Samaria.

Justin Martyr.

Of the relations of Clement of Alexandria to Judaism nothing positive is known. During the persecutions of the Christians of Alexandria, in 202 or 203, Clement sought refuge for a short time in Syria (Eusebius, *l.c.* vi. 11). Here he may have learned much at first hand from the Jews. He knew a little Hebrew, also some Jewish traditions; both of which facts point to personal relations with Jews.

Clement's contemporary, Origen, probably also born in Alexandria about 185, may possibly have been on his mother's side of Jewish descent, if one may judge from the fact that while his father is mentioned as Leonides, the name of his mother is passed over in silence. A Jewish mother could readily have taught her son the Hebrew language, so that they might sing the Psalms together (Jerome, "Epistola xxxix. ad Paulam"). [Both his father and his mother were, however, Christian in faith.—T.]

In his capacity of presbyter at Cæsarea in Palestine, Origen must have come into frequent contact with learned Jews, as indeed appears from his writings. He mentions again and again his "magister Hebræus" (*ὁ 'Εβραῖος* in the Greek fragment), on whose authority he gives several haggadot ("De Principiis," i. 3, 4; iv. 26). His dependence on the Jews is sufficiently emphasized by Jerome ("Adversus Rufinum," I. xiii.) in the passage wherein Clement and Eusebius are named among those who did not disdain to learn from Jews. Origen often mentions the views of Jews, meaning thereby not the teaching of certain individuals, but the method of exegesis prevalent among the Jews of his time. The Jews with whom he maintained personal intercourse were men of distinguished scientific attainments. The one Jew whom he mentions by name was no less a personage than Hillel, the patriarch's son, or "Jullos," as Origen calls him (Grätz, "Monatsschrift," 1881, xxx. 433 *et seq.*). His other Jewish acquaintances either were closely related to the patriarch's family, or occupied high positions on account of their erudition. Grätz ("Gesch. der Juden," 3d ed., iv. 231) thinks indeed that some passages in Origen's writings are directed against the contemporary amora of Palestine, Simlaï. Origen seems, moreover, to have had intercourse with Hoshaya of Cæsarea (Bacher, "Agada der Palästinensischen Amoräer," i. 92).

Clement and Origen.

Eusebius, the celebrated Church historian, also learned from the Jews, as has already been mentioned, and was under the influence of Jewish tradition. In Cæsarea, where he lived, he met many Jews, with whom he had discussions. Nevertheless he uses the word "Jew" as a term of reproach, calling his opponent, Marcellus, "a Jew" ("De Ecclesiastica Theologia," ii. 2, 3). He likewise thinks it a disgrace to be one of the "circumcised" (*τις τῶν ἐκ περιτομῆς*, "Demonstratio Evangelica," i. 6). This last expression is also used regularly by Ephraem Syrus to designate Jews (טעיא גזירא, "Opera Syriaca," ii. 469). Ephraem distances all his ecclesiastical predecessors in his hatred of the Jews, displaying a bitterness that is explicable only on the ground that he at one time had personal relations with them, and had formed an adverse opinion of them. Epiphanius, too, shows his dependence on the Jews, especially in the book, perhaps wrongly ascribed to him, "De Prophetarum Vitis"; which contains, besides many extraneous inventions, numerous Jewish traditions of the lives of the Prophets. In this it was followed by a Syrian work ("The Book of the Bee," published in "Anecdota Oxoniensia," Semitic series, i., part 2).

Eusebius, Ephraem Syrus, Epiphanius.

Jerome.

Jerome surpasses all other Church Fathers in his erudition as well as in his importance for Judaism. It must be emphasized, in spite of Christian assertions to the contrary (*e.g.*, B. Baue, "Vorlesungen," ii. 36), that he learned much not only from baptized but also from loyal Jews. He sought his information in many quarters, especially among the educated Jews (Preface to Hosea; compare "Epistola lxxiii. ad Evangelum"). Hence he always cites the opinions of several Jews ("quidam Hebræorum"), not that of one Jew; and these Jewish friends of his accompany him on his journeys (Preface to I Chronicles), though he has one particular guide ("circumducens," Preface to Nahum). Of only three of his Jewish teachers is anything known. A Jew from Lydda, whom Jerome calls "Lyddæus," explained to him the Book of Job, translating it into Greek, and expounding it in Latin. Although he has much to say in praise of this man, Jerome will not admit that he learned much from him (Preface to Job), designating him often as one who merely read the Scriptures to him ("Onomastica Sacra," xc. 12; commentary on Eccles. iv. 14, v. 3). But from this Lyddan Jerome acquired not only the material for his philological notes, but also the Hebrew pronunciation that gives him a unique importance for Old Testament criticism (Siegfried, in Stade's "Zeitschrift," 1884, p. 34; Krauss, in "Magyár Zsidó Szémle," 1900, vii. 513).

Jerome was more attached to his second teacher, Bar Ḥanina, who, however, can not be identical with R. Ḥama b. Ḥanina, as Rahmer insists (compare Weiss, in "Bet-Talmud," i. 131, note 3); nor can he possibly be identified until his Midrashim, quoted by Jerome, have been compared with the known sayings of the authors of the Talmud and the Midrash. This Bar Ḥanina must have been an eminent teacher of the Law, for Jerome spent much time and money before he could secure him as teacher. Since Jerome would not visit his teacher by day, for fear of the Jews, he went to Bar Ḥanina by night ("Epistola lxxxiv. ad Pammachium et Oceanum"). Bar Ḥanina came from Tiberias, as is shown by the Hebrew traditions communicated by him to Jerome: for one particular prophecy was held to apply to Tiberias (Jerome, "Quæstiones Hebraicæ in Genesin," xlix. 21).

Jerome's third teacher, whom he required especially for the Aramaic portions of the Bible, knew both Hebrew and Aramaic, and was considered by the Jewish scribes as a "Chaldæus" (Preface to Tobit; compare "Epistola xviii. ad Damasum").

Jerome lived about forty years in Palestine, apparently studying all the time under Jews (commentary on Nahum ii. 1: "a quibus non modico tempore eruditus"). His enemies severely censured him for his intercourse with the Jews, but he was proud of it. He asks how it could be held to impugn his faith in the Church, that he informs his readers in how many ways the Jews construe a single error. ("Adversus Rufinum," book i.). "Why should I not be permitted to inform the Latins of what I have learned from the Hebrews. . . . It is most useful to cross the threshold of the masters, and to learn the art directly from the artists" (*ib.*).

Augustine.

Jerome's contemporary, the great teacher Augustine, did not fare so well in Africa. When he questioned the Jews on Biblical matters, they often either did not answer at all, or, at least from the standpoint of the Church Fathers, "lied" (Jerome, "Epistola cxii. ad Augustinum"), meaning probably that they gave an answer different from what the Christians desired ("Epistola civ. Augustini ad Hieronymum"). An alleged letter from Jerome, probably forged by Rufinus, was sent to the Christian communities in Africa, in which Jerome professed to admit that, misled by the Jews, he had translated erroneously ("Adversus Rufinum," book iii., ii. 554, ed. Vallarsi). It mortified Jerome that his translation of the Bible, the Vulgate, so famous later on, should be passed over in silence by all the Jews, and that there was no one who knew enough Hebrew to appreciate the merits of the new translation ("Epistola cxii. ad Augustinum"). He even believed that all the Jews of Africa had conspired to oppose him, as actually happened in one place. In a certain African town—so Augustine wrote to Jerome (Jerome's works, "Epistola civ. Augustini ad Hieronymum")—the new translation was read in the church, by order of the bishop. When they came to the passage in Jonah containing the word "ḳiḳayon" (iv. 6), which differed from the interpretation hitherto accepted, such a tumult arose that the bishop had to ask the Jews for a verification, and they declared, to the great annoyance of both Jerome and Augustine, that Jerome's rendering did not agree with the Hebrew, or Greek, or (old) Latin codices. The bishop had to strike it out as "a lie," being in danger of losing his congregation. Before this, Tertullian of Carthage (165–245) had spoken of the impertinence and derision shown by a Jew ("Apologia," xvi.; "Ad Nationes," i. 11; compare Ass-Worship).

Among the Greek Church Fathers, Basil the Great hardly knew Hebrew (H. Weiss, "Die Grossen Kappadocier Exegeten," p. 32, Braunsberg, 1872); yet his ability to distinguish between Amos, the prophet, and Amoz, the father of Isaiah (whose names are written alike in the Septuagint), as well as other similar facts, points to his having received oral instruction from Jews [or from some one who knew Hebrew.—T.]. Gregory of Nyssa (*c.* 331–396), who did not recognize the rending of the garments on the occasion of a death as being a Jewish custom (*περὶ τοῦ βίου τῆς Μακαρίας Μακρίνης*, in Oehler, "Bibliothek der Kirchenväter," i. 188), does not seem to have known much about Judaism. The same may be said of the other Church Fathers who lived in Europe; that is, in sections sparsely settled by Jews. Irenæus, for instance, who suffered as a martyr in 202 in Lyons, knew nothing of Judaism outside of the Scriptures, although he was reared in Asia Minor. In the paschal controversy he advocated separation from Judaism. But the Greek fathers John Chrysostom and Cyril of Alexandria (see Byzantine Empire) potently affected the fate of the Jewish people, as did Bishop Ambrose of Milan (c. 340-397).

Chrysostom, Cyril, and Ambrose.

The Syrian Church, on the whole, was even in the fourth century dependent upon Jewish traditions (Wellhausen, in Bleek's "Einleitung in das Alte Testament," 4th ed., p. 601). This appears especially in the "Homilies" of Aphraates (c. 337-345). He complains (Hom. xix.) that the monks are led astray and ensnared by the Jewish arguments; he himself had a disputation with one "who is called a wise man among the Jews." Aphraates, who, under the name "Mar-Jacob," was abbot of the monastery of Mar-Mattai, and a bishop, gives such a number of Jewish traditions as to place him, in this regard, beside Ephraem Syrus (see Aphraates).

The Haggadah: The Church Fathers adopted from the Jews a mass of interpolations, interpretations, and illustrative anecdotes, which may best be designated by the well-known term "Haggadah," but which they themselves called variously. Goldfahn has counted in Justin Martyr ("Dialogus cum Tryphone") twenty-six Hebrew traditions and six polemico-apologetic Haggadot. Among these may be mentioned: the eating by the three angels who appeared to Abraham; the Messiah's concealment and anointment by Elijah; the violent death of Isaiah (a Haggadah found already in the oldest apocrypha, and in nearly all the earlier fathers); Melchizedek's identity with Shem (compare especially Epiphanius, "Adversus Hæreses," xxxv., and the Syriac "Cave of Treasures," translated by Bezold, p. 36).

Clement and Origen.

Clement calls the Jewish haggadists "mystæ" (μύσται, "persons initiated"), a term that was probably current in Alexandria; for the writings of all the Church Fathers agree in regarding Jewish tradition as a kind of esoteric doctrine understood only by the initiated. Clement is acquainted with the old Haggadah to Ex. ii. 14, according to which Moses killed the Egyptian by merely pronouncing the name of God. Moses is called also "Joiakim" and "Melch" by the mystæ ("Stromata," ed. Migne, viii. 897), and "Melchiel" in Pseudo-Philo, "Antiq. Bibl." ("Jewish Quarterly Review," x. 228; compare x. 726). A relation between Clement and the Seder 'Olam Rabba is shown by the fact that both give the same figure, sixty years, as the period of the prophet Elisha's activity (*ib.* v. 138).

Origen derives still more from the Haggadot. For instance: the Garden of Eden is the center of the world ("Selecta in Genesin," ii. 8; compare 'Erub. 19a; Zion is so called in Enoch, xxvi. 1, 2; and Jubilees, viii.); division of the Red Sea into twelve parts (homily to Ex. v. 5; see also Eusebius, commentary on Ps. lxxvii. 13, and Epiphanius, in the notes to "Adversus Hæreses," pp. 262 *et seq.*; compare Mekilta on Ex. xiv. 16, and other Jewish sources ["Jewish Quarterly Review," v. 151], and Ḳimḥi on Ps. cxxxvi.); repentance of the sons of Korah (commentary on the Epistle to the Romans x. 7; compare Midrash on Ps. xlv. 4); Israel's strength lies in prayer (homily on Num. xiii. 5; compare Sifre, Num. 157); Phineas and Elijah are identical (com. on John vi. 7; Jerome adopts the same opinion from the Apocrypha [v. 813, ed. Vallarsi; compare Yalḳ., Num. 772, but the earliest sources are lacking]); Daniel, Hananiah, Michael, and Azariah are eunuchs (commentary on Matt. xv. 5; compare homily on Ezek. iv. 8; catena on Ezek. xiv. 5; Jerome, "Adversus Jovin," book i., xxv.; com. on Dan. i. 3; Epiphanius, "De Vitis Prophetarum," ed. Migne, xliv. 424; further Sanh. 93b; Gen. R. xcix.); Moses is the author of eleven Psalms ("Selecta" to Ps. xii., ed. Migne, p. 1055; so also Jerome ["Adversus Rufinum," xiii.; compare Pesiḳ., ed. Buber, p. 198a]); wild beasts are the instruments of divine punishment, as in II Kings xvii. 2 (homily on Ezek. iv. 7, xiv. 4; compare Mishnah Ta'anit iii. 6; Shab. 33a).

Origen's Debt to the Haggadah.

Eusebius.

Eusebius recognizes Jewish tradition as an authority almost equal to the Scriptures, and calls it ἄγραφος παράδοσις; *i.e.*, "unwritten tradition" ("Historia Ecclesiastica," iv. 22). Its depositaries he terms "deuterotæ" (δευτερωταί, "Præparatio Evangelica," xi. 5), and he characterizes them aptly as men of an uncommon strength of intellect, whose faculties have been trained to penetrate to the very heart of Scripture. The Hebrews, he says, call them δευτερωταί (*i.e.*, "tannaim"), because they expound Holy Writ (*ib.* xii. 1). "Deuterosis" (δευτέρωσις, "mishnah") is commonly used by the ecclesiastical writers for the Jewish tradition, and is also found in Justinian's novellæ.

Eusebius makes a distinction between esoteric and exoteric exegesis; the Haggadot he often classes with the exoteric interpretation, contrary to Clement and others, who see therein a secret doctrine. Among his Haggadot may be mentioned the following: Abraham observed the precepts of the Torah before it had been revealed ("Demonstratio Evangelica," i. 6; compare Yoma 28b); King Hezekiah's sin in omitting a hymn of praise to God after Sennacherib's defeat (commentary on Isa. xxxix. 1; Jerome, *ad loc.*, quotes the same tradition; compare Sanh. 94a; Cant. R. iv. 8; Lam. R. iv. 15); Merodach-baladan's relations to Hezekiah (com. on Isa. xxxix. 1; the same Haggadah is given in Ephraem Syrus' commentary on II Kings xx. 10 ["Opera Syriaca," i. 562], as in one of Jacob of Edessa's scholia: compare Sanh. 96a). The traitor Shebna was a high priest (compare Lev. R. v.), treacherous (compare Sanh. 26a) and sensual (*ib.*), as Eusebius asserts in the name of ὁ Ἑβραῖος (com. on Isa. xii. 10, 11; Jerome makes the same statement *ad loc.*). The passage Zech. xi. 8 received very early the following Christological interpretation: After the advent of Jesus, the three powerful estates, kings, priests, and prophets, disappeared from Israel ("Demonstratio Evangelica," x. 1). Jerome, on Zech. xi. 8, quotes it only to reject it, preferring the Jewish exegesis, which applies the text to Moses, Aaron, and Miriam; but he does not credit it to the Jews: compare also Pseudo-Philo ("Jewish Quarterly Review," x. 321), and Mekilta xvi. 35; Seder 'Olam Rabba x.; Ta'anit 9a. Something similar is found in Aphraates on Num. xx. 1.

Acceptance by Church Fathers of Haggadot.

Aphraates gives the above as a self-evident exegesis without mentioning its Jewish origin. He does the same with his numerous other Haggadot, which were doubtless derived from the Jews. Ephraem Syrus likewise gives his Haggadot in the name of scholars (אנשין מן ספרא), expounders (אנשא מן מפשקנא), etc., but never in the name of Jews. The Haggadot, however, were so generally accepted, that their Jewish origin gradually came to be forgotten. Ephraem Syrus, for instance, says, on Gen. xi. 29, that Sarah was called "Iscah" on account of her beauty; but this Haggadah is already found in Seder 'Olam R. ii. His explanation of Gen. xxxvi. 24 is similar to that found in Onkelos and the Samaritan Version. On II Kings iv. he has the same Haggadah about Obadiah's wife that is found in the Targum Yerushalmi and in part in Ex. R. xxxi. These and similar passages prove Ephraem's knowledge of Hebrew—a knowledge which many investigators have unjustly disputed.

Jerome's Wide Knowledge of Hebrew Tradition.

But the one most conversant with Jewish traditions, and their greatest admirer, is Jerome. His "Quæstiones Hebraicæ in Genesin" form an almost uninterrupted series of such traditions; and he quotes them frequently in his other writings also. They are mostly historical episodes as additions to Bible history, which he calls either "traditiones" or frequently "fabulæ." These Haggadot were not only imparted to him orally by his Jewish teachers, but, remarkably enough, he also read Midrashic works himself. He says, for example, on Jer. xxix. 21: "Nec legitur in synagogis eorum"; on Zech. iv. 2: "Hæc ab Hebræis dicta reperimus." Yet he speaks of these traditions as if they were a secret doctrine, "arcanæ eruditionis Hebraicæ et magistrorum synagogæ recondita disciplina" (Zech. vi. 9). He is also the only Church Father who is acquainted with the technical terms of the Hebrew tradition; for instance: "hoc Scriptura nunc dicit" (זה שאמר הכתוב): "hoc est quod dicitur" (הדא הוא דכתיב): "non debemus legere," or "non legi potest" (אל תקרי). He knows and applies the method of "notarikon" or "gematria" (on Nahum iii. 8, on Haggai i. 1). This technical knowledge has so far been noted only in Barnabas' writings.

The haggadic elements in Jerome are so numerous that they would fill volumes; some of the more noteworthy ones may be mentioned here. On Eccles. iv. 13 he quotes a lost Midrash of R. Akiba, which has come down only anonymously (compare Eccl. R. iv. 13; Abot de-R. Nathan, version ii., ch. 4; Midr. Ps. ix. 5) and in secondary sources. He is entirely unsupported, however, in his view that Elihu (in Job) and Balaam are identical ("Quæst. Hebr. in Gen." xxii. 21).

On Ezek. xlv. 13, 14 Jerome quotes a halakic Midrash which treats of the heave-offering (compare Yer. Terumot vi. 1, 42d). Epiphanius also knew this; the Pharisees are said to have offered τριακοντάδες τε καὶ πεντηκοντάδες (Hilgenfeld, "Judenthum und Juden-Christenthum," p. 73, Leipsic, 1886). On Zech. xi. 13 he has a curious Haggadah on the number of the affirmative and negative precepts; a closer investigation shows that he has preserved this Haggadah more correctly than it is found in Jewish sources ("Jewish Quarterly Review," vi. 258; Jacob Bernays, "Abhandlungen," i. 252).

The Church Fathers who lived after Jerome knew less and less about Judaism, so that the history of the later periods is no longer of any interest in this connection.

Polemics: The dialogue between Justin and the Jew Tryphon is remarkable for the politeness with which Jews and Christians speak of one another; later on, however, examples are not wanting of passionate and bitter language used by Christians and Jews in their disputations. Origen complains of the stubbornness of the Jews (Homily x., on Jer. viii.), and accuses them of no longer possessing sound knowledge (*l.c.* iii.). Ephraem Syrus assumes a very insulting tone toward the Jews; he calls them by opprobrious names, and sees in them the worthless vineyard that bears no good fruit. Like Eusebius, who used the misfortunes of the Jews for polemic purposes (com. on Ps. lviii. 7–12), Ephraem sees in their wretched condition the visitation of God (on Gen. xlix. 8); because the Jews "betrayed Christ," they were driven from their country and condemned to perpetual wandering (on II Kings ii., toward the end). After Jerome has enumerated all the countries whither the Jews had been dispersed, he exclaims: "Hæc est, Judææ, tuarum longitudo et latitudo terrarum" ("Epistola cxxix. ad Dardanum").

What especially angered the Christians was the fact that the Jews persisted in their Messianic hopes. In his sermon against the Jews Ephraem says: "Behold! this people fancies that it will return; after having provoked God by all its ways, it awaits and expects a time when it shall be comforted." Ephraem, as well as Justin and Origen, mentions that at this period Judaism was receiving numerous accessions from the ranks of paganism, a phenomenon ascribed by the Church Fathers to the machinations of Satan.

Jerome, on the other hand, speaks with great eloquence of the Messianic hopes of the Jews. Many Messianic passages of the Bible were applied by the latter to the emperor Julian, others to the distant future, differences which resulted in interminable polemics. The Church Fathers looked upon the Jews as demons, upon their synagogues as houses of Satan; Rufinus mockingly styles Bar Ḥanina, Jerome's Jewish teacher, "Barabbas," and Jerome himself a rabbi. The one word "circumcisio" was used to condemn the whole of Judaism; the Jews, they said, took everything carnally (*σωματικῶς*), the Christians took all things spiritually (*πνευματικῶς*).

The writings of Jerome vividly portray the character of the polemics of that period. The Christian who should undertake to dispute with the Jews had to be learned in doctrine (Preface to Psalms). But these disputations must be held lest the Jews should consider the Christians ignorant (on Isa. vii. 14). The proceedings were very lively. Reference is made, even if only figuratively, to the planting of the feet against each other, to the pulling of the rope, etc. (*l.c.*). It is incredible that the Jews were so frantic as to "scream with unbridled tongues, foaming at the mouth, and hoarse of voice" (on the Epistle to Titus, iii. 9). Nor is it probable that the Jews "regretted when they had no opportunity to slander and vilify the Christians" (Preface to Joshua), although the Jews of that age show no diffidence in sustaining their part in these discussions. They were accused of avoiding questions that arose on the more difficult passages of the Bible (on Isa. xliv. 6), which proved simply that they wanted to avoid disputations altogether. But the Jews had allies in their opinions; for pagans and Christian sectaries agreed with them on many points, drawing upon themselves the polemics of the Church Fathers.

Disputations Between Jews and Christians.

Avowed Attacks on Jews.

Of the numerous polemical works directed against the Jews, only a few can be mentioned here. Of Clement's work, "Canon of the Church, or Against the Judaizers" (Κανὼν 'Εκκλησιαστικὸς ἢ Πρὸς τοὺς 'Ιουδαΐζοντας; Eusebius, "Historia Ecclesiastica," vi. 13), only a few fragments have been preserved. Origen's famous work, "Contra Celsum," is directed no less against the Jews than against the pagans, since Celsus had brought forward many Jewish doctrines. Eusebius' "Demonstratio Evangelica" was avowedly a direct attack on the Jews (see i. 1, 11). Aphraates' Homily xix. is largely directed against the Jews, and Homilies xi., xiii., xv. denounce circumcision, the Sabbath, and the discrimination between clean and unclean food, "of which they are proud."

A little work of Novatian, formerly ascribed to Tertullian ("Epistola de Cibis Judaicis," Leipsic, 1898, ed. G. Landgraf and C. Weyman, reprinted from "Archiv für Lateinische Lexicographie und Grammatik," xi.), is also directed against the Jewish dietary laws. Isidore of Seville has copied this work almost verbatim in his "Quæstiones in Leviticum," ix. Presumably also by Novatian, and thus of the fourth century, is the treatise "Adversus Judæos," often ascribed to Cyprian; this is, however, somewhat conciliatory in tone (Landgraf, in "Archiv," xi. 1897). In Tertullian's works there is also found a treatise, "Adversus Judæos," similar in many ways to Cyprian's "Testimonia," both having drawn upon the older work, "Altercatio Simonis Judæi et Theophili Christiani" (P. Corssen, Berlin, 1890); in the "Altercatio" the Jew is converted.

After Julian's death Ephraem composed four hymns: against Emperor Julian the Apostate, against heresies, and against the Jews (in "S. Ephraemi Syri Carmina Nisibena," ed. Bickell, Latin transl., Leipsic, 1866; and Overbeck, "S. Ephraemi Syri Aliorumque Opera Selecta," Syriac text, Oxford, 1865). Connected with these in time as well as in subject are the six sermons of John Chrysostom against the Jews ("Homilies," i.). In these he bitterly complains of the Christians for still clinging to Jewish customs, a circumstance mentioned by other Church Fathers as well. Jerome gives striking examples in his commentaries on Matt. xxiii. 5 and on Ezek. xxxiii., and more characteristic still are the following words of his: "The Jewish laws appear to the ignorant and the common people as the very ideals of wisdom and human reason" ("Epistola cxxi. ad Algasiam"). This attitude of the multitude was of course earnestly combated by the Church Fathers; thus an anonymous work mentioned by Photius ("Myriobiblion," ed. Migne, p. 390) is directed against the Jews and against those who, like the Jews, celebrated Easter on the 14th of Nisan. Epiphanius' celebrated work "Adversus Hæreses," as also his "Ancyrotus," treats of the Jewish faith; regarding it only as a third religious system, to be reckoned alongside of Scythism and Hellenism, while the only divine revelation is Christianity. The founder of Christian dogmatics, Augustine, in defiance of all dogmatic principles of classification, groups Jews, heathens, and Arians in one class ("Concio ad Catechumenos").

The points animadverted upon by the Church Fathers are manifold; they include such fundamental laws as those of the Sabbath, concerning the transfer of which to Sunday Justin already treats ("Dialogue," ch. 24)—a change which was opposed by Origen (compare Diestel, "Geschichte des Alten Testaments," p. 37), and which Origen (commentary on Rom. vi. 2) and Jerome ("Epistola cxxi. ad Algasiam") seek to prove to be impossible of observance ("Grätz Jubelschrift," p. 191). Circumcision, which is also violently assailed by Origen (see Diestel, "Gesch. des Alten Testaments," p. 37), the dietary laws, and many minor matters, such, for instance, as the washing of the hands, are made in turn to serve as subjects of polemical writing (Origen, commentary on Matt. xi. 8). Indeed, the Church Fathers even in the fourth century afford more information concerning the observance of the Levitical laws of purity than the rabbinical sources, Neubürger (in "Monatsschrift," 1873, p. 433) to the contrary notwithstanding.

Baseless Charges Against the Jews.

Jerome says ("Epistola cix. ad Riparium") that the Samaritans and the Jews considered not only the bodies of the dead as unclean, but also the utensils in the house containing a corpse. Probably in consequence of the Levitical laws of purification the Jews, as well as the Samaritans and heretics, avoided contact with the Christians, a fact of which Jerome bitterly but most unjustly complains (on Isa. lxv. 4). Equally preposterous is it when Justin accuses the Jews, even their rabbis and sages, of immorality ("Dialogus cum Tryphone," cxxxiv., cxli.). A characteristic polemical sentence of Tertullian may well be added in this connection: "We have everything in common, except our women; you have community only in that respect" (see Hefele, "Beiträge zur Kirchengesch." i. 16, Tübingen, 1864).

Perhaps more plausible, though often discussed and denied in more recent times, is the charge of the Church Fathers Justin, Origen, Epiphanius, and

Jerome that the Jews revile and curse Jesus—that is, Christianity—three times a day in their prayers ("Jewish Quarterly Review," v. 130, ix. 515; compare Wulfer, "Adnot. Theriaca Judaica," p. 305; Krauss, "Das Leben Jesu," p. 254, Berlin, 1902).

Dogmatic questions, of course, were the subject of controversy—never-ending questions on the abrogation of the Mosaic law, the person of the Messiah, etc. Yet there was some agreement between Christians and Jews in such matters as Antichrist (see Irenæus, *passim*; Hippolytus, "De Antichristo"; compare "Revue Etudes Juives," xxxviii. 28, and Bousset, "Der Antichrist," Göttingen, 1895), chiliasm (Ephraem Syrus on II Kings iv. 35; compare Sanh. 97a; 'Ab. Zarah 9a; and other Church Fathers), angelology, the Resurrection, etc.

Skill of Jews in Controversy.

The ability of the Jews to cope successfully with the Christians in these controversies is due to the fact that they were well versed in all the questions under discussion. Jerome assumes that in Scriptural questions every Jew is able to give satisfactory replies (Preface to Samuel). The Jews, moreover, were acquainted not only with the original text, but also with the Septuagint, the Apocrypha, Aquila's version, and in general with all works relating to Holy Writ. No sooner had Apollinaris Laodicinus' writings appeared than the Jews read and discussed them (Jerome on Eccl. v. 17).

Especially noteworthy is the fact that the Jews were as well versed in the New Testament as in the Old, being able to explain difficulties therein that puzzled even the officially appointed Christian teachers (*idem* on Isa. xi. 1). Ephraem Syrus asserts, curiously enough (Sermon xxv., in Zingerle, "Bibliothek der Kirchenväter," ii. 271), that the Jews admitted that John the Baptist really had appeared. Origen relates a Jewish tradition concerning Judas Iscariot (on Matt., Com. ser., § 78). Jerome is therefore to be believed when he says that the Jews were often in a position to applaud their own champions (on Ezek. xxxiii. 33), which they did in a sensational way (*ib.* xxxiv. 3). Chrysostom also taxes the Jews with their theatrical manner ("Opera," ed. Montfaucon, i. 656), and before him the just and cautious Justin says the same thing ("Dialogus cum Tryphone," cxxii.).

The Old Testament and the Apocrypha: The main object of the Christian endeavor was to wrest the Old Testament from the Jews and to make of it a Christian weapon. Therefore, as Jerome says (on Micah vii. 9), the Jews were hoping that in the Messianic times the Law and the Prophets would be taken away from the Christians and given to the Jews exclusively (compare the polemic passage in Ex. R. xlvii.). To accomplish their purpose the Christians made use of the allegorical exegesis as developed by Philo and other Jewish Hellenists. The literal meaning, says Origen, is good enough only for the Jews, in order that nothing may be applied to Jesus. Only Isidor of Pelusium had sense enough to warn against applying the whole of the Old Testament to Jesus, lest the Jews and pagans find cause for ridicule (Epistles, i., ep. cvi.; ii., ep. cxcv.). Nevertheless the whole Christian Church fell into this exaggeration; and into what absurdities they were led is shown by the following examples: Sarah and Hagar, already explained allegorically by Paul (Gal. iv. 24), are, according to Clement ("Stromata," i. 5), wisdom and the world. The two women who appeared before Solomon symbolize the Synagogue and the Church; to the former belongs the dead child; to the latter, the living one, that is, the Jewish faith is dead; the Christian faith is living (Ephraem Syrus on I Kings iii. 6). These might pass; but it becomes mere childishness when David is made to signify old and worn-out Israel, but Abishag Jesus (on I Kings i. 1). Equally unnatural is the assertion of Fulgentius in his "Epistola Synodica" (in Hefele, "Conciliengesch." 2d ed., ii. 699), that Esau represents the "figura populi Judæorum," and Jacob the people destined to be saved. The Jews made things much more easy by looking upon themselves as Jacob, and upon the Christians as Esau or Edom. At disputations the Christians knew in advance how the Jews would interpret certain passages. "If we ask the Jews who that daughter is [Ps. xlv.], I do not doubt that they will answer: the synagogue" (Jerome, "Epistola xlii. ad Principiam"). The Jews therefore not only opposed the Christian exegesis with the literal sense, but also had ready allegorical interpretations of their own.

Christians and the Jewish Hellenists.

Only Tertullian and Irenæus were rational enough to follow the simple literal meaning. The so-called school of Antioch, whose most eminent representatives were Theodore of Mopsuestia and Theodoret, also taught a wholly rational exegesis; although the disciples of this school, such as Cosmas Indicopleustes, used the allegorical and typical methods extensively (Barjean, "L'Ecole Exégétique d'Antioche," Paris, 1898). Still, it can not be denied that other Church Fathers, and above all Jerome, did excellent work in simple exegesis.

Corrupted Texts of the Bible.

Good exegesis depends upon a good text, and this the Christians did not possess; for the copies of the Bible circulating among them were corrupt in a number of passages. At a certain disputation between Jews and Christians, the former, naturally enough, referred to these mistakes, and mocked their opponents for allowing such obvious blunders. Jewish arguments of that kind are often quoted by Justin, Origen, Jerome, and other fathers. In order to free the Church from the just reproaches of the Jews on this score, Origen undertook his gigantic work, the Hexapla (Epiphanius, "De Ponderibus et Mensuris," ii.), in which he frequently restores the Jewish reading (*e.g.*, homily on Num. xvi. 4; Com. on Rom., books ii., xiii.; compare Rufinus, "Apologia s. Invectiv. in Hieronymum," book v., chap. iv.). Justin is honest enough to reject a manifest Christological gloss, the notorious *ἀπὸ τοῦ ξύλου*, which was said to be the reading in Ps. xcvi. (xcv. 10), interpolated in the Greek version ("the Lord reigned from the wood"). Aside from Justin ("Dial. cum Tryphone," lxxiii.), this interpolation is found only in the Latin fathers—Tertullian, Ambrose, Augustine, Leo, and Gregory the Great—who indulge in much nonsense concerning the words "a ligno." Augustine ("De Civitate Dei," xvi. 3) had a text in Gen. x. 2 in which not seven but eight sons of Japheth were mentioned, a reading that is found in none of the known texts. Hence the Jews rejected all translations, recognizing at most Aquila's "secunda editio," because this was correct (*κατὰ ἀκρίβειαν*; Jerome on Ezek. iv. 15). Jerome is the only Church Father who, as against the Septuagint, constantly refers to the "Hebraica veritas." At great cost he had a Bible copied for himself by his Jewish friend ("Adversus Rufinum," book ii.), who borrowed for him, although with "pia fraus," the copies belonging to the synagogue ("Epistola xxxvi. ad Damasum"). Nevertheless, even Jerome accuses the Jews of tampering with the text of the Bible (Mal. ii. 2); and thereafter the accusation constantly recurs.

The Christians fared no better with the Apocrypha, which they rated altogether too high, although these at times offended good taste. Origen fared badly at the hands of the Jews with his apocryphon Susanna ("Epistola ad Africanum de Historia Susannæ," v.) nor was Jerome's obscene legend to Jer. xxix. 21—a legend which is evidently connected with this apocryphon (see N. Brüll's "Jahrbücher," iii. 2), favorably received by the Jews. Jerome (on Matt. xxvii. 9) claims to have received an apocryphon on Jeremiah from a Jewish Nazarite, and to have found in a Hebrew book ("Epistola xxxvi. ad Damasum," "in quodam Hebræo volumine") a history of Lamech; but his Jewish teacher speaks contemptuously of the additions to Daniel, as having been written by some Greek (Preface to Daniel). See BIBLE CANONS.

The importance of the Church Fathers for Jewish learning, already recognized by David Ḳimḥi and Azariah dei Rossi, becomes evident, if one considers that many sentences of Talmud and Midrash can be brought into the right perspective only by the light of the exegesis and the polemics of these Christian writers. Therefore modern Jewish learning turns, although not yet with sufficient eagerness, to the investigation of the works of the Church Fathers.

T. S. KR.

CHURRIKER, ABRAHAM DAVID: Beni-Israel soldier and police officer; born 1822; died at Puna Nov. 2, 1867. He enlisted in the Third Regiment of the Bombay Native Light Infantry, in which he served in the Punjab army in the years 1848–49, being present at the siege of Mutan and the battle of Gujarat (1849), after which he obtained the Punjab medal with two bars, and was promoted to the rank of subedar in 1853. In 1855 he was made native commandant of the Ahmednuggur police. During the Mutiny he served against the rebel Bhils at the battles of Tursia, Donger, and Punchalla, and received the Order of Merit of the third class for his gallantry. He was subsequently appointed assistant superintendent of police at Puna (March 16, 1863), and died while serving in that capacity. He was held in such esteem that he was appointed chairman of the Puna municipality.

CHUSHAN-RISHATHAIM (R. V., **Cushan-rishathaim**).—**Biblical Data:** A king of Mesopotamia, or, more specifically, of Aram-naharaim ("Aram of the two rivers"), probably a kingdom in northern Mesopotamia (see ARAM). He was the first of the oppressors of Israel in the time of the judges. The tyrant, who held Israel in subjection for eight years after Joshua's death, was finally conquered by the Judahite judge OTHNIEL, who freed Israel from his rule (Judges iii. 8 *et seq.*).

——**Critical View:** Critics (see Moore's commentary to Judges iii.) consider that the two statements: (1) that the land of Israel was conquered by an early Aramaic king, and (2) that the Israelites were freed by a Judahite hero, are contradictory. In all probability the ancient Judean clans had practically no connection with Israel, and, in fact, would not aid the Israelites in Deborah's insurrection (see Judges v.). Budde ("Richter und Samuel," p. 95) also denies the possibility of Israel having been helped by Othniel. He thinks that the later editor of Judges was a Judean who arranged the story so as to give his own tribe a representative among the judges. On the other hand, there is no reason to doubt the truth of the tradition that Arameans may at one time have held Israel in subjugation.

The name "Chushan-rishathaim" appears nowhere outside of the Biblical record. It has not yet been found on the cuneiform monuments; and no satisfactory explanation of its derivation has been given.

J. JR. J. D. P.

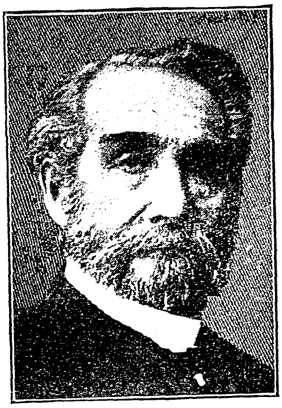
CHWOLSON, DANIEL ABRAMOVICH: Russian Orientalist; born at Wilna Dec. 15, 1819. As he showed marked ability in the study of Hebrew and Talmud, his parents, who were very religious, destined him for the rabbinate, and placed him at the yeshibah of Rabbi Israel Günzburg; but fate had decided that he should serve his race in a quite different sphere. Up to his eighteenth year he did not know any other language than Hebrew; but in three years, without the aid of a teacher, he acquired a fair knowledge of German, French, and Russian. Chwolson in 1841 went to Breslau, and, after three years' preparation in the classical languages, entered, in 1844, the Breslau University, where he devoted himself to the Oriental languages, especially Arabic. There he studied until 1848 and in 1850 he received the degree of doctor of philosophy at the Leipsic University. On his return to his native country he settled at St. Petersburg, and in 1855, being highly appreciated in learned circles, and having embraced Christianity, he was appointed extraordinary professor of Oriental languages in the university. Three years later he received a similar appointment in the Dukhovnaya Akademiya. In 1856 the Imperial Academy issued, at its own expense, Chwolson's first work, which at once established the authority of its author in the field of Oriental research. It was a contribution to the history of religion, entitled "Die Ssabier und der Ssabismus," in two volumes. Three years later Chwolson published another important work entitled "Ueber die Ueberreste der Altbabylonischen Literatur in Arabischen Uebersetzungen" (St. Petersburg, 1859; also in Russian under the title "Novootkrytie Pamyatniki," in "Russki Vyestnik," 1859). This work made a great sensation among scholars by the importance of its discoveries and by Chwolson's brilliant combinations concerning the old Babylonian monuments. It was followed in 1860 by "Ueber Tammuz und die Menschenverehrung bei den Alten Babyloniern" (*ib.* 1860).

His Life-Work.

His reputation being now firmly established, Chwolson devoted himself to his life-task; namely, the defense of his former coreligionists. For blood accusation had been brought against the Jews of Saratov in 1857, and the government now summoned a commission of scholars to see whether any passages could be found in Jewish literature recommending the use of Christian blood for ritual purposes. Chwolson, who was appointed a member of the commission, wrote a report in which he fully demonstrated the groundlessness of the accusations in general, and pointed out that in this particular case of Saratov the evidence given by the two principal witnesses was full of contradictions and absurdities. As the investigation extended over a period of nine years, Chwolson, fearing that meanwhile the Jews of Russia would suffer under this accusation, secured permission to publish his memoir. It accordingly appeared in 1861, in the "Biblioteka dlya Chteniya," under the title "O Nyekotorykh Srednovyekovykh Obvineniyakh Protiv Yevreyev."

His Defense of the Talmud.

In 1877 Chwolson had the mortification of seeing a new blood accusation brought against Jews at Kutais, Transcaucasia. At the same time several Russian anti-Semitic writers undertook a campaign against the Talmud, repeating the old charge that it contained blasphemies against Jesus. Chwolson again took up the defense of the Jews, and republished his memoir with many additions (St. Petersburg, 1880). A German edition of this work appeared in the year 1901 under the title "Die Blutanklage und Sonstige Mittelalterliche Beschuldigungen der Juden," Frankfort-on-the-Main. In this edition Chwolson, before entering into a discussion of the blood question, expounds the history of the Talmud, and shows that the "Pharisees" condemned by Jesus in the Gospels were not the Rabbinites in general, since the latter were the advocates of progress at the period of Jesus in history; that he meant by the term rather a certain class of false Pharisees, who were condemned in rabbinical literature also; and that it was not the Pharisees, but the Sadducees, who were the enemies and persecutors of Jesus. He further demonstrates that, according to Talmudical law, Jews were bound to look upon the Christians as their brethren, and that intolerance toward other religions was not a characteristic of the Talmudists. The assertions to the contrary are due partly to misconception, partly to hatred.



Chwolson

The deep-rooted belief that Jesus was crucified by the Jews being the principal cause of the prejudice against them on the part of the Christians, Chwolson, in a dissertation entitled "Poslyedniyaya Paskhalnaya Vecherya Isusa Christa i Den yevo Smerti," in "Christianskoe Chtenie," St. Petersburg, 1875 (German translation, "Das Letzte Passamal Christi," *ib.* 1892), shows the groundlessness of this belief. He points out that the proceedings of the trial and condemnation of Jesus, as related in the Gospels, were in violation of the rabbinical laws, and consequently could not have been conducted by a Jewish tribunal.

Other Works.

The Jewish race, as well as the Jewish religion, was defended by Chwolson. In a work entitled "Kharakteristika Semitskikh Narodov," in "Russki Vyestnik," 1872 (German ed., Berlin, 1872), he draws a parallel between the distinguishing characteristics of the Jew, the representative of the Semitic race, and those of the Greek, the representative of the Aryan peoples, not always to the advantage of the latter. The pamphlet was translated into English under the title "The Semitic Nations," Cincinnati, 1874.

Chwolson is also the author of the following works: "Statistische Nachrichten über die Orientalische Facultät der Universität zu St. Petersburg," Leipsic, 1861; "Achtzehn Hebräische Grabschriften aus der Krim," in the "Mémoires" of the St. Petersburg Academy of Science, 1865 (Russian translation, "Vosemnadtzat Nadgrobnykh Nadpisei iz Kryma," St. Petersburg, 1866); "Izvyestiya o Khazarakh," St. Petersburg, 1869 (notes on the Chazars, Burtars, Madjars, Slavs, and Russians from the Arabic of Ibn Dasta); "Novotkryty Pamyatnik Moavitskavo Tzarya Meshi," *ib.* 1870; "O Vliyanii Geograficheskavo Polozheniya Palestiny na Sudbu Yevreiskavo Naroda," *ib.* 1875 (reprinted in "Sbornik Budushchnosti," ii. 1-4); "Vozmozhny li v Turtzii Reformy?" *ib.* 1877 (on the Turkish reform); "Die Quiescentes He, Waw, und Iod in der Althebräischen Orthographie," Leyden, 1878 (Russian trans. in "Christianskoe Chtenie," St. Petersburg, 1881; English transl.

by T. K. Abbott, Dublin, 1890); "Upotreblyayut li Yevrei Christianskuyu Krov?" 2d ed., St. Petersburg, 1879; "O Muimoi Zamknutosti Yevreyev," *ib.* 1880; "Corpus Inscriptionum Hebraicarum," *ib.* 1882 Russian translation, *ib.* 1884); "Predvaritelnaya Zamyetka o Naidennykh v Semiryechenskoi Oblasti Siriskikh Nadgrobnykh Nadpisyakh," *ib.* 1886; "Syrische Grabschriften aus Semirjetschie," *ib.* 1890, in "Mémoires" of the St. Petersburg Academy; "Hat es Jemals Irgend Einen Grund Gegeben, den Rüsttag des Jüdischen Passahfestes als *Πρώτη τῶν Ἀζύμων* zu Bezeichnen?" in "Zeitschrift für Wissenschaftliche Theologie," v. 38. Leipsic, 1896; "Staropechatnyya Yevreiskiya Knigi," on the Hebrew incunabula, St. Petersburg, 1897 (Hebrew transl., "Reshit Ma'ase ha-Defus," Warsaw, 1897). Mention may be made here of Chwolson's early contributions of Jewish biographies from Arabic sources, especially that of Maimonides by Al-Ḥifta, to the "Orient," 1846.

Chwolson is an indefatigable collector of Hebrew books, and his collection of Hebrew incunabula is one of the most valuable in existence. A catalogue of his Hebrew books was published by him under the title "Reshimat Sifre Yisrael," Wilna, 1897. The Russian government conferred upon Chwolson the title of "Councilor of State" ("Wirklicher Staatsrath").

The learned world in 1899 celebrated Chwolson's literary jubilee by presenting him with a collection of articles written in his honor by prominent European scholars. This was published by Baron David Günzburg under the title "Recueil des Travaux Rédigés en Mémoire du Jubilé Scientifique de M. Daniel Chwolson," Berlin, 1899.

H. R. I. BR.

CICERO, MARCUS TULLIUS: Roman statesman and orator; born 106; died 43 B.C. In 59 he delivered in the Aurelian Forum at Rome a speech in behalf of Flaccus, in which he spoke disparagingly of the Jews; this was perhaps not from conviction so much as in the interest of his client ("Pro Flacco," xxviii.), though in Rhodes he had been the disciple in rhetoric of the anti-Jewish writer APOLLONIUS MOLON. Flaccus being accused, among other things, of having appropriated while proconsul of Asia the moneys contributed for the Jewish Temple by Jews under his jurisdiction, Cicero contended that there was an edict forbidding the exporting of gold from the Roman provinces—a plea that was evidently sophistical, since Judea at that time was a part of the Roman empire. He further said, referring to the Jews: "Justice demands that that barbaric superstition should be opposed; and it is to the interest of the state not to regard that Jewish mob which at times breaks out in open riots. . . . At one time the Jewish people took up arms against the Romans; but the gods showed how little they cared for this people, suffering it to be conquered and made tributary." In the Latin the phrase "and to be preserved" occurs after "made tributary," but these words stultify the rest of the sentence, and seem to have been added later by a Jewish or Christian copyist (Bernays, in "Rheinisches Museum," xii. 464).

It would appear, unless Cicero's words are merely a rhetorical flourish, that the Jews, who insisted on being present on an occasion that concerned them, surrounded the platform, and, supporting each other, became formidable through their numbers. "You know," he said, addressing the plaintiff, "how large the mob is, how it holds together, and what it accomplished in its assemblies." It is not likely, however, that the Jewish mob accomplished anything in this case, for Flaccus was probably discharged (compare Pliny, "Historia Naturalis," xiii. 4).

In the trial of Verres (70 B.C.) Plutarch reports that Cicero, in speaking of one of the accusers, Cecilius, who was suspected of a leaning toward Judaism, made the pun, "Quid Judæo cum Verre?" (What has a Jew to do with a pig?). Finally, in a speech delivered in the Senate, May, 56 B.C., and entitled "De Provinciis Consularibus," Cicero refers to the Jews and Syrians as "races born to be slaves," an expression not uncommon in the mouths of the Romans of his day.

CICIRUACCHIO. See BRUNETTI, ANGELO.

CID, CAMPEADOR RUY DIAZ DE VIVAR (known as **El Cid**): The conqueror of Valencia (1094) and popular hero of the Spanish nation. Lacking money to pay his knights, he negotiated through his nephew, Martin Antolinez, a loan of 600 marks from two wealthy Jews of Burgos, Don Rachel and Don Vidas, and succeeded, despite all their precautions, in defrauding them. According to the "Cronica General de Castilla," the Cid had a Jewish page by the name of Gil, who later assumed his master's name, Diaz, and who is described as a rare example of fidelity. The "Cronica del Cid"—which is reputed to have had its source in an Arabic chronicle written by the Moorish Jew Ibn Alfango, one of the Cid's officials—is in reality a careless compilation of older Arabic, Latin, and Spanish chronicles, and is a much later work than the "Poema del Cid," which appeared about the middle of the twelfth century and bears no traces of Arabic origin or Oriental coloring. The first complete translation of this poem was prepared by O. L. B. Wolff, a Jewish convert to Christianity (Jena, 1850).

CILICIA: Ancient province of southeastern Asia Minor, separated from Syria by the Taurus-Amanus range. In native Phenician inscriptions the name is given as חלך or כלך (Lidzbarski, "Handbuch der Nordsemitischen Epigraphik," i. 274). Originally inhabited by Phenicians and Syrians (Herodotus, vii. 91), Cilicia was only gradually Hellenized from

Name and Situation.

the time of Alexander the Great; and because of its proximity to Syria it was often included in that country, to which it belonged politically. After the death of Alexander it became a Seleucid-Syrian province (I Macc. xi. 14; II Macc. iv. 36); it was afterward a part of Armenia; and from 63 B.C. it belonged to Rome. As a Roman province Cilicia was known to the author of the Book of Judith; although the Babylonian monarchy is referred to therein (Judith i. 7; ii. 21, 25).

Josephus ("Ant." i. 6, § 1) asserts that the *Θάρσος* of the Bible (Gen. x. 4, "Tarshish") is the old name for Cilicia. He expressly identifies *Θάρσος* with *Ταρσός* ("Tarsus"), the renowned capital of Cilicia; but this is philologically impossible. He also makes the prophet Jonah travel to Tarsus in Cilicia ("Ant." ix. 10, § 2), and mentions the country in several other connections. According to Josephus, it was by way of Cilicia that Pompey (63 B.C.) returned from Judea to Rome with Aristobulus as his prisoner ("B. J." i. 7, § 7). Herod with his sons embarked for Cilicia, landing at Eleusa, where he met Archelaus, King of Cappadocia ("Ant." xvi. 4, § 6; "B. J." i. 23, § 4). At times Celenderis in Cilicia, a city otherwise unknown, is referred to ("Ant." xvii. 5, § 1; "B. J." i. 31, § 3). Alexander, a great-great-grandson of Herod, became king of an island of Cilicia by the favor of Vespasian ("Ant." xviii. 5, § 4). The infamous Berenice, after her husband's death, married Polemon, King of Cilicia ("Ant." xx. 7, § 3). Antiochus, King of Commagene, who at first joined the Romans against the Jews, fled to Tarsus in Cilicia, where he was taken prisoner by Pætus ("B. J." vii. 7, §§ 2, 3). Mopsuestia, too, a Cilician city which afterward became celebrated through its Biblical exegesis, is referred to by Josephus ("Ant." xiii. 13, § 4). Cilicians were among the mercenaries of Alexander Jannæus (*ib.* § 5; "B. J." i. 4, § 3) and those of Herod.

In the Talmud.

In the Talmud the country is referred to as "Ḳiliḳah" after the Greek name. The cities of Tarsus, Taurus Amanus, and Zephyrion are mentioned; but it is not certain that the Cilician Zephyrion is intended. The Syrians (Payne Smith, "Thesaurus Syriacus," p. 3602) also mentioned Tarsus and Zephyrus among the important cities of Cilicia; but "Aulon Kilikios" (Targ. Yer. Num. xxxiv. 8) is the name of a place in Moab (compare Josephus, "Ant." xiii. 5, § 4).

That Jews were dwelling in Cilicia is known from Philo ("Legatio ad Caium," p. 36). At the time of the Apostles many Cilician Jews lived in Jerusalem (Acts vi. 9); among them Paul (*ib.* ix. 11, xxi. 39, xxii. 3), whose birthplace was Tarsus, the capital of Cilicia. Nahum, the son of Rabbi Simai, preached in Tarsus (Pesiḳ. R. 15; ed. Friedmann, p. 78b); so that there must have been a congregation and a synagogue there. Some explain the "synagogue of the Tarsiyim" as meaning "people of Tarsus." In Jaffa a Greek epitaph of a Jew, "son of Jose of Tarsus," has been found. Epiphanius ("Hæres." xxx. 11) states that the patriarch Judah, of the fourth century, sent messengers to Cilicia to collect tithes and offerings in every city. In Corycos in Cilicia the sarcophagus of a Jew named Alexander and his wife has been found. In Rome the epitaph of a Jew, "Asaphat of Tarsus" ("Jahrb. Gesch. der Jud." ii. 287), has been deciphered; but the reading is doubtful. Christianity spread rapidly in Cilicia; and this indicates that there were numerous Jews in the province.

Products.

Cilicia produced much wine (Pliny, "Historia Naturalis," xiv. 11), to which reference is often made in the Talmud (Tosef., Sheb. v. 2; Yer. Ḥal. 60b). The Cilician bean is also frequently mentioned (Ma'as. v. 8), as is the so-called "cilicium," a coarse cloth made of Cilician goat-hair (Kelim xix. 1). The word "cilicium" is used by the Vulgate to render the Biblical word שק ("sack"); and in the ecclesiastical life of the Christians it has a certain religious significance. Curly hair on the body is designated as "cilicinus" by the Rabbis (Sifra, ed. Weiss, 76c).

Though Cilicia came under various rulers, it was not until its conquest by the Turks that the Jews of the country attained to any prominence.

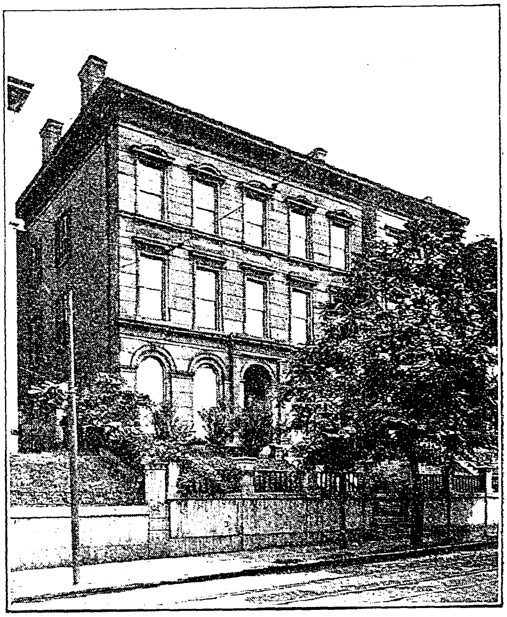
CINCINNATI: Capital of Hamilton county, Ohio, U. S. A. Its Jewish community is the oldest west of the Alleghany Mountains. In March, 1817, Joseph Jonas, a young English Jew, a native of Exeter, arrived at the metropolis of the Ohio valley. He had left his English home with the avowed intention of settling in Cincinnati. Friends in Philadelphia endeavored to induce him to relinquish his purpose of going to a spot so far removed from all association with his coreligionists, and said



Hebrew Union College, Cincinnati, O.

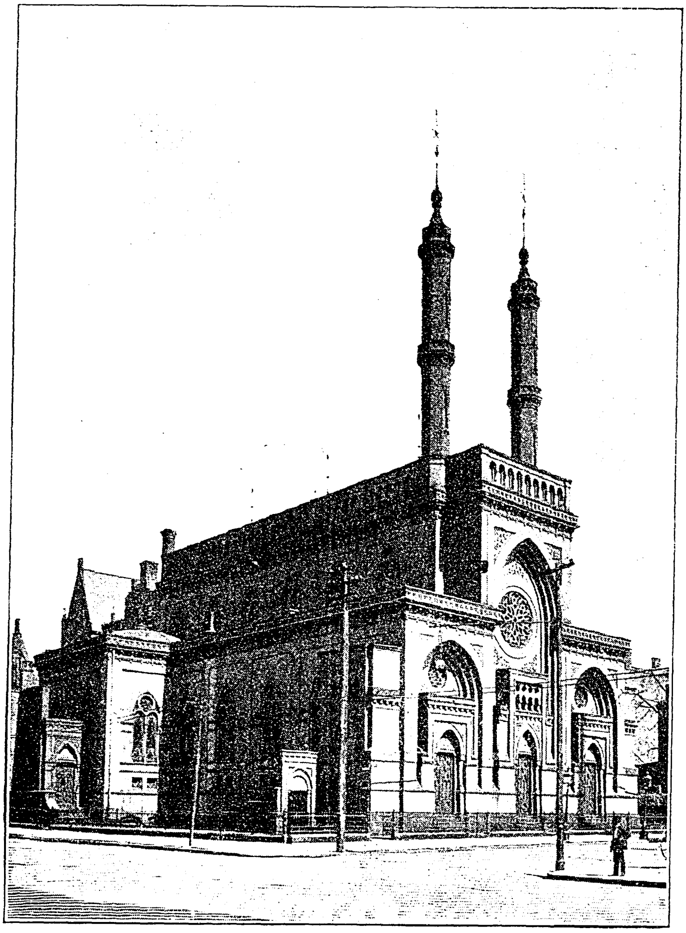
English Jews Settle.

to him: "In the wilds of America, and entirely among Gentiles, you will forget your religion and your God." However, the young man remained deaf to the persuasions of his friends, and persevered in his original purpose. For two years he was the only Jew in the Western town. In 1819 he was joined by three others, Lewis Cohen of London, Barnet Levi of Liverpool, and Jonas Levy of Exeter. These four with David Israel Johnson of Brookville, Ind., a frontier trading-station, conducted on the holidays in the autumn of 1819 the first Jewish service in the western portion of the United States. Similar services were held in the three succeeding falls. Newcomers continued to arrive, the early settlers being mostly Englishmen.



B'ne Yeshurun Temple, Cincinnati, O.
(From a photograph.)

The first Jewish child born in Cincinnati (June 2, 1821) was Frederick A., son of the above-mentioned David Israel Johnson and his wife Eliza. This couple, also English, had removed to Cincinnati from Brookville, where they had first settled. The first couple to be joined in wedlock were Morris Symonds and Rebekah Hyams, who were married Sept. 15, 1824. The first death in the community was that of Benjamin Leib or Lape, in 1821. This man, who had not been known as a Jew, when he felt death to be approaching, asked that three of the Jewish residents of the town be called. He disclosed to them that he was a Jew. He had married a Christian wife, and had reared his children as Christians, but he begged to be buried as a Jew. There was no Jewish burial-ground in the town. The few Jews living in the city at once proceeded to acquire a small plot of ground to be used as a cemetery. Here they buried their repentant coreligionist. This plot, which was afterward enlarged, was used as the cemetery of the Jewish community till the year 1850. At present it is situated in the heart of the city, on the corner of Central avenue and Chestnut street.

There were not enough settlers to form a congregation till the year 1824, when the number of Jewish inhabitants of the town had reached about twenty. On Jan. 4 of that year a preliminary meeting was held to consider the advisability of organizing a congregation; and two weeks later, on Jan. 18, the Congregation B'ne Israel was formally organized; those in attendance were Solomon Buckingham, David I. Johnson, Joseph Jonas, Samuel Jonas, Jonas Levy, Morris Moses, Phineas Moses, Simeon Moses, Solomon Moses, and Morris Symonds. On Jan. 8, 1830, the General Assembly of Ohio granted the congregation a charter whereby it was incorporated under the laws of the state.

For twelve years the congregation worshiped in a room rented for the purpose; but during all this time the small congregation was exerting itself to secure a permanent home. Appeals were made to the Jewish congregations in various parts of the country. Philadelphia, Charleston, S. C., and New Orleans lent a helping hand. Contributions were even received from Portsmouth, England, whence a number of Cincinnatians had emigrated, and from Barbados in the West Indies. On June 11, 1835, the corner-stone of the first synagogue was laid; and on Sept. 9, 1836, the synagogue was dedicated with appropriate ceremonies. The members of the congregation had conducted the services up to this time. The first official reader was Joseph Samuels. He served a very short time, and was succeeded by Henry Harris, who was followed in 1838 by Hart Judah.

Early Religious Institutions.

The first benevolent association was organized in 1838 with Phineas Moses as president: its object was to assist needy coreligionists. The first religious school was established in 1842, Mrs. Louisa Symonds becoming its first superintendent. This school was short-lived. In 1845 a Talmud Torah school was established, which gave way the following year to the Hebrew Institute, established by James K. Gutheim. This also flourished but a short time; for with the departure of Gutheim for New Orleans the career of the institute closed.

Becomes a Jewish Center.

During the fourth decade of the century quite a number of Germans arrived in the city. These were not in sympathy with their English coreligionists, and determined to form another congregation. On Sept. 19, 1841, the B'ne Yeshurun congregation was organized by these Germans, and was incorporated under the laws of the state Feb. 28, 1842. The first reader was Simon Bamberger. In 1847 James K. Gutheim was elected lecturer and reader of the congregation. He served till 1848, and was succeeded by H. A. Henry and A. Rosenfeld. The assumption of the office of rabbi in the B'ne Yeshurun congregation by Isaac M. Wise in April, 1854, and in the B'ne Israel congregation by Max Lilienthal in June, 1855, gave the Jewish community of Cincinnati a commanding position. Owing to their efforts in the cause of Judaism, Cincinnati became a Jewish center indeed and the seat of a number of movements that were national in scope. The Union of American Hebrew Congregations, the Hebrew Union College, the Hebrew Sabbath-School Union, and the Central Conference of American Rabbis have their seat in Cincinnati.

Dr. Lilienthal died in office April 5, 1882. He was succeeded as rabbi of the Congregation B'ne Israel by Raphael Benjamin, who served till Nov., 1888, when the present incumbent, Dr. David Philipson, took charge of the congregation. Dr. Wise served as rabbi of the B'ne Yeshurun congregation till the day of his death, March 26, 1900; being succeeded by his associate, Dr. Louis Grossman. Dr. Grossman had been preceded as associate rabbi by Rabbi Charles S. Levi, who served from Sept., 1889, to Sept., 1898.

Educational Work.

The other congregations of the city are the Adath Israel, organized in 1847; the Ahabath Achim, organized in 1848; and the Sherith Israel, organized in 1855. There are also a number of small congregations. Each of these congregations conducts its own religious school, and there are also two free religious schools; one holding its sessions in the schoolrooms of the Mound street temple (B'ne Israel), and the other, conducted under the auspices of the local branch of the Council of Jewish Women, meeting at the Jewish Settlement. A large Talmud Torah school is conducted by the Talmud Torah Association on Barr street. The Hebrew Union College is located in Cincinnati. Night classes for various English and industrial branches of study are a feature of the work of the Jewish Settlement. The Jewish Kitchen Garden Association conducts a large school for girls in the building of the United Jewish Charities every Sunday morning, where instruction is given in dressmaking, millinery, housekeeping, cooking, stenography, typewriting, and allied subjects. An industrial school for girls is conducted during the summer months in the vestry-rooms of the Plum street temple (B'ne Yeshurun), and one for boys during the school year in the Ohio Mechanics' Institute building. There is a training-school for nurses in connection with the Jewish Hospital.

The Jewish charities of Cincinnati are exceptionally well organized. All the relief and educational agencies joined their forces in April, 1896, and formed the United Jewish Charities. This body comprises the following federated societies: Hebrew General Relief Association, Jewish Ladies' Sewing Society, Jewish Foster Home, Jewish Kitchen Garden Association, Boys' Industrial School, Girls' Industrial School, and Society for the Relief of Jewish Sick Poor. The United Charities also grants an annual subvention to the Denver Hospital for Consumptives and to the local Jewish Settlement Association. The seat of the National Jewish Charities is also in Cincinnati, where the national organization was called into being in May, 1899. Besides the United Jewish Charities, Cincinnati supports the Jewish Hospital and the Home for the Jewish Aged and Infirm, and is one of the largest contributors to the Jewish Orphan Asylum at Cleveland.

The Jews of Cincinnati have always shown great public spirit and have filled many local positions of trust, as well as state, judicial, and governmental offices. Henry Mack, Charles Fleischmann, James Brown, and Alfred M. Cohen have been members of the Ohio senate, and Joseph Jonas, Jacob Wolf, Daniel Wolf, and Harry M. Hoffheimer have been members of the legislature. Jacob Shroder was judge of the court of common pleas for a number of years, and Frederick S. Spiegel now holds (1902) the same position. Julius Fleischmann is the present mayor of the city. Nathaniel Newburgh was appointed appraiser of merchandise by President Cleveland during his first administration, and Bernhard Bettmann has been collector of internal revenue since 1897.

The Jewish newspapers published in Cincinnati are "The American Israelite," established 1854, and "Die Deborah," established 1855; "The Sabbath Visitor," established 1874, was discontinued in 1892.

The Jews of the city were estimated in 1900 at 15,000, in a total population of 325,902.

CINNAMON: The bark of the *Cinnamomum Zeylanicum*, a plant so called botanically because growing best in Ceylon. A variety often substituted for it, cassia, comes from China. Cinnamon was known in early times to the Hebrews. It was used in making the anointing-oil (Ex. xxx. 23), and, further, as a mere perfume (Prov. vii. 17). In the Song of Solomon (iv. 14) it is mentioned along with other fragrant woods. Gesenius and Lagarde consider the Hebrew ("ḳinnamon") to be a loan-word from the Greek (*κιννάμωμον*), although Herodotus (iii. 111) states that the Greeks themselves borrowed it from the Phenicians. It seems that both Hebrew and Greek took it from the Phenician.

CIPHER. See GEMAṬRIA.

CIRCUMCISION (מילה; in Biblical Hebrew, מולה = "the cutting away" of the ערלה = "foreskin").—**Biblical Data:** A religious rite performed on male children of Jews on the eighth day after birth; also on their slaves, whether born in the house or not. It was enjoined upon Abraham and his descendants as "a token of the covenant" concluded with him by God for all generations, the penalty of non-observance being "karet," excision from the people (Gen. xvii. 10–14, xxi. 4; Lev. xii. 3). Aliens had to undergo circumcision before they could be allowed to partake of the covenant-feast of Passover (Ex. xii. 48), or marry into a Jewish family (Gen. xxxiv. 14–16). It was "a reproach" for the Israelite to be uncircumcised (Josh. v. 9; on "the reproach of Egypt" see below). Hence the name "'arelim" (uncircumcised) became an opprobrious term, denoting the Philistines and other non-Israelites (I Sam. xiv. 6, xxxi. 4; II Sam. i. 20; compare Judges xiv. 3; I Sam. xvii. 26), and used synonymously with "ṭame" (unclean) for heathen (Isa. lii. 1). The word "'arel" (uncircumcised) is also employed for "unclean" (Lev. xxvi. 41, "their uncircumcised hearts"; compare Jer. ix. 25; Ezek. xliv. 7, 9); it is even applied to the first three years' fruit of a tree, which is forbidden (Lev. xix. 23).

Original Significance.

This shows how deeply rooted in the minds of the ancient Hebrews was the idea that circumcision was an indispensable act of national consecration and purification. Nevertheless, there are several facts in the Bible which do not seem to be in full harmony with this view. According to Ex. iv. 24–26, the circumcision of the first-born son was omitted by Moses, and the Lord therefore "sought to kill him"; whereupon "Zipporah took a flint and cut off the foreskin of her son, and made it touch [A. V., "cast it at"] his [Moses'] feet," saying, "A bridegroom of blood art thou to me." Thus Moses was ransomed by the blood of his son's circumcision.

Strange as was this omission on the part of Moses, the omission of the rite on the part of the Israelites in the wilderness was no less singular. As recorded in Josh. v. 2–9, "all the people that came out" of Egypt were circumcised, but those "born in the wilderness" were not; and therefore Joshua, before the celebration of the Passover, had them circumcised with knives of flint (compare Ex. iv. 25) at Gilgal, which name is explained as "the rolling away" of "the reproach of Egypt" (see GILGAL).

Attention has also been called to the peculiar attitude of Deuteronomy and the Prophets toward circumcision. Deut. x. 16 (compare *ib.* xxx. 6 and Jer. iv. 4) says, "Circumcise the foreskin of your heart," thus giving the rite a spiritual meaning; circumcision as a physical act being enjoined nowhere in the whole book (see Geiger, "Urschrift," ii. 79, and Montefiore, "Hibbert Lectures," 1892, pp. 229, 337). Jer. ix. 25, 26 goes so far as to say that circumcised and uncircumcised will be punished alike by the Lord; for "all the nations are uncircumcised, and all the house of Israel are uncircumcised in heart." Obviously, the prophetic view of the sacredness of the rite differed from that of the people.

——**Historical View:** Circumcision was known to be not an exclusively Jewish rite. Ishmael was circumcised when thirteen years old; that is, at the age of puberty (Gen. xvii. 25). The rite was, in fact, practised not only in ancient Arabia (Josephus, "Ant." i. 12, § 2; Origen, "Ad Genesin," i. 14; Eusebius, "Preparatio Evangelica," vi. 11; Shahrastani, transl. Haarbrücker, ii. 35, § 4; Sozomen, "Hist. Eccl." vi. 38), but also in Ethiopia (Philostorgius, "Hist. Eccl." iii. 4; Strabo, xvii. 776, 824), as well as by almost all the primitive tribes of Africa and by many of Australia (see R. Andree, "Die Beschneidung," in "Archiv für Anthropologie," 1880, xiii. 53–78; Ploss, "Geschichtliches und Ethnologisches über Knaben-Beschneidung," in "Archiv für Gesch. der Medicin," 1885, viii.; R. Hartmann, "Die Völker Afrikas," 1879, i. 178).

This accumulation of evidence points to the fact that circumcision in its primitive form was connected with marriage, whether performed with a view to the facilitation of cohabitation, as Ploss thinks, or, as is far more in accordance with the psychology of all primitive as well as of all ancient nations, to the consecration of the generative powers. At all events, the age of puberty is most frequently selected for the rite; and, after weeks of purification, accompanied by tests of courage, the boy is formally graduated into manhood and, bearing a new name, is ushered into the bridal chamber (Niebuhr, "Beschreibung von Arabien," p. 269; Andree, *l.c.*). For Egypt the practise is attested not alone by Herodotus (ii. 37, 104), Philo ("De Circumcisione," § 2; ed. Mangey, p. 210), and Ambrosius ("De Abrahamo," ii. 348), but also by the monuments (see Ebers, "Ægypten und die Bücher Mose's," i. 278) and the very valuable Greek text published and discussed by R. Reizenstein ("Zwei Religionsgeschichtliche Fragen," Strasburg, 1901). The rite of circumcision signified admission of the boy at the age of puberty into the rank of priesthood, as "web" (the Egyptian for "pure" or "holy"), the mother's presence being considered especially necessary. In Biblical literature the rite is incidental to the recognition of heirship, and to the adoption of a new name (Gen. xvii. 4–14). Moses' neglect to circumcise Gershom was possibly associated in some way with his (Moses') marriage to a Midianite woman. Zipporah, however, ultimately showed her allegiance to the God of the Hebrews by performing the rite herself. The fact that in Arabic "ḥatana" signifies both "to marry" (compare the Hebrew חתן = "bridegroom," and חותן = "father-in-law") and "to circumcise" shows an original connection between the rite and the nuptial ceremony; whereas the terms "ṭuhur" and "taṭhir" (purification), applied to circumcision in Arabia (see Wellhausen, "Skizzen und Vorarbeiten," 1887, iii. 154 *et seq.*), indicate the later religious view (see also Kohler, in "Z. D. M. G." xxiii. 680, and Nöldeke, *ib.* xl. 737).

The critical view of the Pentateuch, which ascribes Gen. xvii. to the late Priestly Code, and Josh. v. 4-7 to the interpolation of the redactor (see Dillmann, commentary on the passage), sufficiently accounts for the non-circumcision of young Israelites prior to their entrance into Canaan by the following theory: The ancient Hebrews followed the more primitive custom of undergoing circumcision at the age of puberty, the circumcision of young warriors at that age signifying the consecration of their manhood to their task as men of the covenant battling against the uncircumcised inhabitants (see Reizenstein, *l.c.*). After the settlement of the Israelites in Palestine, the rite was transferred to the eighth day after birth. In fixing the time of the initiatory rite at an age when its severity would be least felt, the Mosaic law shows its superiority over the older custom. Explanations which find the origin of circumcision in hygienic motives, suggested first by Philo (*l.c.*) and Josephus ("Contra Ap." ii. 13), then by Saadia ("Emunot we-De'ot," iii. 10) and Maimonides ("Moreh Nebukim," iii. 49), and often repeated in modern times, from Michaelis ("Mosaisches Recht," iv. 184-186) down to Rosenzweig ("Zur Beschneidungsfrage," 1878), who recommends its introduction into the Prussian army, have no other than a historical value.

——**In Apocryphal and Rabbinical Literature:** During the Babylonian exile the Sabbath and circumcision became the characteristic symbols of Judaism. This seems to be the underlying idea of Isa. lvi. 4: "The eunuchs that keep my Sabbath" still "hold fast by my covenant," though not having "the sign of the covenant" (Gen. xvii. 11, Hebr.) upon their flesh. Contact with Grecian life, especially at the games of the arena, made this distinction obnoxious to the Hellenists, or antinationalists; and the consequence was their attempt to appear like the Greeks by epispasm ("making themselves foreskins"; I Macc. i. 15; Josephus, "Ant." xii. 5, § 1; Assumptio Mosis, viii.: I Cor. vii. 18: מישך ערלה, Tosef., Shab. xv. 9; Yeb. 72a, b; Yer. Peah i. 16b; Yeb. viii. 9a). All the more did the law-observing Jews defy the edict of Antiochus Epiphanes prohibiting circumcision (I Macc. i. 48, 60; ii. 46); and the Jewish women showed their loyalty to the Law, even at the risk of their lives, by themselves circumcising their sons.

In order to prevent the obliteration of the "seal of the covenant" (חותם ברית) on the flesh, as circumcision was henceforth called, the Rabbis, probably after the war of Bar Kokba (see Yeb. *l.c.*; Gen. R. xlvi.), instituted the "peri'ah" (the laying bare of the glans), without which circumcision was declared to be of no value (Shab. xxx. 6).

Thenceforward circumcision was the mark of Jewish loyalty. The Book of Jubilees (xv. 26-27), written in the time of John Hyrcanus, has the following: "Whosoever is uncircumcised belongs to 'the sons of Belial,' to 'the children of doom and eternal perdition'; for all the angels of the Presence and of the Glorification have been so from the day of their creation, and God's anger will be kindled against the children of the covenant if they make the members of their body appear like those of the Gentiles, and they will be expelled and exterminated from the earth" (see Charles, "The Book of Jubilees," lv.-lx. iii. 190-192). To be born circumcised was regarded as the privilege of the saints, from Adam, "who was made in the image of God," and Moses to Zerubbabel (see Ab. R. N., ed. Schechter, p. 153; Soṭah 12a). And great importance was laid upon the shedding of a drop of blood as a sign of the covenant when a child or a proselyte born circumcised was to be initiated into Judaism (Shab. 135-137b).

Abrahamic Covenant.

Uncircumcision being a blemish, circumcision was to remove it, and to render Abraham and his descendants "perfect" (Ned. 31b; Gen. R. xlvi., after Gen. xvii. 1). "Isaac should be the offspring of the consecrated patriarch" (Gen. R. *l.c.*). He who destroys the covenant sign of Abraham (by epispasm), has no portion in the world to come (Ab. iii. 17; Sifre, Num. xv. 31; Sanh. 99). According to Pirke R. El. xxix., it was Shem who circumcised Abraham and Ishmael on the Day of Atonement; and the blood of the covenant then shed is ever before God on that day to serve as an atoning power. According to the same Midrash, Pharaoh prevented the Hebrew slaves from performing the rite, but when the Passover time came and brought them deliverance, they underwent circumcision, and mingled the blood of the paschal lamb with that of the Abrahamic covenant, wherefore (Ezek. xvi. 6) God repeats the words: "In thy blood live!"

In the wilderness, however, the Israelites omitted only the peri'ah, according to R. Ishmael; according to the other rabbis, they did not circumcise their children on account of the fatigue of the journey. According to Sifre, Beha'aloteka, 67, and Ex. R. xix., the tribe of Levi was the only one that "kept the [Abrahamic] covenant" (Deut. xxxiii. 9). They had, says R. Ishmael, piled up the foreskins of the circumcision in the wilderness, and covered them with earth. To this Balaam referred when he asked: "Who can count the dust of Jacob?" (Num. xxiii. 10); and for this reason it became customary after circumcision to cover the foreskin with earth.

Loyalty to the Abrahamic covenant was shown by the Gentiles who voluntarily espoused the Jewish faith, but not by the slaves of Abraham upon whom circumcision was enforced, the patriarch having done so only because he wished to conform to the Levitical laws of purity. Nor did Esau practise circumcision in his own household: "he despised his birthright" (Gen. xxv. 34; Tanna debe Eliyahu R. xxiv. [xxii.]). The Ephraimite kingdom also failed to observe the Abrahamic rite; wherefore Elijah swore "there shall not be dew nor rain these years, but according to my word" (I Kings xvii. 1). Elijah's lot was ever to be persecuted by Jezebel; therefore the Lord also swore an oath that no "berit milah" (rite of circumcision) should be celebrated in Israel without the presence of Elijah; hence a chair is always reserved on that occasion for Elijah, "the angel [A. V., "messenger"] of the covenant" (Mal. iii. 1; Pirḳe R. El. xix.; see Elijah's Chair).

Saving Power of Circumcision.

Talismanic powers were ascribed to the sign of the covenant, as also to the phylacteries. According to the rabbis, David, when he saw himself at the bath stripped of the tefillin and other religious insignia, thanked God for the Abrahamic rite protecting him, and sang the Twelfth Psalm, which bears the superscription "‘Al-ha Sheminit" (lit., "on the eighth," explained by the Rabbis as referring to the rite of circumcision; Yeb. 43b; compare *ib.* 53b.) Circumcision causes an angel to save the Israelites from the pangs of Gehenna, to which, according to Ezek. xxxii. 24, the uncircumcised (‘arelim) are consigned (Tan., Lek Leka, ed. Buber, 27; Ex. R. xix.). According to Gen. R. xlviii., it is Abraham who sits at the gate of Gehenna to save the circumcised (see Abraham). "Circumcision is of such importance that heaven and earth are held only by the fulfilment of that covenant [after Jer. xxxi. 35]; and all the merits of Moses could not shield him against the danger to which he was exposed in consequence of the neglect of this command. It is a thirteenfold covenant" (Ned. 34b). But "it is also an occasion of highest joy" (Meg. 16b, with reference to Esth. viii. 16, and Ps. cxix. 162), especially "for the mother" (Giṭ. 57a, with reference to Ps. cxiii. 9), the berit milah having been made the occasion of great festivity from the days of Abraham (Shab. 130a; Pirḳe R. El. *l.c.*; see Banquets).

"Circumcision is one of the commandments which, having been accepted with joy, are ever obeyed with joy, and, because the people gave their lives for them, are observed with steadfast loyalty" (R. Simeon b. Eleazar, in Shab. 130a). This refers to the martyrdom which the Jewish people underwent during the Hadrianic persecution, which was especially directed against circumcision. "We ought to abstain from marrying," said R. Ishmael b. Elisha, "since the Roman [Yawan] government forbids us to celebrate the festival of the birth of a son ["yeshua‘ ha-ben," or "shabua‘ ha-ben"]; but then the world would come to a standstill" (B. B. 60b). "Why art thou, O Israel, led forth to be slain? . . . Because I have circumcised my son! . . . It is the love I show for my Father in heaven" (Mek., Yitro, Ba-Ḥodesh, vi.). "Why did God not make man as he wanted him to be?" asked Tinnius (Tyrannus) Rufus, with biting sarcasm; and Akiba replied, "In order that man should perfect himself by the fulfilment of a divine command" (Tan., Tazria‘, ed. Buber, 7).

Arguments for and Against.

In Gen. R. xlvi. the arguments for and against circumcision are put forth in the form of a dialogue between God and Abraham. Replying to the question why the command had not been given to Adam if it was so dear to Him, God reminds Abraham that it should be sufficient for him that he and God are in the world—a play on "ShADDAI"—and that the maintenance of the world depends upon the acceptance of the commandment. But Abraham objects that circumcision is an obstacle to the conversion of the Gentiles. This trouble, also, is overcome by the declaration of God's sufficiency to protect both Abraham and the world. In fact, circumcision had been deferred from the time of Abraham's conversion—in the forty-eighth year of his life—until his ninety-ninth year, for the express purpose of facilitating the making of proselytes.

Circumcision of Proselytes.

The problem of proselytism, indeed, had stirred Judaism to its very depths, and had almost separated Hellenistic from Palestinian Judaism. The former would admit Gentiles after having undergone the rite of baptism; that is, regeneration by living water (see Sibyllines, iv. 164 *et seq.*: "Wash your whole stature clean from impurity in running streams, and, with hands uplifted to heaven, ask for forgiveness for your doing; then the worship of God will heal gross impiety"). With this view, Josephus relates ("Ant." xx. 2, §§ 3, 4), a Jew named Ananias sought to make converts to Judaism. He succeeded with Queen Helena and the women of the court, and her son Izates was eager to follow her example. But Izates' mother, on hearing of his determination to submit to circumcision also, implored him not to do so, as the people might take umbrage at his act of compliance with strange and abhorrent rites, and overthrow the dynasty. His instructor, Ananias, also tried to dissuade him and to allay his scruples with arguments based on the meritoriousness of his intention, which would atone, in the sight of God, for the non-performance of the rite. But, through the influence of another Jew, Eleazar, from Galilee, the home of the Zealot party, Izates was easily induced to submit to the operation; and he informed both his mother and Ananias of what he had done. He was rewarded for his fortitude and piety; for "God . . . preserved both Izates and his sons when they had fallen into many dangers, and procured their deliverance when it seemed impossible, demonstrating thereby that the fruit of piety is not lost to those who wait for Him and who put their sole trust in Him." Compare the story related in Gen. R. xlvi.: "King Monobaz and Izates, sons of King Ptolemy [an error: read "Monobaz" for "Ptolemy"], read the Book of Genesis together. When they came to the passage xvii. 11 they wept; and each, without the other's knowledge, underwent circumcision. The next time they read the chapter together one said to the other: 'Wo unto me, my brother!' They then disclosed what they had done. Their mother, on hearing of the matter, told their father that they had needed circumcision as a precaution against phimosis, and he signified his approval. As a reward for their action they were saved by an angel from being killed in an ambush during a war in which they had become involved" (compare Grätz, "Gesch." iii. 430 *et seq.*).

The issue between the Zealot and Liberal parties regarding the circumcision of proselytes remained an open one in tannaitic times; R. Joshua asserting that the bath, or baptismal rite, rendered a person a full proselyte without circumcision, as Israel, when receiving the Law, required no initiation other than the purificative bath; while R. Eliezer makes circumcision a condition for the admission of

Circumcision Necessary or Not?

a proselyte, and declares the baptismal rite to be of no consequence (Yeb. 46a). A similar controversy between the Shammaites and the Hillelites is given (Shab. 137a) regarding a proselyte born circumcised: the former demanding the spilling of a drop of blood of the covenant; the latter declaring it to be unnecessary. The rigorous Shammaite view, voiced in the Book of Jubilees (*l.c.*), prevailed in the time of King John Hyrcanus, who forced the Abrahamic rite upon the Idumeans, and in that of King Aristobulus, who made the Itureans undergo circumcision (Josephus, "Ant." xiii. 9, § 1; 11, § 3). According to Esth. viii. 17, LXX., the Persians who, from fear of the Jews after Haman's defeat, "became Jews," were circumcised.

The rigorous view is echoed also in the Midrash: "If thy sons accept My Godhead [by undergoing circumcision] I shall be their God and bring them into the land; but if they do not observe My covenant in regard either to circumcision or to the Sabbath, they shall not enter the land of promise" (Gen. R. xlvi., with reference to Gen. xvii. 8–9). "The Sabbath-keepers who are not circumcised are intruders, and deserve punishment," (גוי ששבת חייב מיתה; Deut. R. i. and Ma'ase Torah, ed. Schönblum; see also Hippolytus, "Refutatio Omnium Hæresium," ix. 21).

It appears, however, that while the Palestinian Jews accepted the uncircumcised proselytes only as "Proselytes of the Gate" ("Gere Toshab," Yeb. 47b; see Proselytes), non-Palestinian Judaism did not make such a distinction until the Roman wars, when the more rigorous view became prevalent everywhere. Thus Flavius Clemens, a nephew of the emperors Titus and Domitian, when with his wife Domitilla he embraced the Jewish faith, underwent circumcision, for which he suffered the penalty of death (see Grätz, "Gesch." iv. 403 *et seq.*, 702).

It was chiefly this rigorous feature of Jewish proselytism which provoked the hostile measures of the emperor Hadrian. And, furthermore, it was the discussion of this same question among the Jews—whether the seal of circumcision, חותם ברית (see Shab. 137b; Ex. R. xix.; Targ. Cant. iii. 8; Hermas, "Similitudines," viii. 6, ix. 16; II Clemens to the Corinthians, vii. 6, viii. 6; Grace at Meals; for heathen parallels of the expression "seal" see Anrich, "Das Antike Mysterienwesen," pp. 123–124, and Reizenstein, *l.c.* pp. 7–8), might not find its substitute in "the seal of baptism"— which led Paul to urge the latter in opposition to the former (Rom. ii. 25 *et seq.*, iv. 11, and elsewhere), just as he was led to adopt the antinomistic or antinational view, which had its exponents in Alexandria (see Philo, "De Migratione Abrahami," xvi.; ed. Mangey, i. 450).

While in Biblical times the mother (perhaps generally) performed the operation, it was in later times performed by a surgeon, רופא or אומן, also called by the specific name "mohel" (מוהל; see Josephus, "Ant." xx. 2, § 4; B. B. 21a; Shab. 130b, 133b, 135, 156a) or "gozer" (גוזר). In the Codex Justinianus (i. 9, 10) physicians were prohibited from performing the operation on Roman citizens who had become converts to Judaism.

Circumcision Not a Sacrament.

Unlike Christian baptism, circumcision, however important it may be, is not a sacrament which gives the Jew his religious character as a Jew. An uncircumcised Jew is a full Jew by birth (Ḥul. 4b; 'Ab. Zarah 27a; Shulḥan 'Aruk, Yoreh De'ah, 264, 1). A non-Jewish physician may, according to R. Meïr, in the absence of a Jewish expert, perform the ceremony, as may women, slaves, and children ('Ab. Zarah 26b; Men. 42a; Maimonides, "Yad," Milah, ii. 1; Yoreh De'ah, *l.c.*), although the more rigorous Shammaite rule was forced by the Amoraim; compare Gen. R. *l.c.*

Circumcision must, whenever possible, take place on the eighth day, even when this falls upon the Sabbath (Shab. xix. 1). The Samaritans and the Karaites, however, dissent from this rule (see Karaites and Samaritans); if by reason of the child's debility or sickness the ceremony is postponed, it can not take place on the Sabbath (Shab. 137a). It is the duty of the father to have his child circumcised; and if he fails in this, the bet din of the city must see that the rite is performed (Ḳid. 29a).

As early as the geonic time the ceremony had been transferred from the house of the parents to the synagogue, where it took place after the service in the presence of the whole congregation. In order to give it the character of a festival certain prayers of a mournful nature, such as "Widduy" and "Taḥanun," were omitted, and occasionally appropriate hymns were recited instead. In the tenth century there appears, in addition to the mohel and the father of the child, the "ba'al berit," also called "godfather" ("sandeḳ" corresponding to the *σύντεκνος*, the godfather in the Greek Church, who lifted the neophyte from the baptismal water). The sandeḳ holds the child on his knees during the operation. As a rule, the wife of the godfather carries the child in and hands it to the mohel, while the congregation greets it with: "Blessed be he that cometh in the name of the Lord" (Ps. cxviii. 26). Beside the chair upon which the sandeḳ is seated another chair is placed, called, as has been stated above, "the chair of Elijah" (see Elijah's Chair). Upon this the mohel places the child, reciting Gen. xlix. 18; Ps. cxix. 156, 162, 166; and the first half of Ps. lxv. 5, the congregation responding with the latter half.

The Ceremony.

He then takes the child from "Elijah's chair" and places it, upon a cushion, in the lap of the sandeḳ, reciting the benediction: "Blessed art Thou, O Lord our God, King of the Universe, who hast sanctified us by Thy commandments, and hast enjoined us to perform the commandment of circumcision." When the operation is over, the father of the child recites the benediction: "Blessed art Thou . . . who hast sanctified us by Thy commandments, and hast enjoined us to make him enter into the covenant of Abraham our father"; and the congregation responds with: "As he hath been made to enter the covenant, so may he also be made to enter the study of the Torah, the ḥuppah [nuptial chamber], and the performance of good deeds." The use of the pronoun "him" in this peculiar benediction of the father, and in the congregational response given in the ancient Baraita (Shab. 137b), seems to indicate that originally the child was named immediately after the circumcision, as was the case in New Testament times (Luke ii. 21; compare Gen. xvii. 5), and that the congregation then blessed the child just named. Hence, also, the prayer recited at the close. Owing to the fact that the original "se'udat berit milah" (see BANQUETS) was later on postponed or changed in character, the two benedictions introducing it are now recited by the mohel, who, taking the cup of wine, says: "Blessed be Thou . . . who hast created the fruit of the vine." "Blessed be Thou . . . who hast sanctified the beloved one [Isaac] from the womb, and hast ordained an ordinance for his kindred, and sealed his descendants with the sign of the holy covenant. Therefore on this account do Thou, O living God, our Inheritance and our Rock, command [Thy angels; see Maimonides, "Pe'er ha-Dor," responsum No. 134] to save Thy beloved kindred [Israel] from the pit [of Gehenna], for the sake of Thy covenant which Thou hast put upon our flesh! Blessed be thou, O Lord, Maker of the Covenant" (Shab. 137b).

Here follows in the liturgy a prayer, preserved from geonic times by Abraham b. Nathan, Tanyah, and Abudrahim, referring especially to the naming of the child: "Our God and God of our fathers! Preserve this child to his father and mother, and let his name be called in Israel N the son of N. Let the father rejoice in him that came forth from his loins, and let the mother be glad in the fruit of her womb; as it is written . . . [Prov. xxiii. 25]: and it is said . . . [Ezek. xvi. 6 (see above); Ps. cv. 8-10; Gen. xxi. 4; Ps. cxviii. 1]. Let the child named N wax great!" Whereupon the congregation again responds, saying: "As he hath entered into the covenant, so may he be permitted to enter the study of the Torah, the huppah, and the performance of good deeds."

Reform Judaism and Circumcision.

After having for centuries been practised as a distinctively Jewish rite, circumcision appeared to many enlightened Jews of modern times to be no longer in keeping with the dictates of a religious truth intended for humanity at large; and its abolition was advocated, and made the shibboleth of the "Friends of Reform" ("Reformfreunde") in Frankfort-on-the-Main in 1843. Under the leadership of Theodor Creizenach, M. Stern of Göttingen, and others, the association published in the "Frankfurter Journal," July 15, 1843, and in "Der Israelit des Neunzehnten Jahrhunderts" of the same year articles in which, besides the abolition of circumcision and the transfer of the Jewish Sabbath to Sunday, the renunciation of historical Judaism in its entirety was declared necessary, and a sort of Jewish Church, based upon the Mosaic monotheism, was recommended. These articles called forth the protests of many rabbis, even in the Reform camp, among whom were Joseph Aub and Samuel Hirsch of Luxemburg (see S. D. Trier, "Rabbinische Gutachten über die Beschneidung," Frankfort-on-the-Main, 1844). A bitter controversy raged in the Jewish congregations and press. Samuel Holdheim took sides with the Radical Reformers; David Einhorn, with a number of other rabbis, opposed the merely negative standpoint of the Frankfurt Reform-Verein, but emphatically indorsed the view that he who disregards the law of circumcision, whatever the motive may be, is nevertheless a Jew, circumcision having no sacramental character. Zunz and Aub, however, endeavored to attribute to circumcision a semi-sacramental character (see CEREMONIES); but Geiger, who, in his private correspondence with Stern, sympathized with the Radical Reformers, objected, with others, to this arbitrary position (see Geiger, "Gesammelte Schriften," v. 174, 181). On the other hand, Samuel Hirsch, in a series of discourses on the Messianic mission of Israel (1843), preached a sermon on the symbolic value of circumcision.

In 1847 Einhorn, as chief rabbi of Mecklenburg, became involved in a controversy with Franz Delitzsch of Rostock, who denounced him for acting contrary to Jewish law in naming and consecrating an uncircumcised child in the synagogue. Einhorn, in an "opinion," published a second time in his "Sinai," 1857, pp. 736 *et seq.*, declared, with references to ancient and modern rabbinical authorities, that a child of Jewish parents was a Jew even if uncircumcised, and retained all the privileges, as well as all the obligations, of a Jew. This view he also expressed in his catechism, his prayer-book, and his sermons, emphasizing the spiritual character of the Abrahamic covenant—"the seal of Abraham placed upon the spirit of Israel as God's covenant people."

The abolition of circumcision in the case of proselytes, on the ground of its being a measure of extreme cruelty when performed upon adults, was proposed by Isaac M. Wise at the rabbinical conference in Philadelphia in 1869, and was finally agreed to by the Reform rabbis of America at the New York conference in 1892 (see CONFERENCES, RABBINICAL; PROSELYTES; REFORM).

E. G. H. K.

——**In Ethnography: Distribution:** The rite of circumcision appears to be both the oldest and the most widely spread surgical operation known. According to Andree ("Die Beschneidung," in "Archiv für Anthropologie," xiii. 76), it is still practised by more than two hundred million people, which is quite a conservative estimate, since the followers of Islam alone are reckoned at two hundred and fifty million. Though not a principle or religious duty, it is spread throughout the Mohammedan world; consequently both the age at which the operation is performed and the mode of treatment vary among Turks, Persians, Algerians, and Arabs. Among the

Africa.

Arabs circumcision seems to be a test of endurance. Philostorgius found it practised by them as early as 342 B.C. A much earlier instance, however, among Egyptian mummies, is that of Amen-en-heb, (lived between 1614 and 1555 B.C.), which H. Welcke has found to be a true case of circumcision ("Archiv für Anthr." x. 123). The practise extends over part of the Balkans, Asia Minor, Persia, part of India, and the Malay Archipelago, besides practically the whole of North Africa. Nor can this be due to Mohammedan influence, as it occurs quite as frequently among the tribes of the east and west coasts of Africa which have not been in contact with Islam. Even the Christian Abyssinians, the Bogos, and the Copts, the first of whom probably learned it from Jews, still observe the rite. Indeed, so universal is the practise in Africa that it would be simpler to give a list of the tribes that do not circumcise than to enumerate all those that do. Zobirowski attempts to prove that it is found in Africa only among those tribes which have plants of Oriental origin, like millet, rice or sorgho (boura), and appears to suggest that it has slowly spread through the dark continent from Egypt; but the absence of complete induction and of historic records renders his contention very doubtful.

The possibility of an Egyptian origin for circumcision is, however, completely disproved by the extent of the practise in Australia. The Australian evidence is of particular interest, the operation being performed there with a stone knife, as is recorded of the Israelites (Spencer and Gillen, "Tribes of Central Australia," p. 323; compare Ex. iv. 25).

The practise is almost equally wide-spread among the islanders of the Malay Archipelago.

America.

For America the evidence is somewhat scanty, and relates chiefly to the central part of the continent, though Petitot reports the practise among the Athapascans and McKenzie among the Dog River Indians. An analogous practise is reported by Squier among the inhabitants of Nicaragua, who draw blood from the organ and sow corn dipped in it. In Mexico a similar practise was found by Cortez, according to the report of Garcia de Palacio (1576); but the blood drawn was offered at the altar. Las Casas reports it among the Aztecs; and the Mayas of Yucatan still have an analogous practise. The Caribs of the Orinoco and the Tacunas of the Amazon practise the rite, as well as the Automecos, the Salivas, and the Guemos, who perform it on the eighth day, the earliest time recorded among savage tribes.

Mode of Operation: The possibility of this wide distribution of the practise being due to a dispersion from a single center like Egypt or southern Arabia, is disproved by the great variety of methods by which the removal of the prepuce is effected, some of the practises, as in New Caledonia and the Fiji Islands, throwing light on the "peri'ah" of the Jews.

The subject can not be adequately treated without a reference to the analogous operation of clitoridectomy performed on girls of nubile age, sometimes accompanied by the so-called "infibulation" of the adjacent parts. According to Ploss (in "Zeitschrift für Ethnologie," 1871, pp. 381 *et seq.*, summarized in his "Das Kind," 1st ed., i. 305-324), this occurs among the S. Arabs, in Egypt, in Abyssinia, among the Gallas, the Susus, the Mandingos, the Masai, and the Waknosi (all of whom likewise circumcise their boys), as well as in Peru and on the banks of the Ucayale River. The operation is in nearly every case performed simultaneously on males and females, though they are kept separate during the periods of preparation and operation. One sect of Jews, the Falashas, also circumcise both sexes (Andree, "Zur Volkskunde der Juden," p. 84); it is probable that this practise has been adopted from the surrounding Abyssinians.

The instrument with which the operation is performed is in almost every case an ordinary knife of iron or steel; but, as stated above, the Australians use stone knives, as the Jews and the Egyptians (Pliny, "Hist. Nat." xxxv. 46) did formerly, and as the North-American Indians and the Abyssinian Alnajas still do (Ludolf, "Hist. Æthiop." iii. i. 21). A case in which a stone knife was used by Jews is mentioned by Schudt as late as 1726. Mussel-shells are used in Polynesia. The Marolongs of South Africa used a "fire-stone" (meteorite), but now circumcise with an assegai.

Age.

Much variety is found in the age at which the rite is performed among different tribes. The earliest occurs among the Jews, on the eighth day after birth (Falashas even on the seventh), and among the southwestern Arabs, who perform the rite on the seventh, fourteenth, twenty-first, or twenty-eighth day. The Susus near Timbuctoo and the Guemos of South America are also said to perform the rite on the eighth day. In East Africa the Mazequas perform it between the first and the second month. The Persian Mohammedans circumcise in the third or fourth year; the Christian Copts, between the sixth and eighth. The Fijians perform the operation in the seventh year, as do also the Samoans. But, apart from these instances, all the tribes who perform this rite do so at the age of puberty, which is of course a very significant fact. The exceptional position of the Jews in this regard has to be emphasized in any discussion of the light which ethnology can throw upon the Biblical command.

Accompanying Ceremonial.

The act of circumcision is generally accompanied by some special ceremonial. In Samoa it takes place when the youth is named; but most often it forms a part of the general set of ceremonies initiating the young of both sexes into mature life. This is generally accompanied by trials of endurance for the lads or young men; and from a certain point of view circumcision may be regarded as one of these tests, as is definitely the case among the Jauf of South Arabia (Halévy). As instances may be mentioned the elaborate ceremonials of African and Australian savages; but there is nothing specifically religious in the initiation ceremonies, the elders of the tribe performing the operation and instructing the neophytes. Among the Falashas three old women perform the rite, possibly because it is practised on girls as well as boys. Occasionally, however, the operation is performed by the priest; and in the New Hebrides a distinctly mystic character is imparted to the ceremony, no woman being allowed to be present. Similarly, Livingstone found it impossible to obtain access to the "boguera" of the Bechuanas. Among the Bourana the lads are kept apart in a special hut; and on the day of circumcision an ox is sacrificed, and all smear themselves with its blood. Among the Sulus the blood is received in a cup of ashes and buried, while with the Marolongs the removed foreskin is buried. The rite is mostly common to the whole population, but occasionally, as in Rook Island, it is performed on the rich only, while in Celebes it is only resorted to in the case of princes who have no children. In Mexico it seems to have been a prerogative of the upper classes.
